Number 92.

C. of C. Board Of Directors in Morning Session

The board of directors of the Slaton Chamber of Commerce held an early morning executive session Thursday, following breakfast at the Lone Star Cafe. It was the regular semi-monthly meeting of the board, at which matters of routine business were considered.

Arrangements for speakers and bands to appear on the three days' program of the Old Settlers' Reunion at the Igo Ranch, five miles north of Slaton, July 18, 19 and 20, were started at the meeting, it was announced by T. A. Worley, Jr., vice president of the Slaton Chamber, who presided at the meeting Thursday morning.

Post Man is Fatally Hurt

C. C. Cooper, garage owner and prominent business man of Post, died Wednesday morning at the Lubbock Sanitarium of injuries sustained earlier in the day when a chain supporting an elevated truck broke while he was working underneath the machine.

He was rushed to the sanitarium where he died within two hours time.

His spinal column was broken near the chest region and he also sustained six fractured ribs.

Survivors are his widow and several children.

CITY OF LUBBOCK VOTES BONDS FOR NEW HI

Lubbock still keeps in the line of progress, with a vote of seven to one, the bond election carried, and in the offing Lubbock will have a new high school building.

This will mean much to the city. The bond issue was for \$650,000.00. A new building is badly needed, as the congestion in all departments has been much in evidence. We congratulate Lubbock in putting it over.

INCREASE IN S. M. U.'s SUMMER SESSION

DALLAS, Texas, July 1.—Seven hundred and seventy-five students are enrolled in the summer session of Southern Methodist University, forty-five more than enrolled in the summer session last year, a report from the office of R. L. Brewer, registrar, shows. Approximately one hundred degrees will be conferred at "summer commencement," in August, the largest number conferred at the end of any summer session in the history of the institution.

The registrar's office has announced a new regulation affecting late registrants for the regular session in September. Registration will be held September 21, 22, 23. Thereafter no students will be permitted to register until Friday, Sept. 27, and those who register on the 27th will be required to pay a late registration fee of \$2.00. Late registration causes considerable confusion and the new regulation is designed to reduce it to the minimum.

The first graduating class of the School of Engineering will receive degrees in June of 1930. This school was established in 1925. The courses of study cover five years, in which students work at gainful occupations in the line of their studies every other month and study every other month.

AMARILLO-CANYON HIGHWAY.

Contracts have been signed for the last unit of paving between Canyon and Amarillo. It is hoped to celebrate their completion in September. The highway between Canyon and Happy is being graded and drainage work is in progress, later to be paved. It will take two years to complete the program now under way. We are wondering when Lubbock County will commence her good roads program.

Mr. and Mrs. W. A. Wenderborn and O. E. Wenderborn of Old Glory, Texas, visited with their father, E. C. Wenderborn, and family the past week.

A \$50,000 contract has been let at Fort Davis for the construction of a school building.

Lamesa Territory Visited by Hail

Reports from Lamesa during the late heavy rain, which was accompanied by hail, destroyed some 25,000 acres of growing crops, cotton and feed. It is thought the feed crops will make a part crop, but the cotton was practically a total loss. Farmers are busy replanting to milo maize and higer. The storm extended to the caprock. Old timers state it was one of the heaviest and covered the largest area ever visiting Lamesa.

Burks Undertaking Dept. Fully Equipped

R. P. Burks, manager of the Burks Furniture and Undertaking Co., states that he is now fully equipped with undertaking supplies, including a hearse and ambulance.

Mr. Burks has had ten years experience in this work and is sufficiently competent to take care of his customers' undertaking needs.

He invites your trade when in need of anything in this line and pledges his best service.

Rotarians Back From Trip to Sweetwater

Two members of the Slaton Rotary Club, Lloyd A. Wilson, vice president, and Tom J. Abel, sergeant-at-arms, returned Tuesday afternoon from Sweetwater, where they went Monday to attend the two-day meeting of Rotary Club officials of the 41st district of Rotary International, held in Sweetwater on Monday and Tuesday. They reported a good attendance at the meeting and an interesting program for the two days. The meeting was held for presidents and secretaries of the clubs over the district, but Wilson and Abel attended because of the inability of President W. H. (Bill) Smith, and Secretary Allan J. Payne to attend.

REPORT FROM THE "SHEPHERD OF THE HILLS" COUNTRY

Adrian Owens and sister, Miss Pauline, who left Slaton for the "Shepherd of the Hills" country, Sunday morning, reached their grandparents' home Monday afternoon about 2:30, at Galena. We are not advised if they took the air route or not, but Adrian surely made time. We are advising him to have a care for his sister, so the Bald Nobbers will not get her.

HOMEMAKERS HONOR MRS. R. W. COLLIER

The Homemakers of the Baptist Sunday School met in a called session Monday afternoon at the home of Mrs. W. M. Rust, 505 East Crosby St., with Mrs. Rust and Mrs. Armes as hostesses.

During a short business session, Mrs. J. T. Gassaway was elected president, to take the place of Mrs. R. W. Collier, who presented her resignation at a previous meeting.

Love tokens were presented to Mrs. Collier, who is leaving us at an early date. During the social period, Mrs. A. R. Keys presided as teacher. Games of old time school days were enjoyed by the following guests who registered with their maiden names: Druella Latiner, Mrs. Ward; Edna Suferry, Mrs. Armes; Rona Garland, Mrs. Coleman; Ethel Murphee, Mrs. Lemons; Tilly Boon, Mrs. Rust; Louise Boon, Mrs. Stitt; Anna Bell Rice, Mrs. Tucker; Leneta Wartman, Mrs. Evans; Kate Lake, Mrs. Cummings; Tom Elkins, Mrs. Gassaway; Beartha Wadkins, Mrs. Stottlemire; Ethel Cherryhomes, Mrs. Lowry; Ruth Simpkins, Mrs. Keys; Ida Byers, Mrs. DeVore; Lula Stokes, Mrs. Holden; Edith Olive, Mrs. Drewry; Sally Gibson, Mrs. Kirkesy; and Mrs. Erwin.—Class Reporter.

Mrs. Bill Edwards and baby returned Friday from Wichita Falls, where she visited with her sister, Mrs. C. W. Johnson.

Mrs. O. E. Wenderborn and baby of Old Glory, Texas, are visiting this week with her father and mother-in-law.

BIG ATTENDANCE EXPECTED FOR OLD SETTLERS' MEET NEXT WEEK

Crowded Program of Entertainment Arranged; Free Admission to Picnic Grounds; Prizes Are Offered.

The first annual Old Settlers' Reunion to be held at the Igo Ranch, five miles north of Slaton, on Thursday, Friday and Saturday, July 18, 19 and 20, will have a large attendance of people from all parts of West Texas, it is believed by H. L. (Bud) Johnston, one of the ranch owners, and H. A. Johnston, of Lubbock, who has charge of arranging and conducting the three days' program.

The event has been well advertised all over West Texas, it was said by these men yesterday, and they have had word from scores of old-timers and others who said they would be here for the reunion. Prospects are that the first annual reunion will be a bigger success in every way than had been hoped for, it was announced.

Besides the swimming, fishing, boating, chariot and pony racing, rodeo attractions, band concerts and public speaking features of the program, an old fiddlers' contest has been arranged for, which will be held on the second day of the reunion, Friday, July 19, at 10:30 a. m., it has been announced. If as many as five contestants enter, \$15 in prizes will be given, Johnson said.

A special prize of \$2.50 will be given to the oldest settler who registers on the opening day of the reunion, the announcement says, and many other prizes of varying amounts have been offered for the various events of the three days. The prize list totals \$500, H. A. Johnston said here yesterday.

Every person who wishes to have an entry for the terrapin derby is requested to bring a terrapin along, and anyone will be allowed to enter a terrapin in the race. This feature, which calls for some prize money, is expected to be one of the most comical stunts of the entire program.

About fifty cowboys are coming to the reunion from various parts of West Texas and New Mexico to take part in the rodeo events, Johnson announced.

No admission charges will be made for anyone to enter the grounds at the ranch during the three days, and free camping, free water and fuel, together with plenty of shade, will be available to all visitors without charge.

Speakers and bands will have prom-

Visitors Honored With Outing at Buffalo Springs

Mrs. Earl Walker, of McKinney, and Mrs. Houston Gay, of Dallas, who are visiting friends and relatives in Slaton were honored with a delightful outing at Buffalo Spring Tuesday evening.

The evening was spent in fishing, swimming and boat-riding, followed by a bountiful picnic "spread" consisting of all kinds of good eats.

Those enjoying the occasion were Messrs. and Mesdames Joe Teague and children, E. E. Phillips, Jerry Leverett and daughter, John T. Lokey and daughter, R. L. Tate and son; Mesdames Truman Campbell of Lamesa, Houston Gay of Dallas, and Earl Walker of McKinney.

Delightful Evening At Buffalo Springs

Mr. and Mrs. Joe Hise and children of Port Arthur, house guests of Mr. and Mrs. George Marriott, were entertained Tuesday evening with a delightful outing at Buffalo Springs.

An unusually pleasant evening was spent in swimming and boat-riding, after which a delicious picnic supper was enjoyed by Messrs. and Mesdames Joe Hise and children, George Marriott, Charles Marriott, Mrs. A. A. Hise, Misses Audrey and Pauline Marriott, and Charles Marriott, Jr.

COUPLE MOVE HERE FROM NEVADA, TEXAS

Mr. and Mrs. Dalton James arrived in Slaton Sunday to make this city their home.

Mrs. James was formerly Miss Minnie Caldwell of Nevada, Texas and is the niece of A. N. Ricks of this city. She has accepted a position as book-keeper at the Acorn Store, Inc.

inent parts on the programs each day, and an orchestra will furnish music for each night program. Day and night performances are to be held.

BAPTIST ENCAMPMENT AT POST TO HAVE FINE PROGRAM

Commencing July 22-28th there will be held at the Post Encampment grounds the annual Baptist Convention. Much time and labor has been given to have a program that will be one of the finest ever heard. It is anticipated that there will be a very large attendance. The following is the program for the entire session:
Dr. W. R. White, Lubbock, Pres.
Rev. M. C. Bishop, Post, Cor. Sec.
Rev. Ross A. Smith, Breckenridge, Chr. Prog. Com.
Monday Evening, July 22.
8:00—Song Service, Leader, J. D. Carroll, Lubbock.
8:30—Address—Dr. J. D. Sandefer, Abilene.

Tuesday Morning, July 23.
8:00—Class Period.
10:15—Church Hour.
11:15—Bible Lecture—Dr. M. E. Davis, Brownwood.

Tuesday Evening, July 23.
8:00—Devotional—Rev. Joe Wilson, O'Donnell.
8:30—Sermon—Dr. Elmer Ridgeway, San Angelo.

Wednesday Morning, July 24.
8:00—Class Period.
10:15—Church Hour.
11:15—Bible Lecture—Dr. M. E. Davis.

Wednesday Evening, July 24.
8:00—Devotional—Rev. W. K. Horn, Post.
8:30—Sermon—Dr. Elmer Ridgeway.

Thursday Morning, July 25.
8:00—Class Period.
10:15—Church Hour.
11:15—Bible Lecture—Dr. M. E. Davis.

Thursday Evening, July 25.
8:00—Devotional—Rev. B. G. Holway, Slaton.
8:30—Sermon—Dr. Elmer Ridgeway.

Friday Morning, July 26.
8:00—Class Period.
10:15—Address—Rev. J. Pat Horton, Plainview.
11:15—Bible Lecture—Dr. M. E. Davis.

Friday Evening, July 26.
8:00—Devotional—Rev. W. F. Furgerson, Snyder.
8:30—Sermon—Dr. Elmer Ridgeway.

Saturday Morning, July 27.
8:00—Class Period.
10:15—Address—Rev. Pat Horton.
11:15—Bible Lecture—Dr. M. E. Davis.

Saturday Evening, July 27.
8:00—Devotional—Rev. B. N. Shepherd, Tahoka.
8:30—Address—Prof. M. H. Duncan, Lubbock.

Sunday Morning, July 28.
10:00—Sunday School.
11:00—Sermon—Dr. T. L. Holcomb.
Sunday Afternoon and Evening.
3:00—Address—Dr. W. R. White.
8:00—Song Service—J. D. Carroll.
8:30—Sermon—Dr. T. L. Holcomb.

Cattle Disease Found in Lynn Co.

A special to the Lubbock Journal from O'Donnell, under date of July 9th, advises that a cattle disease known by the common name of Stockyard Fever or Hemorrhagic Septicemia, has become very prevalent within a radius of seven or eight miles of O'Donnell, and several cases have been reported in Dawson and Lynn counties.

More than three hundred fifty dairy cows have been vaccinated by the vocational agriculture man at O'Donnell during the past three weeks, and several thousand ranch cattle have been vaccinated during the past few months. Most of the vaccine used has been the bacteria which is a curative as well as a preventive dose. The disease is very contagious and spreads rapidly when once it has a hold in a certain section of the country, but may be almost wholly stopped and prevented by proper care and vaccination.

Our dairy herds must be watched with care, as they are too valuable to contract this disease. We have not heard of any cases in and around Slaton.

UNION HOME DEMONSTRATION CLUB MET LAST THURSDAY

The Union Home Demonstration Club met last Thursday at the school auditorium, with a good attendance. Miss Baird was present and gave a very interesting talk on canned food and its value. She also displayed jars of canned food, giving the most important points suitable for fair exhibits. Plans were discussed for making Union's booth a first class booth at the Fair this fall.

The next meeting will be with Mrs. J. R. Lamb. Those attending the meetings during this season will know how to keep their tables supplied with vegetables during the winter months. New members are cordially invited to come.—Reporter.

NEW CURRENCY ON MARKET WEDNESDAY

There has been released from the United States Treasury the new issues of the currency, in the amount of \$3,921,000,000.00. This amount has been shipped to the various Federal Reserve banks throughout the country. Just how fast the new currency will be in circulation, will depend upon the number of worn out bills that will be received by the banks.

The new bills, as we all know, are smaller. The present size of the old bills has been the same since the civil war, but with so much creasing they do not stand the wear. This was the prime reason for the government issuing the new bills.

It is claimed for the old bills that they could be folded no more than 500 or 600 times, while the new bills can be folded approximately 1,500 times. This will be a great saving to the government, both in the life of the new bills and the use of less paper. Do you have yours?

PLUMS GALORE.

L. B. Hagerman, who lives at 755 South 10th St., favored the Slatonite "Force" with a sample of his bountiful plum crop.

Mr. Hagerman states that his trees are well loaded and the limbs are bending low.

MISS RAMSEY LEAVES.

Miss Jeannette Ramsey expects to leave Slaton the latter part of this week for Timpson, Texas to spend the remainder of the summer with her parents.

Miss Ramsey has been conducting a summer class in piano and states that she has enjoyed a nice class.

She expects to return to Slaton the first of September to resume her work as head of the music department in Slaton schools.

Mrs. M. M. Pierce left Thursday morning for a visit with her sister in Amarillo.

Santa Fe Handles Over 400 Cars of Wheat Daily Here

W. H. Smith, Santa Fe agent here, said Thursday that his company is this week handling over 400 cars of wheat through Slaton, coming from the Plains-Panhandle wheat sections on its way to markets. The local yards are congested with wheat shipments which far exceed the highest records ever established here before, it is said by officials. A steady gain has been seen this week over the volume handled on the Slaton division last week.

It is thought that another month or more will be required to move the wheat crop, one of the largest wheat yields ever known in the Plains-Panhandle areas.

Slaton, while not an extensive wheat producing section, is being benefitted by a much larger Santa Fe payroll during the wheat rush.

Slaton Boy Not Expected to Recover

Rozel Cosby, 15 year old son of Mrs. A. M. Boatwright, owner of Mother's Lunch stand on Texas Avenue, was carried to a Lubbock hospital Tuesday afternoon, where he is reported to be critically ill.

He has been sick for several months as a result of leakage of the heart, but has been seriously ill for the past week.

At the last report the doctors gave no hopes for his recovery.

Steffins Boy Hurt In Car Accident

The 12-year-old son of E. A. Steffins, who lives at Lofton switch between Slaton and Wilson, was painfully cut about the face Sunday night when the car in which he was riding in company with several other boys, collided with a car which was parked by the roadside.

The accident occurred two miles west of Slaton. The boy was rushed to Slaton, where Dr. S. H. Adams treated him, taking ten stitches in his face.

All other occupants of the car escaped without injuries.

Community Singing.

The singing at the Club House on last Sunday afternoon was enjoyed by a large crowd and it was decided to repeat it each first Sunday of every month.

There were singers from Lubbock, Posey, Southland and Lofton, present.

The Old Sacred Harp songs were sung and then the Stamps books were used and some special numbers were rendered by the Gentry boys of Posey.

MISS McCANNE ENROLLED IN T. C. U. SUMMER SCHOOL.

FORT WORTH.—Miss Lucille McCanne, of Memphis, who taught English and Spanish in the high school at Slaton last year, is enrolled in the Texas Christian University Summer school, taking courses in English and education.

Miss McCanne holds a Bachelor of Arts degree from Texas Woman's College, where she was president of the Scholarship Society and a member of the Korosophian Literary Society. She plans to teach Spanish in the high school at Lubbock next year.

HEAT WAVE IN THE EAST.

With torrid heat over the eastern part of the country, particularly the seaboard, with the temperature ranging close to the 100 mark, New York, Philadelphia, Baltimore and Washington are suffering with the heat and th high humidity. Many have been prostrated, some drowned, when the people caused an exodus from fiery furnace streets to the sea. It may get warm on the So. but what wonderful night for sleeping. It is in Texas.

Notes, News and Nonsense.

Phone 71

Felix Harlan, Jr., is visiting relatives in Southland this week.

Vera and Ora Belle Massingill are visiting relatives in Sterling.

Fred Luddeke and son, of San Antonio, are visiting with the former's sister, Mrs. Fred Kahlich.

Mr. and Mrs. Irl Peters and children, of Lorenzo, are visiting Mr. and Mrs. J. C. Bullock.

Misses Lucile and Pearl Edmondson spent the week end with Johnie Lee and Edna Mae Caldwell.

Miss Oshie Hill, of Clovis, spent the past week with her parents, Mr. and Mrs. T. M. Hill.

C. A. Coleman and family visited relatives in Lamesa over the week end.

Mrs. Ray Ballard and son, Floyd, visited Mrs. J. L. Preston the past week.

Mrs. C. A. Baldwin, of Matador, is visiting her daughter, Mrs. C. R. Campbell.

Mrs. T. W. Duncan, of Amarillo, is visiting with her sister, Mrs. P. W. Calhoun.

Mr. and Mrs. Vernie Sweeney and daughter, Margaret, of Van Alstyne, visited Dr. and Mrs. A. R. Hill, Saturday.

Miss Mary Lou Blanks, who has been visiting her grandmother, Mrs. Mollie Hill, returned to her home in Whitewright, Friday.

Mr. and Mrs. John Kitten and family, of Lawrence, Nebraska, who have been visiting relatives here, have returned home.

Evelyn Triplett, Mr. Jess Joplin and daughters, Lois and Mary Rose, returned from a trip to Carlsbad Cavern, Saturday.

Mrs. J. W. Massingill and son, Jess, returned Monday from a visit with relatives in Sterling, Menard and San Angelo.

Mr. and Mrs. E. L. Redford and children, of Brownfield, and Elmer Sharp, of Vernon, spent Sunday with Mr. and Mrs. R. L. McNutt.

Mr. and Mrs. Robert Hagler and family, of the Hackberry community, spent Sunday with Mr. and Mrs. Lee Jones.

Mrs. B. Forber, who was called to Quinton, Okla., by the illness of her sister, Mrs. A. McDaniel, returned home, Monday.

Mrs. Iva Champion, of Corpus Christi, after spending some time with her daughter, Mrs. Ray Conner, is visiting relatives in California and Colorado.

Mr. and Mrs. S. H. Meeks and son, Roy, returned Sunday from a visit with relatives in Fort Worth, attending a family reunion of the McColum family.

Mrs. C. C. Lawrence and two children, of Electra, and Mrs. R. A. Carter and children, of Burkburnett, have returned to their homes, after visiting the former's sister, Mrs. D. Y. Triplett.

Mrs. N. T. Dickson, of Gordon, Palo Pinto county, is visiting her son, N. C. Dickson, and other relatives. Mrs. Dickson spent her 78th birthday, Tuesday, in Slaton, with her granddaughter, Mrs. J. E. Miller.

Catching Up.

Rastus and Mose were surprised when getting their chicken dinner for the next day, and the irate farmer let a charge of bird shot loose in their direction. Both dusksies started down the road with Mose in the lead.

Rastus—"Mose, you all quit kicking dat gravel in ma' face."

Mose—"Dat ain't gravel, Ras. Dat's bird shot you all am ketching up to."—American Boy.

SORE GUMS NOW CURABLE.

You won't be ashamed to smile again after you use Leto's Pyorrhea Remedy. This preparation is used and recommended by leading dentists and cannot fail to benefit you. Drug-gists return money if it fails.

Catching's Drug Store.

His Crime.

Captain—"What's he charged with, Casey?"

Officer—"I don't know the regular name fer it, captain; but I caught 'em 'dirtin' in the park."

"Ah, that's impersonatin'."

SUMMER CULLING.

It is a good idea for several reasons to cull the young stock by the middle of the summer. A few suggestions here may not be out of place.

At the time of separating the cockerels from the pullets, about eight to ten weeks, a fairly thorough job of culling can be done which will save many dollars in feed costs. Also if the cull birds are removed at this time they are going to bring higher prices per pound in most markets than as though they were allowed to reach fuller maturity. A saving of space will be effected and the young stock that is worth while to keep will have a better chance to mature properly.

A great many birds will be culled out of the ordinary growing flock on sight due to apparent low vitality and outstanding physical defects. Especially if the flocks are to be later used for breeding purposes any marked disqualification should be culled on sight. In the case of Leghorns these would notably be such defects as lop combs, side spriggs, off colored feathers and stubbs. In the heavier breeds body weight is perhaps of the most primary importance. A very complete set of suggestions on this important subject may be had by writing to the United States Department of Agriculture at Washington, D. C., for Farmer's Bulletin 1112 on Culling.

At the same time as culling the growing stock it is a good idea to go through the laying flocks ery thoroughly. Health and constitutional vigor are of great importance and should have first consideration. When the bird is in good laying condition the combs and wattles are naturally bright red. Flexibility of the pelvic or lay bones located on either side of the vent is one of the most important indicators. In the good layer these bones are invariably thin, soft and flexible. They are also wide apart, the width of about three fingers.

The experienced poultry breeder is able to tell the high-producing type at a glance. Some of the other more obvious features are the length of back, deepness of chest, strength of bones and ruggedness of constitution without reaching the extent of coarseness. The eye should be bright and prominent and alert. The poor producer can be spotted by its shrunken, dull and whitish comb. The eye is likely to be sunken, dull and listless, the pelvic bones rigid and close together and the body of the bird scanty.

It is best to get rid of the loafers just as early as you can spot them.

Root Rot Not Confined to Cotton

Root rot, the most destructive plant disease in Texas, attacks at least 274 species of cultivated plants, according to findings of scientists of the Experiment Station, A. and M. College of Texas, set forth in recent bulletin issued by the Station. Many important field crops, vegetables, fruit trees, berries, and ornamentals are affected. The cultivated species listed as resistant to root rot number 135, including the few separate species of grass.

which are named. Wheat, oats, corn, sorghum, rice, barley, and all other members of the grass family appear to be immune to the disease. Dr. J. J. Taubenhaus, chief of the division of plant pathology and physiology; B. F. Dana, plant pathologist, and Simon E. Wolff, botanist, are the authors.

METHODIST W. M. S.

The Society met Monday, July 9, at four o'clock. These meetings will be held at four o'clock during July and August. Thirteen ladies were present at the last meeting. The Bible lesson was the seventh, eighth and ninth chapters of Exodus, led by Mrs. Laura Rhodes. June 21st, six ladies from this society attended an all day missionary zone meeting at Post. Slaton will entertain them in September. Every effort will be put forth to make this one of the best meetings yet held.

During the revival held at the Methodist church by our pastor, the Rev. Webb, cottage prayer meetings are being held each morning at 9:30 in the different parts of the city. All ladies are invited. Monday, July 15th, the lesson will be from the Missionary Voice.—Press Reporter.

NOTICE OF SALE OF REAL ESTATE.

THE STATE OF TEXAS, COUNTY OF LUBBOCK.

NOTICE OF SALE OF REAL ESTATE.

THE STATE OF TEXAS, COUNTY OF LUBBOCK.

By virtue of an order of sale issued out of the 72nd District Court of Lubbock County, Texas, on a judgment rendered in said court on 31st day of May, 1929, in favor of Thurber Brick Company, a corporation, and against Ted W. Johnston (or Johnson) and A. J. McCausland, in the case of Thurber Brick Company, a corporation, and against Ted W. Johnston (or Johnson) and A. J. McCausland, No. 3662 in such court, I did, on the 3rd day of July, A. D. 1929, at 2 o'clock P. M., levy upon the following described tract and parcel of real estate situate in the County of Lubbock, State of Texas, as the property of said Ted W. Johnston (or Johnson), to-wit: Lot No. Seven (7)

in Block No. Fifty-five (55) in the South Slaton Addition to the Town of Slaton, Lubbock County, Texas, and on the 6th day of August, 1929, being the first Tuesday of said month, between the hours of 10 o'clock A. M., and 4 o'clock P. M., on said day, at the courthouse door of said county, I will offer for sale and sell at public auction, for cash, all the right, title and interest of the said Ted W. Johnston (or Johnson) and A. J. McCausland in and to the said property.

Dated at Lubbock, Texas, this 3rd day of July, 1929.

WADE HARDY, Sheriff of Lubbock County, Texas. 90-3tc

How to Raise Poultry
By Dr. L. D. LeGear, V. S., St. Louis, Mo.
Dr. LeGear is a graduate of the Ontario Veterinary College, 1892. Thirty-six years of veterinary practice on diseases of live stock and poultry. Eminent authority on poultry and stock raising. Nationally known poultry breeder. Noted author and lecturer.

SPECIAL NUMBER. IS THE WORLD REALLY GOING TO THE BUGS?

Scientists Tell us That the Insect Kingdom May Some Day Dominate the World. Drastic Measures Needed to Keep This Ever Present Menace in Check.

A letter recently placed on my desk announcing the opening of a National Insect Killing Week to begin July 7th, reminded me of a conversation I once overheard in a pullman while enroute to California. Two fellow travelers were derisively discussing a magazine article one of them had discovered in which a well known scientist had asserted that someday man's boasted civilization would be utterly obliterated by the ever increasing myriads of the lowly insect kingdom. "A lot of sensational rot!" scoffed one. "Yeah," agreed the other. "Guess these college profs haven't anything to do but write fool stuff like that."

I said nothing for it would have done no good. I would merely have been considered another of those fool profs with nothing to do but concoct lurid poppycock for popular amusement. Nevertheless, I sympathized very much with the writer's point of view. I recalled the fact that, had it not been for the late General Gogga's brilliant campaign against the mosquito, the Panama Canal would have been the same dismal failure as the French fiasco at Nicaragua. As a matter of fact, I would almost be willing to back the mosquito to accomplish the downfall of man single-handed were it not for the recent arousing of public consciousness to the fact that these insects carry the germs of malaria and other dangerous diseases. The use of insecticides to combat those pernicious pests has now become fairly general but much is yet to be done. There cannot be too many spray guns in action against this really formidable enemy.

Should mosquitos need an ally in their attempt to conquer mankind they could hardly do better than enlist the aid of the lowly house fly. Born in filth, the fly never loses his liking for it. Nothing seems to please him more than a chance to dabble his feet in every conceivable form of germ laden nastiness and then transfer it to food intended for human consumption. Screening is only partial protection. Flies will get in in spite of every barrier erected against them and a good Fly and Insect Powder should be constantly on hand to strike them down as fast as they show up.

But while discussing the various insect pests that threaten the health and comfort of mankind let us not forget that athletic fellow the flea. To most people he is merely a minor nuisance treated more as a joke than as a serious menace. Yet, science now recognizes this tiny broad jump champion as a carrier of the dreaded Bubonic Plague. The fact that almost all domestic animals are occasional hosts to the flea is reason enough for extreme vigilance. Fly and Insect Powder for the smaller animals and especially household pets and occasional dipping for infested livestock will help to keep down the flea. Let it not be forgotten, too, that the rat is a carrier of these plague ridden insects—so swat the rat at every possible opportunity.

Mosquitos, flies, fleas, bedbugs and we're just getting a good start. Who said civilization wasn't menaced by bugs? And how about roaches? Comical clowns of the insect world, but dangerous pests just the same. They annually destroy thousands of dollars worth of foodstuffs and much that they do not actually consume is so polluted by their filthy bodies that it is not fit to eat. They leave a disgusting odor on everything they touch and there is no question but what, like the flies, their feet and bodies are living incubators for millions of disease germs which they strew about with reckless abandon wherever they go. More work for the blowgun and the insect powder! By all means remember the roach when you celebrate National Insect Killing Week.

So far we have not gone outside the walls of the home. Yet, we have already found enough germ carrying health endangering, comfort destroying insects to make us wonder if the scientist mentioned at the beginning of this article might not be somewhere near the truth. Yes, and we haven't even spoken of the moth that

causes untold damage to clothing, bedding and upholstering in thousands of homes every year.

And that notorious nocturnal prowler, the bedbug. No home is so carefully kept but what the vile intruder may occasionally find a way in. They seem to be able to subsist indefinitely without nourishment, but anyone who has ever acted as involuntary host for them will certainly testify that they make up for lost time once the opportunity presents itself.

As tormentors of live stock, too, flies and mosquitoes qualify for championship honors in the insect world. I have seen cows tormented almost to the point of insanity by the whirling, buzzing, biting hosts that swarmed around them in clouds. Horses and other domestic animals also suffer painfully from the same plague. At least temporary protection can be given by spraying them with a good Fly Chaser liquid and their usefulness will be greatly increased thereby.

Going further afield, think of the many forms of insect life constantly threatening the welfare of our poultry flocks—lice and mites, to mention only two. Plenty of work for the right kind of insecticide there. A good Lice Powder for dusting his birds and a supply of Dip and Disinfectant solution should be considered part of the essential equipment of every poultry raiser.

The gardener, too, is aware of the seriousness of the insect problem. Almost overnight any garden may be overrun with innumerable hores of tiny but destructive warriors that in point of numbers would put the combined armies of the World War to shame. For some the Garden Insecticide powder and for other the liquid insecticide, but unremitting warfare of one sort or another must be carried on throughout the season if a paying crop is to be harvested.

So after all, our scientific friend was unquestionably much nearer the mark than our two friends who jeered at this prophecy. The insect conquest, if it ever comes, is a matter of centuries in the future, that is quite true, but there is plenty of reason for starting a determined offensive against all forms of insect pests right here and now.

No less an authority than Colonel M. A. Reardon of the United States Army Medical Corps has stated that, directly and indirectly, insects have caused more deaths than all the wars of history added together. When you consider on top of that the billions of dollars worth of property they destroy every year, it is easy to see that no small problem confronts us. Let us put into effect that well known army maxim, "A determined offensive is the best defense" and prepare in all seriousness to defend our lives and property against these tiny but all too powerful adversaries.

Hub (during the spat)—"I don't believe in parading my virtues."
Wife—"I don't see how you could. It takes quite a number to make a parade."

Are You Ready

When your Children Cry for It

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castoria. No sooner done than Baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug; Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot pat away. And it's always ready for the crueler pangs of colic, or constipation, or diarrhea; effective, too, for older children. Twenty-five million bottles were bought last year.

Grass Our Most Valuable Crop

For a great many years the farmers of the Southwest have devoted much time to the destruction of natural pastures in order that there might be a greater acreage available for cotton, but enough was produced on the thousands of such acres, though at a loss, to increase largely the sum total of the crop, thus reducing the price on all of it. The plowing and cultivating of these natural pasture lands encourage erosion. Nature's defense against the washing of the soil was destroyed, and as a result great areas have been made non-productive. Another evil has resulted. Not all the damage has been confined to soil washing or to the eroded land. By encouraging a quick run-off of the water, floods have become more frequent and much good bottom land covered with sand and gravel and crops destroyed.

Now that farmers are becoming more interested in a balanced program with livestock, they are learning that their natural pastures are their greatest asset. Good grass produces the most profit for the least labor of any crop that can be grown provided the livestock is available for the harvesting.

This country was once all in grass and timber. Half of it should be put back into grass. Then we will have our cotton on lands that adapted to it and will produce more and better cotton per acre. The same is true of other crops. Good cattle, hogs or sheep running on good pasture makes money both night and day for the owner. The amount of labor required to produce an equal amount of profit any other way.—Farm & Ranch.

There are about 5,000 different languages spoken in the world.

Fifteen hundred and sixty-six carloads of Texas grapefruit were shipped from the Rio Grande Valley during the season recently closed, a gain of 530 cars over the total last year. This year's Texas crop—grown mostly in Cameron and Hidalgo Counties with some orchards in Willacy—was valued at \$1,600,000. Grapefruit census shows 2,606,403 grapefruit trees in Texas and when they all come into bearing within the next few years, there will be a distribution problem to be met and overcome.

You'll like the easy-riding comfort of the new Fordor Sedan

\$625

(F. O. B. Detroit, plus charge for freight and delivery. Bumpers and spare tire extra.)

THE new Fordor Sedan was designed for comfort. You'll like it because of its wide seat space, ample leg room, deep cushions, and the generous freedom between front and rear seats.

Windows are unusually large and clear vision is insured by narrow pillars and unique door construction. Upholstery and appointments are of a quiet, rich type unusual in a low-price car.

Bring the family to see this new Fordor Sedan and let us take them for a ride. You will learn a lot about comfort, speed, safety and ease of control in a thirty-minute drive.

Program Ready For Big Reunion July 18, 19 and 20

LUBBOCK, July 12.—Everything is ready for the biggest old time ranchman's reunion and old settler's picnic that has ever been held in West Texas, Bud Johnston owner of the Bud Johnston Ranch, better known as the old Igo Ranch in the Yellow House Canyon, 6 miles north of Slaton, has announced. The celebration will be July 18, 19, and 20.

A three day rodeo, racing program, dancing each night and many other features have been arranged and the old settlers will register and get together again to talk over old times. A prize and a pass to all the events will be awarded to the oldest settler who registers.

A good quarter mile track has been prepared and in addition to racing ponies each day, the crowds will watch saddle ponies race. Wild buffalo riding will be added as a special feature each day, as will wild cow milking, cowboy range relay, novelty race, charriot race, and wild mule races. Over \$500 in prizes have been hung up by Bud Johnston and the best skilled riders, ropers and other rodeo performers are expected to be on hand for the three day celebration.

A special platform has been constructed for the dancing and both old time "fiddle" music and modern "jazz" tunes will be played for the crowds that come to dance.

An old fashion chuck wagon will be on hand at the celebration during the entire celebration when people can secure food cooked in real old West Texas fashion.

No charge will be made for entering the park, Johnston says. The Johnston Ranch contains more than 5,000 acres and is one of the most beautiful and picturesque places in this section of the state. It has an abundance of pure water from springs, ten miles of scenic driveways, and suitable places for outings, boating, fishing, picnicking and other sports.

H. A. Johnson, of Lubbock, widely recognized as "Hackberry Slim" and as an outstanding rodeo man is assisting the Johnston Ranch officials in making the celebration a success.

News Of Union

Farmers will soon be up with their work if it does not rain soon. A good rain would be very much appreciated, although crops are holding up well.

Mr. and Mrs. E. A. Dearing and family spent last week end with their daughter, Mrs. Fred Payton, in New Mexico.

Mr. and Mrs. Pettit entertained the young people with a party last Friday night.

Mr. and Mrs. B. T. Ussery were

called to the home of Mr. and Mrs. A. C. Weaver of Levelland, who had born to them a six pound baby girl on July 3rd. But, God seeing fit, only permitted them to enjoy its stay here on earth for a short period of five hours.

Miss Audie May Terry, of Slaton, has been visiting in the Price home this week.

Texas is sixth in winter wheat production this year, according to Department of Agriculture estimates, which place the Texas crop at 31,013,000 bushels out of an expected total of 622,148,000 bushels, based on June 1 condition report of 79.6. The five-year average is 549,257,000 bushels.

SAVING THE GRASS.

People's time may be valuable, but it is not so valuable that it pays them to cut across their lawns or those belonging to their neighbors or the municipality. We even notice that a stop fence had to be placed at the north side of the City Hall, where people cut across. Plots of grass with their edges and corners all worn off make a city or its homes look like a man with ragged coat and frayed trousers.

"Keep off the grass" signs should not be necessary. When grass is grown for ornamental and landscape effects, people should guard it as carefully as they would some fine rug they bought to decorate their homes. A trim grass plot, with its edges and corners squarely cut, gives any location an air of finish and beauty. We have many of them in Slaton which we enjoy seeing in our drives about the city.

We should all care for our public and private lawns in that manner here in Slaton, keeping the name "The City Beautiful" ever before the public.

**CONTROVERSY ARISES
BETWEEN TWO RAILROAD
ORGANIZATIONS**

In a statement made by D. E. Robertson, President Brotherhood of Locomotive Firemen and Enginemen, in connection with strike vote being taken by the Brotherhood of Locomotive Engineers on certain western railroads.

If R. E. Edrington, Assistant Grand Chief Engineer of the Brotherhood of Locomotive Engineers, is correctly quoted in articles that have appeared in daily papers, as to the reasons for the present taking of a strike vote on certain western railroads by the Brotherhood of Locomotive Engineers, he is either uninformed as to the true facts, or is deliberately misrepresenting the situation, not only to the members of that organization, but also to the public at large.

It strikes one that the controversy is jurisdictional, and not one covering the matter of wages, the Locomotive Engineers desire to have jurisdiction over all men set up as engineers, while the Firemen and Enginemen claim that owing to the seasonal condition on all roads, there comes a time when the newly set up engineer has to return to firing, owing to the lack of freight haulage. The Brotherhood of Firemen and Enginemen feel that they hold the jurisdiction on these employees. It is not a matter of wage controversy, as the engineers were granted a raise which went into effect May 1st, 1928. Under present working conditions and rules, the maximum allowed each man is 3,000 miles per 30 days. It looks as though the Brotherhood of Locomotive Engineers were trying to raise the limit to 3,800 miles in 30 days. Should this be done, only one thing could be

done, firemen would be demoted and many placed on the extra list and starve to death and finally have to quit and find other employment.

Finally as stated, the matter is one of jurisdiction, the Brotherhood of Engineers would make and interpret the schedules governing the fireman, even though he may have been set up, and demoted, but the Brotherhood of Firemen and Enginemen take issue on that point, that the union as represented by the Firemen and Enginemen claim the right to have all grievances handled by the organization to which he belongs. It surely strikes us that there should be a get together by the two organizations, and it is not a controversy with the railroads at all. We hope an amicable adjustment can come about.

**SHARING YOUR COMMUNITY
LIFE.**

A local newspaper is an agency by which its readers obtain their share of the advantages of their home towns. You read in your newspaper that a certain amusement, concert, or address is to be given, in which you are interested. You want to be present on that occasion. If you had not read that announcement in that newspaper, you would probably have missed this valuable feature in the community life.

You read in your home town newspaper about the activities of some organization. You would not probably have known much about that society, had it not been for the newspaper. You discover from these reports that that organization is doing certain things that are interesting, and beneficial to the community and its members. You are led to join it, and you obtain these benefits, which you would probably have failed to share had it not been for the service of the newspaper.

You read about some friend who is visiting here. You want to see that person and renew old acquaintance, and you are thereby led to call, and you have a happy evening. Someone reads in the newspaper that you have been away and have returned, and your friends are thereby led to come and see you. More pleasant hours are spent, all due to the local newspaper.

You read in the home town paper the advertisements of the local stores. You discover that you can obtain certain needed articles for less than you would ordinarily pay. You obtain these necessary goods at a low price, and make a direct saving in cash. Thus you share the economic advantages of your home town.

The Slatonite performs services of this kind to its townspeople in every issue. The more the people read the reflection of the community life which it contains, the more they get out of the life of Slaton.

POLITICS THIS WEEK.

Perhaps nothing more refreshing has come out of the political welter during the past months than the decided stand which the Democratic National Committee has recently adopted in opposition to the Hawley Tariff Bill now being considered by the Senate Finance Committee. It cannot be said that the position of the Democratic party as a whole toward the bill has been very clear since the beginning of the extra session. The old unyielding opposition to high protectionists with their greedy demands upon the consumers' purse seemed to waver and, in some directions, to give way altogether. There

were Democratic congressmen, of course, willing to vote for the bill as a whole with its long list of unnecessary and usually indefensible rates in order to retain the good will of constituents who desired high tariffs on their own products, and their influence greatly weakened the once-united front of Democratic ranks.

From its new headquarters in Washington, however, the Democratic National Committee has delivered in rapid succession a number of broadsides against high tariffs which leave no doubt as to the national party's stand on Mr. Hawley's little masterpiece of "farm relief". It is that very phrase which seems to have irked most of the Democratic Senators, whose opinions the Committee quotes. They refuse to swallow the Republicans' positive statements that the bill is farm relief and, what is more, they take special pains to point out that the farmers are being relieved of nothing but their money in order to help manufacturing industries. Senator George of Georgia attacked the bill as a whole, as did Senator Connally of Texas. Senator Harrison showed up the absurdities of the domestic sugar producers' claims. All these men are members of the Senate Finance Committee.

So the consumer who looks with fearful anticipation upon the proceedings of Congress can take heart now. And in answer to those who object that the Democratic party is a minority one and relatively powerless, we answer, "What of the Progressive faction among the Republicans?" Those two elements of opposition, with possibly Mr. Hoover, might make quite a crowd.

Dark Days Ahead.

"Hey, Moike, and phwat do ye tink of these new sanitary drinkin' cups?"

"Sure, Pat, and soon we'll have to spit on our hands wid an eye-dropper!"

Unappreciated.

"Fancy bringin' a child like that to a funeral! Wot pleasure can it be to 'er?"

THE STAY AT HOME FOLKS.

A considerable number of people never get any vacation. Many of them are farmers, who in summer are working about a 15 hour day while the city man complains because he has to work eight. Many of them are housewives, who toil nights, Sundays and holidays. Some are harassed business men.

Something seems wrong when any element of people can't get some period of rest through the year. It is usually true that people can do more work in 50 weeks than they can in 52. The human mind and body were not made for unremitting toil.

Some people who theoretically get no vacation, really get more than they want, because their jobs are irregular. That condition is one of the big problems that modern industry has to solve.

How shall the people solace themselves who have to stay at home 52 weeks in the year, and who by reason of limited incomes or various conditions, never get that rest and uplift that comes from a good vacation?

Many of them are quite philosophical about it, and are not anxious for travel. Their tastes are simple, and plenty of things are happening right around them that strike them as quite as interesting as anything in Europe or some distant state. They have learned that happiness is not created by changing scenes. When many people travel, they take away the same old faults of mind and body that made them unhappy at home.

Travel trips should be refreshing and enlarging, but people can be perfectly happy and well without them. Many people who stay at home and read, can talk more intelligently than many who have travelled all over the world. Many persons who enjoy healthful pursuits in their own gardens or in various diversions, have better health and temper than those who are continually refreshing themselves by costly journeys.

Getting a living by hook and by crook doesn't apply to fishermen only.

FAVORITE VIRTUES.

Different periods of time have special virtues on which they place first emphasis. Sometimes people seem to value one thing most, and then they will turn to something else as the ideal most to be desired. It might be said that the virtue that is most emphasized today, particularly among a large element of cynical and iconoclastic people, is that of sincerity. These folks are constantly crying out against hypocrisy, and they condemn most bitterly what they call insincerity. of the, older ideas which prevailed in what they call the Victorian age.

Sincerity is a fine ideal, but it is not the only one. Some people seem to carry it to the point where they think it makes little difference how rotten a man is, if he is only sincere about it. They should logically admire a burglar, since that gentleman frankly admits his profession, and does not pose as a benefactor to humanity.

We need sincerity, but we need something besides that. A lot of quite useless people, who will never lift a finger to sweeten their personal

or business relations, who never take hold to help any community or patriotic causes, are perfectly sincere. They never pretend to be a bit better than they are, but they do not accomplish anything to make the world better.

Enthusiasm is a quality that is equally necessary. There are a lot of people who have been more or less self deceived, perhaps humbugs to some extent, who entertain a higher opinion of themselves than is warranted, yet who are tremendously useful because they are generous and unselfish with their time and their money. They take hold and work their heads off to bring benefits to the community. We can put up with a bit of their pretenses, in view of their usefulness.

Insincerity is an unlovely trait, but selfishness, censoriousness, and lack of enthusiasm are equally so.

Plans are under consideration for the construction of a modern up-to-date hotel at Snyder.

Harlingen has been selected as the distributing plant for well-known agricultural and orchard implements.

For Economical Transportation

Another Record!

over
800,000
New CHEVROLET Sixes
on the road since Jan. 1st!

Today's Chevrolet is scoring a huge nationwide success because it represents one of the most sensational achievements in automotive history—a Six in the price range of the four.

The Chevrolet six-cylinder engine delivers its power freely, quietly, and easily throughout the entire speed range—delightfully free from annoying vibration and rumble. Combined with this remarkable six-cylinder smoothness are equally remarkable speed, power and acceleration—and an economy of better than twenty miles to the gallon.

In addition to such sensational performance the Chevrolet Six offers the outstanding advantages of Bodies by Fisher. And no car ever provided a more impressive array of modern convenience features—adjustable driver's seat and VV one-piece windshield in closed models; easy action clutch and gear-shift, ball bearing steering, and instrument panel complete even to theft-proof Electrolock and electric motor temperature indicator!

The Ruby—July Birthstone—Attracts Health, Wealth and Love

By PAULINE

"The gleaming ruby should adorn all those who in July are born. For thus they'll be exempt and free from love's doubts and anxiety."

THE life force of the Sun is well represented in the warm, stimulating color of the ruby, the birthstone assigned to July, when the earth reaches its closest proximity to the Sun. It is not surprising, therefore, to find it closely connected, in magic lore and legend of the past, with the Sun's virtues—benevolence, dignity, vitality and productivity. In India it was said that the ruby, symbolical of the life force, was created first, and later man was created to possess it.

A ruby is supposed to be the precious stone, which, according to ancient legend, Abraham wore around his neck to preserve him from disease. When the venerable patriarch died, God placed this stone in the Sun, which explained the remarkable healing power of solar rays to the satisfaction of the ancients.

Leonardus, writing in the sixteenth century of the ruby, said that in addition to preserving bodily strength and health, it secured possessions to their rightful owner, reconciled quarrels and brought peace of mind and concord.

With other gems it shared the useful habit of turning pale in the face of evil or approaching misfortune. Wolfgang Gabelchover, another sixteenth century writer, testified that, while traveling with his wife he suddenly became aware that the ruby ring which she had given him had darkened ominously. Terrified at this omen of ill fortune, he took the ring from his finger and concealed it in its case. "Nor was I deceived," he writes, "for within a few days my wife was seized by a dangerous illness which resulted in her death."

It is also recorded that the unhappy Spanish wife of Henry VIII, Catherine of Aragon, upon noticing a change of color in her ruby ring, foretold her own downfall. How-

ever, she was luckier than Henry's subsequent wives, for at least she was not beheaded. Incidentally, a ruby, which at this time enjoyed a wide reputation for attracting material love, was the favorite talisman worn by this remarkable king.

Rubies are found in Ceylon and Siam, but the finest ones come from the mines of Burma, where they are imbedded in volcanic rock of granite and limestone. Seldom is a ruby discovered weighing more than three carats. The few that exceed this weight are among the rarest of all precious stones, worth a fortune, and are scarcely ever permitted to get out of India. For so highly is the ruby regarded there that Indian potentates will pay far more for such a stone even than Americans. As a talisman for success, a particularly favored variety is the Star Ruby which exhibits a perfect star on its beautifully rounded surface.

Since the flower for July is the water lily, a good color scheme for a July birthday party would be red, green and white, with water lilies set or pasted against a ruby red background.

Ancestry of the Yo Yo.

Truly there is nothing new under the sun. The present day Yo Yo is said to be merely the revival of an instrument invented in the dark ages by which the witch doctors expected to dispel the darkness.

Since this was just following the stone age, yo yos at that time were made of stone. One similarity of this old instrument to present day inventions is that there has always been a string to it like there is to everything that looks good and easy.

In later days the yo yo was used to amuse inmates of insane asylums, as it has always been a special attraction for the mentally weak or unbalanced. Children up to the age of accountability take to yo yoing eagerly.

One thing can be said in favor of the yo yo—it has always been practically harmless. The only case on record where unhappy consequences followed its use was in time of King Tut. The court jester attempted to amuse the king with a yo yo and was beheaded for his foolishness. What a pity some of the old customs are not now in vogue.—Rotan Advance.

Unconsciously Cynical.

"In our account of the Winterman-Hull wedding in last week's issue our reporter intended to state that 'after a brief wedding-trip the newly married couple would make their home at the Old Mansie; but through a typographical error which we regret exceedingly, 'Old Mansie' was made to read 'Old Man's.'—From Exchange.

The El Paso Electric Co.'s \$5,000,000 Upper Valley power project will generate 40,000 watts.

San Marcos has let a \$44,600 contract for the construction of a waterworks system.

The Aircraft Holdings, Inc., are making plans to establish an airport and erect a hangar at Amarillo.

as one breeding season is over, therefore, all male birds should be put in comfortable pens to themselves or should be marketed for table use. Any poultryman who is not already practicing this plan of handling the male birds of his flock is losing money through his old-fashioned methods and will be well repaid for adopting more up-to-date practices.

CENTRAL AGENCY FOR WHEAT.

(By Carl Williams, Editor, Oklahoma Farmer-Stockman).

Among the oldest co-operative organizations in Oklahoma are the farmers' elevators. More than 100 co-operative elevator companies have been organized in the last 25 years and most of them are still doing business. They have served as local concentration and sales agencies for wheat farmers. They have taught thousands of farmers about the principles and methods of co-operative marketing. They have also taught their members much about the principles of business management.

The co-operative elevator may be said to have been almost completely successful so far as it went. Its lack has been that each elevator corporation did its own marketing. While something has been saved for the farmer in this way in the form of local margins, no impression whatever has been made on the real problems of wheat marketing. Wheat is a world crop. The smallest successful marketing unit which can deal with it is that comprising an entire state. A still more powerful marketing unit would be that of an entire nation.

The Farmers Co-operative Grain Dealers association of Oklahoma, realizing these facts, has taken a true forward step by arranging for a central sales agency. Some years ago a group of elevator co-ops in the Texas and Oklahoma panhandles organized the Union Equity Exchange with headquarters at Enid under the management of E. N. Puckett. This sales agency has been successful in the handling of wheat from about 20 country elevators for several years. This sales agency has now been chosen by the Farmers Co-operative Grain Dealers association to serve its members in the same capacity.

The new arrangement concentrates the wheat of nearly 100 co-operative elevators into one sales office. It is a fine step ahead for all interests concerned and it will undoubtedly be followed by still further consolidations as time goes on.

The Parker County Dairy industry brings in \$300,000 a year exclusive of milk and butter used at home.—Wolfe City Sun.

The Santa Fe railroad has awarded the contract for the construction of sixty-five miles of track between San Angelo and Sonora.

The Laugh on Him.

Mr. Jones had recently become the father of twins. The minister stopped him in the street to congratulate him.

"Well, Jones," he said, "I hear the Lord has smiled on you."

"Smiled on me," repeated Jones, "He laughed out loud."

FOR RENT: Three Room Apartment—Modern. Three blocks of square. Garage; shade trees; lawn. Rent for \$20. mo. Four room Modern House. Two lots fenced in. Garage; screened in porch; shade trees; within one block of paving. Will rent for \$20.00 a mo.

Four room house, close in. Someone's bargain at \$12.50 per month.

How to Raise Poultry
By Dr. L. D. LeGear, V. S.
St. Louis, Mo.
Dr. LeGear is a graduate of the Ontario Veterinary College, 1892. Thirty-six years of veterinary practice on diseases of live stock and poultry. Eminent authority on poultry and stock raising. Nationally known poultry breeder. Noted author and lecturer.

ARTICLE XVI. PITY POOR CHANTICLEER.

"Swat the Rooster" is Now the Watchword With Poultrymen When the Breeding Season Comes to an End.

Editor's Note—This is another story in a series of 52 stories on poultry raising written by the well known national poultry authority, Dr. L. D. LeGear, V. S., of St. Louis. The entire series will appear in this paper. Our readers are urged to read them carefully and clip them out for future reference.

The old expression, "Cock-o'-the-Walk," doesn't mean as much now as it once did. In former times, Sir Chanticleer strutted about with all the insolence of one whose indispensability could not be questioned. He became the central figure of many a legend, even to becoming the hero of a great fanciful drama by the master playwright, Edmond Rostand. Well he might strut with all this adulation, but his day of greatness is now gone forever. At best, he is merely tolerated during the breeding season and as a reward for faithful service he is then condemned to the axe or to exile.

For this, the one time supreme dictator of barnyard society must lay the blame on fairly recent scientific discovery! Like the musician who sees his livelihood threatened by Vitaphone and Movietone, the exultant of chickenhood now finds himself in every precarious position. My investigations on my experimental farm prove to me that all roosters should be removed from the flock as soon as the breeding season is over. They should then be comfortably housed or sent to the butcher. I am convinced that fully \$50,000,000 is lost every year by poultry raisers who, through carelessness or because they do not know any better, allow roosters to run with the flock out of breeding season.

The rooster's part in poultry raising is merely to fertilize the eggs intended for hatching. Hens will lay just as well with no male birds present, as when they are. Some poultrymen contend they lay even better without male birds. Furthermore, an infertile egg will keep much longer than a fertile one.

The fertilization of eggs causes them to spoil much more quickly than

they would if not fertilized, especially in hot weather. Heat causes the germ in the egg to grow and as soon as such growth starts, the egg is no longer fit for use as food. On the other hand, I have fully demonstrated the keeping qualities of infertile eggs by keeping them in incubators for varying lengths of time. I have tested such eggs after the tenth day of incubation and found them still comparatively fresh. Had they been fertile, they would have been completely spoiled after two or three days in the incubator. In warm weather, fertile eggs will spoil almost as quickly as they will in an incubator or under a setting hen unless they are kept in a cool, dry place.

Eggs should be gathered twice a day in hot weather and marketed at least twice a week. Nests should be kept in a clean dry place and the litter in them should be frequently renewed to insure cleanliness and help to keep down vermin. Small, soiled and deformed eggs or those that are off color should be kept for home use. Eggs of good color, uniform size and, above all, those that are not fertile, command the best prices.

So many of the stations where eggs are bought now conduct tests for fertility that their sale is the more reason for segregating or butchering the rooster as soon as his period of usefulness is over. As soon

Texas has 638 National and 734 State banks.

Texas has 8.8 per cent of the total land area of Continental United States.

From March to June Texas shipped 889,000 head of cattle to market.

What probably was the largest "potato patch" in the world was the 2,150-acre potato field of the Sugarland Industries at Sugarland. It produced 200 bushels to the acre this year and the crop was valued at a million dollars.

Storger has made arrangements to handle the word "Borger" in the new guide.

**Only Memory of
Troubles Left**

Lubbock Carpenter's Wife's Health Restored—By Orgatone—Suffered Fifteen Years.

"About all that is left of my wife's suffering is the memory of it," said Mr. J. R. Jeter, of 614 Ave. F, Lubbock, Texas. Mr. Jeter has been a well known carpenter and citizen of Lubbock for a number of years. "If my wife only could have had Orgatone about fifteen years ago," he continued, "it would have saved her a world of suffering. She had a severe case of stomach and liver trouble and was bothered with rheumatism, which kept her in constant misery most all the time. And in spite of all she could do, her troubles kept getting worse. Her appetite left her and she would suffer terribly from indigestion and gas on her stomach after each meal. Her head ached a great deal of the time, and she felt tired, worn out and no account most of the time. She had severe pains in her back and sides which was caused from an inactive liver and I would not be surprised but what she had some gall bladder trouble. She also had a chronic case of constipation.

"We saw Orgatone advertised so highly, thought it might help her and she has now taken just two bottles and says she feels like a different person. She is getting wonderful results and is improving every day. Her stomach is in good shape and she eats anything she wants without the slightest trouble afterward. Gas does not form as it did and she doesn't complain of the pains as she used to and her rheumatism doesn't bother her as it did and in fact, she is better in every way. I am glad to give this statement for my wife, for Orgatone has proven such a wonderful medicine we want to recommend it to our friends and we shall always keep a bottle of Orgatone in our house."

Genuine Orgatone is not a so-called patent or secret remedy but a new scientific bile treatment containing no alcohol or other false stimulating drugs and is sold in Slaton by the Teague Drug Store who are direct laboratory agents. Adv.

**JUNE GRADUATES OF TECH
WITH STANDARD OIL CO.**

LUBBOCK, Texas, July 9.—A Paul Lefforge of Amarillo and Jerome Sanders of Haskell, June graduates of the engineering school of Texas Technological College, are connected with the Standard Oil Company for the summer. They are working in the plant at Elizabeth, New Jersey, doing research and development work. Both specialized in chemistry and were student assistants in that department at Tech. They plan to enter Yale this fall and work toward the Ph. D. degree.

THE AGITATOR.

Speaking of agitation in another issue, reminded me that we have a public enemy in the public agitator. Humanity has no greater enemy than the public agitator who agitates simply for the money he can get out of it. And that is the sole interest of most of the professional agitators. There are local agitators, of course, who have a propensity for tending to other people's business, and have none of their own to tend to, who agitate more for the satisfaction of making a noise and raising a stir. But their's are not so harmful as the professional agitator.

You may class me as one of those local pests; but my agitating is mild, and besides, I appeal to the mental attributes rather than the animal passions.

The professionals appeal to the animal passions in men, and stir them to a frenzy, when they have not the slightest interest in the issues they are harping on. They simply stir them up because men stirred to a frenzy will shell out money for an imaginary cause, when they would not part with it otherwise. But that is a small part of the harm they do. They stir up men, who are otherwise peaceful and well-meaning citizens, to deeds of violence.

The agitator is shrewd enough generally, to steer clear of the law; but I have known many good citizens to get in bad by listening to them.

Since facts are scarce, and interest dying,

It forces me to downright lying. As I can think of nothing witty, I'll let you puzzle out this ditty:

Lost in Battle.
While idling near a lonely bog,
A fearful battle raged,
I saw a snake attack a frog
And trial by combat staged.

The sneka seized on the frog's hind-parts,
The frog, to be on par,
Seized on his snakeship's tail and starts
A double-action sparr.

The struggle wild, they oggle fierce,
Each tries the tide to stem;
But as the shield of each they pierce
There's nothing left of them.

Sad, If (?)
In an eastern metropolis, I have been told,
A great church has adopted a baby,
to hold
In possession, for members in equal relation,
Which would ever belong to the whole congregation.

I was thinking of fate of the poor little thing,
If the ire of the church on its head it should bring;
And I wondered if others, in truths, would outrank it,
What a fate if its parents were ever to spank it.

By the editor, Slatonite:
An editor steals our smoke, sez 'e,
And does not credit you or me.
By A Watchman:
I'll tell you what we'll do, sez I,
We'll make him smoke in th' by and by.

A WATCHMAN.
A FAIR TARIFF PRINCIPLE.

The best rebuttal of the statement that our tariff excludes foreign producers from the American market are the statistics showing imports.

Every year an increasing amount in foreign goods passes through the American customs, to be sold all over the nation in competition with domestic articles.

This is as it should be. Our tariff principle has never been to exclude imported produce. All it does is to equalize producing costs here and abroad by levying a duty on goods manufactured or grown in countries where living conditions, the wage scale and the social status of workers is far inferior to ours.

At the present time Hamilton has four miles of Uvalde natural rock asphalt paved streets.

**COTTON LEAF
WORM APPEARS**

COLLEGE STATION.—The cotton leafworm has appeared in moderate numbers in parts of Nueces county and to a limited extent in portions of Bee county and, while the situation does not necessarily mean that Texas will suffer an early and general destructive infestation of this insect, it should be closely watched, according to R. R. Reppert, Entomologist in the Extension Service.

"This infestation is about a month earlier than the infestation has appeared in the same section in previous leaf-worm years," Mr. Reppert says. "Under very favorable conditions damage might develop over a great

portion of the state within the next few weeks, but with dry, hot weather it is not probable that the infestation will become general before the latter part of July.

"The outbreak is serious enough in the places mentioned to warrant immediate poisoning. Extensive purchases of poison materials elsewhere are not advised, but farmers in sections where leafworms often appear would do well to inquire as to supplies of poison and to have a source located in advance of possible need. The prompt application of calcium arsenate, either in dust or liquid spray form, is effective in the control of this insect. Paris green and lead arsenate may also be successfully used, but are more expensive."

**GRAIN FOR THE COWS
KEEPS UP MILK FLOW**

With the abundant pastures over the southwest at this time it might seem like a waste of feed and money to grain milk cows. But is it?

Perhaps it is for all those cows that produce less than a pound of butterfat a day on good grass, but for all cows in the pound-a-day class and over the figures show pretty plainly that some grain in addition to the best of grass pasture will pay dividends at present feed and fat prices, the July 1 Oklahoma Farmer-Stockman argues.

If the cows are to be grain fed in summer, what and how much feed should they get?

For cows getting less than five pounds of grain a day most any farm grain will do. Crushed oats can't be beat. One-half ground wheat with either one-half oats or ground kafir will make an excellent grain feed.

For cows getting five pounds a day and more the same kind of grain mixture fed during the winter should be used; that is, a balanced grain mixture should be made up. Such a mixture may be composed of 100 pounds of ground corn or any grain sorghum, 100 pounds of crushed oats or bran and 35 pounds of cottonseed meal, for cows on good grass. When the grass gets short, the CSM should be increased to 50 pounds. Or, a commercial feed mixture may be used.

The amount of grain fed to cows in summer should vary with the amount of milk produced. The following schedule is recommended (a gallon of milk weighing 8½ pounds):

Jerseys and Guerneys	
Milk per day, lbs.	Grain per day, lbs.
20	3
25	4
35	7
Holsteins and Shorthorns	
Milk per day, lbs.	Grain per day, lbs.
25	3
30	4
40	7

The amounts just suggested are for cows on good pasture. The amounts must be increased as the grass becomes short and dry.

Willie was dejectedly walking home from school and his woe-begone appearance attracted the attention of a kind-hearted old lady.

"What is troubling you, my little man?" she asked.

"Dyspepsia and rheumatism," replied Willie.

"Why, that's absurd," remarked the old lady. "How can that be?"

"Teacher kept me in after school because I couldn't spell them," was Willie's dismal answer.

**Got Up In The
Morning Feeling
DIZZY**

"I BEGAN to suffer with headache and biliousness," says Mr. John C. Malone, of Buena Vista, Ohio. "I had a hurting through the middle part of my body which seemed to come from indigestion. I would get constipated, and then feel all out of sorts. I would get up in the morning feeling dizzy, and everything I ate would disagree with me. Someone asked me why I did not try Black-Draught. I found it to be just the medicine I needed. When I feel a spell coming on, I begin by taking a dose of Black-Draught, dry, at night. I continue to take it for several days, and in a short while I am feeling fine. It is all the medicine I need."

Costs only 1 cent a dose.

**CHEMICAL IS USED TO
KILL BERMUDA GRASS**

Sodium chlorate, a salt recommended by the Kansas Experiment station to eradicate bindweed or wild morning glory, has been tried in Harmon county, Okla., for killing Bermuda and Johnson grass with apparent good results, according to the July 1 issue of the Oklahoma Farmer-Stockman.

The cost of killing Bermuda grass or any other pest with this chemical will vary considerably according to the amount of foliage at the time of the application because each blade and leaf must be wet with the spray solution made from the salt. Farmers who have tried the salt have used a spray made of one pound of the salt to one gallon of water. A fair estimate of the cost is probably about \$10 to \$15 an acre.

Sufficient tests have not been made

to say definitely whether one treatment will kill the Johnson grass. Last year, however, two different treatments on different plots in Harmon county, killed the grass with one application. One application in a third trial on another plot did not kill the grass entirely because some shoots came up again just before frost.

There is no doubt about the effectiveness of the treatment for killing Bermuda grass because one application each on three different plots killed the grass perfectly.

The sodium chlorate is not poisonous. It must be remembered, however, that this salt will kill field crops as well as pests. It should also be remembered that while the salt itself is not inflammable, when any inflammable materials, such as straw paper and cloth, become wet with the solution and then dry, the material will burn about like celluloid. Do not mix the solution in a barn or any other place where fire may spread. If clothing becomes wet with the solution, thoroughly rinse the clothing out.

WORK FOR SAFETY.

The tragic phase of automobile fatalities is that most accidents are unnecessary. Yet every year thousands of people pay with their lives for carelessness, recklessness and incompetence of drivers.

Compulsory insurance can never offset this irreparable loss. At its best it can only indemnify. It begins at the wrong end of the problem.

What is needed is a safety consciousness on the part of the public and rigid enforcement of adequate driving laws. In certain communities safety lessons have been given in schools, with the result that accidents to children appreciably decreased. Tests have shown that the accident rate will drop to a minimum when traffic laws are enforced and offenders punished.

In many localities the traffic codes are out-worn and inadequate, having gone unrevised since the time when an automobile was something of a curiosity.

Education and law enforcement have helped the railroads lower accidents and helped in fighting fire and disease. Applied to the automobile accident problem they would give quick and gratifying results.

Second Sheets at this office. Cheap.

THE CONTROL OF CRIME.

"What the criminal law needs is not teeth but brains," says William J. Donovan, former Assistant Attorney General of the United States, "not the mental activity of a specially appointed commission of lawyers, but the concentration of the public brains. The criminal is alien only mentally and morally. He is not a denizen of some remote island. He is living among us, a part of the community in the physical sense. . . . He has access to the automobile, to the airplane, and, in New York State at least, far readier access to the automatic pistol than has the law abiding citizen. These things cannot be kept from him.

"Shortening and simplifying the processes of the criminal law, extending the power of the judge upon the bench, enforcing local laws locally instead of through the already encumbered Federal courts, developing a sense of responsibility in the individual citizen, in the community and in its judicial officers—these are the steps which will bring about the control of criminality."

Anti-pistol laws, anti-automobile laws, anti-aircraft laws or any other kind of "anti laws" passed on the theory that they will prevent crime, simply punish the law-abiding to the benefit of the law-breaker. The more laws we pass the more law-breakers we have. Crime will be reduced in proportion as the law-breaker learns that punishment will be swift and certain.

REDUCING THE FIRE HAZARD.

In the early days of insurance the general plan for making rates was that the public made the conditions and the insurance companies made the rates to suit. Responsibility of insurance companies included only collection of premiums, payment of

loses and maintenance of solvency.

The idea that the public is entitled to service along with the purely mechanical conduct of business, has been a development of recent years in the insurance business as well as in all other lines.

The National Board of Fire Underwriters, the service organization of the stock fire insurance companies of the United States, serves both parties to the fire insurance contract. For the companies, the property owners and municipalities, it collects and distributes information on a great variety of subjects.

The cost of insurance is part of the overhead expense of every business. Fire insurance companies are alert to reduce the burning ratio, which is the prime factor in that cost. Committees of the National Board devote their time to that endeavor.

Quite Familiar.

She (thoughtfully)—"Did you ever think much about reincarnation, dear?"

"18 (otherwise)—"Think about it? I eat it nearly every day—only we call it hash."

Building permits in eleven Texas cities since 1920 totaled \$725,000,000.

Conservative estimate is that Texas' wealth is increasing at the rate of more than \$1,000,000 a day.

For Concessions, see H. A. Johnston, at the ranch.

Richard Barthelmess WEARY RIVER

**RICHARD BARTHELMESS
MAKES BRILLIANT DEBUT
IN "WEARY RIVER"**

Has Excellent Dramatic Role of Convict Who Sings and Plays His Way to Freedom.

Richard Barthelmess has at last made his debut in talking pictures—and what a debut! Our favorite motion picture star has entered into this newest phase of the cinema with a vengeance and we herewith predict for him a career of success that will dwarf his already brilliant one.

Barthelmess appears—and will be heard—in his newest First National starring vehicle, "Weary River" at the Palace Theatre, Slaton, Sunday, Monday and Tuesday.

Silent or otherwise, "Weary River" would have been adjudged a great picture. It is one of those rare Barthelmess characterizations which we have rightfully expected from him and which he has delivered in "Tolable David," "The Patent Leather Kid," and more recently in "The Noose" and "The Wheel of Chance."

But in addition to Barthelmess' usual splendid screen presence, his unmatched pantomimic talents are abetted to an amazing degree by the use of his voice. Audiences will be surprised to hear the highly pleasing quality of his voice in "Weary River". He plays the song, "Weary River," on the piano with excellent feeling and respect for its sentimentality.

Frank Lloyd has done an exceptional piece of directing and the cast is a notable one, especially in regard to Betty Compson, who was seen before opposite Barthelmess in "Scarlet Seas". Miss Compson also speaks, as does William Holden as the warden, and both register exceedingly well.

The story concerns a singing convict whose musical inclinations are

brought out in prison from where he broadcasts over the radio, thus winning fame, liberty and a girl. The story is deeply human and fraught with the genuine stuff of greatness.

CLASSIFIED ADS

FARM—WANTED.
in, practically clear, to trade for farm. See owner.—H. T. Swanner, Slaton, Texas. 91-92c

WILL BUY Vendors' Liens and Promissory Notes.—R. L. Vivial. 91-7tc

A friend observes that there would be no buy-at-home problem if everyone who believes in it would practice it.

FOUR PUREBRED JERSEYS QUALIFY FOR MEDALS

COLLEGE STATION, Texas, July 12.—Four purebred Jersey cows, one from the herd of P. I. Nixon, San Antonio, and three from the herd of R. C. Nicholl, Tullia, recently joined the list of Texas milkers that have qualified for American Jersey Cattle Club high production medals, according to report by A. L. Darnell of the dairy husbandry department, A. & M. College of Texas, who is superintendent of official testing for Texas.

The cow Pogis' Alcalde's Plume, owned by Mr. Nixon, qualified for both gold and silver medals with production of 715.74 pounds of butterfat and 11,347 pounds of milk in 365 days. For three months of the test, this purebred Jersey yielded more than 72 pounds of butterfat a month, leading the honor roll for three consecutive months.

Cows entering the silver medal class from the herd of Mr. Nicholl include Rochette's Charlotte's Queen, King's Little Spot and Gamboge's King, Sybil, all young cows. Rochette's Charlotte's Queen annexed the senior 2-year old Jersey championship of Texas with her record while King's Little Spot won the Texas Jersey yearling championship.

Rochette's Charlotte's Queen's production record was 596.66 pounds of butterfat and 10,133 pounds of milk in 305 days. King's Little Spot produced 499.76 pounds of butterfat and 12,137 pounds of milk in 355 days. Gamboge's King's Sybil, highest producer of the three, yielded 604.74 pounds of butterfat and 10,359 pounds of milk during the 305 days of the test.

Endless.

"Paw, what's the longest period of time?"
"From one pay-day to the next."

CHEVROLET PRODUCES 845,469 SIXES TO JULY FIRST

DETROIT, July 12.—Reflecting the ever-widening appeal of the low priced six cylinder automobile, the Chevrolet Motor Company, on July first, had produced 845,469 six cylinder cars. June was a heavy contributor to the achievement. Output for the month was 151,297 cars and trucks—nearly 20,000 units greater than the best previous June on record.

Commenting on the succession of records that Chevrolet has been establishing since the introduction of the new six January first, W. S. Knudsen, president and general manager, explained that from a manufacturing standpoint Chevrolet was not constantly aiming at new records—that production is governed at all times by demand. "Record public acceptance of the new six," he said, "has made necessary record performance on the part of our sixteen factories. The automobile buying public has been the dictator of our manufacturing pace.

"Naturally, we are gratified to see the steadily increasing demand for the product. It is a tribute to the vision of our engineering staff that worked for four years to design and perfect the new six cylinder valve-in-head motor.

"Great credit is due the manufacturing division which has worked unceasingly to accommodate the demand and in so doing has been responsible for achievements that have made industrial history in the production of the new Chevrolet six.

"This is all the more remarkable when it is considered that volume production on Chevrolet's scale must be accompanied by exact precision manufacturing so that waste will be eliminated and so that production lines will not be held up as a result of having to replace a part because of

defective materials or workmanship."

Mr. Knudsen declared that the summer production level will be considerably higher than in former years. He called attention to the fact that in practically every section of the country dealers are still behind orders and that demand in other sections continues to absorb the dealer supply almost as rapidly as cars are received from the factory.

AMERICAN COSMETICS FIND LARGE MARKETS ABROAD

The National Geographic Society in Washington has issued an interesting bulletin regarding the exports in cosmetics from the United States to foreign countries. These exports have risen in value 1,000 percent since 1910 and represent the sum of \$8,850,

000 per year.

Europe, of course, is our best customer. Next comes Asia. The Philippines also take large quantities of toilet soap, perfume and powders. It is recalled by the Society that Chinese women have been familiar since time immemorial with secrets of makeup and they made abundant use of lipstick, eyebrow pencils, rouge and all modern aids to the complexion in centuries past. They have, however, relinquished the ancient tools of beauty helps for more modern devices.

While French perfumes take first place in sales, it is interesting to note that America commands the highest position in the market for dentifrices. Its powder compacts are also popular.

Plans have been completed for a 52,000-egg chick hatchery at Electra.

The Acme of the Baking Art

Think of the joy and satisfaction of finding a really wholesome, nourishing, satisfying kind of bread, clean and sanitary. You can recognize it at a glance. Its rich golden brown crust quickly identifies it as the better bread.
