Texas Farmers to Learn Allotments For '41 Crops Soon

Allotments to Be Made Before December 7, When Referendum Is to Be Held

Barring unforeseen circumstances, every cotton farmer in Texas will be notified of his 1941 cotton allotment prior to the Southwest marketing quota referendum December 7.

The task of informing counties in the state of their allotments and the subsequent breakdown of the county allotments for the individual farms is well under way, E. N. Holmgren, state AAA administrative officer in charge, has announced.

In general, allotments under the 1941 program are running about the same as under the 1940 program, Holmgren said. In most cases the allotment for each farm in a county is a fixed percentage—uniform for the county or administrative area—of the farm's cropland.

No allotment will be less than 50 per cent of the 1937 planted plus diverted acreage, provided that no allotment is thereby increased to more than 40 per cent of the farm's cropland. No allotment, however, will be larger than the highest cotton acreage planted and diverted in any of the past three years.

Purpose of the referendum December 7 is to determine if marketing quotas for cotton will be in effect in 1941. To become effective, quotas must be approved by two-thirds of the cotton producers voting in the referendum.

Directors for the coming year are G. H. Hattenbach, J. C. Wells, C. R. Webster, F. W. Foxhall, H. W. Stringer, Lee Elliott, A. S. Moss, J. O. Fitzjarrald, J. W. Fitzjarrald, O. B. Jones, S. B. Palmeyer, and E. E. Roberts.

No Extras in Charges When Serving The Womack Funeral Homes

Have you ever built a house, or rather had a house built for you? Did you find out that after you were sure that you had provided for everything, that you could not live in it because there were many extras that had to be provided and paid for before it was completed? Little items such as porch steps, not provided on the original estimates? There are no extras to be provided for when you possess a Womack Burial Policy. Every detail of merchandise and service is provided for before you enter into any obligation. Their funerals are complete and there are no additional charges after your original decisions are made with a Womack Burial Policy. Symbols of Thanksgiving...

SHOCKS of grain in the field... Turkey... Fruit... symbols of Thanksgiving handed down by our ancestors. Today, though, we are thankful for much more bountiful harvest... for the American way of living that has grown from private initiative and enterprise... Freedom which has been inherited from our ancestors through reverence for the Constitution.

● And we can be thankful for the modern comforts of every-day home life provided by Electric Light and Power, which has been made both plentiful and cheap by our contribution to Thanksgiving, this plus a million dollars annually in taxes.

Bright Hollywood Stars Trek Back to the Farm

Carole Lombard and Clark Gable tend some of the young chickens they keep on their \$40,000 ranch.

HOLLYWOOD.—Theme of an old song is "How you gonna keep 'em down on the farm?"

Pertinent query in the film capital these days is just the reverse: how can you keep Hollywood's bright stars off the farm long enough to make pictures?

For many of Hollywood's biggest names, whose only knowledge of rural life is what they've picked up in western melodramas, have gone back to the land.

Among the film stars who have turned to farming as a hobby are some of the brightest names in pictures—Clark Gable and Carole Lombard, Robert Taylor and Barbara Stanwyck, Bette Davis, Robert Young, Spencer Tracy, Mickey Rooney, Paul Muni, Joel McCrea, and hosts more.

JUST how serious they are about this back to the land business can be guessed from the prices they pay for that land—as much as \$3000 an acre, and even at that price most of it isn't good farm land.

Gable and Miss Lombard occupy a \$40,000 ranch, well-stocked with citrus and nut trees. The handsome Clark hopes his walnut crop will do something toward wiping out the deficit he incurred with citrus fruits. That

The Voice of The People

(Editor's note—this space is open to all readers of The Democrat for the purpose of expressing their opinions on any and all subjects. All signed letters will be printed here upon request, so long as they carry clean, unobscured, material. The following should be considered the opinion of the writer, in no manner reflecting on the editorial policies of the news paper.)

Dear Sir: Each year I am accustomed to saying what I am writing you at this time. For 22 years ago, on Armistice Day, I was the night man at the Memphis light and ice plant, and it was my pleasure to be your reporter of the greatest news which any mortal ever reported—that the war was ended.

At 3 o'clock that morning, the telephone girl called me, and told me the war had ended. She added that I should not say anything about it until she had time to get things ready and be gone from the office.

It never occurred to me that when I began to sound the siren everyone would get up and turn on their lights. I had on the light engine and the dynamo, but it began to get dark when ever one tried to make use of their electricity at once. I realized then what I had done, but I kept on sounding the siren until it was really dark. Anyone remembering the occasion will testify to that.

The fire boys came running down and asked me the location of the fire. I did not tell the captain where the fire was—I told him that it had been in Germany and that it had stopped. They left and said not to let this sounding the siren happen again. The captain was the sheriff who was elected in 1918, although I do not remember his name.

That is about all of importance which happened at Armistice in Memphis. I left there early in the spring. For 21 years, people in Hall County have been using my products (Mr. Stone is in the oil burner and heater business), so this gets off my chest what I wanted to say to the people of Memphis. With best regards, yours very truly,

R. M. STONE Amarillo, Texas.

Mrs. J. C. Melton-Jones, nearly 84, renewed her subscription Monday with the remark, "I am nearly 84 years old, but still likes to read—especially the home paper."

resemble a large Christmas tree, the merchants decided. Various plans in observance of Christmas were discussed, but none of the proposals seemed to "fill the bill" as well as did the decoration idea. Work on the decorations will start in the near future, and plans now are to have the lights all up by December 1, Carroll Smyers, secretary of the chamber of commerce, said.

past week was 16 degrees, registered last Thursday night. Friday night found the temperature to be slightly higher, with the mercury standing at 24 degrees. Sunday night's low was 37, Monday night's 42, and Tuesday night the thermometer dropped back to 36 degrees. Rains were reported as falling Tuesday over most of the Panhandle. In addition, freezing weather was approaching, with some of the highways into New Mexico having traffic almost blocked due to the freezing of mist on windshields. W. S. Rees of Turkey was a business visitor here Monday.

and subscribers by the score are taking advantage of the opportunity to save one-third of the price. The offer will not be continued long and for that reason the people of this area are urged to take advantage of the offer now. It will insure getting the bargain and at the same time aid the management in getting the campaign over with without dragging it out week after week. Those of you who are paying for your papers should tell your neighbors (who are not taking the paper but borrowing yours) about the offer of less than two cents (the old price of postage for carrying a letter) per copy. You will confer a favor on the neighbors and at the same time be able to keep your own papers for reference. Visitors in Memphis think we are the most careless drivers in the world. They are free to express it that way. After observing the way home people disregard parking and driving lines and ordinary courtesy rules that prevail elsewhere, these visitors wonder now it is that more serious accidents do not occur. Wednesday morning while it was raining and vision was more or less obscured a woman cut to the left to the post office curb in the face of oncoming traffic and against all rules of driving conduct. Then when she had obstructed traffic for several minutes she backed out and again drove in the face of traffic—all this, mind you, while her windshield was covered with water which obstructed vision. If she had been hit by a driver who was driving on his side of the street, it would have been her fault; but probably would have claimed the other at fault. This is only one violation of hundreds taking place. Others frequently overrun stop signs, endangering their own and others' lives. Double parking and triple parking during busy days obstruct highway travel, and making U-turns at corners plainly marked differently also create hazards. Traffic laws are made for the purpose of enabling people to drive with the least possible personal danger. If the laws are obeyed, no one will be sorry. If violated, someone may suffer injury and possible death. Traffic officers could catch such offenders and cause them to pay fines, but prefer that the people themselves adopt safe and sane driving methods. The paper is being published a day early in order that The Democrat employees may have Thanksgiving Day off. Since America is about the only strong nation in the world not directly in conflict, Americans should consider it something to be thankful for, and on benedict knees, as did the Pilgrims of old, thank God for the many blessings coming our way.

composed of three parts, will bring about \$275,000 to Hail County farmers and land-owners. One of the portions of the payments is for cotton conservation, and one for fulfilling soil-building units. The amount for cotton conservation payments will be approximately \$192,000, the feed conservation about \$49,000, and the soil-building units portion about \$34,000. The estimates, however, do not take into consideration the probability that the entire amount allowed for soil-building and feed conservation may not be earned by the farmers. Half of the funds collected in the county will be sent to the national organization to be used in cases of emergency either in the United States or in other nations. The remaining half will be kept by the local chapter to be used during the coming year for local aid. None of the money collected is used in maintaining the organization, since an endowment made several years ago cares for the upkeep of the Red Cross. No money collected is used for salaries of any paid employees, it was pointed out.

The volunteers do not go immediately into service, however. Time of volunteering has nothing to do with the order in which the volunteers are selected. The volunteer with the lowest order, if he is accepted, is the first to go into service, and other volunteers follow as their order numbers come up. Zeb A. "SCHOOL SPIRIT"

If anyone should ask why we are proud of our school I believe I would answer it "School Spirit." What is "School Spirit?" A number of things could come under this heading but one of the most important is the treatment of school property. School spirit is evidenced in a school by the care of its property. How could anyone stand up and say they were proud of a school that had lost its dignity and beauty through the hands of careless students? Part of school spirit is proper behavior, and proper behavior is the cornerstone of a school. For it is the way we conduct ourselves in school that determines the way we will act in life. Students behave away from school as well as in school, and when they are away they should be very careful their actions do not reflect upon their school.

Aggie Teacher Is A. and M. Graduate

E. A. Peck, vocational agriculture instructor in the Lakeview High School, came here from Samnorwood, where he was also instructor of vocational agriculture. He attended college at Texas A. & M., graduating in 1929 with a B. S. degree in agriculture, and in 1930 with a M. S. degree in agriculture. He was commissioned second lieutenant in the infantry reserve in 1929, and first lieutenant in the infantry reserve in 1932. Before his coming here he was called "Frosty," "Puglist," "Euclid," and "Battling Peck." His hobby is working in wood and metal, and he dislikes being idle. You can soon discover this by watching him toddle around the high school with his white apron and cap, teaching the boys woodcraft. He is well-liked by most boys, especially the boys in his classes, which are sometimes termed as "Peck's Bad Boys."

Wife Was Fat No Longer Attractive LOST HUSBAND'S LOVE

The above headlines appeared in a New York newspaper in connection with a divorce trial that had attracted wide attention: "She was a beautiful woman," one witness testified, "but she got fat and is not attractive any more." Thousands of women are getting fat and losing their appeal just because they do not know what to do. If you are fat, how would you like to lose it and at the same time gain in physical charm and attractiveness—more energy—greater activity? Why not do what thousands of women have done to get rid of pounds of unwanted fat? Take 1/2 teaspoonful of Kruschen Salts in a glass of hot water every morning before breakfast and keep it up for thirty days. Cut out pastries and fatty meats and go light on potatoes, butter, cream and sugar. Then weigh yourself and see how many pounds you have lost. A bottle of Kruschen Salts will last you for 4 weeks and costs but little. Ask any druggist for a bottle of Kruschen, plain or new effervescent—sparkling—pleasant—and start today to lose fat. Satisfaction guaranteed or money back. MEACHAM'S PHARMACY

No Word Received Concerning Feeder Road as Highway

Delay of Designation May Be Due to Early Allotment Of Funds to Other Roads

No word concerning the designation of the feeder road east of Memphis as a state highway has been received, County Judge M. O. Goodpasture said this week.

A delegation from Hall and Childress Counties were in Austin several weeks ago to appear before the State Highway Commissioner and seek state designation of the road, but no answer has been made by the commission as yet.

It is probable, it was explained, that the road may not be designated for several months, since most of the funds to be expended for new roads by the highway department have already been allotted.

The commission favors the designation of the road, it was pointed out several weeks ago, since it is a portion of the federal government's farm-to-market system of roads throughout the nation.

The feeder road, now under the maintenance of Hall County, extends east of Memphis to the Wellington-Childress highway.

In addition to affording better means of travel between Memphis and Wellington, and between Memphis and Hollis, Okla., the road also offers a better route by which farmers may bring their products to market.
