A CONSOLIDATION OF THE EARTH NEWS and EARTH SUN OCTOBER 12 1956

VOLUME 5 TEN CENTS EARTH, LAMB COUNTY, TEXAS, THURSDAY, JULY 9, 1959 12 PAGES NUMBER 48

Welcome To Earth, Rodeo Fans

**NOSIN.....
WITH ANNA**

Polly called from the big city at 10:30 p.m. Wednesday night 12:30 Eastern Standard Time (we knew they couldn't sleep) and we assured her everything was done and all the papers were about off the press.

Ross always brought the mail bags from the P. O. on Wednesday afternoon, and at about 10 p.m. Darile thought of the mail bags. Our thanks and appreciation to Harold Miller for coming down to the P. O. and getting us some mail bags. We wonder if people are hat nice in New York City?

We are expecting the bosses back Saturday July 11, they just couldn't miss one night of our hometown 15th Annual Rodeo. That's when a big crowd comes to town. So if you who are responsible for the Rodeo should hear Polly or Ross say, "what a small crowd, just not anyone here." Remember there is some difference in hundreds and millions. We do hope they haven't dropped their Texas accent. That's a long time for those two to be away (from the newspaper).

We are happy to report no fatalities for the Earth - Springlake area during the 4th of July holidays, which marked the Independence of Our Nation. Though our highways were crowded to the brim and our streets in Earth were empty until late evening, or maybe we should say early morning (Sunday morning) with youngsters setting off fire-crackers within the city limits rousing residents of restless sleep. Maybe we, as parents are too much asleep, by not checking on our boys and girls more closely.

Most of we citizens boast of living in a dry county, let's take a check, especially the next holiday and see how dry it is in Earth, and I don't mean rainfall.

Many of our farmers in this area have suffered the loss of cotton and feed crops from hail this past week which is a very heavy financial loss. Harvey Hickman consoled his wife with a fine thought by being thankful it was only a crop loss and not the loss of health. Not even the rich can buy health. Often I am asked how I can do so much, I always say, I am thankful I am able to work. What our shut-ins wouldn't give to step in our shoes.

If our forefathers could only live awhile in our push button, atomic age, they would be to church an hour earlier and already relaxed. Just think of the time they would have sitting on their front porches. I can't remember if any of us have ever been seen on our front porches. Should we see someone enjoying the fresh air, we would probably remark, their TV must be out of order.

Back to our newspaper, you will guess by now that is what we are interested in. After receiving so many compliments on our last week's issue, we do know our paper is being read.

Those who make frequent visits to our office and back shop are the ones who know what all it takes to put out a newspaper for your reading enjoyment. To see your names in print for a coverage of your area news, school news, sports, deaths, parties, weddings, births, pictures, civic clubs, and so many things it takes to just make up a weekly newspaper. Let's keep our money in our own town, so our town can grow and newspaper can grow also. Maybe you are thinking, it would mean I would be without a job if we did not have a newspaper. A town that is dead, it is a town without a newspaper.

Mrs. C. W. Terry came to our rescue this week and helped in the advertising department. A big thanks to you, Mrs. Terry for your help and time spent.

Watch next week for Nosin' with Polly. She may have a section of her own, telling about that wonderful trip.

We are happy to welcome them home.

Rodeo Pancake Supper July 11 4:30 - 7:30 P. M.

A Pancake Supper, sponsored by the Earth Lions Club, will be held from 4:30 to 7:30 p.m., Saturday, July 11 at the Community Building.

The Rodeo Pancake Supper will be served to every one and their friends before attending the Rodeo which begins at 8:30 p.m. An admission charge of \$1.00 for adults and 50 cents for children through the eighth grade.

Jarvis Angeley Says Thanks To All

Jarvis Angeley wishes to say thanks to every one and especially the Earth Volunteer Fire Department for a good job and all the others who helped put out the fire. Angeley's 1954 Chevrolet truck burned at 9:45 a.m. Tuesday at his farm home.

RODEO BOOSTERS — Just a few of the caravan of boosters that left Earth Tuesday morning to announce Earth's 15th Annual Rodeo, July 9-10-11. Back row, left to right: Deputy Sheriff V. L. Smith, Jr., Jarvis Angeley, Earl Jordan, Ted Robbins, Carroll McDonald, Freddie Maxey, Golden Ferguson and Gene Templeton. Front row, left to right: Kay McCord, Faye Spies, Minnie Wheat and Linda Elmore.

Farmer Blown From Truck In Explosion

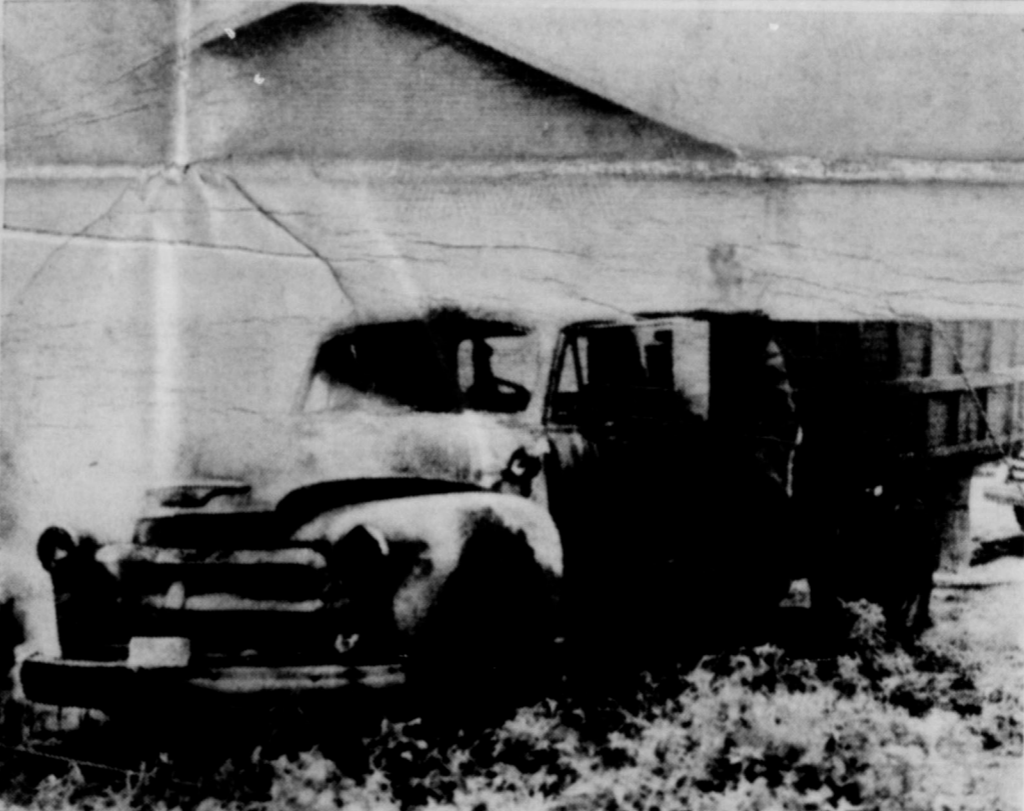

An Earth farmer, Jarvis Angeley, received only minor burns about the face and arms in a butane gas explosion at 9:45 a.m. Thursday at his home, 9 miles northwest of Earth.

Angeley started his 1954 Chevrolet truck and drove it up to his shop, swept it out and started it up again, when it caught fire and exploded knocking Angeley out into the driveway. The truck was a solid mass of flames in a few minutes time.

The Earth Volunteer Fire De-

partment quickly answered the call and with the help of neighbors and friends, the truck was pulled with a tractor from a nearby 500 gallons underground gasoline tank when the electric motor caught fire.

Angeley estimated the loss to be approximately \$2,000.00 and only the two rear tires could be salvaged. Angeley said the origin of the fire was not known other than a leak in the butane tank, all he remembered was the truck was afire all over.

FIRE AND EXPLOSION — This truck caught fire and burned on the Jarvis Angeley farm, 9 miles northwest of Earth, Friday morning. When Angeley started the truck, flames broke out inside the cab, causing an explosion, knocking Angeley out of the truck. He was uninjured except for minor burns about the face and arms.

Giants Victorious In Last Three Games

Tied with a 9-9 in the last of the 6th inning, the Giants came through with a run to win 10-9 over the Yankees last Thursday night at the Ball Park.

Starting pitcher for the Giants was Jose Triana and Ruel Cortez was starting pitcher for the Yankees.

Red Sox Vs. Giants
In Saturday night's game, July 4, an almost sure victory for the Red Sox was in store when Jerry Don Sanders made the first score of the ball game in the bottom of the 4th inning when he came in from third base on a wild pitch. The Giants still lagging through the 5th inning suddenly blasted off and hurled past the Red Sox and scored six points in the sixth inning shooting the score 6-2.

Ronnie Williamson was the starting pitcher for the Red Sox and Logan Armstrong for the Giants.

Giants Vs. Red Sox
In a come back with the Red Sox again, Monday night, July 6, the Giants scored two points in the first inning, tied the score up with Red Sox in the second inning, and passed the Red Sox and brought the score up 8-4 in another win in the Giants' favor.

Sammy Adrian started the pitching for the Giants and Phillip Munez was starting pitcher for the Red Sox.

Earth City Council Hold Regular Monthly Meeting

The Earth City Commission met at 4 p.m. Monday for their regular monthly meeting.

Those present were Mayor Marcus Messer, Pat McCord, Abe Griffin, Weldon Barton, Dutch Been, and Mrs. Ruby Anderson.

Monthly bills and regular business was approved.

Child Cuts Arm While Playing In Bath Tub

Rickie Trotter received a cut on the arm while playing with a glass jar in the bathtub Friday night.

Several stitches were required to close the wound. He was treated at the Littlefield Hospital and Clinic and released.

Rickie is the five year old son of Mr. and Mrs. Eldon Trotter. Trotter is the owner of the Earth Cleaners.

Former Resident Dismissed From Army Hospital

Mike Simmons, former Earth resident who is now stationed at Fort Knox, Kentucky, has recently been dismissed from the U. S. Army Hospital there, after receiving treatment for blood poisoning.

Simmons received a snake bite six weeks prior to an insect bite on the knee of his left leg, and it was believed both bites caused the poisoning.

Professional card sharks really enjoy meeting an amateur who knows all about the game.

First Water Show Springlake City Council Discuss Firemen's Insurance

The first Water Show to be held in Earth Monday night at the new swimming pool was reported to be a success.

A large crowd attended and watched performances of diving, both fancy and clowning by members of Norman Hemphill's class. Also mock demonstrations of life saving and swimming exhibitions by members of Mrs. Norman Hemphill's and Mrs. Elizabeth Laing's classes.

Funeral Services Held For Former Springlake Resident

Funeral services were held at 2:30 p.m. Monday at the Springlake Church of Christ for Mrs. Sallie Cooper, 81, of Portales, N. M., a former Springlake resident.

Grover C. Ross, minister of the 4th St. Church of Christ in Portales, officiated, assisted by K. D. Pittman, minister of the Springlake Church of Christ.

Survivors include two daughters, four sons, 11 grandchildren and 12 great-grandchildren. Burial was in the Springlake Cemetery.

Springlake City Council Discuss Firemen's Insurance

The Springlake City Council met at 8 p.m. Tuesday for a regular business meeting.

Kenneth Boone, Farm Bureau Insurance agent, met with the council to discuss insurance on the

members of the Springlake Volunteer Fire Department. A definite discussion was not made. Monthly bills were approved and paid.

Those present were: Jesse G. Watson, Jack Sanders, James Washington, Floyd Crawford, Ernest Goforth, Ralph Eudd, Mayor, Mrs. Lorraine Brown and Kenneth Boone.

Mr. and Mrs. A. C. Barton, Mrs. Pat McCord and Jill left today for a few days visit in Pierre, S. D.

A PERFECT SHOT

This 1959 Chevrolet belonging to Freddie Maxcey was hit in the rear by a 1957 Chevrolet, owned by Joe Hood, negro, and was sent between the pick-up and Ford-car coming to rest upon the sidewalk in front of Thompson Chevrolet Co. and Gerald's Barber Shop. Both cars were estimated to be damaged approximately \$500 each. No one was injured.

Parade And Rodeo July 9-10-11

Earth's 15th Annual Amateur Rodeo will be kicked off with a street parade at 4 p.m. Thursday, July 9.

Barbecue Supper
A Barbecue Supper, sponsored by the Chamber of Commerce, will be served beginning at 5 p.m. immediately following the street parade.

Rodeo Time 8:30 p.m.
The Rodeo time has been set at 8:30 p.m. July 9-10-11 at the Rodeo grounds west of Earth.

The program will consist of Brahma bull riding, double mugging, bareback riding, cad riding, ladies barrel race and wild horse scramble.

Trophies and Prizes To Be Awarded
Three trophies will be awarded

by City Shoe Shop — 1st place; City Drug — 2nd place; and La Casa Motel — 3rd place. Other prizes and sponsors include a saddle — Tie Down Roping by Earth Oil and Gas Co.; saddle — Double mugging, Layman Eros, Butane; saddle — Best All-Around Rider, Watson Bros. Butane; Clown, Earth Elevator and Speciality act, Brown-White Implement Co.

Rodeo admission charge will be \$1.00 for adults and 50 cents for children. All seats are free.

Rodeo stock will be furnished by Morris Stephens of Quitaque, Tex. All entries in Rodeo must be in by 12:00 noon Thursday, July 9 at the Earth Motor Co. office.

Plans are being made for the biggest and best Rodeo yet.

NOTICE

Farm Laborers
Wage finding effective July 1 Lamb County hoeing cotton 50 cents per hour mixed crews men, women and children.

Mother of Dr. Faust Claimed By Death

Mrs. Marie B. Faust, 83, wife of the late Rev. J. N. Faust, formerly of Spring Grove, died at 7:15 p.m. Saturday at the HomeWood United Church of Christ Home, Hagerstown, Md., where she had been a guest for the past five years.

Rev. Faust, who was pastor of Litchey, Md., church, was buried at the same place.

Mrs. Faust was a daughter of the late Edwin H. and Sara Amanda Schroll Bickel. Surviving are three sons, Vincent Faust, Clayton, N. J.; Dr. Frederick Faust, Earth, Texas; Rev. Milton Faust, Salisbury, N. C.; one daughter, Mrs. J. W. Brubaker, Ventnor, N. J.; 10 grandchildren and three great grandchildren.

Rev. Franklin Glassmoyer, pastor of the United Church of Christ congregation, officiated at the funeral services Wednesday at 2 p.m. at St. Peter's (Litchey) Union church. Interment was in the adjoining cemetery. Sauter Funeral home was in charge of arrangements.

Farmers Union Weed Control Program July 14

A regular meeting of the Earth Farmers Union will be held Tuesday July 14, 1959, 8:00 p.m. at the High School Study Hall.

The program will be of special interest to all farmers in the community. Guest speakers will be Bill Kimbrough, Lamb County Agent who will discuss control of Noxious weeds, Albie Limer, Hale County Agent, will discuss the operation of the Weed Control District in the Hale County area.

Everyone is invited to come and hear this important problem discussed.

A PERFECT SHOT — This 1959 Chevrolet belonging to Freddie Maxcey was hit in the rear by a 1957 Chevrolet, owned by Joe Hood, negro, and was sent between the pick-up and Ford-car coming to rest upon the sidewalk in front of Thompson Chevrolet Co. and Gerald's Barber Shop. Both cars were estimated to be damaged approximately \$500 each. No one was injured.

Pleasant Valley News

By MRS. JOHN WEST

Mr. and Mrs. W. A. Hardin and girls visited the Norman Hodges Sunday.

Mr. and Mrs. Alton Taylor of Safford, Ariz., spent a few days last week with his parents, the Roy Taylors. Other visitors in the Taylor home were Mr. and Mrs. Bob Boone of Olton.

Mrs. John W. West went to Lubbock last Thursday to be with Mrs. Simmons while Forrest Simmons underwent surgery.

Mrs. J. H. Teel and daughter, Carolyn of Ingewood, Calif., and Mrs. Lester Kelly and Mrs. Marvin Huff visited in the homes of Mrs. Teel's sister, Mrs. Otis English and her brother, Thurlio Branscum on Sunday.

Mr. and Mrs. Raymond Roubinek and Jack, Mr. and Mrs. B. H. Bickle and Tommie went to Lake Almorogordo Sunday where Bickle mastered the art of waterskiing.

Mrs. Oscar Allison and Mrs. Kenneth Precure visited in Lubbock on Monday.

W. R. Taylor of Filmore, Calif., visited his sister, Mrs. Lillie Wuerlein last week. Other guests over the weekend were Fritz Wuerlein and daughter, Janie of Enid, Okla., and Miss Lorene Shanks of Lubbock and Martha Wuerlein from Wayland College.

Billie Hucabee has returned to her home in Hageman, N. M. after an extended visit in the Harold Allison home.

Mr. and Mrs. Gene Tunnell ate Sunday dinner with the Harold Allison.

Mr. and Mrs. V. W. Viso were supper guests of the Kenneth Briscoes Sunday night.

Mr. and Mrs. James T. Brooks and daughters of Slaton, were weekend guests in the John Inman home. Mr. and Mrs. Harold Crooks spent Sunday in the John Inman

home. The Pleasant Valley 4-H Club met July 1 at 4:30 in the Community Center with the president presiding over the business meeting. Roll call was read by Sheryl Stevens, acting Secretary. Sheryl Stevens gave a report on 4-H Rally Day.

A game was lead for recreation. Mrs. Lady Claire Phillips of Littlefield and Patricia Mitchell of Spade gave a talk on 4-H records books.

Refreshments were served by Kathryn West and Rickie Stevens.

Signed by Sheryl Stevens Pleasant Valley 4-H Club Reporter.

Mrs. Bonnie Haberer went to Plainview Monday to be with her brother, O. K. Angeley who underwent surgery.

Mr. and Mrs. Orpha Neely from Frederick, Okla. spent the weekend with their daughter and family, the W. F. Stewarts.

Mr. and Mrs. E. Steinbock of Lazbuddie were Sunday dinner guests of Mr. and Mrs. W. F. Stewarts.

Pretie Stewart is in Cheyenne Wells, Colo. working in the wheat harvest.

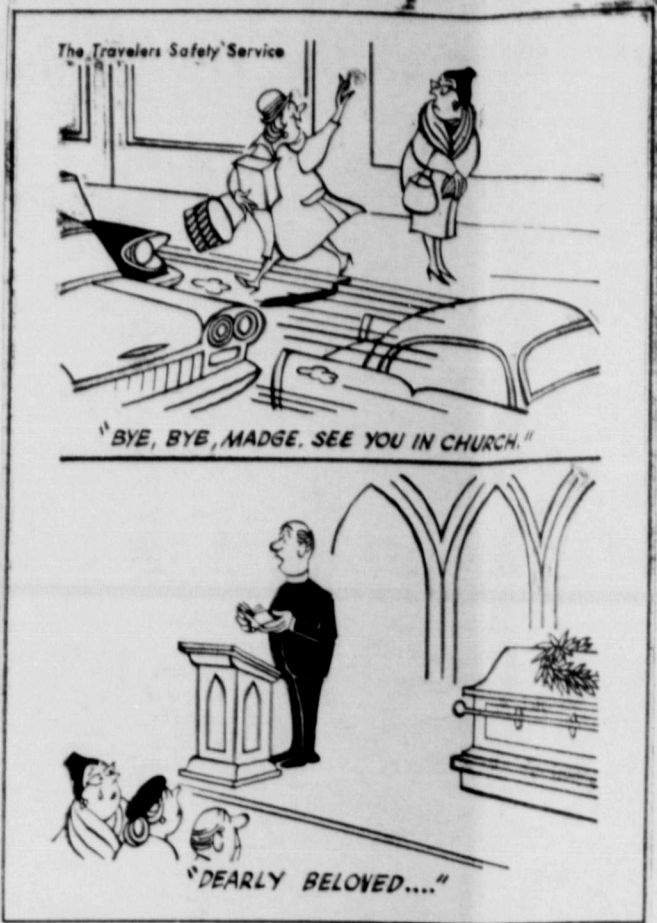

Mr. and Mrs. E. K. Angeley, Ken and Patsy went to Abilene to attend the Bagwell family reunion at the Abilene State Park.

Mr. and Mrs. W. E. Angeley of Morton visited Mrs. Bonnie Haberer last week.

Party Line.....

Capt. and Mrs. Kenneth F. Hite and children of Colorado Springs spent the holiday weekend in the home of his mother, Mrs. Lena Hite. Capt. Hite is stationed at the U. S. Air Force Academy at Colorado Springs.

The Luckless Legton by Earth Caplan

More than 253,000 pedestrians were killed and injured in 1958.

Many Laws And Regulations On Controlling Livestock Movement

College Station — Though Texas has a law requiring that cattle, hogs, sheep and goats must be branded or marked and the brand or mark recorded, brand inspectors estimate that 25 percent or fewer of the cattle and less of the other animals are branded.

However branding is still a common practice in some areas and the branding laws are still in force. Some of these brand laws are obsolete and the enforcement machinery is inadequate. This information comes from a

new publication released by the Texas Agricultural Experiment Station titled, "Analysis of Texas Laws and Regulations Controlling the Movement and Sale of Livestock."

The publication brings together many of the more important laws and regulations so that producers, selling agents, buyers and consumers may know the legal requirement to be observed and the protection provided.

The responsibility for prevention and control of livestock diseases in Texas rests with the Livestock Sanitary Commission. The steps being taken by the Commission and the U. S. Department of Agriculture to control and eradicate livestock diseases are discussed.

Auctioneers and how their pro-

profession is regulated and the testing of livestock scales at public auction markets and stockyards are among the other topics of discussion.

To obtain a copy of the bulletin, write the Agricultural Information Office, College Station, Texas. Ask for MP-322.

Jay Dan and Rhonia Miller of Odessa are here for an indefinite visit with their aunt, Mrs. Homer Starkey while their mother is recuperating from surgery.

Francis Strickland of Lubbock

spent the 4th of July weekend with her sister and family, Mr. and Mrs. Homer Starkey.

It's all right to speak straight from the shoulder, providing it originates higher up.

Party Line...

Mr. and Mrs. H. S. Sanders and Mr. and Mrs. H. S. Sanders Jr. and Mike of Muleshoe spent the 4th of July weekend at Alamogordo Lake fishing, boating and camping.

Mr. and Mrs. Hap Williams and Ruby Neal of Atlanta, Tex. are guests in the A. L. Kelley home this week. They are former Earth residents.

Mrs. Bob Reynolds, daughter of Mr. and Mrs. O. K. Angeley is making her home with her parents while her husband is serving with the U. S. Air Force overseas.

Earth News - Sun

By Vern Sanford

Some men erect buildings that serve as monuments for years to come. Other build bridges. A few become giants of commerce and industry. All make great names for themselves.

Did it ever occur to you that the man who plants a simple little tree that grows and grows and grows also build a monument that may last for a hundred years?

Perhaps one of the greatest as well as one of the simplest things any individual can do, to project himself into posterity, is to plant a tree. It certainly is a satisfying accomplishment, to say the least, and one that increases in stature as time goes on.

If one tree can do so much for mankind, then think what hundreds of trees can do. Or a thousand trees planted by one man.

With this thought in mind I became especially interested in a re-

cent news release from the Texas Forest Industries Committee. It said that Dr. S. R. Warner, a retired department head at Sam Houston State Teachers College at Huntsville, has been voted the outstanding Texas Tree Farmer of 1958.

Dr. Warner owns 2,000 acres of timberland scattered throughout Walker, San Jacinto and Grimes Counties. It isn't rich land.

But Dr. Warner enjoyed the outdoors. He worked in the woods. He planted a few trees where others had been removed. He took his biology class into the woods and there the members also learned about trees.

Dr. Warner began to assemble his acreage back in the 1930's, when most everyone else was crying about the depression. After his daily classes he went into the forest and did hardwood control, culling out worthless timber. Then he concentrated on building better stock. That's why today he is re-

gnized as the outstanding tree farmer of Texas.

The tree farm which Dr. Warner built provides home and haven for wildlife. Birds nest in the trees. Small game breed and multiply in his forest.

Too little is known by the average person of the trees of East Texas, where we still have our national forests. Actually there are six properties in the Texas Tree Farm program which have been in family ownership for more than 100 years.

These farms, dating back to the days of the Republic, are in the Houston County group. They cover 655 acres of the 13,415 acres already booked in the program in this area.

Throughout Texas there are 1,111 tree farms covering 3,669,774 acres. This put Texas in third place in the nation in certified acreage. Mississippi is first and Alabama second.

With a tree program like this, Texas will continue to have wildlife for a long time. This is particularly true through the new soil bank program which gives credit for wildlife habitat practices. Under this program landowners may enter their land in the program, and still harvest a crop—wildlife.

Whether you realize it or not, as a hunter or fisherman, you are helping in this program. Excise taxes on hunting and fishing equipment are helping do this job.

The Dingell-Johnson bill, which provides for fishery work, showed a collection for 1958 of \$4,994,822.41. That is up some \$270,000 over the previous year.

Under the Pittman-Robertson act, the collection on guns and am-

munition totaled \$14,617,360.75. This was a half-million less than 1957.

Money derived from these two sources is used by the U. S. Fish and Wildlife Service on a matching basis with state funds. There is Federal aid up to 75 per cent of approved projects conducted by state wildlife conservation agencies.

Texas is taking full advantage of its apportionments—the maximum under the present formula.

Texas' Outdoors Industry
There is a growing demand in Texas for hunting and fishing equipment. As a result more and more Texas manufacturers are springing up to turn out outdoors merchandise.

For example, not many know it, but in Texas there is a rod manu-

facturer making high class glass rods. It is the Makit Rod Co. of Fort Worth. In Houston is the Central Specialty Co. which makes a fish hook disgorger that is sold nation-wide.

In San Antonio an electric reel is manufactured for use on party boats fishing in deep water for red snapper in the Gulf of Mexico; while in Tyler a fellow by the name of Hilton Meigs is making an aluminum portable kitchen, sold all over the United States.

In Bellaire, near Houston, True Tone Game Calls, Inc. is making a quail call that is most natural. Another Houston firm is making decoys out of 56 ounce juice cans.

Practically every city of every size in Texas has a manufacturer turning out good fishing lures or

some kind of device for fishermen. It not that, then bullets, mounts and scopes, game calls, clothes or camping equipment for the hunter.

Some of the award-winning fish caught in the United States the past season were taken on Texas made lures. They include the Bomber, Whopper Stopper, Dixie Jets, Old English Hump Lures, Pico Perch, Jensen and a half-dozen others.

Texas has a leadership in boat manufacturing. There are such companies as Whitehorse, Fleetform, Lone Star, Texas Maid, Red Fish, Yellow Jacket, Bilt-Well, A. R. A., Glastron, Glass Magic, Glasflite, Continental, Holmes, Helton and many others that are adapted to our particular waters.

There are good boat-trailer-manufacturing firms in Texas, too—to name a few, the Little Dude and the Imperial of Fort Worth; the Lone Star and the Dok-King of Grand Prairie; and the Chief of Dallas.

There is also a fine house boat made in Texas—the Terra-Marina—which is made in Houston. It is an amphibious land and water cruiser that serves as a combination house boat and a house trailer.

Other firms in the state manufacture everything from fish nets, trot line, catfish bait and rod holders to fish hook covers.

Yes sir, hunting and fishing figure very strongly in our economic picture in Texas today... and public interest is rapidly increasing.

Marketing quotas for the 1960 wheat crop have been proclaimed by Secretary of Agriculture Benson and he set July 23 as the date for a growers referendum on quotas.

How about putting a little sunshine away for a rainy day?

Cookies In Good Taste

By Betty Barclay

Coconutty Chocolate Macaroons

2 squares Baker's Dot Chocolate; 1/4 cup peanut butter; 1/2 cup sweetened condensed milk; dash of salt; 1 teaspoon vanilla; 1 1/2 cups (about) flaked coconut; 2 tablespoons chocolate chips (optional).

Melt the 2 squares of chocolate over hot water. Add peanut butter and stir until smooth. Add milk, salt, vanilla, and coconut. Stir well to thoroughly mix all ingredients. Drop from a teaspoon onto a well-greased baking sheet. If desired, press a chocolate chip into top of each macaroon. Bake in a moderate oven (350°F.) 10 to 12 minutes. Remove from baking sheet while still warm. Makes 2 dozen macaroons.

Note: Store in a tightly covered container.

Party Line.....

Mrs. Henry A. Williams and Mr. and Mrs. E. W. Simms, all of Dallas, are house guests of Mr. and Mrs. Homer Hodge.

SHAMROCK

QUALITY you can measure by your car's PERFORMANCE

Petty's SAFE DRIVING

Lee Petty, famed racing driver, NASCAR champion, and Daytona Beach 500 mile winner in 1959, now serving as road test manager for National Dynamics Corporation, manufacturers of the battery additive VX-6, offers these six professional SAFE DRIVING tips.

- Slow down as you approach a curve but accelerate slightly while you're on it. Power on the curves gives you better traction and stability than brakes.
- Don't use bright lights. The only excuse for brights is when you're going at high speed, all alone, with no traffic, on a completely unlit country road in order to spot curves ahead. Since this situation seldom occurs for most drivers—just don't use your brights.
- Be polite to motorists and rude to your passengers. Never take your eyes off the road while conversing and driving.
- Keep your tires hard. Inflate your tires a little more than the maximum recommended by the manufacturer. You won't get any bounce as long as your shock absorbers and springs are in good condition... and you'll get a better ride—even more mileage for your gas.
- Keep the rubber casing of your battery clean by wiping occasionally with an oil soaked rag. Also keep the leads at maximum efficiency by cleaning terminals and battery leads with steel wool.
- Learn to use the best and most scientific additives. Use a battery additive to prolong the life of your battery. Use a moisture evaporating additive for gas. Use an oil sludge solvent additive in your crankcase.

Date Set For Springlake Lions Club Broom Sale

The Springlake Lions Club has set the date Saturday, July 25 for their annual Broom Sale. The sale will kick-off at 9:30 a.m. Thirteen teams of Lion Club members plan to canvass all of the city and rural territory, eight miles north and 5 south and 3 miles, also east and west of Springlake. Items may be purchased at the stand on Main Street. The sale starts at 9 a.m.

Brooms, mops, door mats, lawn rakes and numerous other household items will be sold. Housewives are asked to make a check of their needed items and purchase them from a Springlake Lion Club member.

Honored On Birthday With Lawn Party

Debbie Matlock was honored with a lawn party, Friday on her 8th birthday at the home of her grandmother, Mrs. Thelma McClanahan.

Sandwiches, potato chips, Cokes, ice cream and cake, decorated with a "Miss Caketite" doll, was served to Donna Blackwell of Earth, Ann Bearden, Donna Jester, Debbie Jester, Cretia Washington, Frances Ann Dodson, Sammie Matlock,

Jeff Matlock and the honoree. Also Mrs. Bud Matlock, Mrs. Bill Matlock, Mrs. Thelma McClanahan, Mrs. F. W. Bearden and Mrs. Arnold Washington, Brent and Randy.

Shetland Pony To Be Given Away By Jaycee Club

A guella colored Shetland pony saddle and bridle will be given away Saturday night, July 11 between performances by the Earth Jaycee Club at the 15th Annual Rodeo.

The Jaycees, in cooperation with the Earth Chamber of Commerce made an all day tour Tuesday to neighboring towns advertising the Rodeo and showing the Shetland pony.

Plans for the Rodeo Dance was completed at the regular meeting of the Jaycees, Monday at noon. The Dance will be held at the American Legion Building.

Twenty-two members and ten guests attended the meeting including Price Hamilton, Chester Elmore and Bud Jones of the Rodeo Association.

Mr. and Mrs. Edd Bell and son have returned home after spending several days vacation in Waco.

Party Line.....

WHAT A LITTLE COWPOKE DREAMS OF — Having his own horse and saddle. This beautiful Shetland pony and saddle will be given by the Earth Jaycee Club to some lucky person between performances at the 15th Annual Rodeo, Saturday

night, July 11 at the Rodeo Grounds. Pictured on the pony is Craig Barton, son of Mr. and Mrs. Weldon Barton and standing is Davey Haberer, son of Mr. and Mrs. Roger Haberer.

AMONG THOSE WHO ARE ILL!

Mrs. Phillip Haberer underwent major surgery, Monday at Taylor Clinic in Lubbock. Attendants report her condition to be fine. Mrs. Haberer is the daughter of Mrs. Zou Wilson. Mrs. Roy Haberer of Dimitt flew to Lubbock from Portland, Oregon to be at the bedside or her daughter-in-law.

Mrs. Abe Griffin is receiving treatment at the Littlefield Hospital and Clinic this week.

Forrest Simmons' condition is reported to be fair at the Methodist Hospital in Lubbock after undergoing major surgery last Thursday.

O. K. Angeley underwent major surgery at the Plainview Medical Center, Monday.

Mrs. Carl Perkins was admitted to the Littlefield Hospital and Clinic where she underwent surgery Monday.

Jimmie Lawrence, son of Mr. and Mrs. John Lawrence, underwent tonsilectomy at the Littlefield Hospital and Clinic, Tuesday. He is reported to be getting along fine.

Party Line.....

Mr. and Mrs. J. H. Teel, Raymond, Carolyn and Marilyn of Ingleswood, Calif. are visiting in the Lester Kelley and Marvin Huff homes this week.

Party Line...

Mr. and Mrs. H. S. Hickman, Mrs. Arnold Shelby, Mrs. Doug Shelby, Mrs. John West, Mrs. Bruce Higgins, Mr. and Mrs. O. B. Whitford, W. A. McCool and Rev. Cecil Meadows visited Forrest Simmons at the Methodist Hospital, Thursday.

Mrs. W. A. McCool is visiting her parents Mr. and Mrs. H. J. Pickard in Chico, Calif. for two weeks.

Mrs. Lena Hite has recently returned from a visit with her son, Mr. and Mrs. Robert L. Hite and family of Camden, Ark. She also visited with relatives and friends in Vernon, Tex. and Ardmore, Okla.

Mr. and Mrs. Cecil Brown and Randy spent the holiday weekend with Mr. and Mrs. Frank Hicks in Odessa, Tex.

NOTICE BRIDAL SHOWER

Miss Bonnie Brown will be honored with a Bridal Shower at 8 p.m. Tuesday, July 14 in the home of Mrs. Mike Dent, six miles west of Earth on the Muleshoe Highway. Everyone has an invitation to attend.

PINK AND BLUE SHOWER

Mrs. Bobby Reynolds, the fortunate Judy Angeley, will be honored with a Come and Go, Pink and Blue Shower from 4-6 p.m., Friday, July 10 at the Earth First Baptist Church Dining Hall. Everyone is invited to attend.

HELLO WORLD!

IT'S A GIRL

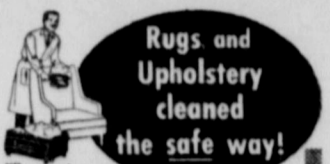

Mr. and Mrs. James E. Carter of Portales, N. M., proudly announces the birth of a daughter at 9:30 a.m. July 4 at the Roosevelt County Hospital in Portales.

She has been named Sherry Dee and weighed 7 lbs 5 oz.

Grandparents are Mr. and Mrs. Britton Roberson of Earth and Mrs. Faye Stark of Abilene.

Party Line.....

Mr. and Mrs. R. C. Hyde attended the Hyde family reunion in Seymour, Tex., July 4. They returned home Sunday.

people who are at home with quality...choose **GAS** appliances

Walk through an elegant doorway and you expect an elegant interior... and today, elegance in the kitchen is synonymous with GAS appliances. For example, the built-in range. Both in appearance and performance, it confidently maintains its place amidst the finest of home furnishings. Its sleek, luxurious beauty is always in perfect harmony with the most discriminating decor. Completely automatic from top burners to broiler, a Gas range makes the dull routine of cooking almost effortless... offers the perfect complement to cooking skill in creating meals that delight the eye, tempt the taste. And aside from the general excellence of its engineering, a Gas range offers a whole list of unduplicated advantages such as closed-door smokeless broiling, no warm-up wait, instant shut-off with no heat hang-over, and an absolute minimum of heat fluctuation. In every way — economy included — GAS gives you more! And where the finest is truly appreciated... GAS belongs.

fuel for a growing empire **Pioneer Natural Gas Company**

Reckless driving killed and injured 255,000 persons in 1958.

Wheat Growers To Vote On July 23

College Station — Marketing quotas for the 1960 wheat crop were proclaimed on June 1 by Secretary of Agriculture Ezra Taft Benson. This seventh successive proclamation of wheat marketing quotas is required by a wheat supply that is 99.6 percent above the normal supply level.

The Texas share of the 1960 allotment will be 4,092,251 acres, which is nearly 7,000 acres less than the 1959 allotment of 4,099,094 acres.

Benson proclaimed a national wheat acreage allotment of 55 million acres, the minimum permitted by law, and announced State shares of the national allotment. He also set July 23, 1959, as the date for a referendum to determine producer approval or disapproval of quotas and announced a 39-state commercial and a 10-state non-commercial wheat-producing area for 1959.

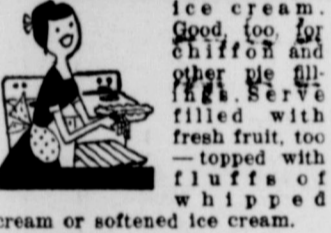

If producers approve marketing quotas, under the proclamation announced June 1, the national average support price available to eligible growers in the commercial area will not be less than the minimum support to be announced before the referendum. On the basis of the present supply of wheat and present legislation, the legal minimum wheat support price for the 1960 crop would be at 75 percent of parity. Individual farm marketing quotas will be the normal production or the actual production from the farm acreage allotment, whichever is larger.

The 1960 national wheat acreage allotment of 55 million acres is the minimum fixed by law and is the same as for the 1958 crop. If the allotments had been determined solely on the basis of the law's supply formula, the 1960 allotment would have been zero acres.

At least two-thirds of the producers voting in the referendum on July 23 must approve quotas for the 1960 crop if they are to be in effect. Growers who will have more than 15 acres of wheat for harvest as grain in 1960 in any one of the 39 commercial wheat states come under the regulation of quotas and will be eligible to vote in the referendum.

Coconut Meringue Shell

THE feather-light flaked coconut pie shell will provide a delicate and different base for your favorite flavor of ice cream.

Good, too for chiffon and other pie fillings. Serve filled with fresh fruit, too — topped with fluffs of whipped cream or softened ice cream.

Coconut Meringue Shell
2 egg whites, unbeaten; ¼ teaspoon cream of tartar; dash of salt; ¼ cup sugar; ¼ teaspoon vanilla; 1 cup Angel Flake Coconut.

Combine egg whites, cream of tartar, and salt in mixing bowl. Beat until foamy throughout. Add sugar, 2 tablespoons at a time, beating after each addition until sugar is blended. Then continue beating until mixture will stand in very stiff peaks. Fold in vanilla and coconut. Spread mixture on bottom and sides of lightly greased 8-inch pie pan. Bake in slow oven (325°F.) about 30 minutes, or until shell feels dry and firm. Cool. Fill shell with ice cream or other cold filling.

Fresh Plums Top USDA's July Plentifuls

College Station — Fresh plums top the July list of plentiful foods in the Southwest, as California's new crop is estimated at 64 percent more than last year.

Peaches, lemons and limes are other fruits on the list. Eggs will continue plentiful, as will ice cream and small-sized turkeys. Summer vegetables will show up in wide array throughout the area.

Peanut butter and vegetable fats and oils complete the July list of plentifuls, as announced by the USDA's Southwest Food Distribution Division, Dallas. Each item is expected to be in heavier-than-normal supply and menu planners usually will find it economical to rely heavily on these foods.

Today's youngsters don't leave footprints on the sands of time — just tire tracks.

IN THIS WORLD Reg. U.S. Pat. Off. by Editor

HOW "DRAKE'S FOLLY" CHANGED THE WORLD...

EDWIN L. DRAKE, A RETIRED TRAIN CONDUCTOR, WHOSE ONLY QUALIFICATION WAS A FREE RAILROAD PASS, WAS SENT TO TITUSVILLE, PA., TO INSPECT AN OIL SPRING ON PROPERTY OWNED BY A NEW HAVEN, CONN., ROCK-OIL COMPANY.

ROCK-OIL FROM NATURAL OIL SPRINGS WAS IN DEMAND FOR MEDICINAL PURPOSES.

DRAKE FIRST TRIED TO DIG FOR OIL WITH PICK AND SHOVEL. THIS WAS IL-ADVISED. SOME PEOPLE EVEN CALLED HIM CRAZY. AFTER FAILURES AND DISAPPOINTMENTS, HE HIRED AN OLD SALT WELL MAN NAMED SMITH TO DRILL FOR THE OIL. TO STOP WATER SEEPAGE, THEY DROVE AN IRON CASING DOWN TO BEDROCK.

ON SATURDAY, AUGUST 27, 1859, THEIR DRILL WENT INTO A CREVICE AT 69 1/2 FEET. THEY STOPPED WORK, BUT THE NEXT DAY (SUNDAY) SMITH PEERED INTO THE WELL AND SAW OIL.

TODAY OIL WELLS ARE DRIVEN AS MUCH FIVE MILES DEEP STILL USING DRAKE'S DRILLING AND CASING PRINCIPLES!

Hints Offered On Control Of Pecan Scab

College Station — A fungicide for the control of pecan scab disease that is nonphytotoxic to pecan leaves, results in more luxuriant foliage, better leaf retention, greater nut weight and increased yields per tree, has been proved effective by the Texas Agricultural Experiment Station, said D. W. Rosberg, associate professor in the Department of Plant Physiology and Pathology. The fungicide is Zineb and was applied as a spray at a rate of 2 pounds per 100 gallons of water.

The tests were conducted in Bastrop, Wharton and Parker counties during 1956-58. Nine fungicides were tested in 1956 to determine their effectiveness in controlling the disease. The treatments were applied as sprays to trees of the Delmas variety, which are highly susceptible to scab disease, said Rosberg.

Most effective control of scab disease was obtained with EMMI, Zineb, Bordeaux mixture and Puritized Agricultural Spray were comparable in their effectiveness. However, he said the latter two compounds produced marginal leaf burning while a damaging infestation of mites and aphids developed in the Bordeaux sprayed trees. A mild phytotoxic effect expressed as slight chlorosis and brittleness of leaflets occurred in the trees sprayed with EMMI. In contrast, the leaves of the Zineb-treated trees were dark green in color and phytotoxic effects were absent.

Rainfall is a primary consideration in determining when a spray

THE ST. LAWRENCE SEAWAY Its Possible Effects on North American Industry

The recent official opening of the St. Lawrence Seaway will have various effects on certain industries and companies within the United States and Canada. From an international point of view, it presents an exciting new horizon for world trade when one considers that we now will have shipping lanes all the way from the Atlantic Ocean to the United States, such as Cleveland, Detroit, Chicago and Duluth. Space limits a detailed analysis as to what this new and vital medium of communication means to the United States and Canadian companies, but a general analysis certainly is in order at the present time.

First let us take a positive approach and determine some of the benefits that may be derived:

1. The St. Lawrence Seaway will increase significantly the importance of Buffalo, Cleveland, Detroit, Chicago and Duluth as world ports. Duluth especially, now still heavily dependent on an iron ore industry where ore reserves are rapidly depleting, should welcome this new development. Further west of the four cities mentioned, Duluth should provide an important communications center both for industrial imports and exports from the Middle West and points further west.

2. The iron ore industry of Canada should benefit substantially. Ores shipped by rail to the St. Lawrence ports from Labrador may readily be transported both to the Lake Erie ports near the heart of the American steel industry where the demand for these ores is steadily increasing, and also to Europe where iron ore reserves are inadequate to meet the fast growing steel production of Belgium, France, the United Kingdom and West Germany.

3. Public utilities serving the principal lake ports should grow along with the cities they serve.
4. Some railroads that service these lake ports and provide transportation to cities further inland should also benefit.

A realistic approach, however, must recognize that disadvantages will be incurred by certain industries in both the United States and Canada:

1. European industries benefited by technical advancements and low cost production through moderate labor costs will provide greater competition to their American counterparts in Middle Western areas. Several consumer non-durable goods industries will be affected along with many of the so-called capital goods industries such as machinery and machine tools.
2. Railroads running between the East Coast ports and Middle West are likely to suffer competitively.
3. With easier transportation facilities to bring oil into Eastern Canada and the Middle West, the western Canadian oil companies along with some American oil-producing companies located between the Middle West and the West Coast may suffer.

To summarize

The opening of the St. Lawrence Seaway is an exciting event as far as world trade is concerned. It may be of importance to the growth of some of the Great Lakes cities as future international seaports. Nevertheless, as far as American industry is concerned, it should be viewed with a more sober view for this channel of transportation opens up new ways of lowering transportation costs from Europe to the Middle West and offers our overseas competitors further opportunities to compete in American markets. **FNS**

For further information on results of the tests, write the Agricultural Information Office, College Station, for a copy of the publication, "Experiments For the Control of Pecan Scab Disease." Ask for MP-346.

Vegetables Subject Of Extension Publication

College Station — There is a vegetable to suit almost every menu need, say the extension food and nutrition specialists. In countless ways, vegetable—fresh, canned, frozen or dried—contribute interest and variety to menus. Vegetables are also important in the diet for general good health.

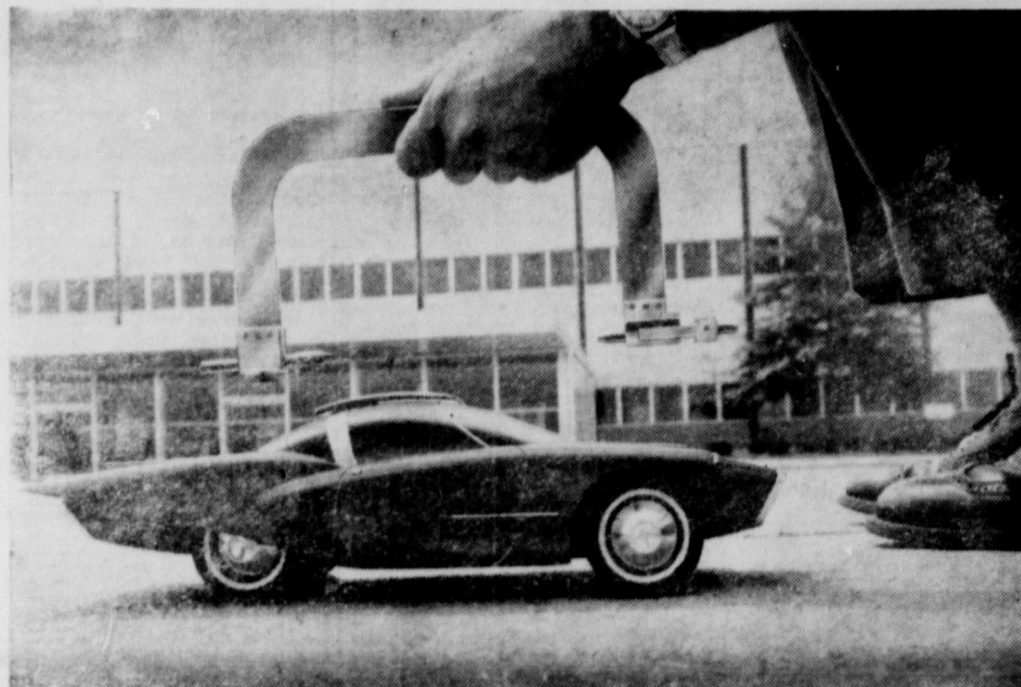

According to the Texas Food Standard, the daily food bill for Texans, three kinds of vegetables—green or yellow, other vegetables and Irish or sweet potatoes—are good nutrition goals for every homemaker.

"Vegetables . . . Selection, Care, Cooking" is the title of the new bulletin released by the Texas Agricultural Extension Service.

Irish potatoes, say the specialists, are needed daily for carbohydrates which furnish energy. New potatoes are an excellent source of ascorbic acid or vitamin C, important for good gums and to prevent ease of bruising. Sweet potatoes also are excellent for carbohydrates and vitamin A.

Vegetables with a deep green or yellow color are excellent sources of vitamin A which helps prevent colds and skin infections, night blindness and improper growth in children. Other vegetables include all those that are red, green or yellow, and supply other needed vitamins and minerals, the specialists added.

Topics of discussion in the bulletin are: buying vegetables, how to store vegetables properly, methods of preparation (recipes) and vegetable platters.

NEW SMALL CAR?—No, this is not one of the much discussed new lighter cars being measured by a 20-foot giant. It is, however, one of the sleek entries in the 1959 Fisher Body Craftsman's Guild model car competition being "sized-up" by one of the judges in Detroit. Judging of hundreds of such miniature "dream cars" is now underway to determine teenage winners of \$115,000 in cash awards and university scholarships.

Contact your local county home demonstration agent for a copy of the bulletin, B-923.

Tips on Touring

By Carol Lane
Women's Travel Authority

How To Haul A Trailer

If you and your family drive with a trailer on your next vacation trip, you'll find driving easier with the help of these ideas from veterans.

Don't expect your usual fast pick-up or instant responsiveness in traffic. You'll have to shift more often; automatic transmissions will take longer to shift, too.

Drive slower than usual. Be extra careful to anticipate stops. The extra weight needs a longer stopping distance. Always use low gear in going downhill.

When passing, or turning corners, remember the extra length behind you. When backing up, aim the rear of the trailer, not the rear of the car. This'll take a wider turn than usual.

Watch sharp curves. The trailer has a tendency to "whip." Keep to your lane.

Attach a heavy trailer to the car frame—not just to the bumper. Many states require a safety chain. Better check.

In the view from your sideview mirror obstructed? Get a "western" or long-armed job.

Also check whether your tail lights, turning blinker and stop light can be seen. Use hand signals. As an extra precaution, put reflecting tape on the back of the trailer.

New Welder At Earth Pump and Machine Works

Don De Hay of Littlefield has assumed duties as a welder for Earth Pump and Machine Works.

De Hay was previously employed at Dewey Kilby Drilling Co. in Littlefield.

Mr. and Mrs. De Hay have two children, a son Billy Don, one year old and a seven weeks old daughter, Donna Lou.

They are making their home at the Guy Kelley house on north-west First Street.

Cash Prizes For Best Floats In Today's Parade

Prizes will be presented today (Thursday) for the three best floats in the parade which begins at 4 p.m. on Main Street.

The Earth Chamber of Commerce will present cash prizes for first, second and third best floats. Prizes will be \$25.00, \$15.00 and \$10.00.

All businesses, clubs, lodges, chapters and children are urged to enter floats in the parade.

TOO LATE TO CLASSIFY

Quiet Calves Lost Weight at Weaning

College Station — Tranquilized beef calves in a weaning test at Texas Tech College's PanTech Farms lost slightly more weight than non-tranquilized calves, although they were quieter and walked the fence less. The tests were made on 42 Hereford steer calves which were weaned November 12, 1958.

All calves were weighed individually after being taken from their mothers. Twenty-one received intramuscular injections of 50 milligrams of perphenazine each and the remaining 21 were left as controls with no injections. The calves were kept in a corral

and were fed 10 pounds of sorghum fodder, 2 pounds of oats and one half pound of cottonseed cake per head per day. There was no difference in the amount of feed consumed by the two groups. They were handled identically except that the tranquilized calves were in one pen and the controls in another.

Individual weights were taken as the calves were placed on wheat pasture after nine days in the corral. The calves were weighed again individually after twelve days on wheat pasture. The average weight on November 12 (weaning) was 501 pounds, the average weight on November 21 was 484 pounds, giving a nine day shrink of 3.37 percent. The average weight on December 3 was 503 pounds and at the end of 21 days

the shrink was 0.20 percent. The average weight of the tranquilized group on November 12 was 512 pounds and on November 21, 489 pounds, giving a nine day shrink of 6.25 percent. Their average weight on December 3 was 507 pounds and at the end of 21 days they had a shrink of 0.98 percent.

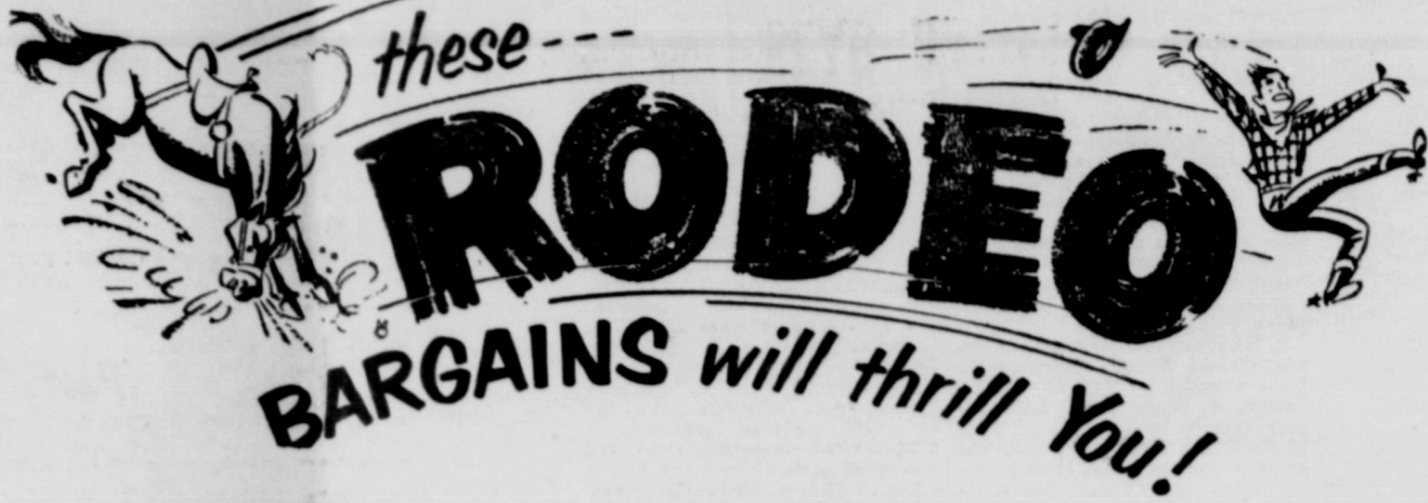

The progress report which gives more details on the tests can be obtained by writing the Agricultural Information Office, College Station. Ask for PR-2090.

Mrs. F. F. Rozeman and Shelby spent Sunday with her sister, Mrs. Kelley Sears at Brownfield. Also visiting in Brownfield was her brother, Dr. George McLeroy who has been associated with the American University at Beirut, Lebanon in Animal Husbandry the past three years.

Party Line...

Mr. and Mrs. R. C. Hyde accompanied their son and family to visit relatives, friends and points

of interest in California recently. They visited an aunt of Mrs. Hydes in San Gabriel, that she had not seen in 30 years, also Mr. and Mrs. Bert Howard at Bellflower, Calif., former Earth residents. They visited Disneyland, Knotts Berry Farm, Ghost Town and many interesting points.

G. B. Lawson Graduates From Oklahoma University
Bobby G. Lawson, son of Mr. and Mrs. W. B. Lawson of Circle, graduated recently from Oklahoma University. He majored in Electrical Engineering and he also lacked one point graduating with special distinction.

He is now in Fullerton, Calif. to receive his Master's degree. Later he will go to El Paso to teach in Guided Missiles.

Bobby wants to express his thanks to Springlake High School which gave him the first look toward the future.

Mr. and Mrs. Tom Smith of Quannah visited with his mother, Mrs. A. B. Smith last week.

Mr. and Mrs. Cecil Brown and Randy visited with her parents, Mr. and Mrs. Frank Hicks of Odesa July 4.

Mr. and Mrs. W. T. Cayton and Mr. and Mrs. Lovell Walden ate dinner in Olton Sunday.

Dalpa Banks spent Sunday with Janita Blackburn.

Mr. and Mrs. Ernest Baker and Mrs. James Sanderson returned

home from Glorieta, N. M. Sunday night.

G. A.'s Go To Camp At Floydada

The 9 and 10 year old G.A.'s left Monday morning for camp near Floydada. They were Linda Packard, Billie Kay Kelley, Rebecca Parish, Jacqueline Parish, Janita Blackburn, Dalpa Banks Debbie Watson. They were accompanied by Mrs. F. W. Bearden and Ann and Mrs. Troy Blackburn.

Mrs. Thelma McClanahan spent several days last week in the home of her daughter and family. Mr. and Mrs. Doug Avery of Muleshoe, while her granddaughter, Pam was a patient in a Clovis Hospital. Pam was admitted due to a reaction of a tetanus shot she received 12 days earlier.

Mr. and Mrs. Earl Meeks and son, Dennis of Ft. Worth and Mr. and Mrs. Frank Criswell and girls of Olton visited last week with their mother, Mrs. Elma Criswell, who suffered a broken foot last week. Her foot must remain in a cast for six weeks. They also visited in the Earl Watson home.

Mr. and Mrs. Jimmy Winders are now employed at the local post office due to the retirement of Mr.

Lamb County Students Attend NTSC Last Year

DENTON — Lamb County was represented by five students at North Texas State College in the school year just ended, the registrar's office has announced.

During the nine-month session, a total of 7,337 different students were enrolled. They came from 211 of the state's 254 counties, from 32 other states, and from nine foreign countries.

Dallas County again sent the largest number to NTSC, 2,149 students. Other counties represented by a large group were Tarrant 539, Denton 881, Collin 163, Grayson 156, Cooke 134, Harris 131, Ellis 122, McLennan 113, Wichita 108, Gregg 191, Montague 99, Wise 81, Galveston 76, Navarro 61, Smith 59, Parker and Taylor 58 each, Kaufman 57, Bowie 51, and Harrison 50.

These record figures reflect the steady increase in enrollment at the college in recent years.

To accommodate the growing student body, there are now just completed, under construction, or in the final stages of planning buildings which will add 66 million to a physical plant already valued at more than \$20 million.

These buildings for industrial arts, physics - mathematics, business administration, library annex, education - home economics, and music. The new business administration building, for example, will have almost as many classrooms as the entire college had in 1945 and more offices.

Boone, Dwala and Danny returned to their home after having spent two weeks in Portales.

Mrs. Doug Avery and girls and Mrs. Thelma McClanahan and Frances Ann Dodson attended Homecoming at Sunnyside July 4.

Mrs. Jess Matlock and Mrs. G. C. Bearden Sr. attended Open House for Mr. and Mrs. Truelock at Earth Saturday to help them celebrate their 60th wedding anniversary.

Mrs. Mattie Boone has returned to her home after having surgery at Methodist Hospital recently. Her sister, Mrs. Nattie Thomas of Floydada is staying with her.

Dudley Roach and Larry Billingsly spent a few days last week in Ruidosa.

Mr. and Mrs. Lynn Richards of Carlsbad spent Sunday night and Monday with her sister and family, Mrs. and Mrs. Kenneth Boone.

Mrs. Arnold Washington, Randy Cretia and Brent and her sister, Betty were in Clovis Saturday to visit with relatives.

Mr. and Mrs. Kenneth Hinson and Mr. and Mrs. Earl Parish were in Lubbock Friday night.

Penalty Rates For Cotton Set

by Lamar D. Aten, Jr.

The marketing quota penalty rates for excess 1959 crop cotton have been fixed at 19.1 cents per pound on upland cotton and 40.9 cents per pound on extra long staple cotton. Chairman D. C. Terrell of the Lamb County Agricultural Stabilization and Conservation Committee announced June 17, 1959. Both of these figures represent 50 per cent of the parity price as of June 15.

Growers approved marketing quotas for the 1959 crops of upland and extra long staple cotton in referendum on Dec. 15, 1958. When cotton marketing quotas are in effect, a farmer who does not comply with the cotton acreage allotment established for the kind of cotton grown on his farm is subject to a penalty on his farm marketing excess. The cotton crop from such a farm is also ineligible for price support. Each type of cotton is treated independently.

Progress of Cotton Measurement At the present time we have 33 reporters measuring cotton in the county. As of June 30 we have 784 farms measured which leaves a balance of 1688 farms not measured. Progress hasn't been as good as expected because of rainy weather

and continued hail-outs.

We want to remind each farmer that if someone will help the reporter when he comes to the farm the farmer and a more speedier better progress can be made. We think this will be very helpful to correct job can be done. We appreciate all cooperation.

Make Your Own Sundae

By Betty Barclay

A WONDERFUL dessert combination—fruit-flavored gelatin, ice cream and fruit—has opened a new vista of delightful fruity sundaes. So easy to prepare too and pleasing to both eye and palate.

Make a bowl of fruit-flavored gelatin, following package directions, and then let your imagination take over. The idea is to spoon out the chilled gelatin into a serving dish, add a scoop of ice cream and top with fruit. If you favor banana splits, then spoon the gelatin on a peeled split banana, add ice cream and top with berries or fruit cocktail. The sky's the limit in luscious combinations you and the kids can dream up!

and continued hail-outs.

We want to remind each farmer that if someone will help the reporter when he comes to the farm the farmer and a more speedier better progress can be made. We think this will be very helpful to correct job can be done. We appreciate all cooperation.

BEST ENGINES!

One of 7 Big Bests Chevy gives you over any car in its field

You've got more to go on than our say-so: Every motor magazine has given Chevy's standard passenger car and Corvette V8's unstinted praise. SPORTS CARS ILLUSTRATED says it this way: "... surely, the most wonderfully responsive engine available today at any price." And if you want the thrift of a six, you still get the best of it in a Chevy.

BEST ECONOMY No doubt about this: a pair of Chevy sixes with Powerglide came in first and second in their class in this year's Mobilgas Economy Run—getting the best mileage of any full-size car, 22.38 miles per gallon.

BEST BRAKES Not only bigger, but built with bonded linings for up to 66% longer life. Just to prove what's what, Chevy out-stopped both of the "other two" in a NASCAR*-conducted test of repeated stops from highway speeds.

*National Association for Stock Car Advancement and Research

BEST RIDE A few minutes behind the wheel will leave no doubt about this. MOTOR TREND magazine sums it up this way: "... the smoothest, most quiet, softest riding car in its price class."

BEST TRADE-IN Check the figures in any N.A.D.A.* Guide Book. You'll find that Chevy used car prices last year averaged up to \$128 higher than comparable models of the "other two."

*National Automobile Dealers Association

BEST ROOM Official dimensions reported to the Automobile Manufacturers Association make it clear. Chevy's front seat hip room, for example, is up to 5.9 inches wider than comparable cars.

BEST STYLE It's the only car of the leading low-priced 3 that's unmistakably modern in every line. "In its price class," says POPULAR SCIENCE magazine, "a new high in daring styling."

NO WONDER MORE PEOPLE ARE BUYING CHEVROLETS IN '59 THAN ANY OTHER CAR!

Open invitation to excitement, the Impala Convertible... and America's only authentic sports car, the Corvette.

Try the hot one—visit your local authorized Chevrolet dealer!

Mrs. Weldon Bradley and children were dinner guests of Mr. and Mrs. Elmer Dixon of Dimmitt Monday.

Mr. and Mrs. James Worthington and girls of Fort Worth spent

Tuesday night with Mr. and Mrs. Weldon Bradley and family.

Mr. and Mrs. Marlin Power visited in Plainview Wednesday night with Bill McWilliams.

Mr. and Mrs. Bob Ball from Olton visited Wednesday with Mr. and Mrs. J. Paul Waggoner and family.

Mr. and Mrs. Irving King visited in Amarillo Wednesday with Mr. and Mrs. Francis King and family and other relatives.

Mrs. George Redwine from Portland, Oregon visited Wednesday through Saturday with Mr. and Mrs. R. E. Duke and other friends in the community.

The W.M.S. met in circles Wednesday night for the last session of the Mission Study Book, "The Holy Spirit in Missions." Mrs. Murie Rogers and Mrs. Kobert Paschal taught the last three chapters of the book.

Mr. and Mrs. Weldon Bradley visited with friends from Melrose in Clovis Wednesday.

Mrs. George Redwine visited with Mr. and Mrs. Weldon Bradley and family Thursday.

Mr. and Mrs. H. G. Preston and family from Shallowater visited Thursday with Mr. and Mrs. J. T. Holcomb and family.

Mr. and Mrs. Wendell Payte of Big Springs arrived Friday to spend the weekend with Mr. and Mrs. R. E. Duke and Mr. and Mrs. Robert Duke and family.

Mr. and Mrs. R. V. Bills and Larry visited Friday with her sister and husband, Mr. and Mrs. Jim Dalton of Hart.

Rita Holcomb and Dorothy Wright of Dimmitt spent Friday night in Lubbock with Mrs. Guy Ship' Rita's aunt.

Sgt. and Mrs. Leroy Taylor and family from El Paso arrived Friday to spend the weekend with Mr. and Mrs. Marlin Power. Sgt. Taylor is the brother of Mrs. Power.

Mrs. Roy Phelan, Mrs. Irving King, Mrs. Marlin Power, Mrs. Lloyd Blanton, Mrs. R. E. Duke, Mrs. Odell James and Mrs. Ed Thompson attended the drapery class in Dimmitt Thursday.

Mrs. Ray Axtell visited her mother in Tulla Friday.

Mr. and Mrs. V. H. McKee visited with friends and relatives in Sunray and Dumas Thursday.

Mr. and Mrs. A. T. Holcomb and family from Knox City visited Saturday night with Mr. and Mrs. J. T. Holcomb and family.

Mr. and Mrs. Earl Phelan and family and Mr. and Mrs. Hershell Wilson and family spent the weekend in Weatherford.

Mr. and Mrs. Ronald Henderson and Kevin spent the weekend in Denver, Colorado with friends.

Mr. Leon Blundell and Gary from Grand Prairie, Texas visited Saturday with Mr. and Mrs. R. V. Bills and Larry. Gary spent the night with them.

Mr. and Mrs. Bobby Armstrong and Scottie and Sharon Conard visited in Lubbock Saturday with Mrs. Armstrong's sister and other relatives. Her nephew returned to Lubbock with them after a week's visit here.

Mr. and Mrs. Marlin Power and Sgt. and Mrs. Leroy Taylor and family visited Saturday with Mr. and Mrs. Clarence Baggett and Chester Lee of Olton and Bill McWilliams of Plainview.

Mr. and Mrs. Lowell Westmoreland and Lori Lene from Lubbock spent Saturday and Sunday night with Mr. and Mrs. Alton Louder and Yvonne and other relatives.

Mrs. Dwayne Louder and Lance went with her parents, Mr. and Mrs. Wayne Rutherford of Earth to Sayre, Okla. Saturday to visit with Mrs. Louder's grandmother over the weekend.

Mr. and Mrs. Gordon Bradley from Tucumari, N. M. attended the July 4th Homecoming Saturday. They brought Mrs. Frank White to the home of her son and family Mr. and Mrs. Frank White, Larry and Sharon.

140 were registered for the July 4th Homecoming Saturday. A skit of the history of the community was a large part of the program. Mrs. George Redwine was presented a "slinky" dog for coming the farthest distance, Portland, Oregon. Mrs. L. D. Winders was presented a small iron skillet for being the oldest person present, and Milton Ott was presented a folding measuring tape for having lived in the community the longest. It was decided to have the Homecoming again next year.

Mr. and Mrs. Roy Phelan spent Saturday night and Sunday with Mr. and Mrs. Lloyd Morris of Tulla.

Craig Brooks from Dimmitt spent Friday night with Mr. and Mrs. Roy Lilley and family.

Mr. and Mrs. C. J. Johnson and family attended a family gathering in McKinsey Park in Lubbock July 4.

Mr. and Mrs. George Baine, George Jr. and Robert from Ada, Okla. spent the weekend with Mr. and Mrs. John Spencer.

Mr. and Mrs. Arthur Baggett from Sundown visited Saturday

with Mr. and Mrs. W. E. Louder Mrs. Baggett and Mrs. Louder attended the July 4th program at the Community Building.

Mr. and Mrs. Cody Marlar from Lorenzo, Mrs. Bobby Brooks and children of Dimmitt and Mrs. Owen Hankins of Hart and children visited with Mr. and Mrs. Roy Lilley and family after the July 4th Homecoming.

Mr. and Mrs. Wade Dent from Plainview, Mr. and Mrs. Si McClay and family from Morse, Tex., and Mr. and Mrs. Alonzo Ferguson from Truth or Consequences, N. M. visited with Mr. and Mrs. Howard Bridges after the July 4th program.

Mr. and Mrs. Rex Jenkins and family left this week on a two-week vacation in Tennessee.

Mrs. Odie Moore from Dimmitt has been visiting this week with her daughter and family, Mr. and Mrs. C. J. Johnson and children.

Mr. and Mrs. C. L. Sparkman from Plainview visited Sunday with Mr. and Mrs. Ernest Waggoner and Mr. and Mrs. J. Paul Waggoner and boys.

Mr. and Mrs. Howard Spencer from Lubbock and Mr. and Mrs. Noah Spencer and family were dinner guests Sunday of their parents, Mr. and Mrs. John Spencer.

Mr. and Mrs. Alton Louder, Mr. and Mrs. Milton Ott, Mr. and Mrs.

Milburn Haydon and Mr. and Mrs. Lowell Westmoreland and Lori Lene were among the relatives attending a birthday dinner honoring Mrs. Bob Ott and Peggy Ott in the home of Mr. and Mrs. Harry Mitchell of Springlake Sunday.

Mrs. Woodrow Powell and children of Earth visited Sunday afternoon with Mr. and Mrs. Ezell Sadler and David and Mrs. James Powell and Randy.

J. B. Hensley from Hale Center visited Sunday with Mr. and Mrs. Robert Paschall and Mr. and Mrs. Ezell Sadler and family.

Mr. and Mrs. Bobby Brooks and family and Alene Lilley of Dimmitt were supper guests of Mr. and Mrs. Roy Lilley and family.

70 attended Sunday School with 54 in Training Union Sunday. After Training Union an impressive G. A. Coronation Service was held under the direction of Mrs. C. J. Johnson, Director and Mrs. Weldon Bradley and Mrs. J. T. Holcomb counselors. Five Maidens, Two Ladies-In-Waiting, two Princesses,

and two Queens participated in the program and received recognition. Craig Brooks from Dimmitt and Cindy Elkins served as crown bearer and flower girl for Queen Sharon Lilley, Butch Holcomb and Ann Spencer served as crown bearer and flower girl for Queen

Jane Ogletree. Herald for the occasion was Olvis Spencer, Trumpeter, Carl Bradley and Pianist, Mrs. Howard Bridges. Those presiding were Mrs. C. J. Johnson, Mrs. E. R. Sadler and Mrs. Murie Rogers.

Mr. and Mrs. Francis King and family of Amarillo visited with Mr. and Mrs. Irving King Saturday.

Mr. and Mrs. E. R. Sadler, Myles, Donnie Lilley and Mr. and Mrs. Gale Sadler and Denise were Sunday guests of Mrs. Pearl Sadler in Dimmitt.

People who borrow money to get themselves out of the rut usually end up in the hole.

Campbell Cotton Gin, Inc.

DODD COMMUNITY

REPORT FROM WASHINGTON

by GEORGE MAHON

This report is about agriculture.

COTTON: There are several items of interest. Certain railroads have instituted action to reduce freight rates on cotton. I have joined with others in asking that this benefit be passed on to cotton farmers in slightly higher purchase and loan rates than those announced by the Department. I believe this will be done in the near future. This may mean about a million dollars to West Texas producers.

GOVERNMENT LOAN LIMITATIONS: Amendments to farm bills have passed both the Senate and the House which would fix limitations on government loan and purchase programs at \$35,000 to \$50,000. I have opposed these provisions. If these provisions should be enacted into law as now written, all farmers in my judgement would be affected adversely as a result of the over-all consequence of such action. Quite a large number of West Texas farmers would be affected adversely on a direct basis.

Compromises are being sought which would soften the limitation proposals. One proposal would give any farmer unlimited access to the loan, but would provide that the limitation could not exceed at the time the title to the pledged crop is taken over by the government. Details of what may happen are not yet clear, but there is every indication that some limitations on loans and payments will be provided by law.

WHEAT: The House and Senate have passed wheat bills. Agreement between the House and Senate on a final version of the legislation has not been reached. A compromise version raising the support level from 75 percent of parity to 80 percent and providing for an acreage cut of 20 percent has been voted down by the House. Further efforts to agree on a bill to send to the President are under way. The outcome is uncertain. There is the threat of a veto by the President if the sup-

port level is increased, even if accompanied by a sharp acreage reduction.

MILK: There is nothing new on the gain sorghum front. There is still no limit on plantings and the announced support level of 60 percent of parity, 10 parity points below the support of last year. The support price will be about 31 cents per hundred below last year.

GENERAL FARM LEGISLATION: Everyone seems to agree that the entire farm program needs to be substantially overhauled. It now appears that this will not be done at this session. The ground-work is being laid and agreements are being sought which would make possible a major overhaul job next year.

FARM LABOR: Hundreds of letters from West Texas farmers indicate serious concern over the proposal that minimum wage be established for farm labor. Farmers complained that they cannot raise wages in the face of dwindling income. Their concern is well-founded.

It continues to be true that there is no likelihood that Congress will pass at this session any of the pending bills fixing minimum wages for farm labor. However, the Secretary of Labor advocates minimum wages for farm workers

and he has not backed down from his position that he can, under existing law, in effect fix minimum wages and establish standards of employment for farm labor recruited through the United States Employment Service across state lines. He has referred the issue to the Attorney General. Briefs have been filed in opposition to the Secretary's contention. The matter has been before Attorney General Rogers for many weeks, but he has not acted.

As to Braecro labor, indications are that the program will operate about as it did last year. Final negotiations on the new agreement with Mexico are now underway. The two-year extension of the law becomes effective July 1, 1959.

Corner on Cotton

BY BOB COLLINS

Think you won't be affected by crop support limitations recently voted by both houses of Congress because you are a "small" cotton farmer? . . . we'll bet you are wrong . . . first, limitations on loans can seriously disrupt orderly marketing processes and depress prices, forcing many small farmers to use the loan when they would not otherwise (and this could mean more cotton will go into the CCC rather than less) . . . it would work like this: Loan limits could force the sale of much of the crop as it comes from the fields since it would be entirely unsupported and the producer would need his money immediately . . . of course storage charges and interest are paid . . . this selling the unsupported crop as it comes from the field could drive down the prices and all cotton farmers could get hurt . . . of

course, the ideal thing is to have a cotton crop that stands on its own feet without having or needing supports, but it can't be done this way . . . in the past not so disturbing disruptions of established commercial procedures have started tragic chain reactions in our overall economy . . . the politicians are playing with fire.

Added Strength

Research is underway to add strength to cotton lint . . . those are the short fibers that stick to seed after ginning . . . when this is done the linters will have a greater use in papermaking . . . right now they have a limited use because they are weaker than the long cotton fibers . . . USDA research division is at work on the project.

New Weed Killer

Experiments with diuron during the past two years give some promise of eliminating cost of a couple of cultivations . . . this weed killer was applied early in the season when cotton was six to eight inches high.

The Cost

Diseases, weeds, and, of course, insects are the biggest headaches for cotton farmers . . . cost of these is about 12c per pound of cotton . . . no estimate is available on what politicians are costing farmers.

Insect Activity Increases On South Plains

Although increased insect activity had been observed in many localities, the recent heavy rains reduced infestations on cotton in many fields. Thrips, aphids, and fleahoppers are insects which suffer more marked populations reductions by intense rains.

Thrips were reported in light to heavy infestations, prior to the heavy rains, in most counties in the area. Heaviest damage was generally observed where cotton was in the 4 to 6 leaf stage. Cotton should be checked for possible reinfestation as the weather clears. Late planted cotton, especially, should be treated if damaging infestations develop, to prevent delay in fruiting.

Poor control continues to be reported with the use of some insecticides. Some of the materials formerly effective have been found to give inadequate control, even at the higher recommended dosages. Where difficulty in control is experienced consult the Texas Guide for recommended materials.

Fleahoppers were generally found in light infestations on one earlier planted cotton. Light to medium infestations were reported in some fields in Floyd, Lynn, and Terry Counties. Heavy populations were present in some fields in Howard County. As cotton reaches the stages of squaring it should be checked for fleahopper infestations.

Grasshoppers were reported in light infestations on cotton in Galveston, Howard, and Yoakum Counties. Damaging infestations were present in some fields in Lamb, Lynn, Farmer, Seury, and Swisher Counties.

The information contained in the Cotton Insect Situation release has been compiled from reports received from county agents, voc. agri. teachers, personnel of Texas A & M College System, branches of the U. S. Dept. of Agr., commercial cotton inspectors, chemical companies, and others. We hope everyone who does any field checking will again send us a report of the situation as you find it.

Need For Occupational Therapists Is Great

There is need for occupational therapy help in practically every hospital and crippled children's center in Texas, according to Mrs. Rena C. Worthington, director of this degree course at Texas Woman's University.

"Occupational therapy is defined as remedial activity prescribed by a physician for those who are physically or mentally ill, disabled by accident, disease or age, or born handicapped," she explained. TWU has the only accredited school of occupational therapy in the Southwest, one of 27 in the nation.

Graduates of the five-year program are prepared for careers in the treatment of the handicapped in these areas: crippled children, physical disabilities, mental disorders, emotional disorders, mental retardation, geriatrics, general medicine and surgery, and tuberculosis.

A number of scholarships are available to qualified high school graduates.

Mrs. Worthington reports she has just completed a pamphlet, "Rewarding Careers in Occupational Therapy," which gives details of the program.

Further information may be had by writing Mr. Mitchusson at Wayland Baptist College or by seeing him.

ify and educate more of the talent of our nation. This requires programs that will give assurance that no student of ability will be denied an opportunity for higher education because of financial need.

Because of the shortage of qualified teachers which has developed in recent years and which is expected to continue to increase, the government has made a provision for the cancellation of a part of this loan as a special inducement. The law provides that up to 50 percent may be cancelled, including interest, for five years of teaching in an elementary or secondary school.

Defense Loan Funds Available Now at Wayland

PLAINVIEW — Wayland Baptist College has \$10,000 in National Defense Loan Funds available for superior students this fall, according to H. L. Mitchusson, college business manager to whom applications should be sent.

Only full-time superior students are eligible, according to the provisions of the grant from the grant from the United States Office of Education. However, students who commute to the campus daily are eligible if their academic records are sufficiently high.

The policy that prompted Congress's passing the National Defense Education Act includes "the security of the nation requires the fullest development of the mental resources and technical skills of its young men and women. We must increase our efforts to iden-

Cool, Liquid and Long!

By Betty Barclay

LET sparkling glasses of iced tea and iced coffee be your own Summer "coolers," but for the youngsters make this tall and frosty "shake." To sweeten any one of these beverages, use maple-blended syrup—it's a new idea! And it's a delightful sweetener!

Frosty Maple Shake (Blender Method)
 ¼ cup Log Cabin Syrup; 1 package vanilla or chocolate mix for shakes; 1½ cups milk; 1 pint vanilla ice cream.

Place all ingredients in container of blender. Cover and blend until smooth—about 20 seconds. Serve at once. Makes 4 or 5 servings.

FFA State Convention In Austin July 15

AUSTIN — On July 15, Austin will roll out the red carpet for Texas Future Farmers as the youngsters gather in Austin for their annual state convention, the first for the capitol city.

Hundreds of Austin cars will bear a sticker "FFA, Ride with me," offering transportation between the City Auditorium and hotels. Austin businessmen will assist in the mass of detail necessary to a large convention, but the boys themselves, state officers and delegates will operate the program.

The three-day event will include talks by W. W. Jackson, Chairman of the State Board of Education, Tom Miller, the Mayor of Austin; J. W. Edgar, the Commissioner of Education; Alvin Hester, National FFA President from Oregon and others.

Just prior to the convention, the ten State Future Farmer officers will meet to study final plans. A state tractor driving contest, sponsored by the Stewart Company, will occur Tuesday.

The convention begins in earnest Wednesday, State President, Bill McDowell of Whitewright, will preside over the convention, assisted by nine vice-presidents representing all areas of the state.

Wednesday afternoon, July 15, the FFA delegates will hear greetings from other youth organizations including the Future Homemakers of America, Distributive Education Clubs and Vocational Industrial Clubs of Texas.

Delegates will name outstanding members, confer advanced degrees, present scholarships and awards and elect a new president

as a part of the business of the convention.

Among the concluding events Friday will be the naming of a State Sweetheart from the area sweethearts selected previously in area conventions.

Senator Debates Oil Taxes

A fight over oil taxes recently rolled over the Senate floor in debate over extension of the excise tax bill.

Senator Paul Douglas (D-Illinois) sought to reduce the 27 1/2 per cent oil depletion allowance, saying it would raise more than \$600 million in additional oil tax money.

Senator Ralph Yarborough (D-Texas) countered that to lessen the oil depletion allowance would lessen drilling for oil in the United States. This, he added, would throw men out of jobs and cause widespread unemployment in the oil producing states.

Yarborough agreed with Douglas on the necessity for raising revenue, and offered as a substitute for the Douglas amendment a proposal to tax foreign crude oil imports at two cents a gallon or 84 cents a barrel. The Yarborough import tax would not apply to Canadian or Mexican oil. The proposal would raise more than \$200 million per year if adopted.

After debate, the Yarborough foreign oil import tax substitute was defeated. The Douglas 27 1/2 per cent depletion reduction amendment was also defeated.

Tips on Touring

By Carol Lane
 Women's Travel Authority

Keep It Cool

Women, who do so much of the family driving, are taking more and more responsibility for the care of the car. To be sure your car stays cool during hot weather driving, ask your service station dealer to check these points:

1. Drain out all your anti-freeze, even if it's the "permanent" type. (Heat and time change the coolant, and rust and corrosion inhibitors are usually exhausted over the summer.)
 2. Flush out the cooling system with plain water. (If there's corrosion, rust or scale and grease, have him use a chemical cleaner.)
 3. Check the thermostat for operation at proper temperatures.
 4. Check all hoses for deterioration—inside and out.
 5. Tighten hose clamps; replace if necessary.
 6. Examine fan belt and other drive belts for signs of wear, loosening of tension.
 7. Look at the radiator filler cap—especially if it's the modern, pressure-valve type.
 8. Remove all bugs, leaves, papers, etc., from air passages in radiator.
 9. Refill cooling system with clear water, the softer the better, and add a good rust inhibitor.
 10. Run the engine until it's warm. Then make sure the system is completely filled. Check for leaks at radiator hoses, water pumps, cylinder head gaskets.
- Hot days ahead! Make sure your car keeps cool by having it checked NOW.

Program To Reduce Deaths on Texas Highway Construction Projects

Three departments of the Texas State Government and highway construction contractors have implemented a new program designed to reduce traffic deaths and injuries on highway maintenance and construction projects in Texas.

One of the first pre-construction conferences of its kind was conducted at Taylor, recently between officials of the Texas Highway Department, the Department of Public Safety and highway contractors on an eight-mile stretch of State Highway 95 from Taylor to Granger, soon to be started.

Presiding at the conference was Highway Department Senior Resident Engineer Frank Farris of Taylor. Joining in the meeting were Lt. Bill Butler, Sgt. F. E. Boyd and Safety Officer Bill Meredith of the Department of Public Safety's district office at Austin. In which the Taylor project is located, and E. W. Gieson and Noble E. Latson, partners in the Gieson & Latson Construction Co., of Austin, contractors on the new job.

Both the Highway Department and the Department of Public Safety have issued instructions to their various area representatives that these conferences are to be held all over Texas just before work starts on any highway project which will disrupt or change normal traffic patterns. In addition to the three involved units, press representatives and local officers are invited to attend.

The conference are designed to provide cooperation between the highway department, law enforcement agencies, the contractors and

the motoring public during construction periods.

Similar conferences held during the past few days at Perryton, Sterling City, and Taylor got the new program under way. It originated with a request from the Highway-Heavy Branch of the Associated General Contractors of Texas several weeks ago. Safety Committee, headed by Brad H. Smith, Director of the Governor's Highway Safety Commission.

At its first meeting, Governor Price Daniel, State Highway Engineer DeWitt C. Greer, Col. Homer Garrison, Jr., Director of the Department of Public Safety, and E. B. Cape of Houston, President of the Highway-Heavy Branch of AGC, were in attendance along with committee members.

A series of meetings resulted in agreement on the agenda for the pre-construction meetings and arrangements for cooperation between the agencies involved.

Smith said the mounting death toll on highway projects during recent years resulted in the committee's organization. He said 14 persons were killed in 1955 traffic on such projects, 28 died in 1956, 56 in 1957 and 70 in 1958.

The special committee will continue to function as needed, Smith said, to do everything possible to reduce this toll. Every phase of engineering, enforcement and educational problems involved are being studied by subcommittees of the main group.

Good character is still the best collateral for a loan.

Ralph Yarborough Reports On 'Cold War' G I Bill

The Post-Korean or "Cold War" G. I. Bill which could benefit 213,000 Texas veterans, has taken another step on the road to passage. The Senate Labor and Public Welfare Committee has given a favorable report on the bill.

The proposal next goes for debate on the floor of the Senate and if it is passed there, it will go to the House of Representatives for consideration.

I am author of the bill and was chairman of the Veterans Affairs Subcommittee which conducted public hearings on the measure. In addition, I will also be manager of the bill during debate on the floor of the Senate.

The bill now provides for educational and vocational training, including vocational rehabilitation for personnel with service-connected disabilities, and home farm loan guarantees.

This program for the benefit of our Cold War veterans, who are often exposed to wartime hazards as we have seen in the attacks on unarmed airplanes and other incidents, is similar to the highly successful plans used for servicemen who returned from World War II and the Korean Conflict. The program includes the period from February 1, 1955, when the Korean G. I. Bill ended, through July 1, 1963, the date of the end of the compulsory draft law. Also under this program, a great many Cold War veterans will be helped to buy their own homes or farms.

Great numbers of our young people, many of them veterans, continue to leave the farms because of conditions beyond control and to seek jobs in town. This program can help them prepare themselves for new jobs in town or they can receive training in agriculture, if they remain on the farms.

Because this education and training prepares the veterans for better jobs, they make more money and pay more taxes. The government has received an extra billion dollars a year from this source, enough to pay off the cost of the entire World War II program in 15 years. What comes in after the investment is paid off is extra money for the government.

We are all familiar with the part education plays in our nation's fight for survival. I believe this law will help America retain her World leadership, and help improve condition for all of us here at home.

"Okra Production in Texas" is the title of a new Texas Agricultural Extension Service publication. Copies are available from local county extension offices or the Agricultural Information Office, College Station, Texas. Ask for L-433.

Would you like more information on introduced bluestem grasses for cultivated pastures? E. M. Trew, extension pasture specialist, has released a new publication on the subject and copies may be obtained from local county agents or the Agricultural Information Office, College Station, Texas.

Okra Production Title Of New Publication

College Station — Okra production is commercially important in certain areas of Texas. It is a close relative of cotton and requires about the same cultural practices and climatic conditions. A soil which produces high yields of cotton is suitable for okra.

Okra production is discussed in a new leaflet, "Growing Okra in Texas," released by the Texas Agricultural Extension Service.

Several hundred acres are grown annually for the fresh or frozen market from the Lower Rio Grande Valley in the south to the High Plains in the northwest. The same good practices of soil rotation, soil following and soil preparation used with cotton to avoid the cotton root rot and Fusarium wilt are recommended for okra.

Clemson Spineless and Louisiana Green Velvet are the most popular and best adapted varieties for Texas. Both varieties are highly productive over long periods. Perkins Dwarf Green Long Pod is the preferred dwarf variety.

According to the leaflet, seven rules should be followed when growing okra: 1. Select a fertile, well-drained soil. 2. Select varieties that are well-adapted to the area, and consider your market, fresh or processing. 3. Plant in a well-prepared and well-fertilized soil. Assure proper moisture for germination. 4. Use seed from a reliable source. 5. Thin plants for proper spacing. 6. Harvest pods regularly. 7. Keep them in a cool shaded area and market as soon as possible. Handle the harvested pods carefully, and 8. Check and follow the quarantine regulations for your area.

You can obtain the leaflet from your local county agent. Ask for L-433.

It will pay Texas dairymen to raise their own herd replacements, says A. M. Meekma, extension dairy husbandman. Herd replacements, he adds, are a mighty important part of the herd improvement program and they deserve the best possible "bringing-up."

It takes wise parents to know that their own child was as much at fault as their neighbors'

Dairymen Advised On Calf Replacements

College Station — "It will pay Texas dairymen to raise their own replacements," says A. M. Meekma, extension dairy husbandman. This, he said, is one of the most important undertakings in a herd improvement program. However, because many Texas dairymen have followed a policy of buying rather than raising their replacements, the supply of young dairy females in the state is often short of demand.

The first 3 or 4 weeks of the calf's life is the critical period, said Meekma, and regardless of the feeding schedule followed, the fundamentals of a successful calf-raising program are the same during this period. For the first four or five days the mother cow's colostrum milk should be fed the calf, one lb. of colostrum per day for each eight to ten pounds of body weight. Thereafter, the calf may be shifted to limited full milk feeding or a milk replacer, said Meekma. If limited whole milk is fed, it should not exceed one lb. of milk to each eight to ten pounds of body weight, and milk from low-testing cows (3 to 4 percent fat) should be used, not to exceed seven pounds for the small dairy breeds and nine for the large.

At two weeks of age, begin feeding a top-quality (legume preferred) and a good calf starter containing 20 to 24 percent protein and not more than 10 percent fiber. At 60 to 90 days of age, the milk or milk replacer can be gradually discontinued as the calves will be consuming sufficient hay and starter for proper growth and development, the husbandman said.

Hay should be fed free-choice at all times, but starter should be limited to five pounds daily. Keep clean, fresh water and a mineral mixture containing equal parts of steamed bonemeal and salt before the calves at all times. Caution should be taken to prevent over-feeding of the starter.

It is also advisable to feed some grain (two to five pounds) between the ages of six to ten months. The regular dairy herd grain mix is usually satisfactory, Meekma said.

Hot weather poses hazards for the hen flock, says Ben Wormell, extension poultry husbandman. Keep them as comfortable as possible and this means plenty of clean, drinking water, properly ventilated houses and in cases of extreme high temperatures artificial cooling, he adds.

Corner on Cotton
BY BOB COLLINS

Recently some cotton organizations began talking of the need for over-all public relations in the industry... this was initiated, no doubt, by many of the erroneous statements concerning loans, "windfall profits" and any number of other things that make the farmers and merchants look like parasites on the national economy... when widely circulated magazines and newspapers leave the impression that federal aid to farmers is nothing but charity and when merchants are accused of "windfall profits" when they insist upon getting what they pay for, it's evident an information program about farming is long over due... cotton farmers and cotton merchants have been unjustly accused for some time now and the effects of this are apparent in both legislation and public attitude... some kind of a far-reaching public information program is needed not only for cotton but for the whole

farming industry... the public is getting enough misinformation to scuttle any orderly farm program... it will be quite a job to counteract all this.

World's First Bale
Probably the world's first bale of cotton for this season came from Mexico... was ginned on June 13... came from Matamoros area... planted on January 25.

Prospects Good
At this writing there are excellent prospects for cotton all over the cotton belt... some areas are having too much rain and there are a few bugs in some sections... all in all, though, it looks like a bumper crop.

New Weevil Feed
One research problem has been the growing of weevils on a year-around cycle because of lack of cotton plants for the young to nibble on... seems like this is about overcome now... there is a synthetic diet that the weevils go for... this will speed up research.

Fair Idea
We know of one large agricultural fair idea that could well be limited... it is to have a building at the fairgrounds devoted to showing new uses for cotton... as planned it will show the consumer some of the little known uses of the fiber and some of the things that cotton may be doing in the future with proper research... we'll let you know how the display works out.
