Have YOU Recorded Your Tire Numbers?

WASHINGTON, Jan. 14 (AP) - Secretary of the Navy Knox today said he believsd stories of internal unrest in Germany were spurious and deliberately spread to take the edge off America's war effort.

"Almost every one of the stories about the terrible situation in Germany originates in territory controlled by Germany," Knox told a press conference. "This alone should raise suspicion."

"Assuming that they are doing it deliberately, it is intended to take the fine edge off the sense of urgency and immediacy and singleness of purpose with which this country is pushing its war effort."

Knox said also that German withdrawals in Russia should not be regarded as a sign of a German military debacle. "In many cases there has been hasty re-

tirement, but I don't believe there is a German rout in Russia," he said. "To assume that a German retirement on ground which they have won is a rout would be an assumption as silly as we could make. It is very unwise to assume that they are about to fall apart. Germany still has the greatest military machine in the world.

"The Germans are adept at using psychological weapons I think they are operating on us now."

### Victory Gardens DOWNTOWN STROLLER

Chief complaint among most of the First Aid class students these days is that they can't find anybody to sit still long enough to practice their bandaging ability on. It might look silly to an on-looker but the students feel mighty serious about their ability to make an arm sling, head bandage and such....

In town for the day was Mrs. HART PHILLIPS of Overton who tells us that the sixth district, which includes Howard County, will have a full spread in the home demonstration magazine in the next month. Nice going...

Among the ideas that this war has brought out, the one that sour Among the ideas that this war has brought out, the one that sounds the soundest to us is the victory garden plan that the local Garden club is taking up and trying to promote If you've got a plot of land, even a small plot, the idea is to plant vegetables and such that will grow. You don't need a map to figure out the importance of this.

Understand the Lions club goat got the goat of some of the members and guests at the Tussday luncheon at the Hotel Settles. Seems for desert, said goat, who has an isnocent twinkle in his eye, chewed up a few hats that happened to be within reach.

In town for a day or so was NEAL BARNABY, who traded his job with Cosden to join with the border patrol at El Paso. He was all dressed up in his uniform, gun and the like. It's quite a job, NEAL says, with something new happening every day.

### Oil Industry Gets Better **Priorities**

Noyes . ..... 0

TULSA, Okla., Jan. 14 UP)-The oil industry today was in a better position regarding priorities on equipment but apparently was making little headway toward any broad relaxing of the 40-acre spacing rule.

The OPM issued a full priorities order, giving the industry the highest ratings so far. An Al-A rating was granted for materials needed to repair refinery breakdowns.

Equipment used for prospecting work were given an A-1-E rating. and an A-W rating for wildcat drilling.

Coordinator Ickes said however that such an order should insure operators of adequate material needed for maintenance of present marketing equipment.

Amending its original 40-acre well spacing order, the OPM calls for consolidation of all separate property interests within the ap-propriate 40-acre area surrounding the designated well location. Such a ruling was viewed here as necessary to cope with the

problem of offsets. Oil men here took the amended orders of OPM as an indication that efforts made in some quar ters of the industry to obtain a change in the 40-acre spacing rule would be unsuccessful. In the field, the Oil and Gas

Journal reported 571 completions for the week, compared to 554 a week ago, and 462 a year ago.

### 14. Economy In Food Murray Patterson, son of Mr.

AP Feature Service

"Food will win the war and write the peace," says Agriculture Secretary Wickard. Curbing waste in buying and serving food will help your budget. Follow a balanced diet, and use leftovers planning menus for seven days. If refrigeration is adequate, lay in a week's supply at a time. Don't cut down on vital foods in order to trim expenses; it's not an ecoomy in the long run. Don't rush to "buy now" for it really means to "hoard now," to run the risk of spoilage, to run up prices by speculation. Buy most fruits and regetables in season and when the price is right.

### Take Care When You Store Car

WASHINGTON, Jan. 13 (P)-If you plan to store your car for the winter, or the duration of the tire shortage, jack it up on blocks to take the weight off the tires. The advice came today from

the Army quartermaster general in a manual on the care and mainenance of pneumatic tires. If the car can not be blocked up, take the manufacturer's direcion as to what pressure to inflate the tires of an unused car, the manual advised. Other recom-

nendations included: Tires that must remain outloors should be coated with a synthetic rubber paint or a wrapping of heavy canvas.

Since rubber is rotted by light, heat, air in motion, ozone, dust and dirt, dismounted tires should be wrapped in a tarpaulin and stored in a cool, dark place.

Tire dealers should avoid piling casings flat on each other, to wold kinking the wire beads and distorting the tire. Stored tires should be cleaned, and if on rims, air pressure should be reduced to a few pounds.

With all precautions, tires should not be stored more than three years, nor tubes more than Tubes not in casings should two. be deflated, folded, and protected from air, moisture, grease and oil.
