YOUR BOYS AND GIRLS IN SCHOOL

The mothers and fathers of demphis and the surrounding teritory are sending real American oys and girls to us, and we are as proud of them as you are. Your boys and girls are not pudged by the clothes they wear, or how much money they have, but by their winning personalities which canot be hidden by fine clothes and fine manners. Back of your clear-eyed boys and girls are your homes built and founded on good citizenship and loyalty to homes, school, and community. This loyalty is reflected in the response the students give in supporting school activities, and our teachers are grateful to you for your good influence.

From the time your children start to school they eagerly assume duties and responsibilities to help them cultivate their initiative and their ability as leaders. Your children take as much responsi bility as they can without their school activities becoming burdensome and confusing. As your boys and girls grow older, they want and take on more work and responsibility; therefore when they graduate from high school, they readily find their places in the world in business or in colleges. We have outstanding leaders from Memphis public schools in practically every college and univer-sity in Texas; this speaks well for you as parents because you sent your boys and girls to col (Continued on page 4)

#### MODERN NESTERS

IT HAS NOT BEEN a very long time since nesters were common . . . those people who decided to settle on a piece of land whether it belonged to them or not. Now nesters are coming into their own again.

The modern nesters, however, are not settling on a large section of land, and claiming it for their own ... they are content with just a small portion of a highway to settle on.

It's happening every day . . . and probably more so on last week due to the heavy traffic of holiday visitors. It is not just one of those things which you hear of in some distant place . . . it is so common to be a nester.

The point is that it happened near Memphis and luckily no one was seriously hurt when the nester's car was struck by another. In this particular case, however, the nester cannot be blamed too much . a broken axle on his car made it almost impossible to move.

But the fact that there was an accident brings to mind the many cases similar to this when the car resting on the highway could have been moved off . NOTICE OF SHERIFF'S SALE thereon. .. and maybe an accident might not have happened. THE STATE OF TEXAS,

Let's not revert back to the horse and buggy days . . . the days of the nesters. In other words, let's not be "modern nesters."

#### 0000000 SYMPATHY

DRESIDENT ROOSEVELT has sent a note of in- all cost of suit as of record is resentatives, in and to said propdignation to Russia for attacking the small coun-try of Finland. He has sent similar notes to both Italy Send in a certain Cause in said Court No. 1290 and styled Drs. Dated at Memphis this the 4th W. C. ANDERSON, Sheriff, 25-3c of Hall County, Tex. and Germany . . . and nothing has come of them.

Notes of indignation are merely a means by Afee and Andy McAfee, placed normal placed normal state of the president can express his attitude toward Anderson as Sheriff of Hall THE STATE OF TEXAS. which the president can express his attitude toward a country. They mean little more. They do not mean that the United States is ready to jump in and aid some country which is being attacked. Let's hope they never mean this . . . our country would continually be getting in hot water if they did. But nevertheless, Finland is being attacked similar to the way in which Poland was attacked. And for Finland to be attacked is like our last friend in another town to be hurt . . . or killed. After all, Finland is the only nation to keep up said month, between the hours of payments on the World War debts, and the country is to be admired. There is only one drawback to admiring the brave little country. Public opinion is quickly aroused to a boiling and interest of the said Lee Mepoint. The attack on Finland can arouse the United States to such a boiling point. We should be careful. We can hardly afford to let the losses of one friend involve us too deeply in something we should 25-3e not be getting mixed up in. Sympathy is a good thing all right, but it can be overdone.

THE OFFICIAL OPENING of the Christmas season in Memphis will be marked Friday by the Santa Claus parade. Only 13 shopping days will be left.

Throwing away such a tradition is unlikely, how- heirs and legal representatives. ever. A tradition such as this would be much harder to discard than the changing of a Thanksgiving date. Most people like to give . . . and also to receive . . . gifts.

The Christmas shoppers usually give the merchants a chance to sell enough merchandise to carry them through the dull spring and summer months. The Panhandle, and that includes every town and community in it, must provide enough business for the majority of the merchants three months of the year to allow them to carry on for the other nine.

Naturally, in drouth-stricken times such as County, Texas, to-wit: these, the shoppers will be looking for less-expensive gifts. The merchants know this, and have stocked their houses according to the way they think the customers want them stocked.

Only 13 more days left for the merchants to un- Barton, on the 10th day of June, load this stock. Maybe we should follow that old saying and buy early "to avoid the rush." There will be improvements thereon, rents, reve a rush. There always is.

### **Hooser Says Cost Of Office Lower**

Administrative costs of the local county agent's office as stated in last week's Democrat were incorrect, County Agent W. B. Hooser said this week.

The cost during 1939 of 3.1 per cent of the total amount of business handled by the office was 2.3 instead of 3.1.

that for last year, which was 2.4. In 1937, however, the cost was Birth Announcement still lower, only 1.3 per cent.

Dr. Homer P. Rainey, President of the University of Texas, has analyzed Texas' future possibilities in repeated public address. These statements express his thought:

"The next stage in the progress of Texas lies in the development of our great industrial and commercial possibilities."

"A program of industrial development centers around the manufacture of raw materials into finished products."

"American industry is moving closer to its raw material sources. We in Texas can capitalize on this movement if the opportunity is grasped."

"Our great highway development, coupled with industrial progress, will greatly aid the Texas farmer in his marketing problem."

"Our need for increased employment requires the seenest intelligence in solving the problem. Our boys and sirls must be trained in highly efficient schools to meet the growing needs of farm and business."

"Our Universities are dedicated to a program of scientific training and research which will create employment and build industry to use our raw materials at home.

Repeated failures did not stop our hardy pioneers in the building of our present empire. The same spirit must prevail for a succes

The Texas oil industry recognizes the soundness of these broad principles. They underlie present employment and provide for expanded future employment for our Texas people. The vital part oil plays today in putting these principles into actual practice will be portrayed in a series of advertisements to follow in this publication.
