If you are the type person who likes to sleep late, then Sunday will be "your" day. This Sunday, October 25, there will be an extra hour added during the hours normally set aside for sleep.

To keep up with the time, remember the little phrase, "spring forward, fall backward." In other words, in the spring the hands of the clock must be moved forward one hour, in the fall they are moved back.

## "His Land" Story Of Israel At Baptist Church

Across a barren land, scarred by centuries of war and neglect, the specters of ancient Israel appear, hover, and fade away. Suddenly there is movement of a different sort, and slowly, steadily, a startling transformation begins to take place.

ments all over the world, the same paths taken by Jesus and the prophets: Galilee... the wilderness... Jerusalem... the Mount of Olives... mingle with the people of modern Israel as they work, play and build a nation.

This begins "HIS LAND", the thrilling story of Israel from ancient to modern times. "HIS LAND", a one-hour color feature motion picture, takes you on a journey through space, time and current events. You see graphically, the fact that Israel today is a living testimony to the words of the prophets when they proclaimed that Israel would take her place among the nations of the world.

Words of Scripture come to life as the two men reflect upon the events that in recent years have confirmed much of the ancient prophecies. You are witness to the fact that out of death and desolation is emerging a new land... a "Land of milk and honey", where the future climatic events of history will take place.

In the company of Cliff Richard, England's popular star, who sings a number of new Ralph Carmichael songs, some of which were actually written on location, you travel the vibrant streets and lonely solitary paths of this nation whose destiny is daily discussed in the counsels of govern-

"HIS LAND", truly a feast of color, sound and song. An unforgettable experience!

## Geissler Takes First Place In Weekly Guessing Contest

COMEDY AT ITS BEST... Can be seen Tuesday night when the local Senior Class presents "The Boarding House Reach". The three act play is expected to be entertaining to all ages.

## Senior Class Play To Be Presented 7:30 PM Tuesday

The Senior Class Play entitled "The Boarding House Reach" will be presented at 7:30 p. m. Tuesday, October 27 in the Springlake-Earth School Auditorium.

The three act comedy, by Donald Payton, is expected to be sheer entertainment for every member of the family, young and old, from start to final curtain.

The plot begins with thirteen year old Wilbur Maxwell, who has wanted a bicycle for many years. He's dreamed of peddling through town, getting fond gazes from the girls, and boastfully shouting "Look, no hands!" But he still can't persuade Mama and Papa to jar loose to get him one. So, when Pop is called away for a week-long business trip, Mom is persuaded to go with him for a sort of a second honeymoon, and the house is left in charge of sister Connie and sister Betty Lou. Wilbur gets his idea. He'll make his own money and buy his bicycle. He'll open up a boarding house right here. Wilbur knows there's a frightful housing shortage, he knows people need places to sleep, and he knows for a whole week he can really clean up and just be rolling in bicycles.

So in the paper goes the ad, and that night the whole Maxwell house is crawling with people. First comes Lucy Burns, a sort of walking encyclopedia; then Mrs. Mott, who never says a word through the play, just comes in, sits down, gets up, and walks out. Then comes Ninety-Volt Jones, a beat-up pug, and his wrestling wife, Ruby; they're followed by Mr. Potter, an insurance salesman; and next come Limpy McGuire and his wife Nora. Now, every

room in the house is full, Wilbur's doing a bang-up business, and then it happens. Mama and Papa Maxwell, at two o'clock of the next morning, come dragging home - Papa forgot his briefcase.

From there out, it's one mess after another. Papa has an important business conference the next morning, but he has to sleep on the floor, he can't get in to shave, and he can't even read his own paper. Things are going round 'round. Finally, it's discovered somebody in the house is a bank robber, and poor old Papa is mistakenly carted to the clinic. What a mess now!

Also Limpy McGuire-David Bradley; Nora-Camille Haberer; Herman "Ninety Volt" Jones-Johnny Dale McNamara; Roughhouse Ruby-Welda Barton; Mr. Potter-Kent Parish; Lucy Burns-Julia Cleavinger; Mrs. Mott-Karen Armstrong; and Connolly-Monte Winders.

Student directors are Deanna Cavitt and Roberta Gaston. Play directors are Bill Anderson and Marie Slover.

The color photos will be taken on Thursday, November 5 at the Community Building in Earth by an expert photographer from Allstate Color Studios of Evanston, Illinois.

## 1970 Scout O-Rama Date Set

Ticket Sales for the 1970 Scout-O-Rama will begin on Saturday, October 24 throughout the South Plains Boy Scout Council area. This year's big scout show will be held in five different locations on November 14: Lubbock, Brownfield, Plainview, Levelland and Crosbyton, according to Ticket Sales Chairman Rodney Joy.

Tickets will sell for \$1.00 each and an entire family can visit anyone of the five shows on the one ticket. Cub Scouts, Boy Scouts and Explorers whose units are participating in the Scout-O-Rama will be the only ticket salesmen. As a reward for their efforts, the boys will earn cash commissions for their units, plus personal prizes in the form of Scout-O-Rama tee shirts and Scout Wampum that can be spent like money in securing uniforms and equipment.

The top boy salesman in each of the seven districts, who sell at least \$75.00 worth of tickets, will earn a free trip to Dallas for himself and his dad to see the Dallas Cowboys and Houston Oilers football games on December 20.

Each community where boys sell tickets will have some mystery houses. The first boy who tries to sell a Scout-O-Rama ticket at one of these houses will receive a certificate that he can exchange at the Scout Service Center for ten free Scout Wampums.

## Service Station Operators Can Help Police

New York--The men who operate America's service stations are good right arms of the police, according to the American Petroleum Institute's magazine, Petroleum Today. Here are some of the clues by which they spot stolen cars.

- Evidence of forced entry such as a broken vent glass on the driver's side.
  - Littered condition of the vehicle, suggesting someone had been living in the car.
  - Evidence of forced entry to reach the contents of the trunk.
  - Attempts to sell accessories off the car.
  - No key in the ignition, a sign that a jumper wire may have been used to start the car.
- There are an estimated 11 million victims of larceny in the world. For 65¢, UNICEF provides enough sulfone tablets to treat one of them successfully for three years.

## 13% Increase In Cost Of Gas Recommended

In a joint statement made October 16, Fred Poe, chairman of the Steering Committee of West Texas Municipal Utilities Committee, and K. B. Watson, executive vice president of Pioneer Natural Gas Company, announced agreement on a proposed rate increase for natural gas used in 34 West Texas cities.

The agreement came in the form of a recommendation to the governing bodies of the member cities for a 13 percent increase in the cost of gas effective on billings dated on or after November 15, 1970. The recommendation also included a provision for a gas rate adjustment to Pioneer based on

the cost of gas during the calendar year to become effective on April 1 of the following year. Pioneer agreed to provide each city a verified statement by March 1, of the field cost of gas for the prior year to determine the rate adjustment for the following year.

The first such adjustment report will be delivered to each city by March 1, 1971, for action by April 1, 1971, to become effective April 15, 1971.

The governing body of each member city of the West Texas Municipal Utilities Committee will review the joint recommendation for passage by local ordinance.

## Tank Farm Leaks Are Prevented

Contamination of the water and land around fuel storage tanks is being prevented by a unique gravity system that separates oil, gas and other liquid hydrocarbons from water.

The two devices, manufactured by Keene Corporation of Cookeville, Tenn., simply separate liquids having different specific gravities.

In a recent test conducted at New York's Kennedy Airport, they removed more than 99.9 percent of the oil from water. The results showed the units producing effluent having only 25 parts per million or less of oil from an original oil-water mixture having 20,000 parts per million of oil.

A number of separators are now working in Georgia, Kentucky, Tennessee, West Virginia and Michigan.

## LETTERS TO THE EDITOR

Mr. Ross Middleton  
Earth News-Sun  
Earth, Texas

Dear Ross:

As I travel around the State, I am becoming more apprehensive that a great many people may not vote in the General Election on November 3.

You'll agree, I'm certain, that it will be a bad thing for Texas if, say, only 35 percent of the Texas electorate turns out. If such should happen it would be mathematically possible that a winning candidate would have the endorsement of only 18 percent of the qualified voters (less than one of five people).

Not as a personal favor, but as a public service, I hope that you will do everything possible to get out a large vote in your area, regardless of political belief. Only in this way can the desires of a majority of the people in Texas be reflected in the public offices of our State.

If I can be of service to you in any way, please call.

Sincerely,

Preston Smith  
Governor of Texas

The group completed plans for the annual "Senior Citizens Banquet" set for November 24 in the Fellowship Hall of the church. All women of the church are invited to attend and bring a guest with them.

Assorted salads were served on card tables covered with blue table cloths and centered with small blue-green candles with bases encircled with clusters of green grapes.

## LETTERS TO THE EDITOR

Dear Polly,  
Your newspaper arrived only yesterday but last night I read them thoroughly especially your 45 Anniversary Edition. I was surprised that such a small town as yours could produce such an excellent paper, so lively and interested in its town. English papers are probably bigger but their circulations are large due to bigger concentrations of population. I have mailed you some of mine and perhaps we could exchange our papers, as such a swapping of news and views can do nothing but good.

The old time photos in the Anniversary Edition I find absolutely fascinating, as they show how much real progress your country has made in the last 40 years or so. I think that Hollywood has not always been accurate in its portrayals of American life and the communist world has fully exploited the view that Texas is all killing and Bonnie and Clyde. I believe the view opposite to be the case.

I spent a year once in Los Angeles and only strong personal reasons stopped me from staying on there. It was a marvelous experience and perhaps one day we will all return.

Many thanks for your kindnesses and the special edition which I am keeping. Perhaps we can always keep in touch with each other.

Very Sincerely Yours,  
Desmond

## Six Accidents In Lamb During Sept.

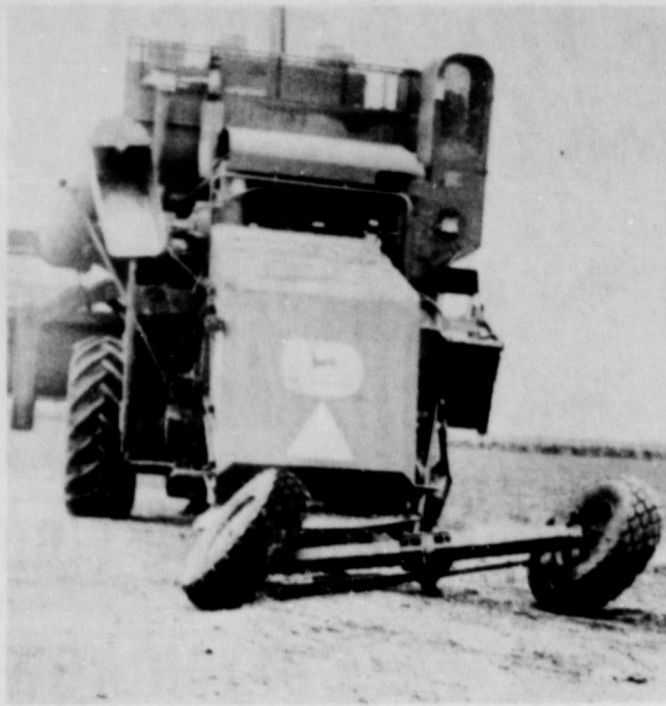

The Texas Highway Patrol investigated six accidents on rural highways in Lamb County during the month of September, according to Sergeant Thurman Keffer, Highway Patrol supervisor of this area.

These crashes resulted in four persons injured and an estimated property damage of \$5,320.

The rural accident summary for this county during the first nine months of 1970 shows a total of 82 accidents resulting in four persons killed, 36 persons injured, and an estimated property damage of \$72,953.00.

Total traffic accidents in Texas during the last twenty years have increased from 200,000 in 1950 to approximately one million in 1969. Total number of persons injured in traffic accidents has increased from 69,000 in 1959 to 223,000 in 1969. Total number of persons killed in traffic accidents has increased from 2,410 in 1950 to 3,551 in 1969.

The Sergeant reminded all Texas motorists that vehicles bearing red motor vehicle inspection stickers with the large black numeral "10" in the lower left-hand corner of the windshield must be reinspected before midnight, October 31.

A collision about noon Thursday, near Earth, involving a car driven by Bronson Campbell, age 80, of Earth, and two custom combines resulted in injuries to Campbell, a total loss of his automobile, and left an estimated \$2,500 damages to the combines.

The accident occurred as Campbell, a ginna at Dodd, was traveling south on FM1055 about 4.4 miles north of Earth when he met two north-bound

combines. The first combine, operated by Lloyd Wayne Miller of Lonewolf, Oklahoma, was said to have made a left turn in front of Campbell.

## Phone Connections Now Being Surveyed Between Springlake - Olton

A survey is being conducted in Olton this week to see whether Olton residents desire toll free telephone service both ways to Springlake.

Jerry Kehoe, with the General Telephone Company, met with the Olton City Council Tuesday night on whether the council desired the two-way

toll free service.

If the survey reveals that Olton desires the service, phone rates will be increased 25 cents per month for homes and 50 cents per month for businesses.

The Springlake Council decided earlier they would like the service, and their increase in rates will be \$1.00 for residences and \$1.50 for businesses if the service is desired by both towns.

### Design for Living

The abuse of alcohol is a factor in more than 50 per cent of traffic fatalities, according to Howard Pyle, president, National Safety Council. "Alcohol is involved in at least 25 per cent of home accidents and countless hunting, boating, swimming, private flying and skiing accidents," he added.

The "Alcohol Story" is completely detailed in a pamphlet available from the Council at 425 North Michigan Avenue, Chicago, Illinois 60611.

## Do You Ever Get Mad Enough To Die?

How often have you felt "mad enough to die"? One psychiatrist thinks there's a good chance that many people die of anger. William G. Reese, M.D., of Little Rock, Arkansas, believes that excessive and misdirected anger is the major cause of early death, and has explained his reasons in an article in the September issue of TEXAS MEDICINE, the monthly scientific journal of the Texas Medical Association.

You might imagine to drop dead as a dramatic climax to a temper tantrum, and people would remember you for years: "He got so mad he just busted a blood vessel. Died, too, right then and there!"

More likely, though, is that anger causes early death in more subtle ways. An angry person may not need a speedometer's warning that he is driving too fast. He may drink too much and deny that his judgment is badly impaired. On the job, his thoughts may center more on his anger than on the care and skill he usually devotes to handling potentially dangerous equipment. If he nearly always feels some sort of anger but seldom expresses it, he's a good

candidate for high blood pressure of a heart attack. Do these things really make much difference in the statistics? The facts speak for themselves: Between the ages of 1 and 44 years, more people die from accidents than any other cause, and drinking drivers are involved in about half of all fatal highway crashes. Of course heart disease and stroke are the overall front-runners in cause of death, and they definitely have some connection with emotional stress.

It is easy to see the link between anger and homicide, but perhaps few people realize how common homicide is: It is the third leading cause of death between ages 24 and 44.

Most suicides result from depression in which anger is misdirected against oneself. Hostility toward survivors also is a factor, and Dr. Reese gave this illustration of how that works: "One of my patients lost interest in suicide when he decided that his wife would welcome his demise."

Cancer is among the major killers, but Dr. Reese does not think that anger causes cancer. However, it is known that the

emotions are involved in some way in the ability to resist infections as well as in allergic mechanisms.

Thus, Dr. Reese thinks there is some justification for the belief that emotional factors are important in the etiology of premature death.

"Unless he can better domesticate his own hostility, Homo Sapiens may join the list of extinct species leaving no one to write the epitaph... let us implement the 'Declaration of Independence' of Earth Day 1970. We must preserve man for the world and the world for man," Dr. Reese concluded.

Texas A&M University, a center of apomixis research. The work is a cooperative program of the Soil and Crop Sciences Department, Texas Agricultural Experiment Station, and the U.S. Department of Agriculture, Crops Research Division.

The scientists, W. W. Hanna, a former graduate assistant at Texas A&M, and K. F. Schertz and E. C. Bashaw of the USDA point out the potentials of this discovery. They say it could revolutionize the grain sorghum industry.

Why is seed production without fertilization so important? The geneticists say apomixis could make available to the farmer maximum yielding, true-breeding hybrids of high purity.

"When properly manipulated, it will permit the use of hybrid vigor without repeatedly producing new hybrids," Schertz

## Cleaner Air Week October 25 - 31

Pollution of the air is perhaps the most serious of all the dangers our advanced civilization has created. We can purify our water before we drink it, and we detect and remove contaminated foods. We can restore the polluted landscape. But we must breathe the air as it comes to us, polluted or not.

During the week of October 25-31, Texas-like Americans throughout the nation--will be observing the 1970 version of "Cleaner Air Week". The Texas State Department of Health's Air Pollution Control Division will be concentrating much of its attention on the formation of "Cleaner Air Week" committees across the states.

The objective of "Cleaner Air Week" is three-fold: to create better understanding of community, state and regional problems related to the protection of the nation's fresh air supply; to promote cooperative effort by everyone toward the solution of such problems; and to encourage individuals and groups to play major roles in coordinated control efforts, particularly at the community level.

During the special week, Texas will be focusing on the problem of pollution. Air pollution causes

explained. Superior hybrids can be maintained generation after generation because the offspring are exactly like the plant from which the seed was harvested.

Apomixis sorghum would simplify hybrid seed production, the scientists believe. They point out that for the commercial seed producer it would simplify stock maintenance. No crossing fields would be needed, thereby reducing problems of pollen contamination.

For the farmer it should mean a larger selection of superior hybrids of high purity. These advantages would be accentuated in developing countries.

But like many new scientific developments, apomixis grain sorghum isn't something that will be available to the industry within the next few years. Much research remains to be done.

The researchers emphasized that the advantages will be realized only when the apomixis tendency is developed to a high level and in a line devoid of undesirable characteristics. It can then be transferred to other lines in a breeding program.

The total impact of this discovery will be known only with time, but in grain sorghum, where hybrids are already used, apomixis should be of extreme importance, Schertz said.

its consequences and cures will be brought before the public.

Air pollution has been traced as a definite contributor to such health problems as emphysema, bronchitis, lung cancer, colds, pneumonia and bronchial asthma.

The economic loss from air pollution has been estimated at more than \$60 per year for each man, woman and child. Crop damage, corrosion, cleaning bills, wasted fuel, accidents from reduced visibility--these known effects keep mounting.

Air pollution is a "mix"---compounded from exhausts of millions of automobiles, emissions from power plants and industries, effluent from incinerators and heating plants, smoke from backyard trash fires and municipal rubbish dumps.

To meet our challenge in this state, the Clean Air Act of Texas was passed by the Legislature in 1965. A Texas Air Control Board was created the following year. The State Health Department, in carrying out the Board's air control program, has the authority to file law suits and seek injunctions against offenders of its regulations.

## Den 1 Makes Book Holder

Eight members were present with Den Mother, Mrs. Larry Hausmann and two assistant Den Mothers, Mrs. Bob Belew and Mrs. Nathaniel Ingram, to instruct the meeting.

The Scouts made a Wolf Cub Scout Book Holder, using a pound coffee can. The holders were taken home to be used to keep their books. They also learned the correct way to fold the United States flag.

Allen Clayton served refreshments of Coke and Candy Bars to Biff Belew, Rex Fennell, Nathan Ingram, Dave Allen Ingram, Tye Harber, Byron Vaughn, Loren Taylor, Mrs. Hausmann, Mrs. Belew, and Mrs. Ingram.

# Vega Outscores Wolverines 25-21

The Vega Longhorns gave the Wolverines a bad time Friday night before the homecoming crowd by defeating them 25-21.

The Wolverines had a very disappointing first quarter, being held to a total of five yards. The Longhorns scored first in the first quarter after receiving the Wolverine kickoff on 14 yard line. It took Vega 12 plays to cover the 86 yards for the 6 points with Harold Sides carrying on the scoring play from the 5. Kenny Donathon's kick failed for the extra point.

The quarter ended with the score standing at Vega 6-S-E 0. Beginning the second quarter Vega started another TD drive from the 19 yard line. Five plays later, Sides scored again from one yard out, followed by Robinson carrying for the two point conversion, making the score 14-0 at this point.

Guy Davis took the Vega kickoff and carried the ball 15 yards to the Wolverine 24.

On this drive, the Wolverines were again forced to punt after failing to make a first down.

Following the punt, the Wolverine defense with the help of a 15 yard penalty held the Longhorns and forced them to punt.

The Wolverine offense then went to work and marched down the field. Alair on third and three took a handoff from Glascock and broke loose for 31 yards to the Longhorn's 20. Four plays later, Glascock kept the ball and scored the Wolverines first six points, followed by the extra point.

In the next series of downs following the kick, after two plays Kent Coker recovered a Longhorn fumble, setting the Wolverines up in business again.

In electing to pass, Glascock's first pass fell short and the Wolverines drew a 15 yard penalty making it first and 25. On the next play, Glascock found his receivers covered and he elec-

ted to carry for 35 yards and a first down. Failing to connect on the next three tries the Wolverines were faced with a fourth and 10 situation.

With a little over a minute to play in the half, Eddie Alair got the ball on a draw play and scampered 22 yards to the Vega 8 yard line. Two plays later, he carried the ball from the four yard line for the Wolverines second touchdown. With Glascock's kick missing for the extra point, the score was 14-13 at the end of the half, with Vega leading.

In the third quarter neither team could move the ball in the first few minutes of play. Then the Vega offense took the ball after Wolverines were forced to punt for the second time and controlled it for most of the period.

With first and goal to go from the Wolverine 8 yard line, Tony Cassette carried for the six points. The quarterback, Bronc May, on a keeper, carried the ball over for the two point conversion.

In the fourth quarter, the Wolverines lost the ball with a fumble on a broken play.

With the Vega drive stalling on the Wolverine end of the field, they decided to try for a field goal. Jonathan's try from the 26 yard line was good, making the score 25-13 with 1:16 left to play.

With 14 seconds to play, Glascock got off a perfect 62 yard pass play to Brian Sanderson who went over for the six points. Alair went over for the two point conversion.

The game ended with the score Vega 25 S-E 21.

This week the Wolverines meet their old rivals, the Farwell Steers in district play.

Game time is 8 p. m. in the Wolverine Stadium.

### FINANCIAL FACTS

By: Norlan Dudley

Have you ever heard of a "giro" bank?

This was a type of early bank originating in Florence, Italy. It was the first proper bank in that it circulated its holdings.

Before the "giro" banks people everywhere hoarded their money. Few would leave it up to the safe-keeping of someone else.

King Henry VII of England was one of the world's greatest hoarders. It is said that when he died his vaults contained 125 million dollars!

Unlike their predecessors, the Italian "giro" banks kept deposits of gold and silver and issued notes to the depositors. These notes circulated as paper money does today. Eventually the new noteowners would come to the banks and convert their notes back to gold or silver. Thus, the circle or "giro" was completed.

Students at S-E were disappointed in that their bonfire, scheduled for last Thursday, October 15, was cancelled due to bad weather.

However, students are preparing to stage the bonfire this Thursday night at 8:30 on the old ball park in the rear of Barton Brothers Gin.

Miss Flame, as yet, has not been announced due to last week's cancellation of the bonfire. The four beautiful nominees anxiously awaiting the news of who will be selected are Susie Adria, Senior; Marlan Dawson, Junior; Leah Galloway, Sophomore; and Brenda Cavitt, Freshman.
