## Mrs. E. J. McKnight Given Bridal Shower in Lakeview

Honoring Mrs. E. J. McKnight, who before her recent marriage was Miss Willie Merle Bevers, a shower was given last Tuesday night in the home of Mrs. D. H. Davenport Sr. at Lakeview.

Hostesses were Mesdames Paul McCanne, David Davenport, Lyman Davenport, James Skinner, H. D. Payne, Don Wright, and D. H. Davenport Sr.

The guests were met at the door by Mrs. Davenport and entered the reception rooms which were decorated in patriotic red, white, and blue. American flags and streamers of the same colors accentuated the decorative scheme. The honoree and her mother, Mrs. O. E. Bevers, were seated in chairs decorated in red, white and blue.

Carrying out the theme further, the program consisted of two timely patriotic songs, "He's A-1 in the Army and A-1 in My Heart" and "I've Been Drafted, Now I'm Drafting You" by a girl's quartet. Composing the quartet were Misses Jeanette Payne, Jimmie Jean Smith, Juanita Davis, and Jean Blanks accompanied at the piano by Mrs. Gladys Smith. Jimmie Jean Smith read a bridal selection, "Miracles."

After the program the gifts were presented by Miss Katherine Wright, costumed as a home economics teacher, and Clayton Wells dressed as a football coach, representing the recently-married couple.

Refreshments consisting of cherry tarts, whipped cream and coffee, with tiny flags as favors, were served to the 50 guests who

## Eclipse of the Rising Sun!

● CHALLENGED in two hemispheres, America faces a tremendous test. But the fighters and bombers that will blot out the Rising Sun—the tanks and guns that will help smash the Swastika—are pouring off our production lines.

The biggest industrial job in history is being done because America has the electric power for the job!

The electric industry was ready when the crisis came. The business men who manage the nation's electric companies had built up power reserves in advance—and interconnected company systems so that power could be delivered almost anywhere overnight.

They were ready, too, to meet new demands with new construction. They added enough power in 1941 to light one-fourth of all the homes in the U. S. A.

We're glad that the electric industry has been able to help make Uncle Sam so powerful. We're determined to stick to the job until the blood-red sun has set and a new day follows darkness!

**Power of Judge to Appoint Lawyer Explained by Moss**

There seems to be some misunderstanding regarding when the judge of the District Court is required to and can appoint a lawyer to represent one charged with a felony before such court, District Judge A. S. Moss commented this week as the February session of District Court in Hall County opened.

The only cases in which the judge can appoint a lawyer are as follows: First, where one is charged with a capital felony in which the death penalty can be inflicted and the one so charged is unable to employ an attorney; second, where one is charged with a felony, and desires and has a legal right to ask for a suspended sentence, the court is required to appoint a lawyer to prepare and present such plea for suspended sentence.

So, only in capital cases as above explained and when a request is made for suspended sentence can the judge appoint a lawyer, Judge Moss said. In all other cases tried before a jury the judge has no authority to appoint a lawyer.

However, the district judge explained, in pleas of guilty without a jury and before the court where such plea can be taken by the judge, a lawyer is appointed.

The lawyer when appointed is not paid any fee whatever, it was pointed out. The state in no instance pays such lawyer. His services are without pay. The judge has no more authority to appoint a lawyer, other than above explained, than any other individual.

Anyone can request a lawyer to represent one charged and that would be all the judge can do and in either case could not legally require such representation. And the judge should never make this request when he has no legal right to do so, Judge Moss said.

Mr. and Mrs. H. G. Butler of Clovis, N. M., visited here Monday en route to their home after a trip to Dallas and Abilene.

NEWLIN

By MRS. FRED HEMPHILL

What Time Is It? Now that the clock has been pushed ahead one hour and we do every thing at an hour earlier, where did that other hour go to, we wonder? Everybody seems to get things done at the usual time, we hurry around (as usual) to get our child to school at 10 now instead of 9, eat dinner at 12 (which is 11) to meet the 12:50 train which comes an hour earlier, and still it comes at the usual time by the clock, or does it? School dismisses at 5 o'clock, supper time at 6, and bedtime at 9 (and that is 8) and too early, but if we stay up until 10, the government frowns at the use of too much electricity. So let's just put out the cat and go to bed and not look at the clock, for what does it matter what time it is anyway.

Mothers Club Meets

The Newlin Mothers Club met at the home of Mrs. Sidney Koeninger Thursday, February 5, with Mrs. W. L. Crabtree as co-hostess, for an all-day meeting of sewing and knitting for the Red Cross. Newlin has been assigned 36 garments for a 3 month-period, and it was decided to meet again this month at the home of Mrs. Frank Solomon Thursday afternoon of this week. A covered-dish luncheon was served at noon. At the business meeting the organization was informed that a Defense Bond could not be purchased for less than \$75 unless in the name of an individual. The club voted to donate the money originally raised for a bond to the Red Cross, \$25 was donated. The next meeting will be at the home of Mrs. Will Kesterson in Memphis with Mrs. A. O. Phillips as co-hostess. Those present for the day were Mrs. Frank Ellis, Mrs. George Dickson, Mrs. Will Kesterson, Memphis, Mrs. Felix Jarrell, Mrs. Jim Berryman, Mrs. Sam L. Smith, Mrs. M. P. Moore, Mrs. Frank Solomon, Mrs. W. R. Glover, Mrs. D. W. Lawrence, Mrs. B. L. Gresham, Mrs. G. B. Mullins, Mrs. D. C. Messick, Mrs. J. A. Elliott, Miss Audrey Jarrell, Mrs. Fred Hemphill, Mrs. W. L. Crabtree, and Mrs. Sidney Koeninger.

Cemetery Fence Built

Directors Gus Odum, Frank Solomon, and John Rowell met last Monday at the Newlin Cemetery and built the fence furnished by the highway department. They were assisted by Sonnie Nelson, Dick Shelton, and R. O. Nelson Jr. The fence includes another acre of ground south of the present site that is now available for lots. This plot is to be put in blueprints and marked off immediately. \$11.60 was paid out for posts and A. O. Phillips of Memphis donated 35 posts. Other contributions received are J. R. Nelson, Newlin, \$2; Peter Ballard, Newlin, \$5; M. O. Scott, Los Angeles, \$5; Lon Moore, Memphis, \$2.

Parent-Teacher Association Presents Program

Newlin Parent-Teacher Association met Friday night, February 13, and presented the following program under the direction of Mrs. Sam L. Smith, program chairman: Subject, "Education for Ethical Character"; song, "America," followed by the American creed by entire group; devotional, Mrs. C. A. Powell; business session; tribute to Washington, by Rev. Scott Crawford; tribute to Abraham Lincoln, Rev. J. P. Cole; children's story hour, Mrs. Manuel Burnett; "Character Traits Which Should Be Developed in the Individual," Mrs. Roy L. Guthrie, Memphis; vocal solo, "A Little Child Shall Lead," Mrs. Gordon Gilliam; "History of the P-T. A.," followed by candlelighting ceremony, Mrs. D. W. Lawrence, president of the Newlin P-T. A. social hour.

### Crump Ferrel in Race for Office of Commissioner

**Candidate for Precinct 3 Post Has Lived in County All of Life; Stock Farmer**

Crump Ferrel this week authorized The Democrat to announce his candidacy for the office of Commissioner of Precinct No. 3 of Hall County, subject to the action of the Democratic primaries next summer.

Ferrel, who has lived in Hall County all of his life, is now engaged in stock farming near Parnell. He has had experience in bookkeeping, having worked in that capacity at the Parnell Gin for about five years. In addition, he aided in assessing taxes for a year, when J. E. Hughes was serving as tax assessor. He is a graduate of Esteline High School and later attended Texas Military College at Terrell.

Ferrel is a member of the Baptist Church at Parnell, and is also active in school work, and at present is a member of the Parnell school board of trustees. It is his first time to ask for public office.

In making his announcement, Ferrel made the following statement:

"I am basing my candidacy on three things: Honesty, economy, and fairness. It is my belief that a good county official must possess all three qualities, and if elected, will do my utmost to practice all three rules.

"I take this means of soliciting your support and influence in the coming primaries, and feel that the voters of Precinct No. 3 will not be disappointed in the service I will render if elected.

"I realize that this office is one of the most important in the county, since the Commissioners Court is the governing group. I likewise know that the road work done by the commissioner of our precinct is important to residents, and I will do my best to fill the requirements and wishes of each citizen.

"Your vote and influence will be greatly appreciated."

### Food-for-Victory Drive May Result in More Canneries

Help-yourself-canneries for rural and urban homemakers patterned after the help-yourself-laundries popular in Texas may be one development of the government's all-out Food-for-Victory drive.

This cooperative community service likely will develop because of the shortage of materials for food preservation equipment and because it will be necessary to make maximum use of the equipment now available to homemakers, says Grace I. Neely, Extension Service specialist in food preservation.

Recently surveys have been made in 143 Texas counties revealing that there are 87 commercial canning plants in these counties plus 61 community canning centers which were in operation during 1941. Many of the centers were operated to supplement food supplies for community school projects; some are WPA-operated canning centers originally set up for the federal meat canning program in 1933 and 1934 which now can other surplus foods for families receiving public assistance.

As a result of the earlier meat canning work, Texas counties still have 178 retorts and 456 small pressure cookers, 307 can sealers and other canning equipment, the survey shows. An effort will be made to locate all such equipment, and it ready immediately, and make maximum use of it this year, Miss Neely says.

Approximately half of the home demonstration club women in Texas—24,234 to be exact—have one-owned cookers. In addition to these, others will be needed for cooperative purchase of food preservation equipment are made by the FSA. County home demonstration agents serve as consultants on setting up community food preservation centers.

### Plan in Advance To Conserve Land, Parsons Declares

Through the cropping of 1941, dust storms have become less frequent in the Hall County Soil Conservation District, according to B. F. Parsons of the Soil Conservation Service. Practically all the soil in the district that in the past has been furnishing its quota of dust for the dust storms has a good cover crop of vegetation, and is not nearly so susceptible to blowing as in the past.

"The past year was one in which about 40 inches of rain fell. Since we have temporarily stabilized this soil, we do not want to relax our vigilance and feel as though we can rely on this soil staying put, but proceed on the assumption that years of lesser rainfall will again prevail in the future," Parsons said.

There are some fields in the district that through negligence on the part of the farmer, or possibly the particular soil types are partially to blame for lack of cover crops, that may furnish plenty of dust later on this spring. It was pointed out. Not only is it possible for these barren fields to furnish minor dust storms this spring, but there are some fields that may cause serious damage to crops in nearby fields unless measures are taken to prevent it, Parsons warns.

"Our past experience teaches us that the time to stop fields from blowing is to do our planning in advance, or as soon after as possible, and do not wait until large areas have been damaged. It is suggested that deep and timely tillage with a lister as the best means of preventing the soil from blowing where there is little or no vegetative cover. The best time for deep listing is when the soil is moist, thereby turning up some clods to the surface. It is recommended that tillage operations should be done on the contour if possible. Not only do we check the soil from blowing, but the lister rows catch and hold the moisture and the ground absorbs the moisture where it falls," Parsons says.

"The exceptionally heavy rains the past year have given us a good start towards the control of our dust-producing fields," Parsons states. "We should be ever on the alert, keep a good cover on the soil, because droughts will come again. Years of ample rainfall is merely an armistice staged by nature and has a tendency to lure us into believing that we have

this hazard licked, but old Mother Nature will react as she has in the past, and if we are not eternally on the alert, soil blowing in this district will start all over again.

"Let's not get caught unprepared in this battle against soil erosion as our forces did at 'Pearl Harbor' against the Japs who stabbed us in the back. The only

sure way to guard against erosion of our soil is for every farmer or rancher to take this matter seriously and apply the best known methods for soil and moisture conservation."

### Rubber on the Farm HOW TO CARE FOR FARM MACHINERY

Motorists—and aren't we all?—have been so busy worrying about the tires on their cars that rubber on the farm has not received much attention.

Rubber has played an increasingly important part in food production in recent years. Rubber tires for tractors and farm implements; rubber tubing in milking machines; rubber rings for canning in glass jars—the list is almost endless.

The following suggestions for care of rubber on the farm are offered by M. R. Bentley, agricultural engineer of the Texas A. and M. Extension Service:

Block up the wheels to keep weight off the tires when machines and implements are out of the fields for any considerable period.

If rubber-tired implements are stored on cinder floors, block up

the tires or place planks under them. The sulphur in the cinders breaks down the rubber.

Excessive slippage of tractor tires causes heavy wear, just as skids and quick stops do on automobile tires. Over-loading the tractor is one cause of slippage, and pulling in snow or mud without chains is another.

Keep rubber-tired implements out of the sun when not in use.

Under-inflation damages both rubber and fabric in the tires.

A solution of calcium chloride to prevent freezing is recommended for northern areas of the state if water is used in tractor tires to add weight.

Rubber tubing in milking machines will last longer if it is kept clean. After each cleaning and sterilization, the tubes should be hung up to drain and dry.

## THE SPICES OF LIFE

PERHAPS YOU WOMEN didn't notice the effects of war when the rationing began for your car already had fair tires, perhaps you didn't pay much attention to the fact that your husband would be unable to buy a new car when new car sales were stopped for the old bus was in pretty good condition—but without spices, how will you cook?

Don't be alarmed, for right now there is no shortage in spices, but this abundance may not last so conservation should start now.

American housewives use more pepper and mustard than they do any other spices. This nation, however, has a two years' supply of pepper on hand, and the country's 1941 mustard crop was a good one—supplying more seed than is usually needed in any one year. So there should be enough of these two.

Others, however, may not be so plentiful. Most of them, such as nutmeg, cinnamon, and vanilla, come from Zanibar, from the West Indies, from other parts of the globe. And the ships which have been bringing them will have to make room for war supplies now.

In other words, the government is asking housewives to go easy on the spice cabinet. That spoonful of cinnamon for the cake batter should be measured carefully, so that none will be wasted. If you eat mustard and ketchup, use only enough to flavor the food—don't leave about half of that which you pour out on your plate.

There are plenty of ways to conserve the spices and flavorings. Then, too, there's to be a shortage of tin for the cans. Housewives had better save those sprinkler cans when they are emptied, for a year from now those spices may come in paper bags or some other inconvenient form.

The war is gradually coming home to Americans, although as yet the bombs have not been falling here. Most experts believe the war will be a long one—three, four, maybe ten years. There'll be some changes made in the living habits of everyone, and everyone, including housewives will be better off in the future if conservation is begun now.

## SLOW—AND NOT VERY SURE

TWO WEEKS AGO the campaign to collect no-longer-wanted books for men in the Army, Navy, and Marines was started in Hall County, but one can hardly notice it.

Personally, we figured that at last here was one campaign which could be put over with no trouble at all. This particular drive would cost the citizens no money—in fact, we figured that a lot of people would be glad to get rid of some of their old books without having to throw them away.

Well, apparently we figured wrong. It's true that several books have been turned over to the director, Temple Deaver, but that "several" won't do much to add to the 30-mile stack of books which is being asked for over the nation.

It took a long time for us to get started in donating to the Red Cross roll call, and then still a longer time to start on the war relief fund drive. That took money.

Volunteers were asked to aid in civilian defense, and only a few signed up. That would take time.

Now, however, we have something else, which requires very little time and no money at all. Yet we still aren't getting together.

## Press Paragraphs

CULLED FROM THE DEMOCRAT'S EXCHANGES

### Oil

The Amarillo Times: Only one thing can cause a shortage of oil products for civilian consumption—the loss or transfer of oil tankers. That may make it necessary to ration oil temporarily in some areas. But if that happens, remember that lack of oil is not the cause. This country's oil industry is one of the most important and most certain Allies the United Nations have.

### Difference

From "A Column" in the Prairie (WTSC paper): Then there's a lad who claims that the only difference between a Socialist and a Communist is the price of two beers.

### Hens and Eggs

Roy W. Hahn in the Briscoe County News: If you folks still want to trade me a hen for a year's sub, I'll do it. But please send in a hen that has the habit. So far the ones I have think that eggs are things to buy. I want some hens that make a deposit now and then. I heard one cackle today at noon though, and that is supposed to be a good sign.

### Sugar

The Panhandle Herald: Some people seem to think that sugar rationing means that sugar is the only ration they're gonna get.

### Concentration

Douglas Meador in the Matador Tribune: With his back to the wall a man concentrates his energies because the choice of directions for procedure are reduced.

### Better Economically

The Stephenville Empire-Tribune: The point to be emphasized and what we are trying to get over is that the people of Erath County have a real opportunity ahead of them as far as production is concerned. Literally, everything produced on the farms is bringing high prices—probably lower now than later. Therefore, if a reasonable cotton crop can be produced, along with what we already know is coming in from the diversified program, every economic condition should be better than it has been in years.

### Tires

Douglas Meador in the Matador Tribune: An automobile tire is a cushion of air used extensively by a regal class of individuals to keep them off their feet.

### Flying

E. E. Hayley in the Saint Jo Tribune: Some of today's student flyers believe their greatest risk is taken in the auto ride to the airport.

### The Price

The Ochiltree County Herald: Of course, every victory has its price. Right now, we can begin to see clearly what victory is going to cost the home front. . . . and it's plenty, although it is a small sum to pay for such value as liberty and the right to pursue happiness and work for such a decent sort of world.

### The Cold Shoulder

The Foard County News: The thirty-one degrees below zero weather that Hitler is encountering on the Russian front is stifling to the temperature that will greet him when he presents himself at the peace table.

## Information for—

### NEW INCOME TAX PAYERS

Editor's Note: This is the 5th of a series of articles concerning the present income tax law of the U. S. Other articles will follow week to week.

In the event of failure to make and file an income tax return as required by law within the prescribed time, a certain percent of the amount of the tax is required to be added to the tax unless failure to file the return within the prescribed time is shown to the satisfaction of the Commissioner to be due to reasonable cause and not to willful neglect.

The amount to be added to the tax is 5 per cent if the failure is for more than thirty days, with an additional 5 per cent for each additional thirty days or fraction thereof during which failure to file a return continues, not to exceed 25 per cent in the aggregate.

A taxpayer who files a tardy return and wishes to avoid the addition to the tax for delinquency must make an affirmative showing of all facts, alleged as a reasonable cause for failure to file the return on time, in the form of an affidavit which should be attached to the return. Alleged ignorance of the law does not constitute reasonable cause for delinquency.

## Rural Families Can Get Financial Aid From FSA Agency

Part-time farmers, farm laborers, and every rural family with experience in food raising and land resources can enlist in the Food-for-Victory production program. Robert C. Land, rural rehabilitation supervisor for the Farm Security Administration, said this week.

Financial assistance is immediately available to all eligible families through this agency, according to Land, who urges those wishing complete details to contact him at his office in the Old Hall County National Bank building in Memphis.

"Every acre and every man is needed to produce the food America must have to win this war," Land said. "Rural families with land and farming experience, regardless of whether they are regular farm owners or operators, can start all-out food production now by using the services and loan assistance of the Farm Security Administration."

"Even the family who can't increase production of foods for market can raise a garden and foods for home use," Land continued, "and that means there will be more food for defense workers, armed forces, and export to the other United Nations."

The FSA supervisor said loan assistance from the Farm Security Administration is available for the purchase of gardening equipment, seed, feed, cows, heifers, pigs, and chickens, and to rent workstock

and equipment, repair shelters, fences and and to meet other needs. Land has been assured new Food-for-Freedom has been streamlined with forms which have been ed out to make these loans available. He said loan program for the families not participating FSA program may amount much as \$500 for each extend from one to five 5 per cent interest. Borrowers may get loans where needed to meet revised operating

Old Man Texas has sharpened his pencil. There's a job to be done.

Uncle Sam has a war to win and it will be paid for by you and me.

Our big job is to meet rapidly increasing federal taxes and buy defense bonds. And added to these are the costs of our local and State governments, including bond issues. The money to pay for them must all come out of the same pocket.

To make the bill fit our pocket, we're going to have to cut out some of the things we can do without. Among these are new bond issues, new State and local taxes and nonessential spending in every branch of government.

Old Man Texas is looking to taxing officials all over the State to be on the alert to effect economies.

Every local tax dollar saved for Texas taxpayers is another dollar available for victory.
