Two Local Representatives To Attend Science Symposium

JOHN LAWRENCE

The Springlake Independent School District will have two representatives at the Texas Nuclear Science Symposium at the University of Texas from June 8th through 12th. Carroll McDonald, Southwest Public Service Company manager, has announced. The symposium is a joint venture of the Texas Atomic Energy Research Foundation, of which Southwest Public Service Company is a charter member, and the University of Texas. Springlake's student representative will be Danny Byers, who will be accompanied by

Austin by faculty member John Lawrence.

The 500 students and teachers selected to attend the symposium will hear some of America's leading scientists bring them up to date on the latest developments in nuclear physics. In addition, the students will have the opportunity to inquire on careers in science and the college courses they should pursue for proper preparation.

Thirty-seven students and teachers from Southwestern's service area will go to Austin on June 8th by chartered bus.

DANNY BYERS

Commencement Exercises May 24 For Springlake High School

Commencement exercises for the 1963 class of Springlake High School will be held Friday, (tomorrow night) at 8 p.m. in the school auditorium. Invocation will be given by Bill Phillips, Springlake Church of Christ. Cary Latham, son of Mr. and Mrs. A. P. Latham, will present the Salutatory address. The Triple Trio, girl vocal group from Plainview High School will sing several vocal selections. The Valedictory address will be given by Jane McCord, daughter of Mr. and Mrs. Pat McCord. Superintendent Bill Mann will introduce Dr. Morris Wallace, head of the Education Department, Texas Tech, the commencement guest speaker. The students, upon being presented by Principal John Lawrence, will receive the diplomas from Bill Mann and James Busby, president of the school board. The school song, "Halls of Ivy" will be sung by the class. Guy F. Kelley will give the Benediction. Music for the processional and recessional will be furnished by the Wolverine Band.

MAY 30 CLEANUP AT SPRINGLAKE CEMETERY

Friends will meet at 8 a.m. Thursday, May 30 in Springlake Cemetery for a general cleanup. Everyone is asked to come out and help in this worthy cause. A few mowers will be needed as well as hoes and rakes. Work should be completed by noon at which time the ladies will serve sandwiches and cold drinks. A business meeting will be held at 10 a.m., with the election of officers. A short program will be presented. At 11 a.m. Cubs and Scouts of 614, Earth, will march through the cemetery to place a flag on each veteran's grave.

MRS. GLADYS McCASKILL

JODIE MAHAN

Joe Neil Ellis began his new job Monday morning as general plant operator with Pioneer Natural Gas Company, Earth.

Ellis, a former employee at Earth Cleaners, is a 1960 graduate of Springlake High School.

His wife is the former Minnie Wheat. They are presently residing on the Terry Martin place northeast of Earth.

TOP WOLVERINE GIRL... Carolyn Gregory is shown being congratulated by Coach Jodie Mahan upon being named for the honor. Carolyn has shown outstanding ability as forward for the varsity basketball team.

TOP WOLVERINE BOY... Dale Dent wears a broad grin as he was named by Coach Jodie Mahan for the high honor. Dale proved to be a sustaining crutch to the team in all athletic events.

Annual Awards Assembly Held Monday, May 20 for SHS Students

The Annual Springlake High School Awards Assembly was held Monday morning in the school auditorium with a large number of awards presented. Mrs. Marie Slover presented the following awards: Homemaking I, Jill McCord; Homemaking II, Alice Jaquess; Homemaking III, Linda Oden; Betty Crocker Homemaking Pin, Linda Oden; Leadership, LaDon Messer.

Jodie Mahan presented the following awards, Health, Linda Blanton and Carla Glasscock; Top Wolverine girl, Carolyn Gregory; Top Wolverine boy, Dale Dent; Fighting Heart, Barbara Barlow; Don Sanders and Steve Holt.

Margaret Womble presented the following awards: Typing II, Karen Barton; Typing I, Linda Oden; Bookkeeping, Annual, Carolyn Gregory, De Ann Adrian, LaDon Messer, Janice Blackburn and Janice Cowley.

Mrs. John Lawrence presented the English II award to Alice Jaquess; English III, Diana Glasscock, English IV, Steve Holt and Jane McCord; PTA award, Linda Oden.

Mrs. Velma Jaquess presented English I award, Jill McCord;

English II, Peggy Upchurch; Spanish I, Karen Barton and Spanish II, Jane McCord. Perfect attendance awards: Seniors, Victor Coker, Don Johnson, Linda Oden, Myrna Ridd, Juniors; Gary Cowley, Noble Miller, Floydell Crawford, Cheryl Foster, Sophomores, David Glasscock, Thomas Gregory, Rudolph Ortiz, Janis Layman, Pruda Sanders, Shirley Walker, Harwin Sanders, Beverly Kelley, Harold Powell, Brenda Townsend Sandra Crisp, Dewayne Parish, Freshmen, Ken Dawson, Mike Dent, Larry Glasscock, Davy Haberer, Larry Parish, Freddy Kelley, Jerry Don Sanders, Donna Gover, Nancy Alair, Kay Phillips, Diana Gregory, Carolyn Kelley, James Richardson, Peggy Kelley, Jill McCord, Helen Phillips, Harriet Ray, Veta Rudd, Kathy Richardson, Alicia Washington and Dwala Boone.

Class top honors were awarded to Jane McCord, senior; Janice Blackburn, junior; Karen Barton, sophomore; Jill McCord, freshman.

Honor Society trophies were presented to Debbie Barton, Joan Dawson, Lonnie Whitford Norma Kelley and Anita O'Hair.

Joan Dawson received the Valedictory medal and Cynthia Busby received the Salutatory medal.

Additional awards will be presented at the commencement exercises tonight at 8 p.m. in the school auditorium.

Janice Blackburn Among Top Ten

Janice Blackburn, daughter of Mr. and Mrs. Troy Blackburn, was among the topten finalists in the Queen Cotton contest in Plainview May 16.

The ten were chosen from 62 contestants competing in the annual affair.

Each contestant received a charm, commemorating the event.

8th Grade Commencement To Be Held Tonight In Auditorium

Commencement exercises for the 8th grade graduating class of Springlake Junior High School will be held tonight at 8 p.m. in the school auditorium. The theme of the occasion is "Stairway to the Stars." The invocation will be given by Chris McClure, followed by the Salutatory address by Cynthia Busby.

A group of 8th grade girls will sing the class song, "Moments to Remember." The Class Will will be read by Lonnie Whitford and Karen Jones will give the class history. A poem, "Football Laumui" will be presented by Logan Armstrong. Presentation of awards will be by C. L. Berry, principal.

Debbie Barton will present "Our Poem". Joan Dawson will then give the Valedictory Address.

Diplomas will be presented by Bill Mann, superintendent. Steven Mann will lead the benediction. Music for the Processional and Recessional will be provided by Becky Parish, pianist. Ushers will be Randy Washington and Ricky West.

Assisting at the door with the programs will be Donna Thrasher, Linda Gregory, Charlotte Sawyer and Billie Kelley. The class motto is "One Step at a Time, But Always a Progressive Step." Class colors are blue and white and the carnation is the class flower.

Wheat Referendum Defeated By Farmers In Tuesday Voting

The highly debated Wheat Referendum was defeated Tuesday as wheat farmers, throughout the plains and the nation, voted a strong no.

The proposed 1964 program was voted down by a sheer majority in Texas, Oklahoma, New Mexico and Kansas.

Thirty-two counties in the Texas Panhandle killed the proposal in this area with more than a 20% margin.

Challenged votes were due to be reviewed Wednesday, but were not expected to show a significant difference.

Lamb County farmers voted 92 for and 157 against with 14 votes challenged.

Voting at the Earth Elevator resulted in 16 for and 19 against with 5 challenged votes.

Voting at the Springlake Elevator resulted in 10 for and 17 against with one vote challenged.

Evelyn Clayton To Graduate

An Abilene Christian College senior from Earth, Evelyn Faye Clayton, is a candidate for the Bachelor of Science in Education degree in elementary education at commencement exercises Monday, May 27.

Miss Clayton is the daughter of Mr. and Mrs. E. C. Clayton of Earth. She graduated from Springlake High School in 1958.

Earth And Area Is Hit Tuesday By Heavy Rains

The Earth-Springlake areas staggered under a terrific downpour and extremely high winds Tuesday night about 8:30 p.m.

Estimates in the Earth area ranged from 1.3 inches to 3.4 inches. It is reported that large sections of farmland north of Earth were washed out and damaged to young cotton is expected to be heavy.

Much of the young cotton was lost during Sunday's sandstorm and high winds. Hail fell in the area four miles north of Earth, Tuesday night.

Springlake School called off classes Wednesday due to road conditions. The lake area along the school road was under water and the road was impassable.

Several low places on area highways became inundated during the storm, with several motorists being stranded in the deep water.

Between two and three inches fell in the city of Earth.

The last bell rings out Friday for the graduating class of '63... no more will the old alma mater class bell have reason to call together those who have long shared the many joys and sorrows through the irresponsible years of schooling.

Just as the sound from the last bell dies away... so dies, little by little the unity, the togetherness of a once devoted class, a class who stood together and sang "Auld Lang Syne" a class who chose the '63 class motto, "One Step at a Time, But Always Forward."

Oh, so soon, following the curtain fall Friday night on Graduation exercises and the sound of the familiar old class bell dies quietly from memory, the pattern of life begins its change.

No longer will the '63 graduating class have the same interests and desires that have so characterized those lives in the years past... for now they find themselves with new partners... partners with the world....

Even though young graduates quite often pause and are somewhat afraid of this new world before them, and attempt to cling to the yesterdays and live in past memories, this is impossible and definitely not the plan for the bright young graduates of today... though doubtless these happy moments will nestle themselves within the walls of memory...

Time, like erosion has a way of placing memories of these important days, into a small corner of one's mind, where it gradually fades and becomes hazy, along with the desire to remain the youthful graduate, for taking its place will be a busy tomorrow in a world that beckons the graduate to enter and become a useful citizen...

The world is yours, graduates. It stands before you with open arms outstretched awaiting you... Enter that world with a firm determination to further your education... go to college... grasp every opportunity to gain a higher education... Then step out in the world with a firm foundation, with confidence and determination...

... in readiness... then offer and give the world you very best - Remember, the world owes you nothing, but you in turn, owe the world something for your sojourn here...

The world needs you seniors. It needs more honesty, more love, more enthusiasm, more dignity, more culture, more religion. Give it a shot in the arm, so to speak, make the world know that a senior graduate of Springlake High School stood lightly on the threshold of life... pondered... then walked bravely forward, chose the right road, then hastily, without looking backward, walked onward through life, TAKING ONE STEP AT A TIME, BUT ALWAYS FORWARD to the sighted goal. A GOAL THAT WE, THE COMMUNITIES OF SPRINGLAKE AND EARTH HOPE WILL BRING YOU HAPPINESS, CONTENTMENT AND AT THE END A HOME IN HEAVEN.

NOSIN'

The following article, "Rules of the Game" was given to several parents attending a recent W.A.C. meeting...

Thought it might be good to pass on to you.

RULES OF THE GAME

A Chaplain's advice to a boy on graduation day:

I'm giving you the ball, son, and naming you the quarterback for your team in the game of life. I am your coach so I'll give it to your straight. There is only one schedule to play. It lasts all your life, but consists of only one game. It is long with no time out and no substitutions. You play the whole game all your life. You'll have a great backfield. You are calling the signals but the other three fellows in the backfield with you have great reputations. They are named Faith, Hope and Charity.

You'll work behind a truly (Cont. on Page 6)

Middleton-Bulls Announcement

Announcement of the engagement and approaching marriage of Miss JoAnn Middleton, of Amarillo, to Dennis Glenn Bulls, of Earth, was made at the announcement tea in the home of Mrs. Roy Kerr of Amarillo Saturday, May 18.

Miss Middleton is the daughter of Mr. and Mrs. Leon Middleton of Amarillo and her fiancé is the son of Mr. and Mrs. Crill Bulls of Earth.

Guests were received by the honoree, Mrs. Middleton, Mrs. Bulls and Mrs. Kerr, Miss Betty Lowe of Amarillo presided at the registration book.

Approximately eighty-five guests were served from an appointed table laid with a cloth of orchid satin with overlay of net. Orchids accented the swagged cloth and an arrangement of white stock and orchids centered the table. Mrs. William N. Durham of Amarillo presided at the silver punch bowl and petit fours were served by Mrs. Archie Pool of Amarillo.

Hostesses for the tea were Mrs. Archie Pool, Roy Kerr, Robert Kerr, William N. Durham and Miss Sondra Kerr.

Members of the house party included Mrs. R. L. Vaughan, Charles Ead and Miss Betty Lowe.

The wedding will be solemnized in the San Jacinto Methodist Church of Amarillo, July 20th. Officiating will be Dr. Luther Kirk, pastor.

Miss Middleton is a graduate of Tascosa High School of Amarillo, and is a junior business major at West Texas State University. She is a member of Chi Omega social sorority.

The prospective groom is a graduate of Springlake High School and attended West Texas University. He is now en-

Jo Ann Middleton

gaged in farming near Earth. Out of town guests attending the tea were Mrs. Eugene Lee, Kathleen Lee, Barta Jo Ben, Eldon Parish, Barney Glasscock, William R. Morris, Homer Sanders and Mrs. Crill Bulls all of Earth; Mrs. Beth Cook of Olton; and Mrs. Gary Bulls of Malheur.

Junior-Senior Banquet Held Saturday Night

The Annual Junior-Senior Banquet was held Saturday, May 18 at the Holiday Parkway

Inn, Lubbock. Jan Hay served as Mistress of Ceremonies.

Invocation was given by Phil Bearden.

The dinner consisted of tossed salad, baked chicken and dressing, creamed potatoes, green beans, hot rolls and butter, apple pie and iced tea.

Jerry Been gave the welcome, followed by the response by Troy Layman.

Jack Frost, Lubbock musician, entertained the group with harmonica music. Several vocal selections were presented by a girls' trio from Texas Tech.

Bill Mann, superintendent, read the class prophecy to close the program.

News Of Interest To Women

GA's Sponsor Mother-Daughter Tea Thursday

The GA's honored their mothers with a tea Thursday night in Fellowship Hall. The serving table was covered with a white cloth. GA dolls, depicting the different steps, of Maiden, Lady-in-Waiting, Princess, Queen, and Queen Regent completed the decorations on the piano and table.

Punch and cookies were served. Mothers present were Mrs. Gayle Jones, Mrs. Anita Nunn, Mrs. Orlan Bibby, Mrs. Betty Matlock, Mrs. Dorothy Washington, and Mrs. Bobbie Banks.

Also present were GA Leader, Mrs. Hugh Watson, and Frances Watson, GA Director. Girls present were Kathy Bibby, Jenna and Jimma Banks, Debbie Matlock, Kay Nunn, Allyn Jones and Cretia Washington.

Kidnap Breakfast Held Saturday At M. Sanders' Home

A come as you are breakfast was held Saturday at 7 a. m. in the home of Mrs. Marvin Sanders.

Twenty-one were present at the breakfast honoring the Rainbow Girls.

The early-risers were treated to orange juice, bacon, sausage, scrambled eggs, hot biscuits, butter and jelly.

The girls played records and report an enjoyable time.

Old-Fashioned Box Supper Held At Springlake

An old fashioned GA and WMU party was held in Fellowship Hall, Saturday night at 7:30 p. m. Displays of yesteryears were enjoyed by those present. Background music was furnished by Betty Parish.

The tables were covered in white, with a green paper strip down the center. Nosegays tied with yellow ribbons and lighted kerosene lamps completed the decor. The registration table was covered with a gold cloth, with a kerosene lamp placed on it.

The guest book was covered in orchid foil, and shaped like a diamond. It was edged in lace, with the inscription, "Those Wonderful Years". Thirty-three guests registered.

An old fashioned box supper was spread together and enjoyed by all present.

The program consisted of a welcome by the WMU president, Betty Matlock, group singing and a GA skit of an old fashioned 1913 GA girl and a 1963 GA girl. Linda Packard, dressed in costume, was the 1913 GA and Becky Parish was the modern GA. This was done in pantomime with Jamie Washington and Alyune Jones as readers.

A quartette, composed of James and Stump Washington, Ed Jones and Kenneth Boone, sang five songs of yesteryear.

After supper, Rev. A. R. Stewart brought a devotional. May is the month of birthdays for the GA's, their 50th, and the WML's 75th.

Good Luck

Springlake Sailor Returns to Port From Far East

Leslie D. Cook, seaman, USN son of Mr. and Mrs. Foy E. Cook, Route 2, Springlake, returned to San Diego, California, on April 30 after spending seven months in the Far East aboard the attack cargo ship USS Tulare.

The Tulare was part of the Seventh Fleet, a major element of American seapower abroad.

During the cruise, the ship visited Bangkok, Hong Kong, Manila, Nagasaki, Kobe, Yokosuka and Honolulu, with other elements of Amphibious Squadron Three.

The Tulare is the newest attack cargo ship in the Navy. She is designed to transport supplies and equipment to assault beaches.

Upon entering the Navy, September 11, 1961, Cook received his basic training at San Diego. He was assigned to duty on the Tulare following basic training.

A brother, Clifford, AME-3 is stationed at the U. S. Naval Air Station, Miramar, California. He has been in the Navy for 15 months.

Party Line...

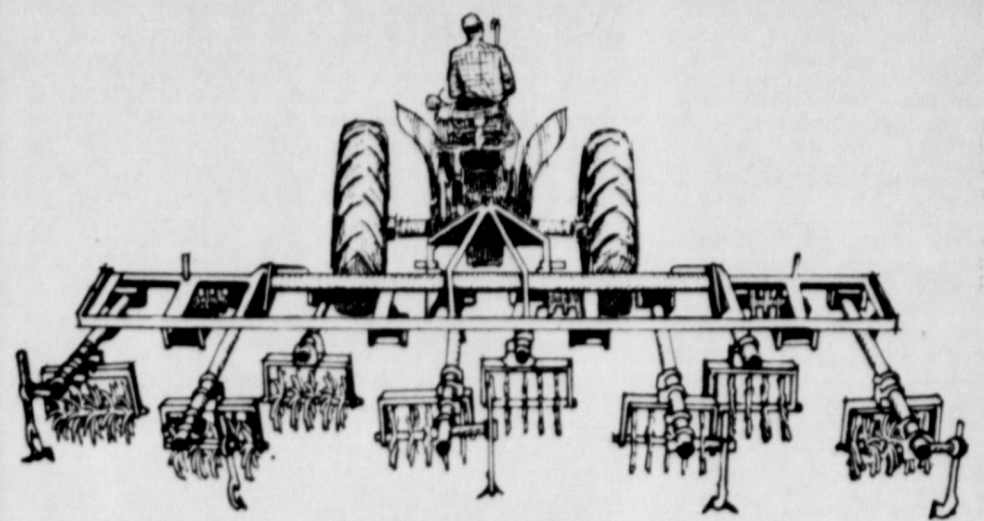

The Earth News-Sun, Thursday, May 23, 1963-Pg. 3

Visiting in the A. M. Sanders home Sunday were Mrs. Leta Kelley and Billie Kay; also Mr. and Mrs. Charlie Gatlin of Meridian.

Mr. and Mrs. Donald Royce Inglis and son Donny, of Jacksonville, Florida, spent Monday and Tuesday night in the Gerald Inglis home. They were enroute to visit relatives in California before he left for

overseas duty. He is a nephew of Gerald Inglis.

Mrs. Eugene Griffin, Carol and Fonda of Amarillo spent Tuesday and Wednesday in the home of her brother, Mr. and Mrs. Gerald Inglis.

"I don't know how I ever did without it."

When you come up with one tool that does the job of two or three, frees at least two tractors for other jobs, and pays for itself as it goes, you can understand why more than one farmer would make such a statement.

This is exactly what has happened in the case of the amazing Rolling Cultivator, an implement that has brought unprecedented acclaim from farmers, dealers, county agents and other agricultural specialists from one end of the country to the other.

Here is a high-speed cultivator—working up to 10 miles per hour—that will break crust,

mulch soil and weed crops cleanly in one operation. It will even form beds if you want it to—at the same time. With the Rolling Cultivator, it's once-over, all-over, perfectly, swiftly, and you can save enough time, labor and money to pay for it in one season (one farmer said "one week").

It would take all the pages of this paper to give you the complete story of how the patented and only true ROLLING CULTIVATOR has saved crops and made money for farmers from coast to coast. All we can do is give you an idea of its worth and ask you to

Letter to the Editor

Dear Editor:

A titanic battle between freedom and world communism is now being waged in the high schools, colleges and universities in America.

At stake are the minds and loyalties of our youth. The outcome may well determine the future of our country.

J. Edgar Hoover, Director of the FBI, has reported, "In 1959 the Communist Party, U.S.A. launched a major campaign with youth as its target. Campuses throughout the nation became prime target for communist infiltration and recruitment efforts." As a former counter-spy for the FBI, I can testify from firsthand knowledge that the communists place extreme importance on their activities on college campuses.

For years free men and free nations have suffered grievous losses to the forces of oppression and dictatorship. Should the history of the past 30 years be repeated, victory would be inconceivable.

Recently, however, I have observed a bright ray of hope. It is the national conservative youth organization, Young Americans for Freedom.

YAF was formed only two and one half years ago in Sharon, Connecticut. Today YAF can proudly and significantly boast 20,000 members in 300 chapters in every state of the union. I am proud to serve on their National Advisory Board with such outstanding conservatives as Senators Barry Goldwater, John Tower, Strom Thurmond and many others.

I do hope that you will join with me in giving these young people the financial support they so desperately need. I know that there are many demands on you to support worthwhile causes, but because of the essential work YAF is doing in our country's schools, I feel very deeply that this may well be the most important contribution you can make this year.

Sincerely yours,
Herbert A. Philbrick

PFC. EVERETT F. CODY

Earth Soldier To Receive High School Diploma

Pfc. Everett F. Cody, son of Mr. and Mrs. Carl Cody will receive his high school diploma May 24, in Nuerenberg, Germany, where he is stationed. Enlisting February 28, 1962, Cody received his basic training at Ft. Ord, California. He then took an advanced training course at Fort Knox, Kentucky before being transferred to the base in Germany. The 22 year old soldier will complete his three year tour of duty October 1964. He attended Springlake School prior to enlistment.

Twirlers And Drum Major Chosen Thursday

Try-outs were held Thursday May 16, at Springlake High for drum major and twirlers for the 1963-64 Wolverine Band. Those selected as twirlers are Marilyn Coker, head twirler, Gwen Smith, Alicia Galloway and Cynthia Busby. Winning the drum major honor was Lynn Hamilton. Judges were Bob Priest, Olton band director and Mrs. Danny Smith, Springlake teacher.

Ye therefore shall be perfect, as your heavenly Father is perfect.—(Matt. 5:28).

We should replace memories of past mistakes with supreme desires to be what God wants all of us to be—God's perfect children.

Autos Collide In Sandstorm

A two-car collision Sunday about 5:30 p.m. one mile north of Springlake School resulted in approximately \$700 total damage.

A 1955 Ford, driven by Isaac Haskins, Negro, of Littlefield, was struck from the rear by a 1960 Ford driven by Alphonso Balderas, Jr. Earth. Occurring during the severe sandstorm, both vehicles were traveling south with a limited visibility of about 10 feet. No one was injured and no citations were issued. Deputy V. L. Smith, Jr., Earth, investigated.

Springlake Lions To Install New Officers June 13

The Springlake Lions Club will sponsor a Ladies Night June 13 at 8 p.m. in the Community Center.

Officers for the coming year will be installed by Glen Jones, Anton.

Incoming officers are Orville Cleavinger, president; Ed Dawson, 1st vice-president; Dwane Jones, 2nd vice-president; F.W. Bearden 3rd vice-president; J.J. Coker, Secretary, O.H. Parish, Tail Twister, Robert Riley, Lion Tamer. New board members to be installed are John Bridges and Bud Matlock.

Pony League To Meet Halfway In First Game

The Earth-Springlake Pony League, with a present roster of 15 boys, will play a practice game here Saturday night at 8 p.m. at the Earth ball park with the Amherst team and another game here Tuesday night at 8 against Sudan.

Team Sponsors are Springlake Elevator, Farmers Co-op Gin, Springlake, and Busby Farms. Shorty Kelley will coach the team.

Games scheduled are:

June 3	Halfway	There
June 6	Sudan	Here
June 10	Olton	Here
June 13	Halfway	Here
June 18	Sudan	There
June 20	Olton	There
June 27	Sudan	Here
July 1	Olton	Here

FOLK DANCING IS ENJOYED FRIDAY BY 8th GRADERS

An 8th grade class party was held Friday night at the Jaycee

Building with about 35 youngsters enjoying an evening of folk dancing.

Bob Glass of Muleshoe served as caller. Refreshments of punch, dips and crackers were served. Sponsors attending were Mr.

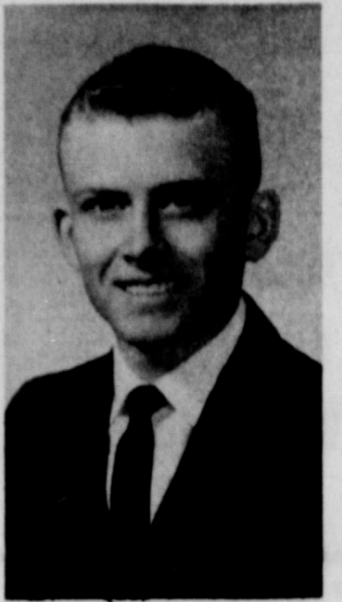

and Mrs. Ed Dawson, Mr. and Mrs. James Busby, Mr. and Mrs. Jim Glasscock, Mr. and Mrs. W. O. Jones and Mr. and Mrs. Ervin Anderson.

The Maldiv Islands are in the Indian Ocean.

Ring the LAST BELL

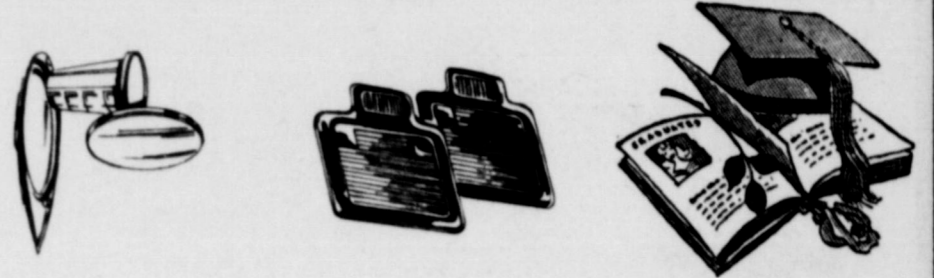

School is out! The bell rings for the final class. And to the members of this year's graduating class, we say, "Congratulations."

a letter to the Graduates:

Dear Senior:
Congratulations! Graduation marks a giant step in your life. Your own application and industry are responsible for the honor that is yours. The achievements that are to come will be gained the same way.
We are sincerely proud of you, because Commencement signifies accomplishment to us...it is a symbol of a better tomorrow because you are better prepared to make it so.
Our best wishes to you today and all days to come.

ENJOYING THE HOMEY ATMOSPHERE OF THE BALKO HOME... Taking time out for a bit of refreshment and discussing the outstanding conveniences in the home are: left, Mrs. R. E. Barton and Mrs. C. W. Terry. The two-day Open House was well attended by area residents.

Open House At Balko Home Well Attended

Open House at the new home of Mr. and Mrs. Rodney Balko, held Saturday and Sunday in the Hite Park Addition, saw an attendance of approximately one hundred and fifty.

Highlight Homes sponsored the event. Refreshments of coffee and donuts were served. Flower arrangements were provided by Earth Floral and Poyner's Whites Store.

Den furniture was from Taylor Furniture.

Hosting the occasion were Mrs. Norita Campbell, Guy Daughtry and Sammy Hightower, representing Highlight Homes.

Mr. and Mrs. Balko and family moved into their new home Monday.

Marcus Messer Sells City Drug To A. B. Odom

The City Drug was purchased Sunday, by A. B. Odom, Plainview, from Marcus Messer, who has owned the store for fifteen years.

Odom took over operation of the store Monday morning.

Mr. and Mrs. Odom, working together, have been in the drug business for 32 years. They have no children, and attend the Methodist Church. They will move to Earth when suitable housing is available.

The public is asked to make known what they want in the drug line and the new owners

will do their best to supply all needs.

The name of the City Drug will be changed to Odom-Gladys Drug.

Messer informed the News-Sun that he plans to remain in Earth, since he likes it so well, and has no immediate plans for the future.

Mrs. Sanders Is Delegate At State Woman's Club

Mrs. H. S. Sanders was one of 600 ladies attending the Texas Federation of Women's Clubs, in Dallas, Tuesday, May 14 in the Baker Hotel.

Mrs. Sanders attended as a delegate of the local Town and Country Study Club.

Appearing in Section B of this issue, entitled "The Importance of Responsibility" is the complete speech of Mrs. Louise Bushnell, Director, Women's Department of National Association of Manufacturers. Her inspiring speech is well worth reproducing in its entirety. It dwells on the many things our flag stands for, the debt we owe our forefathers, the great statesmen of our country.

She goes on to compare our nation with that of Russia.

End David Parks' 98-yard interception return last fall in Texas Tech's 21-12 win over University of Colorado was the longest run for a Red Raider since quarterback Jack Kirkpatrick returned a Tulsa kickoff 100 yards in the 1963 season. The dash by the Raiders' 1963 All-America candidate came as the Buffaloes were trying to erase a 14-6 deficit.

Mrs. Louise Bushnell Stresses Importance of Responsibility

THE IMPORTANCE OF RESPONSIBILITY

An Address by Mrs. Louise Bushnell, Director, Women's Department, National Association of Manufacturers, before the Texas Federation of Women's Clubs, Dallas, Texas, May 14, 1963.

"The things that our flag stands for, were created by the experiences of a great people. Everything that it stands for was written by their lives. The flag is the embodiment NOT of sentiment alone, but of history. It represents the quality of the American people - the results of those who act and live under that flag.

The memories of such men as Clyner, Franklin, Morris, Norton, Ross, Rush, Smith, Taylor and Wilson - all nine Pennsylvanians and signers of the Declaration of Independence are still very much alive today.

The debt we owe to these men, and their counterparts from other states, is one that is not even 200 years old. A debt that indeed our children's children will also be paying. The American Revolution was not a distant explosion, from which the dust has long settled. The American Revolution is a continuing process of applying our basic principles held in the tenets of our Constitution, to new problems that arise out of new experiences.

For many centuries, almost up to the beginning of the 1700's, living standards, social ideals and political concepts for the masses of people were essentially similar all over the world. In many respects life in the early 1700's was not wholly unlike life two thousand years ago. Candles and oil lamps were used for light, fireplaces for heat, horses and sailing ships for travel. No message could be sent faster than a man could travel.

As late as 1812, it took three months for the people as far away as Kentucky to know who had been elected President of the United States in November. When Benjamin Franklin first took the stagecoach from Philadelphia to New York, he spent four days upon the journey. His driver spent his time knitting stockings as the coach jogged along. All the trade between Boston and New York was carried on with two stagecoaches and eight horses, and in winter the trip took a week!

When this nation, shortly after its birth sent its first representative to the British government, the captain of the sailing vessel in New York harbor told him to come aboard at once. He hurriedly bought a sack of flour, three hams and a bag of potatoes, and arranged on ship for a sailor to cook his meals. He expected the ship to sail any hour, but it was five weeks before the ship left the harbor and six weeks more before the representative of the government of the United States saw the coast of Britain. I cannot help but wonder how much longer it took our representative to get to London, to find lodgings, and then to wait until he could present his papers or person to the King!

Strangely enough, with all of the changes and miracles that have taken place in our world - here in our country - in others, the world has stood still. In some countries, oxen slowly thresh grain by treading it under foot just as they did 2,000 years ago. The women of Jericho go to the well for water and carry it in earthen jugs on their heads just as they did in the days of Abraham, Isaac and Jacob. The nations that were left behind now are providing Communism with its spurious promises of rapid industrial progress and a wide field for Marxist propaganda.

What the have-not nations do

not seem to understand is that Russia is a land of strange contrasts. Its Moscow and Leningrad subways are splendid but tens of millions of its people are unable to own the lowest priced automobile. It boasts of progress in education but the most read American modern book, asked for in Public Libraries throughout Russia today - happens to be "Uncle Tom's Cabin." The Soviets deny their people the right to read newspapers and magazines from abroad or to hear foreign news radio broadcasts. Russia produces a Sputnik, but it sharply restricts the production of refrigerators, washing machines, vacuum cleaners and other durable goods which would raise the standard of living of its masses. Its leaders encourage infiltration and subversion by Communists for the purpose of ruthlessly overthrowing foreign governments, and at the same time, the common people of Russia desperately hope they may live at peace with the world.

Russia denounces the Western World for materialism and simultaneously destroys religious institutions and concentrates the entire energy of its people on a dictated program of sheer, naked materialism - recently emphasized by an upgrading of a "less butter and more guns" campaign.

We might hope that eventually, in some Russian libraries there may appear a book by a contemporary of Harriet-Beecher Stowe - one A. Lincoln - in which Russians can read and I quote: "It is true that you may fool all the people some of the time; you can even fool some of the people all the time; but you can't fool all of the people all of the time!" If they ever discover these words, possibly it might give them some comfort.

It is perhaps redundant to state that this is an audience composed of people who love their country deeply, and who revere our form of Government. We all think that our form of government is the best, the most effective and the most equitable form of government ever devised. But you know, our kind of Republic can only be the best kind if it is intel-

WHAT SENIORS DO ON BACCALAUREATE SUNDAY... Boys will be boys, as proved Sunday night prior to the Baccalaureate service, when seniors James Garrett, left and Troy Layman, gleefully try out the ever-popular trampoline in the high school gym.

ligently used by informed people determined to have the best government on earth. We must always remember, we must never forget, that a good form of government does not guarantee good government. You only get good government by using a good system vigorously and intelligent-

ly - with vigilance and continued effort. Many Americans today take much too much for granted. Many of us have become used to the plenty we are now producing, and a way of life that we think of as quite natural. Believe me, there is nothing natural about it at all. Look at India, look

at Africa, look at China - Red of Free. Return now to our country -- there are many areas in our states where we can and must improve the standards of living. I believe that this can only be done through hard work, education and a willingness on the part of the American

people to live up to their magnificent traditions. Every educated person in the United States has a duty and a responsibility towards seeing that they do their share to help their community. This is exactly what the Pennsylvania signers to the Declaration of Independence did so well.

But what are we doing? Not living in Dallas, not its outskirts, I do not know how many people in this room are serving in the State Government, as legislators, judges, on the Parole Board, just to name a few of the areas of public service.

On a county basis, I wonder how many of you bright women are sharing in your county government? As clerks or in any other fashion. And in your townships, how many of you are holding the infinite variety of jobs available on the city commissions or serving on the Board of Aldermen, or whatever body governs the smaller community in Texas.

A show of hands might prove enlightening. It might also prove to be an indictment of too many of us for not forging ahead in a field that is so important to the country we love.

It is always dangerous for a visitor to challenge her audience. But - to those who take no active part in the local running of their state, city or township - who merely allow themselves the luxury of complaining or not even bothering to find out what is happening - to those whose indifference is now a habit, has it never occurred to them that they are abrogating their rights as citizens, and not fulfilling the jobs that were entrusted to them by our forefathers?

Prior to the last November elections, I was in Charlotte, North Carolina, and I was saddened to be told that only 30% of registered voters turned out for the primaries in Mecklenburg County, the largest county in the state! In my own District in New York City - a very very large one, we are lucky if we get 10% out for the primaries!

What is it we so proudly hail? A memory, an emotional nostalgia? Or could we perhaps reconsider - a give a little more elbow grease to the Land

of the Free and the Home of the Brave! I beg of you - sincerely and humbly - to think about what I have just said as the coming days, weeks, months and years go by.

The next time someone asks you to serve on a committee, to give funds, to write letters, to call a meeting, to go and see people - to address envelopes, to deliver literature - to do any chore that is useful and helpful - remember this list of Americans: George Washington, Thomas Jefferson, Betsy Ross, Robert Fulton, Nathan Hale, Robert E. Lee, Sam Houston, Samuel Morse, Abraham Lincoln, Thomas A. Edison, Oliver Wendell Holmes, Franklin Delano Roosevelt, Our marines, who placed the Flag at Mt. Suribachi and John Glenn.....

These people have given much more to the United States than most of us here today will ever be able to give.

You know, many of us today think that the words communism, socialism and fascism are dangerous words, they do not frighten me nearly as much as another "ism" - somnambulism. Think upon this.

A moment ago I was speaking of the contrasts in Russia. But we ourselves are also a nation of strange paradox. At the moment in our history when we burgeoned and developed to such an astonishing extent - in the 19th century - when we opened up the West, built railroads, formed dozens more states - and began to show the signs of becoming the nation that we now are - at that time there was no one to borrow from. No League of Nations, no United Nations, no Lend-Lease, no Marshall Plan, no private foundations and most curious of all... not even a Federal income tax!

And yet we managed by long hours of hard work, by thrift, by faith, by courage, to do quite a job. The modern expression "What's in it for me?" had never even been coined in those days! We worked and served then to attain a goal. Now we have reached what many of us think is that goal, but can we afford to coast? Have we really changed so? (Cont. to page 2)

much as a people? I wonder.
In our present state of development, it is of great importance for us to remember the fundamental differences in the historical backgrounds

of Russia and the United States which have persisted through the years. Russia has had a long record of oppression of its people over decades, together with violent changes in government and tyrannical rulers.

Beginning...

Graduation is not the finish; rather, it is a bright beginning for the Seniors. As you make the first step in this new beginning, we offer our sincerest good wishes and a hearty "well done!"

EARTH, TEXAS

WHITE BRICK FIREPLACE... is a center of interest in the family room of the Rodney Balko home. Here, Gene Brown is shown as he examines the fireplace. Complete with early American furniture, the room reflects an easy and comfortable atmosphere.

Her economy has always been directed by the government. When the Communists came to power in 1917, they did not change the historical pattern under which the Russian people had lived. However, the Revolution in 1917 made an extremely significant and far reaching change. The ruling party imposed upon the Russian economy a rigid framework of state planning. This was the great change from the past in Russia.

Since 1917, the entire Russian economy, including family life, education, agriculture, industry and even letters, science and the arts, has been placed in a planned pattern of economic development. The Kremlin authorities are determined to make tremendous gains rapidly, even if it means the loss of freedom and compelling people, especially in the satellite nations, to follow a course which they themselves would not choose.

The American process of growth may be slower and almost casual in some respects. It may sometimes even seem to be operating at cross purposes. However, the economy is vigorous and strong because the people themselves are making the decisions which determine the direction and pattern of economic growth. If the ultimate survival of the United States and Soviet

Russia is to be determined by military power, it may be cooperative suicide. If economic competition is to determine survival, the United States has certain significant advantages. In the Soviet Union, succession to power may be accompanied by internal violence and a serious interruption to the growth of the economy. The Soviet Union is also weak because there is no assurance that the satellite nations can be held in bondage forever. In the United States, under constitutional government, one administration succeeds another, in accordance with the will of the people. Our economic growth rests on the foundation of freedom in which we recognize the dignity of man and his aspirations, and with which we have combined an enlightened sense of broad social responsibility.

In order to fully understand the Communist Challenge, we must recognize certain facts. Russia has the world's largest unbroken land mass under one flag, with an area approximately two and one half times the size of the U.S. The Soviet population of 210 million compared with 180 plus for this country. We cannot excel her in the size of her land area, population or labor force. She is one of the wealthiest nations in the world of minerals. She has a large part of the entire

world's timber reserves. We cannot assume that if her people work hard, long hours, restrict their consumption of consumer goods, save and invest heavily in the expansion of Soviet basic industries--as they still seem to be doing--that she will not have economic progress in the years ahead. That is if she can hold her people in line, and cope with the food shortages that always there to nag.

We cannot of course always give credence to the reports coming out of Russia for our own particular consumption. So much of what is said is just plain propaganda for the American gristmill. Without in any way, wishing to lessen the importance of what I have just said about Russian economic potential, here are some figures that will show you what the race looks like today.

1. Abandon three-fifths of our steel capacity.
2. Abandon two-thirds of our petroleum capacity.
3. Scrap two out of three of our hydro-electric plants.
4. Terminate over 90% of our natural gas production.
5. Eliminate 95% of our electric motor output.
6. Rip up fourteen of every every fifteen miles of our railroads.
7. Destroy two of every three miles of our railroads.
8. Sink eight of every nine of our ocean-going ships.
9. Junk nineteen of every twenty of our cars and trucks.
10. Slash all paychecks by

11. Transfer 60,000,000 Americans back to the farm.
 12. Destroy 40,000,000 television sets.
 13. Rip out nine of every ten telephones, AND....
 14. Tear down seven out of every ten houses that now stand.
- This should give you food for thought. It is my hope that as another year goes by, we can with humility and understanding, prolong the dreams of the people who founded this country. Let us leave no stone unturned, no avenue unwalked, no purpose forgotten, to be thoughtful and serious citizens. Let us understand once and for all that to keep our freedom we must serve it.

YOU'RE
A-1
SENIORS

And you've proved it! Throughout your entire scholastic career, you have consistently aimed at the highest goals. Because you have been willing to pay the price in hours and effort, you have successfully won these goals.

This year, at Commencement, we will watch the graduating Seniors with a special pride... a deep pride... for all who, through their willing effort have earned the honor of wearing the cap and gown.

Our very best wishes to all the graduates!

SPRINGLAKE

WHAT LIES AHEAD?

landmark for the future

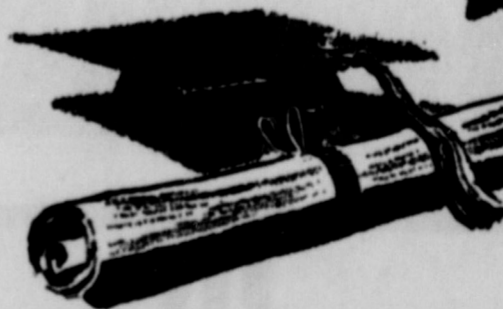

The lady standing at the entrance of the harbor is a symbol of the freedom generations of Americans have enjoyed.

Part of that freedom is the quest for knowledge and the forthcoming commencement is a symbol of that freedom.

This is a freedom valuable beyond price... for it is the key to the future.

So much lies ahead... waiting for those who want it.

We wish all graduates every success for the future and hope for their continued growth in freedom and knowledge.

Good Wishes
Graduates

Watershed Concerns All

The Spring Water Draw Watershed project will bring together farm and non-farm interests in water resource conservation. Water is essential to growing crops and grass for our livestock. Water also serves our cities and industries. In fact water is essential for life.

We also know that just about all of our water falls on our farms and ranches. Management, use, manipulation, and development of our water resources, therefore, begins largely on the privately-owned lands in the watersheds. This is the water that carries away soil through surface runoff, that sweeps it into streams where it creates additional conservation problems. This is the water that floods our cities and fills city reservoirs with silt.

Watershed protection by proper land treatment and use of conservation practices is everyone's concern. Watershed protection assures that we keep our soil where it belongs and that we will use every drop of rainfall and water pumped from our underground reservoir without waste.

Only then will we be protecting our reservoirs to be built for flood prevention and municipal water. Only when we conserve our soil and water will we be stewards of God's greatest gifts to man.

YOU BE THE JUDGE-- This picture was in the paper early in the spring when all the farmers were getting their soil in shape for the season ahead. To follow up on the results just take a look at the picture below.

THE CREAM OF THE CROP--COTTON. A followup on the picture that was taken March 28, North of Springlake. We should be very thankful that we have the very best water in the country to assure us of a crop each and every year.

Land Many Things To Many People

Land is many things to many people--to the farmer it is a livelihood; to the townsman, space or a place to build his house; to the child playground; to the economist, land is the soil under his feet.

It is generally agreed by all that much of our land can contribute in more than one way to the satisfaction of our wants. It is accepted by most people that in order for us to get our maximum wants from the land it is necessary that we have some means of land conservation and management.

Conservation means maintenance and supervision of natural resources which is accomplished through management. Many people do not have the required technical knowledge and know-how for this purpose.

The people of this area, as well as many other areas of the United States, now have an organization known as the Soil Conservation District. This organization is staffed with a group of people who are experts in soil conservation and land management. This group has done much and will do more in the conserving of our soil and water.

The Texas cotton crop is the most valuable crop grown in a single political subdivision in the world.

Plant Food Key to Top Crops

We must put back into the soil plant food removed at harvest time, if we expect to main-

tain our soil and keep it productive for future generations. A soil test is one of the keys

to know what the land needs for the most economical production of any crop you might wish to grow.

When selling five thousand pounds of milk, you are selling 30 pounds of nitrogen; one hun-

Mr. and Mrs. Burnett, and their Ready-lite, give a friendly welcome to arriving guests.

"Our Ready-lite is like a good friend—Always on when you need it"

Say Mr. and Mrs. Claude Burnett, Hale Center, Texas

Mr. Burnett touches up his lawn edges under the ample light of his Ready-lite.

Ready-lites are friendly and versatile. You can change bulbs to cast a soft or bright light or put in colored bulbs in keeping with holiday seasons. And, now all Ready-lites have weatherproof outdoor outlets—lets you plug in electric gardening tools, barbecuers or outdoor lighted holiday decorations. Ready-lites cost as little as \$49.50—payable in small monthly payments on your electric service bill—no interest, no carrying charges. Order from your Public Service neighbor.

28-7

IT REALLY CAME DOWN was the report from the Flagg Community. A report from the Flagg Grain Company stated that three different clouds passed over a small section late Saturday evening, dumping marble size hail that covered the ground. The most damage was done by the downpour.

dred bushels of corn contains roughly 100 pounds of nitrogen, and a ton of beef is 50 pounds. This gives you an idea how much nitrogen you are selling and it cannot be reduced. Nitrogen mostly goes into plant proteins and related compounds.

Nitrogen is vital to carry out the plant's most complicated growing process, therefore, it is very important to have nitrogen if you intend to grow a large number of crops for tonnage or insilage.

BUY U.S. SAVINGS BONDS -- TO UNDERWRITE YOUR COUNTRY'S MIGHT!

County SCD Has 1,560 Plans With Farmers

Every farmer is a steward of the land. He only manages it during his lifetime then someone else takes up the responsibility. The condition he leaves the land in at the end of his stewardship will show how he measured up to his responsibility.

A good steward leaves the land in as good a condition as possible. The question is how can a farmer be a steward? This is answered, "by developing a conservation plan that will treat each acre according to its capabilities and according to its needs."

Of course we must do more than just plan, we must apply the needed practices. But the first basic step is to plan. Would you build a house without a plan or blueprint? Of course not, so neither can we start a conservation program without a plan.

This planning service has been available for years through the Lamb County Soil Conservation District. The District has some 1560 plans with farmers and ranchers in the District.

These plans are in various stages of completion with some 780 completed. This is a good start but we need more farmers to make decisions as to how they will carry out their conservation program. How else will the proper practices be installed in their right sequence.

The SCD has the assistance of the Soil Conservation Service Technicians and others that have studied Soil and Water problems and can help develop these conservation plans with farmers and ranchers. When it is time to apply conservation plans with and ranchers. When it is time to apply conservation practices assistance is available for layout installation.

To be a steward plan your farm and then farm according to a plan.

The "pit of eternal fire" is the crater of the volcano Kilauea, in Hawaii.

Francis Implement Co., Your Ford Tractor Dealer Muleshoe, Texas Pd. Adv.

Soil Stewardship

A steward is one to whom a thing is committed—one who is entrusted with the management of the affairs of another. The Negro porter put it aptly when he replied to a passenger's question as to the nature of the colored man's work: "As a porter I take care of the boss's business till I get to the end of the line."

Those who till the soil have been entrusted with a portion of God's earth. The soil does not belong to the man but to God who created it. The man will pass off the scene, but the soil remains and will be entrusted to another steward.

The responsibility of each steward is "to take care of the Boss's business till he gets to the end of life's journey." He should so care for the soil

that one day he may hear the Master say, "Well done, thou good and faithful servant."

A word of tribute is in order for the farmer of our area. From an amateur's viewpoint our farmers are doing an excellent job in conserving our natural resources and in soil building. A casual look will reveal that most farmers take pride in their work. Though there may be room for improvement, one certainly will not get the impression that our farms are "run down" or that there is any carelessness in tilling the soil.

In our part of the country we are dependent upon the farmers more than any other group. We want to say thank-you for doing a great job.

Tomorrow's Stewardship

By W. R. Kimbrough, County Agent

In any area of living, it is a bad situation if the older generation does not bequeath to its children something richer and something better.

However, some things can be corrected in a very short time. This is not so with soil and water. The mistakes and wrongs committed today against these precious natural resources in many instances will take hundreds of years to correct, and in others, restoration will never be possible.

The richness of America's soil and the plentitude of water will be reflected in the prosperity, the wealth, and the spirit of tomorrow's people far more than is generally believed. It has truly been said that "the soil is God's greatest material gift to mankind." This generation's greatest material gifts to tomorrow's world will be a productive soil and adequate water resources. Stewardship demands that we prepare, conserve, replenish, and protect these resources.

Urban and country youth should be conscious of the importance of soil and water in their everyday living and in their future. Soil and water play a vital part in the physical, economic, social, and religious life of the individual, the community, the nation, and the world. This fact needs to be stressed so that the importance of soil and water is integrated into every phase of education—school, church and youth organizations—both rural and urban.

Youth has a great stake in

this effort. The time and energy that the young people spend in putting soil and water conservation programs into practice can be their best investment in their future.

Says Bernard Salesky, chairman of the Hat Corporation of America:

"If you can figure out a way to get Khrushchev to stop wearing hats and Kennedy to start wearing them, the Hat Corporation will supply you with hats for life."

Conservation Is Area Job, Too

A graveyard of empires can be found scattered throughout our nation and foreign continents. A study was made to see what the reasons were behind these failures, and it was found that conservation was not applied to the land. There are areas that are still productive today that were in production long before some of the areas that failed.

Conservation is not new, but some of the methods are that are used in application. Some of it can be done by individuals, but sometimes it takes the work and cooperation of several; sometimes whole communities are involved.

A good example is the Bull Lake watershed area located north and west of Littlefield. There has been some work done on the upper part of the water-

shed, but with only a few working, the problem will not be solved; it will take the cooperation of all the people in that area to get the job done.

It will not be economical for a few to try to terrace and build waterways on their farms; the cooperation of all the people involved must be given; then the cost can be held to a minimum. Some meetings have been held to discuss the problem, and determine the treatment needed in this area.

Since most of the land involved is dryland, the treatments would consist of terraces, diversions, and waterways, with some irrigation practices. At the present time the cost of establishing these practices will be very little if the persons involved will use the assistance of the Great Plains Conservation Program or the Agriculture

A BEAUTIFUL SIGHT TO SEE-- What little wheat that we have in this area is really in good shape. This patch of wheat is located north of Springlake, and should be ready to harvest by the middle of June. With the wind blowing, it is really a golden sea.

Each year, U. S. farmers use 5 million tons of steel in the form of farm machinery, trucks, cars, fencing, building materials. This is one-third as much steel as the automotive industry uses. Properly fertilized plant

The Earth News-Sun, Thursday, May 23, 1963-Pg. 5
roots penetrate more deeply into the soil than those lacking in fertilizer. The better the root system, the better the plant can use soil moisture. In 1962, U. D. Cows averaged 7,325 pounds of milk. That's nearly 2,000 pounds more than their grandmothers produced just 10 years ago. Florida, the last of the territory owned in North America by the Spaniards, was ceded to the United States in 1819.

Stabilization Conservation Program.

Be a good steward of the soil and save your part of the empire by applying the needed treatments.

Information and technical help to see what is needed can be obtained at the Soil Conservation Service office.

Lawn Mowers Can Be Dangerous

A common sound these days is the one made by operating power lawn mowers. They are a necessary tool for keeping the lawn mowed and in good shape, but, warns the Texas Farm and Ranch Safety Council, they can become a lethal weapon when improperly used.

The rotary type mower can become a real accident hazard not only to the operator but to persons who may be nearby when used to mow lawns or weeds where rocks, bones, pieces of wire, nails or other debris are present. The Council reports that about this time of the year the number of accidents involving lawn mowers begins to increase and that chances are good someone in your neighborhood has been a victim.

The cutting blade can be broken by striking a hard object and hurled through the

air. Wire can be cut in short pieces and hurled at bullet speed. Be sure, warns the council, that the area being mowed is free of such objects and that the mower is constructed so as to prevent objects being hurled toward the operator.

The Council suggests safety measures which, if followed, could prevent many accidents involving lawn mowers and other power tools. Never, they say, try to make adjustments to a mower while the engine is running. It could cost you a finger or hand. It's good business to remove the wire from the sparkplug before attempting to repair or adjust the cutting blade or remove accumulations of grass or weeds from under the mower.

Children should never be allowed to operate a mower nor should a person who is barefooted or wearing open-toed shoes. The engine should be cool before refueling and if an electric mower is used be sure the extension cord is in perfect condition.

The folks who make lawn and trimming equipment are concerned about the user's safety and have made recommendations to insure a long and useful life for the machine and operator. They put this information in an operator's manual. The Council strongly recommends that all power tool operators become familiar with their manual.

LOCATED IN THE OLD SPANISH THEATER BUILDING WEST OF CAUTION LIGHT

Water Management Is Part Of Bank Account

"Irrigation water management is part of my back account," says Wiley Mudgett. Mudgett's farm is three miles west and three and one-half miles north of Sudan. He has farmed in the Sudan community for several years. When he moved on this farm, there had been very little conservation applied.

The farm has level, sloping land, and a shallow lake on it. The soils vary from tight clay to coarse sandy soil. Where these conditions occur, it is difficult to get proper use of the irrigation water without the use of a sprinkler irrigation system and other mechanical practices to control water erosion.

Mudgett studies his problems and decided to bench level all of his land with tight soils. A sprinkler irrigation system was selected for use on the sandy soils. Mudgett believes he can save most of the rainfall and use it along with the irrigation water. With this system, it is possible to cut out some irrigations and water erosion is eliminated.

By using underground and portable pipelines, he can eliminate almost all his water loss from ditches. This irrigation

system also made it possible to establish the proper length of runs for a more uniform water distribution on the land. Where the system has been completed, Mudgett's cotton yields have increased from about three quarters of a bale per acre to two and eight-tenths bales per acre. This increase stems from 1955 when he started applying these conservation practices.

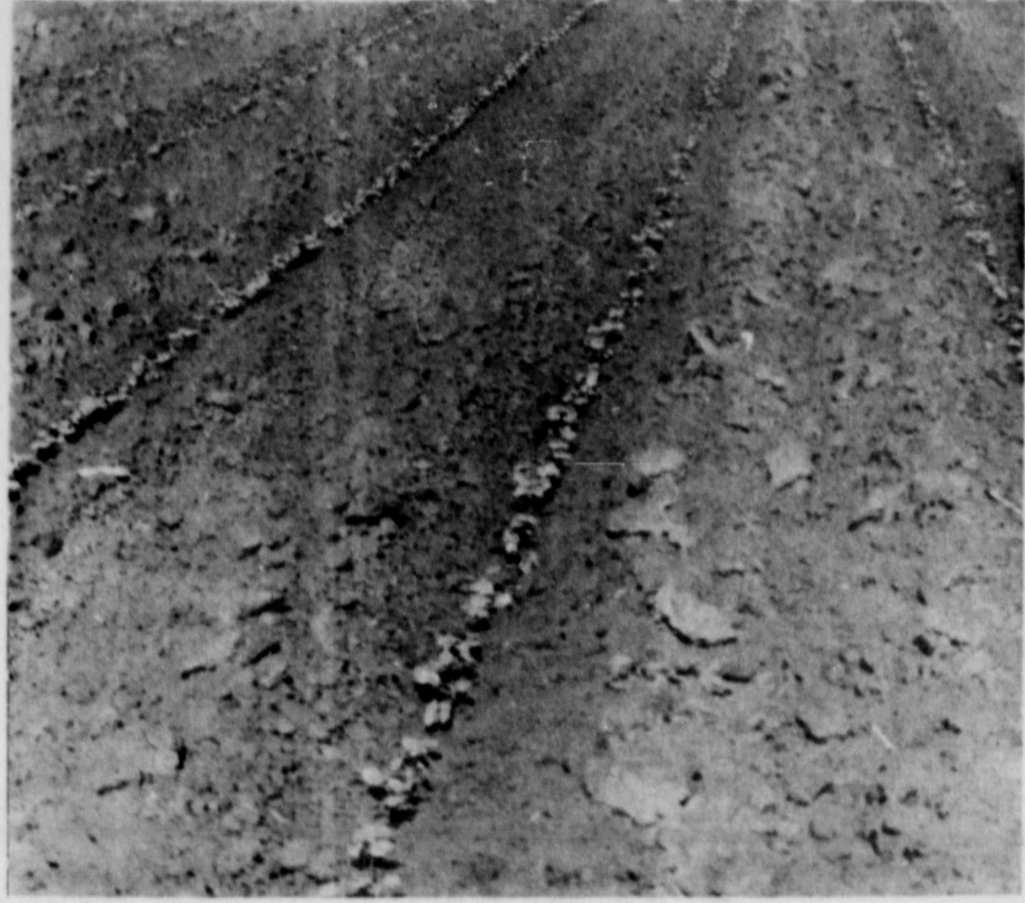

"I am doing this work on my farm for these reasons," says Mudgett. "I think I have controlled the water erosion, improved the soils structure, hold and conserve all rainfall, get better use of commercial fertilizer, have easier crop management, increased my yield in crops and I am using from one-third to one-half less irrigation water now than I did before I started the work."

Mudgett further states, "I started this work with these goals in mind: To get more from the farm myself, and the children will have a much better farm when they take over. If and when the irrigation water is gone, the farm will still be a very productive dryland farm. With proper irrigation water management, I hope my irri-

gation wells will produce several year longer. If everything works out, I will have all the conservation practices completed this fall."

There are several questions that should be answered since this was quite an expensive project. First, Mudgett planned all conservation practices with the Lamb County Soil Conservation District and Soil Conservation Service technicians. With his plan, he set up his annual program of work to do a certain amount of work each year, utilizing the assistance of the Agriculture Stabilization Conservation Program, the Great Plains Conservation Program, Farmer's Home Administration, and the Extension Service. With the assistance from these programs, he was able to install the work much sooner than he had planned.

Mudgett urges any landowner that is interested in conserving his soil and water to contact the local Soil Conservation Service office. They will help to work out a plan of operations and set up an annual program of work. They may also apply for other assistance which can be received from these other agencies, thus speeding up the application of needed work.

COTTON UP TO A GOOD STAND-- This excellent stand of cotton is located six miles north of Earth. A good rain, averaging from half inch to an inch was reported Saturday afternoon. The crops will be in very good shape, now with the added moisture.

P.D. Adv.

Screwworms Down From Last Year

There was good news this week from the officials of the screwworm eradication program and also a word of warning. They reported that the number of screwworm cases in Texas in April totaled 357 compared with 2,633 during April 1962, a sizable drop. Also, that only 574 cases were reported during the first four months of 1963 as compared with 3,985 cases for the same period last year.

Authorities credited the combined factors of a severe insect-killing winter, heavy release of sterile flies and good cooperation from farmers and ranchers who are detecting and treating infestations for the decrease in screwworm incidence.

They warned, however, that livestockmen cannot afford to relax their vigilance because eradication has not yet been achieved. The native fly population must be kept down by preventing the development and spread of screwworm flies, they said.

Livestockmen are urged to

inspect their animals at least twice a week, treat wounds and infestations, collect samples from infested wounds and report cases to eradication headquarters at Mission or to the county agent or vocational agriculture teacher. Periodic spraying of livestock with Coral or Korlan is also recommended.

Producers have been noting fast action when a sample is confirmed as screwworms. In most instances, sterile flies have been dropped in the area where the infestation is found the following day after the sample was identified in Mission. Livestock in and near the infested area are sprayed at program expense by inspectors.

Eradication workers hope to continue to treat each case promptly and thoroughly and feel this can be done as long as producers do their part in preventing any large increase in cases.

Dry Ranges Pose Problems For Stockmen

Beef cattle which have been on dry ranges for the past six months or more may face ser-

ious nutritional deficiencies, says U. D. Thompson, extension husbandman. Of major importance is the lack of sufficient range grass or forage. The low quality or absence of total digestible nutrients is a further complicating factor, he adds. This kind of roughage contains little or no protein, phosphorus and Vitamin A.

Decisions are difficult to make during stress periods. An attempt should be made to balance livestock numbers and forage supplies. Calves may be weaned earlier to help relieve grazing pressure and improve cow conditions. Fewer replacement cattle should be kept and culling is always in order. Non-breeders, slow breeders, irregular breeders and cows which consistently produce lower grade, light weight calves should be marketed. Thompson recommends that cows be palpated to determine pregnancy and to sell those not pregnant.

Under conditions of extreme drought, it may be advisable to confine the foundation herd to a small acreage. High energy feeds such as grains and protein supplements may be fed in limited amounts for maintenance. Forage is the critical feed, however and is usually high in cost for total digestible nutrients, he says. A protein supplement fed with the forage will improve digestion.

Phosphorus is the most likely mineral to be deficient under drought conditions. A mineral supplement high in phosphorus should be fed free choice or in controlled drinking water and salt should also be fed free choice, the specialist advises.

Vitamin A may or may not be deficient depending upon the forage available. Protein supplements fortified with Vitamin A should be considered. Synthetic vitamin A is available for use in drinking water, injections or for mixing with feed.

Thompson points out that most Texas livestock producers have had experience handling stock during periods of stress and that decision making on management practices becomes almost an individual proposition.

State Citation Art Exhibition September 14-15

Women of the Democratic Party in Texas will sponsor a State Citation Art Exhibition September 14 and 15 and will give scholarship and merit awards to the outstanding entries.

The exhibition will be held at the JAL Ranch in Alvarado and a \$500 scholarship award

to be used for advanced study in any of the visual arts will be presented by Governor John Connally on behalf of the women of Texas' Democratic Party.

Elimination contests will be held during June, July and August in each of the 31 Senatorial districts in Texas, under the direction of the State Democratic committee members representing the Districts.

"The purpose of this competition is to encourage young people to become more aware of the tradition of the great heritage of Texas. The women of the Democratic Party of Texas are sponsoring this exhibit and competition in accordance with Governor Connally's emphasis on excellence in education," said Mrs. Alfred Negley, vice-chairman of the SDEC.

Mrs. Negley said the Democratic women selected to initiate the contest in May as it is the birth month of the Democratic Party. "At this time we are emphasizing a program to give credit and help to one of our most valuable resources--talent, which is, and will be an asset to our state and nation," she said.

All entries must have been executed within the past two years and must be accompanied by a sketch evidencing ability in subjective delineation. Work done under supervision is not eligible.

Media to be considered are oils, pastels, tempera, casein, water color, drawing in pen and ink, pencil or charcoal, and mixed media.

The scholarship division of the judging is open to High School students from the ninth through the twelfth grades, including 1963 graduates.

Each district may submit its four top entries to be judged in the scholarship award division and its top two entries for judging in the merit division at the state level. The state jury will consist of three recognized critics of the visual arts.

Any student interested in this scholarship may drop a card to Mrs. Ed. Dawson, Jr., Dimmitt, Texas and further information and an entry blank will be provided.

Objectives Of Soil District Are Listed

BY EDWARD MITCHELL
Chairman, Lamb SCD

The objective of your board of supervisors of the Lamb County Soil Conservation District is to see that conservation is applied on the land. The goal of your District is to see each acre of agricultural land used within its capabilities and the treatment of each acre of land according to its needs. Only when we have stopped all soil and water loss can we truly be called Stewards of Soil and Water.

The Lamb County SCD is in its 16th year of operation. Our SCD is a legal subdivision of the State of Texas. It is governed by a five men board comprised of elected local landowners. Their term of office is 5 years and one is elected each year from a different zone. Regular elections are held on the first Tuesday of October each year.

The District enlists assistance from all governmental agencies as well as other sources such as businesses, clubs, organizations, etc. Some of the governmental agencies

providing assistance are: The Soil Conservation Service for technical assistance and the Great Plains Conservation Program, The Extension Service for informational program, Farmers Home Administration for conservation loans, and the Agricultural Stabilization and Conservation Service for cost share assistance thru the Agriculture Conservation Program.

The SCD guides the efforts of all toward applying a good and sound conservation program. The board feels that only through planning can we have the right combination and sequence of conservation practices applied. This is done thru the development of a conservation plan on each farm or ranch with the landowners.

It is a known fact that conservation farming pays in increasing returns, but more important is that conservation of soil and water resources is a must for the welfare of future generations. Each Land Owner and operator in the District has an important contribution to make to this great movement.

A GOOD RAIN. But it came at the wrong time. Shown above is a picture that was made early Sunday morning, after a downpour that left one and ten hundredths of an inch just north of the Flagg community. The land had just been planted and will probably need replanting.

Agricultural Resources Should Be Everyones Concern

BY LAMAR D. ATEN, JR.
Office Mgr., Lamb County ASCS

All of us depend on agricultural soil and water resources for food, clothing and shelter. Most of us depend on these farm resources, directly or indirectly, for our own income.

Teachers, ministers, specialists, and other professional people are directly interested in the welfare of farmers and their families. Their income from agricultural resources is important to all.

Seventy percent of the dollar value of all raw materials going into American industry and commerce comes from agricultural resources -- cropland, grazing lands, and forests.

All of us must be concerned with the agricultural resources needed to supply the food, clothing shelter, and much of the income for a growing population.

Agricultural water and land resources must be used, managed, and conserved in the public interest. Conservation measures must be applied to farm land. Conservation farming is more than just good farming. Over the years, conservation

farming assures a good living to farmers and through them, to all. But conservation measures on individual farms can only be done by the man who controls the land.

However, some conservation measures return benefits only after many years. Others do not benefit the farmer on whose land the work is done, or the results may be insufficient to repay the cost.

For such reasons as these, farmers may not apply all the conservation needed on the farm. To help farmers and ranchers do conservation needed to protect soils, the Government furnishes several kinds of conservation services. Included are research, education, technical assistance, credit and cost-sharing. These conservation services supplement those furnished through state and local government and private organizations.

Thus in conservation, as in many other matters of public concern, Government provides a means for accomplishments that could not be achieved by individual effort.

Be a good Steward -- conserve the soil and water.

Robert Morris and Haym Salomon helped finance the American Revolution.

Irrigation Of Sloping Lands Presents Problem

BY JOE F. KRIZEK
S. C. S. Engineer

The irrigation of sloping lands encounters many problems. It is difficult to apply an adequate amount of water to wet the soil sufficiently and evenly without significant erosion.

The direction of irrigation for flood systems or row irrigation has to be such that rows or borders need to be run down the maximum slope with the result that irrigation water is difficult to control and retention of rain waters is very slight. The result is large waste in tail water and extremely high rate of rain water run-off and excessive erosion.

There are ways and means to irrigate these sloping lands without waste of irrigation water, controlling rainfall runoff and reducing water erosion. The installation of the following methods could result in saving of over 50% of irrigation and rain waters.

One of these methods would

be to level the lands in benches. This usually is costly and requires a large amount of pipe to distribute the water over the areas to be irrigated. The width and length of irrigation runs on these benches is based on soil depth, soil texture, slope of land and amount of irrigation water available.

Another conservation method of irrigating sloping lands is by sprinkler irrigation, supported either by a terrace system or by a conservation cropping system such as grasses, legumes, or continuous close-spaced high residue crops such as small grain. In some cases of extremely sloping land even land in close spaced crops would need to be supported by a terrace system. Sprinkler systems would require less water dis-

tribution pipe lines than for bench-level irrigation and requires less skill and labor in the application of water.

The third method of irrigating sloping land is in the use of grasses, legumes, or close-spaced high residue crops in graded borders. This method is, however, limited to slopes not greater than 2%, that is, land having fall not greater than two feet per hundred feet. The graded borders require some land shaping in that the slope must be from border to border must be not over one inch, else the water would not spread evenly across the width of the borders.

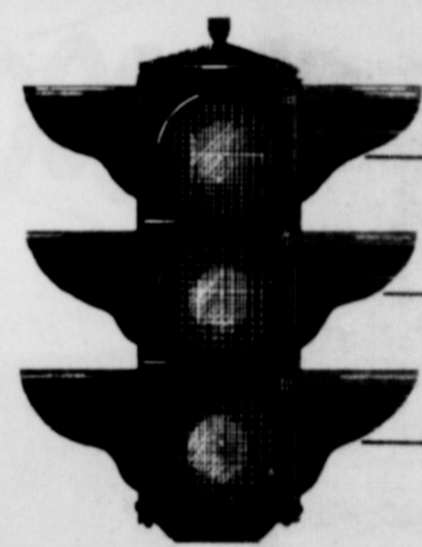

Assistance in the installation of the above practices can be had through the local Soil Conservation District.

Mrs. Zou Wilson was dismissed

Saturday from Taylor Clinic, Lubbock, following major surgery. She will be staying at the home of her daughter, Mrs. Philip Haberer for several

weeks of recuperation. Mrs. Pat McCord and Mrs. A. C. Barton visited her Sunday.

Mrs. James Glasscock and Mary Beth spent Sunday night with Mr. and Mrs. L. A. Glasscock.

Farm Fires Cause Record Losses in 1962

Farm fire losses in the nation during 1962 reached an all-time high of \$175 million, according to estimates of the U.S. Department of Agriculture.

This is 7 percent above the \$163 million for 1961 and a million dollars higher than the previous record set in '59.

The estimate, made by USDA's Economic Research Service, was based on the farm fire-loss experience of a sample of 226 farmers' mutual fire insurance companies in 27 states and on the valuation of farm buildings as furnished by crop reporters.

The volume of insurance carried by these companies amounted to approximately \$11 billion at the end of 1962, and their fire and lightning losses totaled about \$16.9 million last year. For 1961 and 1962 combined, their loss rates averaged about 15 cents per \$100 of insurance.

Farm fires continued to strike about two out of 100 farms each year. The "burning rate" (percent of value destroyed) for farm and rural property is about six times that for urban property, according to annual reports of state fire marshals in three midwestern states.

Buildings and their contents accounted for about 85 percent of fire losses paid by the sample companies. Dwellings and contents accounted for 42 percent; barns and their contents, 27 percent; and other buildings including rural churches and schools, 16 percent.

Personal property, chiefly machinery and equipment, livestock and unstored produce accounted for the other 15 percent of losses paid. About 80-90 percent of the losses paid on livestock were due to lightning.

areas and have made planting possible.

He says four groups of plants, Sudangrass, including Common, Sweet, Tift, Greenleaf and Piper; Sudan-Johnsongrass types such as sorghum almon and perennial sweet sorghum; Sudan-sorghum hybrids which include a large number of commercially available hybrids and Pearl millet, including Gah-I, Starr, Texas No. 7 and Common are the most satisfactory for temporary summer grazing.

Sudan-sorghum hybrids have generally ranked first in yield tests followed by the Sudan-Johnsongrass types and Sudan varieties. The Sudan hybrids and types generally have a bigger stalk than the varieties, however, this characteristic does not seem to create a palatability problem, says Novosad.

Pearl millet will produce more forage than Sudan varieties on acid soils in East Texas and on soils where Sudan and other sorghums "yellow-out."

Pastures should be mowed if forage growth gets ahead of grazing, says Novosad. This keeps the plants producing new growth of high quality forage if moisture and fertility are available. The excess forage should be utilized as hay or silage, he says.

Topdressing with nitrogen is especially important after each hay cutting or grazing if moisture is available and more forage is needed. If weeds are a problem, and a chemical such as 2,4-D is used for control, be sure the weeds are young, succulent and growing fast and that the chemical is used with care to prevent injury to susceptible crops.

Novosad suggests that plans be started now for fall grazing crops and that the county agent be contacted for local recommendations and other information.

Danger Signals Warn Buyers To Be Cautious In Business Deals

There is no sorer person than one who has been victimized by a phony deal. Unfortunately, once the buyer has signed an order or contract, little can be done to get him off the hook. "But I didn't realize..." are words often heard by lawyers who are usually unable to help at that point.

Despite the complete disavowance of "caveat emptor" (let the buyer beware) by ethical merchants, there are still some businesses that thrive on high promotion deals. Buyers are contacted by direct mail, over the telephone, or by "come on" advertisements. These contacts all resort to fancy claims and a high pressure approach.

How can you avoid such sales tactics? There is no sure way, outside of dealing with reputable, established merchants, and using common sense in reading the ads. But there are certain danger sig-

nals that should ring the alarm bell. Here are a few:

"Buy now or lose the chance."
"You have been specially selected."
"It's only a legal form."
"You can save up to..."
"Yours absolutely free..."

These signals do not necessarily indicate a bad deal, but they are frequently used by shady promoters. So read carefully, think it over, compare prices, and ask for information from a merchant you know, or from a friend.

Remember, in this world of tough business competition, one seldom gets anything for nothing. Once you have signed an order, even the law may not be able to help you, no matter how improvident the deal may be for you. In fact, unless the seller is doing something illegal, the law may wind up helping him to enforce the bad deal that you made. So watch the signals and look before you leap--or sign!

Nitrate Poisoning Poses Danger

The problem becomes especially acute if the growth of the plants has been stunted by low moisture levels following the fertilization, he adds.

Non-toxic forms of nitrates are reduced to toxic nitrates in the animal's system and enter the blood stream where they tie-up the blood hemoglobin. As a result, the oxygen carrying capacity of the blood is greatly reduced and the animal may suffocate, says Patterson.

Nitrate poisoning is a danger to all livestock but poses a particular problem where cattle are grazing plants recently fertilized with high levels of nitrates, says Dr. C. M. Patterson, extension veterinarian.

Scouts, Cubs To Decorate Graves May 30

Den 1 met Monday afternoon with seven members present and the den chief, Bobby Glascock, Bobby, who is graduating from the 8th grade, was presented a gift by the den and the den mothers. Refreshments of cookies and Cokes were served by Mrs. Norman Sulzer and Mrs. R. J. Brock prior to the selling of light bulbs in their assigned territory in the Springlake school district. Parents helping in the effort Monday were the den mothers, Mrs. Brock, and Mrs. J. C. Randolph

and Mrs. Tommy Wheatley & Cullen Hay.

Den 2 met last Tuesday afternoon and made fishing poles and bobbers. Seven members were present. Plans were completed for next week's meeting. Mrs. Wilson Lewis met with the boys.

Dens 6 and 7 did not meet due to the practice of the Memorial Day ceremonies of Tuesday evening.

Den 3 met Thursday afternoon at the Scout Hut with 10 boys present. Mrs. C. L. Hamilton met with the boys. Plans for summer meetings were made and drawings of poisonous snakes were drawn by the boys. Kent Parish served refreshments.

Saturday was light bulb selling day in Earth and Springlake. We wish to thank everyone who helped make the campaign a success. Some parts of the town were not covered but will

be in the near future. The school district is being covered by various dens this week.

NOTICE

Cub Scout Pack meeting will be held next Tuesday afternoon, May 28, from 3 p. m. til dark at the lake on the R.J. Brock farm one mile east and one mile north of Earth. All Cub Scout and their families are invited to attend and bring a sack lunch for supper.

Practice for Memorial Day ceremonies will be held Monday evening at 6 p. m. with Travis Jaquess, Scoutmaster, in charge. All Scouts and Cubs are urged to be present.

The Shetlands Islands are off the coast of Scotland.

SHOWN INSPECTING THE MASTER BATH... lovely white tile and gold trim, are DeAnn Adrian, Mrs. J. A. Littleton, Sr. and Mrs. Buddy Adrian.

Lazbuddie News...

Mrs. C. A. Watson

Superintendent J. G. Ward resigned at the board meeting held last week at the school. Ward had taught in Lazbuddie for 13 years and it is with regret that he leaves, many people were heard saying. He and his family have done so much to help this community and school.

Mr. Ward and his wife, Dorothy and three sons, Mike, John and Paul express they hate to leave and wish they could take the people with them. Mr. Ward has accepted the job as Superintendent at Valley View school at Kaman, 18 miles west of Wichita Falls. Mr. Ward was elementary principal of Lazbuddie the year of 49-50. He taught at Wilson in 51 then back to Lazbuddie as Superintendent. He received his masters degree in 1951.

Mr. Ward has a farm in east Texas and will be nearer his place, since accepting the new school.

Mr. and Mrs. Everett Maxwell plan a vacation soon to Pine Bluff and Little Rock and other points in Arkansas this summer. Their daughter, Mary will attend school at ENMU this summer. Both Mr. Maxwell and Mary are teachers in Lazbuddie schools.

Mrs. Scotty Windham and children returned last week from Tuscola and Abilene where she visited her mother, Mrs. McFarlan and his mother, Mrs. Windham.

Mr. and Mrs. W. P. Morgan and children fished at Burleson Lake over the weekend.

Mrs. Glen Willoughby, first grade teacher in Lazbuddie has returned to Portales where she has joined her husband and son Robert for the summer. She will return to Lazbuddie school for the fall term.

Mrs. Williams, second grade teacher, plans a summer visit with her sister, Paulene McBride in Lubbock. She plans to return to Lazbuddie school. Mr. and Mrs. E. C. Ketchum will have their daughter, Mrs. James Marler and son Terry with them this summer while Mr. Marler attends Oklahoma State.

Mrs. Pearl Holt and Mike will be in Hico and Morgan during the summer visiting Mrs. Holt's mother, Mrs. J. R. Lawrence. Mrs. Holt plans to attend Denton College this summer also. She will be back to teach in Lazbuddie the new term.

Mr. and Mrs. Thomas Byrd went to Tucumcari, Thursday of last week to bring back their daughter, Lynn Letcher for several days visit.

Mr. and Mrs. Jerry Barton and children accompanied by his

parents, Mr. and Mrs. O. F. Barton, of Clovis, left this week for a two-week's vacation and business trip to Baishoren, N. Y. The Bartons plan going the northern route and coming back the southern to view many points of interest.

Terry Parham, Timmie and Steve Foster, Larry Vaughn, Gary Matthews, Alford and Troy Steinbock, Mike and John Ward enjoyed a camo-out at the Willie Steinbock place Friday night. The boys cooked their supper and breakfast on campfire.

Mr. and Mrs. W. M. Parham visited part of last week with their son and family, the Eulan Parhams and to be at Terry's graduation. They also stopped to visit their grandchildren, Mr. and Mrs. John Neil Agee and daughter in Lubbock.

Several farmers in this area lost their crops in the sand storm Sunday afternoon. The most severe damage was done in the Clays Corner area where hard rain fell Saturday afternoon.

Mrs. Fred Henry received word Saturday May 11 that her father, Jack Parish of Ralls passed away while at work in the field. Mr. Parish suffered a heart attack at 12 noon that day. Funeral services were held in the Lorenzo Church of Christ May 13. Several in the area were acquainted with Mr. Parish. The community expresses sympathy to the bereaved.

Funeral services for Mrs. G. W. Harwood, 70, Canyon, mother of Mrs. J. W. Gammon were held in Canyon Sunday afternoon. Mrs. Harwood had been sick for several months. Services were held in the Canyon Church of Christ with Jack Downing in charge. Attending the funeral from here were Mr. and Mrs. John Gammon and Marianna, the Mc Brooms, Roy Daniels, Pete Mims, W. H. Gammons Dem Posters, Garwin Thorns, Willie Waddels, D. B. Ivys and Henry Ivys and the J. J. McDonalds.

Bill Shirley received word that his mother, Mona Shirley 86, of Anna had passed away, Friday. Funeral services were held Monday, May 20 in the First Christian Church in Anna. Mrs. Shirley was the grandmother of Bill Brown of Lazbuddie.

Funeral services for Mrs. Austin Darling, 76, of Clovis Retirement home were held Tuesday of last week in the 4th St. Church of Christ in Portales, with Grover Ross in charge. Mrs. Darling was the mother of Duane Darling and grandmother of Jerry, Chunk, Dan, Gene and Kay Ann Smith all of Lazbuddie.

Ronnie Gustin is a patient in the West Plains Hospital. Ronnie was admitted for medical care the early part of last week.

Bruce Burleson was admitted recently for medical care in the Green Memorial Hospital.

He was resting well Monday of this week.

Mrs. Bruce Burleson had surgery Monday of last week in Green Hospital. She is reported recuperating nicely.

A Vacation Bible School is being held in the First Metho-

dist Church this week. The children attending will be entertained with a party at the close of the school.

The Bible School for the Church of Christ will begin Monday and will last through (Cont. to page 3)

Persons Near Retirement Age Should Check Now on Benefits

The Lubbock social security district manager, John G. Hutton, today urged people near retirement age to ask ahead of time about their social security benefits. "An early visit to the social security office," he said, "will help speed the initial social security check so that it arrives on schedule at the time of retirement and knowing what will be paid at retirement time helps in forming the details of a person's retirement plans."

The social security office is traditionally one of the busiest places in town during this time of year. People who intend to retire later in the year are applying for benefits now or calling to find out what proofs are expected from them. According to Mr. Hutton, it is wise to apply for benefits two or three months early so that despite the rush, checks will be received on time.

Many people delay their benefit claims because they don't have a birth certificate. Hutton pointed out that a bap-

tismal certificate, confirmation register, naturalization record, or a family Bible in some cases are acceptable. Evidence of earnings for the previous year is also necessary. Generally, an employee can use his income tax withholding statement. For the self-employed person, a copy of his federal income tax return and cancelled check showing payment of taxes would be sufficient.

Since the new social security retirement rules have gone into effect, many workers past the age of 62 who do not have substantial earnings from work can receive some benefit checks even though they are still working. Because of this and because most people should know what sort of a benefit they can get at age 65 (and at age 72 when there is no limit on earnings), workers would be wise to see their local social security office at age 62, 65 and 72 to talk over their individual situations.

A representative of the Lubbock Social Security office will be in Earth on Wednesday, May 29 in the Citizens State Bank at 1 p.m. and will be glad to assist in all matters pertaining to social security.

NEW GAS SERVICE STATION FOR EARTH... A busy place these days is the site of the future home of the El Paso station, east of the La Casa Motel. Plumbing is being installed by Brady Plumbing Co. of Lubbock.

Attorney General's Office Sets Record Accomplishments in 63

Attorney General Waggoner Carr today released figures reflecting the operations of his office for the first one-third of 1963.

Since January 1st, the Attorney General's office has handled a total of 1,311 cases. Of this total, the office has won 986 cases, lost 61 and 264 cases have been disposed of in other ways.

Carr also pointed out that the total number of cases pending on January 1st had been cut from 3,687 to 3,332, a drop in total cases of 355.

Additional figures released showed that on January 1st there were 24 opinions pending and an additional 87 official opinions have been requested since that date. Of these 111 opinions, 70 have been released, 28 have been withdrawn, and only 13 are now pending.

In addition to these figures, Carr announced that the Bond Division of his office has set an all-time record for bonds examined and approved during the first four months of 1963.

The record includes both dollar volume and number of bonds issued and exceeds the first third of any calendar year since the Attorney General's office was first charged with these duties in 1905.

The figures released show 274 bond issues were approved during the first 4 months of this year as opposed to 219 for the same period of 1962. Dollar volume for the first one-third of 1963 was \$189,185,640 against \$129,364,570 for the same period of 1962.

The bond division has averaged more than 16,1 issued per week and \$2,282,210 in bonds approved every business day since January 1, 1963.

In praising his staff members Carr said "I think all of these figures speak well of the fine, dedicated people on this staff. We are especially happy not only over our work record, but over the reduction of total cases pending."

Sunnyside News...

By Teeny Bowden

Dwight Shottenkirk visited with his family and Mr. and Mrs. Marlin Power in Breckenridge last weekend.

Janice Blackburn was one of the four Springlake High students who were named for Academic awards last week. The National Honor Society is sponsoring the awards.

Several from the community attended the Senior play at Springlake last Friday night. Wanda Jenkins was in the play. Mr. and Mrs. J. E. Shirey and Jimmy, Mr. and Mrs. Cecil Curtis and Debbie, and Mr. and Mrs. Ray Axtell attended the FFA Awards Banquet at the Springlake School Monday evening.

Janice Blackburn was elected president of the FFA at Springlake for next year in a meeting at the school Monday.

Janita Blackburn was recently elected as alternate Student Council representative for the Freshman class of Springlake High School.

Mrs. A. O. Oldham and Gay left Tuesday with relatives for Phoenix, Arizona where they will visit a week with her sister and family.

Mrs. Lowell Westmoreland and girls and Mrs. Mary Murry and Kim of Littlefield visited Tuesday with Mrs. Alton Louder, Zane Westmoreland returned to his home with them.

Twenty-eight attended the Spanish Story Hour at the church Tuesday afternoon.

Ten attended the Brotherhood meeting at the church Tuesday night. The program that was carried to Lee Street Church in Dimmitt last week was presented.

Janie Paschal, Juanelle Conard, and Sandy Loudder participated in a music recital in Dimmitt Tuesday night. Janie's group wore formal. Kathy Little attended her recital Friday night.

Mrs. J. E. Shirey entertained in her home Wednesday morning with a Stanley Tacky Party. Twenty one attended with most of them dressed tacky. Those from outside the community attending were Mrs. Willis White and Joe Edd Wheat of Springlake, Mrs. Calvin Lippard won the prize for being dressed the tackiest; Mrs. Tex Conard and Mrs. Robert Duke were runners-up, Larry Duke was the tackiest boy and La Don Little the Tackiest girl.

Mrs. Howard Bridges, Mr. and Mrs. S. C. Gunn of Weatherford, and Wade Dent II of Louisville, Kentucky arrived Tuesday night to visit with Howard Bridges until Sunday.

Harlon Redwine of Lubbock visited Wednesday afternoon with Mr. and Mrs. Weldon Bradley, Molly and Lee.

Mrs. J. E. Shirey took Mrs. Joe Edd Wheat of Springlake to Littlefield Wednesday afternoon for a medical check-up. She visited with Mrs. Harry Mitchell of Springlake on the way home.

The GA's put on a skit before the church Wednesday night during the Prayer meeting hour. Mrs. Weldon Bradley and Mrs. Hershel Wilson had charge of it, with Mrs. Robert Paschal helping.

Mr. and Mrs. James Powell and Cheryl Lynn visited with Mr. and Mrs. Woodrow Powell and family of Earth Wednesday night. Randy and Denae came home with them.

Olvis Spencer learned Thursday he was the Valedictorian of Dimmitt High School this year.

Carolyn Holcomb and Molly Bradley participated in the final band concert of the year in Dimmitt Thursday night. They play in the High School Band. Jimmy Waggoner and Juanelle Conard also participated in the Jr. High Band.

Eighty-nine attended the Associational Youth Rally at Sunnyside Thursday night. Rev. Roy McClung of Plainview was the guest speaker. Mrs. M. D. Durham, Mrs. Weldon Bradley and Mrs. Alford Crisp served donuts and pops to the group after the program. Only four of our own youth attended.

The WMS day circle and the Beginner Sunbeams met at the church Thursday afternoon for their regular meetings. Mrs. M. D. Durham had charge of the circle program and Mrs. Raymond Lilley the Sunbeams.

Wanda Jenkins was in Lubbock all day Thursday with the senior class from Springlake for Senior Day. They attended the Grand Ole Opry show in Lubbock Thursday night.

Mrs. J. T. Holcomb went to Sherman, Oklahoma Friday with a sister to be with another sister who had suffered a heart attack. They were in a minor accident on the way, but received no serious injuries.

Howard Bridges was recognized as the State Conservation Farmer of the year at the District Awards Banquet in Plainview Friday night. He was called on to address the group, and will receive a plaque later. His niece, Mrs. Willard McCloy of Morse, was recognized as District Homemaker of the year in the same ceremonies. She was presented a silver tray. She and Monty McCloy spent Friday night with Mr. and Mrs. Howard Bridges, and another

nephew in Lubbock Saturday. Mr. and Mrs. John Bridges and Brad of Earth ate dinner Saturday with Mr. and Mrs. Howard Bridges, Mr. and Mrs. S. C. Gunn from Weatherford and Wade Dent II of Louisville, Kentucky. Mrs. Bridges, the Gunns and Wade returned to Weatherford Sunday morning.

From 1/2 inch to two inches of rain was received in the community Saturday with the heavier amounts in the southeast part. Little hail was reported, but several lost their young cotton to the sand on Sunday.

Eighty-five attended Sunday School with 24 in Training Union Sunday night. Bibles were presented to the graduating seniors of the church by the WMS in the morning services. Olvis Spencer and Eddie Townsend received their Bibles. Wanda Jenkins and Kenny Akers who were not present, will receive theirs later. Sandy Loudder was baptized after the Sunday evening services. Several from the community attended the Bac-

calaureate Services in Springlake Sunday night. Mrs. Roy Phelan was admitted to the Castro County Hospital in Dimmitt Sunday evening for tests Monday.
