VOL. XVIII

Slaton, Lubbock County, Texas, Friday, February 22, 1929.

Number 52.

New Pump Bought By City for Use In Water System

A new pump for the city's water system here has been purchased by the City Commission, according to Mayor W. G. Reese. It is expected to reach Slaton and be installed for use within thirty to forty-five days.

Purchase of the pump was made through the Briggs-Weaver company, of Dallas, and the pump will be sent here from Los Angeles, Calif. It will cost \$2,005, Mayor Reese said.

The pump is a motor-driven turbine of 35-horsepower. When it is installed, the city will have three pumps in operation, giving the best pumping facilities Slaton has ever had for the municipal water supply.

Changes at City Hall to Improve Office Quarters

For several days, workmen have been busy at the city hall making changes that will provide better accommodations for offices in that building.

The southeast room of the ground floor, formerly occupied by the fire department before the new fire station was finished, has been converted into an attractive and commodious office room which will be occupied by the Slaton Chamber of Commerce, instead of the space now used by that organization at the northwest corner of the building. This was announced by city officials.

When the Chamber of Commerce vacates the room it now occupies, the Retail Merchants' Association will occupy it, according to Mayor W. G. Reese. This will give better accommodations than are now available for the merchants organization, who have been occupying the west entrance of the city hall for many months.

Mrs. Toliver and Children Move to Abilene This Week

Mrs. B. A. Toliver and children, Mary Kathryn, Billie and Helen, left Thursday for Abilene, where they will join Mr. Toliver in their new home. He is now manager of the Abilene Acorn Store, having recently been transferred from Slaton to that city. The O. N. Alcorn Transfer are moving the Toliver household furnishings to Abilene.

Has Visit With Old-Time Friend

Uncle George Marriott, manager of the local Santa Fe reading room, returned Wednesday from Amarillo, where he spent a day visiting with an old-time friend, John B. Pryor, of California, who is now enroute to Iowa.

Mr. Pryor is a retired Santa Fe trainman, having been on the pension list for 13 years, Uncle George stated. He pulled the first Santa Fe passenger train into Amarillo. He sent greetings to Slaton friends by Uncle George.

PROSSER BOY IMPROVES.

The condition of Earl Prosser, Jr., 12, son of Mr. and Mrs. Earl Prosser, is reported much improved. Young Prosser was recently returned to his home here from a sanitarium at Lubbock, where he underwent a serious operation.

Andy Caldwell has received a letter from his brother at Honey Grove, Texas, stating that he has had the "flu" ever since he returned home. He visited here while Mr. Caldwell was in the sanitarium.

BANKS, POST OFFICE CLOSED TODAY

Today, February 22, Washington's birthday, The Slaton State Bank, The First State Bank, and the Post Office will remain closed all day, commemorating the event. Officials of these institutions have announced.

Late Type Farm Machinery Demonstrated Tuesday

Pulling a Massey-Harris Co. Pulverator (the plow combine) with a 20-30 Wallis tractor, the Slaton Hardware Company, local dealers for Massey-Harris, conducted a demonstration just west of the city Tuesday afternoon.

The local dealers were assisted by representatives of the manufacturers. They were C. D. Taylor, in charge of power farming machinery; Charlie Tollison, in charge of the tillage line of equipment, and M. W. Wood and Ed Todd, in charge of the demonstration.

Many farmers of this section were present to see the work of this new farm equipment, and expressed themselves as being highly pleased with this method of ploughing and pulverizing the soil.

After leaving Slaton, the company's representatives are conducting demonstrations at Southland, Post, Tahoka, O'Donnell, Lamesa, Midland, Big Spring, Colorado, Snyder, Fluvanna and Sweetwater.

Uncle George Wins In Contest Held At Post Friday

Accompanied by his granddaughter, Miss Audrey Marriott, and Miss Ethel Neihoff, Uncle George Marriott drove to Post last Friday evening, where he entered a contest which was sponsored by the Parent-Teacher Association of that city. It was termed a "Fiddler's Contest," though other entrants were permissible.

Uncle George entered the contest of amateur acts, and, it was stated, he had eleven opponents. He won first prize, however, his act being clog dancing. He was given hearty applause, and was compelled to return to the stage several times with his performance.

The success of the entertainment was due, largely, to Uncle George's performances, it was stated, the encores for his dancing being more noticeable than for any other act.

Tech Faculty Members and Students to Attend Rotary Meet

Upon invitation of the Slaton Rotary Club six faculty members of Texas Technological College and five representative students will attend the weekly luncheon of the club Feb. 22. The purpose of the meeting, according to officials of the Slaton Rotary Club, is to get better acquainted with faculty and students of Tech.

Faculty members attending will be President P. W. Horn, W. A. Jackson, W. M. Miller, J. M. Gordon, Conner Cole, and Cecil Horne. Students who will go are: Richard Nott, Otis Koen, John Burroughs, Jack Maddox and William Street.

A. J. PAYNE CONTINUES TO IMPROVE, IS REPORT

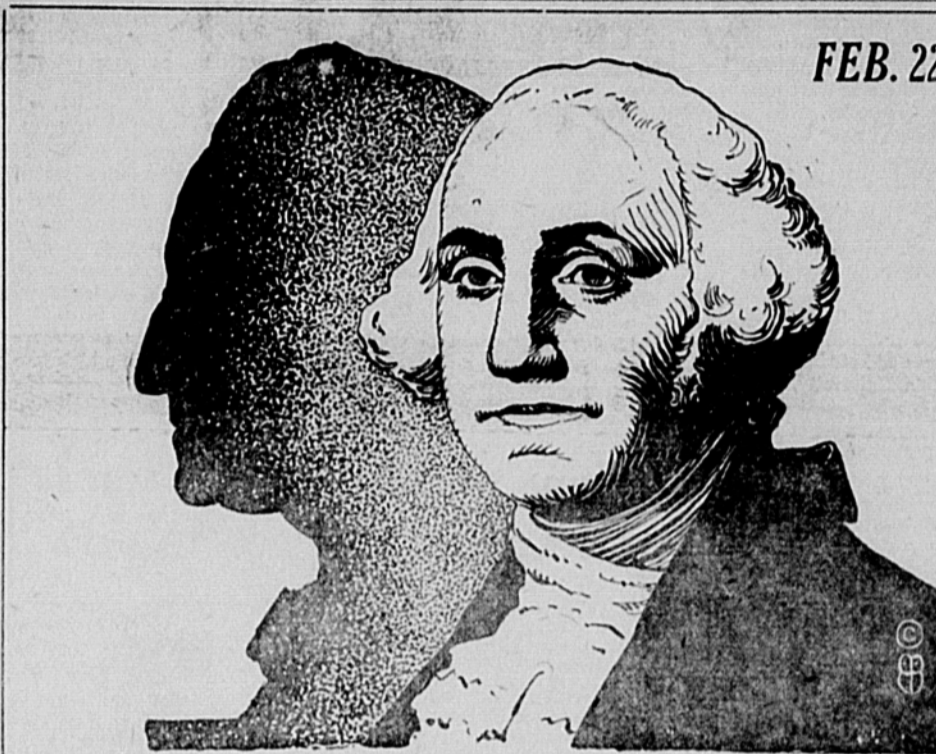

Recent word received from Mrs. P. V. Burns, of Ft. Lauderdale, Fla., indicates that her father, A. J. Payne, of this city, is gradually improving in health. Mr. Payne, who has been suffering with rheumatism for the past several weeks, went to Ft. Lauderdale a few days ago, in hopes of regaining his health. Slaton friends are very anxious about Mr. Payne's condition, and hope to hear of his early recovery.

STEPHENS AND SON ARE REPORTED MUCH BETTER

According to advices received by friends here Tuesday, J. H. Stephens and son, Fred, who went to Sweetwater several weeks ago for treatment for rheumatism, are rapidly improving in health. They have been taking treatment at the Grogan Wells there. The Messrs. Stephens expected to return to their homes here Thursday afternoon.

WEST WARD P. T. A. TO SPONSOR ENTERTAINMENT

The West Ward P. T. A. will sponsor a Negro Minstrel and Carnival next Friday evening at the West Ward school building. Everyone has a cordial invitation to attend this entertainment and help the P. T. A.

"The very idea of the power and the right of the people to establish government presupposes the duty of every individual to obey the established government."
—Washington.

Second Auction Sale Attended by Larger Crowd Than First One; to Have Third Sale Here on March 18

The second free auction sale held here for the benefit of farmers around Slaton, and sponsored and arranged by the Slaton Chamber of Commerce, was attended last Monday by a much larger crowd than was present at the first sale, which was held on Monday, Jan. 21. This was the report of Col. Joe Seale, one of the auctioneers who officiated in selling what the farmers brought in to be placed at auction. Col. W. F. Casey was his assistant.

A larger quantity of farm equip-

ment changed hands last Monday than was sold a month prior, also, Mr. Seale reported. Everybody seemed well pleased and very appreciative of the sale as arranged by the Chamber of Commerce.

Due to the success of these first two sales, it is announced that the third sale will be staged in Slaton on the third Monday in March, which will be March 18. Farmers are invited to begin planning now to bring to the sale whatever they wish to have sold.

Silver Wedding Bells Ring.

1904 February 18. 1929

The attractive suburban home of Mr. and Mrs. W. F. Florence, was the scene Monday evening, February 18, of the gathering of invited guests, who met informally, to assist the host and hostess in the celebrating of their twenty-fifth wedding anniversary.

The house was attractively decorated with garlands of silver and rose radiating from a large wedding bell suspended from the centre chandelier. Lighted candles also adorned the rooms.

After the meeting and greeting of friends, Mrs. B. G. Holloway assisted the hostess in providing excellent entertainment of games and contests, love and matrimony being the themes throughout the evening. Partners were selected by giving each a name of a famous lover.

Each husband present was required to lead his wife under the wedding bell, and there, without any prompting, relate the year, month, day and hour of day of their wedding, also to describe her wedding gown. The wife was required to respond as to why she accepted his proposal. Many laughable mistakes were made, one husband even insisting his wedding year was 1804.

Mr. Florence responded with a very interesting narration of his early experience in the South Plains country, when acting as a school teacher, and how he chose for his helpmate, the attractive Miss Louise Spinks, of Knox County, Texas, who had assisted him in his school work.

After sending over one hundred miles for the marriage license, they were married at Gomez, Terry county, where they were located, having charge of the only school in the county.

The Rev. B. G. Holloway performed the second ceremony in a very orig-

inal and unique manner, again pronouncing them man and boss, he then gave a very pleasing toast to the bride, after which Miss Pauline Lokey delivered an excellent toast to the groom.

The entertainment was interspersed with vocal and instrumental selections, Miss Lois Stallings, with a voice as sweet and clear as the wedding bell, sang several very pleasing numbers applicable to the occasion. Other music was dispensed throughout the evening by Miss Stallings and Mr. Florence, assisted by all present.

A delicious three course supper was served, Lucile Coltharp, Zona and Mary Elizabeth Florence gracefully assisting.

It was regrettable that all of the seven children could not have been present; only the three, Zona, James and Mary Elizabeth, who are still too young to leave the home nest, were present. The other four were detained by home and business duties. They are Earl O., stationed at Ft. Logan, Colo., Julia Alice, now Mrs. T. O. Lane, of Brownwood, Texas; Eunice, teacher of mathematics in Tolar High School, Tolar, Texas, and William Grady, stationed at Ft. Lewis, Washington.

The following guest list included: Mother Hill, Messrs and Mesdames B. G. Holloway, J. R. McAtee, J. B. Stallings, Geo. Marriott, C. V. Young, M. Coltharp, Paul Owens, C. F. Anderson, C. Lem Sone, T. J. Abel, E. S. Brooks, E. C. Foster, T. E. Roderick, the Misses Pauline Lokey, Lois Stallings, Lucile Coltharp and Billy McAtee.

Mrs. T. O. Lovelady and children left Thursday for Fort Worth to visit Mrs. Lovelady's mother.

Work of Firemen Saves Duplex on 11th St. Thursday

A duplex residence at 700-706 South Eleventh St. was badly damaged by fire Thursday afternoon.

The property is owned by Mrs. W. O. Turner, formerly Mrs. Alice Jordan, whose home is in Mentmore, New Mexico, and the house was occupied by Mr. and Mrs. E. E. Phillips and Mr. and Mrs. Carl A. Lewis.

Damage to household furnishings was greatest to Mr. and Mrs. Phillips. It was stated, the principle blaze being in their apartment. Their furniture was badly damaged, either by fire, smoke or water. The furnishings belonging to Mr. and Mrs. Lewis sustained very little damage, they said.

The house, as well as Mr. and Mrs. Phillips' furniture, was partially covered by insurance.

Members of the Slaton Volunteer Fire Department stated, following this fire, that this was the third such occurrence on this particular block within the past few years, two residences having been completely destroyed by fire there heretofore.

Mr. and Mrs. Andy Caldwell Celebrate Wedding Anniversary

On last Sunday, February 17, Mr. and Mrs. Andy Caldwell gave a dinner, celebrating their 22nd wedding anniversary.

Those enjoying the occasion were Mr. and Mrs. Tom Hughes and family, Mr. and Mrs. Ben Shelton and little daughter, Mrs. Glen Shelton and son, W. C. Mrs. J. M. Shelton and Mr. and Mrs. Alvis Jenkins and baby, the latter being a daughter of Mr. and Mrs. Caldwell.

Everyone present reported a very enjoyable dinner and a splendid time.

Slaton Produce is Bought by Crawford

The Slaton Produce, formerly owned and operated by L. B. Howell, and located at 157 Texas Avenue, was purchased last week by J. W. Crawford, who is now in charge of the business. Mr. Crawford states the firm will continue to buy poultry, eggs, hides, etc., and will handle a complete line of feeds and flour.

The former owner, Mr. Howell, and family, have moved to Southland, where he has opened a hatchery and produce business.

Mrs. W. Donald and Mrs. R. W. Collier, Jr. and babies, visited Thursday with Mrs. Carl Greer, who is in a Lubbock sanitarium for treatment.

Social Problem Of Birth Control Is Rotary Topic

The problem of birth control, which is now engaging much study and debate among scientists and sociologists throughout the world, was the topic discussed last Friday noon at the meeting of the Slaton Rotary Club, held at the Slaton Club House.

"The Arguments Commonly Advanced in Favor of Birth Control, and My Opinion of Them" was the subject of an address delivered by Dr. H. Frank Miller, while Rev. Ben G. Holloway discussed the subject, "The Arguments Commonly Advanced Against Birth Control, and My Opinion of Them."

Both speakers brought out very important ideas in connection with their subjects, it was reported. It was pointed out that without a degree of birth control many families become so large that they can give very small opportunities to children in the home, and in many instances such children become a burden upon society, or may even break into the criminal class. On the other hand, birth control may be carried to such extremes that society would be menaced by the slow growth of population.

These and many other angles of the two questions were discussed by the two speakers.

Among the visitors at the luncheon program, were: Rex Westerfield, of Amarillo; and W. C. Cole and R. E. Strickland of Lubbock.

Several visitors from Tech College will be guests of the Rotary Club at the meeting to be held at noon Friday of this week. Also, many Rotary-Anns, wives of Rotarians, will attend.

The program will be in charge of Will P. Florence, and will include the following numbers: A piano solo, by Miss Jeannette Ramsey; reading by Miss Ruby Dan Smith; fiddler's solo by Will P. Florence; vocal solo by Mrs. Lillian Butler; violin solo by Miss Frances Guffin; and several songs, including folk-songs and negro spirituals, by a quartet, composed of Will P. Florence, Lloyd A. Wilson, C. Lem Sone and Walter E. Olive.

Among the Tech College guests will be members of the faculty and of the student body. The aim of their visit is to promote a feeling of better acquaintance between Slaton and the Tech. The visitors were invited by members of the Slaton Rotary group. Dr. Paul W. Horn, Tech president, will probably be present.

West Texas Couple Celebrate Fifty-first Anniversary

Mrs. Fred B. Tudor and Mrs. W. F. Blackerby entertained their parents, Mr. and Mrs. D. W. Wallace, of Kress, on their fifty-first wedding anniversary last Sunday, February 17, at the home of Mrs. Tudor, 245 North Fifth St.

Mr. and Mrs. Wallace are pioneers of the Plains, moving to Canyon, in Randall county, in 1903. For the past seventeen years they have lived near Plainview.

They are the parents of twelve children, eleven of whom are living; twenty-three grandchildren and five great-grandchildren.

Those present at the celebration Sunday were, Mr. and Mrs. Wade Wallace and son, Mr. and Mrs. J. C. Eiring, of Plainview, Mr. and Mrs. Starks and two children, of Kress, Mr. and Mrs. W. F. Blackerby, and Mr. and Mrs. Tudor and son, of Slaton.

The children who were unable to attend were Mrs. Bettle Connally, of Thrift, Texas; Mrs. A. M. Brown, Dublin, Texas; Mrs. F. J. Foster, Amarillo; Montie Wallace, Fort Stockton; Milton Wallace, Waco, and Joel Wallace, McAllen, Texas.

Mr. and Mrs. Wallace returned to their home in Kress Sunday afternoon.

Mrs. Carl Greer Ill in Sanitarium

The condition of Mrs. Carl Greer who was carried to a Lubbock sanitarium last Saturday for treatment, was said Thursday to be improving. She is suffering from rheumatism, it was reported.

Ten Special Delivery Letters Daily is Record of Jarvis Hall

FORT WORTH.—Girls in Jarvis Hall at Texas Christian University receive letters from eighty different colleges and universities, a recent survey discloses.

The greatest number of letters come from Texas A. & M., with the University of Texas running a close second. Baylor University and C. I. A. come next in the number of letters sent to girls in Jarvis Hall.

Several girls receive mail from foreign countries, Shanghai, China; Buenos Aires, Argentina; Mexico City and Marcelona, Spain, being among the postmarks represented.

One girl carries on a correspondence with students in twelve other universities, and another hears from eleven schools.

Special delivery letters to Jarvis Hall girls average about ten daily and twenty-five on Sunday.

LEGION RIFLE TEAM OUTSHOOT GERMANS

Englewood, N. J.—The rifle team of Englewood Post No. 78, The American Legion, was victorious by fifty-eight points in their rifle match recently with a team composed of German War Veterans who now reside in Englewood. Members of the Legion Post believe this is the first rifle match ever held between teams composed entirely of American and German war veterans. The match was shot on the range in the Englewood Ex-service Men's club on West Street and was one of a series of competitive shoots arranged for the Legion team during the winter. Comparative scores of the two teams at the close of the competition showed the Legion team to have a total of 412 as compared to 354 for their rivals.

Spinach Salad.

To 2 lbs. spinach which has been cooked and put through colander add 3 tbs. wet horseradish and 3 tbs. olive oil, salt and pepper to taste. Mold in individual molds and serve on lettuce, garnished with hard-boiled egg. Serve with French dressing.

Nature Thought of Everything

Nature thought of everything when the human body was made. When the body is about to become ill, nature planned danger signals to warn us. Thus, if our children grind their teeth when they sleep, or lack appetite, or suffer from abdominal pains, or itch about the nose and fingers, we should know that they may have contracted worms. Then, if we are wise, we buy a bottle of White's Cream Vermifuge and safely and surely expel the worms. Thus we avoid the danger of very serious trouble. White's Cream Vermifuge costs only 35c a bottle, and can be bought from City Drug Store.

One Texas Family In T. C. U. for 25 Years, Records Show

FORT WORTH.—Records of Texas Christian University show that one Texas family has been represented continuously in the school's student body for 25 years, or since 1904. This is the Tomlinson family of Hillsboro. Ten of its members have graduated from T. C. U., and three of these have married T. C. U. graduates.

Beatrice Tomlinson, now wife of Colby D. Hall, dean of T. C. U., entered T. C. U. in 1904 and graduated four years later. She was followed by Lela Tomlinson, now head of the home economics department of the Wichita Falls High School.

Douglas Tomlinson, A. B. '09, later received the degree of LL. B. from the University of Texas and studied journalism at Columbia University, New York City. He is now president of the All-Church Press company of Fort Worth, Houston, Dallas, and Memphis, Tenn.

A brother, Roy Tomlinson, A. B. '11, is now in the advertising department of the Fort Worth Star-Telegram. Two other brothers, Homer Tomlinson, A. B. '13, and J. D. Tomlinson, Jr., A. B. '26, now live in Fort Worth, the first associated with his brother, the second with Montgomery, Ward & Co.

Myrtle Tomlinson, wife of Therman Allen of Coleman, Texas, who is also a T. C. U. graduate, was followed by her brother, Carl, deceased.

Clyde Tomlinson, A. B. '16, is now manager of the Smith-Tomlinson Hardware Co., of Hillsboro. Walter Tomlinson, manager of the Houston Times, received his degree in 1925.

T. C. Tomlinson, Hillsboro, father of Beatrice, Lela, Myrtle, Carl and Clyde Tomlinson, is a member of the Board of Trustees of T. C. U., and was chairman of the board at the time of the removal of the school from Waco to Fort Worth.

J. D. Tomlinson, also of Hillsboro, is the father of Douglas, Homer, Roy and J. D., Jr.

SAY! LISTEN.

The phone rang, and none other than Miss Rutledge answered the thing.

"Hello," she began. "Hello, do you love me?" came in return.

"Why, of course I do. Who is this?"

"Well, I'm working on the phone wires and I thought I would test out your line. I find it to be in good shape, thank you."

Prevents Rust on Tinware.

Before using new tinware, rub well with lard and stand it in a hot oven until thoroughly heated. This will prevent rust in future use.

HINTS FOR THE HOME.

(By Nancy Hart).

So much can be done to brighten dull rooms without completely refurnishing. To add a pleasing note of hospitality and brightness to the living room we may stand on a low table one of those large red lacquer trays with a tea service in Royal Canton or some other colorful pattern—or use on the table one of the new photograph boxes which come in bright colors with delightful old prints mounted on the lid.

In the dining room the eye likes to find a satisfying note of color in the neighborhood of the sideboard or serving table. This can be given by the appointments on the board or by a lovely picture hung above it—or both.

One chair in colorful upholstery can do wonders for an otherwise drab room—and color and pattern in the draperies prove an almost certain cure for dullness.

MORE PRODUCTION PER COW—DAIRYMAN'S GOAL.

The records of the dairy herd improvement association are a veritable gold mine of useful information, according to J. C. McDowell of the United States Department of Agriculture.

A study of these records shows that a cow producing an average of 100 pounds of butterfat per year returns a profit above cost of feed of \$14, while one producing 500 pounds of butterfat returns a profit of \$178. In other words as butterfat production increases five times the income above cost of feed increases thirteen times.

Culling, breeding and feeding are the keys to bigger production per cow and bigger profits from the herd. Home grown feeds are generally recommended by authorities in animal husbandry, with a grain mixture containing linseed meal as a high protein supplement.

Millions of Families Depend on Dr. Caldwell's Prescription

When Dr. Caldwell started to practice medicine, back in 1875, the needs for a laxative were not as great as they are today. People lived normal, quiet lives, ate plain, wholesome food, and got plenty of fresh air and sunshine. But even that early there were drastic physics and purges for the relief of constipation which Dr. Caldwell did not believe were good for human beings to put into their system. So he wrote a prescription for a laxative to be used by his patients.

The prescription for constipation that he used early in his practice, and which he put in drug stores in 1892 under the name of Dr. Caldwell's Syrup Pepsin, is a liquid vegetable remedy, intended for women, children and elderly people, and they need just such a mild, safe, gentle bowel stimulant as Syrup Pepsin. Under successful management this prescription has proven its worth and is now the largest selling liquid laxative in the world. The fact that millions of bottles are used a year proves that it has won the confidence of people who needed it to get relief from headaches, biliousness, flatulence, indigestion, loss of appetite and sleep, bad breath, dyspepsia, colds and fevers.

Millions of families are now never without Dr. Caldwell's Syrup Pepsin, and if you will once start using it you will also always have a bottle handy for emergencies. It is particularly pleasing to know

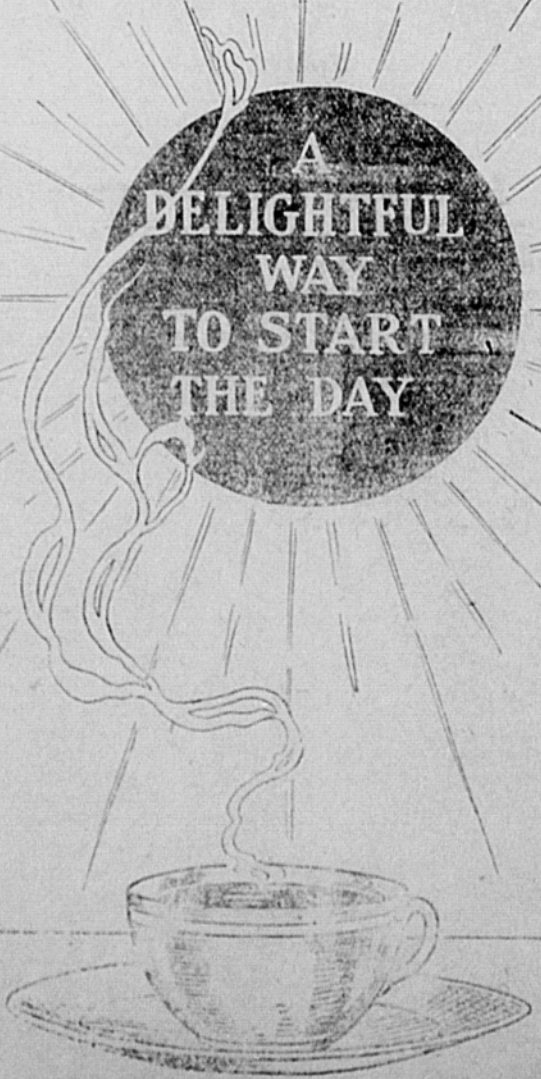

J. B. Caldwell M.D. AT AGE 63

that the most of it is bought by mothers for themselves and the children, though Syrup Pepsin is just as valuable for elderly people. All drug stores have the generous bottles.

We would be glad to have you prove at our expense how much Dr. Caldwell's Syrup Pepsin can mean to you and yours. Just write "Syrup Pepsin," Monticello, Illinois, and we will send you prepaid a FREE SAMPLE BOTTLE.

SUNSET Coffee ALWAYS FRESH

A DELIGHTFUL WAY TO START THE DAY

At Your Grocers

MARTHA LEE Beauty Week

February 25th to March 2nd,

We will have with us a Toilet goods specialist direct from the manufacturers of Martha Lee Toiletries who is an authority on the skin from scientific study and years of practical experience.

She will give to you—without charge or obligation Skin Analysis also French Pack Facial

She will also suggest the proper and correct method of treatment for your particular type of skin and advise you upon the latest and most charming arts of personality make-up. You are urged to avail yourself of this unusual opportunity.

Bowlegged Family.

Morristown, N. J.—All seven of the children of Jerry Miller, railroad brakeman, were born with bowlegs or acquired them soon after. May, now 14, has outgrown the peculiarity, in view of which County Judge Holland agreed with Miller that he should not be obliged to have an operation to straighten the legs of Helen, 7, and

Thelma, 3, as asked by the Hospital Social Bureau.

Oldest Twins.

Woodville, O.—Henry and William Bruns, believed to be the oldest twins in America, celebrated their 95th birthday anniversary. In Fremont, O., John and Frank Wurzel, 60, twins, also celebrated their birthday.

NOTICE OF CHARTER ELECTION.

AN ORDINANCE, ordering an election in and for the territory described in Section 1 of this Ordinance, to be held on the 19th day of March, A. D. 1929, for the purpose of submitting to the qualified voters resident within the said territory the question of the adoption or rejection of the proposed Charter prepared and framed by the Charter Commission heretofore selected; designating the place at which said election is to be held; appointing a presiding officer of said election, and declaring an emergency.

WHEREAS, on the first day of November, A. D. 1928, the citizens of the City of Slaton, Texas, in public meeting assembled, held at the City Hall in said city, selected a Charter Commission of fifteen (15) qualified citizens of said city to frame a new Charter for the said city; and,

WHEREAS, the City Commission of the City of Slaton, Texas, has examined into and investigated the regularity of the proceedings for the selection of the said Charter Commission and finds that the same were had in due and legal manner and in strict conformity with all the requirements of law; and,

WHEREAS, each and all of said fifteen citizens, so selected as aforesaid, duly qualified as members of said Charter Commission; and met and organized same, and duly proceeded to frame a new Charter for the City of Slaton, Texas, and heretofore, on the 4th day of February, A. D. 1929, as such Commissioners, signed such proposed new Charter, and duly provided for the submission of same to a vote of the qualified voters of said city and territory, at an election to be held upon the question of the adoption or rejection of such Charter upon the 19th day of March, A. D. 1929; and,

WHEREAS, the said Charter Commission provided that the present City Commission shall call the election for such purpose; and,

WHEREAS, the said Charter Commission will ratify and confirm and make the enactment of this Ordinance its act and deed, and will make such Ordinance its order for such election, all of which will be evidenced by the signatures of the members of said Charter Commission appended hereto under the words: "APPROVED BY CHARTER COMMISSION"; therefore,

BE IT ORDAINED BY THE CITY COMMISSION OF THE CITY OF SLATON, TEXAS:

Section 1. That an election shall be held on the 19th day of March, A. D. 1929, within and for the territory set forth in the proposed Charter, as constituting the City of Slaton, Texas, described by metes and bounds as follows, to-wit:

Beginning at the southwest corner of Survey No. 44 in Block S;

Thence West 640 feet to a point in the south boundary line of Survey No. 47, same block;

Thence South 3,000 feet to the southwest corner of the northwest quarter of Survey No. 20, in Block No. 24;

Thence East 7,920 feet to the southeast corner of the northwest quarter of Survey No. 19, in Block No. 24;

Thence North 2,009.2 feet, being thirty (30) feet north of the Northeast corner of Lot No. 1 in Block No. 52 in the South Park Addition to the Town of Slaton, Texas;

Thence East on the south boundary line of Geneva Street 2,640 feet to the west boundary line of Survey No. 18 in Block No. 24;

Thence North on Avenue F 612 feet to an iron stake for corner;

Thence East along the south boundary line of Block No. 117 in the South Slaton Addition to Slaton, Texas, 320 feet to the east line of said block;

Thence North 2,400 feet to stake for corner;

Thence in a Northwesterly direction approximately 6,200 feet to an iron stake in the south boundary line of Survey No. 43, Block S, 300 feet north of the northwest corner of Lot No. 50 in the extension of Block A of the Original Town of Slaton, Texas;

Thence South 400 feet to the southwest corner of Lot No. 50 in the extension of Block A of the Original Town of Slaton, Texas;

Thence in a southeasterly direction along the south boundary line of the extension of said Block A of the Original Town of Slaton, Texas, 1,000 feet to the southwest corner of Lot No. 30 in said Block A;

Thence South 21 deg. 33 min. west 2,080 feet to a monument;

Thence North 55 deg. 33 min. west 3,192 feet to the west line of Survey No. 44, Block S;

Thence South 4,572 feet to a stone, being the southwest corner of Survey No. 44, in Block S, the point of beginning; at which the following proposition shall be submitted:

Shall the Charter reported by the Charter Commission to the City Commission of the City of Slaton, Texas, on the 4th day of February, A. D. 1929, and which had been duly prepared by the Charter Commission duly selected by the qualified citizens of said city in mass meeting assembled on the 1st day of November, A. D. 1928, be adopted as the Charter of the City of Slaton, Texas, as contemplated and authorized by the Constitution and laws of the State of Texas, including Chapter 13 of Title 28, Revised Civil Statutes of the State of Texas of 1925?

Section 2. Said election shall be held at the City Hall in the said City of Slaton. J. H. Teague, Sr., is hereby designated and appointed presiding officer at said election, and he shall select two judges and two clerks to assist him in holding the same.

Section 3. That said election shall be held under the provisions of Chapter 13 of Title 28 of the Revised Civil Statutes of the State of Texas of 1925, and all persons resident within the limits of the territory defined in Section 1 of this Ordinance who are qualified voters under the laws of Texas regulating general elections shall be allowed to vote.

Section 4. That the manner of holding said election shall be governed by the general laws of the State of Texas, regulating general elections, when not in conflict with the provisions of the law hereinbefore referred to.

Section 5. All voters desiring to adopt the Charter so prepared and reported by the Charter Commission

shall have printed on their ballots the following:

"OFFICIAL BALLOT CITY ELECTION.

QUESTION: Shall the Charter framed by the Charter Commission be adopted?

FOR the adoption of the Charter".

All voters opposed to adopting the Charter so prepared and reported by the Charter Commission shall have printed on their ballots the following:

"OFFICIAL BALLOT CITY ELECTION.

QUESTION: Shall the Charter framed by the Charter Commission be adopted?

AGAINST the adoption of the Charter."

Section 6. That the actions of the aforesaid Charter Commission, and of the City Commission, in calling the election for the purpose hereinabove stated, and in all other respects with reference to the framing of said Charter and submitting the same for adoption or rejection, are hereby ratified and confirmed, and the said Charter Commission, or the members thereof, shall ratify and confirm all things done by the present City Commission of the City of Slaton, Texas, with respect to the matters and things dealt with in this Ordinance, and shall make the same their act and deed by subscribing their respective names hereto under the caption: "APPROVED BY CHARTER COMMISSION," and such names so subscribed shall be published as a part of this Ordinance.

Section 7. A copy of this Ordinance shall be sufficient notice of said election, and thirty days' notice of the time and place of holding the said election shall be given by posting certified copies thereof in three public and conspicuous places within the said designated territory as set out in Section 1 of this Ordinance, one of which shall be at the City Hall, at least thirty days prior to holding said election, and by publication of such notice once each week for five weeks, the date of first publication being not less than thirty full days prior to the date of said election.

Section 8. The fact that the present form of government of the City of Slaton is inadequate, and that the public interest requires a change in the form of the government of said city, creates an emergency and an imperative public necessity that this Ordinance take effect and be in full force

from and after its passage (there being no Ordinance of said City requiring Ordinances to be read at more than one meeting of the Commission), and it is ordained that this Ordinance shall take effect and be in full force immediately upon its passage and approval.

Passed and approved this 15th day of February, A. D. 1929.

W. G. REESE, Mayor.

ATTEST: HARVEY AUSTIN, (SEAL) City Secretary, APPROVED BY CHARTER COMMISSION.

J. S. Edwards, W. E. Olive, S. S. Forrest, A. J. Payne, W. R. Wilson, W. H. Smith, J. W. Hood, W. E. Smart, P. G. Stokes, T. A. Worley, J. H. Brewer, S. H. Adams, R. A. Baldwin, S. E. Staggs.

THE STATE OF TEXAS, CITY OF SLATON, COUNTY OF LUBBOCK.

I, Harvey Austin, City Secretary of the City of Slaton, Texas, do hereby certify that the above and foregoing is a full, true and correct copy of the Ordinance Ordering Charter Election passed by the City Commission of said City of Slaton on the 15th day of February, A. D. 1929.

In Testimony Whereof, I have hereunto set my official hand and affixed the Seal of said City, at office in Slaton, Texas, this 15th day of February, A. D. 1929.

(SEAL) HARVEY AUSTIN, City Secretary, City of Slaton, Texas.

GLASS JARS FOR CEREALS AND SPICES.

A handy way to keep cereals and spices fresh and dry is in glass jars with tight screw-on covers. Not only do these things keep better that way but you can tell at a glance just how much you have on hand of each.

The glass jars arranged on a shelf present a far neater, more systematic appearance than packages of every size, shape and color that clutter up your pantry or cabinet, and spill out every once in a while.

Fattening Hogs For Market at Reduced Costs

Tests recently conducted at the Nebraska Experiment Station showed the mixture of three parts tankage to one part linseed meal to be the best protein feed for hogs.

If the pigs are being rushed for an early market, tankage proves especially valuable as an addition to the corn and pasture ration. A cheaper but slower gain can, however, be effected by the hand feeding of a limited amount of corn which will make the pigs eat more pasture. This method is recommended to farmers who are short on corn and who wish to use the new fall crop.

The pigs in the experiment were fed shelled corn and high protein feed in self-feeders. Besides this ration, they were given a little chopped alfalfa. The linseed meal added to the tankage helped the pigs make a larger daily gain, giving them a better appetite. The lot given this protein supplement produced 100 pounds of pork on less than the lot which was fed corn and tankage alone.

R. O. T. C. AID IS GIVEN TECH COLLEGE

LUBBOCK.—The application of Texas Technological College to the federal government for Reserve Officers Training Corps aid under section 550 National Defense Act has been approved by the War Department, according to a letter received here by Lieutenant H. E. Killin, commandant of the present military corps at the College.

With the enrollment of 300 cadets in the work at the College, a senior R. O. T. C. unit may be secured which will provide full equipment and officers together with regular pay of 70

cents per day to all juniors and seniors taking the work.

ALL THAT GLITTERS Is Not Gold

How these immortal words apply to thousands of every day matters of life.

Judge quality not by surface appearance. In Hardware this is especially good advice. All tools look alike upon casual examination. True quality is hidden in the temper, in the care with which the article is fashioned and the excellence of the steel.

In hardware for building, in utensils for the home, in tools and equipment for the farm, Quality is of Paramount Importance.

GEORGE WASHINGTON.

We pause this week to honor the memory of one of the greatest of all men who have played heroic roles upon the stage of history—George Washington, founder and father of our country.

Few men there are who have left a deeper impression than he did upon their time and the times to follow. Our great Republic as it stands today is a monument to his genius, as an organizer, as a general, and as a statesman.

To him above all other men must go credit for the success of the colonial armies in the field during the War of Revolution. With no opportunity for advance preparation, with meagre financial backing, with limited manpower, he was still able to whip an army into shape that withstood the attacks of the disciplined forces of the greatest power then existent in the world. This alone entitles him to a place along with Hannibal, Frederick the Great, Napoleon and all the other great military leaders of the past.

But his service to his country had barely started with this great achievement. Following the surrender of the British forces in America, came a

period of chaos and disorganization so distressing that writers of the time began to despair of the future of the American Republic. The Constitutional Congress assembled. It was presided over by George Washington. And under his guidance it drafted what Gladstone called, "The greatest instrument ever stricken off by the mind of man." This, too, was an achievement worthy of a lifetime of effort, but Washington's labors for his country were far from finished.

For eight more years he occupied the highly difficult position of President of the United States. Without precedent or experience to guide his official acts and conduct, he brought order out of chaos, put the new nation on a firm financial and economic foundation, and won for his country recognition and respect from the entire world. To understand what this means one must realize how great a part previous experience and precedent play in the official acts of all great executive leaders.

He was sailing an uncharted sea. He was creating a great and magnificent structure for which there were no plans and specifications. An impossible task, yet he accomplished it. Surely there have been few men who have exerted a more profound influence upon the history of our nation and of the entire world. One may wonder what might have happened without his leadership.

GEORGE WASHINGTON; THE FARMER.

The birthday of George Washington, coming as it does during National Farm Equipment Week which is observed February 18-23, recalls to mind the fact that by birth and inclination the great Washington was a farmer, a planter and country gentleman. A friend of Washington's who

visited Mount Vernon in 1785 said it was his host's "greatest pride to be thought the first farmer in America." At the time of his death Washington owned some 60,000 acres of land, of which more than five square miles were under cultivation. In his pastures and stables were several hundred horses and cattle, not to mention the sheep, hogs and poultry in his barnlots.

It is a far cry from the wooden moldboard plow with points made of scrap iron used in the days of Washington to the powerful two, three, four or more bottom tractor plows now in everyday use. The cradle and flail have given way to the tractor binder and the combine, with one man harvesting 30 acres per day instead of two, which was the maximum under the old method. Near Point Pleasant, Virginia, on a farm once owned by Washington, a modern combined harvester-thresher has been in use for two years, cutting and harvesting the grain in one operation. A powerful tractor now furnishes the motive power at Wakefield, Washington's birth place, where formerly the first mules raised and used in the United States were employed.

Simplicity in Design Feature of Ford

Simplicity of design, which helped make the Model T Ford car famous all over the world for its dependable performance and economical maintenance costs, is equally characteristic in the new Model A Ford.

This simplicity is particularly noticeable in the ignition system of the new car. This ignition system is standard but the units are new in design and construction and somewhat revolutionary, but there is nothing complicated about it. Being in effect the very life-stream of the car, it was designed by Henry Ford and his associates to give a maximum amount of service with a minimum amount of trouble and the thousands of Model A Fords which already have seen hard service under all sorts of conditions have vindicated the judgment of the designers.

One of the unique features of this new system is the elimination of high tension cables from the distributor to the spark plugs. Thin bronze springs, short sturdy and easily kept in place, are used for the connections between spark-plugs and distributor.

There is but one high tension cable and this connects the coil, placed on the dash, with the distributor which is on the right hand side and at the top of the engine cylinder head. The one primary wire from the switch to the distributor passes through the dash in a steel conduit which eliminates wear and danger from possible short circuits and which makes it impossible for any thief to cut the wires at the ignition lock and wire around it, so as to start the car without a key.

CLEAN THE SEED AND SAVE THE YIELD

One of the most valuable items of farm equipment from the standpoint of cash return on the investment is a good fanning mill, points out the research department of the National Association of Farm Equipment Manufacturers. Weeds are the most dangerous enemies of crop yields, yet, year after year, thousands of acres of grain are deliberately sowed with weed seed by farmer operators who do not clean their seed grain.

Operation of a fanning mill is made most efficient by means of a gas engine or electric motor to operate it at a more uniform speed than is possible to attain by hand turning. When overhead bins are used to store grain, seed cleaning may be made practically automatic by allowing the grain to flow by gravity from the bin into the hopper of the fanning mill.

Some Key.

London.—Every door lock in the village of New Conisborough, a mining village near Doncaster, can be opened with one key.

Nine-Tenths Preventable

Nine-tenths of all the diseases of the American people can be traced directly to constipation, doctors say. Constipation throws into the system poisons which taint and weaken every organ of the body and make them easy victims for any germs which attack them. Prevent constipation and you will avoid nine-tenths of all diseases, with their consequent pain and financial losses. Herbine, the good old vegetable cathartic, will prevent constipation and keep you easy and day from

POWER FARMING IS ADVANCING RAPIDLY

Power farming is making very rapid progress in America, says the February 15 Oklahoma Farmer-Stockman. Each year sees some new farm equipment added to the list of machines that enables farmers to handle more land with less labor or to reduce the cost of producing crops.

The rapid extension of the combine throughout the great plains is one of the outstanding recent developments. Ten years ago there were only a few dozen combines scattered throughout northern Oklahoma. These did so well and so satisfied were their owners by the marked savings in harvesting costs, that hundreds more were brought in following the first demonstrations in 1919 and before many years the combine will be the standard method of harvesting throughout the southwest.

One of the time and labor-saving soil preparation implements which has made especially rapid progress this last season is the one-way disk plow. This implement is known by several names, but consists essentially of a series of large plow disks mounted on shafts so as to throw the dirt one way, and with heavy guiding wheels set so as to help overcome the side thrust.

Especially rapid advancement has been made during the last year in the motorization of row-crop cultivation. The spread of the two-row cultivator in the cotton growing sections of southwest Oklahoma and western Texas is an example of this. The smooth fields in that section permit of accurate work with the two-row tool and each spring sees more of these cultivators following the rows in that section.

KNOW TEXAS.

Texas produced 8.6 per cent of the total value of all crops produced in the United States in 1928, showing an increase of \$45,389,000.

The value of Texas cotton for 1928 was placed at \$450,625,000.

The three principal Texas crops in 1928, in the order of their value, were cotton, cotton seed, and corn.

There will be no eclipse either of the sun or moon visible in Texas in 1929.

Cowboy Band to Attend Hoover Inauguration March 4

Abilene, Tex.—"On to Washington and bring Hoover back to Texas" is now the cry of the Simmons University Cowboy Band, chosen to go with the Hoover Good Will special train as its official band, leaving Dallas February 28 to attend the inauguration of the new president. One of the principle purposes of the Cowboys in Washington will be to bring Hoover back to the West Texas Chamber of Commerce Convention, of which they are also the official band, meeting in El Paso next May.

As part of the plan to raise money to take them to Washington the Cowboys will stage the most elaborate concert in their history February 25 in the Simmons University auditorium. Arranged in their picturesque uniforms of ten gallon hats, chaps, and boots, they will give a program varying all the way from the classical numbers of Rossini to the lighter popular marches which have made them famous on parade. The fifty men who will take part in the concert are rehearsing daily to be in readiness for what they intend to make the feature musical attraction of the year. Last year they played before two thousand people in the annual concert.

Contributions are being received from business men all over this section of the state who realize that the Cowboys in Washington will be a big advertisement for West Texas, and

give the East a view of the famous Texas cowboy as he is today.

The management is depending on West Texas to support the concert and send this representative of the growing West back to the East where it will advertise this section as it has never been advertised before.

The Cowboys were selected to make the trip to Washington because they best represent Texas as a cowman's state and are just what the East will expect of a band from Texas.

The organization also holds some of the highest honors to come to a band in the South, being the official band of the Texas and Southwestern Cattle Raisers Association and the lifetime band of the Southern Confederate Veterans.

The Cowboy Band has already a place reserved up near the front of the big parade down Pennsylvania avenue in Washington.

In that city they are due to arouse the big sensation which they have always caused in eastern cities and in this case they will have a larger audience than ever before. While in the East they will emphasize the fact that they are the band of West Texas, the band of the Southern Confederates, and that they want Herbert Hoover to attend the West Texas Chamber of Commerce Convention in El Paso.

Mr. Kink (to a professor in Biddle University, S. C.): "Perfesser!" "Well, Mr. Kink?"

"Which is the past tense of the verb 'to hoodoo'—'hoodone' or 'hoodid'?"

 Preaching at 7:30 p. m.
 Mid-week prayer meeting, Wednesday at 7:30 p. m.
 "Livest Church in the City".
 Reporters.

AT THE PRESBYTERIAN CHURCH

Sunday, Feb. 24, 1929.
 Sabbath School meets at 9:45 a. m.
 Morning Worship, 11 a. m.
 C. E. meets at 5:30 p. m.
 Evening service meets at 7:30 p. m.
 The pastor will preach at both services on themes of interest.
 The public has a cordial welcome to attend all of these services. Come and worship with us.
 Rev. James Rayburn, Pastor.

REVIVAL MEETING AT FIRST CHRISTIAN CHURCH

Rev. Howard Rogers, pastor of the First Christian Church of Clovis,

N. M., visited Slaton church last Sunday and gave three fine sermons, which were well attended. There was so much enthusiasm manifest that Rev. Rogers was urged to conduct a series of Gospel services.

We feel that not only the members of the Christian Church, but all Christians of Slaton, will be well paid for any effort necessary to hear Rev. Rogers next week. Not only those who have already accepted their Saviour will enjoy these services, but those who are yet out of the "Ark of Safety" will feel the urge of this powerful man of God, and should not fail to hear his messages.

Good singing, fine fellowship, excellent preaching, for all who attend these services.—Contributed.

Plenty of Shoe Polish.

Washington.—2,781,326 pounds of shoe polish, valued at \$776,326, was shipped by American firms to other countries during the first ten months of 1928. The greater part of this went to Cuba, Canada and South America.

This Week

By Arthur Brisbane

BORAH, GOOD AMERICAN GROW YOUR OWN FUR COATS EINSTEIN'S DISCOVERY PUBLISHERS, CHEER UP

Senator Borah, good American, fears that if we build cruisers without making arrangements satisfactory to Britain we shall have a "shipbuilding race with England". If necessary, why not have it?

But Britain couldn't afford it and knows well that we shall never attack Britain unless we are first attacked.

The British, while they could, dominated the seas, and were proud of it. Whoever didn't like it could lump it. That condition existed from the day when Nelson at Trafalgar wiped out Napoleon's chances of British conquest, up to 1924.

It is Uncle Sam's turn now. Airplanes, submarines, fast cruisers, will answer any question from any other nation, and this country should have the answer ready.

Grow your own fur coats at home. Mr. Vernon Bailey of the Agricultural Department tells you that muskrats, supposed to need big swamps, can be raised like rabbits or guinea pigs, in small pens. They need only enough water to keep comfortably wet and cool in summer. This will interest California rabbit raisers, among others.

The world of science, including Bertrand Russell, called the greatest living mathematician, is interested in Professor Einstein's announcement that electro-magnetism and gravity are practically the same. This discovery, says the learned Dr. Pupin, of Columbia University, places Einstein beside Galileo and Newton.

All interested in physics await a demonstration that there is only one kind of force in the universe; that light, heat, motion, electro-magnetism, gravity are all the same. Einstein seems to confirm part of Herbert Spencer's definition of evolution which describes the "retained emotion" as undergoing a transformation from "an indefinite, incoherent homogeneity to a definite, coherent heterogeneity."

More interesting to practical publishers of newspapers is the fact that the big Woolworth concern plans an enormous advertising campaign amounting to \$3,000,000 the first year. Abandoning the theory that selecting the right location makes advertising unnecessary, proves the wisdom of Woolworth's president, Mr. H. T. Parson.

Get the best position for your store, by all means. But get also the best "position" and the best copy for your advertising in a newspaper. Have what the people want, then let the people know you have it. That's the secret of success.

Work fearlessly for the right and you will be honored, and appreciated AFTER YOU DIE. Mrs. Parkhurst thought women should vote. Since they created the

men for wars, they should have something to say about war.

Everybody agrees with Mrs. Parkhurst now, and Mr. Baldwin, who opposed her, will unveil her monument.

When she was alive, demanding justice for women, they put her in jail. She starved herself until she was released, justice not liking the idea of disposing of her corpse, and that is what it would have had to do.

Released from prison, she renewed her fight, chained herself to the iron railings before the Commons, was jailed again, and again entered self-

imposed starvation.

Her courage won. British women vote in the House of Commons and help to make laws. Mrs. Parkhurst lies in her grave, her death hastened by hardship; and those that hounded her now honor her. She is satisfied.

TERRACING PAYS.

BURNET.—Cotton grown on two terraced fields in this county as demonstrations made 150 pounds more seed cotton per acre than did the crop on similar near-by unterraced land,

according to A. J. Cotton, veteran county agent here. The value of good preparation, cultivation and seed was demonstrated by eight other farmers who reported 743 pounds of seed cotton per acre as against 193 pounds an acre where ordinary methods were used.

\$109 for Old Coin.

Gettysburg, Pa.—At a sale of antique coins, a \$50 gold piece sold for \$109. It was minted in 1852. A \$2 coin bearing only the mint date of 1806 sold for \$6. The \$50 coin was plain on one side, the other having a figure, inscription and the date.

Rotary International Celebrates Twenty-Fourth Anniversary This Week

Chicago.—The spirit of friendship and service, seeking expression in the minds of four friends gathered in Chicago on February 23, 1905, has spread to all corners of the world where more than 140,000 Rotarians in over three thousand Rotary clubs are celebrating this week the 24th anniversary of the founding of Rotary.

The first club was formed in Chicago by Paul Harris and three friends, with fellowship, cooperation, high business principles and service to others as the foundation. Two of the original four, Paul Harris and Sylvester Schiele, are still active Rotarians.

Their idea grew slowly at first, but within five years there were 16 Rotary clubs in the United States, and one in Winnipeg, Canada. By 1911, Rotary clubs were organized in Dublin and London and Rotary entered upon its career as a worldwide organization.

Today 140,000 Rotarians bring the spirit of fellowship to the common table each week in the cities and towns of 44 nations. The Rotary club has given to the business or professional man of any city in the world a place where he can meet other men on the basis of friendship, high ethical principles, and international good will. The idea of the service club today is universal.

Underlying the rapid extension of the Rotary movement has been the fact that there is no dead timber in Rotary membership; men must attend and participate or make room for others more active. The discussion of politics is taboo, and men of all nationalities and creeds are brought together on the simple platform of fel-

lowship and service.

This simplicity and frankness are gradually disarming the critics of the service club. Definite programs for the social betterment of their communities throughout the world have answered for Rotary the criticism that its objects are but platitudes, itself only a luncheon club.

Wherever a Rotary club has been established, it has added something vital to the community, not to duplicate but to assist in the work of existing community organizations, or to supply a need where no such leadership exists.

It is a cardinal principle of Rotary that a member should join not for what he can get out of it, but for what he can give, as expressed in the motto, "Service Above Self". Civic, philanthropic and humanitarian activities form a part of the program of Rotary clubs the world over.

Among the milestones in the growth of Rotary from on man, Paul Harris, the founder, to 140,000 Rotarians, in the comparatively brief span of 24 years, are:

First club organized Feb. 23, 1905, in Chicago.

National Association formed in August, 1910, in Chicago by the first 16 clubs.

International Association formed in August, 1912, at Duluth, Minnesota.

Rotary International became name by adoption of revised constitution June 6, 1922, at Los Angeles.

Since the revision of the basic laws of Rotary in 1922 a branch Secretariat has been established at Zurich, Switzerland, to be of particular service to the Rotary clubs of Europe.

In the past decade Rotary has been extended into 40 nations, and in the past year the preliminary negotiations have been started for creation of clubs in Greece, Turkey, Egypt, Java, Manchuria, Yugoslavia and other lands whose habits of thought and customs differ widely from America where the service club idea had its origin.

Groups of the leading business and professional men keenly interested in the idea of such a world fellowship have been brought together in Athens, Greece; Constantinople, Turkey, and Dairen, Manchuria, to discuss the principles and purposes of Rotary and its introduction into their community life.

This extension carries out one of the principal objects of Rotary, the organization of a world fellowship of business and professional men to advance the cause of international understanding and goodwill.

Nearly 100 new Rotary clubs have been granted charters since the last birthday anniversary of Rotary and more than 7,000 Rotarians have swelled the ranks of membership to over 140,000.

Trainloads and shiploads now gather at the annual Rotary conventions, which have grown into the largest international gatherings in the world. The customs and methods of doing things in the 44 countries represented by these great cosmopolitan gatherings are not the same, but they hold in common the plans they are striving to attain.

Stated briefly, these are service on the basis of all worthy enterprises; high ethical standards in business; the application of the ideal of service in

MORE TRUTH THAN POETRY.

"Where's the president of this railroad?" asked the man who called at the general offices.

"He's down in Washington, attending the session o' some kind uv' an investigatin' committee," replied the office boy.

"Where's the general manager?"

"He's at th' meeting of th' legislature, fightin' some bum new law."

"Where is the head of the legal department?"

"Then where is the passenger agent?"

"He's explainin' t' th' commercial travelers why we can't reduce th' fare."

Where is the general freight agent?"

"He's gone out in th' country t' attend a meeting o' th' grange an' tell th' farmers why we ain't got no freight cars."

"Who's running the blame railroad, anyway?"

"Th' legislatures and investigators."

Big Assortment at T. C. U. Museum

FORT WORTH.—Ammonites, skeletons, snakes, dinosaur track, an ostrich egg, a tarpon, a mad stone, a fossil pearl in a fossil oyster—these are some of the articles to be found in the geology and biology museum of Texas Christian University here.

The museum houses what is said to be the best lower crustaceous collection in North America, excepting that at Washington, D. C.

The ammonites in the museum are surpassed in size only by the famous Senonian ammonites of Europe. They were collected in the summer of 1927 from the Rio Grande Valley, from El Paso to Del Rio. One specimen is more than four feet across.

A print of a dinosaur's foot, made in soft mud in ages long past, was found in Texas. The foot was three-toed, like that of a chicken. The specimen at T. C. U. is said to be only a small one, but it measures a foot and a half between the two outer toes and left a print three inches deep.

One tier of shelves is devoted to various bones of elephants and mammoths which were numerous in this state millions of years ago. The fossil oyster, with one fossil pearl, was found near Austin.

Butterflies, moths, bees, wasps, spiders, etc., exhibit all local as well as many foreign species. Sea shells

of every denomination and size occupy one cabinet.

A large number of mounted flowers from the Holy Land, many having interesting histories, are of varied colors and curious design.

Grain Rates to be Lowered, is Report

Farmers of the South Plains, along with grain dealers and shippers, are vitally affected by the decision announced yesterday as having been made by the Texas Railroad Commission at Austin, in which the present exorbitant freight rates on grain seed shipments of less than carload lots are to be lowered on February 15.

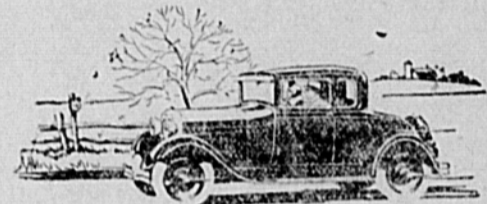

The change in rates will mean the saving of hundreds of thousands of

dollars to various agencies and producers of grain on the South Plains, as present schedules make it almost impossible for less than carload shipments of grain seed to be sent from here to points in east and south Texas.

Information of the Railroad Commission's decision was contained in a telegram from that body to A. L. Reed, of Dallas, who arrived here yesterday, and who was recently retained by Lubbock grain dealers and the Chamber of Commerce, jointly, to represent them in asking the commission for lowering of these unjust charges.

The enormity of this business is expressed in the fact that last year one Lubbock grain and seed concern shipped more than 1,000,000 pounds of seed from this city in shipments of sacks less than carload lots.

Fuel system of the new Ford has been designed for reliability and long service

THE practical value of Ford simplicity of design is especially apparent in the fuel system.

The gasoline tank is built integral with the cowl and is unusually sturdy because it is made of heavy sheet steel, terne plated to prevent rust or corrosion. An additional factor of strength is the fact that it is composed of only two pieces, instead of three or four, and is electrically welded—not soldered.

Because of the location of the tank, the entire flow of gasoline is an even, natural flow—following the natural law of gravity. This is the simplest and most direct way of supplying gasoline to the carburetor without variations in pressure. The gasoline feed pipe of the new Ford is only 18 inches long and is easily accessible all the way.

The gasoline passes from the tank to the carburetor through a filter or sediment bulb mounted on the steel dash which separates the gasoline tank from the engine.

The carburetor is specially designed and has been built to deliver many thousands of miles of good service.

Since all adjustments are fixed except the needle valve and idler, there is practically nothing to get out of order.

The choke rod on the dash acts as a primer and also as a regulator of your gasoline mixture. The new hot spot manifold insures complete vaporization of the gasoline before it enters the combustion chamber of the engine.

As a matter of fact, the fuel system of the new Ford is so simple in design and so carefully made that it requires very little service attention.

The filter or sediment bulb should be cleaned at regular intervals and the carburetor screen removed and washed in gasoline. Occasionally the drain plug at the bottom of the carburetor should be removed and the carburetor drained for a few seconds.

Have your Ford dealer look after these important little details for you when you have the car oiled and greased. A thorough, periodic checking-up costs little, but it has a great deal to do with long life and continuously good performance.

FORD MOTOR COMPANY

An Oklahoma Mother Says:

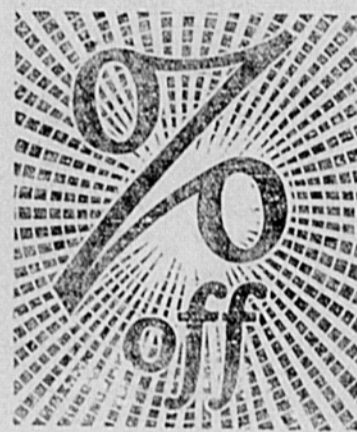

"BLACK-DRAUGHT is a fine medicine to give to children. I use it for mine whenever I need to give them a laxative. They don't mind taking it when I make it into a tea, and it quickly relieves constipation and the bad symptoms which come from it. I can recommend it to other mothers, for I have found it useful in my home."

"When I was a child my mother gave it to me whenever I complained of not feeling well. I have always taken it for upset stomach and constipation. It is about the only medicine I have to take. A few doses of Black-Draught, now and then, keep my system in order. My husband takes it, too. I hardly see how I could keep house without Black-Draught. It has become a standby with us, in keeping the children and ourselves well."—Mrs. Luther Brassfield, Claremore, Okla.

comprehensive answer yet obtained to the question, "How did Chevrolet succeed in affecting one of the most mammoth turnovers in industrial history?" was revealed here today.

Since mid-November when Chevrolet announced that it would discontinue producing four cylinder cars and would produce instead, a six in the price range of the four, speculation in automobile circles was rife as to how this was to be accomplished. Other manufacturers who had attempted turnovers had required as long as 18 months to two years to swing back into capacity production. There were many skeptics.

When Chevrolet followed up its announcement of a six with the announcement that deliveries on the new models were to begin January 1, few outside the company believed the feat would be accomplished. But deliveries in quantity numbers did begin January 1. On that date practically every Chevrolet dealer in the country displayed the new six. Once more the question re-echoed throughout trade circles, "How did they do it?"

The answer as it now comes to light can be epitomized in a single word—"foresight". The foresighted policies of General Motors and Chevrolet have never been known to countenance any blind gestures. The Chevrolet Six, which is today speeding over the highways in thousands, was born four years ago.

At that time General Motors began considering, with an open mind, whether a six cylinder car could be produced to sell in the price range of the four. Shortly afterward Chevrolet engineers designed the first of the 100 engines which was to precede the one which today powers the new Chevrolet. One by one these engines were tested, redesigned, improved, torn down. From each experiment the Chevrolet engineers were learning.

Then, one day last May after over a million miles of test driving, and four years of the most intensive sort of checking, Chevrolet engineers expressed themselves as satisfied that they had perfected a six cylinder engine of exceptional merit. It was a momentous occasion in the history of the company, and marked the achievement of one of the greatest engineering triumphs in the history of the industry.

Meantime Fisher Body engineers, working in close cooperation with Chevrolet, announced that they had a body, rugged and attractive—in every way worthy of the sensational new engine. And then it was that the Chevrolet board of strategy expressed themselves as finally satisfied.

Then began the process of making

ready 20 widely scattered Chevrolet plants for the advent of the new six. It meant that an entirely new set of machine tools, patterns and dies had to be developed in the shops and on the drafting boards. It meant that Chevrolet's 40,000 employees had to be adapted to the change over.

And all of this had to be done while the company's resources were involved, chiefly at the time, with the production of four cylinder gear shift cars in numbers never before equalled in the industry. It is to be remembered that last year Chevrolet again sustained its position as "world's largest builder of automobiles" with a production of 1,200,000 cars.

Recognizing the fact that men had to be trained to handle the new work, and that preliminary practice was necessary in the handling of tools and fixtures, the company built an experimental motor plant at Saginaw, Michigan, containing a complete equipment of new machinery purely for research experiment and establishment of production practice. This plant started last September 1 and continued in operation until November 15.

Meantime, the Flint Motor plant was shut down from October 1 until November 15, and the task went forward of installing new machinery, rebuilding old machines for new work and re-educating in precision methods thousands of employees.

On November 13, the machinery used in the experimental motor plant was removed to the main production line and the Saginaw plant was dismantled. So well grounded were all the plans that 12,000 motors were produced between November 15 and December 1, an average of more than 1,000 a day. During December 60,000 motors were produced, an average of more than 2,000 a day.

The assembly plants continued operations on the old models until October 25 when the last one closed down to prepare for the new car. The first assemblies of the new car started December 11th.

Today thousands of the new Chevrolet sixes are moving along the highways of America. Owners have reported that the engine is everything its designers knew it would be. The acceleration is not surpassed by that of any other on the road. It has ample speed for any emergency. It has an economy better than 20 miles to the gallon. It is beautiful in appearance. It is exceptionally easy riding.

Engineers and all those who can, in detail, visualize what a truly tremendous industrial achievement this incredibly fast turnover comprises, marvel at its accomplishment. It stands as a brilliant tribute to two great organizations—General Motors and its Chevrolet Division.

DELAYS COST NEW YORK \$540,000,000 A YEAR

Delays in traffic caused by street congestion in New York City result in an annual loss of \$540,000,000 says the report of a committee of the American Electric Railway Association.

This sum, it is pointed out, is \$28,000,000 more than the city budget; and the enormity of the losses moved Owen D. Young, president of the General Electric Company, to assert "we could better afford to buy private lots on Fifth Avenue, New York, and raze the buildings for parking spaces than have our streets cluttered as they are now in the congested communities of the country. Why permit motor buses to occupy our streets for long-haul business when subways or elevated roads can do it better and quicker? Why not reduce our public transportation in congested areas to an orderly, controlled, and regulated system, best adapted to our needs? And why not do it now?"

North-bound traffic on Manhattan Island, that is traffic moving out of the downtown business district, during rush hours, has an average speed of four miles per hour, the committee reports. If its recommendations are followed, parking will be greatly curtailed or entirely prohibited in the mid-town district, and traffic will be speeded to 12 miles an hour, moving in three lanes on the main thoroughfares.

The committee, after checking 500,000 customers of 76 big stores in half a dozen cities, reports that only 15 per cent come in private automobiles. Fifth Avenue merchants believe 30 per cent of their buyers come in their own machines.

Owen D. Young Speaking. "I have often wished that some competent statistician would compute and state the cost to the community of parking a car in a congested street on land of tremendous values. Let him figure the value of the space, measured by surrounding private

values. Let him figure the cost of the time lost by the hundreds or thousands of people that are delayed in the parking of that car. I venture the guess that it would not take long to show that from the standpoint of the community we could better afford to buy private lots on Fifth Avenue, New York, and raze the buildings for parking spaces than have our streets cluttered as they are now in the congested communities of the country. Why permit motor buses to occupy our streets for long-haul business when subways or elevated roads can do it better and quicker? Why not reduce our public transportation in congested areas to an orderly, controlled, and regulated system, best adapted to our needs? And why not do it now?"

Baked Date Pudding.

1 cup sugar, 3 eggs beaten light, 1 tablespoon flour, 1 teaspoon baking powder, 1 cup chopped nuts, 1 cup chopped dates, ½ cup cracked crumbs. Bake in moderate oven. Serve with whipped cream.

The mistletoe blushed for shame,
As it hung above the door,
When the maiden told her flame
She had never been kissed before.

Rectifying a Mistake of Nature.
Ethel—"What a finely chiseled mouth you have! It ought to be on a girl's face."
Jack—"Well, I seldom miss an opportunity."

Would You Know One If You Saw It?
If you ever came face to face with a germ, would you recognize it? Of course it is not likely that you ever will see a germ, unless you own a tremendously powerful microscope, for you would have to magnify one over a thousand times to make it as big as a pin head. But you should recognize the fact that these tiny germs can get into your blood streams through the smallest cut, and give you typhoid fever, tuberculosis, lockjaw, blood poisoning, and many more dangerous and perhaps fatal diseases. There is one sure safeguard against these dangers—washing every cut, no matter how small, thoroughly with Liquid Borozone, the safe antiseptic. You can get Liquid Borozone at City Drug Store.

Saving Brings Financial Independence!

East Ward, 40 percent; Mrs. Pickens leading with 60 percent.

The entire system shows 45 percent. Let's raise this! Many of the teachers are pressing this good work. We are encouraged to hope that the attendance will grow.—C. L. Sone.

**ROBERT W. SERVICE'S FAM-
OUS STORY OF KLONDIKE
GOLD RUSH COMING HERE**

Millions of people who have read with interest and pleasure the famous story from the pen of Robert W. Service, in which that author tells the story of the Klondike gold rush, will be glad to learn that the mammoth Metro-Goldwyn-Mayer film version of the celebrated novel will be seen Sunday at the Palace Theatre, with sound synchronization.

The story begins with the gathering of people from all parts of the globe at San Francisco, where they set sail for the Yukon, and ends with the great conflagration that reduced Dawson City to a heap of smouldering ashes. It shows in all its thrilling detail the maddest scramble for the gold that the world has ever seen. Authentic locales and authentic incidents from history are all vividly portrayed. It shows the trek inland over treacherous fields of snow where many lost their lives over the dangerous crossing of the Chilkoot Pass, the roaring rapids at the Yukon. The settings, however, majestic and magnificent as they are, are merely background for the love story of a boy and girl, a young and daring prospector and a dance hall girl of Dawson City's Monte Carlo.

The leading roles are played by Ralph Forbes, Dolores Del Rio, Harry Carey, Karl Dane, Tully Marshall and many other distinguished film artists.

**MESDAMES WILSON, RIGGS,
WOOTTON AND HOLLOWAY
HONOR MRS. B. A. TOLIVER**

A miscellaneous shower was given at the home of Mrs. B. G. Holloway, 515 West Lubbock St., Wednesday afternoon, Feb. 20, honoring Mrs. B. A. Toliver, teacher of the Philathea class of the Baptist Sunday school, who was soon to leave for her new home in Abilene.

Those attending were Mesdames H. V. Jarman, Arthur Dennis, Dave Geron, L. E. Hagerman, C. Hastings, Otis M. Ramsey, R. D. Griffin, Harry C. Burrus, L. R. Gregory, H. L. Henderson, L. D. Peebles, Dan W. Liles, Joe Teague, Jr., John W. Smith, R. W. Collier, Jr., O. Z. Ball, Sed Meadors, E. R. Burns, G. G. Green, J. A. Elliott and daughter, Juanita, Jno. T. Lokey, Grady W. Bownds, Lucy Clifton, C. B. Jordan, Irving Thornton, B. F. Carpenter, O. T. Lovelady, E. M. Lott, and F. A. Henderson and N. R. Northcutt, of Plainview, who are visiting with Mrs. H. L. Henderson; Ben Grey Holloway, Billie Toliver, Rev. B. G. Holloway, and the four hostesses, Mesdames L. A. Wilson, L. B. Wootton, H. S. Riggs and B. G. Holloway. An ice course was served by the hostesses.

S O S Only Signal.

Washington.—It has been explained that "S O S" has no meaning in itself, but the letters were adopted in 1912 because the combination of dots and dashes was so simple that even the most experienced radio operator would have little difficulty in detecting it. Previously the distress call had been "C D Q". Naval Communications have been deluged by letters asking the meaning of "S. O. S."

**IF YOUR STOMACH
TORMENTS YOU**

Do this for Quick Relief

A great deal of digestive suffering is due to excess stomach acid which causes heartburn, flatulence, stomach pain and other distressing symptoms. By taking "Pape's Diapepsin" after eating or when pain is felt you not only remove the cause of the trouble and instantly neutralize the harmful acid, but your digestive organs are soothed, healed and strengthened in a wonderful way, and normal healthy digestion results. Because it is so quick, so safe and so sure in ending digestive troubles, millions recommend "Pape's Diapepsin." "Pape's Diapepsin" is unequalled as an indigestion remedy and food corrective, yet it costs only 60 cents a package at all druggists. If your stomach ever torments you get "Pape's Diapepsin" at once and reapture the pleasure of care-free, painless digestion.

**Eighteen Counties
To be Represented
At Meet at Lubbock**

LUBBOCK, Texas.—Basketball champions of eighteen counties will meet in Lubbock at Texas Technological College on Friday and Saturday, February 22 and 23, to participate in the district two cage tournament of the Interscholastic League. Ewing Y. Froeland, Tech athletic director, is the district chairman and will be in charge of the meet. All entries for the meet have not yet arrived but are expected within the next few days.

The following counties will be represented: Andrews, Bailey, Borden, Cochran, Crosby Dawson, Dickens, Floyd, Gaines, Garza, Hale, Hockley, Lamb, Lubbock, Lynn, Martin, Perry and Yoakum.

In the majority of the counties in this district, the finals were played off last week, but in some instances, a playoff was necessary. These will be held during the early part of this week in order that the champion will be known before the district tournament begins here Friday.

The winner of the tournament held here will meet the champion of district one of which the center is Canyon. District one meet is to be held on the same days as the district two tournament here.

MOVES TO CORPUS CHRISTI.

S. F. Austin, who recently sold his farm near Slaton to his brother, Charles Austin, expects to leave early next week for Corpus Christi, where he and his family will make their home. Mr. Austin expects to enter business there.

When Broiling Steak, Remember—

Broil without salt, as salt draws out the juices. Cook over a hot fire, turning frequently, searing both sides. Place on a hot platter, salt and pepper to taste, spread top with butter and serve at once.

**Newspaper for Labor
Published at Lubbock**

Volume one, number one, of the Lubbock Labor Advocate, was distributed last Friday. It is being published at Lubbock by W. Homer White, well-known printer and member of the Lubbock Typographical Union.

The initial issue of this new labor paper for Lubbock county, is newsy from cover to cover, carrying in a large measure, news pertaining to the relationship between capital and labor. The paper is being well patronized by progressive advertisers.

MRS. DEAL IMPROVES.

Reports received here Wednesday from the Lubbock Sanitarium indicated that the condition of Mrs. W. B. Deal is much improved. Mrs. Deal has carried there several days ago, and underwent a serious operation. She expects to return to her home in Slaton next week.

MOVING FAMILY HERE.

Mr. Moore, manager of the local Acorn Store, was in Abilene this week, assisting in moving his family and household furnishings to Slaton. He was recently transferred from the Abilene Acorn store to the managership of the company's store here.

**Took Soda 20 Years
For Gas—Stops Now**

GOOD PRECAUTIONS

- DO NOT sleep in a room with tightly closed windows and doors in which a gas stove is burning.
- DO NOT use any type of stove unless it is connected to a chimney flue or set in a ventilated fireplace.
- DO NOT bathe in a bath room while a stove is burning and the door and windows are closed.
- DO NOT operate any water heater which is not vented to a chimney.
- DO NOT permit solid tops on cooking ranges or wash boilers to smother flames which are turned too high.
- DO NOT permit gas leaks in your piping appliances.
- DO NOT continue to breathe air which causes your eyes, throat and nostrils to smart. Get to fresh air at once and then have the source of trouble investigated and corrected.
- DO NOT permit an automobile engine to run in a closed garage.
- DO NOT remain in a closed motor car for an extended period while the engine is running and the car is standing or parked.
