

# MEMORIAL DAY

Nosin...

With Polly

Have you heard this new song, entitled "You're Hanging Your Coat in Some Other Closet"? I'm listening to it for the first time, as I write this old weekly malarkey that takes up space on the front page, causing less room for something else worthwhile...

NOSIN'

Back in the stone age days when I was an offspring growing up in that foreign country, (Oklahoma), I recall we always looked forward to that very first day of May. So we could go barefoot... Well, believe you me, in this country the temperature changes so fast and so frequently, one might get frost-bitten toes if he wandered too far away from the old home or if some one closed the door in his absence, he wouldn't stand a chance; before he could possibly open the door, he'd be suffering from frost bite, double pneumonia and exposure, plus.

NOSIN'

We have no other choice, folks... justice must be first and foremost in the minds of our fair city of Earth. The high principles, "Do unto others as you would have others do unto you" must be upheld. We must be fair... We can't have two nice fine self-pitying, unhappy, overworked, underpaid, unnoticed and unsaluted welders in this city going without recognition... So we proudly join the Earthites in loudly proclaiming "Earth Welder's Week, May 26-31".

NOSIN'

Heard a couple of weeks ago Pat McCord was giving Mrs. A. C. Barton quite a lot of ribbin' about her grandkids "hoggin' up" the front page of ye olde Earth News, as there were four individual photos of her grandchildren, all of whom merited the front page...

All I can say to this, Mrs. Barton, is just throw your chest out and be thankful as I'm sure you are, when we carry four of your grandchildren's pictures all with outstanding honors in academic achievement, then not only you are proud... the whole town shares your joy. (And doing so well in school, I'm sure they all have their grandmother's traits, just go ahead and be real proud.)

S.O.S.-

## Swim Pool Opening Delayed

Mayor Marcus Messer reports that the opening of the City Swimming Pool has been delayed due to the problem of obtaining senior life guards. A number of applications for a concession stand manager have been turned in, but the pool cannot be opened until a senior life guard is obtained.

Messer said that if a full-time lifeguard couldn't be obtained for seven days a week, that plans are to hire two lifeguards to work 3 1/2 days each, but until qualifications are met, the pool will remain closed.

## DARLYNNA MORRIS IS GRADUATED FROM WT MAY 26

Darlynna Morris, daughter of Mr. and Mrs. W. R. Morris, graduated Sunday, May 26, from West Texas State University with a BS Degree.

With a major in elementary education, she plans to teach in the fall.

During the summer, she will be working at the Girl Scout camp in Amarillo as counselor, beginning June 2.

Darlynna is a 1960 graduate of Springlake High School.

1963 GRADUATING CLASS OF SPRINGLAKE HIGH SCHOOL... Receiving diplomas Friday night at Commencement exercises were: Left to right, back row: Bill Chaney, James Garrett, Jim Stockard, Troy Layman, Don Sanders, Victor Coker, Boyd Clayton. Second row: Thomas Bryant, Gary Latham, Eddie Townsend, Jimmy Smith, Gayland Stephens, Don Johnson. Third row: Steve Holt, Janice Cowley, La Don Messer, Carolyn Gregory, Linda Oden, Irene Angeley, Barbara Barlow, Dale Dent. Front row: Janet Cooper, June Taylor, Edith Crocker, Myrna Rudd, Wanda Jenkins, DeAnn Adrian and Jane McCord.

AWARD RECIPIENTS---These five 8th grade students were presented awards at Commencement exercises Friday night. Left to right, Rafael Rodriguez, Citizenship; Joan Dawson Valedictorian; Cynthia Busby, Salutatorian; Debbie Barton, Best All Around Girl and Logan Armstrong, Best All Around Boy.

## Churches Set Vacation Bible School Dates

Vacation Bible Schools are due in the month of June for the Earth First Baptist Church and the Church of Christ of Earth.

The Methodist Church School began May 25 and complete details will be printed later.

Vacation Bible School Preparation Day at the Earth First Baptist Church is set for June 1, beginning at 2:30 p.m. A street parade with cars, floats and firetruck will herald the beginning of Vacation Bible School, scheduled for June 3-12.

Commencement will be at 7:30 p.m. June 12 in the church auditorium.

Officers are M. B. Baldwin, principal, M. E. Kelley, associate and Mrs. Richard Stockstill, general secretary.

Department workers are Mrs. L. K. Anderson, nursery for infants of workers; Mrs. Guy F. Kelley, beginners; Mrs. Chas. Parish, Primary I; Mrs. Claude Holder, Junior I; M. B. Baldwin, Junior II; Mrs. Rex Clayton, Intermediates; Mrs. Leon Foster, refreshments and Mrs. Paul Woods, Bible School nurse. Classes will be available for those ages 3-17. Every child is invited to attend.

The Earth Church of Christ Vacation Bible School has been scheduled for June 24

through June 28. Theme of study will be Building Attitudes. L. R. Sparks, pastor of the McAllen Church of Christ will teach the adult class and Bill Phillips, pastor of the Springlake Church of Christ will teach the teen-agers. Younger children will be divided into classes to be taught by members of the church.

Texas Tech plays six football games at night next fall, with Washington State, Texas A&M, Texas Christian, and Baylor in Lubbock, with Texas Western at El Paso, and with Texas in Austin.

## Betty Parsons Office Nurse For Dr. Holt

Mrs. Betty Parsons has been employed as office nurse at Dr. W. D. Holt's office, filling the vacancy created by the resignation of Mrs. Mary Jane Wheat.

Mrs. Parsons, beginning the new job May 13, has previously served as office nurse at Holt's office. Mr. and Mrs. Parsons are the parents of two children, Gary and Mickey.

Two members of Texas Tech's 1954 Gator Bowl championship football team, end Claude Harland and center Dwayne West, now operate a flying service in Lubbock.

## Car Wash June 8 At Gulf Station

Members of the Psi Nu Chapter, Beta Sigma Phi, will have a Car Wash Saturday, June 8 at Wayne Jackson's Gulf Station.

Proceeds will be used toward the purchase of an ear-testing machine to be used in the office of Dorothy Wood, Springlake School nurse.

Everyone is asked to bring their dirty cars to the Gulf station Saturday, June 8.

Washington State appears on Texas Tech's football schedule for the first time when the Cougars engage the Red Raiders in Lubbock September 21.

TOPS IN 8th GRADE CLASS---Cynthia Busby, left, gave the Salutatory speech and Joan Dawson, right, presented the Valedictory address Friday night at the Commencement exercises in the Springlake School Auditorium.

## Springlake Dogs Become Victims of Poisoner

A wave of dog-poisoning in Springlake has been reported with approximately 15 or more dogs dying from an undetermined source last week.

Strays, mongrels and a number of pets have died as a result of this poison.

Parents are urged to watch their children closely, as a small child may innocently

swallow the deadly drug. Mrs. Bud Matlock reports that her children lost two pet dogs, who died agonizing deaths. A family pet of the Jim Stephens family was also a victim.

Any suspicious meat or candy found in yards should be turned over to law enforcement officers.

## Sixty-six Students Graduate Thursday Night From 8th Grade

"One Step at a Time, But Always a Progressive Step" served as the basis for the 8th grade commencement exercises Friday night at the Springlake School auditorium.

The class, numbering sixty-six members is the largest class ever to graduate from the Springlake Schools.

The class processional was followed by the invocation by Chris McClure.

The Salutatory address was given by Cynthia Busby.

The class song, "Moments to Remember, Vaya Con Dios, and Graduation Day" were sung by a group of 8th grade girls.

Lonnie Whitford read the class will, followed by the class history, narrated by Karen Jones.

Many 8th graders were surprised as a number of baby pictures were flashed on the screen. Karen identified the infants and remarked on each one. Mothers sure can keep secrets, as was discovered by some of the stars.

A poem, "Alumnus Football" was read by Logan Armstrong. C. L. Berry, principal, presented awards to the following students, Logan Armstrong, Best all-around boy; Debbie Barton, best all-around girl; Rafael Rodriguez, citizenship; Cynthia Busby, salutatorian, and Joan Dawson, valedictorian.

Sponsor for the Citizenship trophy was Springlake Elevator and the Town and Country Study Club sponsored trophies for Valedictorian and Salutatorian.

Gifts were presented to C. L. Berry and Cecil Slover by Anita O'Hair.

A poem entitled, "Our Poem" was read by Debbie Barton.

The Valedictory address was presented by Joan Dawson.

Bill Mann, superintendent presented the diplomas.

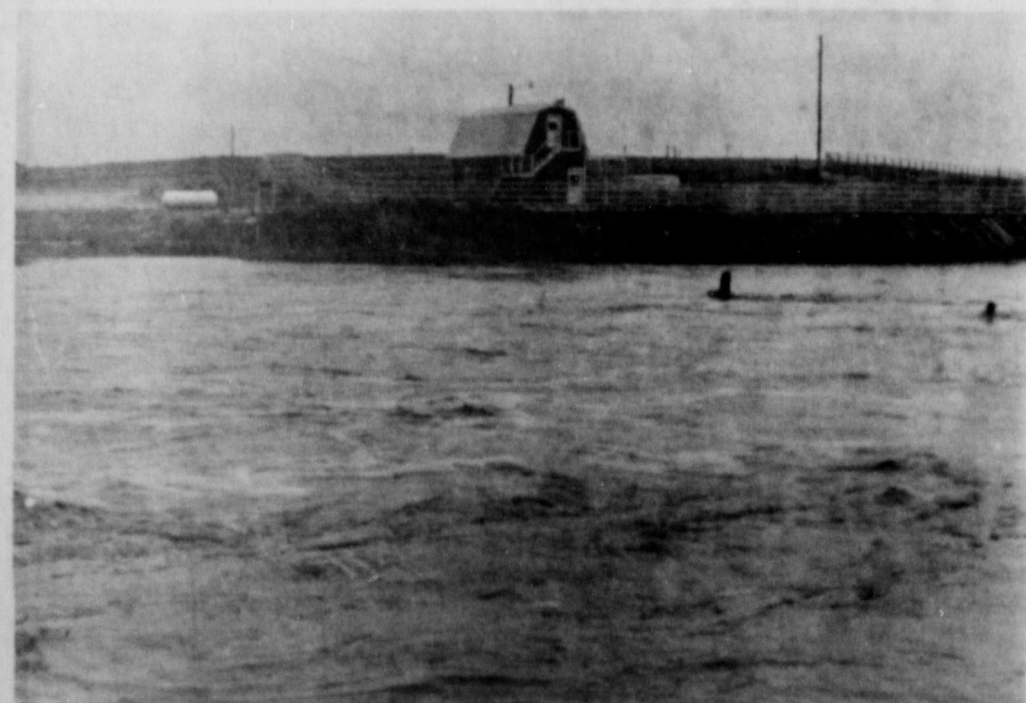

The Benediction was led by Steven Mann.

The Processional and Recessional were played by Becky Parish, pianist.

The Old Timer

"The sage who said, 'Go West' never had to figure out how to do it on a cloverleaf intersection."

AND THE RAINS CAME, and within minutes, the area looked mighty like a river. Bar ditches were swollen with swiftly moving water hurrying and splashing along after flooding the fields of newly planted cotton, resulting in severe crop damage. This photo was taken in the Sunnyside community, Wednesday morning, May 22, following the severe Tuesday night hail and rain storm.

## Future Of Cotton Hangs In Balance With Defeat Of Wheat Referendum

Since the defeat of the 1964 proposed wheat referendum, many are asking this question: "Will cotton be next to drop controls?"

Lamb County with 185,000 acres planted in cotton in 1963 and boasts a record production in 1962 with 226,000 is the second largest cotton county in the nation.

In the decrease of 10,000 acres for the county in 1963, farmers have been offered, in exchange, an increase which averages about three cents in the past three years.

The past three years have seen cotton take a loss on the world fibre market in which the higher price of cotton is blamed. A 5% loss by cotton

in the world market has occurred in the past four years, reported the International Cotton Advisory Committee.

Farm program critics have charged that cotton has been priced out of competitive position by the high support price, among them being the American Farm Bureau Federation, credited with a star part in defeating the wheat referendum.

If cotton controls are dropped, farmers on the South Plains may go more heavily into cotton production. Specialization in crops is predicted for large scale farming in the not too distant future.

Wilmer Smith, vice-president of the Plains Cotton Growers, reported a six point program to

# News Of Interest To Women

President Tyler saw himself burned in effigy before the White House.

Martin Van Buren was the first President born in the USA.

## Gregory-Stephens Engagement Told

CAROLYNE GREGORY

Mr. and Mrs. Carl Gregory of Earth announce the engagement and approaching marriage of their daughter,

Carolyn Jolene, to Gayland Wallace Stephens, son of Mr. and Mrs. John L. Murrell, also of Earth.

The wedding is scheduled for 8 p. m. June 28, in the First Baptist Church in Earth. The public is invited to attend.

## Study Club Installation At Plainview

Members of the Altrui Junior Study Club met Thursday night at the Congress Inn at Plainview for installation of officers.

Following the dinner, Mrs. Eugene Lee, installing officer, presented each of the following officers, a token of their office.

Mrs. Belew, president; Mrs. V. J. Sigman, vice-president; Mrs. Charles Dunn, secretary; Mrs. Bud Elmore, corresponding secretary; Mrs. Clinton Green, treasurer; Mrs. Bobby Green, press reporter; Mrs. Carroll McDonald, federation councillor.

Mrs. Belew presented the outgoing president, Mrs. McDonald, with a past-president's pin and gift. Secret pals were revealed and drawings were held for next year's secret pals.

Mrs. V. J. Sigman was chairman for the installation arrangements.

Those attending were the Mrs. Bob Belew, Gary Bulls, Charles Dunn, Bud Elmore, Lynn Glascock, Earl Jordan, Cecil Maddox, Darrell Sawyer, V. J. Sigman, Charles Cagle, Carroll McDonald and Eugene Lee.

Georgia is the largest state east of the Mississippi River.

THE MAN BEHIND THE SUCCESS---Cecil Slover, 8th grade co-sponsor, teacher, friend, advisor, with in many hours of planning, work and concern behind him, smiles as another graduation comes to an end. Much credit is due this well-liked faculty member toward the outstanding success of a well planned program.

## PRODUCTS PARTY IN KASINGER HOME WEDNESDAY

Mrs. George Kasinger was hostess Wednesday afternoon, May 22, at a Stanley party held in her home. Refreshments of coffee,

punch and cookies were served. Eight ladies were present. Mrs. Tena Davis, Muleshoe, was demonstrator.

Mr. and Mrs. C. E. Gatlin of Meridian visited over the weekend with Mrs. Leta Kelley and girls.

### CORRECTION

Two ladies, serving as hostesses for the Belinda Hendon bridal shower, were omitted from the list in last week's issue. This was an unintentional error. Our apologies to Mrs. Crill Bulls and Mrs. Ervin Anderson.

Little Ricky Cal Hooley's great-grandmother is Mrs. Lucille Henderson, of Earth.

The Butantan Institute near Sao Paulo, South America is a snake farm where snake bite serum is produced.

The District of Columbia was named in honor of Columbus.

The Junior G A's were in charge of the program.

A costume play, directed by Jill McCord told the history of WMU and GA work. Cake, decorated in GA colors, was served with punch to approximately 40 persons.

The Senate Agriculture Committee which growers believe will save the industry.

Growers favor a one price system in which payment-in-kind certificates go to the last handler on domestic sales as they do now on export sales.

An acreage-price choice for farmers "if it is not an insurmountable obstacle" to the PIK Plan.

Maintenance of the loan at the producers price support level each year.

Maintenance of the national marketing quota and acreage allotment at the highest possible level.

Valuation of PIK certificates to eliminate the domestic-world price difference.

And development of a formula to reduce loans and subsidies that is geared to the success of the program as evidenced by increased consumption and expanded acreage.

The future for the cotton industry may have been forecast as a result of the March 21 defeat of the proposed wheat referendum.

## Susann Davis Is Initiated Into Sorority

Miss Susann Davis, daughter of Mr. and Mrs. Eldon Davis of Earth, was recently initiated into the sisterhood of the Delta Zeta Social Sorority at West Texas State College.

Miss Davis, a junior student at WT, attended Springlake High School.

## WMU Sponsors Tea At Church

The WMU ladies entertained the Golden Age group, GA's and their mothers with a tea, Tuesday, May 14 in the dining room of the Earth First Baptist Church.

## THE LIGHT THAT NEVER FAILS

In addition to adding charm to any area, an outdoor Gas Light is an inexpensive guard for your home at night. Prowlers and vandals stay away from lighted places, and Gas Lights provide the light that never fails.

## Fifty Years Of Marketing

May marks the 50th anniversary of organized marketing service to farmers, industry and consumers and the U. S. Department of Agriculture is planning a number of special events to highlight the occasion.

The Department's first marketing agency, the Office of Markets, preceded the present Agricultural Marketing Service but was not the first market service performed by them. For example, the collection of statistics was done before the 1913 origin of the agency.

Events planned for the celebration include a month long exhibit in the Patio of the Department's Administration Building in Washington, D. C. Field offices of the Agricultural Marketing Service will sponsor other events during the rest of the year at many locations across the nation.

Private marketing agencies are also expected to participate in the commemoration. The AMS will issue in May an anniversary edition of its monthly magazine, AGRICULTURAL MARKETING, and special folders and brochures will also be issued to mark the event.

These information materials will trace the development of this country's marketing system during the past 50 years. It will outline the contributions to that development made by the Department's grading and market news services, marketing research, food distribution and regulatory services. It will also point out further improvements in marketing that can be expected in the years ahead.

## How Is Dual Grading Doing?

Dual grading, the new controversial system for grading beef carcasses, has now been in effect since July 1, 1962.

The system made available on a trial basis to the packing industry provides separate grades for two of the main factors that determine the value of a beef carcass, says Ed Uvacek, extension livestock marketing specialist, Texas A & M College. These factors are the quality or palatability of the meat and the amount of trimmed retail cuts obtained from the carcass.

A look at how the new system is being accepted reveals that about one-half of the commercially produced beef from July 1, 1962 to February 28, 1963 was federally graded and 3% of this amount was graded under the dual specifications, says Uvacek. This was about 1% of the 10 billion pounds of beef produced in the U. S. during the period, he adds.

The specialist notes that the lower quality grading carcasses tended to have higher yield grades. He found that 80% of the Choice carcasses had yield grades of 2 or 3 while 95% of the Goods and 98% of the standards fell in this yield grade.

About 90% of all the beef dual graded was classified into the U. S. Choice or Good grades and nearly twice as much fell into the first grade as into the second.

Since dual grading has been used very little so far, an accurate picture of the system can't be shown but we can get an idea of how it operates, Uvacek points out. The most important aspect of the system is the effect it will have on prices and this is yet to be measured, he said.

**FIRST CHILD GRADUATES. . . MAMA CRIES**—Mrs. Buddy Adrian was chosen to present a skit entitled "How Mother acts when her first child graduates." You're right, she cries. . . and Mrs. Adrian is a natural for the skit, her first child is graduating. This crying bit probably comes natural to this Mama, (or she has done it quite often in secret). Seated beside Mrs. Adrian is Dr. W. D. Holt and Mr. Adrian.

## Party Line

Visiting recently with Mrs. L. H. Randolph were her son, Mr. and Mrs. Fred Randolph of Sundown. Spending several days were her brother, J. R. Stubbiefield, Amherst & great-grandson, Nat Baker of Lubbock.

Mrs. J. C. Robbins shopped in Lubbock May 18 and visited her son, Charles Wayne and her sister, Mrs. Virginia Duncan.

Mr. and Mrs. Charles Miranda and family, Little Rock, Arkansas, visited recently with her parents, Mr. and Mrs. G. L.

Runyon. Their granddaughter, Mrs. Steve Hotary and baby were house guests last week. Buddy Free, Mrs. Runyon's brother, of Coleman, spent Tuesday night.

Mrs. Minnie Price attended the Canyon High School Commencement exercises Friday night. Her grandson, Davis Bordan Price, delivered the Valedictory address. She also attended Baccalaureate services May 19 at Olton High School, where her granddaughter, Linda Price was a 1963 graduate.

Mrs. R. K. Fennell underwent major surgery May 13 at Taylor Clinic, Lubbock. She was dismissed May 18 and is reported doing well.

**HOW DEEP IS THE WATER MAMA?** . . . Looks like two feet deep and still rising, on this road to Springlake School. Anyway, it was deep enough to prevent traffic to and from school, Wednesday, May 22, allowing students a day's vacation and thus postponing final exams another day.

## Party Line

Mr. and Mrs. Frank Floyd of Floydada spent Wednesday afternoon May 22, visiting with Mr. and Mrs. Elmer Prather.

Mrs. Edgar Britt of Tatum, N. Mexico, visited her mother, Mrs. Minnie Price, over the weekend.

Mr. and Mrs. Bill Price visited in Mangum and Hollis, Oklahoma over the weekend.

Mrs. Ollie Steele, Mountainair, N. M., Mrs. Ann Hodge and Mrs. Minnie Price recently visited the old home place in Fannin County. They attended a reunion of their friends and former schoolmates, the youngest being 71 and the eldest 84. Mrs. Lucille Price chauffeured them.

Truman Stine and Eddie Haydon fished at Buffalo Lake last Wednesday.

Spending Sunday in Borger at the David Staggs home were Mr. and Mrs. Hollis Hooten, Lubbock; Mr. and Mrs. Haskell Hooten and family, Borger; Mrs. Alfred Little and Patricia, Borger; Mr. and Mrs. Larry Jarrett and Brandon, Lockney; Mr. and Mrs. Bill Mitchell and sons, Neosho, Missouri; Mr. and Mrs. O. T. Loftis, Kress; Mr. and Mrs. R. C. Hooten and Mr. and Mrs. L. E. Sloan, Earth; J. W. Cumming and Mr. and Mrs. Robert Hooten; Terry and Debbie also of Borger.

Harvey Hickman, Jr. of Lolita Texas spent the weekend with his parents, Mr. and Mrs. H. S. Hickman, Sr.

Mr. and Mrs. W. H. Parish

have gone to Wichita, Kansas to visit their daughter, Mr. and Mrs. Phillip Cannon. They left May 16 and will be gone several weeks.

Mrs. M. M. Morris spent a few days last week in Olton with her daughter, Mr. and Mrs. Joe Chester.

John Welch was dismissed Monday, May 20, from Methodist Hospital.

Visiting in the R. C. Hooten home Wednesday, May 22 were Mr. and Mrs. O. T. Loftis, Kress; Mrs. Bill Mitchell and Phillip, Neosho, Missouri and Mr. and Mrs. Floyd Crouch of Earth.

Mr. and Mrs. J. A. Littleton, Jr. visited in Mangum, Oklahoma, recently with her grandmother, Mrs. J. H. Anglin.

Ross and Darlyna Morris arrived home Sunday evening following the ending of college terms. Ross will be home until the summer session at Tech begins. Darlyna will leave June 2 to work with the Girl Scouts in camp at Amarillo.

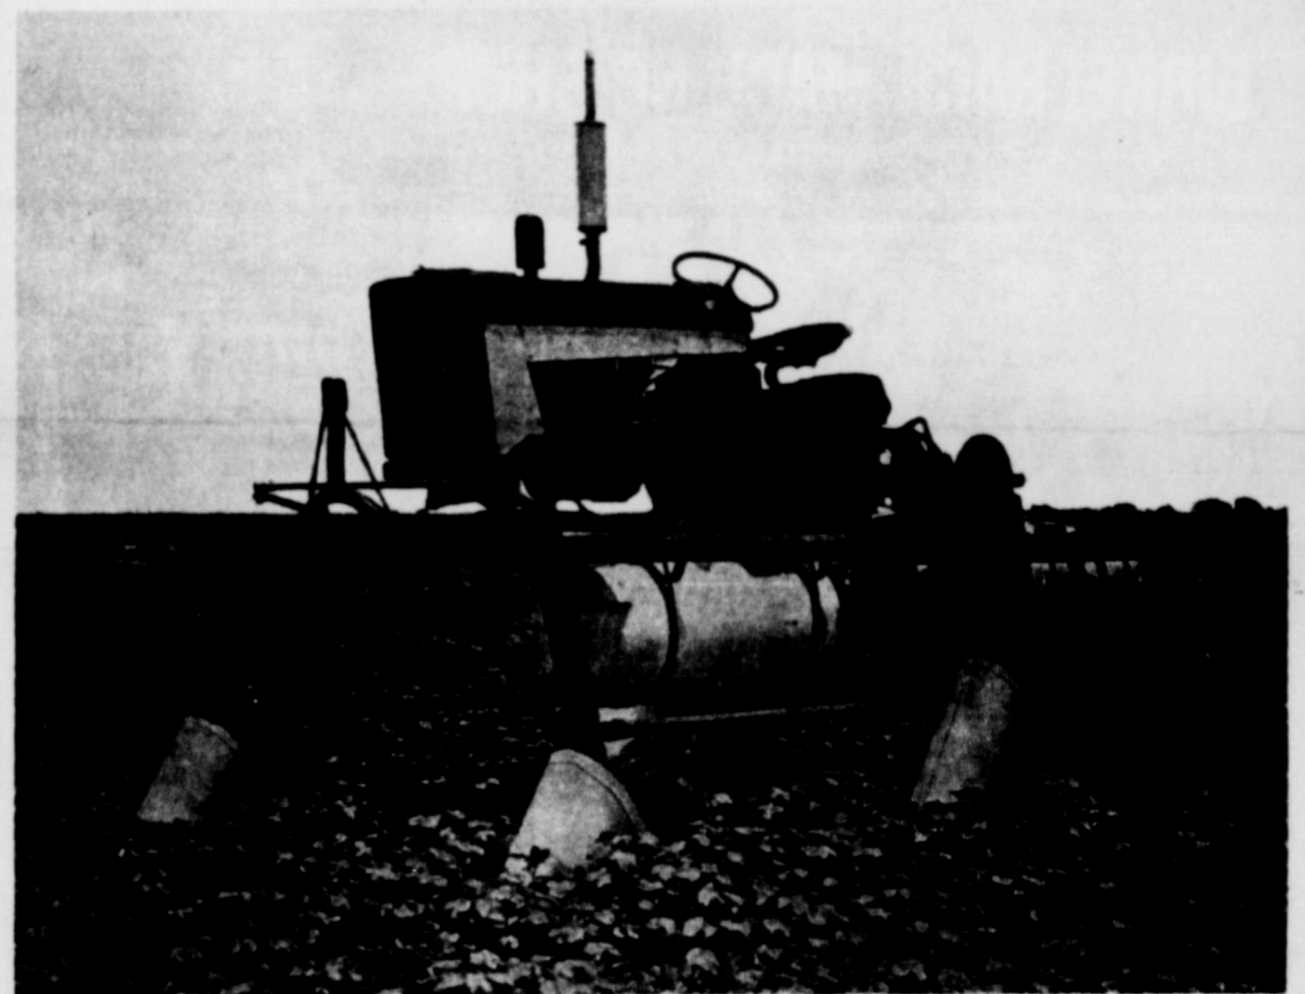

Hershel Fatterson was dismissed May 23 from the Medical Arts Hospital, Littlefield. He is reported doing fine.

Mrs. J. L. Hinson attended the Annual Methodist Conference Monday May 27 in Abilene.

Teresa, Derryi and James Alexander of Lewisville are visiting their grandparents, Mr. and Mrs. Dan Huicy, for the summer.

Evelyn Meadows visited from Wednesday night until Saturday last week with friends in Earth.

## Red Raiders Meet Two New Foes In BB Next Year

Two foes new to Texas Tech's basketball schedule are on the Red Raider's 1963-64 slate announced by Athletic Director Polk Robison.

University of Kentucky will be played initially December 2 in Lexington, and University of Wyoming is carded for the first time December 7 in Laramie.

Other non-Southwest Conference opponents for Coach Gene Gibson's Raiders will be New Mexico, Nebraska, Kansas, Alabama, Oklahoma, Auburn, and the Phillips 66ers, AAU team of Bartlesville, Okla.

Opening game will be played in Lubbock in the Coliseum, against New Mexico, November 30.

The complete schedule:

- Nov. 30 --New Mexico--here
- Dec. 2--Kentucky--Lexington
- Dec. 7 -- Wyoming--Laramie
- Dec. 9 -- Nebraska--Lincoln
- Dec. 10 -- Kansas--Lawrence
- Dec. 14 --Alabama--Lubbock
- Dec. 17--Oklahoma--Lubbock
- Dec. 19--Auburn--Lubbock
- Dec. 28--Phillips 66ers--Bartlesville, Oklahoma
- Jan. 4 -- Arkansas--Lubbock
- Jan. 7 -- Rice--Houston
- Jan. 9 -- Baylor--Lubbock
- Feb. 1 -- Texas--Lubbock

Feb. 4 -- TCU-- Ft. Worth  
 Feb. 8 -- SMU -- Dallas  
 Feb. 11--Texas A&M--Lubbock  
 Feb. 15-- Texas--Austin  
 Feb. 18 -- TCU --Lubbock  
 Feb. 22 -- SMU -- Lubbock  
 Feb. 25--Texas A&M--College Station  
 Feb. 29--Arkansas--Fayetteville  
 March 3-- Rice-- Lubbock  
 March 5-- Baylor--Waco

## Party Line

Mrs. Roxie V. Seymour left Monday for Oklahoma City, where she will visit her grandson, Marion Carol Wagon and family.

Visiting here over the weekend were Mr. and Mrs. Ronnie Johnson and daughter of Abilene. They visited the David Johnson's and the Virgil Lewis'.

Kelly Haydon is visiting her grandparents, Mr. and Mrs. Raymond Haydon, Weatherford.

Mr. and Mrs. Glen King of Lawton, Oklahoma visited Thursday and stayed overnight with Mrs. C. W. Terry.

## Texas Cotton Big Income Producer

Texas cotton producers received \$809 million for their 1962 crop. The total income for both lint and seed, as well as total production, fell below the 1961 totals by five and one half percent, respectively, but the crop was still the second largest since 1949 when the all-time high of 6 million bales was established.

Fred. C. Elliott, extension cotton specialist, added that the lower income was due primarily to a lower average price for both lint and seed, one cent per pound less for lint and \$3 per ton on seed.

Final ginning figures released by the Bureau of Census placed the Texas crop at 4,276,000 bales, the harvested acreage at 6,500,000 and the per acre yield at 348 pounds compared with 350 in 1961. Almost half of the state's total production, he noted, came from the High Plains area.

Nationally, ginnings were listed as 14,867,000 bales from 15,569,000 acres and the per acre yield as 457 pounds, up 19 pounds from the 1961 average. Top per acre yields were posted by California and Arizona, over 1100 pounds each, and new records. The national

**HAPPY CLASS SPONSOR**... Mrs. Gladys McCaskill is pictured as she receives a gift from her favorite senior class. (All senior classes are her favorite) Tuesday night at the Community Building. Jodie Mahan, also sponsor, received a gift as a token of appreciation from the class.

income from cotton and cottonseed was placed at \$2,653 million, only slightly less than the total for the 1961 crop. Trans-Pecos growers produced just over 37,000 bales of American-Egyptian cotton from 33,000 acres.

Elliott said that Texas producers are continuing to use the latest research findings for top yields and efficient production. Each year sees a higher percentage of the state crop harvested by machines and more chemicals utilized in the fight against grass and weeds, he said. Also, more extensive use of fertilizers, adapted varieties for machine harvesting and improved cultural and harvesting practices are being used to help hold production costs down, Elliott said.

## Boll Weevil Vigilance to Cover 26 Counties

W. L. Owen, Associate Entomologist at the Texas Agricultural Experiment Station, Lubbock has reported to Plains Cotton Growers, Inc. that TAES has begun an intensive vigilance for cotton boll weevil appearance in 26 counties in and around the High Plains Area. Actual checks for weevil presence started on Monday, May 20th, and will continue for two weeks.

From one to seven farmers in each of the 26 counties have planted plots of early cotton on land adjacent to possible weevil hibernation points, and initial checking will be done on these plots along with any other cotton in the area which may be far enough advanced to attract the dreaded pest, Owens said. He added that recent hot weather should bring the weevils out of hibernation if they have over-wintered in the area.

To assure a complete check the Plant Pest Control division of the USDA is sending about 8 men into the area to work with TAES personnel; the aid of county agents and Future Farmers will be enlisted; Charles Chapman of the Texas

Department of Agriculture will be in the area with two men from that agency, and John Thomas, Associate Extension Entomologist from Texas A&M will assist on a part time basis. The survey will be under Owen's supervision in the area from Aspermont north, and another TAES Survey representative, W. H. Newton, will be in charge of counties south of Aspermont.

Plains Cotton Growers, Inc. which has been working with the boll weevil problem since damage was first noted in the eastern section of the High Plains, will continue to make its staff and facilities available for use in boll weevil detection and eradication programs.

Counties in which early planting plots are located include Wheeler, Donley, Collingsworth, Briscoe, Hall, Childress, Hardeman, Wilbarger, Wichita, Clay, Dickens, Knox, Baylor, Kent, Stone-wall, Haskell, Throckmorton, Fisher, Jones, Mitchell, Nolan, Taylor, Coke and Runnels.

Mr. and Mrs. Homer Starkey and family have moved into the Bill Bryant house, which they recently purchased.

Mrs. Janie Doughty, mother of Mrs. Sam Cearley, returned to her home in Tulsa, Oklahoma Wednesday, May 22, by plane, after spending several weeks visiting in the Cearley home.

Mr. and Mrs. Bob Bell have purchased the house formerly occupied by the Homer Starkeys from C. W. Armstrong.

## Earth Residents Hail Hometown

It is a rare occasion when a hometown couple have the opportunity to appear a second time on nationwide television, but it seems as if the Roy Neals have done it again. While watching the "Today" show, Wednesday morning, May 22, a large sign, plastered against the studio window, was seen by the show fans here. Plainly written was "Hi Earth, Texas" and for a brief few seconds, the Neals made their second TV appearance. One of the panelists remarked, "Must be an astronaut out there."

Mr. and Mrs. Neal are on an extended vacation tour through the northern and eastern states. Returning to the states following a trip into Canada, the Neals spent Tuesday and Wednesday sight-seeing in New York City. They are to return home via Virginia and the Atlantic states sometime this week.

## WINNERS NAMED IN DRAWING AT MULESHOE MAY 18

Winners in the Johnson-Pool "Get Acquainted Sale" contest drawing May 18 have been announced.

First prize, dishwasher, Rudolph Morrow, Rt. 5, Muleshoe.

Second prize, Barbeque grill, Lois Stansell, Rt. 2, Muleshoe.

Third prize, Zenith radio, Delbert Putman, Rt. 1, Farwell.

C. E. Parsons, new manager for the firm, called the sale to show his interest in meeting old and new customers.

Mr. and Mrs. Neal appeared on the Art Linkletter Show last year, while on vacation in California. Neal won a portable TV during the show.

RAIN AND HAIL batters the area as the clouds opened up Tuesday 8 p. m. May 22, dumping approximately four inches of rainfall mixed with hail, in approximately 30 minutes' time. This photo was snapped at the Draw, on the Dimmitt road. Fences on each side of the road were washed out. Weeds and debris covered the bridge as the waters descended.

## RURAL ACCIDENTS IN LAMB COUNTY SEVEN FOR APRIL

The Highway Patrol investigated seven rural accidents in Lamb County during the month of April according to Sergeant D. S. Lawson, Patrol Supervisor of this area.

These wrecks accounted for three persons injured and property damage in the amount of \$3,810.00.

The rural accident summary for Lamb County from January through April of 1963 shows a total of 34 crashes resulting in four persons killed, 31 persons injured and an estimated property damage of \$29,544.00.

If you travel the rural roads this month, you will meet up with lots of slow moving farm machinery. The Patrol Supervisor reminds motorists to be ready to slow down in plenty of time to avoid collision--and pass only if you are sure you can do it successfully and safely. Remember too, where there is a farm house, there is a driveway, even though it may be hidden from view. So be prepared to yield, if you must, to traffic entering and leaving. Yielding right-of-way costs you nothing. Demanding it can cost you an accident.

The Sergeant also stated,

BILLY GENE WARREN

## Warren Assistant Farm Foreman For Foundation

Billy Gene Warren, Assistant Farm Foreman at the High Plains Research Foundation, has been promoted to Laboratory Assistant. He will assist Delbert Langford, Associate Agronomist in the soils and fertilizer research program at the Foundation.

"Mr. Warren's successful direction and operation of the farm's research program entitled him to his recent pro-

motion", Dr. Earl Collister, Director, said in announcing the recognition.

Prior to joining the staff at Halfway in 1957, Billy Gene farmed at Daugherty, and he was elevator superintendent with the Producers Cooperative Elevator in Floydada. He received his high school diploma in Floydada and his bookkeeping certificate from Lipfert's in Plainview.

Mr. Warren, his wife Johnnie and three sons reside at the Foundation Staff House #2 at Halfway.

Abe Griffin was admitted to West Texas Hospital Tuesday, May 21 where he was to undergo tests.

**GUMMING UP THE WORKS...** A large bull snake is shown coiled inside the pump seat of an irrigation well motor on the Paul Martin farm. The well suddenly refused to pump Monday and workers, upon pulling the unit, discovered the dead snake.

**THE CULPRIT...** A bull snake, measuring 4 feet, 3 inches, is shown here at Earth Pump and Machine, following removal from well on the Paul Martin farm Monday evening.

**Snake Found In Martin Well Halts Irrigation**

Strange things happen in this world of ours, but rarely does it occur so close to home.

An irrigation well on the Paul "Punk" Martin farm, which had been working perfectly, suddenly, for no reason at all, refused to pump, Monday.

Earth Pump and Machine was called to determine the trouble and make needed repairs. The pump was pulled about 7 p.m. and amazed workers discovered in the bottom of the bowl, a coiled bullsnake, quite dead, measuring 4 ft. 3 inches.

The eight inch well was drilled to a depth of 154 feet in 1950, and is located northwest of Martin's home.

Martin and others are still scratching their heads, wondering how the big snake managed to get into the well.

The well, once more, is working perfectly.

**Cropping And Fertilizing Based From Soil Testing**

Today many cropping and fertilization recommendations are based on soil testing

information. And many farmers and ranchmen are making use of the three soil testing laboratories in Texas to obtain this information.

A new bulletin of the Texas Agricultural Extension Service explains just what soil testing is and how it can be used by the producer. "Test your Soil for Profits" says that soil testing is a scientific method to determine the fertility needs of a particular field. It explains that chemical means are used to determine soil reaction (pH), organic matter, available phosphorus, available potassium, available calcium and soluble salts. Soil salinity can also be determined by special testing techniques.

Soil tests can be used as a basis for fertilization and liming of soils, according to the bulletin. Also, a soil test can help the producer determine what crop is best suited for his land, how much that crop should yield, and if the soil is infested with nematodes insects or diseases.

In taking soil samples, obtain one from each major soil type in the field, using a spade, soil auger, or soil tube. Information sheets can be obtained from the local county agricultural agent and should be filled out as completely as possible and sent along with the samples, the bulletin says.

Samples should be submitted at least one month prior to the date of fertilization to allow time for testing and return of the results. Under high levels of production or high rates of fertilization soil should be tested every year but with lower production, they may be taken at two or three year intervals.

## Can Anyone Foresee The Future Of Crop Harvests in Texas?

Will farmers someday predict their harvest before a seed is planted?  
Or pick the best fertilizers for the next year?

Or know whether to plant an early or late maturing variety? These are some of the long-range implications coming from an extensive study of soil water-crop relationships at Texas Research Foundation at Renner.

"With proper farming systems, it's a matter of knowing the amount of available moisture in the soil at planting time and having reasonable long-range rainfall forecasts," said Dr. C. L. Lundell, Director of the Foundation.

Results of the first five years of the study at Renner are carried in the Foundation's current Bulletin 16 -- "Soil Moisture Conservation and Utilization in Farming Systems in the Blacklands."

In the bulletin's preface, Dr. Lundell suggests the studies may establish cropping patterns for wet and dry cycles, and remove some of the other hazards of weather from farming. The bulletin reports the finding at Renner of significant correlations between crop yields and soil moisture at planting and at successive stages of crop growth.

The publication documents further how crop rotation and fertilizers increase greatly the efficiency of moisture utilization. Moisture is often the greatest limiting factor in plant growth. The bulletin also investigates sod crops for soil im-

provement when used in rotation with cash crops.

Supported in part by grants from the Dallas Foundation, the study is being conducted by Dr. Hans Brawand, Foundation Soil Scientist, and by Dr. W. Derby Laws, Research Associate at Renner, who is Professor of Agronomy at Brigham Young University at Provo, Utah.

The study reveals that fibrous rooted cash crops--grain sorghum, small grains and corn--are economically superior to sod crops in programs of basic soil improvement.

"The cash crops are more efficient in water use, produce more organic residues and increase yields and dollar returns when used in balanced farming systems, Dr. Lundell said. "The basic premise of grassland farming needs re-examining as it applies to perennial sod grasses in crop rotations in the Blacklands."

Sod crops produce a lower return per acre and leave the land droughty and difficult to handle for planting the following cash crop.

In the bulletin, soil moisture utilization data from the crops commonly grown in the farming systems at Renner--cotton, grain sorghum, corn, hay and wheat--are presented.

In conducting the study, the scientists measured every two months the amount of moisture reserve at five inch intervals to a depth of 25 inches in each field under study. By comparing crop yields and

available moisture in the 25 inch profile to the amount of water used by the crops during the growing season, the scientists were able to determine the average water requirement of each unit of crop yield.

Here is what they discovered when they compared the water usage of grass grown for hay with the amount of water used for wheat grown for its grain and its residue:

An acre-inch of water produced only 128 pounds of hay; yet the same amount of water gave 70 pounds of wheat plus more than 300 pounds of straw per acre. The residue from wheat was far more valuable for soil improvement and soil conservation than the small quantity of residue left after the hay harvest.

In analyzing the data on water requirements of wheat and grass, the Director emphasized that the difference in value of the two crops is all in favor of wheat over sod in any short-term crop rotation for the Blacklands. "All facts support the conclusion that fibrous rooted cash crops can be profitably used in our cropping systems instead of sod," he said.

Here are other significant results the scientists obtained from the study:

It took 7,491 pounds of water to grow a pound of seed cotton in a field where cotton has been grown continuously with out fertilizer.

But it required only 4,897 pounds of water to produce one pound of seed cotton when the cotton was in a fertilized rotation with other crops.

"The cotton system with the lowest yield made only 32 pounds of seed cotton to the acre-inch of water, whereas the better cotton systems pro-

**A JOB WELL DONE.** Senior class parents, Mr. and Mrs. A. P. Latham and Mr. and Mrs. Buddy Adrian were presented gifts from the class at a party Tuesday night in the Community Room. Senior Carolyn Gregory is shown making the presentation to Mr. Latham.

duced 44 and 45 pounds of seed cotton to the acre-inch of water," Dr. Lundell said. The grain sorghum data revealed that unfertilized sorghum in rotation used 2,224 pounds of water to produce a pound of grain. Fertilized sorghums in rotation, however, required 1,542 pounds of water to produce one pound of grain. In the fields studied at Renner at saturation the 0 to 25 inch profile of Houston Black Clay soil holds 15.1 inches of total water. When the gravitational

water has drained and the soil is at field capacity it contains 11.4 inches, with 6.2 inches remaining in the soil at the wilting point. Thus, there are 3.7 inches of gravitational water, 5.2 inches of available water and 6.2 inches of unavailable water in the profile at saturation.

"The findings further corroborate the Foundation's established recommendations for increasing soil fertility and crop yields," Dr. Lundell added. "Use a three-year rotation of fibrous rooted crops in sequence with one tap rooted crop. Fertilize all crops adequately to increase production of salable crop, to improve water use efficiency and to return large quantities of residues to the soil, which will improve its physical condition and protect it from erosion."

Citing the long-term objectives of the study, Renner scientists are encouraged that farmers--knowing their supply of reserve moisture--may one day select rates of fertilization

## Party Line

Mrs. Bob Ussery and Mrs. Carlis Bills went to Erick, Oklahoma May 15, to accompany Mrs. Ussery's mother, on her return trip home. Mrs. Stafford had been visiting in Earth. Mrs. Bills returned home May 22.

Mr. and Mrs. Charles Rogers and family of Iraan and Mr. and Mrs. Curtis Hall and family of Petersburg were weekend guests in the home of Mr. and Mrs. Clinton Williams. Mrs. Hall, Mrs. Rogers and Mrs. Williams were classmates at Iraan High School and graduated together.

Mrs. Lottie Orteg had Sunday dinner May 19 with Mrs. L. D. Winders.

crop varieties, and make other pertinent decisions by analyzing a seasonal weather forecast. For example, high available moisture in June will favor fertilized grain sorghum over unfertilized sorghum. High available moisture in July will favor unfertilized sorghum over the fertilized crop. The added plant food hastens the flowering of grain sorghum by about ten days.

## Plentiful Foods Brighten June

June scores high on all yardsticks of enjoyable livability. It's the beginning of the vacation season. Weather and natural beauties are at their apex. Special occasions like weddings and graduation brighten our schedules.

High on the list of June joys is the abundance of good food. Take the U.S. Department of Agriculture's June list of plentiful, for example, suggests the Texas Agricultural Extension Service.

Milk and all dairy products head the list, naturally. June is Dairy Month, when milk production is at its seasonal peak. The plentiful tag applies to all dairy foods--whole, skim, dried condensed and chocolate milk, ice cream; cream; half-n-half; cheeses of all kinds; butter and even buttermilk. Use them generously, to heighten June enjoyment.

In the meat line, look for plenty of beef, pork and broil-

er-fryers. All are on USDA's June list. And prices are unusually attractive, as meat production exceeds normal needs.

Eggs also will be plentiful all June. Use them in salads, in baking, as gems of breakfast nutrition, or in egg nogs in combination with the abundance of milk.

Think of vegetables to complete your menus. Early summer gardens are doing their best to provide a bit of everything for your June needs and pleasures. Lettuce should be particularly plentiful, says USDA's Agricultural Marketing Service, that compiles the list of plentiful each month, in cooperation with growers and the food trade.

Mrs. Douglas Lewis had an appendectomy Tuesday, May 21 in the Medical Arts Hospital, Littlefield.

Hershel Patterson was admitted to the Medical Arts Hospital, Littlefield, Monday, May 20. He was to undergo tests to determine illness.

# WE PROUDLY PROCLAIM

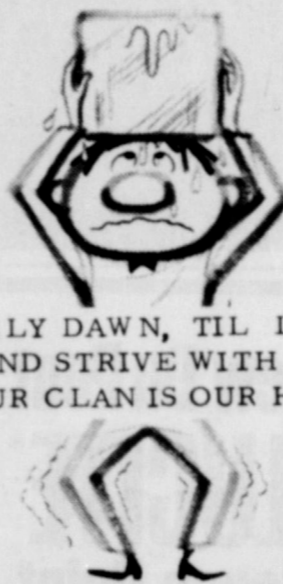

KEYS TO EARTH

OUR SOUL IS SAD  
OUR HEARTS ARE TORN  
OUR WELDERS WE'VE NEGLECTED.

THOUGH OUR BACKS ARE BENT  
OUR TABLES ARE BARE, BUT  
NO ONE SEEMS TO GIVE A CARE.

FROM EARLY DAWN, TIL LATE AT NIGHT  
WE WORK AND STRIVE WITH ALL OUR MIGHT  
TO FEED OUR CLAN IS OUR HEARTY PLIGHT.

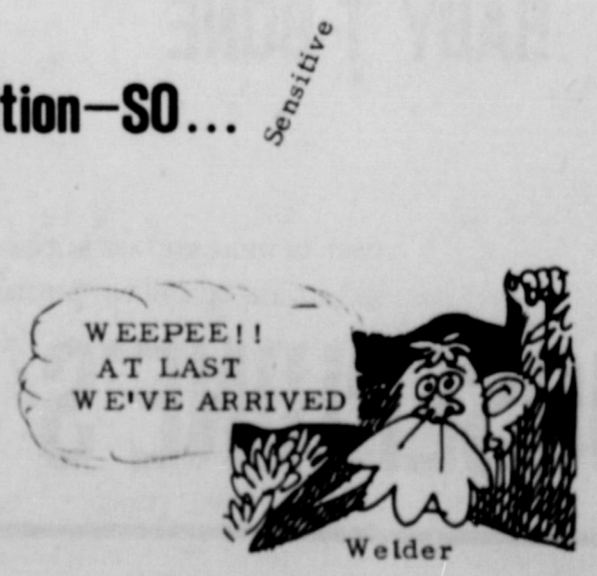

## THEN LO AND Behold!!

we find in Earth a couple of lowly self-pitying welders who want recognition—SO...

We  
Salute  
Rex and Wendell..

Paid for by sensitive Citizens of Earth

## Palo Duro Canyon Is Interesting Sight-Seeing Park

With vacation time just around the corner, what better way to spend a part of it than exploring Palo Duro Canyon State Park, 35 miles southeast of Amarillo.

Interesting sight-seeing is provided for the park visitor through the unique natural phenomena such as the "lighthouse", a 27-foot sandstone formation that actually looks like a coastal lighthouse, and the "Spanish Skirts," a reddish exposure of the Permian Formation which is spread out over the side of Rustler's Draw, and looks like the twirling skirts of a Spanish dancer. Both formations are said to have been named by the explorer, Coronado when he visited the canyon in 1541.

To add to the visitor's appreciation, the park has a ski lift that takes the rider on a breathtaking ride high above the canyon floor to the rim-rock cliff walls more than

300 feet up.

A miniature train ride with lectures carries visitors into one of the park's side canyons, bringing to view formations, that would otherwise be hard to see.

Visitors may rent horses to explore the more inaccessible portions of the park. Many miles of cliff-side trails hold in store endless breath-taking views of the canyon. Colors in the canyon change with every new position of the sun. There usually is a gentle breeze blowing through the park.

Palo Duro Canyon State Park is comprised of more than 15,000 acres. The width of the canyon is about six miles

## Rules To Apply In Artificial Respiration

There are many physical conditions that can cause breathing to come to an abrupt halt, but the most common of these is drowning. The real tragedy of the many deaths from drowning each summer is that many could have been saved if someone nearby had known how to apply artificial respiration.

The cardinal rules of artificial respiration at the southeastern boundary of Palo Duro Canyon State Park, The canyon walls are more than 700 feet high.

This is truly one of the geological wonders in the State of Texas. Visitors to the park are increasing each year more than 100,000 having registered in 1962.

ial respiration are simple---  
 • Start immediately. Don't wait for anything. Send someone for help, but don't wait for the ambulance. It will probably be too late.  
 • Keep it up. There are cases on record of breathing starting again after a lapse of many minutes, when the rescuer kept steadily at work, forcing air in and out of the lungs.  
 Special courses in lifesaving, including artificial respiration, are offered by the American Red Cross and other groups each Spring. The trained rescuer is better equipped to save a life. But an untrained amateur may save a life.  
 Most first aid experts today favor the mouth-to-mouth method of artificial respiration. First clear the air passages by drawing the tongue forward with your fingers. Place the victim half way between a face-up and side position, tilt the head well back to insure a clear air passageway. Take a deep breath, place your mouth over the victim's mouth, and breathe into his lungs until you

see his chest rise and feel the lungs expand. In mouth-to-mouth breathing, pinch the victim's nostrils shut while breathing into his lungs. Remove your mouth and let the victim exhale, applying slight hand pressure between the ribs and navel to expel all air. Repeat the cycle 15 times a minute. You may cover the victim's mouth with a single layer of a clean handkerchief.  
 Remember: Start immediately. Check the mouth for obstructions. Loosen clothing and keep the victim warm, but don't delay artificial respiration to do this. After the victim revives, be ready to resume respiration if breathing halts again. Don't give up unless you're positive the victim is dead.  
 If you're called on to help in a rescue, keep calm and move rapidly to try to get the victim breathing again as soon as possible.

## Poultry Feeding Series Nears Completion

The first of a new series of poultry feeding leaflets has been released through the joint efforts of the Texas Agricultural Extension Service.

"Feeding Broilers", L-592, will be followed by "Feeding Flock Replacements", "Feeding Chicken Breeders", "Feeding Turkey Breeders", and "Feeding Growing Turkeys." The leaflets explain feeding practices suitable under Texas conditions.

Authored by J. R. Crouch, C. R. Greger and J. H. Quisenberry of the Poultry Science Department at Texas A&M, "Feeding Broilers" points out the rapid development of the Texas poultry industry during the

last 14 years. This growth is attributed to cooperation between breeders, nutritionists, and veterinarians.

The leaflet recommends a 23% protein ration for starting broilers and for birds being finished for the market about 21%. It explains that energy is usually supplied to broilers with corn or sorghum grain. Tests have shown that best results are usually obtained when 42 to 44 calories of productive energy is supplied for each percent of protein in the ration. Corn and dehydrated alfalfa leaf meal are also important in broiler feeding because of the desirable yellow pigment they impart to the skin of the birds.

Broiler diets should be supplemented with calcium, phosphorus, manganese, and zinc. The rations listed in the leaflet supply adequate amounts of these minerals. Vitamins, antibiotics and arsenics contained in a premix should be added to the formulations for broilers also. A good coccidiostat will aid the birds in effi-

cient production but should be deleted before market time.

For more details on the feeding of broilers in Texas ask your county agent for a copy of L-592, "Feeding Broilers", or write the Agricultural Information Office, College Station, Texas.

## Party Line...

Doyce Waddell and James Garrett went to the Waddell Ranch near Post Tuesday.

Mr. and Mrs. Leonard Gilmore and children of Homer, Alaska are visiting here with relatives. Gilmore will attend aeronautical school at Oklahoma City until July. Mrs. Gilmore will visit her mother during part of this time, in Olney.

Mrs. E. R. Hawkins visited her daughters, Mr. and Mrs. J. W. Pierce and family and Mr. and Mrs. W. S. Thompson in Amarillo Saturday, May 18. She was accompanied by Mrs. H. S. Sanders and Mrs. Ann Hodge.
