To Start Plans

He stated that Memphis may have any date it chooses at the fair, and that the band would be given a police escort for parades, a radio broadcasting hour suited to the convenience of the band, passes to the races and would be shown every courtesy possible for the association to extend.

Local officials planned to start reparations for a large figuration representation on Memphis Day. Three prizes of \$100, \$75 and \$50 will be presented to the bands bringing the three largest delegations to the fair, and it apparently was the intention of local officials to "go after" one of those prizes. Visitors to the fair from Hall County on Me Day must register at a special booth in the Merchants Building in order to be counted in the band-delegation contest,

Proving that they actually were on strike and were not, as the administration described their action, merely "returning to their homes," these former WPA workers marched in a protest demonstration outside the Philadelphia navy yard. The majority of the employes at work on a WPA project at the yard were reported to have remained on the job, however.

ONE of the things America needs today is about 200,000,000 people who! will say quietly to themselves each day, "This African war, now. It's none of our business, and we'll have no part of it!"

Silly, you say? Perhaps. But think back, if you can, to 1914, when war broke out between Austria and Serbia over the few had ever heard of. That was none of our business either. But within a few years we'd let ourselves slide over the precipice.
