Mahon And Osha

Congressman George Mahon met on Monday in his Washington office with Dr. Eula Bingham, the new Assistant Secretary of Labor for Occupational Safety and Health (OSHA), just prior to his departure for Lubbock where he will testify at the field hearings on the OSHA cotton dust exposure standards.

Mahon requested the meeting with Bingham to urge the new Secretary to abandon strict cotton dust exposure standards, pointing out that they would paralyze the entire cotton industry.

"I reminded Dr. Bingham that OSHA is the most unpopular agency in the federal government because of some of the foolish and irresponsible actions it has taken in the past," said the Congressman, "and I urged her to abandon the proposed cotton dust standards for cotton gins and cottonseed oil mills."

"I told Dr. Bingham it would be indefensible for OSHA to require cotton exists in these industries," said Mahon, "and I am appearing at the hearings to impress this fact upon OSHA officials responsible for writing the proposed standards."

In March Mahon insisted that OSHA officials conduct field hearings in Lubbock so that the people who would be most affected by the proposed standards would have an opportunity to be heard.

Mahon commented further that he and other members of Congress would not tolerate impossible standards that threaten the viability of the cotton industry. The Congressman said, "If strict cotton dust standards are imposed, cotton will be placed at a serious competitive disadvantage and textile mills will make a sharp turn toward the further use of synthetic fibers."

New Gospel Film To Be Shown

The story is old, but the perspective is up-dated and brought into sharp focus by the film The Gospel Road, to be shown Sunday, May 15 at the Earth United Methodist Church. The showing will begin at 6:00 p.m.

The Gospel Road, distributed by World Wide Pictures, was conceived and produced by Johnny Cash and his wife, June Carter Cash, who desire was to tell the story of Jesus Christ in a realistic and meaningful way.

The film is a unique blend of scripture-based narrative, an abundant supply of specially written songs, and a series of in-depth character portrayals, with Israel itself as the mixing bowl.

You are there, walking beside the Jordan and the Sea of Galilee; you are there, seeing Him in many human situations that establish a practical and personal rapport with every viewer.

You are there, being introduced to the disciples, and gaining insights into their varied personalities. You are there, experiencing the highly charged emotional impact of the trial before Pilate, and becoming so personally involved that you feel sympathetic pain when Robert Elfstrom, in an outstanding portrayal of Christ, suffers the physical attack that precedes the Crucifixion.

Adding to the effectiveness of The Gospel Road in its endeavor to convey reality for this day are: the fascinating treatment of the Crucifixion, making this tragedy an event of significance that reaches from its own time across the years to take on meaning for all men of all ages; and the songs and background music of Johnny Cash and other outstanding musicians, whose contemporary style is not out of keeping with the story, a story that reveals that His darkest day has become our brightest.

Better Weather Still Trying

Better Weather, Inc. members met on May 10 to discuss what action should be taken in view of the indecision of the Texas Water Development Board on May 6th.

Jerry Kirby, attorney for the group met to advise them of what steps could be taken to insure issuance of the permit on June 13. His suggestions were: that everyone interested, write to the Governor and express the need for the issuance of this permit and to sign the petition now circulating the area.

It was also decided to cash the checks and go ahead and pay Atmospherics Inc. to keep the planes in readiness in Littlefield until a decision is made on the permit.

Call toll free to the Governor at 800-292-9600.

Carter's Hospital Program Protested

The Texas Hospital Association (THA) announced its strong opposition to President Carter's "Hospital Cost Control Act of 1977."

President Carter and HEW Secretary Califano presented the proposed legislation.

The Texas Hospital Association is the trade association for hospitals in Texas with over 690 health care institutions as members.

O. Ray Hurst, President of THA, headquartered in Austin, said:

The Texas Hospital Association is strongly opposed to the "Hospital Cost Control Act of 1977" as announced by President Carter. This plan would set an arbitrary 9% limit on the amount of increase that a hospital could use to increase the price of its services to patients. This limit is arrived at by a very complex and complicated formula that will no doubt add a lot of bureaucracy in checking and calculating. The very act itself will increase hospital costs substantially by the amount of paper work that will be involved.

This plan does not permit any sort of control on the cost of supplies or services that a hospital must purchase.

We all acknowledge that health care costs and hospital costs are rising, but there are very definite reasons. The cost of food, energy, telephones and malpractice insurance as well as other supplies has gone up drastically in the past 12 months. Any housewife that has to deal with these, by looking at her own budget, knows that hospital costs undoubtedly have to go up to take care of these increased costs. Under this proposal though, these costs are not controlled in any form so the hospital will be forced to absorb the increases. This could financially impair hospitals and cause a drastic reduction in the services that the hospitals will be rendering to patients in the areas they serve.

This proposal also has tried to speak to the alleged overbedding in hospitals. Here in Texas, we have a "Certificate of Need" program mandated by the state legislature two years ago, and operated by the Texas Health Facilities Commission, a state agency. Under this system, if a hospital wants to expand the number of beds or its services, it must apply to the Texas Health Facilities Commission for a "Certificate of Need" and demonstrate that there is a need for the increase in beds or services.

If the Texas Health Facilities Commission finds that there is not sufficient need, then the request is denied.

Hospital and health care costs in Texas are approximately 20% lower than they are nationwide, even though the cost of living is only 10% lower. This enviable situation, in part, brought about by the Statewide Hospital Productivity Center that the Texas Hospital Association has been operating for the past 18 months. We have almost 400 to 600 hospitals participating in this productivity center. We show participating hospitals how to improve the management and operations of the hospitals. To date, we can point to over \$20 million that has been saved by Texas patients in this short period of time and these savings are ongoing and will be recurring every year. The proposed legislation gives no credit to these well managed hospitals, in fact, it penalizes them.

The President's Wage and Price Council, for the past two years, has been studying health care and costs and has conducted hearings around the nation, including Texas. The final report was issued this past December. In that report, the Wage and Price Council said that one of the major factors that was increasing hospitals costs in the nation, was the number of government regulations that the hospital must comply with. Each hospital must answer to 25 to 30 government regulatory agencies at the local, state or federal level. Each one of these agencies requires reports and information which are costly to prepare and the hospital must look to its patients to pay these costs.

We find that the Carter proposal is most arbitrary and capricious legislation in that one industry has been singled out to live with cost controls.

The Texas Hospital Association, as well as the American Hospital Association will be doing everything we can to fight this proposal. We are convinced that it is not in the best interest of the patients we serve, and we do want to continue to render the best of health care to all the citizens of Texas.
