NOSIN' Lovely Mrs. Casey Jones, a former Earthite, breezed into the office unexpectedly Monday morning with only a moment for quick 'Hello's'...

NOSIN' Ran across the following recently in the WeWoka, Oklahoma, Church of Christ, Church paper... It certainly contains food for thought...

Lost! A boy! Not kidnaped by bandits and hidden in a cave to weep and starve and raise a nation to frenzied searching...

NOSIN' Seems like Saturday night was just a bad night in general for Earth... Several events must have taken place...

NOSIN' Friday is the day to beware. Avoid all things, try to avoid walking under ladders, allowing a black cat to cross your path...

MORE AND CLEANER GRAIN IN THE BIN

The Inside Story

GLEANER Combine's Capacity from Reel to Straw Spreader

It's easy to see why GLEANER Combines consistently outperform them all . . . in cutting, threshing, separating and cleaning . . . in every grain and seed crop . . . swiftly, under average conditions . . . steadily, in tough conditions. GLEANERS bring you more profit-earning harvest paydays.

... Separating Begins Right at The Cylinder ... UPPER

13 Feet of Separating Length

GLEANER Combines save more grain because the material travels farther and spreads out over a larger separating area . . . made possible by the "down-front" cylinder. Space used for feeding in other combines is used for separating in GLEANER Combines. Overall machine length is held to a minimum; separating capacity at a maximum.

Every foot is a working foot . . .

LOWER 2-Fan Cleaning, Plus Big-Capacity Shoe

UPPER FAN PRECLEANS — as it directs a heavy blast of air through separated grain coming off riddle to cleaning shoe. Chaff and dirt are blown out rear of separator, pre-cleaning a majority of the grain before it reaches the cleaning shoe.

LOWER FAN FINISH CLEANS — as it directs a regulated volume of air to the end-shake type shoe for finish cleaning . . . more grain is saved; cleaner grain is assured.

BIG-CAPACITY SHOE — adjustable chaff-er and sieve match capacity of threshing and separating units. Angle of sieves is adjustable to meet changing conditions. Optional finishing sieves available.

1 Wing-type beater agitates material after it leaves the cylinder . . . and directs it to the front separator.

2 Straw is kept in suspension in front separator because of agitator and wind blast from beater. A majority of separation takes place at the riddle, where clean grain falls through suspended straw and is conveyed to cleaning shoe.

3 Second beater agitates straw

again as it flows from riddle area to rear separator . . .

4 Where rotary straw walkers separate remaining grain from straw . . . separating job is completed.

5 Air blast from top fan winnows grain here . . . aids separation, begins the cleaning job.

6 All grain is delivered to the front of adjustable end shaker-type shoe for finish cleaning.

CALLING ALL HOME MAKERS

By Wilma Taylor

A LOOK INTO THE FUTURE

What will the home of tomorrow be like? Here are some ideas on how our homes will look perhaps 20 or 30 years from now--or less. We thought you might enjoy reading this.

Lamps will be cordless. They will automatically turn on when you enter a room, and then turn off automatically when you leave the room.

You won't have to worry about closing windows anymore when it rains. Windows will close electronically by themselves when rain starts.

Walls will be one-way transparent--you'll be able to see out the whole length of the wall space--but nobody will be able to see in.

Some decorators feel tables will be recessed into ceilings and then lowered electronically when needed.

Chairs and sofas will be recessed into walls. When you want one, you just push a button and out it comes into place.

These chairs and sofas will automatically raise or lower for tall or short people.

These are great ideas to think about, and no doubt they'll all come true, but meanwhile, if you want some present down-to-earth furniture values for your home, we are ready to serve you with the best there is--in the world today--for your home right now.

Come in or give us a call soon. Taylor Furniture, Phone 257-3231, Earth, Texas.

TEXAS PRESS ASSOCIATION 1965 PRIZE WINNER

EARTH-NEWS SUN

FLOOR RAISING JOB is almost complete at the local Farm Chemical Company. The job was made necessary following a loss of fertilizer in mid June, due to high water.

A Stitch In Time...

"Be prepared for the worst, but hope it never happens," is being considered by our National Defenses today, and on the local scene, Norman Hinchliffe, co-owner, and operator of the Farm Chemical Company of Earth is likewise getting prepared for the worst, but hopes we don't ever again receive our annual quota of rainfall all in one big helping. Hinchliffe, recently lost all the bulk fertilizer in his bins when

a downpour in the Earth area caused water to rise on his property, engulfing the firm and creating an island of the local Farm Chemical Co. Hinchliffe is at present, supervising a project to raise the floors 10 to 12 inches in his bins, hoping to prevent a repeat of such damages. The present floor level will be 4 inches above the high water mark made during the mid-June rains.

S. S. Rep. To Be in Littlefield August 12 and 19

The social security account number shown on the card you obtained from the social security office is the one that you will keep throughout your working lifetime. To this account will be credited your earnings regardless of where you work or live. The earnings credited to your account will be the basis of determining the amount of benefits you and your dependents or survivors will receive when you become disabled, re-

tire, or die. To assure yourself that all creditable earnings have been reported, and that your benefits will be the highest possible, you should check your social security account from time to time. Ask at your social security district office for Form OAR-7004, "Request for Statement of Earnings," or write directly to the Social Security Administration, P. O. Box 57, Baltimore, Maryland. Print your name, social security account number, and date of birth. Be sure to sign your request for earnings statement.
