DETROLEUM JELLY! Perfumed for the dressing table. Carbolated for the medicine cabinet. A friend in your homebut what an enemy in your motor oil! For petroleum jellyunless removed by special treatment-gives motor oil when cold a deceptive body that turns water-thin in engine heat.

The full body in Sinclair Opaline Motor Oil is genuine because Opaline contains no petroleum jelly, no wax. In process of manufacture, Opaline is chilled as low as 60° F. below zero,

at a point much lower than is required for just theremoval of wax.

Opaline's uniformity of body under heat and cold enables us to apply it to your car the year round according to the Sinclair Law of Lubrication.

Sinclair Opaline is refined in several grades-one of which is designed to fit your engine in its present state of wear. We have a Sinclair Law of Lubrication Index which tells you the grade of Opaline you require.
