

MEMPHIS DEMOCRAT

MEMPHIS, TEXAS, THURSDAY, NOVEMBER 9, 1916.

NO. 21.

Election Close, Wilson in Lead

A specially posed photograph of Charles Evans Hughes, the Republican candidate for president, with his family. First row left to right, Charles E. Hughes, Jr., Mrs. Hughes, Charles Evans Hughes, Miss Elizabeth Hughes, second row, left to right, Miss Helen Hughes and Miss Catherine Hughes.

Latest Report Gives President Wilson 256 Electoral Votes, Lacking Ten Votes Necessary For Election. The States Yet To Be Heard From Are; California, 13; Minnesota, 12; New Hampshire 4; New Mexico 3

The Democrat made an effort to get late news from Fort Worth by wire and held the forms open to the last minute hoping for, news which failed to come.

THE BREEDERS FORM ORGANIZATION

Arrangements Made for Securing Recognition of Federal Veterinarian Meeting Saturday

A meeting was held at the residence of the late Dr. J. F. Bradley on Saturday afternoon for the purpose of organizing a breeders' association for the prevention and control of hog cholera in Hall county. The meeting was addressed by Agent Minkoff and Dr. Frank Jones of the U. S. Bureau of Animal Industry. Dr. Jones is an experienced veterinarian and has charge of the veterinary work in Texas. His headquarters are at Ft. Worth and his visits to Memphis were to assist in protecting the hog industry from the ravages of cholera and to offer to place a quarantine here of the people only organization. His address is Memphis, Tenn. His address is Memphis, Tenn. His address is Memphis, Tenn.

High Stinson Dead

High Stinson, a young man thirty-three years of age, who lived near the school house, died here Wednesday afternoon with stomach trouble. He had been married about two months. He will be buried at Lakeview tomorrow afternoon.

1913 STUDY CLUB MEETS

Thomas A. Edison Subject. Many Interesting Papers on Life of Great Inventor.

Mrs. F. E. Adams was hostess to the 1913 Study Club on last Wednesday afternoon November 1st. With Miss Inogene King as leader. The meeting proved to be unusually interesting for the afternoon was: "Thos. A. Edison." Miss Lily Houston very graphically told of Edison's life from childhood to manhood and how his accidentally acquired deafness proved to be an asset to him through life instead of a hindrance. Mrs. D. L. C. Kinard told of Edison the inventor, and we realized more than ever how much we owe this great man. Miss Kate Arnold gave an interesting sketch of the life of "Mrs. Edison" and of her wonderful ability as a help mate. After Mrs. Gribble had finished telling us about "Telephone and Lights" we decided of all the wonderful inventions these perhaps have proved to be the most useful. The information given by Mrs. A. Power on "Talking Machines" was both instructive and interesting. "Edison as Head of Naval Advisory Board" was ably given by Miss Ina May Thrasher. "Practical Electricity" was brought on in a most pleasing way by Mrs. W. L. Allen. This concluding the program the hostess served refreshments and the club adjourned to meet November 15 with Mrs. W. L. Allen.

Dates for Collecting Taxes
I will be at the following places on dates mentioned below, to collect taxes for year 1916:
At Tell, Texas, on Wednesday, November 15, 1916.
At Turkey, Texas, on Friday and Saturday, November 17 and 18.
At Brice, Texas, on Tuesday, November 21.
At Lesley, Texas, on Tuesday afternoon, November 21.
At Hulver, Texas, on Thursday morning, November 23.
At Farnell, Texas, on Thursday afternoon, November 23.
At Lodge, Texas, on Monday, November 27.
At Lakeview, Texas, on Tuesday, November 28.
At Newlin, Texas, on Thursday, December 7.
At Estelline, Texas, on Friday and Saturday, December 8 and 9.
Respectfully,
J. E. KING, Tax Col.

MEMPHIS SCHOOLS VOTE FOR WILSON

School Holds Regular Convention Makes Nomination and Offers Amendments to Platforms Democratic Faction Wins Election

EMBRYO CITIZENS ENJOY THE GAME

After one of the hottest campaigns ever waged in the Memphis Public School, Woodrow Wilson was elected President of the United States by a large majority. The nominating conventions of the different political parties of the United States (rooms) met on last Friday, November 3 in the High School Auditorium for the purpose of nominating a President and Vice President of the United States.
Prohibition Convention
The delegates to the prohibition convention were first called together by the hold over chairman, Hon. O. B. Rollins.
Mr. T. L. Rouse was elected chairman of the convention and Adelbert Elliott secretary.
After transacting important business the convention took up the adoption of a platform. The following amendment was made to the Prohibition Platform "That if be made a criminal offense, punishable by imprisonment for not less than two nor more than five years, to raise transplant or sell tobacco in any form in the United States." After the above amendment was made the convention proceeded with the nomination of President and Vice-President of the United States.
Hon. J. F. Hanley was nominated for president and Ira Landrith for vice-president. After a charge to the delegates, by the chairman, the convention adjourned to meet again in 1920, the world every year.
We want those ships manned with the best instruction in art, literature, travel history, modern language, sociology, human nature and universal brotherhood.

We want the students selected according to all around merits from graduates of public High Schools and Industrial, vocational and technical schools of all the states, we want this post-graduate year of travel given at the expense of the nation, the students co-operating systematically with a minimum naval crew, in all work
Socialist Convention
The delegates to the Socialist Convention were called together by the hold-over chairman after which Carl G. Booth was elected chairman and Frank Wilson secretary.
The Socialist Platform was read after which the following amendment was added: "We want our war vessels and battle ships utilized in times of peace for a public University of Travel. A white fleet that shall tour done aboard ship."
An amendment to knock out woman's suffrage failed. The platform was adopted as read.
Allen L. Benson was nominated president and G. R. Kirkpatrick vice-president on the Socialist ticket after which the convention adjourned.
Republican Convention
The Republican delegates elected O. B. Jones chairman of the convention and Hue French secretary.
The platform of the Republican party was adopted as read.
After eloquent nominating speeches were made Charles E. Hughes was nominated over Roosevelt for president and C. W. Fairbanks vice-president on the Republican ticket. After several patriotic speeches the convention adjourned to meet in 1920.
Democratic Convention
Great interest seemed manifest when the greatest democratic conven-

HALL COUNTY VOTE IS LIGHT

Nine Boxes Returned Indicate a Vote of About 800. Amendment Carries.

Returns have been received from nine of the twelve boxes in Hall county, Turkey, Lakeview, and Baylor being out.
These returns indicate a very light vote in the neighborhood of 800. An increase is indicated in both the Socialist and Republican vote.
The constitutional amendment providing for additional school taxes seems to have carried by about two to one.
The vote will be canvassed by the commissioners' court next week and the results will then be published.

CELEBRATE SUPPOSED DEMOCRATIC VICTORY

Clarendon and Lakeview Celebrate Democratic Success Memphians Have Powder Ready

Reports from Clarendon say that the citizens of that town celebrated the supposed victory of the democrats by elaborate parade and vociferous shouts.
At Lakeview, west of here, anvils were shot and a general jollification held, it is said.
Here in Memphis, we understand that powder was secured and arrangements for shooting anvils made; but ceremony was delayed when news less reassuring was received.
from each room who met in the Electoral College (auditorium) immediately following the election. The result of the election was a land slide for Wilson. Following is the vote by States:

Lax-Fos, A Mild, Effective Laxative & Liver Tonic
Does Not Grip nor Disturb the Stomach.
In addition to other properties, Lax-Fos contains Cascara in acceptable form, a stimulating Laxative and Tonic. Lax-Fos acts effectively and does not gripe nor disturb stomach. At the same time, it aids digestion, arouses the liver and secretions and restores the healthy functions. 50c.

Rev. Charles E. Murrill of Memphis was in Clarendon Tuesday, and paid The News office an appreciated visit. But we were much grieved to learn from him that his good wife passed away last Friday evening following an illness of more than two months duration. Complications added to a kidney trouble of long standing were more than her constitution could withstand. She was tenderly laid to rest in Memphis cemetery on Saturday. Besides her husband, she leaves two boys and an infant daughter who must fight life's battles without a loving mother's help and prayers. Mr. Murrill and this writer were friends in the "long ago" in East Texas, and our sympathy for him is deep and sincere.—Clarendon News.

Don't Let The Fever Get You.

Amid the general rejoicing over the high price of cotton this season, it is difficult to hear the warning note that is being issued in a few but authoritative quarters. This warning is against overplanting of cotton next season.

The high price this year was due to several unusual circumstances. The extremely low prices of 1914 had led to a great curtailment of the acreage of 1915. This allowed using up a great deal of the surplus that had been carried over from 1913 and 1914 in the larger spinning centers. The price in 1915 was barely steady and the farmers were beginning to think there might be something in the talk about the importance of living at home and especially in the importance of giving the world only what it could use.

During 1915 there was a gradual improvement in the spinning centers. This improvement became very rapid in 1916 because new spindles went into action and neglected markets were calling for cotton. There was a tremendous readjustment in the world market and the demand found its way to those who could still produce cotton goods.

Thus 1916 was ushered in with the spinners able to handle and sell a normal crop. But the acreage had been reduced and the buyers knew it, so there was a tendency for the price to rise. Then came one disaster after another—ALL IN OTHER STATES THAN TEXAS. And thereby hangs the tale. The Texas crop was short and the crops in other states were damaged. There came storms and droughts and hurricanes that reduced the crop by millions of bales so that by Sept., the federal crop estimates issued from Washington were the lowest ever had of in this country. Don't forget that Mr. Farmer. The war didn't rate your prices. You raised less cotton and you got more money; a word to the wise is sufficient Live at home.—Texas Weekly Review

This—And Five Cents:

Don't Miss This. Cut out this slip, enclose five cents to Foley & Co., 2835 Sheffield Ave., Chicago, Ill., writing your name and address clearly. You will receive in return a trial package containing Foley's Honey and Tar Compound for coughs, colds and croup; Foley Kidney Pills, and Foley Cathartic Tablets.

Whenever You Need a General Tonic Take Grove's

The Old Standard Grove's Tasteless chill Tonic is equally valuable as a General Tonic because it contains the well-known tonic properties of QUININE and IRON. It acts on the Liver, Drives out Malaria, Enriches the Blood and Builds up the Whole System. 50 cents.

Baby Had Whooping Cough

Mrs. Sam C. Small, Clayton, N. M., writes: "My grandson had whooping cough when he was three months old. We used Foley's Honey and Tar and I believe it saved his life. He is now big and fat." Foley's Honey and Tar is a fine thing to have in the house for whooping cough, croup, coughs, colds.—Fickas Drug Company.

The Greatest Insecticide.

In a plea for the bobwhite, W. L. Nelson, Assistant Secretary of the Board of Agriculture, states that a count of the seed in one bird's crop revealed the presence of about 10,000 pig-weed seed, and bobwhites are known to eat at least 85 kinds of weed seed. For meat he chooses among 57 kinds of beetles, 27 kinds of bugs, 9 kinds of grasshoppers, 13 kinds of caterpillars and a wide variety of ants, flies and wasps. One bobwhite has been known to eat as many as 5,000 plant lice in two hours, and he is fond of boll-weevils, chinch bugs, cabbage worms, cucumber beetles, squash bugs, army worms and Hessian flies.

And yet there are farmers who are willing to have all the bobwhites on their farms killed. Shooting the hired man would be more logical. The hired man demands wages, while the bobwhite works for nothing.—Globe Democrat

IT'S SURPRISING

That So Many Memphis People Fail To Recognize Kidney Weakness.

Are you a bad back victim? Suffer twinges, headaches, dizzy spells?

Go to bed tired—get up tired? It's surprising how few suspect the kidneys.

It's surprising how few know what to do.

Kidney trouble needs kidney treatment. Doan's Kidney Pills are for the kidneys only.

Have convinced Memphis people of their merit. Here's a Memphis case; Memphis testimony.

Kidney sufferers hereabouts should read it. Mrs. Chas. Oren, N. Eighth St., Memphis, says: "I am glad to recommend Doan's Kidney Pills, procured from Tomlinson's Drug Store, for the great help they have given me. I can advise their use to anyone troubled with their kidneys, for whenever I have used them, they have never failed to relieve me."

Price 50c at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Oren had. Foster-Milburn Co., Props., Buffalo, N. Y.

There is more Catarrh in this section of the country than all other diseases put together, and for years it was supposed to be incurable. Doctors prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Catarrh is a local disease, greatly influenced by constitutional conditions and therefore requires constitutional treatment. Hall's Catarrh Medicine, manufactured by F. J. Cheney & Co., Toledo, Ohio, is a constitutional remedy, is taken internally and acts thru the Blood on the Mucous Surfaces of the System. One Hundred Dollars reward is offered for any case that Hall's Catarrh Medicine fails to cure. Send for circulars and testimonials. F. J. CHENEY & CO., Toledo, Ohio Sold by Druggists, 75c. Hall's Family Pills for constipation.

FASHION DEPARTMENT

Latest Styles in Dresses and Fabrics and Millinery Compiled by Famous New York Fashion Authority

THERE IS MUCH DIVERSITY IN AUTUMN STYLES

Though Full and Straight, Skirts May Differ Widely.

SLEEVES AND POCKETS ARE INTERESTING

It is especially true this autumn that variety is one of the greatest charms of the styles. Although those who have been looking for revolutionary changes in the fashions have, no doubt, been disappointed, they will certainly admit that the diversity in the present styles more than makes up for the absence of anything that might be called radically different. Fresh interest is always being aroused by the clever variations of the present straight, full silhouette that meets the eye at every turn.

Afternoon Dress of Satin with Draped Skirt

Although the general rule is full, straight-hanging skirts, there are dozens and dozens of skirts of this type which differ widely one from the other. One of the most noticeable features which accounts for some of the differences is the uneven hem advocated by many of the Parisian houses. In some skirts the effect is obtained by a gradual lengthening at the back. In others, panels at the front and back or at the sides hang several inches below the hem of the skirt. When fur is used the hem of this type it may be placed at the edges of the panels or the sides of the skirt, but not all around; and this is another means of varying the placing of fur banding of skirts. Some of the French designers who lay particular stress on the uneven hem are Callot, Bulloz, Agnes and Beer.

Not only skirts but coats, too, are marked by the uneven hem. Not a few droop at the sides, while the front and back are even, and some coats with full, rippling pleats are a good deal longer in the back than in the front.

Another theme which has had no end of variations is that of the pocket. Through the long life of the pocket, it has been truly amazing to watch the resources of the designers, who have never lacked in bringing out something novel in this direction. And, still, new treatments are seen every day, for large and small pockets are still the vogue on garments of every kind and for every occasion, from the simple, tailored waists and

skirts to the most dressy frocks and suits.

In afternoon frocks, a most charming effect is the soft side drapery on skirts, falling like a cascade. This style is exceedingly graceful in soft satins, silks, chiffon velvets and even in the pliant serges and other soft woolsens. The dress shown here illustrates this pretty mode. It is fashioned of soft satin with a collar of fur cloth and a banding of fur around the edge of the skirt. The waist is in jumper effect outlined with braid, and there are extensions at the sides which end in little pockets.

Flat brad is one of the new dress trimmings, and the lacquered braid is one of the prettiest novelties in this line. It has a dull polished finish.

Some New Sleeves

There are several new fashions in sleeves, and among them the most striking are those that are quite full at the elbow and fit snugly below it. The leg-o'-mutton is being brought forward again, and sleeves with deep cuffs are very popular. Quite a novel idea in sleeves was noticed in a blue serge dress trimmed with moleskin fur at the collar, hem and pockets. It had tight-fitting sleeves, the upper part of which was of fur and the deep cuff of blue serge.

There are few coats without pockets. All are very snug and comfortable, especially the all-enveloping top coats buttoning to the neck and covering the entire dress. The coat in illustration is of heavy velours with large bone buttons and very large gathered pockets. Few women will be satisfied without one of these practical coats, which may be used in all kinds of weather.

Children's Fashions

Children are not neglected, by any means, by those who set the modes. A great deal of attention is given to their clothes, which to a certain degree follow the fashions of their elders. The Russian blouse is frequently

A Heavy Coat For All Kinds of Weather.

employed for youngsters, both for school and afternoon frocks. Both plump and slender girls can wear this style becomingly.

To vary the long coat, which is always an essential item of the girl's wardrobe, smart little coat suits are now being worn as well. For dressy wear these are of velvet, wool velours and duvety, and for general use they are of serge, gabardine, checks and mixtures.

Embroidery in colored silks, wools and beads is as popular for young girls as for women. They are also as wide a choice in dress materials and colors. Green, dark brown, deep red, and blues of all shades, are used for their coats and frocks.

November Weather.

Early cold snaps, storms and sleet, snow and slush, cause coughs and colds. Foley's Honey and Tar acts quickly, cuts the phlegm, opens air passages, allays irritation, heals inflammation and enables the sufferer to breathe easily and naturally so that sleep is not disturbed by hacking cough.—Fickas Drug Co.

No Doubt About This.

Foley Cathartic Tablets are just a plain, honest old-fashioned physic. They act promptly and effectively on the bowels without pain, griping or nausea. They keep the stomach sweet, the liver active, and the bowels regular. They banish biliousness, sick headaches, sour stomach, indigestion.—Fickas Drug Company.

A Distinctive Reason

What is the chief reason for the superiority of Dr. Price's Cream Baking Powder?

There are several good reasons, but there is one which distinguishes Dr. Price's from other baking powders.

This reason, which every woman should know, is that Dr. Price's Baking Powder is made from cream of tartar, which comes from grapes. This means a healthful fruit origin. It means natural food as distinguished from mineral substitutes used in other baking powders.

There is no alum nor phosphate in

You Can Subscribe or Renew for a Complete Year to The Fort Worth STAR-TELEGRAM

40,000 DAILY (8 Editions) 45,000 Sunday

A \$6.00 Daily and Sunday Newspaper for \$3.65.

A PENNY A DAY

IMPORTANT NOTICE!

With the exception of black ink, all raw materials used in manufacture of a newspaper have advanced in cost during the past twelve months approximately 100 per cent. This means that it will cost your publisher practically double to supply you with a newspaper the coming year.

Under stress of these unusual conditions, The Star-Telegram has been forced to increase its "Bargain Days" rate from \$3.35 to \$3.65. An increase of 40¢ per year (3 1-3¢ per month) or 12 per cent. Based on the conservative estimate increase in production cost of 100 per cent, under this price the division of added expense will be as follows:

Increased expense to The Star-Telegram 88%
 Increased expense to The Reader 12%

This situation means that after "Bargain Days" the regular rate of \$4.00 per year must be strictly enforced. We have battered the price to the very bottom in order to protect our Annual Subscription Cheap Rate Period, which has been in effect since the establishment of The Star-Telegram.

Do not take chances, save the \$2.35, by ordering before Bargain Days expire. Take advantage of the \$3.65 rate. The high standard of The Star-Telegram will be maintained as long as there is a Star-Telegram regardless of any war burdens.

Bring Your Order to This Office.

ADVERTISING RATES

Display advertising 15 cents per inch, column measure, each insertion. Professional cards \$1.00 per month, or \$10 per year if paid in advance.

Local readers, among news items, one cent per word, all initials and numbers count as words. Count ten words for each heading in black type.

Cards of thanks, obituaries, resolutions, etc., one cent per word. No charge for church, lodge, club or other similar announcements, except when they derive revenue therefrom. No advertisement will be taken for less than twenty-five cents. Count the words and send cash with the copy unless you have an advertising account with this paper.

Returns from the recent vote taken in Australia shows a majority against conscription for military service.

Isn't it about time to start a "do your Christmas shopping early" campaign? Panhandle folk will have a lot to buy this year.

Bill Davis, former mayor of Fort Worth was nominated by a big majority last Tuesday to again fill that place. Mr. Davis was strenuously opposed by the J. Frank Norris faction.

When Mark Twain was editor of a weekly newspaper one of his subscribers wrote him that he had found a spider in his paper when it reached him and inquired whether it was a sign of good luck. The noted humorist replied that the spider was simply looking over the paper to see which merchants were not advertising so he could visit them, spin a web across the door and live contented ever afterward.

"The Texas Weekly Review," published at Austin by H. B. Terrell, and edited by Chester T. Crowell made its appearance this week. Mr. Terrell says of the new publication: "Having been engaged in the newspaper business for many years, being weeklies, I have long realized the real need for a high class independent journal of vigorous style to be published at the capital." While the articles in the initial number are well written and touch live subjects the promise of a "vigorous style" remains to be filled; considering the subjects handled we would rather describe the style as mild.

F. J. Cope, of Parnell, one of Hall county's successful young farmers and stockraisers, and a representative citizen, was here Monday and came around to assure us of his support and approval in our fight against the practice of the commissioners' court in spending large sums without submitting the matter for approval to the taxpayers by a vote. This writer has recently had similar expressions from representative citizens from practically every section of the county, including some from those sections immediately benefited by the building of the new bridges, recently contracted for by the court. We appreciate these expressions because we know the principle we are contending for is right, and we believe necessary to protect the interests of the people; and we are glad to receive support that promises a change. The fight has been a long one and we have lost many successive engagements, the jail contest, the Estelline bridge and the recent Ox-Bow bridge contract; but the sentiment is rapidly changing and we believe that it will soon have sufficient force to prevent similar acts in future.

Notice of Sale!

The Fort Worth & Denver City Ry. Co. will, on Monday, December 4th, 1916, sell at Public Auction to the highest bidder at its Freight House, Memphis, Texas, two cars of machinery, viz. No. 203753 and AGS 4948, shipped by the Hinsley Smith Transfer Company, Waco, Texas, to C. T. Wilson at Memphis, Texas.

Above cars have been refused and will be sold to satisfy freight and other charges. The owner can get possession of these cars upon payment of all freight charges.

20,000 Leagues Under the Sea

BY JULES VERNE

First and Greatest Story of a Submarine

"Then, M. Aronnax, I propose curious excursion."

"Propose, Captain?"

"You have hitherto only visited the submarine depth by daylight, under the brightness of the sun. Would it suit you to see them in the darkness of the night?"

"Most willingly."

"I warn you, the way will be tiring. We shall have far to walk, and must climb a mountain. The roads are not well kept."

"What you say, Captain, only heightens my curiosity; I am ready to follow you."

"Come then, sir, we will put on our diving-dresses."

Arrived at the robing-room, I saw that neither of my companions nor any of the ship's crew were to follow us on this excursion. Capt. Nemo had not even proposed my taking with me either Ned or Conseil.

In a few moments we had put on our diving-dresses; they placed on our backs the reservoirs, abundantly filled with air, but no electric lamps were prepared. I called the Captain's attention to the fact.

"They will be useless," he replied.

I thought I had not heard right, but I could not repeat my observation, for the Captain's head had already disappeared in its metal case. I finished harnessing myself. I felt them put an iron-pointed stick into my hand, we set foot on the bottom of the Atlantic, at a depth of 150 fathoms. Midnight was near, but Capt. Nemo pointed out in the distance a redish spot, a sort of large light shining brilliantly, about two miles from the Nautilus.

As we advanced I heard a kind of pattering above my head. The noise redoubled, sometimes producing a continual shomer. I soon understood the cause. It was rain falling violently, and crisping the surface of the waves.

The rosy light which guided us increased and lit up the horizon. The presence of this fire under water puzzled me in the highest degree.

Our road grew lighter and lighter. The white glimmer came in ray from the summit of a mountain about 800 feet high. But what I saw was simply a reflection, developed by the clearness of the waters. The source of this inexplicable light was a fire on the opposite side of the mountain.

It was in the morning when we arrived at the first slopes of the mountain, but to gain access to them we must venture through the difficult paths of a vast cove.

Yes, a cove of dead trees, without leaves, without sap, trees petrified by the action of the waters.

Capt. Nemo was still mounting. I could not stay behind. Now I jumped a crevice the depth of which would have made me hesitate had it been among the glaciers on the land; now I ventured on the unsteady trunk of a tree, thrown across from one abyss to the other, without looking under my feet, having only eyes to admire the wild sites of this jungle.

Two hours after quitting the Nautilus we had crossed the line of trees, and a hundred feet above our heads rose the top of the mountain, which cast a shadow on the brilliant irradiation of the opposite slope.

We had now arrived on the first platform, where other surprises awaited me. Before us lay some picturesque ruins, which betrayed the hand of man, and not that of the Creator. There were vast heaps of stone, among which might be traced the vague and shadowy forms of castles and temples, clothed with a world of glistening zoophytes, and over which, instead of ivy, sea-weed and fungus threw a thick vegetable mantle. But what was this portion of the globe which had been swallowed by cataclysms? Who had placed those rocks and stones like fromlechs of pre-historic times? Where was I? Whither had Capt. Nemo's fancy hurried me?

I would fain have asked him; not being able to, I stopped him—I seized his arm. But shaking his head and pointing to the highest point of the mountain, he seemed to say:

"Come, come along; come higher!"

I followed, and in a few minutes I had climbed to the top, which for a cove of ten yards commanded the whole mass of rock.

I looked down the side we had just climbed. The mountain did not rise more than seven or eight hundred feet above the level of the plain; but on the opposite side it commanded from twice that height the depths of this part of the Atlantic. My eyes

ranged far over a large space lit by a violent fulguration. In fact, the mountain was a volcano.

At fifty feet above the peak, in the midst of a rain of stones and scoriae, a large crater of fire was vomiting forth torrents of lava which fell in a cascade of fire into the bosom of the liquid mass.

Rapid currents bearing all these gases in diffusion, and torrents of lava, slid to the bottom of the mountain like an eruption of Vesuvius on another Terra del Greco.

There, indeed, under my eyes, ruined, destroyed, lay a town—its roofs open to the sky, its temples fallen, its arches dislocated, its columns lying on the ground, from which one could still recognize the massive character of Tuscan architecture. Further on, some remains of a giant aqueduct; here the high base of an Acropolis, with the floating outline of a parthenon; there traces of a quay, as if an ancient port had formerly abutted on the borders of the ocean and disappeared with its merchant vessels and its war galleys. Further on again long lines of sunken walls and broad deserted streets—a perfect Pompeii escaped beneath the waters.

Where was I? I must know at any cost. I tried to speak, but Capt. Nemo stopped me by a gesture, and picking up a piece of chalk stone, advanced to a rock of black basalt and traced the one word.

ATLANTIS.

What a light shot through my mind Atlantis, the ancient Meropis of Theopompus, the Atlantis of Plato, that continent denied by Origen, Jamblichus, D'Anville, Maitre-Brun, and Humboldt, who placed its disappearance among the legendary tales admitted by Posidonius, Pliny, Ammianus, Marcianus, Tertullian, Engel, Buffon and D'Arveac.

We descended the mountain rapidly, and the mineral forest once passed, I saw the lantern of the Nautilus shine like a star. The captain walked straight to it, and we got on board as the first rays of light whitened the surface of the ocean.

CHAPTER XXXII.

The Submarine Coal Mines.

The next day, the 20th of February, I awoke very late; the fatigues of the previous night had prolonged my sleep until 11 o'clock. I dressed quickly and hastened to find the course the Nautilus was taking. The instruments showed it to be still toward the south, with a speed of twenty miles an hour, and a depth of fifty fathoms.

I thought a mountainous region was succeeding the long plains, and accordingly, after a few evolutions of the Nautilus, I saw the southerly horizon blocked by a high wall which seemed to close all exit.

Much longer should I have remained at the window, admiring the beauties of sea and sky, but the panels closed. At this moment the Nautilus arrived at the side of this high perpendicular wall. What it would do, I could but guess. I ventured to my room; it no longer moved. I laid myself down with the full intention of waking after a few hours' sleep; but it was 8 o'clock the next day when I entered the saloon. I looked at the manometer. It told me that the Nautilus was floating on the surface of the ocean. Besides, I heard steps on the platform. I went to the panel. It was open; but instead of broad daylight, as I expected, I was surrounded by profound darkness. Where were we? Was I mistaken? Was it still night? No; not a star was shining, and night has not that utter darkness.

I knew not what to think, when a voice near me said:

"Is that you, Professor?"

"Ah! Captain," I answered, "where are we?"

"Under ground, sir."

"Under ground?" I exclaimed. "And the Nautilus floating still?"

"It always floats."

"But I do not understand."

"Wait a few minutes, our lantern will be lit, and if you like light places you will be satisfied."

I stood on the platform and waited. The darkness was so complete that I could not even see Capt. Nemo but looking to the zenith, exactly above my head, I seemed to catch an undecided gleam, a kind of twilight filled a circular hole. At this instant the lantern was lit, and its vividness dispelled the faint light. I closed my dazzled eyes for an instant, and then looked again. The Nautilus was stationary, floating near a mountain which formed a sort of quay. The lake then supporting it was a lake imprisoned

by a circle of walls, measuring two miles in diameter and six in circumference. Its level (the manometer showed) could only be the same as the same as the outside level, for there must necessarily be a communication between the lake and the sea. The high partitions, leaning forward on their base, grew into a vaulted funnel bearing the shape of an immense funnel turned upside down, the height being about five or six hundred yards. At the summit was caught the slight gleam of light, evidently daylight.

"Where are we?" I asked.

"In the very heart of an extinct volcano, the interior of which has been invaded by the sea, after some great convulsion of the earth. While you were sleeping Professor, the Nautilus penetrated to this lagoon by a natural canal, which opens about ten yards beneath the surface of the ocean. This is its harbor of refuge, a sure, commodious and mysterious one, sheltered from all gales. Show me, if you can, on the coasts of any of your continents or islands a road which can give such perfect refuge from all storms."

"Certainly," I replied, "you are in safety here, Capt. Nemo. Who could reach you in the heart of a volcano? But did I not see an opening at its summit?"

"Yes, its crater, formerly filled with lava, vapor and flames, and which now gives entrance to the life-giving air we breathe."

"But what is this volcano mountain?"

"It belongs to one of the numerous islands with which this sea is strewn—to vessels a simple sandbank—to us an immense cavern. Chance led me to discover it, and chance served me well."

"But of what use is this refuge, captain? The Nautilus wants no port."

"No sir; but it wants electricity to make it move, and the wherewithal to make electricity—sodium to feed the elements, coal with which to get the sodium, and a coal mine to supply the coal. And exactly on this spot the sea covers entire forests embedded during the geological periods, now mineralized and transformed into coal; for me they are an inexhaustible mine."

"Your men follow the trade of miners here, then captain?"

"Exactly so. These mines extend under the waves like the mines of Newcastle. Here, in their diving-dresses, pickaxe and shovel in hand, my men extract the coal, which I do not even ask from the mines of the earth. When I burn this combustible for the manufacture of sodium the smoke, escaping from the crater of the mountain, gives it the appearance of a still active volcano."

"And we shall see your companions at work?"

"No; not this time at least, for I am in a hurry to continue our submarine tour of the earth. So I shall content myself with drawing from the reserve of sodium I already possess. The time for loading is one day only, and we continue our voyage. So if you wish to go over the cavern and make the round of the lagoon you must take advantage of to-day M. Aronnax."

We had arrived at the foot of some sturdy dragon trees, which Ned pushed aside the rocks with their strong roots, when Ned Land exclaimed:

"Ah, sir, a hive! a hive!"

"A hive!" I replied with a gesture of incredulity.

"Yes, a hive," repeated the Canadian, "and bees humming around it." I approached and was bound to believe my own eyes. There, at a hole bored in one of the dragon trees, were thousands of these ingenious insects, common in all the Canaries, and whose produce is so much esteemed. Naturally enough the Canadian wished to gather the honey, and I could not well oppose his wish. A quantity of dry leaves, mixed with sulphur, he lit with a spark of flint, and he began to smoke out the bees. The humming ceased by degrees, and the hive eventually yielded several pounds of the sweetest honey, with which Ned Land filled his haversack.

At every turn of the path we were following the lake appeared in all its length and breadth. The lantern lit up the whole of its peaceable surface, which knew neither ripple nor wave. The Nautilus remained perfectly immovable. On the platform and on the mountain the ship's crew were working like black shadows clear by carved against the uminous atmosphere. We were now going round

the highest crest of the front layers of rock which upheld the roof I then saw that bees were not the only representatives of the animal kingdom in the interior of this volcano. Birds of every prey hovered here and there in the shadows, or fled from their nests on top of the rocks.

Three-quarters of an hour later we had finished our circuitous walk, and were on board. The crew had just finished loading the sodium and the Nautilus could have left that instant. But Capt. Nemo gave no order. Did he wish to wait until night and leave the submarine passage secretly? Perhaps so. Whatever it might be the next day the Nautilus having left its port, steered clear of all land at a few yards beneath the waves of the Atlantic.

CHAPTER XXXIII.

Cachalots and Whales.

That day the Nautilus crossed the singular part of the Atlantic Ocean. No one can be ignorant of the existence of a current of warm water, known by the name of Gulf Stream. After leaving the Gulf of Mexico about the twenty-fifth degree of north latitude, this current divides into two arms, the principal one going toward the coast of Ireland and Norway, while the second bends to the south about the height of the Azores; then, touching the African shore, and describing a lengthened oval, returns to the Antilles.

During the nights of the 13th and 14th of March, the Nautilus returned to its southerly course. That day, the 14th, Conseil and Ned came to me in my room. I inquired the cause of their visit.

"A simple question to ask you, sir," replied the Canadian.

"Speak Ned."

"How many men are there on board the Nautilus, do you think?"

"I cannot tell, my friend."

"I should say that its working does not require a large crew."

"Certainly, under existing conditions, ten men, at the most, ought to be enough."

"Well, why should there be any more?"

"Why?" I replied, looking fixedly at Ned Land, whose meaning was easy to guess. "Because," I added, "if my surmises are correct, the Nautilus is not only a vessel, it is also a place of refuge for those who like its commander, have broken every tie upon earth."

"Perhaps so," said Conseil, "but, in any case, the Nautilus can only contain a number of men. Could not you, sir, estimate their maximum?"

"How Conseil?"

"By calculation; given the size of the vessel, which you know, sir, and consequently the quantity of air it contains, knowing also how much each man expends at a breath, and comparing these results with the fact that the Nautilus is obliged to go to the surface every twenty-four hours."

Conseil had not finished the sentence before I saw what he was driving at.

"I understand," said I, "but that calculation, though simple enough, can give but a very uncertain result."

"Never mind," said Ned Land, urgently.

"Here it is, then," said I. "In one hour each man consumes the oxygen contained in twenty gallons of air, and in twenty-four that contained in 480 gallons. We must therefore, find how many times 480 gallons of air the Nautilus contains."

"Just so," said Conseil.

"Or," I continued, "the size of the Nautilus being 1,500 tons, and one ton holding 200 gallons, it contains 300,000 gallons of air, which, divided by 480, gives a quotient of 625. Which means to say, strictly speaking, that the air contained in the Nautilus would suffice for 625 men for twenty-four hours."

"Six hundred and twenty-five?" repeated Ned.

"But remember, that all of us, passengers, sailors and officers included, would not form a tenth part of that number."

"Still too many for three men," murmured Conseil.

The Canadian shook his head, passed his hand across his forehead, and left the room without answering.

"Will you allow me to make one observation, sir?" said Conseil. "Poor Ned is longing for everything that he cannot have. His past life is always present to him, everything that we are forbidden he regrets. His head is full of old recollections. And we must understand him. What has he to do here? Nothing; he has not learned like you, sir, and has not the same taste for the beauties of the sea that we have. He would risk everything to be able to go once more into a tavern in his own country."

It was the month of October, when one day Ned sighted a whale. Then he cried:

"It is not one whale; there are ten—there are twenty—it is a whole troop! And I not able to do anything! hands and feet tied."

"But, friend Ned," said Conseil, "why do you not ask Capt. Nemo's permission to chase them?"

Ward & Noel

20,000 LEAGUES UNDER THE SEA (Continued From Page Six)

Conseil had not finished his sentence when Ned Land had lowered himself through the panel to seek the Captain. A few minutes afterward the two appeared together on the platform.

Captain Nemo watched the troop of cetacea playing on the waters about a mile from the Nautilus.

"They are southern whales," said he; "there goes the fortune of a whole fleet of whalers."

"Well, sir," asked the Canadian, "can I not chase them, if only to remind me of my old trade of harpooner?"

"And to what purpose?" replied Captain Nemo; "only to destroy! We have nothing to do with whale-oil on board."

"But sir," continued the Canadian, "in the Red Sea you allowed us to follow the dugong."

"Then it was to procure fresh meat for my crew. Here it would be killing for killing's sake. I know that is a privilege for man, but I do not approve of such murderous pastime. In destroying the southern whale (like the Greenland whale, an inoffensive creature) your traders do a culpable action, Master Land. They have already depopulated the whole of Baffin's Bay, and are annihilating a class of useful animals. Leave the unfortunate cetacea alone. They have plenty of natural enemies—cachalots, swordfish, and sawfish—without your troubling them."

The captain was right. The barbarous and inconsiderate greed of these fishermen will one day cause the disappearance of the last whale in the ocean. Ned Land whistled "Yankee Doodle" between his teeth, thrust his hands into his pockets, and turned his back upon us. But Captain Nemo watched the troop of cetacea, and addressing me said:

"I was right in saying that whales had natural enemies enough, without counting man. These will have plenty to do before long. Do you see, M. Aronnax, about eight miles to leeward, those blackish moving points?"

"Yes, captain," I replied.

"Those are cachalots—terrible animals, which I have sometimes met in troops of two or three hundred. As to those, they are cruel, mischievous creatures; they would be right in exterminating them."

The Canadian turned quickly at the last words.

"Well, captain," said he, "it is still time, in the interest of the whales."

"It is useless to expose one's self, professor. The Nautilus will disperse them. It is armed with a steel spur as good as Master Land's harpoon, I imagine."

The Canadian did not put himself out enough to shrug his shoulders. Attack cetacea with blows of a spur! Who had ever heard of such a thing?

"Wait, M. Aronnax," said Captain Nemo. "We will show you something you have never yet seen. We have no pity for these ferocious creatures. They are nothing but mouth and teeth."

Mouth and teeth! No one could better describe the macrocephalous cachalot, which is sometimes more than seventy-five feet long. Its enormous head occupies one-third of its entire body. Better armed than the whale, whose upper jaw is furnished only with whalebone, it is supplied with twenty-five large tusks, about eight inches long, cylindrical and conical at the top, each weighing two pounds. It is in the upper part of this enormous head, in great cavities divided by cartilages, that is to be found from six to eight hundred pounds of that precious oil called spermaceti. The cachalot is a disagreeable creature, more tadpole than fish, according to Fredol's description. It is badly formed, the whole of its left side being (if we may say it) a "fallure," and being only able to see with its right eye. But the formidable troop was nearing us. They had seen the whales and were preparing to attack them. One could judge beforehand that the cachalots would be victorious, not only because they were better built for attack than their inoffensive adversaries, but also because they could remain longer under water without coming to the surface. There was only just time to go to the help of the whales. The Nautilus went under water. Conseil, Ned Land, and I took our places before the window in the saloon, and Capt. Nemo joined the pilot in his cage to work his apparatus as an engine of destruction. Soon I felt the beatings of the screw quicken, and our speed increased. The battle between the cachalots and the whales

REGIMENT OF NATIONAL GUARD ON THE MARCH

DODGE BROTHERS

ROADSTER

It is easy to see why this roadster enjoys such a remarkable sale.

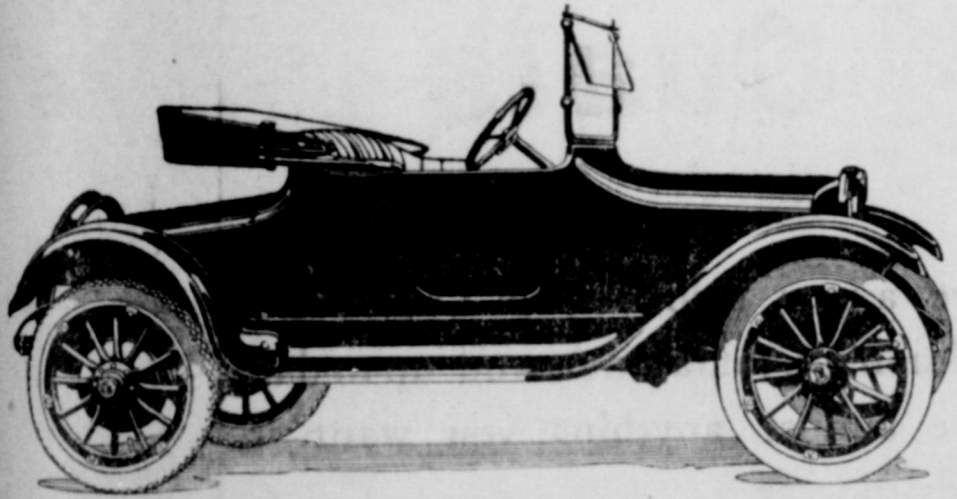

It represents a happy combination of smartness and utility. It is light and fast, the weight being only 2150 pounds. The wide, deep seats and the angle at which they are tilted encourage comfort. Luggage room is unusually generous.

It will pay you to visit us and examine this car

The gasoline consumption is unusually low
The tire mileage is unusually high.

The price of the Touring Car or Roadster complete is \$785 (f. o. b.)

The price of the Winter Touring Car or Roadster complete including regular mohair top is \$950 (f. o. b. Detroit)

TEXACO CRATER COMPOUND

To SAVE The GEARS

TEXACO CRATER COMPOUND is intended for use on heavy gears of all types, and on chains and sprockets. Stays where it is put, defies heat, pressure, or flying dirt.

Clings to gear teeth, protects them from wear, rust, or cutting.

Gears run quieter, last longer, mesh properly.

Easier pulling and more power.

A can of "CRATER" will convince you. Use it along with TEXACO URSA OIL for cylinders, TEXACO CUP GREASE for bearings, TEXACO GASOLINE for fuel.

A complete line of oils and greases for all purposes can be had from the TEXACO Agent in your town.

A Great Musical Event

The one big striking musical novelty commanding in artistic dignity to be seen in Memphis, is the Royal Hawaiian Sernaders announced to appear at Dixie Theatre, Friday evening, November 10, 1916.

Phonographic records now in use better describe Hawaiian music than all possible verbal explanation. The lively demand for these same records, more than anything else, shows the popular trend and public preference. And withal, these are weak vapid imitations in the expression of the exquisite harmony, poetic sweetness and entrancing melody all suggestive of the wealth and color of Oriental splendor.

To these people of the islands music seems to be a natural endowment—an unstudied art bubbling from the throat as easy and graceful, without effort or strain, as the melodious tone caroling from some rare specie of song bird.

This rare voice combined with instrumental harmony elevates our American song from the common place to the realm of true artistry.

Real Comfort During Long Winter Evenings

Make life really worth living—get a heater that makes you forget it's winter time. The highest degree of comfort—the greatest amount of fuel economy—is yours when you have the well known, dependable home-comfort-bringer—

Riverside Aer-Duct Heater

Most up-to-date in mechanical features. Pays for itself by cutting down your coal bill.

Gives an even, steady heat. Possesses features not contained in any other heater on the market.

Come in today and inspect this remarkable heater. A demonstration will convince you. It is a pleasure to show goods; there is no obligation to buy.

What One Boy Did.

County Demonstration Agent, A. H. Prince, of Orange, Texas, reports to the Extension Service of the A. and M. College as follows:

Morris Leslie, living in a remote section of Orange County, cut off from school, joined the Boy's Corn Club at the age of 14 years. For three years he has followed our directions faithfully. He carefully selected seed in the field and planted "ear to the row" thus greatly improving his variety. Twice he has taken first prize at the County Fair and once at the Waco Cotton Palace. His corn attracted much attention and he sold his surplus at a high price. Last year he was awarded a free trip to the A. and M. College and enrolled in the Farmers' Short Course.

Young Leslie's work attracted the attention of the manager of a large farm and after conferring with me he employed him to select a large amount of seed corn from a field of 115 acres. For this work he was paid a premium above the wage of ordinary laborers.

Being well pleased with this work the manager has now engaged Leslie on a yearly salary basis to take charge of seed breeding work. About 400 acres of corn will be planted on this farm next year, largely under Leslie's management. "Ear to the row" plots will be planted also.

With practically no education except such as was obtained through membership in the Boy's Corn Club, this boy at the age of 18 has secured a responsible position at a good salary and with excellent opportunities for promotion. He is planning to spend his evenings studying books to secure the education he failed to receive by not living convenient to a school.—Extension Service Farm News.

Christian Church Services

*Elder R. M. Bailey, who is moving here from Brady to take charge of the Christian church will arrive tonight. Elder Bailey will preach at his church at 11:00 Sunday.

Sunday night a union meeting welcoming Elder Bailey will be held at the Baptist church, the members of the other churches participating.

Men Feel Tired, Too.

While much is said about tired women it must be remembered that men also pay the penalty of overwork. When the kidneys are weak, inactive or sluggish, when one feels tired out and miserable, has the "blues," lacks energy and ambition, Foley Kidney Pills are tonic and strengthening. They act quickly.—Fickas Drug Co.

F. E. Adams and wife left Saturday night for Houston to be at the bedside of Mr. Adam's mother who is very ill.

Lost—Gentleman's blue serge coat, Saturday night at the tent show. Finder return to Sam Harle Drug Store.

T. J. Cope and family of Hulver were here shopping Monday.

Important to Club Members.

All club members are urged to send in their reports at once, as they are needed in making up the annual report for this county. Please do not neglect this important matter, as my final report must be in the hands of the State Agent and Director at the A. & M. College by December first.

Yours for success,
Will M. Midkiff, Co. Agt.
Box 666, Memphis.

THE CHEERFUL CHERUB
