

Bennie Sue Welch To Wed Bobby Free February 20th

Mr. and Mrs. Melton Welch this week announced the engagement of their daughter, Bennie Sue, to Mr. Bobby Free, son of Mr. and Mrs. G. E. Free of Muleshoe.

The wedding will take place February 20 in the First Methodist Church in Earth with Rev. Hugh F. Blaylock of Anton reading the marriage vows. Rev. Blaylock was pastor of the Earth church at the time Miss Welch became a member of it.

Matron of Honor will be Mrs. Lucille Wheat. Bridesmaids will be Joyce Gooch, June Say'or, Barbara Williams and Junabeth Laing. Jake Saylor will be the groom's best man.

Miss Welch is a sophomore at Texas Tech where she has been a business major. She will discontinue her studies at the end of this semester. She was valedictorian of the 1953 graduating class at Springlake high school and was editor of the Wolverine and secretary of the Student Council in her senior year. She was president of her class in its sophomore year.

Mr. Free graduated from Springlake high in 1950 and spent the next four years in the navy. He was discharged in October of this year and plans to farm near here next year.

The public is invited to attend the ceremony and the reception following in the church parlor.

MISS BENNIE SUE WELCH

HOME OWNERS' QUESTION BOX

Q—Patches of mildew have formed on my basement wall. What's the best way to get them off?

A—Scrub the affected areas with a commercial mildew retardant or a solution of half an ounce of bichloride of mercury to a gallon of water. Bichloride is a deadly poison, so handle it carefully.

Q—My neighbor speaks of roofing his house with "210-pound asphalt shingles." What does he mean?

A—He's referring to three-tab square-but asphalt strip shingles, which customarily weigh 210 pounds per square when 5 inches of each shingle tab is exposed as the shingles are laid on the roof deck. A square of roofing is the amount needed to cover 100 square feet of roof area. When three-tab square-but asphalt strip shingles are applied in this way, 98 percent of the roof area is protected by two or more thicknesses of the tough, long-lived material.

Q—I want to re-stain a wooden cabinet, but sanding does not remove the old stain. What should I do?

A—Apply a commercial wood bleach or oxalic acid. To complete preparation for the new stain, give the wood a fine sanding.

Q—Is there any way to make a table top heat-resistant?

A—Yes. After removing the old finish, apply a mixture of one-third turpentine and two-thirds linseed oil. Use a soft, clean cloth. Rub the surface dry.

This "butcher knife" wagon wheel has served uses its maker never dreamed of. When the wagon it carried became obsolete, Ed Williams made a "flying jenny" of it for his children. They grew up and moved away and Harvey Hickman needed Williams out of it, mounted it on a steel base, gave it a glass top and made a very attractive and unusual table. He has plans for it in the den he is building in his basement. Ed was one of the accessories Hickman has made to go with the wagon wheel table. The collar and homes he got from the Jack McCard place after they moved to Arkansas. He mounted a mirror in them. Jimmy Eagle found the single top at an old abandoned barn near here. That's a real oil lantern mounted at its center. Harvey didn't say who is missing a boot so that he has a flower pot to match his other furnishings. (News Photos)

HOW TO DO IT

Estimating Paint

American Builder magazine points out that labor cost in painting is always higher than the price of the paint, so that a

more expensive but longer-lasting paint is cheaper in the long run.

To estimate the amount of paint needed, measure the distance around the house and multiply this figure by the height at the corners. This gives the total side area. The gables are figured by multiplying the height of a gable by one-half its width. The side area in the sketch equals the perimeter, 110 feet, multiplied by the height, 22 feet, a total of 2,420 square feet. Each gable is 8 feet by 12 1/2 feet, or 100 square feet, and both gables total 200 square feet.

To find the quantity of paint needed, divide the total area (2,620 square feet) by the area that can be effectively covered by one gallon, a figure that the paint dealer can give you.

VALANCE HIDES LIGHT
A fluorescent tube behind a valance gives a diffused, restful light, makes a room seem bigger. The unit can be built by the home-owner, or bought from various fixture manufacturers.

CLEAN PICTURE GLASS
To clean picture glass, wash it with a lintless cloth and mild soapsuds. Rinse with clean, warm water to which ammonia has been added. Polish with a chamois.

REMOVING OXIDATION
To remove the greenish oxidation that forms on copper and brass fixtures, wipe them with a cloth soaked with ammonia.

Modern Lighting Has Bright Future, Says Magazine

American Builder magazine's description of the lighting in a new all-electric home gives a preview of the kind of lighting system that may be adopted generally for new homes in the near future.

"Light-conditioning involves extensive use of fluorescent strip lighting, particularly in a 25-foot valance on one living room window wall. Adjustable hanging fixtures and wall brackets, plus ceiling spots, contribute to lighting which virtually eliminates any need the occupant might have for lamps. Fixtures recessed in the roof illuminate the front court. Rear terrace and driveway are floodlighted."

"Most of the lights can be operated from several locations because of the remote control wiring system. A selector switch in the master bedroom controls outdoor lights as well as those in living room, entry, kitchen, and basement."

Archery Is Fun And Is Family Affair

By DICEN HENDERSON

Warrior-style hunting can be fun, especially when you don't have to depend on it to feed the family. Twenty years ago the bow and arrows was all but forgotten.

Last year, says the National Field Archery Assn., more than 100,000 archers were issued licenses, for bow hunting in the 23 states that have recognized the sport so far, and the boom is on.

This renaissance for Robin Hood, apparently follows the growing trend toward hobbies in which the whole family can take part. Most state game officials, in opening more and more liberal opportunities to bow hunters, pitch the proposition at the fun

pleasant camping, hiking and such.

What you need to take advantage of this splendid new excuse for weekends in the woods—in addition to regular autumn outfitting togs—is (obviously, a bow and arrow.

And since while bowhunting you may occasionally come around a bush and stare a deer or bear in the eye, you'd best start with a bow "weighing" 30 pounds or more. Forty is better and some of the 15 big game states have legal minimums. Fifty pounds, however, likely will be too much to draw for a reindeer.

When you get into the store, you'll find bows are relatively inexpensive. Simple lemonwood items can be had for under \$10, and the very best in laminated wood-and-glass are under \$50. Hunting arrows can be had for between \$10 and \$15 a dozen. Big game arrows will have broad razor-sharp heads with two or three blades. Small game arrows may be without barbs, or even completely blunt depending on concussion for effect. There are also special arrows for fish and fowl shooting.

Otherwise you'll need only a shooting glove to protect your tender fingers from the pull of the string, an arm guard to protect your arm from ditto, and perhaps a quiver in which to carry your arrows. After that, just find a place to pitch the tent where the scenery is favorable.

Texans In Washington

WASHINGTON (AP) — Moving time has hit Capital Hill again. It does every two years after the elections and Texans are in the thick of the moving. House officials have just finished assignment of offices for the session starting Jan 5. While most of the Texans will remain "put," some are involved in shifts.

Reps. Walter Rogers of Pampa and Frank Ikard of Wichita Falls, will move from their seventh and sixth floor offices in the "new" House Office building to adjoining suites on the third floor. Rep. Jack Brook of Beaumont will move from the "old" to the "new" House Office building, on the fourth floor just above Rogers and Ikard.

LOCATIONS ASSIGNED

The five new Texas congressmen, who will join the state's delegation in January, have been assigned office space as follows: Joe Kilgore, McAllen, Room 335 John Bell, Cuero, Room 142 and Bruce Alger, Dallas, Room 138, all in the "old" building; J. T. Rutherford, Odessa, Room 1608, and Jim Wright, Weatherford, Room 1628, both in the "new" building.

Bonham's veteran Rep. Sam Rayburn, the "dean" of the House by the virtue of seniority of service over all colleagues, also faces a switch again with the outgoing speaker, Joe Martin of Massachusetts. They have suites close to each other in the center of the Capitol itself; the more elaborate is assigned to the speaker and the other to the minority party leader. Rayburn thoroughly dislikes the process of moving, but he's expected once again to surrender to Martin.

OFFICES ON SENIORITY

The 435 House members, aside from the speaker and the minority leader, get offices on the basis of seniority. The veterans thus have a choice in either of the House office buildings, across the street from each other and with the Capitol a block away by subway.

The congressmen have to walk. The senators have an electric monorail car shuttling through the subway connecting their office building with the Capitol.

The "old" House Office building was erected in 1906, the "new" in 1932. Although most of the older legislators choose suites in the new, some prefer the old building because of its high ceilings and carpeted floors or because of more convenient spots within the building itself. Since each structure occupies an entire block, the location of the office suite can mean a shorter walk to the House chamber in the Capitol proper.

Get Near Committee Rooms

Exercising the privileges of seniority, the older members also move from time to time to get nearer the lay-out of rooms occupied by the committees on which they serve.

After all the re-elected congressmen were given their choice of remaining in their present offices or moving to a vacated suite, the incoming freshmen legislators drew for space.

Their names were placed in a hat and drawn one by one. In that process, Mrs. Celia Hare Martin won third choice for the Rio Grande valley's incoming Congressman Kilgore. She is now secretary to Rep. Lloyd Bentsen of McAllen and is to remain on in that job with Kilgore, who succeeds him.

Support Rates For Oats, Barley, Rye And Sorghums Set At 70 Per Cent Parity

AMHERST — Support rates for the 1955 crop of oats, barley, rye and grain sorghums were announced this week by Charles Hill of the Agricultural Stabilization and Conservation office here.

Hill said that Commodity Credit Corporation price supports for these crops will be at levels reflecting 70 percent of the parity price as of Nov. 15, 1954.

70 Percent of Parity

He said the national average "dollars and cents" supports for 1955, reflecting the 70 per cent of parity, are:

Oats, 61 cents per bushel for Grade No. 3 or better; barley, 94 cents per bushel for Grade No. 2 or better (except mixed barley); rye, \$1.88 per bushel for Grade No. 2 or better or No. 3 on test weight, but otherwise grade No. 2; grain sorghums, \$1.78 per hundred weight for Grade No. 2 or better (except mixed grain sorghums.)

Hill pointed out that Price support levels for these small grains have varied widely in past years. The highest which have been in effect were 85 per cent in both 1953 and 1954. Before that, during the approximately 15 years when supports have been used for this group, supports have at times been as low as 44 per cent of parity for barley, 35 per cent for grain sorghums, 69 per cent for oats, and 38 per cent for rye.

Desirable Relationship

The support rates announced for 1955 production are aimed at promoting a more desirable relationship between the production of these four grains as a group and the overall utilization of feed Hill said. Production of these grains in 1954 was substantially higher than in 1953, and there will be no restrictions on their production in 1955. Indications are that much more of them will be placed under price support this year, and with high level price supports this trend could have continued next year. The lower supports are expected to encourage better adjustment and freer flow of the four grains into feed use, he added.

Eligibility requirements and operation provisions are substantially the same as those for 1954-crop, with a modification in barley that raises the minimum requirement from Grade No. 5 to Grade No. 4. Support will be carried throughout Commodity Credit Corporation farm storage loans, warehouse loans, and purchase agreements.

These will be available through Stabilization county offices from time of harvest of 1955-crops through January 31, 1954. Oats barley, and rye loan will mature on April 30, 1955 and grain sorghums loans on March 31, 1955. However, earlier maturity dates may be announced later for some

States because of local storage conditions or early harvests.

Eligibility Requirements

Minimum eligibility requirements for obtaining price support on these four grains follow:

Oats, Grade No. 3 or better; barley, Grade No. 4 or better, or No. 4 garlicky or better; grain sorghums, Grade No. 4 or better or No. 4 smutty or better, and containing not more than 13 percent moisture; rye, Grade No. 2 or better, or No. 3 on factor of test weight only, except containing not more than one per cent ergot.

The national average prices compare with average support prices for 1954-crops (reflecting 85 percent of parity) of 75 cents per bushel of oats, \$1.15 per bushel for barley, \$1.43 per bushel for rye, and \$2.28 per hundred weight for grain sorghums.

The relatively greater change in the grain sorghums support level is due to the fact that the parity price itself is lower this year from old to new parity formulas, directed in the controlling legislation, had not yet been completed for grain sorghums. Sor-

ghum parity dropped 5 per cent in 1954 under "transitional parity" provisions of this legislation. The other three small grains had completed their "transition" to the new formula before this year.

Special Controls Removed

Secretary of Agriculture Ezra Taft Benson has announced the removal of previously proposed special controls on the production of some crops in 1955. The specific action, aimed at greater freedom of operation for farmers and made possible by changing conditions, is as follows:

1. Cross-compliance requirements among individual crop acreage allotments will not be in effect for 1955. (Under regulations announced last June, a producer would have been required to comply with all crop allotments established on his farm for 1955 in order to be eligible for any crop price support.)

2. Previously proposed limitations on the use of acreage diverted from allotment crops to produce commercial vegetables, potatoes, and sweet-potatoes will not be in effect for 1955. (Under

THE BIBLE SPEAKS

International Union Sunday School Lessons
BY DR. KENNETH J. FOREMAN

Scripture: Genesis 1:1; Exodus 3:1-6; Isaiah 40:1-5; Matthew 6:9; John 1:9-10; Acts 17:22-31.
Devotional Reading: Psalm 42.

The Living God
Lesson for January 9, 1955

FOR the next three months the Sunday school lessons will go into the great Christian doctrines. Christian churches are basically agreed about these doctrines. You can go into a church and hear a sermon about the Living God, or about the Holy Spirit, or about Christ, and hardly be able to tell what the denomination of the minister is, from the sermon. Various churches have written creeds, Dr. Foreman which are their official interpretation of Scripture. But since these lessons to come are concerned with the Bible rather than with formal creeds, this column will not set forth the special views, if any, of particular churches, but will rather try to point out some of the truths which we all hold in common, and which we derive from the revelation we find in the Scripture.

The Living God
The Bible nowhere tries to prove that God exists. If I were talking to you or writing you a letter I would not waste time trying to tell you that I am a real person. So the Word of God simply assumes that God IS. But that is not nearly enough for a vital faith. Suppose God just IS like the law of gravitation, or the binomial theorem in algebra—quite real but completely blind and unfeeling? Suppose he just IS, like the other side of the moon, always there but never to be seen? Suppose God IS, like a block of granite which can be worked on but never does any work? No—by no means! The God of the Bible is the Living God, one who does things. Read for example the first book in the Bible, Genesis. Who is the principal character? Not Adam, not Noah, not Abraham or Joseph, but God. The story of the Bible is the story of the "mighty acts of God." Only the living God can help living men.

God is Spirit
The Creed of John 4:24 can be translated just as correctly "God is Spirit" as "God is a Spirit," and scholars mostly believe the first translation better conveys the meaning. This does not mean you can turn the sentence around and say "Spirit is God." You are spirit, but you are not God. The great dividing line in existence is not between spirit and matter. It is between the one, the only, Creator-Spirit, God on the one side; and created-spirit and created-matter, on the other side. As Creator-Spirit, we can be sure of some facts about God. One is that he is not and does not have a physical body. If he had a body he would (like all bodies) have to be in only one place at one time. If he had a body he would be limited by his body as we all are. But being Spirit he can be, and is, everywhere. Because he is Spirit, Paul can say he is not far from each one of us . . . in him we live and move and are.

God is Father
The Old Testament tells us much about God, but the New Testament tells us more. It is only rarely that God is called "Father" in the Old Testament, but in the New, we find Jesus using the word "Father" about God more than any other one word. There is a sense in which God is Father of all men—a more intimate sense in which God is Father of Christ and of Christians. Consider the words which would have been just as easy to use in beginning the Lord's Prayer: O creator . . . O Lord Most High . . . Almighty God . . . King of Kings . . . Judge of all the earth . . . But Jesus passes by all those and teaches us to say simply "Our Father" when we speak to the Almighty.

The Father and I are One
Most important, most distinctively Christian, of all truths that we learn about God in the Bible, is summed up in Jesus' words: "The Father and I are one." The original Greek shows that Jesus did not mean to say he and his Father are one person, one individual; but he did mean to say that if we want to see God we must look into the face and into the mind and heart of Jesus. As Paul later said, we see the glory of God in the face of Jesus Christ. Christians who have given great thought to these things are agreed that any idea of God, any notion we may have about him, must be brought to the test of Jesus Christ. The least we can say is that God is Christ-like.

Party Line...

Mr. and Mrs. Dan Hulsey of near Earth spent Christmas day in Santa Rita, N.M., with Mr. and Mrs. Otto Farmer.

Mr. and Mrs. R. C. Martin and family went to Floydada for Christmas. They spent two days in the home of Mr. and Mrs. R. C. Stewart, who are Mrs. Martin's parents.

Mr. and Mrs. J. B. Martin and family spent the holidays in the home of her parents, the John Byers of Hereford.

Bennie Sue Welch and Joyce Gooch, students at Texas Tech, spent the Christmas holidays in Earth.

Guests for Christmas day in the home of Mr. and Mrs. Houston Stephens and family of Earth were their sons and wives, Mr. and Mrs. Ernest Stephens of Earth and Mr. and Mrs. Billy Joe Stephens of Canyon.

Captain and Mrs. John Starkey of Ft. Smith, Ark. are here visiting his parents, Mr. and Mrs. W. M. Starkey of Springlake. The Captain has 13 1/2 years in military service.

Mrs. Sarah Clark returned Tuesday from spending the past ten days with her daughters and their families, Mr. and Mrs. Sherman Worth and children and Mr. and Mrs. Lewis Rogers, all of Amarillo and Mr. and Mrs. Denison Dudley of Olton.

Visiting Mr. and Mrs. Delma McCarty and family during the holidays were his sister and family, Rev. and Mrs. E. R. Hammock and daughter Rachel of Roaring Spring. Rev. Hammock is the District Baptist missionary for the Latin American. Also a guest was a sister-in-law, Mrs. Wilbert McCarty of Hollywood, Calif. The group had dinner Sunday with Mrs. H. McCarty of Muleshoe, mother of Mrs. Hammock and Mr. McCarty. Christmas day the McCarty's had dinner with Mr. and Mrs. Oscar Vinson of Sudan. Mrs. Vinson is a sister to Mrs. McCarty.

Those taking Christmas dinner with Mr. and Mrs. Bill Morris, north of Earth, were her mother, Mrs. Ruby Hodge of Hale Center, her brother and family, Mr. and Mrs. Billy Hodge and daughter Anette and Deanne, and Mrs. B. M. Hahn, mother of Mrs. Billy Hodge.

Mr. and Mrs. Billy Hodge had as their guests for breakfast Christmas morning, Mr. and Mrs. Homer Hodge of Earth.

Mr. and Mrs. J. M. Haberer and family had as their guests Christmas day, his mother, Mrs. Sophia Haberer of Hereford and Mr. and Mrs. Roy Haberer and family of Dimmitt.

Mr. and Mrs. Bill Ing'ls and family of Napa City arrived last Thursday to spend the holidays with his parents, Mr. and Mrs. J. B. Ing'ls, and brother, Gerald.

Mr. and Mrs. Jim Sanders and son, Tim spent Christmas day with her parents Mr. and Mrs. Bob Crawford of Littlefield.

Mr. and Mrs. Bill Pope had Christmas dinner with her mother, Mrs. J. M. Hacker of Lubbock.

Those spending the holidays in the home of Mr. and Mrs. Lester Hammon were her sister and family, Mr. and Mrs. . . . and family of Amarillo . . . and Mrs. A. W. Mathis of Snyder, Okla., parents of Mrs. Hammons.

Mr. and Mrs. Kenneth Hite and children, Susan and Douglas, left Monday to return to their home in Las Vegas, N. M., after having spent the holidays here with his mother, Mrs. Lena Hite of Earth. Lt. Hite is stationed at Nellis Air Force base in Las Vegas.

Mr. and Mrs. Norris Endsley, of Pierre, S. D., visited her aunt, Mrs. Annie McCool, also Mr. and Mrs. H. S. Hickman and Mr. and Mrs. O. C. Barton all of Earth.

Mr. and Mrs. Bob O'Hair of Earth had as their overnight guests Christmas night, Mr. and Mrs. Roy O'Hair and Mr. and Mrs. Albert Campbell, all of Lubbock. The group enjoyed dinner Sunday joined by Mr. and Mrs. George R. Campbell of Lubbock.

Rev. and Mrs. J. T. Williams of Springlake and Sgt. and Mrs. Don Stout of Boloxi, Miss., visited in the home of Mr. and Mrs. Jimmy Burnett of Wichita Falls. Mrs. Burnett is the Williams' daughter.

Mr. and Mrs. Furchie Riley of Springlake had as their guests Christmas day, Mr. and Mrs. Frank Sanders, Mr. and Mrs. W. F. Sanders, and daughters, and Mr. and Mrs. Charly Sanders and

PAUL'S
RECIPE OF THE WEEK
By Mary Lee Taylor

Ham Shortcakes

1 can cream of mushroom soup 1 cup diced, cooked ham
1/2 cup fat 2 sliced, hard-cooked eggs
2 Tablespoons water

Put soup into a 1 1/2-quart saucepan. Stir in a mixture of the milk and water. Add ham. Cook and stir over medium heat until steaming hot, but do not boil. Remove from heat and stir in sliced eggs. Serve hot mixture between split biscuits or cornbread. Makes 4 servings.
