When Mr. Dickie learned of this unfair and discriminatory ruling, he immediately protested to Secretary Benson as follows:

"This shrinkage of cotton land by the latest ruling from USDA would substitute the land available"

Due to the arguments of Mr. Dickie, the farmers can continue to plant four rows of cotton and leave four rows summer fallow without losing cotton acreage. Mr. Dickie, satisfied with the results of his protest expressed his appreciation for help from the Texas Senators and Congressmen.

'Dimes' Opens First Birth Defects Center

A birth defects study center, the first of its kind designed to combine clinical treatment with research and teaching, has just been officially opened at Columbus, Ohio. It is supported by funds from the New March of Dimes, which is now engaged in its January campaign for contributions to fight three major crippling diseases including. besides birth defects, arthritis and polio.

Medical experts say that birth defects are the biggest unmet childhood medical prob-lem in the United States today. There are more than ent kinds of birth defects, or ent kinds of birth defects, or ent kinds of birth defects, or "congenital malformations," as they are called by doctors. They range all the way from hareling and clubfoot to mental retarda-

Some 250,000 American babies are born each year with one or more significant birth defects; and about half of this number are doomed to a life-time of serious illness or crip-pling. About 34,000 infants each year are stillborn because of these afflictions, or die within the first month of life. Medical science as yet has few clues to the causes of these disorders that occur before birth; and there are few known methods

Shrouded in Superstition

The study center in Colum-bus' famed Children's Hospital thus represents the beginning of the New March of Dimes attempt to solve a medical problem that has heretofore been largely neglected by re-search. It is a problem that has for centuries been shrouded in fear, superstition and shame. By tackling this issue with a three-pronged program of re-search, patient aid and training of skilled medical professionals, the March of Dimes organiza-tion seeks to bring hope to the hundreds of thousands of parhundreds of thousands of par-ents whose lives have been blighted by bewildering grief and heartbreak following the birth of a malformed child. This hope is bolstered by the

past record of the March of imes organization in fighting baffling diseases. It was March of Dimes funds that encouraged Dr. Jonas E. Salk to become a virologist and that organization report.

Women's Travel Authority No Mystery in Mufflers

If you are one of the millions of women responsible for the family car, chances are your service station dealer will someday tell you the muffler should be replaced.

When he does this, turn off your feminine skepticism and take his advice. The muffler helps keep the engine quiet and carries motor haust to the rear of the car. After long use it may develop leaks. Result: noise and possible health hazard.

SALMON AND LOBSTER DISHES POPULAR WITH **NEW BRUNSWICK FOLK**

EW BRUNSWICK has some of N the most celebrated salmon streams in North America - the Miramichi and Restigouche, just to name two. New Brunswick lob-sters from the cool waters of Northumberland Strait, the Baie de Chaleurs and the Bay of Fundy are the delight of gourmets every-

Mrs. Robert H. Tivy, whose husband is general superintendent of transportation for the Canadian National Railways and also an enthusiastic salmon fisherman, has her own recipe for Salmon Su-

preme:
Bring to a boil in 6 cups water:
1½ teaspoon salt; ½ cup vinegar,
½ cup diced carrot, ½ cup diced
celery, ½ cup chopped onion, 4
whole cloves. Add 4 pounds salmon,
wrapped and tied loosely. Cook
tenderly, simmering slowly. Allow
10 minutes per 1 inch thickness.
Remove to platter cook eligibly. Remove to platter, cool slightly, unwrap and skin. Mix ¼ cup melted butter, 1 tablespoon lemon juice, pinch of rosemary. Pour over salmon slowly. Garnish with

parsley, tiny pickled beets, sliced cucumbers, etc.

George Stiven, the general passenger agent for the Canadian National Railways at Moncton, N. B., does a lot of traveling through the Atlantic Provinces and seldom re-turns home without bringing a few lobsters with him. And there's nothing Mrs. Stiven likes better than to whip up her own brand of "Lobster Delight" when George gets home.

This is how Mrs. Stiven makes it:

This is how Mrs. Stiven makes

it:

3 tablespoons butter
4 tablespoons alt
15 teaspoon salt
15 teaspoon pepper
3 cups milk
1 cup chicken stocks (canned
or chicken bouillon cube)
11/2 cups lobster meat, diced
2 slices onlon
15 cup thin cream
1 teaspoon Worcestershire sauce
Melt butter, stir in flour, sale

Melt butter, stir in flour, salt and pepper. Add milk gradually, chicken stock, lobster and onion. Simmer for about 20 minutes, stirring often. Remove onion. Add cream and sauce. Heat thoroughly. To each serving, top with a tea-spoonful of butter, sprinkle of paprika and sprig of parsley. PNS

What School Means To Me

EDITORS NOTE: The following essay was written recently one of the junior students of the Springlake High School and we are passing it on to our

School is a means to obtain an education that will give us secuity in future years. In our modern would education means our everyday existence. Education is require ed to meet the demands of society in our missile and space age.

The life of a oum may appeal to some of the youth of today, but our lives demand more than just meeting our day to day needs. Living our lives in a carefree man-ner and not any source of security is not one that will offer any of the rewards that living is able to give. If we do not work to achleve our aims for which man be-stows upon those who are willing to work to better the lives of ourselves and our fellow men, then our lives will be meaningless and useless not only to ourselves, but to our children of tomorrow.

Education is a thing that is very valuable but not too expensive so that everyone cannot have the equal opportunity to learn. In the 18th Century only the rich or the fortunate had the opportunity to obtain an education, but today each person has an equal opportunity to gain the valuable things in life through education.

School is not only a means by which we gain our academic rec-ords but also a chance to furthe. to us on through our lives. In school we also have a chance to mature our bodies and minds through the athletic fograms that are offered. Through these programs we learn to think of our follow man and his wishes and Mrs. John Welch spent. fellow man and his wishes and desires. So school not only offers the golden opportunities of education but also a means by which Rhea. we can grow both mentally and

The roads we travel over to gain We meet bumps and rocks in the roads which represents the problems we face in our school lives. As in everything else that is worthwhile, we must work to obtain the idays. highest levels of our mental ability. Our teachers of the school we attend represent a large part of how we learn and how we use our Donna spent from Wedensday until abilities. but they too must have academic ability to teach the youth of today. The administration has a large responsibility to fill because they are responsible for our youth and how they react in future years. So no matter how hard we try to escapa our needs for a good education, we always end up where we started and realize life is useless without our schools and education.
