Club of Turkey and came as a complete though happy surprise. Of green and red Indian head, beautifully trimmed with dainty hand work and nursery buttons. One little dress had a 'kerchief' stuck in the pocket. Thank you Turkey, you are the delight of our hearts and the lovely thing the 1929 Club has done should inspire other clubs in the county.

Those present were: Mesdames Virgie Nivens, Willie Mac Wolf, Lee Blanks, Paul McCane, Tom Luttrell, Troy Payne, Robert Milton, Dewey Martin, James Skinner, Frank Story, Jess Stanley, Tracy Davis, Dell Wells, John Moor, Carl Smith, J. W. Watson, Don Wright, R. C. Ellis, Jess Mann, Arch Mitchell, B. M. Durrett, B. F. Davis, Marion Wiley, Ben Dial, Ott Bevers, Henry Moore, Milford Potts, and Miss Mozell Wolf. Those who could not be present but made donations to the quilts and afghans were: Mesdames J. B. Duren, Lemons, Bascom Davenport, Herbert Payne, Pete Thompson, Carter Dunn, Joe Durham, Birdie Jones, and Miss Lucy Gosden, and David Davenport.

From the Turkey branch this week came a big box of finished war relief garments and 18 of the sweetest little dresses, sizes 3 and 4, you ever saw. They were made and donated by the 1929 Study

Did you read about the American Red Cross garments arriving in Russia and the expression of thanks sent from that country to President Roosevelt?

Miss Rheta Jean Sullivan gave a most interesting and commonsense discussion on conservation in the home to the Civilian Defense Auxiliary Tuesday afternoon. Mrs. Sam Brown told of the needs of a community canning kitchen and the chair appointed a committee to investigate the possibilities of establishing the same. The next meeting will be the last Tuesday in April.

**AS IF BY  
Magic**

**Old Homes  
ARE TURNED INTO  
Beautiful..Convenient..Modern Homes**

Through the magic of modernization, old homes are changed into beautiful, comfortable, work-saving modern homes. New conveniences are added, and wasted space is utilized to provide maximum enjoyment of the home.

Your home, too, can be converted into a cheerful, well arranged, more comfortable home through modernization. Both interior and exterior can be made to rival the newest and most modern home in your neighborhood.

**IT'S A WISE INVESTMENT**

Aside from the added convenience, work-saving features, and increased comfort which is imparted to your home, modernization is a wise investment. Reliable statistics show that approximately \$3.00 added value comes from every \$1.00 spent on modernizing a home. In some phases of modernization, insulation and weatherstripping for instance, the cost is offset in a few years by the savings they bring about. Upkeep cost is also cut to the minimum. In the case of rent property, increased income is usually an immediate result.

Farmers Augment Supplies of Sugar With Crop Harvested in Maple Groves

BY DAVID A. STEIN
'SAPS' runnin'."
It's a glorious, romantic season of the year, when the drip of maple sap in brightly polished buckets heralds the end of winter and marks the coming of spring.

America's sugar supply will be supplemented by a harvest of precious maple sugar this spring. First step is drilling a hole (top left) to drain sap into buckets. Crystal clear sap is gathered by farmers (top right) and is taken to evaporators, in modern sap houses (bottom). Hot fires glow day and night in sugar camps as maple sap is transformed into golden syrup and cakes of sugar.

Headlines are highlighting a sugar shortage, and farmers in 26 states and in southern Canada are preparing for a banner crop of maple sugar. Holes have been bored in the south side of maple trees, and buckets have been hung on small spouts through which trickle drops of maple sap. It will be a good maple sugar season, if the nights are freezing and the days are warm and snow melting. Teams or tractors haul huge drums of maple sap to the sap-houses. There, a roaring fire is going, day and night, under big evaporators mounted on brick arches. The sap is evaporated rapidly. Today the quality of maple syrups and sugars are determined with scientific accuracy, and is graded by government standards. Syrup is put up in pint glass jars, quart, two-quart and gallon tins. The sugar is made into molds or put up in large pails. Vermont heads the list of maple sugar producing states. New York, Ohio, Michigan, Pennsylvania and New Hampshire follow in the order named. Maple sugar is exclusively a product of the United States, with the exception of southern Canada. THE average farmer hangs about 700 buckets, and 90 per cent of the nation's maple sugar is produced by family-size farms. Pennsylvania's trees are sweetest, averaging 2.6 pounds of sugar per tree. Vermont maples produce 1.99 pounds per tree. One-third of the annual yield is puffed in cigars or pipe tobacco. In colonial days, maple sugar was the only sweetening the pioneers had. They learned the trick of sugaring-off from the Indians. For each gallon of syrup, the farmer must process 45 gallons of sap. In many states, maple sugar time takes on the air of a folk festival. When the sap is run-

they are to carry on the war. The expression of sentiment against strikes and extra pay has already shown results. Leaders of both labor organizations have agreed to work a full week without extra pay for overtime. They could see the handwriting on the wall, for when John Q. Public makes up his mind, something is likely to happen. Congress still has a big job facing it. Excessive profits by defense plants must be stopped. When this is done and union labor gets down to 48-hour-week work and cuts out strikes, Congress can then feel it has done its duty.

A citizen expresses the hope that Memphis will soon stage a patriotic rally and honor Hall County families who have loved ones in the armed forces. It's a mighty fine suggestion, and the American Legion is the organization that should start the movement and put it over. About April 12 would be the proper time and City Park the place. All churches could unite in a special service before noon, and during the afternoon speeches, songs, and other forms of entertainment could be enjoyed.

A lot of people have started planting flower and garden seed, since the weather has turned springlike. How about making it a general cleanup time too?

Revival Meeting In Progress at Estelline Church

Evangelist Reynolds Who Is In Charge Former Minister Of Church of Christ Here

Memphis people are extended a cordial invitation to attend a revival meeting which is in progress this week at the Church of Christ in Estelline and will continue through Thursday, April 2. Evangelist O. M. Reynolds, Amarillo preacher and singer, is conducting services twice daily, at 10:30 a. m. and 8:30 p. m. A highlight of the meeting will be an all-day service Sunday, with a basket lunch on the ground at noon. The morning sermon subject will be: "The Jerusalem Church." From 2:30 to 4:30 p. m. there will be singing and short talks on "The Strength and Weakness of the Church," by John G. Reese of Childress, Jas. W. Reynolds of Wellington, Evangelist Reynolds, and a representative of Abilene Christian College. Evangelist Reynolds will be remembered by Memphis old-timers. He helped to build the first Church of Christ here and was minister from 1915 to 1917. —Remember Pearl Harbor—

have signed applications for the insurance. Every person who has or expects to have an interest in a 1942 cotton crop is eligible for this insurance, it is explained, provided applications are signed before the closing date, or planting time, whichever date is earlier. Either 50 or 75 per cent of the average yield may be insured against losses caused by unavoidable hazards, such as boll weevils or other insects, frost, wind, rain, hail, drought, and plant diseases. Farmers who take insurance may pay cash, or sign a commodity note, which is part of the application, and provides payment will be made in the fall, either in cash or cotton of the same staple length insured. Premiums may also be deducted from indemnity payments, if losses are paid, cotton loans, if available, or 1942 AAA payments. —Remember Pearl Harbor—

### HERE'S HOW CERESAN BOOSTS COTTON PROFIT!

Working on cottonseed are many crop enemies—disease organisms that impair stands, reduce yields and quality, cut cotton income! But easy, economical seed treatment with CERESAN kills many of these organisms! Temple, Texas, reports tests in which germination was doubled... CERESAN treatment generally reduces seed rotting, soreness and certain other seed-borne diseases; commonly gives stronger, more uniform stands at a saving in seed; usually increases yields, often as much as 10 to 25%. Inexpensive; easy to use. Get it now and treat your own seed, or buy seed marked with the Ceresan Certificate tag.

## Ration Plan for All Electrical Appliances Seen

Due to the conversion to manufacture of war materials of factories which formerly turned out electrical appliances, the West Texas Utilities foresees a time when rationing will be applied to all such appliances, in addition to refrigerators. Hence, a day when floor sweepers, irons, and similar items will be as hard to get as a new tire.  
So the company is advising that you "be good to your electrical appliances and they'll be good to you."  
Refrigerators, it was pointed out, are vital to the conservation and protection of food and, therefore, steps should be taken to keep them in good repair and to prevent unnecessary deterioration. Most all appliances are important in maintaining civilian morale, performing many household tasks and allowing more time for war efforts.  
Special care is urged for all appliance parts and cords for lamps in which rubber and copper is used.

## Army Extends Ages For Enlistments

Volunteers between the ages of 18 and 45 years are now being accepted by the United States Army, according to a War Department radiogram forwarded by Sgt. Robert D. Short, in charge of the recruiting station at Pampa. The radiogram follows:  
"Effective immediately original enlistments in the Army of the United States of male citizens between their 18th and 45th birthdays are authorized if otherwise qualified."

## Says High Standard United Gas Service Will Be Maintained

The United Gas Corporation will have plenty of gas for both war production and domestic use, declares Robert Breedlove, local manager.  
"United Gas service is already doing its bit in the war effort by helping to make destroyers, ships for the merchant marine, gun barrels and other material," he states. "Dependable service is also being maintained for customers in their homes and business establishments as in the past. However, winning the war comes first and, consequently, the needs of war industries."  
"There will be no slowing down of defense work for want of gas," says Mr. Breedlove. "Night and day trained employees are on the job, asking only to go on serving their customers and their country. They will keep the service going to home and industry alike."

## Young Women May Receive Training In Defense Work

A resident school for girls is now under construction at Waco, according to information received by Marvin W. Dabbs, area counselor for the National Youth Administration, from J. C. Kellam, state administrator. This school will be placed in operation about April 5, it is said, and will offer training courses in radio, sheet-metal work machine shop practice and power sewing.  
Work experience and training in all units will qualify assigned youths for later transfer to a resident school at Corpus Christi for further training preparatory to job placement with Civil Service stations at the U. S. Naval Air Station there.  
Mr. Dabbs states that tentative selections must start immediately. Applicants must be high school graduates, between the ages of 19 and 24 years, and must be able to secure a birth certificate. If applicant is under 21, she must secure a minority release.  
All young women desiring to be interviewed for this defense school should write immediately to the National Youth Administration, Box 1466, Lubbock, Texas, or contact one of the local advisory board members, who are C. C. Hodges, Otis Jones and D. L. C. Kinnard.

## Jobs Open CIVIL SERVICE

With the national defense program of the United States opening up large numbers of jobs of varied types almost daily, the Civil Service Commission is asking for applications. Glynn Thompson, local secretary of the board of examiners, has announced.  
Here's a listing of a few of the jobs for which applications are now being taken (further information may be obtained from Thompson at the Memphis post office):  
The United States Civil Service Commission announces open competitive examination for the positions of Junior Stenographer at \$1,440 a year and Junior Typist at \$1,260 a year. The register resulting from this examination will be used in filling vacancies in these positions in various federal government agencies in the states of Louisiana and Texas.  
The age limits for this examination are 18 to 55. The maximum age limit does not apply to persons granted military preference because of military or naval service.  
Competitors will be notified when and where to report for the written examination.

## MEASURES THEIR REAL Quality

Next time buy several changes of Dickie's matched shirts and pants. See if you don't feel more comfortable, if the fit isn't better, more serviceable. Then watch how they stand up week in and week out; how they won't shrink over 1 per cent; how the buttons stay on. After months of wear, ask yourself if Dickie's isn't the best label for you. Hundreds of thousands have enjoyed lasting satisfaction.

### IT TAKES CO-OPERATION...

Fifty years ago nobody thought of trying to stimulate the industrial growth of a whole region. The American pioneer spirit took care of everything.  
Today, with our country largely settled, it is not enough to leave our industrial future to nature. Realizing this, our Company is telling the nation about the splendid opportunities for war and peacetime production that are available here in the Gulf South.  
The program is designed to co-operate with all other groups interested in building a greater Gulf South—to work with you, and your local organizations—and to help build your community and the rest of the Gulf South area.  
But the job is big—it takes co-operative pulling power—the co-operation of everyone working shoulder to shoulder in the interest of the whole country's defense and its peacetime progress after war. All of us in the Gulf South know that only through close co-operation and unified action can victory be assured. We deeply appreciate our responsibilities in this great crisis.
