MISS FORD COUNTRY
(Sandy Lankford)

Miss Ford Country To Be In Earth Parade

Miss Ford Country, Sandy Lankford, will visit Earth on Thursday, July 13, to lead the parade and make an appearance at the rodeo.

Sandy has been traveling the state wearing her newly designed Ford blue outfit representing Ford at rodeos, civic events and other personal appearances. In her radio and television commercials as well as in her advertisements and throughout the State, she has reinforced the Ford name. Sandy is the reigning Miss Ford Country at the University of Texas at

School Board Meets

Springlake-Earth school trustees met Friday, July 7, at 8:30 p.m. at the school library.

The meeting was opened by reading the minutes of the last meeting and handling business.

The board met with the tax assessor and Ted Justice of the Peace to discuss matters relating to taxes.

Discussing the taxes, the board set the budget hearing for Friday, July 14.

The board then voted to support the policy on determining the grade average for the senior class.

The board also voted to support the plan for selection of the grade average for the last two years of high school.

The board will meet with the Freshman class on Thursday, July 13, only the basic requirements for graduation are required for graduation.

The board will select a new auditor and saluta-

MR. AND MRS. QUENTON DUNN, new minister of the church of Christ.

Earth Gets New Minister

Quenton Dunn is the new minister for the Earth church of Christ. He and his wife, Lillie, moved to Earth, July 6 from Elmore City, Oklahoma.

Mr. and Mrs. Dunn have two daughters, Mrs. Bob Shaver of Lubbock and Mrs. Gerry Self of Slaton.

Dunn is a graduate of Abilene Christian College in Abilene, Texas, and has been preaching twenty-six years.

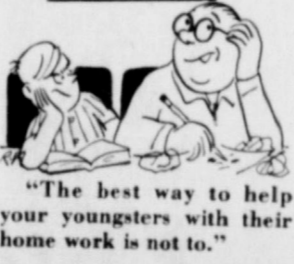

Prior to moving to Earth, Dunn served churches in Happy, Segraves, Eldorado, Paducah, Truth or Consequences, New Mexico, and San Springs, Oklahoma.

The Duns will be making their new home in the house west of the church of Christ building.

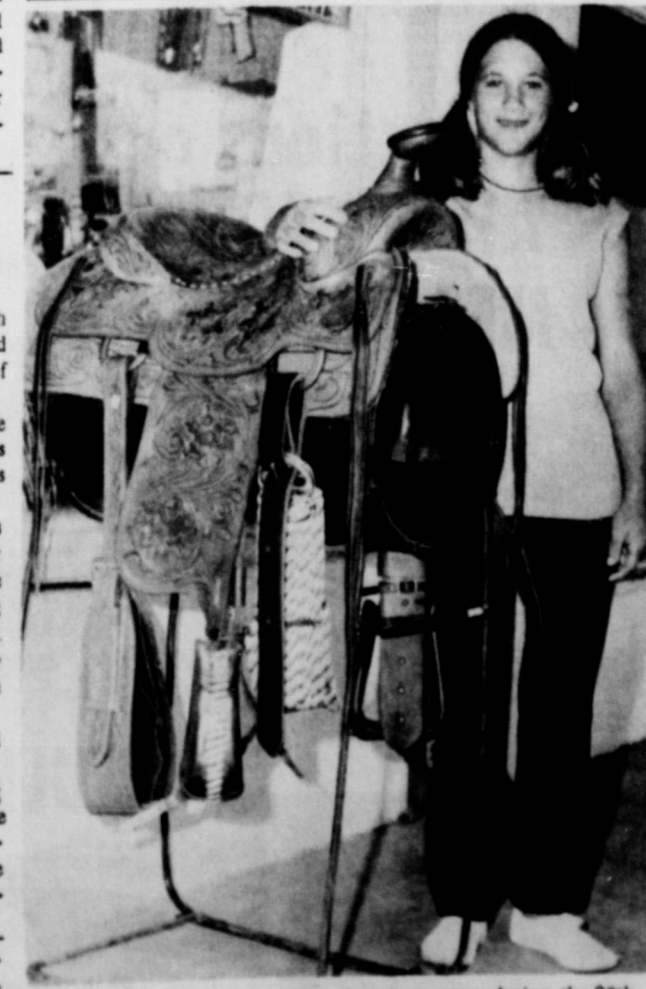

United Methodist Church School Ends Tomorrow

The 1972 session of Vacation Church School at the United Methodist Church in Earth began July 10 and will end tomorrow. Classes are held from 9 to 11 a.m.

Mrs. Johnny Cornet, Mrs. Dean Jones and helper, Fonda Goodwin, are supervising activities for the nursery children. Mrs. Phil Neinst, Mrs. Gene Gaston and helper, Chara Dunnam, headed the kindergarten department. The elementary I and II group was instructed by Mrs. Rayborn Ott, Mrs. Don Sanderson and helpers, Marianne Messer and Karen Dunnam. Elementary 3 and 4 directors were Mrs. Jerry Jones, Mrs. Robert Gossett, and helpers, Paige and Shelly Gaston.

"The best way to help your youngsters with their home work is not to."

THIS \$350 LUSKEY SADDLE to be given away during the 28th Annual Earth Amateur Rodeo is on display at Taylor's Market Basket. Pictured with the saddle is Dawn Branscum.

Rodeo Activities Begin Today

Yes Sir, it's rodeo time again! The 28th Annual Earth Amateur Rodeo will be held this year on Thursday, Friday and Saturday, July 13, 14 and 15 with performances beginning at 9 p.m. The rodeo arena is located just west of the city limits on highway 70.

The Earth Roping Club has been advertising and trying to make this one of the best shows ever in Earth. A car caravan traveled to area towns on July 11 advertising the big event by handing out hand bills and selling the \$1.00 chances for the \$350 Luskey saddle to be given away during the Saturday night performance.

Entry fees for the various events have been set at \$20.00 for calf roping, bareback riding, saddle bronc riding, girls barrel race and bull riding; \$23.00 for team roping. Some events may have to be limited, depending on the number of entries.

Entries will be taken from 9 a.m. to 8 p.m. on Wednesday July 12, for those wishing to compete this year. Entrants under 21 years of age must have their parents signed consent before participating. The Earth Roping Club on Rodeo Producers will not be responsible.

Rodeo stock for this year will be furnished by Haliday Rodeo Company of Clovis, New Mexico. The first place winner in each event will be awarded a trophy buckle donated by Earth merchants.

The merchants that will be donating the buckles are: Queen's buckle, Farm Chemical; bareback riding, Layman Brothers Butane; Calf roping, Earth Oil and Gas; saddle bronc riding, Earth Manufacturing, Inc.; girls barrel race, Brown and Jordan; bull riding, Earth Elevator; two buckles, (header and heeler) in team roping, Dent Farm Supply and Citizens State Bank; junior ropers, Earth Co-op Gin.

A registered quarter horse filly, donated by Haisell Cattle Company, will be auctioned off during the last night performance.

Also a \$350 saddle, made by Luskeys, will be given away Saturday night. Tickets may be purchased from any member of the Earth Roping Club.

The 1972 Rodeo Queen will be crowned at the first night performance by Pat Cleavinger, last years queen. The contest is being sponsored by the Earth Roping Club this year.

General admission is \$1.75 for adults and \$1.00 for children.

The celebration will begin when the 28th Annual Rodeo Parade, "Success Through Progress," begins moving down Main Street at 5:30 p.m. today, Thursday, July 13. The parade will form east of town and move slowly through town to the rodeo arena.

Civic organizations, local merchants and school organizations have been busy building and preparing floats to add to the beauty of this parade.

The six young Rodeo Queen contestants will also be appearing in the parade.

Trophies will be given to the first, second and third place adult riding clubs entered in the parade. A trophy will also be presented to the first place junior riding club.

A traveling plaque will be awarded to the first place business float. First, second and third place prizes of \$30, \$20 and \$10 will be awarded to other floats.

Prizes will be awarded this year for the best bicycle en-

THIS SURE IS NICE... seems to be the opinion of the people at the fish fry Tuesday night.

Springlake Has Community Fish Fry

Approximately 200 people attended the community fish fry Tuesday, July 11, at 8 p.m. in the Springlake Park.

Everyone brought a covered dish and fish, french fries, salad, cake and homemade ice cream were enjoyed. After a delicious meal everyone stayed and enjoyed visiting with each other.

The Springlake Fire Department men were in charge of the event but several area men caught, cleaned and dressed approximately 400 fish to be enjoyed by the crowd.

All the fish were caught in B.V. Padon's lake northeast of Springlake about two weeks ago, after a big rain.

Everyone really seemed to enjoy the occasion and it looking forward to next year's event.

Queen To Be Crowned Tonight

Judging was completed Monday July 10, among the six young ladies vying for 1972 Earth Rodeo Queen. The girls were judged on horsemanship, 60 points; poise, 20 points; and personality, 20 points.

Monday morning the contestants displayed their riding ability at the local rodeo arena. A luncheon honoring the six contestants and judges was held at 1 p.m. in the home of Mrs. Jearl James.

Assorted salads, ham, and iced tea was served from a table centered with the Queen's Crown to be used this year. A cake was prepared for the group by Mrs. Harlon Watson of Springlake. The soft pink layered cake was edged with hot pink rose buds. Twelve red roses and a horseshoe with "Good Luck" printed on it was designed on the top of the cake.

Judges for the event were Mrs. Jim Pierson of Muleshoe and Mrs. B. J. Holland of Kress. The girls were judged on poise and personality at the luncheon given by Linda James.

The six contestants will be presented during the rodeo parade at 5:30 p.m. Thursday, July 13.

The lovely queen and runners-up will be announced during the first performance of the 28th Annual Earth Amateur Rodeo to begin at 9 p.m. tonight at the local arena. The contestants this year are as follows:

LISA CLAYTON, daughter of Mr. and Mrs. Wendell Clayton,

Chamber Makes Final Plans For Rodeo Parade

The directors and some of the members of the Earth Chamber of Commerce met in regular monthly meeting July 7, 1972, at the Wolverine Drive Inn for breakfast at 7 a.m.

The minutes of the previous meeting were read and approved.

Mackey McCarty stated that his request for the S-E Band for the Parade was too late this year, and that he had requested that the band be available for next year.

Lexie Branscum said that he had had no reply from the TV stations for coverage on Community Close Up, for the Rodeo.

The radio station from Dimmitt is to have live coverage of the Rodeo and Parade from Earth, and some of the business men are to help with this.

The Caravan for advertising the rodeo will leave Earth Tuesday at 8 a.m., July 11 and will meet at the Bank before leaving Earth.

There is to be a helicopter present Thursday for the Parade and Rodeo.

There was a discussion on future plans for advertising of Earth trade territory.

The meeting was then adjourned.

Present were: Leon Dent, presiding, Bill Scott, Dutch Been, Bob Belew, Dale Riggs, W.B. McMillan, Robert Gossett, Rex Clayton, Norman Hinchliffe, Lexie Branscum, Gayle Stephens, Mackey McCarty, Neil Pounds, Doug Parish, Glen McGeath and Mrs. Zou Wilson.

Board Sets Regulations For Student Dress And Grooming

The S-E School Board has set the following regulations regarding the dress and grooming of students.

They have taken into consideration the parents view point, the student and the faculty. The following is their report:

STUDENT GROOMING AND DRESS...

The dress of our students is important in the academic and extra curricular activities of our school. Students should dress appropriate for the occasion. We, as parents, to often hear these words, "This is what all the other kids are wearing." Too often we have allowed our children to wear fashions of which we do not really approve or which are not in good taste, simply because we do not know.

There is no doubt that the majority of our students wear clothing which is in good taste and groom themselves appropriately, but regulations are necessary for those few who do not take sufficient pride in themselves and their school. It is not the desire of the school to dictate fashion; however, it is within the jurisdiction of the school to set forth those requirements relative to dress and grooming which it deems necessary to maintain a desirable educational climate.

BOYS' HAIR...

1. Boys will be clean shaven - no beards or mustaches.
2. Sideburns will not be worn below the bottom of the ear and must be kept neatly trimmed.
3. The sides of the hair will be cut and neatly trimmed so that the hair does not hang below the bottom of the ear.
4. The hair will be cut and trimmed in the back so that it does not hang over the collar, and in the front so that it does not hang or lay below eye-brow level.

GIRLS' HAIR...

1. Girls' hair will be styled to leave all front portions of the face visible.
2. Bangs will not be below eye-brow level.
3. Rollers will not be worn in school.
4. Hats nor head scarfs will not be worn in the classroom.

BOYS' DRESS...

1. Men's style shirts with split tails will be worn in.
2. Shirts with lettering or designs which are unpatriotic, vulgar, or profane will not be worn in school. Insignias of other schools may be worn if earned by the individual wearing them.
3. Shirts will be buttoned to leave one button only open at the top. No style shirts will be worn which allows the chest to be exposed. Muscle shirts and tank tops will not be worn.
4. Footwear will be worn at all times.

GIRLS' DRESS...

1. Shorts will not be worn in school. Any other items of dress which do not meet the prescribed length will not be worn.
2. Unusually short dresses will not be worn. Dresses shorter than eight inches from the floor when measured from a kneeling position will not be allowed.
3. Length of pant dresses will be same requirement as for regular dresses.
4. Men's shirts with split tails will be worn in.
5. Shirts with lettering or designs which are unpatriotic, vulgar, or profane will not be worn in school. Insignias of other schools may be worn if earned by the individual wearing them.
6. Footwear will be worn at all times.

Any item not covered in the above dress policy that would reflect discredit on the school will be left to the discretion of the principal.

If you're a poor plane traveler, get as much sleep during the trip as possible. Drink plenty of water and avoid alcohol, which tends to dry out the body, and you'll arrive in finer fettle.

PEOPLE ATTENDING THE SPRINGLAKE fish fry enjoyed visiting with each other before the meal.

Pee Wee All-Stars Named

All Stars to represent the Pee Wee League were chosen by the coaches Tuesday, July 4. The coaches voted on all the boys and the ones with the most votes made the All Star team.

Those boys chosen for the team were Allen Clayton, Rex Fennell, Reggie Russell, Derek Edwards, Britt Pounds, Mike McCarty, Biff Belaw, Lonnie Neinst, Mike Gover, Kyle Kelley and Mark Parish.

The coaches are trying to match a game with Muleshoe and Plainview, but so far no game is scheduled yet.

All Stars Chosen

The All-Stars to represent the local little league in competition were chosen last week and will play Muleshoe Monday night, July 17, at 6 p.m. in Plainview at the District Tournament. It is a single elimination tournament; if the Earth boys lose the first game they will be out of the tournament.

The little league coaches and assistant coaches voted on all the boys and the ones with the most votes were selected.

The boys selected are: Kevin Kelley, Carlton Gregory, Jeffery Washington, James Hanson, Ray Van Banks, Donnie Weil, Johnny Smith, Dean Moore, Kelley Green, Keith Clayton, Lottie Rodriguez, Alan Been and Teddy Zambrado.

Springlake Cafe Has New Owner

Vernon Houk of Earth has purchased and opened the Springlake Cafe Monday, June 26.

The cafe is open daily from 6:30 a.m. until 9:30 p.m. On Sundays it opens at 7 a.m. and closes at 3 p.m.

Bonnie Lunsford is the morning cook and Ocie Walker is the cook for the afternoon. Plate lunches are their speciality, but the ladies also prepare delicious Mexican food and steaks.

Hauk, and his wife, Sydney, moved to Earth in July of 1971 from Littlefield. Before opening the Springlake Cafe, he

was employed by Good Earth Food. Houk has had previous grocery experience and has always been interested in cooking. Houk's wife is employed by Earth Oil and Gas Company.

-30-

The sensual man also knows where to take his wife to remind her of their honeymoon. Such a masculine hero frequently takes the good woman for a surprise stay at a hotel or motel, where luxurious living and privacy can help rejuvenate both of them.

PARTY LINE

Mr. and Mrs. Dainton Beardon of Vancouver, Washington, left July 10 after a 10 day visit with Ms. Bonnie Haberer and other relatives.

1972 Music Camp July 16-28 At L.C.C.

Wayne Hinds, head of the Christian College Department and Director of Music Camp, has set registration for Sunday, July 16, from 2 and 4 p.m. The staff of talented musicians will teach: song directing, band, drum major, sax and sight-singing, quartets & sextets, sectionals, stage band and more.

Hinds, Dr. Maxwell, Dr. Cox, Eddie Chance, Horace Coffman, Paul Epps will be the faculty for the camp. Epps, of Seymour, Texas, will teach singing to high and high school students 12 years or older who will attend and live in dormitories and eat in the cafeteria. Tuition for students who live at home is only \$55; for students who live in a bus, \$75. Students staying

in the dorms need to bring their own pillow, linens and blanket.

A full schedule of recreational activities for the music campers has been planned. There will be a variety show featuring student talent, movie, and an all day picnic, swimming, volleyball, skating and miniature golf.

The LCC bus will pick up students of Houston, Dallas, Fort Worth and various points between. Anyone living in the Houston area should contact Tex Stevens, 6502 Enid, Houston, for the bus schedule. Persons living in the Dallas-Ft. Worth area and all other stops should contact Dr. Wayne Hinds, LCC Music Department, for the bus schedule for their area.

Music Camp not only advances the students in their knowledge of music and Bible, but it gives them a first-hand view of campus life at Lubbock Christian College.

Local Artist Receive Honorable Mention In Art Show

W.S. McMillan and Mrs. Lewis, members of the Earth Art Association, exhibited paintings in a show at 520 Main Street last week-end. The paintings were judged on June 30, and the show was Saturday, Sunday, and Tuesday, July 1, 2, and 3.

McMillan received honorable mention on the painting "The Earth" and Mrs. Lewis received honorable mention on her five paintings entitled "The Earth". Exhibits were entered in the show and the Earth ladies were the best art show they had seen in some time.

Wyoming Or "Bust"

By DAVID HARTMAN

By the crack of dawn Friday, July 21st, approximately 30 local missionaries from First Baptist Church, Earth, will be on their way to Casper, Wyoming. The bulk of the group is made up of young people from the local congregation.

The mission work will consist of Vacation Bible School, religious survey, and evangelistic services.

The young people will be conducting an open air Bible school in near-by Glenrock and possibly at the Friendship Center in north Casper. The last few Sunday evenings preparation sessions have been conducted under the leadership of Charlotte Edwards, the summer

youth director.

A religious survey will be done in Glenrock to help the Casper area Baptist churches determine whether or not to establish a mission there. Glenrock is a town of about 1,500 population.

The evangelistic services will be conducted each evening Monday through Friday at the Friendship Center in the north Casper area.

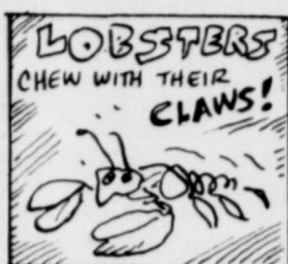

The team will be staying at the local youth camp site on Casper mountain.

The group will return home July 30th.

Small Rain Received Saturday

A small rainfall was received Saturday, July 8, about 1:15 p.m.

Reports indicated 1" of rain in Earth and slight traces near the Dodd and Lazbuddie areas. The Springlake area reported about .2 inch in town and 1/4 inch in the outlined area.

PARTY LINE

Ronnie Landis, son of Mr. and Mrs. Robert Landis, fell off a horse Saturday, July 8, and is a patient in University Hospital in Lubbock. He is expected to be in the hospital 21 days in all.

MRS. MICHAEL LEWIS
nee (Connie Dunagan)

Dunagan-Lewis Exchange Vows In Big Spring

Miss Connie Gale Dunagan became the bride of Michael George Lewis Friday, July 7, at 7:30 p.m. in the church of Christ in Big Spring. J.B. Harrington, minister of the church, officiated the double ring ceremony.

The bride's parents are Mr. and Mrs. M.A. Dunagan of Big Spring, Texas. Parents of the groom are Mr. and Mrs. Wilson Lewis, Jr., of Earth. The ceremony was performed before an archway decked with greenery flanked by arched candelabras. A beautiful arrangement of white gladioli and blue carnations were in the center back of the archway.

As the bride walked down the aisle, the chorus sang, "Faithful and True", the wedding march.

The bride, given in marriage by her father, wore a white peau de soie satin, empire, floor length gown with an overlay of appliqued roses centered with tiny seed pearls. The full sheer sleeves were complimented with appliques of roses with pearls and lace ruffles accented the cuffs. The finger-tipped veil fell from a lace covered camelot cap with pearl drop-lets. Her lovely cascade bridal bouquet featured white camillias and lilies of the valley tied with long satin

streamers with a white Bible attached.

For something new the bride wore her dress and the blue garter was something blue. A penny served as something old and something borrowed as well.

Anita Wieberg of Groom served as maid of honor wearing a sleeveless A-line gold gown with a high ruffled neckline and hem. Quency and Neshia Lewis, sisters of the groom, served as bridesmaids. They wore royal blue dresses identical to the maid of honor's. The attendants' headpieces were matching organza bows with streamers tipped with beautiful organza rosebuds.

Samuel Lewis served his brother as best man. Dennis Dunagan, brother of the bride, from Canyon, and Billy Street of Earth, were groomsmen.

Ushering the guests were Elroy Wisian, Jr., of Earth and Danny Harland of Big Spring.

Karen Woolverton of Sand Springs, served as flower girl wearing a blue dress and headpiece identical to the bridesmaids.

Mark Woolverton, also of Sand Springs, was the ring bearer.

The bride's mother wore a gold crepe dress with black accessories. The groom's mother wore a navy dress with

bone accessories.

A reception followed the ceremony in the fellowship room. The serving table was covered with a white lace cloth draped with white net and decorated with clusters of pearls. The bride's bouquet was used as the centerpiece. The white tiered cake, decorated with tiny gold flowers, was topped with a small bride and groom with a heart shaped background of satin and pearls.

Serving from silver and crystal appointments were Mrs. Harry Elliott, Miss Darla Cartwright of Ft. Collins, Colorado, Mrs. Jim Woolverton, Miss Kathy Woolverton of Sand Springs. The bride wore a mint green crepe A-line dress with white accessories for going away.

The bride is a graduate from Forsan High School and a sophomore music major at West Texas State University.

The groom is a graduate of Springlake-Earth High School and a junior accounting major also at West Texas.

Out of town guests were Mr. and Mrs. Bill Cartwright, Ft. Collins, Colorado; Mr. and Mrs. J.P. Rason, Lamesa; Mr. and Mrs. Alfred Sladek, grandparents of the groom from Littlefield; Mr. and Mrs. Wendell Sevter and Mr. and Mrs. Lewis Sevter of Plainview; Mike Wages of Earth; Mr. and Mrs. John Laing, Jr., of Earth; Cynthia Sykes of Lubbock, Mr. and Mrs. Don Feozell of Lubbock and Mrs. Martin Cubo of LeVelland.

Youths Have Hawaiian Luau

A Hawaiian Luau for the area youths was held Saturday night, July 8. It began with supper at the Earth First Baptist Church at 5:30 p.m.

As everyone entered the fellowship hall, Camille Haberer and Debbie Green presented each person with a lei.

Rev. David Hartman then led a prayer and the group enjoyed a delicious meal of ham, baked beans, fruit salad, bread and pineapple punch.

A hula-hoop and style show contest was held next. Contestants hula-hooped across the room modeling their Hawaiian costume. Larry Thomas won the prize as best hula-hooper and Karen Armstrong was chosen for the person wearing the best suited Hawaiian costume.

Charlotte Edwards, Baptist Youth Director, led the youths in singing a few songs then sang a beautiful solo.

Rev. Hartman delivered the message on having and needing true friends and how Christ can become your friend.

Around 7:30 p.m. everyone went down to the city pool for an evening of swimming. The youths enjoying the luau were Charlotte Edwards, Karen Armstrong, Kenny O'Hair, Camille Haberer, Melissa Been, Teri Inglis, Kathleen Anderson, Kathy Winters, Regina Cole, Debbie Green, Hoyt Glasscock, Larry Thomas, Ronnie Thomas, Mike Hawkins, Terry Lively, Chuck Smith, Johnny Kelley, Guy Davis, Carl Sulser, Barry Pittman and Kevin Anderson.

Eastern Star Meets

Earth Chapt. #870 Order of the Eastern Star met Monday night, July 10, at 8:30 p.m. in the Masonic Hall in a regular meeting. Mrs. Jimmie Craft, Worthy Matron, and Jimmie Craft, Worthy Patron, presided.

Those attending the meeting were Mr. and Mrs. Jimmie Craft, Mrs. Forrest Simmons, Mrs. B. Campbell, Mrs. Marie Ross, Mrs. W.B. McMillan, Mrs. Jimmy Shirey, Mrs. Gene Brown, Mrs. John Laing, Sr., Mrs. Gladys Parish, Mrs. Donald Kelley, Mrs. Bob Armstrong, Mrs. J.A. Littleton, Sr., Mrs. M.E. Kelley and Mr. Leonard Green.

Mr. and Mrs. O.V. Donnell from Amarillo visited with Mr. and Mrs. T.L. Free over the 4th of July.

Rehearsal Dinner Held In Big Spring

A rehearsal dinner was held at Coker's Restaurant in Big Spring, Friday noon, July 7, following the wedding rehearsal of Connie Dunagan and Michael Lewis.

Mr. and Mrs. Wilson Lewis, parents of the groom, hosted the event. Those attending were: the bride and groom,

Nita Wieburg, Billy Street, Mrs. Jim Woolverton, Kathy, Karen and Mark; J.B. Harrington, Quency and Neshia Lewis; Mrs. Harold Gilmore, grandmother of the bride, Mrs. Jewell Lewis, grandmother of the groom; Dennis Dunagan, Samuel Lewis; and Mr. and Mrs. M.A. Dunagan, parents of the bride.

Friendship Sunday School Class Meets

The Friendship Sunday School Class met for their monthly covered dish luncheon in the home of Mrs. Ida Allen.

Mrs. Lottie Orteg gave the blessing and Mrs. Gladys Parish brought the devotional.

Several stayed for some games of 42 in the afternoon.

Those attending were Mrs. Naomi Burgess, Mrs. Ray Axtell, Mrs. Bessie Cearley, Mrs. Marie Ross, Mrs. Crill Bulls, Mrs. Edith Brockette, Mrs. R. C. Hyde, Mrs. Beulah Coker, Mrs. Jack Hinson, Miss Ruby Jones, Mrs. Lottie Orteg, Mrs. Gladys Goodwin, Miss Mittie

Beard of Bartow, W. Va., Mrs. Bessie Wood of Bakersfield, California, and hostess, Mrs. Allen.

Four Local TOPS Attend Convention

Lois Rudd, Pearl Cooper, Edith Crawford and Pauline Hucks, attended the International TOPS Convention July 6-8 in Denver, Colorado. The ladies left July 5 and returned home on July 10.

The following is a schedule of their activities:

Mr. and Mrs. Jim Petra of Hemet, California, are the proud parents of twin girls born July 3.

One baby weighed 6 pounds 5 ounces, and the other little lass weighed in at 5 pounds 7 ounces.

The grandmother is Marjorie Damon of Cherry Valley, California. Mr. and Mrs. Edgar Danforth (formerly of Earth) of Yucaipa, California, are great grandparents. The great, great grandmother is Mrs. Margaret Kelley at Earth.

THURSDAY, July 6, from 10 a.m. to 12 the ladies attended a staff meeting to meet the directors and area supervisors. From 1 to 3 p.m. a workshop of group therapy and TOPS success was held in the Grand Ballroom of the Denver Hilton Hotel. At 7 p.m. a meeting was opened with a welcome flag ceremony, prayer, and the TOPS pledge. The introduction of the founder, president, and all board directors. The TOPS members from foreign countries were next introduced. Entertainment was the research report of a Dr. Donald K. Hoff, director of the TOPS Club incorporation and research program.

FRIDAY, July 7, from 1 to 3 p.m. a workshop of back fighters was held in the Grand Ballroom of the hotel. A banquet was enjoyed by those attending from 3 to 6:30 p.m. Entertainment was provided by "Happiness Singers," members of the U.S. Naval Air Force. A general session was held from 7 to 12 p.m. Awards for greatest improvement, charm and beauty were presented. Alumni were recognized and then the coronation of the TOPS

International King was featured. The King, 148 pounds, was from Los Angeles, California, and weighed 208 pounds. The runner-up for king was from Los Angeles and weighed 192 pounds. "Dreaming True" was the theme of the 278 TOPS graduates, 3,154 pounds.

SATURDAY, July 8, final day for all those attending the convention. The activities began at 10 a.m. First, the banquet was presented to the ladies. A baggy dress was given before a weighing one losing 100 pounds. Next, the David Fair Award was given. The TOPS Queen and King were introduced before the division winners. Recognition was given to the 1973 International Day to be held in Milwaukee, Wisconsin.

The local TOPS members marked that the convention was very impressive and a wonderful time.

THESE S-E 4-H'ers won blue and red ribbons at the county dress revue. Pictured from left to right, on back row are Jennifer Templeton, Dawn Branscum, Petra Lewis, Joyce Ingram and Dina Jo Hampton; front row, Wendy Branscum, Cindy Clayton, Beth Pounds, Patricia Lowater, Belinda Hampton and Stephanie Tunnell.

Twelve Bring Home Ribbons From Dress Revue

young ladies of the Earth-4-H Club won red ribbons in the Dress Revue held at Lamb County Electric Friday, July 7, at 7:30 p.m. Sixty-six girls participated and made their own dresses. The theme was "So-Sew" as in theme. Don Ham of Sudan, senior division winner made a coat and dress of 100% polyester knit. Wendy Branscum, daughter of M. and Mrs. Lexie Branscum of Earth, was named junior division winner. Wendy made a wrap around jump-suit also of 100% polyester knit. Other blue ribbon winners were Jennifer Templeton, Dawn Branscum, Dina Jo Hampton, Joyce Ingram, Patricia Lowater, Beth Pounds, Petra Lewis, and Belinda Hampton, all of Earth; winners from other towns were Barbara Black, Kathleen Hulsey, Kathy Swart, Kelli Smith, Glenda Cardwell, Cathy Ham, Tanya Ray, Lynn Jacquess and Cindy Ham.

SHERRY PITTMAN

Sherry Pittman Receives Scholarship

Sherry Pittman, a 1972 graduate of Springlake-Earth High School, has been awarded an institutional scholarship by Southwestern State College in Weatherford, Oklahoma. Miss Pittman, who plans to study pharmacy, applied for a scholarship in the early part of March. She filled out information sheets on her high school activities, awards, and grades. Mr. Ward Cooley, principal of S-E High School, also had to send in his recommendation for Sherry.

Centre Nets \$5.00

The Goodwill Centre opened its doors for sales Saturday, July 8, at 2:30 p.m. and sold \$5.00 worth of items. Mrs. W.C. Sanderson and Mrs. W.J. Martin represented the Baptist Church and aided with all the sales. The Centre had all items requested in stock.

Senior Citizens Enjoy Monthly Luncheon

Senior Citizens met for monthly twelve o'clock luncheon on Wednesday, July 12, at the community building. Bessie Cearley, Mrs. Lucille Henderson, Mrs. Ida Allen, Mrs. Gladys Goodwin, Mrs. Joe Lee Truelock, Mrs. Ruby Hodge, Leonard Green, Mrs. Alice Martin, Mrs. Minnie Pate, Mrs. M.E. Kelley, Mrs. Bonnie Haberer, Willis C. White, Mr. and Mrs. Jack Hinson, Mr. and Mrs. Crill Bulls, Mr. and Mrs. Ruel Fanning, and Mr. and Mrs. Frank Butter.

Power Honors NOTICE

There will be a baby shower honoring Mrs. Danny Byers in the W.B. Huck's home in Springlake, Friday, July 21, from 3 to 5 p.m. Miss Cathy Nelson of Littlefield and Gene Jones of Springlake will exchange vows, Saturday, July 15, at 8 p.m. in the First Baptist Church of Littlefield. Miss Cindy Sikes, bride-elect of Billy Street, will be honored with a bridal shower Saturday, July 22, from 3 to 4:30 p.m. in the church of Christ fellowship hall in Earth. If you would like to be a hostess, please call 257-2182. Her selections have been made at Pounds Pharmacy and Howell's 216 Floral. There will be a bridal shower July 17, from 5:30 to 7:30 p.m. in the parlor of the Earth United Methodist Church honoring Nancy Jones of Kress, bride-elect of Sammy Matlock. If you would like to be a hostess, please call Sybil Davis, 986-2241; or Tommy Bills, 257-3861. Selections of pottery and stainless steel tableware have been made at H.S. Sanders Lumber.

Queen Candidate Honored

A Coke party honoring the six 1972 Rodeo Queen contestants was given by Ms. Jearl James in her home June 29 at 2 p.m. Mrs. James informed the girls on the manner in which they would be judged. She reminded them that judging will be 60% on horsemanship and 40% on poise and personality. Those present for the party were treated to Cokes, dip and chips. The candidates present were Sheila Lewis, sponsored by Earth Manufacturing; Jennifer Templeton, sponsored by Earth Dry Goods; Melissa Been, sponsored by Earth Oil and Gas; Karen Smith, sponsored by KMP Pump; Lisa Clayton, sponsored by Earth Pump and Machine; and Marilyn Eagle, sponsored by Citizens State Bank.

Small Fire At Rodeo Grounds

There was a small fire at the Earth rodeo grounds on the west side of Earth, Tuesday at 11:30 p.m., July 11. A butane bottle in the concession stand had a leak and the hot water heater ignited it, blowing up and causing a small fire. The Earth fire truck arrived and put the fire out. Only slight damage to the wiring system was done, and it will be fixed by rodeo time tonight. Several persons were around the concession stand and in the office above it but no one was hurt.

Use Color In Decorating Home

Colors make the difference in home decorating. "Those who understand the magic of color also understand its dimensions and how to use it to fit the almost limitless demands of home decoration," said Pat Bradshaw, housing and home furnishings specialist for the Texas Agricultural Extension Service. No color, when seen alone, looks exactly the same as when it's used with other colors. Surrounding colors visually alter a colored surface. The color of the room itself is of utmost importance when decorating. Remember that light colors make a small room seem larger, and dark colors make a very large room appear smaller. Bright walls in a large room detract from furnishings that would otherwise be decorative. When ceilings are darker than walls, they seem lower than they actually are. Ceilings lighter than the walls appear to be higher. Since colors often change under artificial lighting, look at color swatches both in daylight and under artificial light. The Texas A&M University employee reminded that every color has its own temperature. Colors containing yellow or red are warm in nature. They're most common to sunshine, fire and warm light. On the other hand, blues and greens suggest cool water, foliage and even ice.

Trial Held For Juvenile

The 14-year old juvenile accused of aggravated assault (misdemeanor) was brought to trial Wednesday at 9 a.m. in the Littlefield courthouse. The boy admitted to the crime of stabbing Augustine Munoz, 81, Sunday, July 9, near the Wolverine Drive in Earth. County Judge, Truitt Sides, placed the delinquent juvenile in custody of his parents and under one year's probation. Sides also directed the juvenile to pay \$100 restitution for the hospital bill involved.

Services Held For Olton Teen

Nova Jane (Janie) Jones, 19, of Olton, who was injured Friday in a car-tractor mishap, died about 6:15 p.m. Monday, July 10, in Lubbock's Methodist Hospital.

Miss Jones, daughter of Mr. and Mrs. Owen Jones of Olton, was driving the car when it collided with a tractor on Farm Road 1072 about nine miles north of Fieldton about 1 p.m. Friday.

Funeral services were held

Wednesday, July 12 at 2:30 in the First Baptist Church of Olton. Rev. John E. Lewis officiated and interment was in the Olton Cemetery.

Survivors include her parents, two sisters, Mrs. Eddie Carson and Mrs. Jackie Burkhalter, and one brother, George Jones, member of the U.S. Navy.

Miss Jones was a 1971 graduate of Olton High School and attended Texas Tech last year.

Local Youths Place First In Muleshoe Rodeo

Two local young men placed first in the Muleshoe Junior Rodeo held Friday, Saturday, and Sunday, June 30, July 1, and July 2.

Donnie Henderson, son of Mr. and Mrs. L. D. Henderson, won first in the senior bareback division with a score of 69. Donnie will be a junior at

Springlake-Earth High School. Donald Templeton, son of Mr. and Mrs. Gene Templeton, won first in chute dogging with a time of 14.7 seconds. Donald is a 1972 graduate of S-E High School.

Both boys received a belt buckle for placing first in their event.

LITTLE KIDS ENJOY FISH FRIES TOO!!! Pictured among the crowd at the Springlake fish fry is John Mark Wilson, son of Mr. and Mrs. Mike Wilson.

Cheerleaders Selling Magazines

The 1972-73 cheerleaders for Springlake-Earth High School

are now selling the "Top-O-Texas" football magazines. The magazines have news about class AAAA, AAA, AA, A and B high school teams for the 1972-73 football season.

The girls started selling the \$1.50 magazines on Friday, or, Kelly Haydon, and Ruth Street.

July 7, and will continue selling them until they run out.

You will also be able to buy the magazines at Pay and Save Grocery and Pounds Pharmacy.

The cheerleaders are Toni Sanders, Barbara Buckner, JoAnn Coker, Marianne Mess-

procedures are not followed. To avoid yellowing, do not overload the washer, use the recommended measured amount of soap or detergent in the wash water and be sure the clothes are thoroughly rinsed.

Whose fault is it when permanent press sheets wrinkle badly during laundering—the manufacturer of the sheets or the laundry appliance?

If your clothes dryer does not have a permanent press cycle, or if bed linens aren't removed from the dryer as soon as the dryer stops, wrinkling will occur. All permanent press clothes should have a cool water rinse before the spin dry cycle. If your dryer is an older model without a permanent press cycle, set the heat to "low" for drying such items.

"IT'S RODEO TIME AGAIN"

Involved In Oklahoma City Tornado

Mrs. Stan Kilmer (formerly DeAnne Adrian of Earth) was involved in the tornado that hit in the southeast part of Oklahoma City at 3:45 p.m., July 2.

DeAnne was in their mobile home at Cascade Mobile Home Park when the tornado hit and blew it over. She was not injured but had a few bruises on her legs. The trailer was badly wrecked, however, the couple managed to get most of their

personal items out. DeAnne was not aware that the tornado was in the vicinity of their home and did not go to shelter. Many of the people living at the park were in a cellar.

Approximately 29 of the mobile homes there were totally damaged. An empty trailer was available and the Kilmer's will be residing in it for the time being.

BOOKMOBILE SCHEDULE

The High Plains Bookmobile Library will be in this area July 20 and 21.

The schedule is as follows:

JULY 20
Springlake - 11:00 - 12:00
Earth - 1:00 - 3:45 p.m.
JULY 21
Pleasant Valley - 11:00 - 12:00

Successful U. S. businesses change fast. Over 90 per cent of the company managements described in detail in the latest issue of Dun & Bradstreet's Reference Book of Corporate Managements showed a change compared with six months earlier. These executives manage corporations which produce or consume 80 per cent of all U. S. goods and services!

Consumers Want to Know

by MARGARET SPADER
Director of Consumer Affairs
National Association of Manufacturers

Can a clothes dryer be vented into an existing chimney?

No clothes dryer, gas or electric, should be connected to a chimney, flue or vent serving another appliance. The moisture from clothes dryers should be exhausted outdoors to keep the air inside the house from becoming moisture saturated.

Is it true that clothes dryers cause white clothes to turn yellow?

Discoloration of clothes is usually due to improper laundry procedures, such as soap or detergent buildup caused by inadequate rinsing. The heat of any dryer will cause discoloring if proper laundry

Services Held For Father Former Resident

A. A. Smith, 60, was held Monday, 2:30 p.m. in the Methodist Church with burial in Rest-rial Park under the of Parsons Funeral found dead at his day morning. Jus-peace, W. G. Fin- death by natural 25 year resident of Olton and had been a barber there for many years. Survivors include his wife, Lois; one son, Danny Smith of Hereford; one sister, Shirley Pickrell of Lubbock; one brother, Earl Smith of Lubbock; one sister, Mrs. Leslie Light of Lubbock; mother, Mrs. C. H. Smith of Lubbock; and 5 grandchildren. Smith was the father of Danny Smith, former Earth resident, teacher and coach, who now lives in Hereford.

Accident Near Springlake

Jackie Wood was taken to the Littlefield Hospital, checked and released. None of the Spanish people were injured. Mrs. Wood was taken to the Littlefield Hospital where she remains a patient. She received a cut on the head which required fourteen stitches and several buries were received also. At the last report, Mrs. Wood's condition was improving.

Computers Meet Business Needs

Michigan-based manufacturer of small computers for the first-time user. "Computers that bridge the gap between electro-mechanical office accounting machines and the giant electronic brains of science fiction can be a great help in running a business." The Cascade system utilizes less than 40 square feet of floor space, does not require air conditioning, and will use any 115-volt line. Mr. and Mrs. Gene Brown and Dickie visited Sunday in the home of Jack Brown of Hale Center.

IT'S TIME TO EAT!!! These women are arranging the food for the fish fry at the Spring-lake Park.

Services Held Former Earth Resident

O. K. Angeley died Thursday morning, July 6, in Cross Plains, Texas, after a lengthy illness. Services were conducted Friday, July 7, in the Higginbotham Funeral Home in Cross Plains. Interment was in the Cross Plains Cemetery. Angeley was born in Earth County, Texas. He was married to Clara DeBask of Cross Plains to 1924. The couple moved to the Earth area in 1925 where he originally engaged in farming. Angeley later operated the Earth and Amherst Lockers.

The couple also lived in Muleshoe for some time. Angeley was living in Cross Plains at the time of his death. Survivors include 6 children, Jerry D. Angeley of Brownwood, Rex Angeley of Tucson, Arizona, Jack Angeley of Earth, Mrs. Stanley Sortland of Alaska, Mrs. Dean Klick of Ft. Collins, Colorado and Mrs. Bob Reynolds of Dallas; 2 sisters, Mrs. Bonnie Haber of Muleshoe, and Mrs. Adolph Dieter of Vancouver, Washington; one brother, E. K. Angeley of Muleshoe and 14 grandchildren. Attending the funeral from this area were Mr. and Mrs. Jack Angeley and Bobby Jack, Mr. and Mrs. E. K. Angeley, Mr. and Mrs. J. K. (Ken) Angeley, Mr. and Mrs. R. D. Angeley, Mrs. Bonnie Haber, Mrs. Ted Haber, Mrs.

Tray Caraway from Jal, New Mexico, spent a week visiting with the Gene Brown family. Mrs. Brown is Tray's aunt.

Sunnyside Celebrates July 4th

BY: TEENY BOWDEN

The July 4th Homecoming was a big success, in spite of the cold, drizzle which persisted all day. 166 were registered, representing Sunnyside, Dimmitt, Springlake, Earth, Hart, Olton, Hereford, Tulia, Amarillo, Flagg, Lubbock, Lorenzo, Weatherford, Waco, Tucumcari, Tucson, and Phoenix, Arizona. The art exhibit overflowed the south wall of the community building and some paintings were hung on the north wall. 75 paintings and a few framed crafts were hung. Tables all along the south wall were covered with crafts and hobbies, and the back of the building was full of antiques. It was a very diverse display in every division. There were lots of visiting, singing and food. The tractor and truck received much attention. The rifle given by the Lion's Club was won by Mrs. Charles Axtell. The music was furnished by Resa Carson on the drums and Debra Ball on the piano. Mrs. Howard Bridges and Mrs. Weldon Bradley played for the singing of hymns and gospel songs, and patriotic tunes. Everyone seemed to have a good time. Coats went on before eating ice cream so there was ice cream to take home. We hope to have a repeat of this next year with volley ball and perhaps more music.

Will Attend Music Camp

Michael Franks of near Spring-lake is among the 1100 junior and senior high school students from all over the country enrolled for the 20th annual West Texas Instrumental Music Camp. The Camp, scheduled July 16-28 at West State University offers a wide variety of activities and events, including participation in bands, orchestras and ensembles. With a faculty-staff of well over 40 members, the Camp features classes in music appreciation, theory, drum mixing, twirling and numerous other subjects. Franks, a tuba student, is the son of Don Franks, and attends Olton High School.

THE REAL CAMPAIGN ISSUES

Are you unwittingly participating in an illegal lottery scheme? Every day Texas consumers are solicited by promoters to operate lotteries in order to market their merchandise. Merchandise sold in this manner takes such varied form as children's toys and electric clocks.

These lottery schemes sometimes operate by the use of punchboard devices. The consumer is induced to buy the promoter's merchandise "without a cent of cost". The unwary consumer buys one of the promoter's products and gets one "free" along with a punchboard device. The consumer is then instructed to use this punchboard device by selling "chances" to his friends and neighbors for amounts of one cent to 29 cents per chance.

After all these "chances" are sold, the consumer will make a sufficient return to cover his original investment. The "lucky" winner on the punchboard receives the original "free" product from the consumer as his "lucky prize". Sounds like a good idea, doesn't it? The only catch is, the whole scheme is illegal in Texas!

The criminal law prohibits the possession as well as the use of a lottery type punchboard. By utilizing this scheme, an innocent Texas consumer engages in a criminal act. Needless to say, the promoters fail to point this out in explaining how you can get his product "without one cent of cost".

There are other types of illegal lotteries that do not utilize punchboard devices that you should be cautious about. All types of lotteries are illegal.

A lottery consists of three essential elements:

1. There must be an awarding of a prize which can be in the form of money, merchandise, or something else of value.
2. The prize must be awarded on the basis of chance. This can be in the form of a drawing or some other means of selection done in a manner so that chance, rather than skill or judgment, is the predominant element.
3. There must be consideration for the chance to win the prize.

Where these three elements are involved, the scheme is a lottery. As an informed consumer you should avoid participation in plans such as this.

The Department of Health, Education and Welfare has proposed a \$23,000 study to determine why youngsters fall off their tricycles.

Are You Unknowingly Participating In Lottery

Nonfat Dry Milk Nutritious, Economical

Interested in saving money while serving nutritional foods? "Then don't forget about nonfat dry milk," said Texas Agricultural Extension Service foods and nutrition specialist Karen Kreipke.

For those who count pennies, nonfat dry milk has an advantage. When reconstituted with water, it costs less per quart than fluid, whole milk.

"Using nonfat dry milk together with fluid, whole milk can help stretch the food dollar," the Texas A&M University employee said.

Nonfat dry milk is merely pasteurized fluid milk with the fat and water removed. The former still has most of the protein, minerals and vitamins that make milk such a nutritional bonus.

Calorie counters also know the advantage of nonfat dry milk. It contains only half the calories of fresh, whole milk, yet furnishes almost as much nutritive value, according to Miss Kreipke.

Miss Kreipke explained that instant nonfat dry milk is made by a process which results in larger particles or "flakes." These dissolve easily in water.

"If you've been reluctant to try nonfat dry milk, now's a good time to experiment with this product," Miss Kreipke

said. "It's especially easy to use in home cooking. Just measure the required amount of powder in with other dry ingredients. Then add water where your recipe calls for milk. Packages of nonfat dry milk usually list the proportions needed for reconstruction."

An example of a recipe that uses instant nonfat dry milk is pancake mix. Sift together 1 1/2 cups flour, three tablespoons sugar, two teaspoons baking powder and one teaspoon salt. Then mix in one-half cup in-

stant nonfat dry milk. (This mixture may be stored in a tightly covered container.) When ready to make pancakes, combine 1 1/2 cups water, two eggs and three tablespoons of melted butter. Add the pancake mix and blend well. Allow about one-half cup batter for each pancake.

"So remember that you can watch your weight and your pocketbook," Miss Kreipke pointed out. "But watch your nutrition for good health."

Apply Watering Corn Gains Extra Bushels

Irrigations on corn extra bushels at harvest can help hold water and pumping costs minimum. Irrigations that are in the plant's seasonal pattern in mind are more productive and good irrigation water efficiency," says Leon H. Metzger, irrigation specialist with Texas Agricultural Service. He explains that during stages of high water requirements, extra water usually gives corn yield increases are obtained during growth requiring less water. Water requirements increase rapidly after the plants are 10 leaves. During following four to five plants are likely to grow to five feet. At the time, adequate moisture is important for tassels and ears inside the plant. Requirements are high this quantity of ve-

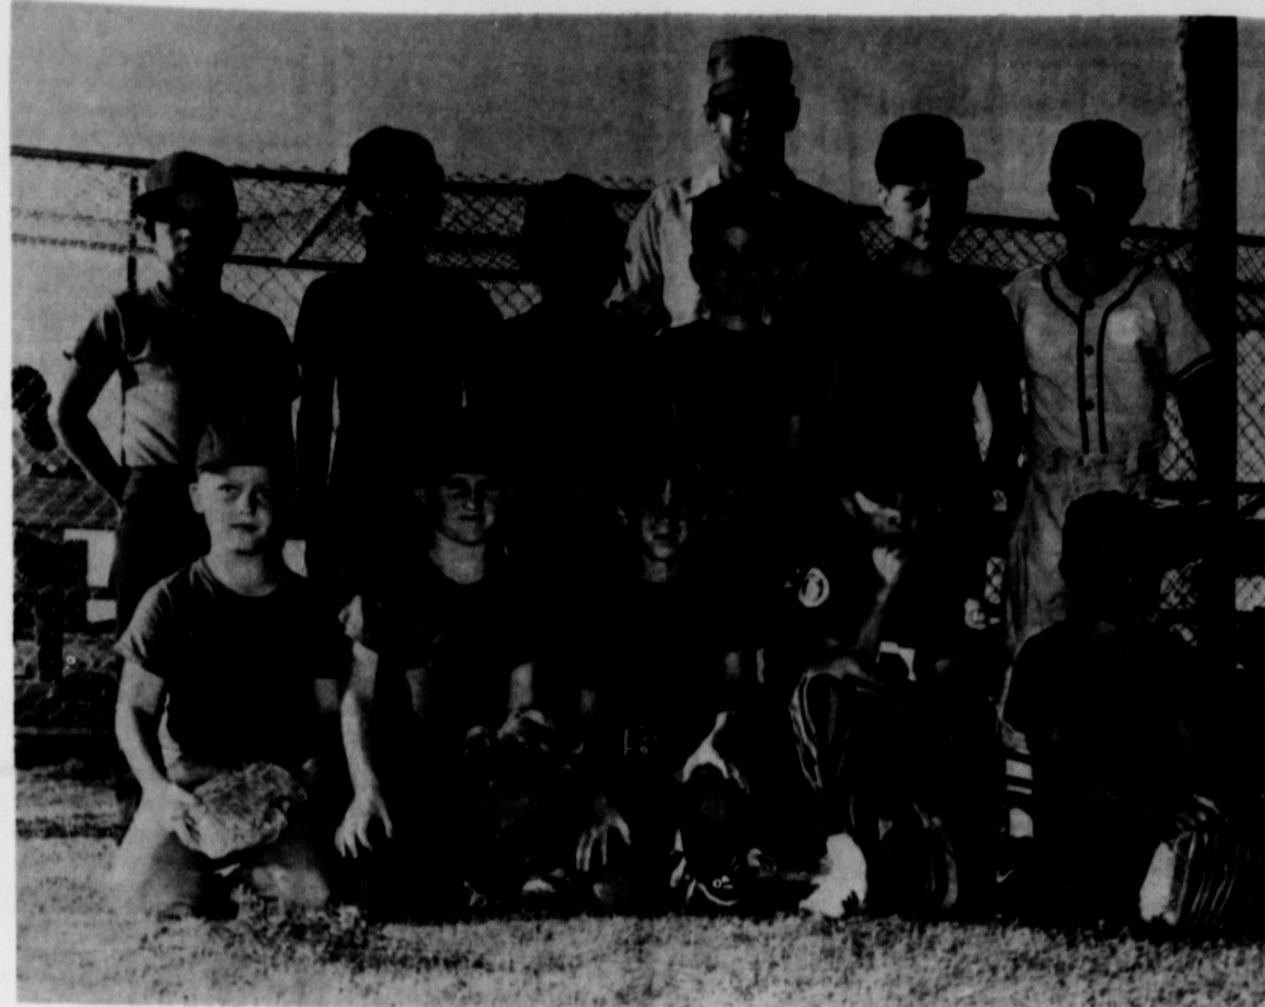

high during the early stages of grain development, often described as the blister and milk stages. Grain develops and rapidly increases in weight. New reminders that adequate moisture must be available during the three to four weeks following pollination for high grain production.

"By the dough stage, water requirements normally begin to decrease. However, moisture stress while the dough is soft will limit grain filling," he says. As the grain matures, corn moisture needs decrease rapidly. Area soils on which corn is produced will normally supply adequate moisture for grain to properly mature if they are irrigated August 15 to 20. Irrigations applied earlier than when six to eight leaves have unfolded have given only minimum corn yield increases. Adequate moisture for optimum growth is important during this stage when water needs are low, but a larger plant may be the only result of early irrigation. Except for corn ensilage, this can be an unnecessary waste of valuable ground water, New cautions.

Don'ts for Driving

A survey by the National Safety Council shows that drivers consider these ten bad driving practices most likely to threaten the safety of others:

1. Distraction
2. Inattention
3. Poor vehicle condition
4. Poor passing
5. Too fast for conditions
6. Following too closely
7. Blinding headlights
8. Running traffic signals
9. Too slow for conditions
10. Failure to yield right-of-way

PEE WEE LEAGUE GREENS are coached by E.C. Kelley. Team members are, front row, left to right, Randy Offield, Ronnie Landis, Kyle Kelley, Terry Connors and Greg Hulcy. Back row, left to right, Maguel Samaniego, Lorenzo Monriel, Elroy Funes, Mark Parish, Ditek Edwards and Lonnie Neinst. Not pictured are Bobby and Billy Pyle and Bryan Scott.

Shortage Of Good Quality Planting Seed

Hail hits a portion of the South Plains cotton crop each year, and some producers must face the decision whether to replant or just hold on to the injured stand of earlier cotton.

This year, the problem is especially serious because of the shortage of good quality planting seed after a poor crop in 1971.

"Several factors such as growth stage, type and extent of injury and seasonal conditions must be considered in making decisions to replant," says Dr. Bob Metzger, Extension area cotton specialist for Texas A & M University.

He says that producers often wonder how much stands can be reduced and still give normal yields. Several years of research have shown that only two seedlings per foot in 40-inch rows will still give optimum yields.

"In fact, no yield difference was obtained with plant populations ranging from 26,000-65,000 plants per acre, or two to five seedlings per foot of row," he reports.

Metzger explains that a hail storm can reduce the plant population to only two seedlings per foot row, and there is still no reason to replant unless the remaining crop is poorly distributed or there are long skips.

The specialist has some suggestions for evaluating hail damage. Most important, producers should not make a snap decision immediately after a storm.

"It will always appear much worse than the actual damage at this time," Metzger says, "a cotton seedling has a number of buds that provide a remark-

able capacity to recover in a short time."

He also says the entire field should be examined to determine if the injury is widespread. Whether a field should be replanted depends on the area receiving the most severe injury.

The plants should be examined to determine the number of leaves or traces of leaves still attached to the stalk.

"A plant having only traces of leaves will still recover better than one with no leaves," Metzger says. But he emphasizes that a stand with no leaves can still make a crop.

If the stem is intact, free of large breaks and the seedling has sound buds, recovery is still possible although it will be slower than plants having at least some leaves.

"However, if the stem is shattered and the bark loosened or broken at points below the leaf buds, then recovery is impossible," the specialist warns.

If the producer decides not to replant, a sandfighter should be run as soon as possible to prevent sand injury to vital buds on stubs left in the field. Metzger says that any regrowth hinges on either the sound terminal bud (the growing point) or axillary bud located at the point of leaf attachment.

If the terminal bud is destroyed, then the axillary buds become active and begin growth. After sandfighting, the producer should cultivate immediately to prevent crusting.

The specialist emphasizes that hail injury in May or June will cause less yield losses than damage in July and August.

"If the damage is suffered early, a crop can recover to a point that the injured plants are difficult to distinguish from undamaged plants," he adds. Also young cotton that survives early hail damage is often more mature at first frost than a crop that has been replanted.

"When a crop is totally destroyed, the producer has no choice but to replant, especially if the damage is early in the season," Metzger says. But in most hail storms, the crop

is usually only partially injured.

Under these conditions, he says the decision about replanting becomes more difficult and must be based on sound information.

"If absence makes the heart grow fonder, many people love their church."

Famed theologian Dr. Oswald Hoffmann of radio's "Lutheran Hour," in interpreting the basic message of the Gospel, quotes the shortest poem in the English language: "I! Why?"

THE REAL CAMPAIGN ISSUES

Are You Unknowingly Participating In Lottery

Are you unwittingly participating in an illegal lottery scheme? Every day Texas consumers are solicited by promoters to operate lotteries in order to market their merchandise. Merchandise sold in this manner takes such varied forms as children's toys and electric clocks.

These lottery schemes sometimes operate by the use of punchboard devices. The consumer is induced to buy the promoter's merchandise "without a cent of cost". The unwary consumer buys one of the promoter's products and gets one "free" along with a punchboard device. The consumer is then instructed to use this punchboard device by selling "chances" to his friends and neighbors for amounts of one cent to 29 cents per chance.

After all these "chances" are sold, the consumer will make a sufficient return to cover his original investment. The "lucky" winner on the punchboard receives the original "free" product from the consumer as his "lucky prize". Sounds like a good idea, doesn't it? The only catch is, the whole scheme is illegal in Texas!

The criminal law prohibits the possession as well as the use of a lottery type punchboard. By utilizing this scheme, an innocent Texas consumer engages in a criminal act. Needless to say, the promoters fail to point this out in explaining how you can get his product "without one cent of cost".

There are other types of illegal lotteries that do not utilize punchboard devices that you should be cautious about. All types of lotteries are illegal.

A lottery consists of three essential elements:

1. There must be an awarding of a prize which can be in the form of money, merchandise, or something else of value.
2. The prize must be awarded on the basis of chance. This can be in the form of a drawing or some other means of selection done in a manner so that chance, rather than skill or judgment, is the predominant element.
3. There must be consideration for the chance to win the prize.

Where these three elements are involved, the scheme is a lottery. As an informed consumer you should avoid participation in plans such as this.

The Department of Health, Education and Welfare has proposed a \$23,000 study to determine why youngsters fall off their tricycles.

Nonfat Dry Milk Nutritious, Economical

Interested in saving money while serving nutritional foods?

"Then don't forget about nonfat dry milk," said Texas Agricultural Extension Service foods and nutrition specialist Karen Kreipke.

For those who count pennies, nonfat dry milk has an advantage. When reconstituted with water, it costs less per quart than fluid, whole milk.

"Using nonfat dry milk together with fluid, whole milk can help stretch the food dollar," the Texas A&M University employee said.

Nonfat dry milk is merely pasteurized fluid milk with the fat and water removed. The former still has most of the protein, minerals and vitamins that make milk such a nutritional bonus.

Calorie counters also know the advantage of nonfat dry milk. It contains only half the calories of fresh, whole milk, yet furnishes almost as much nutritive value, according to Miss Kreipke.

Miss Kreipke explained that instant nonfat dry milk is made by a process which results in larger particles or "flakes." These dissolve easily in water.

"If you've been reluctant to try nonfat dry milk, now's a good time to experiment with this product," Miss Kreipke said.

said. "It's especially easy to use in home cooking. Just measure the required amount of powder in with other dry ingredients. Then add water where your recipe calls for milk. Packages of nonfat dry milk usually list the proportions needed for reconstitution."

An example of a recipe that uses instant nonfat dry milk is pancake mix. Sift together 1 1/2 cups flour, three tablespoons sugar, two teaspoons baking powder and one teaspoon salt. Then mix in one-half cup in-

stant nonfat dry milk. (This mixture may be stored in a tightly covered container.)

When ready to make pancakes, combine 1 1/2 cups water, two eggs and three tablespoons of melted butter. Add the pancake mix and blend well. Allow about one-half cup batter for each pancake.

"So remember that you can watch your weight and your pocketbook," Miss Kreipke pointed out. "But watch your nutrition for good health."

Holy Watering Corn Yields Extra Bushels

Joseph H. Goetz, Chief of the Western Division of the U.S. Army Corps of Engineers, says that irrigations on corn can help hold water in the soil and pump it to the plants. He says that irrigations that are with the plant's seasonal increase pattern in mind are more productive and good irrigation water efficiency, says Leon Goetz, Texas Agricultural Experiment Station. He explains that during stages of high water requirements, corn yields are high, while only minimum increases are obtained during growth requiring less water. Water requirements drop rapidly after the plants are to five feet. At the time, adequate moisture is important for tassel and ear development inside the plant. Requirements are high during this quantity of vegetation. High just prior to the plant water needs of usually occur during and after the primary plant function to produce grain. Moisture during the eight to ten days of pollination is normally quite costly. Moisture is especially important for complete pollination. Water requirements are to be three to four inches in 10 days. The specialist suggests that water applied in alternate furrows help wells to keep pace with plant demands, especially in loam and fine sandy soils. Requirements remain

high during the early stages of grain development, often described as the blister and milk stages. Grain develops and rapidly increases in weight. New reminders that adequate moisture must be available during the three to four weeks following pollination for high grain production. "By the dough stage, water requirements normally begin to decrease. However, moisture stress while the dough is soft will limit grain filling," he says. As the grain matures, corn moisture needs decrease rapidly. Area soils on which corn is produced will normally supply adequate moisture for grain to properly mature if they are irrigated August 15 to 20. Irrigations applied earlier than when six to eight leaves have unfolded have given only minimum corn yield increases. Adequate moisture for optimum growth is important during this stage when water needs are low, but a larger plant may be the only result of early irrigation. Except for corn ensilage, this can be an unnecessary waste of valuable ground water, New cautions.

Don'ts for Driving

A survey by the National Safety Council shows that drivers consider these ten bad driving practices most likely to threaten the safety of others:

1. Distraction
2. Inattention
3. Poor vehicle condition
4. Poor passing
5. Too fast for conditions
6. Following too closely
7. Blinding headlights
8. Running traffic signals
9. Too slow for conditions
10. Failure to yield right-of-way

PEE WEE LEAGUE GREENS are coached by E.C. Kelley. Team members are, front row, left to right, Randy Offield, Ronnie Landis, Kyle Kelley, Terry Conners and Greg Hulcy. Back row, left to right, Maguel Samaniego, Lorenzo Monriel, Elroy Fustes, Mark Parish, Derek Edwards and Lonnie Neinst. Not pictured are Bobby and Billy Pyle and Bryan Scott.

Shortage Of Good Quality Planting Seed

Hail hits a portion of the South Plains cotton crop each year, and some producers must face the decision whether to replant or just hold on to the injured stand of cotton. This year, the problem is especially serious because of the shortage of good quality planting seed after a poor crop in 1971. "Several factors such as growth stage, type and extent of injury and seasonal conditions must be considered in making decisions to replant," says Dr. Bob Metzger, Extension area cotton specialist for Texas A&M University. He says that producers often wonder how much stands can be reduced and still give normal yields. Several years of research have shown that only two seedlings per foot in 40-inch rows will still give optimum yields. "In fact, no yield difference was obtained with plant populations ranging from 26,000-65,000 plants per acre, or two to five seedlings per foot of row," he reports. Metzger explains that a hail storm can reduce the plant population to only two seedlings per foot row, and there is still no reason to replant unless the remaining crop is poorly distributed or there are long skips. The specialist has some suggestions for evaluating hail damage. Most important, producers should not make a snap decision immediately after a storm. "It will always appear much worse than the actual damage at this time," Metzger says. "A cotton seedling has a number of buds that provide a remark-

able capacity to recover in a short time." He also says the entire field should be examined to determine if the injury is widespread. Whether a field should be replanted depends on the area receiving the most severe injury. The plants should be examined to determine the number of leaves or traces of leaves still attached to the stalk. "A plant having only traces of leaves will still recover better than one with no leaves," Metzger says. But he emphasizes that a stand with no leaves can still make a crop. If the stem is intact, free of large breaks and the seedling has sound buds, recovery is still possible although it will be slower than plants having at least some leaves. "However, if the stem is shattered and the bark loosened or broken at points below the leaf buds, then recovery is impossible," the specialist warns. If the producer decides not to replant, a sandfighter should be run as soon as possible to prevent sand injury to vital buds on stubs left in the field. Metzger says that any regrowth hinges on either the sound terminal bud (the growing point) or axillary bud located at the point of leaf attachment. If the terminal bud is destroyed, then the axillary buds become active and begin growth. After sandfighting, the producer should cultivate immediately to prevent crusting. The specialist emphasizes that hail injury in May or June will cause less yield losses than damage in July and August. "If the damage is suffered early, a crop can recover to a point that the injured plants are difficult to distinguish from undamaged plants," he adds. Also young cotton that survives early hail damage is often more mature at first frost than a crop that has been replanted. "When a crop is totally destroyed, the producer has no choice but to replant, especially if the damage is early in the season," Metzger says. But in most hail storms, the crop

is usually only partially injured. Under these conditions, he says the decision about replanting becomes more difficult and must be based on sound information. "If absence makes the heart grow fonder, many people love their church."

One Earth Entry Sought In National Wheatheart Contest

PERRYTON--Invitations have gone out to cities in the Golden Spread to send a contestant to the annual Wheatheart of the Nation Beauty Contest scheduled in Perryton on August 19, 1972.

The Wheatheart of the Nation Contest is one of the outstanding beauty pageants in the Southwest and the selection of the Wheatheart of the Nation has been a highlight of the Panhandle area since its beginning in 1947.

Any single girl between the ages of 16 and 21 with a good reputation and character who is properly endorsed by a civic

club or business firm is eligible for this beauty contest. Judging is based on beauty, personality, poise and figure.

The 1972 Wheatheart of the Nation will receive a \$1000 college scholarship. The first runner-up will receive a \$500 college scholarship.

Entry deadline is July 19, 1972 and entries are to be sent to the Ochiltree County Chamber of Commerce in Perryton, Texas.

The contest will be held in the Perryton High School Auditorium at 8 p.m. on Saturday August 19, 1972.

Mrs. Leslie Schnauffer of Campo, Colorado is the current Miss Wheatheart of the Nation and is the daughter of Mr. and Mrs. Norman Schnauffer of Campo, Colorado. She is a senior student at Fort Hare State College at Goodwell, Oklahoma.

THE RED SOX LITTLE LEAGUE TEAM... consists of front row, left to right, Vicente Montreal, Kelley Green, Lonnie Neinst and Lynn Brown. Back row, coach, Jimmy Banks, Ray Van Bels, Kevin Kelley, Alan Bean, Dean Moore, Kevin Kiley and coach Phil Neinst. Not pictured are Bill Bellew and Michael McCarty.

Measurement Service

Eighteen crop reporters went to the fields to measure approximately 800 farms that had requested the crops be measured after planting. The ASCS office expects to complete the measuring service the early part of July.

Measurement service is requested and paid for by the producer and is guaranteed for certification purposes. Failure to correctly certify the acreage could result in the loss or part or all of the program payments.

Farmers are required to certify their crop and/or acreage no later than August 1st, but Richard O. Newman, county executive director for the Lamb County ASC Committee, stressed that the earlier a producer certifies, the earlier he receives his program payments.

After a producer certifies, his crop acreage are typed in coded form on a scatter document and mailed to the New Orleans Data Processing Center

where a computer figures the payment and writes the draft. The draft is then mailed back to the county office for signatures by local employees and then mailed to the producer.

The time lapse between when a farmer certifies and actually receives his payment is from 14 to 21 days. July 1 is the first possible date that the payments can be made.

For 1972 Lamb County has 1,094 participating cotton farms, 1,387 feed grain farms and 161 farms participating in the wheat program. The allotments and bases on these farms are 134, - 810 acres cotton, 270, 804 acres gain sorghum, 6, 587 acres corn, 1, 405 acres barley, and 1, 960 acres of wheat.

Enrollment In Summer School Shows Increase

According to Dr. Charles Sylvester, Registrar at South Plains College, total enrollment for the first session of summer classes at the college is 396 students. June 5th was the last day students could register for the first term of summer school at SPC. Last year's enrollment total for the first summer session was 390.

Students who wish to register for the second summer term may only do so on July 10 if they did not register for the term in June registration.

Courses being offered at South Plains College this summer include American History, algebra, mathematical analysis, freshman and sophomore English, speech, art, history, accounting, management, data processing, chemistry, zoology, economics, business machines, business and professional speech, photography, college math, American Government, bowling, sociology, drama, swimming, and trigonometry.

T-V-O courses are being offered over the entire summer include diesel mechanics, welding, radio and television servicing, vocational nursing, and two seminars-Agriculture

Technology and Drafting Technology.

Tuition for the summer session is \$4.00 per hour for in-district students (with a \$25.00 minimum for each semester) and out-of-district students pay \$4.00 per hour plus \$1.00 out-of-district fee. In addition there is a \$7.50 registration fee and a \$2.50 activity fee. Laboratory fees are also required for science, T-V-O programs, and certain physical education courses.

Summer schedules may be obtained from the Registrar's Office and students planning to register for the second summer term must do so on July 10. College residents halls are also open for the summer sessions.

OUR MEN IN SERVICE

PVT. DEITH A. PEASE

Ft. Polk, La. ... Army Private Keith A. Pease, 21, whose parents, Mr. and Mrs. William H. Pease, and wife, Brenda, live on Route 2, Muleshoe, Texas, recently completed eight weeks of basic training at the U. S. Army Training Center, Infantry, Ft. Polk, La.

He received instruction in drill and ceremonies, weapons, map reading, combat tactics, military courtesy, military justice, first aid, and army history and tradition.

Pvt. Pease received his training with company D of the 1st Brigades 1st Battalion H.

Another Call For VEE Vaccination

Hot, summer weather is on the way and mosquitoes are becoming active. This could be bad news to horse owners who have not vaccinated their animals for VEE (Venezuelan equine encephalomyelitis), the dreaded sleeping sickness spread by mosquitoes which killed so many horses last year.

"It's urgent that all horses, mules and donkeys that were not vaccinated last year be vaccinated as soon as possible," emphasizes Dr. James Armstrong, veterinarian with the Texas Agricultural Extension Service.

"Animals that were vaccinated during last year's massive vaccination program need not be vaccinated this year since immunity from the VEE vaccine appears to last about two years. However, if there is any doubt about whether or not the animal was vaccinated last year, by all means vaccinate again."

The Texas A&M University specialist hastens to add that there is one exception to the re-vaccination rule. "Foals that were vaccinated in 1971 when they were less than six

months old should be re-vaccinated."

In high risk areas such as Texas, the U.S. Department of Agriculture recommends vaccinating pregnant mares and foals under two weeks of age during the mosquito season. Studies are presently under way to determine whether there is any danger to mares or unborn foals if vaccinated during pregnancy.

Also, contrary to some earlier reports, tests in several states have shown that the vaccine does not cause brain or spinal damage in horses.

"If you have animals that require VEE vaccination, contact an accredited veterinarian as soon as possible and have him administer the vaccine," urges Armstrong. This year there is a charge for both the vaccine and the veterinarian's services.

Armstrong reminds horse owners to also vaccinate their animals against western and eastern strains of the sleeping sickness. This should be an annual vaccination. All vaccinations can be given during the veterinarian's single visit.

"Texas is still under federal

quarantine for VEE," adds the veterinarian. "Thus horses must have been vaccinated for VEE at least 14 days before being allowed to move across the state line. A vaccination certificate must accompany the animal."

Armstrong suggests that horse owners check their animals regularly for any signs of illness that might be an indication of VEE. At the onset of the disease, the animal loses its appetite, is depressed and has a fever. If any of these signs appear, a veterinarian should be contacted at once so that an accurate diagnosis can be made.

The veterinarian also recommends that horse owners spray their animals, especially those in stables or in confinement, for mosquitoes and other biting insects.

Does Happiness In Marriage Make A Happy Couple?

Some people believe that of all the millions of people in the world, two individuals are predestined for each other and will find supreme happiness in their union.

Others believe that providence has decreed a marriage for a purpose.

"These unscientific ideas about mate selection help us understand why many people are averse in finding in science an explanation to why people fall in love," said Texas A&M University family life education specialist Dorothy Taylor.

But, like all behavior, love and marriage are subject to observation and study, according to Miss Taylor.

The specialist said that some of the words used to describe marriages that seem to be working out well are difficult to pin down. One such word is "happiness."

"In common currency, happiness is a state of mind that carries a sense of pleasantness or excitement with it," the Texas Agricultural Extension Service specialist said. "There are two problems involved when we talk about the 'happy couple' or happiness in marriage."

The first is: when is happiness real and when does it only seem real? And secondly, what makes a couple happy?

Happiness isn't the same as satisfaction or adjustment. Many couples seem to lack much vitality in their relationship, but they appear and feel satisfied with it.

Other couples are quite dissatisfied with their spouse, but they're adjusted to the way things are, and wouldn't want

to change.

But what is it that makes a couple happy?

"This question poses problems for investigators," Miss Taylor said. "The happier a couple is, the less they seem to stop and think about it. There may be a number of different and complicated formulas for the success that makes a couple happy."

"They depend on the partner's needs, abilities and ideals, and the combination of these that they work out in their relationship. The 'flavor' is easier to notice than the recipe that contributes to making it."

She said that communication is important. How can couples fulfill each other's needs or wants without knowing what they are, and without having the skill to find out? How can they decide together what to do, unless each can express differences about what each expects and how strongly each feels?

How can couples work out solutions to problems unless each can tell the other honestly what he feels he can or cannot do about them? Communication is at least a strong and necessary start for building a relationship.

But couples may refuse to communicate because one or both don't feel capable of answering the other's real needs. And they may be right. That's the risk of learning what another wants.

Beyond communications lies also the question of what interests or common concerns couples really have for building a "partnership," Miss Taylor said. "Since children are an assumed common interest, to what extent does each spouse share the interest, or feel that they have an investment in their children?"

Is there any interest in one another's work? Are any civic, religious or social interests

shared? In any relationship, these interests may shift and a relationship can gain or lose vitality as couples move into new areas of interest.

"In marriage," Miss Taylor said, "a couple's happiness in some ways grows out of what's happening in their mutual interaction. Yet there isn't a relationship in which 'doing together' or being in step together can be taken for granted. Whatever happiness means, it comes from partnership in which both persons are active, whether they think about it or not."

a scapegoat. The whole basic premise is that drugs cause bad things to happen. Sometimes they do, but often it is the other way around: bad things cause drugs to happen. Fortunately, the "Richie" tragedy is an extreme case. His story is not being duplicated in every neighborhood across the country. But, unfortunately, almost all publications and films dealing with drug abuse use similar case history stereotypes which predispose us to act incorrectly in drug education.

by PETER G. HAMMOND
Executive Director, National Coordinating Council on Drug Education

"Shut your door, bolt and latch it, here comes Lizzie with a brand-new hatchet."

The story of Lizzie Borden killing her parents has mellowed through the years; but the horror still remains, even in a comic song. The structure of Lizzie's motives probably lies deep in the psyche of every human being. However, when the story hit the press, who would or could listen to the rationale of a psychologist? There was only horror.

Life Magazine recently printed a story about Richie, a teenager who, in a melodramatic Lizzie-in-reverse scene, is killed by his father. Horrible? Yes. But, ironically, some people may think they find him easier to understand than Lizzie because he used marijuana and secobarbital. "Why bother with a study of complex motivations," they might ask, "when drug-using is the obvious cause."

Actually, drug-use may be

Knitting Expert Joins Cotton Inc

Snook has joined the Cotton Incorporated Technical Service Center and Cotton Incorporated research, sales and marketing company of cotton growers, as a textile technologist. He will conduct warp knitting research aimed at winning for cotton a share of expanding new markets now dominated exclusively by man-made fibers.

new Cotton Incorporated product development laboratory. The laboratory will house over \$400,000 worth of sophisticated knitting machines for cotton research. It will be part of the Cotton Incorporated Research Center, now under construction. Occupancy is scheduled for summer, according to Director S. Frank Moore. "We are pleased that we can place the name of John Snook alongside those of Dr. David Black and John Woodhead as the men who will do important research on cotton knitting,"

Wooters said. A native of East Orange, N. J. Snook was reared in Charlottesville, Va., and is a graduate of Lane high school there. He took his B.A. degree in mathematics at the University of Virginia there and his M.S. Degree in textile engineering at Charlottesville's Institute of Textile Technology. Snook is married to the former Lynn McSweeney of Charleston. The couple has a daughter, Julie Lynn.

THE MIGHTY METS LITTLE LEAGUE for this season are left to right, front row, Britt Pounds, Cary Sawyer, Glenn Hausmann, Kelly Peels and Jimmy Robbins. Standing are James Ha-son, Carlton Gregory, Jeffery Washington, Allen Moore and Lexie Fennell. Coaches are Neil Pounds and Guy Davis.

Wayne Morse made the longest continuous speech in the Senate's history when he talked against the Tidelands Oil Bill on April 24th and 25th in 1953. He spoke for 24 hours 19 minutes before resuming his seat!

Pesticide Levels In Foods Must Be Checked

Consumers concerned about pesticide levels in food products can be assured that major food items are checked regularly for chemical residues. That's one of the jobs of the Food and Drug Administration. The surveillance is a continuing effort to provide consumers with the most wholesome food products available anywhere in the world, says Dr. Jack Price, leader in agricultural chemicals with the Texas Agricultural Extension Service. The Texas A&M University specialist points out that, to date, pesticide residues continue at a level below the legal tolerances established for food. During the period, 1964-70, residues of most pesticides present in food samples studied by the FDA were substantially below limits established by committees of the World Health Organization and the United

Nations. Most recent findings reported by the FDA cover the period, June, 1968 to April, 1970. The kinds and frequencies of chlorinated organic pesticides did not differ much from values obtained during the previous two-year period. Levels of DDT-type materials have declined; however, organic phosphate pesticide residues have occurred more frequently in recent years.

Regarding the surveillance technique used by the FDA, Price explains that a market basket of 117 food items is obtained from a random selection of retail food stores. Each basket represents a two-week diet for the 16 to 19 year old male who makes up the age group reportedly consuming the greatest quantities and kinds of foods. Food baskets are purchased bimonthly in different cities within five geographic regions in the United States. Thus a total of 30 baskets are checked annually.

After the purchase, foods are prepared for consumption and divided into 12 classes of similar foods, such as fruits, leafy vegetables, beverages and meats. They are then analyzed for pesticide residues. Levels of residues on raw agricultural products are generally much lower than safe tolerances established under the Food, Drug, and Cosmetic Act, notes Price. Most residues that are detected are at very low levels and only about three percent exceed FDA tolerances or guidelines.

The dietary intake of pesticides as measured by FDA investigations is a final check which shows that the tolerance

and control system for pesticides in the U.S. is effective, adds the specialist.

Outdoor Carpet Confuses Consumers

Outdoor carpet. Indoor carpet. Outdoor/indoor carpet. Kitchen carpet. It's enough to confuse anybody.

Why is there such confusion about types of carpeting available? Just exactly what do these terms mean? Which is what and which is good for what?

"If your head's in a whirl from trying to sort out all the information and misinformation about the new carpet's wearability, minimal cost and effortless upkeep, it's a small wonder," said Pat Bradshaw, housing and home furnishings specialist at Texas A&M University.

"The term 'indoor/outdoor' carpet is misleading," she said. "It implies that one kind of carpet can be used both indoors and outdoors, but there's no single carpet with built-in characteristics that make it desirable for both uses."

The specialist said that it's a mistake to assume that the characteristics which make a carpet practical for outdoor use will make it even more practical indoors.

Let's take a closer look. Outdoor carpet is constructed differently from indoor or kitchen carpet and has different properties and different maintenance problems. An outdoor carpet has definite re-

quirements. To qualify for outdoor use, a carpet must be made of 100 percent synthetic fiber that's resistant to moisture, sun, soil, mildew and pests. Solution-dyed polypropylene olefin and acrylics meet these requirements best and are the most-durable fibers.

Some outdoor carpet is flocked with nylon, which has the highest abrasion-resistance of any fiber. But since nylon can't be solution-dyed, it's apt to fade. "The construction of the carpet is as important as the content," Miss Bradshaw claimed. "It must be made so that drainage is possible during wet weather and cleaning."

Most outdoor carpet is made by needlepunch construction. The result is a felt-like, non-resilient mat similar to carpet underliners. Liquids penetrate rapidly and drain right through the carpet. An outdoor carpet must never have a foam or sponge backing because such a backing would be unable to withstand the elements and would eliminate the possibility of drainage, according to the specialist.

Tufting is another type of construction used to make outdoor carpet. Both polypropylene and acrylics are used. "Tufted carpets are aestheti-

cally more pleasing than those made with needlepunch construction because they look less like mats and more like traditional pile carpeting," Miss Bradshaw said. "But the relatively non-porous latex backing can turn a carpet into a water trap after a heavy rain or a thorough 'hosing down.'"

She said that a new set of standards is needed to evaluate outdoor carpeting fairly. First, it must be viewed within the proper form of reference--the outdoors.

"When used as originally intended, outdoor carpeting is a long-wearing, economical utilitarian product. It could also be considered a luxury item, in that it's softer, warmer and more attractive than what it replaces."

Care of outdoor carpet is relatively simple. Regular vacuuming (except when wet), quick attention to spots and stains and periodic "hosing down" should keep it in good condition.

Do You Have A Sense Of Humus?

"Humus unlocks the food value in soils and makes fertilizers available to the plant." So says one Texas Agri-business expert.

Another put it: "Fertilizing without humus is like planting without plowing. The soil needs processing before it can produce, fertilizers need humus to make the nutrients available to the plants."

Experts may disagree on how to express it, but they generally concur that humus is the circuit between fertilizer nutrients and the plants. Consequently, in soils weak in organics or humus, plants grow slowly and produce weak roots and have a shallow color. These plants usually are poor in nutritional value. Now that humus is available in concentrated liquid form so easy to handle, and inexpensive--every gardener, farmer and rancher needs a "sense of humus."

For example, a 1971 Demonstration Report from Texas A&M involves four types of tomatoes. Those treated with a product named "Energizer" (a concentrated liquid humus) produced in excess of 3% more pounds of tomatoes than those harvested without. A solution of 8 tablespoons per gallon of water was used.

Actually, humus is the most stable portion of soil organic matter and is a dark brown or

black residue found coating the mineral soil particles. It is the ultimate result of the decay of organic matter such as leaves, bark, rotted branches and the like.

It is especially present in peat bogs and has been used in a semi-decayed form like mulch, but this sort of treatment had two drawbacks; a great deal of mulch was needed; and its humic acids were not immediately available for interaction between fertilizers and plants.

As a result, it was bulky to work with, and the benefits to plants were not so great.

With concentrated liquid humus, however, there is very little weight or waiting. It's available in plastic bottles, cans and drums--is used in a highly diluted form--and gives immediate results.

Healthier, more productive plants result when they are treated with "a sense of humus."

Your local Garden Supply dealer or County Agent can supply information about liquid humus.

What Do You Know About Your Teeth

How much do you know about your teeth? If you're like some of the people, some of the answers to these questions on dentistry will surprise you. Go ahead and test yourself with this dental health quiz, prepared by the Texas State Department of Health.

What are the two most common causes of dental disease? What causes these two diseases?

3. True or False: Most people are bound to have tooth decay, no matter what they do.
4. True or False: Once a toothache has stopped hurting, the decay has healed itself and no longer needs professional treatment.
5. Most people lose their teeth naturally by the age of:
 - a) 65
 - b) 55
 - c) 45
6. True or False: Brushing Your teeth two or three times a day with the right toothpaste, is all you have to do to prevent dental disease.
7. When should an adult make his first visit to the dentist?
 - a) When he has a toothache.
 - b) When a tooth becomes loose.
 - c) When gums become sore or loose.
 - d) Right now.
8. When an adult visits the dentist for the first time, what will the dentist do?
9. At what age should a person get dentures?

The correct answers are listed below.

1. Dental caries (tooth decay) and periodontal (or gum) disease are by far the most common dental diseases.

2. Bacteria, which are always present in the mouth, live on the sugar in the foods and drinks you consume. The bacteria produce acids which eat away the tooth, and they irritate and infect the gums. If the bacteria remain undisturbed, they stick together in gooey clumps called bacterial plaque. The plaque holds the acid against the teeth and traps debris along the gum line.

3. False. Although almost everyone does suffer from dental disease, virtually all tooth decay and gum disease can be prevented by simple techniques to remove the bacterial plaque from the mouth.

4. False. The teeth are among the few parts of the human body which with very minor exceptions do not heal themselves. A toothache indicates that decay has penetrated through the enamel to the softer material inside. If a toothache stops hurting, usually the nerves in the tooth have been destroyed.

5. The only time people lose their teeth "naturally" is when their baby teeth are replaced with permanent teeth, usually by the age of 15. The permanent teeth should last the rest of their lives.

6. False again. No matter how often you brush your teeth, it will do little good unless all of the bacterial plaque is removed. This means, first, the brushing must be careful and thorough—not just a quick thirty

second job. Second, no tooth brush can reach the hidden sides of the teeth. Dental floss must be used to dislodge the plaque from the sides of the teeth, where most decay begins.

7. If you wait until a tooth is loose, or until your teeth or gums hurt, it is too late. In the long run it is a lot less expensive to have regular dental check-ups to prevent dental disease.

8. He may do any of several things. Most dentists begin with a thorough cleaning of the teeth. Next comes a careful examination of the mouth. X-rays may be needed to detect hidden decay. He may apply a fluoride solution to help resist decay, or a special plastic seal-and to the tops of the back teeth where food debris often gets caught in tiny pits and fissures.

9. Never if he can possibly avoid it! Some people think artificial teeth are better than real ones because, after all they can't decay. Actually a set of dentures is like an artificial leg; better than nothing, but not nearly as good as the real thing. One major problem with dentures is that no matter how well they are made, with age the gums and underlying bone continue to recede. Thus, after a while the dentures become loose. Eventually the entire denture must be replaced. If

the dentures are ill fitting they can cause pain, discomfort, poor diet, and embarrassment. Real teeth are better by far—if you keep them clean and healthy.

How well did you do? If you answered fewer than five questions correctly, you may be one of the millions of Americans who are virtually "dental cripples"—whose teeth and gums hurt much of the time, who have trouble eating foods they enjoy. Not many smiles for you. If you answered six or seven questions correctly, you may need a little "brush-up" course from your family dentist. Don't lose your pretty smile. If you answered eight or nine questions correctly you ought to have a big, bright smile all the time.

Grade Level Children Must Be Immunized Against 5 Diseases

When the school bells ring this fall, Texas school children will be among the best-immunized in the country.

The reason, according to State Health Commissioner Dr. James E. Peavy, is the state's compulsory immunization law.

Under the regulations, grade level children (and those attending day care centers) must be

immunized against five communicable diseases—diphtheria, tetanus, poliomyelitis, measles and rubella. Measles immunization is not required if there is a history of measles illness. And smallpox, which originally was a required immunization, was removed from the list by the State Board of Health, which sets immunization guidelines for the schools.

Junior high school, high

school and college-level students have lesser requirements for immunizations, said Dr. Peavy.

The Health Commissioner noted that immunizations should have been started by last January 1 and must be completed, according to age levels, before starting to school this fall.

"I feel that almost all school children will have completed these requirements," said Dr. Peavy. About the only misunderstanding in the regulation was in the college level, he said. "If a collegian is 19 years of age or over, the only requirement is for the adult type tetanus-diphtheria immunization, or a booster shot within the past 10 years."

Dr. Peavy said local health units throughout the state contributed toward meeting the large demand for immunizations, and private physicians have boosted the total. In 1971 almost 4.5 million doses of vaccine were administered to Texans during regular local health unit clinics and special campaigns.

Dr. Peavy said the immunization law is a good one—one that had been needed for a long time. It forces parents to protect their children and in so doing protect themselves, their friends and relatives from these preventable diseases.

"We are anxious to have children immunized long before they start to school," said Dr. Peavy. "In fact, they should start in the first year of life," he said.

"I feel that the immunization results will be reflected in the preventable disease total," said the Health Commissioner. "From past experience, we have seen a steady decline in preventable diseases—except venereal disease," he said.

Dr. Peavy said it was imperative that the very young children receive immunizations since a lot of diseases appear in those two years of age and younger. "The best prevention is early immunization," he said.

Dr. Peavy said there has been good cooperation from everyone concerning the mandatory immunization law, which has co-sponsorship of the Texas Medical Association.

The law even allows exclusions from compliance for religious reasons, or where a physician licensed by the Texas Board of Medical Examiners feels that immunizations are medically contraindicated.

Many school districts had varying immunization requirements, but none were standard. "Some just had smallpox, while others required several

immunizations. Now, however, they will be uniform throughout the state," said Dr. Peavy.

All schools will be required to maintain records of the immunization status of individual students, and this is a king-size job. Total registration for special education, kindergartens and grades one through 12 is expected to surpass 2.8 million students. Of these, almost a quarter-million will be entering first grade.

The end result of the mandatory program will be reflected in better health for all Texans, a goal of the State Health Department in its immunization program, said Dr. Peavy.

FOR THE COOLEST PARTY YET, OFFER GUESTS ICED TEA AS WELL AS COCKTAILS. A LOT OF PEOPLE DON'T DRINK THE STRONGER BEVERAGES AND WANT SOMETHING MORE ADULT THAN SOPA TO SIP.

Williams of Route 1, Sudan, is a member of a specially trained group which completed expansion and modification of the "Eklund Biological Center," designed to improve research in marine biology at the McMurdo Station on the Ross Sea in the Antarctic.

He is a former student at Littlefield Public Schools, Littlefield, Tex.

Lost Birth Certificate Poses Less Problems

A lost birth certificate or marriage license no longer poses the problem it once did for veterans seeking veterans benefits, Jack Coker, Veterans Administration Regional Office Director, reports.

Less formal proof of marriage and birth are now acceptable, under a regulation initiated

last October, when this information is needed to establish claims for higher benefit payments.

A veteran's or a widow's certified statement of marriage is now sufficient for applications for compensation and education benefits for veterans, widows, and orphan children, provided

neither he nor his wife has been married before, and VA has contradictory information on file.

Coker said prior to the new regulations, VA required statements of marriage births to be supported by formalized documentary evidence.

A certified statement acceptable also regarding birth of a child of a veteran marriage, and as proof of relationship, he added
