## Federal Deficit Much Less Than Anticipated But Still A Deficit

Government reports reflect a federal budget deficit of slightly better than \$3 billion as of June 30

For whatever consolation it brings, the deficit was about two and a quarter billion less than had been estimated by the administration on April 20. The difference between revenue and expense could have been worse than it was. Unfortunately, we went three billion in the hale, and that it was the 18th time within 20 years that the federal government had come up short at the end of the year

With an extremely serious international situation now on our hands, it will be all to easy to forget the implications of a continuous policy of unhalanced budgets. It can be passed off, as some others have -as a condition which can't be dealt with in a period of crisis.

he an extremely short-range matter, this theory has had merit. But as a fixed policy, it is critically unsound. In the past few years we have experienced the greatest level of income this or any nation has ever known. Yet the public debt has increased instead of being repaid. An indefinite continuation of this policy can, in time, create an internal fiscal situaquite as serious as any external international aituation. The federal budget should be balanced

The only surprise was Sweden's decision She had remained aloof on the Atlantic Pact, mindful of her perilous proximity to Russia, although there was no doubt where her sympathy lies. Little Denmark was bolder, and Israel -like South Korea-owes her existence to UN

Thus the moral force of UN becomes apparent. With 39 nations aligned alongside the UN, which means alongside the U.S., the organized opinion of mankind, the non-Communist world in general, is now solidly back of UN's call for help to South Korea, and behind the U.S.'s effort to implement that call.

lined up beside the 36 which had already and potential military strength not lightly to be ignored even by the Kremlin. It is a sufficient answer to the empty claims Moscow that South Korea attacked North Korea. If Moscow's claim had any truth in it, why was it the North Koreans showed up in South Korean territory, instead of vice versa?

> The decision to go to South Korea's assistance, and the successful carrying out of that enterprise, could quite conceivably give the UN the boost it needed to become a real force in world affairs. For the first time in history it has challenged with force an outrageous act of aggression, and the non-Communist world is rallying as one nation in support of that challenge.

> The end product could be a complete reversal of postwar trends, and the es-tablishment of UN as a genuine keeper of the peace, and the ushering in of the sort of tranquility and stability all the world except Russia has longed for.

## Korean Imbroglio Is A Major Lunge By Stalin To Win Over Japan Soon

WASHINGTON. -The main thing you have to remember about the Korean imbroglio is that this is a major lunge by Joe Stalin for what he wants most the teeming, energetic, and at the moment partially American-ized Islands lying off the Siber-

ian coast, Japan. History has shown that there is no basic difference between the Czarist planners in the Kremlin and the Communist plotters in the Kremlin. They all reached for the same objectives.

The Czar struggling for out lets to the sea, conquered Finland, Latvia, Lithuania, Estonia in order to nail down his domination of the Baltic Sea. He started the Crimean War with Turkey and Britain in order to get a warm-water outlet

through the Dardanelles, He yearned for the country now called Iran and an outlet on the Indian Ocean through the Gulf of Persia; through British politics and the long, overland route across the deserts made this not worth recourse to arms.

And in the Far East he fought Japan in order to secure Korea and the Liaotung peninsula jutting down into the warm waters of the China sea.

That war ended in defeat. Ted-dy Roosevelt, longtime friend of the Japanese, intervened just as dapad was hearing the exhaus-Treaty of Portsmouth under which Korea, control of Man-churia and one-half the island of Sakhalin went to Japan. The Czar was left sulking behind his unsatisfactory ice-bound port at Vladivostok.

His great yearning for the warm-water ports in Asia hada falled. And until the Communists took over the Kremlin, Russia seemed content to busy herself behind her tremendous land-locked land mass without too much interference with the rest of the world.

PEARSON ODYSSEY-This columnist, as a young newspaperman, traveled through much of this crucial area—up through Sakhalin, across to the Siberian mainland, up the Amur River to Khabarovsk, through Manchuria to Harbin, and across the Trans-Siberian railroad - to

I was jailed briefly by the Bolsheviks in Khaborovsk, lived on the beach at Vladivistock, came back three years later through Korea to South Manchuria, and took the long trek across Gobi Desert to the heart of Mon-

At that time, however, Generalissimo Chiang Kai-Shek-now the darling of the Republicans-was an ally of Russia and his troops were trained by the famed Soviet military man, Comrade Bo-

Form this and other observations, I am convinced that Stalin's major objective, much like the Czar's, is this great indus-trial heart of North Asia-the iron, steel and coal regions of Manchuria, Korea and Japan.

He has already made one stab at the iron and coal of Germany and, thanks to the Berlin airlift, has failed. Now the Schuman Plan for European iron-steel cooperation may thwart him fur-

Already be has taken back Latvia, Estonia, Lithuania and semi-control over Finland along the Baltic. And he has started be greatest exodus of Baltic peoples in recent history in order to protect the military secrets of the 'Baltie Lake"-which was why a U.S. naval plane was shot down

He has also been thwarted by Tito in his attempt to extend Slavic domination to the Adriatic through the "land of the South-ern Slavs"—though an invasion of Yugoslavia may be next on the schedule. Also he may come back to the easy pickings of oilrich, defenseless Iran, STALIN'S CHIEF YEARNING

But basically, Joe Stalin, like the Czar, yearns to dominate North Asia-later Southeast Asia And the chief roadblock in his path is Japan, where an American occupation has made some slight progress in spreading democracy among Japan's impressionable people.

A Japanese democracy, challenging a Communist Asia, is the last thing Stalin wants. Also domination of Japan would make the island stepping-stones down the east flank of Asia-Formosa, the Philippines. Indonesia-fall like ripe plums into the Kremlin's

In fact, the highly industralized, energetic Japanese people could be the easiest of all to convert to Communism.

That is why the Korean spearhead, pointed at Japan, just about 100 miles across the straits of Fusan, is so important to Moscow. Korea itself is not important economically. It is a poverty stricken, eroded country which

will cost money to support. But, politically and strategically, it is the first essential step in dominating Japan. Psychologically, the Japanese have been accustomed to thinking of Korea and Japan as one area. Economically, the Japanese need Korea as a market. Strategically, it is only a hop across the narrow Fusan Straits, and in the old days ferry boats crossed from the mainland of Korea to Japan two or three times a day.

That is why President Truman's decision to use the armed forces of the United States in Korea is so momentous. And that is why Joe Stalin is not likely to take this American blocking move lying down.

He may not counter in Korea. He may counter in Iran or Yugoslavia. Or there may be a delayed-action fuse in the Orient. But somewhere, someplace, Un-cle Joe is going to bide his time and watch for an opportunity to come back.

## Coburn Says Woman's Peak Is At Age 40

HOLLYWOOD, -After observing the opposite sex for most of his 73 years Charles Coburn concludes that "a woman doesn't reach her peak until she's at least 40."

The famed actor with the monocle and the pouting lip, delivered the opinion at his spacious and memento-filled home.

"Put any woman past 40 in a room full of debutantes." proposed "In a few minutes, you see that she has monopolized the attention and has the

men in her control.
"Why? Because she has learned to make the man seem the center of importance. Younger girls feel that they must be focus of attention. They don't realize until later in life that men do not like that." Coburn warmed up to his subject and spoke in the soft tones of his native Georgia.

"A weman past 40 may have lost some of her youthfulness, but she has gained an inner beauty which is more important. She is better educated, 'She She is better educated, knows more about culure and can converse with more charm. She can cook better. She knows how to comfort a man," A man he added. doesn't

reach maturity until 50 "After all, women are always more advanced for their age than men. Women are closer to life; they understand it better. For it is the woman who gives life; the man is merely an incident or an accident in the birth of a child

"A girl of 12 or 14 is always more advanced than a boy of the same age. In fact, it starts earlier. A girl baby may be bored in a room full of wom-en. But let a man enter the room and she will start preening her feathers."

The actor admitted that life began a 60 for him.

## Big Stick Isn't Sound Logic, But It Is Cold, Common Sense

to drive one to cynicism and despair. The cold war has developed a hot spot in Korea. In less than five years after end of the last world holocaust, an explosive situation has developed,

It doesn't make sense, but then armed conflict has seldom made a lot of sense. When it portends or arises, it must be accepted as a hard fact, You have a enner make sure you can defend what you have, or resign yourself to loss of it and the acceptance of a dominant power over you. In the United States at least we don't

take to the idea that some super-imposed authority can tell us what we can and can't do. For a century and three-quarters we have grown up in a tradition of freedom and of democratic processes. We came by these "inalienable rights" the sacrifical and bloody way. We can be thankful that the overwhelming majority of the population is determined to keep them, and, if necessary, by the same way. That is why, although we have a nat-

ural distaste for it, we build up our fortifications, maintain our armedatrength, and even go to the aid of those to whom we feel a democratic, moral obligation. That is why, too, we stand stubbornly beyond the last lipe of graceful retreat and fight.

While there always is danger-and a real and present danger—that such a atand will precipitate a major conflict, there also is a good chance that it will be localized The most practical reason in support of this thesis is that the real

adversary, while able to pump trained units and heavy supplies into a certain area, is not yet able to maintain forces on an unlimited front. Thus, we may see a lot of strong and nasty talk, and a lot of thinly veiled maneuvering behind the scenes, yet possibly not an open determ-ination to pursue a bluff that has been called.

If South Korea can be saved and the situation settled without an eruption of that prospects of a longer reprieve will be enhanced. Maybe this is a vain hope, but it is the only one that keeps one from complete fatalism.

So long as general war can be averted, there is always some reason to hope and pray that enlightenment and reason can ultimately prevail. In a world that is crying for food and raiment and shelter and medicine for multiplied millions, the employment of untold billions of dollars for destruction is idiocy. Mankind has spent and will spend for war enough for every man to live well and securely. Instead, most of the world exists instead

of lives-and all of it dwells in fear. When you think about it, you are apt to take the cynic's chair or occupy the scorner's bench When you reflect on what a marvelous creature man is, you also must admit he is a dolt.

But for those who would like to retain the privilege of reflection, the right to philosophize and to speak, the liberty to come and to go, the freedom of choice it's a mighty good idea to carry that big stick. Perhaps that isn't sound logic, but it is, alas, cold and common sense

mobilization of men and industry in the United States probably could set a new speed record, if necessary.

disclosed, but one spokesman has said a 20-title proposed bill would: 1. Authorize a virtual labor draft if

necessary, paralleling the draft of soldiers. . 2. Apply a "quick freeze" to the nation's economy with wage and price ceilings. Production of non-essential civilian

goods would cease. Materials would be allocated by priority. 3. Impose an excess profits tax at a

rate yet to be decided. It was 90 per cent in World War II. 4. Set up a board to settle laboundis-

5. Impose censorship on communications, including mail.

6. Requisition needed war supplies, seize plants, mills and mines if necessary. The President would not be required to enforce all of the bill's provisions after its passage by Congress. He could scale down the severity of the rules to fit the need.

## Iron Man Feat One Of Best

ODESSA, July 5 - A remarkable pitching job by Carlos (Potato) Pascual, probably the best ever witnessed in the Longhorn league, enabled to Big Spring Brones to defeat the league-leading Odessa Oilers in both ends of a double bill played before around 3,000 onlogkers here Tuesday eve-

Patrual set the Ollers down with two hits in the opening game, won in the very first inning when his mates staked him to a seven-run lead, then came back in the morningcap to yield but three hits to the amazed Odessans.

The twin victory was the third in less than a week Pascual has scored over the Oilers and represented the sixth triumph for the Brones in their last seven starts against the pace setters.

## LOOKING 'EM OVER All-Star Ballot

Big Spring must start thinking in terms of a new baseball park, if professional ball is to continue here.

The present plant was adequate when built back in 1946 47 but doesn't fill the bill now. There simply isn't enough room in and aroun the State street orchard.

Parking space comes at a premium for late arrivals. There is not enough room in the Frandstand when the crowd is large, as it was here last Saturday night. Concession boys have a very hard time as ting up, and down the sieles, for the simple reason that people sit in them.

The fences, put there by necessity, are too close to home plate, especially the left field barrier. The ridge which marks the north end of the high school track field, jutting out into right field, should not be there. Dressing rooms should be provided for both players and umpires. Press and radio facilities should be placed on top the grand-

The field itself has always been rough. Home plate is much too near the stands. And the entire plant is so near the canyon to the west of it that the ball club loses more than its share of baseballs every time it plays here.

Last but not least, houses are being built all along the street facing the park to the north.

Who's going to build the park? You tell me. Lamesa backers got together recently and raised funds for one of the best baseball layouts

among the smaller leagues in the country. But does the same public Left Field We do believe that the local club would never have to worry over their attendance if a fine plant built on the order at Angelo field were erected here. The fans like to feel they're 'going somewhere'

# Morgan Turns Back Bill Crook In Finals, One Up

Country Club golf tournament crown Tuesday, defeating Bill Crook, 1-up, in the finals.

Bob Hodges copped the consolation match, winning over Dan English, 5 and 3.

In other matches, Matt Harrington won the first flight crown with g 2 and 1 victory over Poe Woodard, runnerup. Consolation laurels in that division went to Franklin Dillon who defeated Carl Strom.

James Edwards won the second flight, defeating Avery Falukner 2 and 1, while Travis Reed won the consolation in that class with a 2 and 1 victory over J. T. Morgan In the third flight, Frank Proctor was victorious after eliminating Sidney Mellinger, 4 and 3. Grady Duling won the third flight consolation with a 2 and 1 victory at the expense of Joe Burrell.

Morgan sunk a 12-foot putt for a birdle on the 18th to close out his match with Crook. Bill was shooting for a bird from 15 feet away and just missed.

The two made the turn all even. Morgan had a 37 on the front side. Morgan had defeated Earl Rey-nolds earlier in the day, 4 and 3, while Crook was upsetting J. R. Farmer, 2 and 1.

Morgan won his second championship in a little more than a week. He recently bagged the City crown by turning back John Pipes in the finals.

# The Car that puts your Best Foot forward

We think you'll agree that the whole story of an automobile isn't told in its power, its room, its styling, even in its ride.

REFUGEES RIDE THE LOCOMOTIVE - Unable to crowd into

The jammed railroad cars, South Koreans, including women and

boys, find places on the locomotive of a refugee train leaving

Suwon. The city, 20 miles south of Communist-held Seoul, was

evacuated when the North Korean invaders continued to sweep

southward after taking Seoul, but Suwon was still in South Ko-

rean hands. The Communists were reported six miles from the

city, preparing for a new assault. (AP Widephoto).

Big Spring with her mother and Lee Harris

There is the all-important point about what a car does to you - and that's where ROADMASTER really shines.

For you can't slip into this bonny beauty's broad seats without feeling like somebody pretty special.

When you take its neat wheel in your hand - when you cut loose, with a toe-touch, the rich baritone of its big Fireball straight-eight power plantwhen you feel the smooth surge of its Dynaflow-cushioned take-off -

Man, then you know you've got a real automobile!

And don't overlook this:

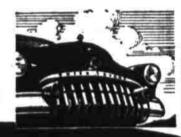

That graceful sweep of chrome along the fender-found on no other car made today - is a mighty eyecatching note of distinction.

Those four Ventiports, too, cause many a head to turn-they mark you unmistakably as the owner of the biggest and best Buick built - a car as fine and rich as any man has need for.

There are a lot of good, solid, dollars-and-cents reasons for making ROADMASTER your choice over any

Its size. The commanding performance of its 152-hp Fireball valve-inhead straight-eight engine. Dynaflow Drive standard. A ride that's quite matchless in its gentle softness. Distinguished styling from bold, protective front end to gleaming "double bubble" taillight.

But if you're ready for a car that's more than just an automobile - if you want one that puts your best foot forward in any company - that's the real reason for seeing your Buick dealer quickly - to talk turkey about a ROADMASTER.
