Cowboy Campfire Cookout

Once again, the Cowboy Campfire Cook-Off will ring with the roars of the villain, the squeals of the heroine, and the laughter of the audience as Abilene Repertory Theatre presents its second annual melodrama, *Curse You, Jack Dalton*.

The play is set in Dallas around the turn of the century. Mrs. Donna Dalton, (Jakie Burkhart), is trying to get her son Jack, the hero (Bob Cummings), to marry Anna Alvarado, the villainess (Sandy Smith), because she thinks Anna is rich. Anna, on the other hand, wants to marry Jack because he really is rich. Jack, however, is in love with Bertha Blair, (Diane McIntire), the maid. Bertha and her brother, Richard, (Peter Hale), had a gold mine at one time, but were swindled out of it by a villain named Hector Harcourt. So Bertha works as a maid while Richard is out looking for Hector.

Meanwhile, Hector shows up disguised as non other than Egbert Van Horn, (Ted Lofton). Whatever his name, he's still up to his old tricks, and is trying to marry Eloise Dalton, (Kathy Lee), Jack's sister, for her money. Then the plot thickens!

Director Clinton Trigg has assured us that popcorn will be supplied to the audience to throw at the villains. Performances, which are free, will be Saturday, June 11 at 8:00, and Sunday, June 12 at 6:30 at the Cowboy Campfire Cook-Off at Old Abilene Town.

The word "cattle" comes from the Latin *capitale* meaning wealth or property. At one time it meant all domestic animals. Now it is used only for bovines.

"Texas"

The rider will return to the saddle in the cliff at the Pioneer Amphitheatre in the Palo Duro Canyon and lift his flag to open the 12th season of the musical drama, "Texas," at 8:30 p.m. on Wednesday, June 15.

Members of the Texas Panhandle Heritage Foundation, Inc., will gather in special sections to greet the 12th version of the Paul Green script.

This year, their special guests will be the representatives of the oil and gas industry in the Texas Panhandle. As is the custom, the program for the opening will carry the story of a part of the growth of the area, the story of the unexpected and spectacular development, oil.

It begins with C.M. Gould, a geologist for the U.S. Geological Survey, who came here looking for windmill sites and who happened to notice significant geological structures.

M.C. Nobles hired Mr. Gould to point out these areas, and formed the Amarillo Oil Company with R.B. Masterson, C.T. Herring, Lee Bivins and others to drill on the Masterson ranch. On

December 13, 1918, a gas well came in. Unfortunately, at that time, few uses for gas were known.

The following year, Eugene Blasdel, W.H. Fuqua, and P.H. Landergerin leased a portion of the 6666 Ranch. The Gulf Production Company drilled here and brought in the first oil well on April 5, 1920. A son was born to Mr. Blasdel that day and he bears the name, James Gulf Blasdel.

Tex McIlroy brought in several wells for the Dixon Creek Oil Company, and the rip-roaring boom town of Borger was founded in 1926 to serve the oil development. Tex Thornton, the famed trouble shooter for the industry, worked here.

Members of the families of these oil pioneers will be special guests at this opening night of "Texas."

The developers of the oil industry will be included. Representatives of the Diamond Shamrock Oil and Gas, the Yucca Petroleum Company, Mesa Petroleum, the drillers, the suppliers, the leasers, the furnishers of tools, and the independent operators will all be represented. Presidents of the Panhandle Producers and Royalty Owners Association have been invited to represent the oilmen now in the field.

From 7:30-8:00 p.m. there will be a reception near the bust statue of Quannah Parker at the theatre. At 8:15 there will be a short ceremony on the stage of the theatre. ENERGY EFFICIENCY RATIO and AIR CONDITIONING

Maybe you've heard mention of or read about EER . . . but didn't pay too much attention at the time. EER stands for ENERGY EFFICIENCY RATIO and is a measure of the efficiency of various appliances or equipment in using energy. Some do the same job using less energy than others.

We have a booklet in our offices that's free for the asking. It's called "The ABC's of EER," and it briefly and simply gives you an adequate explanation of what EER means to you if you're about to buy air conditioning equipment.

It's at your Public Service office . . . ask for one.
