ENGINEERS TOLD ABOUT POWER DEVICE

Circuit Breakers Are To Be a Benefit To Switching

NEW YORK, Feb. 1. (UP)—What may prove to be a revolutionary development in the control and distribution of electrical power throughout the great interconnected systems of the country occupied first place in the discussions today at the session of the Winter convention of the American Institute of Electrical Engineers.

Engineers from the laboratories of the Westinghouse Electric and Manufacturing Co. described the apparatus, a circuit breaker designed to facilitate the switching of enormous quantities of electric current in normal service, or to clear faulty circuits instantaneously, with a minimum of the hazards present in the equipment now being used for these purposes.

Paramount Interest
B. G. Jamieson, electrical engineer of the Commonwealth Edison Company of Chicago, who has been supervising tests of the new breaker, disclosed that it embraces features of paramount interest to the power industry. Of 82 operations, conducted by the Commonwealth Co. it was used with 2 test circuit-breakers in clearing the circuit.

As compared with the heavy-duty oil circuit-breakers now in use, this performance is significant, Jamieson inferred. In neither of the two failures was there any damage done to the test house or equipment, nor was there any resultant fire as frequently occurs under current practice. Spectators were able to observe the results at a distance of one hundred yards, and moving pictures were taken of the operations.

Outlines Theory
Dr. Joseph Slepian, of the Westinghouse research department, outlined the theory of the new oil-less circuit breaker, which has been named the Deion breaker after its basic principle of deionization. In approaching the problem of its development, begun five years ago, it was necessary.

Warning is Issued In Buying Pecans

FORT WORTH, Feb. 1. (UP)—A. H. Wheeler, advertising manager of the West Texas Chamber of Commerce Magazine has sent out a warning to West Texas farmers contemplating the planting of pecan trees, to be constantly on their guard against any trees which were not developed for comparatively dry climates, as trees which have been bred to high rainfall conditions will not develop properly in West Texas. The West Texas organization is conducting an extensive pecan planting campaign at this time.

"The very fact that so many of our Texas farmers have been lured by attractive advertising to purchase trees from Eastern nurseries and have found that on setting out these trees they die, or if they live never produce as they should, has disgusted many with the whole pecan industry," Wheeler said. He pointed out that the finest varieties of pecans bred to heavy rainfall will be unsuccessful if subjected to less rainfall.

Reduced Prices
An offer of reduced prices has been made to farmers if they order their pecan trees through the West Texas Chamber of Commerce, which has undertaken the job of distributing over a thousand trees, in an effort to stimulate the interest of farmers in this crop.

B. M. Whiteker, agricultural manager of the chamber, has announced the receipt of thirteen orders from twelve different towns since the offer of reduced prices was made. Halbert and Burkett varieties seem to be the most popular among the farmers. Three ages of trees, the two year old, those between three and four years old, and those between four and five years old, were offered, the preference is for the older trees, Mr. Whiteker said.

Co-Ed Bride

Because of an order forbidding students to marry, Washington and Jefferson University officials recently asked Russell McMahon Smith to withdraw from the school. Smith was a star athlete and married Miss Marjorie Jacquain, Kansas University co-ed, above, before the ruling barring undergraduate marriages was announced.

Appealing Case Is Brought to Light In Death of Child

Carl Leslie McDuffie, four year old son of Mr. and Mrs. W. H. McDuffie, passed away Wednesday night at 11 o'clock after an illness lasting since last Saturday. On that day, the little fellow was taken ill and his sickness was diagnosed as diphtheria. He grew steadily worse and although he was given good medical attention, the child passed away.

In the mere fact that a little fellow has gone to meet his Creator is not always as long a story as this is going to be, but circumstances alter cases, and they certainly altered this one.

Work Fallen Off
It is like this: Mr. and Mrs. McDuffie came to Memphis, bringing their family of five children with them, for the purpose of picking cotton. During the peak of the season, they found plenty of work to do, but since practically all of the cotton has been gotten out of the fields, this work has fallen off very materially, and it has been a rather hard matter for the family larder to be filled always and for the little tots to have clothes enough to keep them warm.

Mr. McDuffie stated that he was a barber by trade but the section of country where he had formerly been in business was "shot to pieces" and he had to turn to other pursuits. The head of the family is willing to work and is anxious to do so. He has seen better days.

Shortly before the funeral services for little Carl Leslie were held yesterday afternoon, Rev. E. T. Miller, who conducted the funeral, came by The Democrat office and took a representative of this newspaper to the home of the McDuffies. And this is what the visitor found:

Living In Dugout
The McDuffies are living in a dugout a few blocks across the railroad tracks on East Main street. The dugout has only one room and it is not very large. In one corner was a bed, in another a stove, in still another was a table, and in the fourth and last corner was a little white casket with a wreath of red flowers over it. A pale, drawn face showed through the glass top—a child showing the effects of the disease that had taken his life.

Gathered around the stove stood a minister, the mother and father, the dead child's four little sisters and a few kindly folk who had come to pay their respects to the

C. LAND DESIRES 31 MEN NAMED ON STATE HIGHWAY COMMISSION

AUSTIN, Feb. 1. (Special)—There have been various proposals to "multiply the possibility of politics" in the state highway department, as some characterize the idea, by increasing the number of highway commissioners from the present three, to five, six or nine. But so far as this department has heard, it never before has urged that there be 31 commissioners.

That, apparently, is what C. Land of Memphis, representative of district 121, thinks should be the number. Here's what he says, in response to the request for his views on state issues in which he is particularly interested:

Ideas on Highways
"I am especially interested in the passage of a more simplified public road system than we now have, vesting the administration of it in 31 honest, reliable citizens over the state."

And he indicates the sincerity of his position by saying: "I have

never sought public office nor held same until I became a member of the Fortieth and forty-first legislatures, and I have never had nor do I now desire any position or public ambition; hence, I expect to follow the sincere dictates of my own conscience in the passage of all laws for the best interest of Texas, reserving the absolute right to go against most bills introduced where they are deemed unnecessary and would tend to further congest our statutes."

Protect Land Owner
Besides highways, Representative Land is interested in a law to protect the land owner from destruction of his property while in the possession of another, and a law to curtail hasty marriages in Texas.

Mr. Land was a student in the University law school from 1906 to 1908. After receiving his degree, he located at Memphis, in Hall County, where he has followed his profession ever since.

Cooking School Sponsored By The Memphis Democrat Is Successfully Terminated With Lecture on Meats

The cooking school, sponsored by The Democrat, under the direction of Mrs. Leona Rusk Ihrig, was brought to a successful close this afternoon, with a discussion by the lecturer on "Meats," and a meat cutting demonstration, taken part in by employees of the Gardner Meat Company.

Preceding the lecture and demonstration, an excellent musical program was rendered by the High School Symphony orchestra, Chaperoned by Mrs. T. C. Deianey, taking the place of the director, Mrs. Shelley, who was ill. Tess Alexander Potter also delighted the women with readings. The young musicians departed themselves like veterans and added a pleasing introduction to the more serious business of the afternoon.

Highest Peak
The attendance at the cooking school reached its highest peak this afternoon. The community room of the courthouse was filled to its capacity, but not uncomfortably so. Judging by the attendance records, and the interest displayed in each of the several lectures, the school this year has pleased the women equally as well as the one last year.

Lecture on Meats
The lecture on "Meats" proved to be one of the most popular of the series of five. Mrs. Ihrig explained the different cuts of meat, its structure, and why some meat will cook tough and other meat will cook tender. One of the popular points brought out in the lecture was the fact that steaks may be broiled without smoke. A number of ousewives have gone on record as saying that the feat cannot be done, but Mrs. Ihrig showed to their entire satisfaction that it was no feat at all.

Explains Temperatures
Mrs. Ihrig told at what temperatures meat should be cooked and how it should be prepared so that it would retain its full flavor and substance. The meat cutting demonstration, of itself, proved to be a revelation to many and will be of help whenever meat is served in the home to guests, or even in the preparation of the ordinary meals.

Mrs. Ihrig, through The Democrat, desires to thank the many people who have contributed towards the success of the cooking school. "There are so many people I want to thank I think the best way of doing so is through the paper," Mrs. Ihrig said.

Wonderful Experience
"Everyone in Memphis has been lovely to me and I have had a wonderful experience here. I have enjoyed working for The Democrat and for the women of Memphis and Hall County. I believe the cooking school has been of material aid to many, and I am so glad if that has been the case."

After the lecture and demonstration this afternoon, a number of women gathered about the culinary expert to congratulate her on her fine series of lectures and for the good they had derived from attending. As has been the case at the former sessions of the school, a number of out of town women were present in the audience and these women expressed themselves as grateful to The Democrat for having brought the school to this city.

Goes to Leader
Two weeks from next Monday, Mrs. Ihrig will conduct a cooking school for The Wellington Leader, another of the Wells Newspapers. She stated that a large amount of publicity and attention had been attracted to the two Wells papers, inasmuch as they were the only weekly papers published in the state of Texas who undertook to put on such schools for the benefit of their readers and to serve the best interests of the community at large.

Sets Record

The fastest trans-continental air mail trip in the ten year history of the air mail ended in Chicago recently when a plane landed there at 11:55 p. m. with mail that had left San Francisco at 7 o'clock the same morning. Alva De Garmo, above, was the pilot on the second leg of the flight, from Salt Lake City to Cheyenne and flew the distance at an average speed of more than 151 miles an hour.

Late Wire News

ATLANTA, Ga., Feb. 1. (UP)—The fate of Richard Gallogly, well bred college man, remained uncertain today, as a jury was trying to reach a decision in the murder case against him in connection with the fun holdup slaying. The jury sought a re-charge before continuing deliberations. The jury deliberated for three hours last night but failed to agree. They asked for a re-charge and this was arranged for this morning by Judge Virlyn Moore.

TERRE HAUTE, Ind., Feb. 1. (UP)—No trace has been found of Edith May Dierdorf, 10 year old West Terre Haute news girl, who disappeared Sunday. The only clue in the case is the blood-smear sack used by the child to carry papers, which was found under a bridge. A reward of \$2,000 has been offered by citizens of West Terre Haute for information leading to the discovery of the child.

CURTIS FIELD, Long Island, Feb. 1. (UP)—Charles A. Lindbergh took off alone in a Curtiss Falcon open plane today for Miami, from which place he will start a new air venture to Central America. He will open the first airmail route from the United States to the Panama Canal Zone.

COLESBURG, La., Feb. 1. (UP)—Three hundred and fifty residents of Colesburg, isolated in the snow for twelve days are rejoicing today as trucks and bobsleds were coming through laden with fuel and provisions for the almost famished village. Numerous attempts had been made to cut a path from the north but all attempts were unsuccessful until the State highway snow plow made a narrow path last night after a battle lasting 24 hours.

HENDERSON, Ky., Feb. 1. (UP)—Six men were killed in a head-on collision between a freight and passenger train near here today. The locomotive crews of both trains were killed. Five people died in the wreckage and one is in the hospital. All are reported to have been from Louisville.

OKLAHOMA CITY, Feb. 1. (UP)—Nine legislators were en route today to Austin, Texas, where they will meet a Texas committee to formulate an agreement regarding the disputed land forming the boundary between Texas and Oklahoma. The men are expected to be back Monday. The legislators are taking with them an agreement which, if ratified by both legislatures, will go to Congress for final ratification.

PRESIDENT SAYS FORTUNES AID NATION

In Dedicating Bok Tower Coolidge Discusses Prosperity

MOUNTAIN LAKE, Fla., Feb. 1. (UP)—Under America's spiritual and material prosperity, persons of moderate means enjoy greater advantages and affluence than at any other time in the nation's history, President Coolidge said in a dedicatory address here today at the Edwark Bok singing tower and bird sanctuary.

Referring to this class of citizenry, which includes the great mass of wage earners, the President said:

"Not only is their income proportionately greater than ever before, but their whole method of life, their opportunities to secure benefits which but a short time ago were the exclusive possession of the rich, have been tremendously increased."

At one point the President directed attention to the fact that fortunes are amassed not so much for "selfish and ostentatious display," but rather for charities and endowments which "have never been tainted with any effort to hold back the rising tide of a demand for the abolition of privilege and the establishment of equality, but have rather been the result of a sincere philanthropy."

"While giving every credit to the genius of management, and holding strictly to the right of individual possessions, we realize that to a considerable extent wealth is the creation of the people," Mr. Coolidge said, "and it is fitting, as in this case, that it should be expended for their material, intellectual, and moral development."

The distinction that wealth once carried is gone, in the President's opinion. Continuing, he said: "It is also doubtful if there ever was a time when even great wealth gave its possessors so little power as at present. Their money is of little value in determining political action. Capitol is so easily secured for any promising enterprise that it is no longer necessary."

3 Newspaper Bills Are Before Solons

AUSTIN, Feb. 1. (UP)—Three bills directly affecting the newspapers are pending before the Texas Legislature. One recognizes that the old days of posted notices has gone and provides that in all instances where statutes call for such posted notice that the notice shall be given by newspaper publication instead.

Senator W. D. McFarlane's lobby-registry bill contains a provision that all paid matter advocating passage or defeat of any measure pending before the legislature must be plainly marked and must be shown by whom it is paid. The other bill is a dental bill by Representative J. C. Ducall, of Fort Worth. "Newspapers of the state have given wide publicity to the theory that the bill prohibits advertising," Rep. Duvall said. "It does not prohibit advertising so long as the advertising does not violate the present penal code."

Dental Advertising
"Dental advertising under a nom de plume or corporation name, or any but the legal and proper name already is finable. This bill makes it ground for forfeiture of license. Already there is a fine of \$10 to \$200 for an untrue dental advertisement. This makes the penalty \$5 to \$100 fine and six months in jail, or both, and revocation of license."

"No dentist who confines himself to truthful advertising has anything to fear from the provisions of the law, nor does it prohibit or hinder the activities of the members of the dental profession who choose to exercise their legal and constitutional right to truthfully advertise their skill or services. It does tend to strengthen the Dental Law in a manner calculated to better protect the public against conduct on the part of dentists who constitute a menace to public health."

By Dorothy B. Robbins

Front yard, back yard and garden—the old established order formerly, but now considerably changed by some beauty loving souls. One friend of mine expects to place the clumpy, easy-growing chrysanthemums in different parts of her vegetable garden. "They will not interfere with anything and they'll be so pretty in the fall," she says. The same friend has made two or three bare unattractive spots blossom into violets, crepe myrtle, hyacinth, canna, and jonquil.

Really, she has some kind of bloom for herself and family, her friends, the bees and the butterflies almost the entire year and her rows of canna lilies against the wall are striking any day and cooling on a hot one. Bluebonnets are easily grown in beds and after the first year will multiply if allowed the volunteer privilege. "While I am feeding my stomach, I'll feed my soul," laughs my friend of the chrysanthemum-growing-complex, in her vegetable garden. The wild morning glories feed my soul in such a way that I am constantly hearing what some individuals of my family think of a tendency to leave every one to grow. Troublesome weeds, the farmer calls them, and says they are a pest.

The old gardens of the Carolinas still exist at one side of a palatial home with their sweet, fragrant flowers to wield a soothing and gentling influence upon the occupants of any home they adorn.

In Texas, one old time vegetable garden carried rows of sweet peas along the path border and of course there would be all those agreeable smelling herbs that played such an important part in dainty cooking.

When the Christmas book catalogues come, there is nothing prettier, but oh, about the middle of January, when the seed catalogues make their appearance, there can be no rivalry. Flowers, flowers, flowers and many new varieties; one from a northern locality lists three new hanging basket plants this year, all unusual looking.

A jaded, too-much-indoors feeling, takes a decided turn to vitality the minute one steps into a grocery or drug store and looks upon the rows of seed packages. I wonder who has not fallen under the spell of planting things. Does it mean that we are all farmers at heart? Not exactly—it is a sign of the eternal spring working within us. Youth renewing, the universal urge for beauty.

"And they did beat the gold into their plates and cut it into wires, to work it in the blue, and in the purple and in the scarlet and in the fine linen, with cunning work."

Yesterday, when I read that in Exodus, I thought how pretty that must have been. I caught a vision of the gold glistening in the mesh of those bright colors and in the fine linen and imagined how cunningly those workers devised each line of gold wire.

Even if one is rather careless of accumulating the precious metal and thrifless, a work of art in brightness threaded as the Lord told Moses to make the ephod, a priestly garment, appeals to the imagination.

Gold is threaded through our lives continuously and we are unaware of it; go on unheeding it. Yesterday, the western heavens were blue and scarlet and purple with long golden beams cunningly threaded through and through the fine lines. Tomorrow's setting sun will paint an entirely different picture—there may be a massive cloud bank with a whiteness equalling the finest of linen and I am sure the golden glint will come. Painters use yellow, red, violet

of sunsets, is said to have approached his art nearer than any mere mortal.

For this reason, Art will ever remain long, while Time is fleeting. A perfect flower has individuality; a reproduction copies it exactly—no, it is impossible.

Get the sunset habit if you have an unobstructed view. In an old composition this occurs: "Do not go to Homer for a sunrise when you can see one yourself every morning."

Sunrise habits are not for everybody because conveniences having become so much greater, and the evening light and entertainment so much better, we have stopped "going to bed with the chickens." I know a place where rising is early and looking across the fields on a frosty morning quickens the pulses at the thought of being alive. I know a place where the heavens seem pouring a flood of gold to a quiet, waiting world and where going indoors is a punishment.

Graphic Picture Given of Strides In Engineering

COLLEGE STATION, Feb. 1. (UP)—A graphic picture of the strides in agricultural engineering in recent years, strides that in numerous instances have been of revolutionary significance in agricultural development, is promised by the extensive display of motorized farm equipment planned for the second annual Automobile and Farm Implement Show to be held at the A & M College of Texas on February 8.

The exhibition, as its name implies, will include a comprehensive showing of new models of various well known makes of automobiles. The farm implement section will present new models of various makes of trucks, tractors, and an extensive exhibit of the latest designs of farm implements, a feature of which will be the display of several types of mechanical cotton pickers.

Sponsored Annually
This agricultural engineering Automobile and Farm Implement Show is sponsored annually by the A & M College student branch of the American Society of Agricultural Engineers. The show last year drew about 4,000 visitors, and this year a crowd of nearly twice that size is expected, according to H. H. Spahr, of Benham, Va., president of the student branch of that society.

The show last year was an indoor affair, but due to the growth of interest it will be held this year on Kyle field where seating accommodations will be ample. The show will start at 7:30 o'clock in the evening. Music for the outdoor event will be furnished by the A & M College Band of more than 100 pieces.

Opening Review
A feature of the automobile section, which will include new models of about twenty makes of cars, will be the opening review in which a bevy of charming young women will drive the cars around the arena. The review will partake of the nature of a pageant in that it will illustrate the development of the automobile from early to present day models.

Those especially interested in the progress of mechanical cotton picking will find various types of strippers on display as well as sleds of the finger type, modified finger type and the rafter or slot type.

A SPLENDID FEELING
That tired, half-sick, discouraged feeling caused by a torpid liver and constipated bowels can be gotten rid of with surprising promptness by using Herbine. You feel its beneficial effect with the first dose as its purifying and regulating effect is thorough and complete. It not only drives out bile and impurities but it imparts a splendid feeling of exhilaration, strength, vim, and buoyancy of spirits. Price 60c. Sold by Levrett-Williams Drug Co. 4t

SEEK TO STOP DEATH

Experiments Try To Restore Life To Dead Organs

By EUGENE LYONS

United Press Staff Correspondent
MOSCOW, Feb. 1. (UP)—Experiment by which young Russian scientists hope to be able to restore life to dead organs or even entire organisms have been made by the Moscow Scientific Chemo-Pharmaceutical institute for the past four years.

Some surprising results have been obtained.

Dr. S. S. Brukhanenko, and Dr. S. L. Chechulin, in charge of the experiment, have constructed an apparatus which they hope to substitute for a worn out heart. The machine is impressive in its simplicity and is made of glass, metal and rubber tubing. It is operated by a dynamo.

Theory of Experiments
The theory of the experiments is that if the blood can be kept from congealing after death the subject animal can be restored to life. It has been observed by scientists that the body continues to live at least three minutes after the heart stops beating.

Taking advantage of these three minutes, the Russian scientists hope to keep the blood in a fluid, using the artificial heart and make repairs on the heart to restore the body to its normal functions.

Processes of Death
The experiments have brought out that apparently the processes of death are active rather than passive, that cessation of organ functions continues gradually until the animal is said to be dead. Some organs live longer than others, and the fact that the head of a dog has been kept alive by the artificial heart has indicated that the brain outlives the heart.

Dr. Brukhanenko explained the general principles of the artificial heart to the United Press correspondent. Blood is poured into a tubes which are connected with the arteries of the organ. After circulating through the organ as the

passes through an air-purifying apparatus and continues through actual blood would do, it returns to the "heart" by artificial veins and resumes the process.

Attempts Unpractical

Earlier attempts to restore life have been recorded, but most of them were not practical and the work of the present Russian scientists, made possible by the development of electrical use, is the first showing a possibility of real value.

The government has been so impressed with the experiment on the dog's head that a generous appropriation has been made to enable the institute to continue its work.

TEXAS METAL MINES HEAVY PRODUCERS

WASHINGTON, Feb. 1 (UP)—Metal mines in Texas in 1928 produced \$12,000 in gold, 1,391,000 ounces of silver, 887,984 pounds of lead and 316,000 pounds of copper, according to Chas. W. Henderson, United States Bureau of Mines, Department of Commerce.

This compares with a 1927 production of \$8,192 in gold, 1,034,886 ounces of silver, 487,984 pounds of lead and 21,458 pounds of copper, indicating a decided increase in all metals.

The Presidio Mine, operated by American Metal Company, contributed the greater part of the State's production. This mine has been a consistent producer since 1885 and the 1928 production was the largest in its history.

ENCOURAGES SWINE RAISING ON PLAINS

LUBBOCK, Feb. 1 (UP)—Swine should be more generally raised in the South Plains of Texas because they can be raised more economically here than anywhere else in America, according to E. R. Eudaly, swine specialist of the A. & M. College.

Eudaly, on a trip this week, pointed out the ease with which bumper crops of feedstuffs are grown here as proof that hogs could be profitably and economically raised in this section.

Irresistible

WHITE SWAN COFFEE

Mrs. Ihrig Says . . .

"I have drunk more coffee since I have been in Memphis than I have in quite a while. White Swan, is so good it's simply irresistible."

FIFTY-THREE years of experience has taught us what people expect of the coffee they drink. Blended of some of the world's finest coffees, it is the finest for Texans—roasted and packed in the Lone Star State. If you've never had White Swan, treat yourself to the leading grocers.

comfort. A new treatment of moulding and body panels emphasizes their low hung appearance. The windshield pillars are gracefully curved from cowl to the trim polo cap visor. A broad body belt set off by raised mouldings extends from cowl to rear quarter, where it narrows to continue around the back panel. Deep window reveals are bordered by a moulding which add new beauty to the smart color contrasts.

Wide crown fenders hang low over the wheels flanking the bright chromium plated radiator and head lamps. The radiator is topped by a winged cap symbolic of Studebaker's championship speed, and the same winged motif is carried out in the design of head and cowl lamps. Scratch-proof and non-tarnishing chromium plate is used to full advantage on lamps, cowl beading, bumpers and the big hub caps.

Many of the models have six wire wheels with the two spares carried in front fender wells.

Interior Treatment
Details of the interior treatment of the President and Commander bodies reveal a new degree of luxurious comfort and beauty. The wide form fitting seats are deeply cushioned on pillow type springs. Rear seats are flanked by heavily upholstered arm rests. The broughams are also fitted with a folding arm rest in the center of the rear seat. Upholstery fabrics are rich mohair, broadcloth, or Bedford Cord, with genuine leather for the open cars.

The complete appointments include eight-day clock, smoking set, and vanity case in the President 135 inches sedans and limousine. Folding ash receivers are recessed into the doors of the five-passenger sedans, victorias and broughams. Cigarette lighters are regular equipment on many models.

Onyx Knobs Provided
Onyx knobs are provided for the horn buttons and gear shift lever. Spark and throttle levers and the thumb switch for the twin-beam headlights are mounted in the center of the thin grip, flat type steering wheel. The wheel is the steel core, safety type which will not break or shatter under the most severe stresses, and conforms to the type prescribed by the safety code of the American Automobile Association.

Few cars in the history of the industry have caught and held the admiration of motorists more completely than The President Eight. Introduced just a year ago, it out-sold every other eight cylinder car in the world six months after its first appearance. Its sensational

run of 30,000 miles in 26,326 minutes last summer, followed by its 24-hour run in November, when two stock roadsters averaged over 85 miles per hour from dusk to dusk, gave Studebaker a clean sweep of official American stock car performance records as well as five world records and eight international records.

Notable Improvements
The new President reveals that Studebaker engineers are not content to rest on their laurels. Notable improvements have been made throughout motor and chassis. Horsepower has been increased and performance further improved by means of new duplex carburetion and downdraft manifold. The new system in effect provides two carburetors and manifolds, each feeding four cylinders. The carburetor is fitted with an improved type accelerating well which gives the motor instant responsiveness.

One of the outstanding improvements is the development of a new type of choke used on both President and Commander motors. It prevents over-choking and dilution of crankcase oil.

Choking Effect
In operation the choke lever can be pulled all the way out for the full choking effect sometimes required for starting in cold weather. As soon as the motor starts, however, a valve automatically opens to prevent the admission of more raw gasoline to the cylinders. Excessive use of the choke is thus eliminated, even though the lever remains in full out position, while at the same time the motor is given all the choking effect it may need for quick, smooth operation.

Frame and chassis of the President Eight has been strengthened to compensate for the motor's increased power and speed. Larger brakes are fitted with an improved type of control for simplicity and permanence of adjustment. Houdaille double acting hydraulic shock absorbers, front and rear, and patented ball-bearing spring shackles insure a new degree of riding comfort and roadability.

Spring covers are fitted to prevent rust, maintain lubrication, and insure full spring flexibility. The ease of cam and lever steering action has been improved by lapping and chrome plating the steering knuckle pins.

Bore and stroke of The President motor remain 3 1-2 by 4 3-8 inches. Piston displacement is 336 cubic inches. N. A. C. C. rating is 39.2 h. p.

The new Commander Eight motor develops 80 h. p. from bore and stroke of 3 1-16 by 4 1-4 inches. Piston displacement is 250 cubic inches. The motor is exceptionally neat and compact in design and has a notable ratio of weight per horsepower, as it develops 1 horsepower for approximately 8 pounds of engine weight. Bohalite pistons with invar strut and split skirt and a heavy nine-bearing crankshaft insure remarkably sure operation throughout the speed range.

The Commander Six motor develops 75 horsepower. Bore and stroke are 3 3-8 by 4 5-8 inches, and piston displacement is 248 cubic inches.

Commander chassis design closely follows that of The President. Longer springs, lower center of gravity and improved chassis balance have brought about greater riding ease and better roadability.

Many Refinements
The Dictator and Erskine Six make their first formal appearance with many improvements and refinements made during recent months. Their smart body lines and deft color treatment emphasize the power and stamina of motors designed by the same brilliant engineering staff that produced The Commander and the world champion, President Eight.

We gather from Governor Smith's speech that the Democrats are not licked. He is like we Confederates—the Yanks did not whip us; we just wore ourselves out whipping them.—Vernon Times.

California Tours Campaign Is Over

On account of lack of interest in the campaign and the further fact that some of the contestants are now claiming unfairness on the part of the merchants in this campaign, and while we know there is no unfairness and that the claim is unfounded. It still persists. Under these conditions the campaign would probably do us more harm than good, so we have decided to close it.

We are sorry, of course, that these conditions have arisen and wish that the campaign might be finished, but as things now stand we do not consider it to the best interests of our separate businesses to continue it.

In order that no contestant may be injured by the withdrawal of this contest before it is finished and our failure to furnish the California Trip which they might win, we are going to ask any contestant now in the campaign to turn in a bill for any expense which they might have incurred on account of their work in this campaign, to Chas. Meacham at the Meacham Drug Co. They will be passed on by us in a meeting in the near future and if found correct and fair, a check will be mailed you for the amount.

Again expressing our regret that we find it necessary to close this campaign, we are respectfully,

- Webster Bros.
- Greene Dry Goods Co.
- Chas. Oren
- O. V. Alexander
- Memphis Garage Co.
- Meacham Drug Co.
- Palace Theatre
- Hightower Greenhouse

Mrs. Ihrig

will tell you this... always keep Gebhardt's Eagle Chili Powder on the table as well as in the kitchen

In the Dining Room--on the Table

Mrs. Ihrig recommends that you keep Gebhardt's Eagle Chili

Powder on your dining table as well as in the kitchen... for here in a shaker like salt or pepper, it is always convenient for soups, stews, vegetables, baked dishes and fish... giving that added flavor not to be had with any other condiment.

In the Kitchen

Of course you should always keep Gebhardt's Eagle Chili Powder in the kitchen in the familiar bottle as it comes from your grocer. Here you find it indispensable for the making of chili con carne and other Mexican dishes, for the decoration of salads and many other practical uses.

FAIR COMMISSION BILL PASSES HOUSE OF REPRESENTATIVES BY A MEAGRE MARGIN OF ONE VOTE

Much Opposition Has Been Offered To Bill's Passage; A Hard Fight In The Senate Is Expected

AUSTIN, Feb. 1 (UP)—The fair commission bill, to permit horse racing in the state of Texas, passed the House of Representatives this morning by a margin of one vote. The vote was a test one, and would indicate that the solons of the lower house have, by a small majority, given their approval to the bill.

The bill was favorably reported last night by the committee on state affairs. It will permit racing only under the auspices of bona fide fair associations conducting annual stock and agricultural fairs.

Much Opposition

Much opposition to the bill has been encountered from ministers and others interested in defeating the measure and it is thought that it will see a good fight in the Senate before it is sent to the Governor. It is reported on reliable information that Governor Moody is opposed to the measure. Under the bill, the horse races can only be conducted by regular county, district or state fairs that are incorporated and held annually.

To Pay Percentage

The fair management will be required to pay two per cent of their receipts to the commission. After necessary expenses have been paid for the operation of the commission with headquarters in Austin, the balance will become a fund for distribution among the counties for the purpose of aiding farming, livestock, poultry and dairy industries. The money is to be expended by the county commissioners' courts in providing thoroughbred breeding stock for free use.

Distribution to the counties is to be made on April 15 of each year in proportion to the bona fide farm population as determined by the Commissioner of Agriculture. Fairs not desiring to hold horse races will not be affected by the bill.

Lions Entertained By Psychologist

Dr. Swastika had his fun Thursday and so did local Lions when he appeared before the Lions Club as the guest of Chas. Meacham. The psychologist did a number of character readings much in the manner he has employed during his appearance this week at the Palace Theatre.

"I'm often called a fakir," the Doctor said, "but my shoulders are broad and I can stand it all. There is no trickery about my work. It is simply psychology applied to the planetary conditions that existed on different birth dates."

Mrs. Leona Rusk Ihrig, Memphis Democrat cooking expert, was also a visitor at the luncheon Thursday. She made a short talk, expressing thanks for the genuine hospitality she has found in Memphis.

Primary Dept. To Get Percentage On Goods Bought

The Primary Department of the Baptist Sunday School will receive a percentage of sales on certain items Monday at the Womack Grocery. Money raised in this manner will be applied on the department's annex fund quota.

The items on which a commission will be allowed will be: Chase & Sanborn Coffee, Aluminum Pan Coffee, Tea Garden preserves and jellies, mixed and boxed cookies, candies, tobacco, cigars, cigarettes, White Crest Flour, Silk Finish Flour and the entire line of Battle Creek Health Foods.

Mrs. Jet R. Fore, superintendent of the Primary Department, asks that people wishing to assist the Baptist kiddies in raising their part of the money that will build a Sunday School annex bear this in mind and order as many of the items mentioned above as possible next Monday.

Coiffure Plays Important Style Role

BY HARRIET

How to wear one's hair is fully as important a fashion question these days as what clothes to choose.

In a way, it is more of a moot question. Shall it be bobbed or long? If bobbed, what kind? If long, how can I wear the ends?

The largest hairdressing contest ever held in New York, the annual New York Ladies' Hairdressers' Association, Inc., has decided several of these questions.

The prize winning was a 50-50 long-short bob. That is to say, the front and sides were short as last year's bob but the back hair was allowed to grow to shoulder length.

This Miss New York bob, as it is called, parts the hair on one side, curls it in three curls over the temples, exposes the ears and catching the back ends in a barrette, curls the ends back up over the barrette. The ends are equally good worn in a chignon at the nape of the neck.

A second bob that allows the back hair to grow long is called the side-curl bob. This is excellent for those girls who look nice with their hair parted in the center. For it parts the hair from the neck to the forehead, through the center. Then it takes the long back hair, curls it and draws it to one side. The back of the head is clear, the sides have curls.

A third bob that is unusual and should be very good on some girls is the one-sided curl bob. Here we see the hair parted on one side, with all of the back hair drawn to the opposite side of the head in the rear and curled in a little group of curls on that side only. The front hair is pulled from off the forehead, save for a few little curls that soften the face immeasurably.

Wind-blown bobs are still to be seen, but one sweeps the sides of the hair irregularly, as well as the bangs. For bangs, as a matter of fact, are completely out unless they take the shape of wind-blown locks or little curls. Split-curls over the temples, reminiscent of the 90's are good, too.

The "Miss New York" bob, left, won first prize for attractive coiffures at a recent contest held in New York. Two others which aroused much favorable comment are at the right; the side curl bob (above) and the new long-short bob (below.)

Memphis Buys 2 New Fords a Day 60 Sold Since January 1 —our record-breaking month!

THE greatest month in the history of the Parker Motor Company demonstrates the value represented in the Model A Ford at its extremely low price. Our willingness to place this fine car alongside any other, knowing full well that it will out-perform cars of much higher price, has proven its greater dollar for dollar value. You can't go wrong with a Model A Ford. The people listed below will tell you that.

These Folks Made No Mistake!

22 Years in Memphis

Doss Dry Cleaners Are All Dolled Up

Doss Dry Cleaners have gone and done it. Yes sir, they've dolled themselves up out of sight. It hardly looks like the same place, so many improvements have taken place along about the same time.

The popular establishment has considerably enlarged their quarters, putting in a partition between the front and the back. Possibly one reason this observer took such a fancy to the place was the fact that The Democrat is tidied up in much the same manner—that is having a partition with lattice work between the front and back.

New Floor Covering

A new floor covering of the finest grade linoleum and of distinctive design has been put down and it shines so brightly that a person with considerable imagination can almost see his reflection in the floor, and that is going some.

A wicker suite has been added to what might be termed a lobby. No charges are made for going in and resting every few minutes and if your trousers need pressing, all you have to do is to make for the dressing room at the back end, yell to Emmett Walker "Come and get 'em" and sit back contentedly until the trousers are returned with a crease in them that will cut your finger if you are not careful.

Carry Fine Line

Doss Dry Cleaners carry a fine line of samples from which to select that new spring suit you have been thinking about. Better go in some time; take a seat in the wicker rocker and feel of the cloth. It is good and soft—like a skin you love to touch!

California Tours Campaign Ended

Effective with this announcement, the California Tours Campaign is officially at an end. The merchants sponsoring this contest thought it to be to the best interests of all concerned to have the campaign closed. Some dissatisfaction is said to have been displayed on the part of those competing in the manner in which votes were being secured and for the good of all, the merchants announce that the campaign is at an end.

It is with genuine regret that this announcement is made and the merchants desire to thank all those who took an interest in the contest and for all who tried to cooperate with them.

ENTERTAIN WITH "42" PARTY

Mr. and Mrs. Lloyd Phillips delightfully entertained a few of their friends with a 42 party at their home on Sixteenth and Brice Thursday evening. A delicious salad course and home made candy were served.

Wise Motorists . . .

use the very best oils and gasoline for their cars—it is economy in the long run.

Byrd Men Must Conquer This Waste

Map gives a graphic picture of the difficulties commander Richard E. Byrd (right) and his followers in reach the South Pole. Their present base on the ice more than 800 miles from their objective—the pole is expected to be covered in seven plane hops. The mountains of prodigious height beyond the Ross barrier. Points indicated at the lower right mark those established by former expeditions. The Byrd expedition is elaborately equipped ever to attempt a similar trip. Gasoline supply depots, at which the plane can be refueled, will be established along the line of flight. Special sleds, taken along, out of which cold-proof huts will be constructed. Here are just two details of the elaborate preparations

T-FLAGSHIP, THE "COLUMBUS," WILL BE COL. LINDBERGH'S OFFICE

and the third for milk, but other food may be carried as well. The plane has been designated the "flying office" because it was fitted out primarily for business purposes, but it has been christened the "Columbus," a name appropriate both because of its pioneering connotation and because Columbus, Ohio, will be the first terminal of the transcontinental service, where passengers who have taken the sleeper from New York or Philadelphia will leave their train for the day journey westward by air.

At Top—Flagship of the T. A. T. fleet, which will be used by Col. Lindbergh, Major Lanphier and others as a "flying office." (Below) Interior view of the cabin, showing the desk at which business will be conducted. Behind the chairs to the left are upper and lower sleeping compartments.

In the center of the cabin is a desk of special design, on either side of which are two comfortable, leather-upholstered chairs. A sliding cabinet serves also as a typewriter table, and before it is a typist's chair. Letters and reports may be dictated while the plane is en route, and there will be no lost time in copying these after the plane reaches the ground. The "Columbus" is a tri-motored, all-metal Ford transport, of the general design and lines of the planes that will be used by the Transcontinental Air Transport in the combination air and rail passenger service. It is equipped with three 400-horsepower Pratt and

Whitney "Wasp" Motors, developing a high speed of 135 miles an hour and a cruising speed of 115 miles an hour. It points to several aviation developments, important among them being the use of a new material for the cabin walls. An engineering problem with the walls of an airplane cabin has been to find a very light material that will retain heat inside the plane, exclude noise and at the same time afford the necessary rigidity and wearing qualities. The solution was found in the Ford-developed ply-metal, consisting of two layers of aluminum between which has been pressed a layer of balsa wood, the latter weighing much less than cork.

Mrs. Leona Rusk Ihrig

Thank You, Mrs. Ihrig

for a very successful week of practical instruction

---and---

thanks to every Memphis merchant and individual who contributed to the success of the school.

Entered at the post-office at Memphis, Texas as second-class matter, under Act of March 3, 1879.

NOTICE TO THE PUBLIC
Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation, which may appear in the columns of this paper, will be gladly corrected upon due notice of same being given to the editor personally at the office 22 1/2 Main Street, Memphis, Texas.

THE DEMOCRAT'S PROGRAM FOR 1929

1. A municipal auditorium.
2. More dairy cows for Hall County.
3. Modern creamery plant.
4. Paved highway across Hall County.
5. An adequate public library.
6. More paved streets.
7. Better police and fire protection in business and residential districts.

AN ADMISSION AND A PREDICTION

THE last session of the cooking school sponsored by The Memphis Democrat came to a close this afternoon. We believe that this school has done much for the women who availed themselves of the opportunity presented. Throughout the five days, a number of people have been in attendance from surrounding towns and communities, showing indubitably that the cooking school was not designed for any set group of women but for the good of all who cared to partake of it.

Mrs. Leona Rusk Ihrig has proven to the satisfaction of all that she thoroughly understands her business. She maintains a home and she has tried to explain to women the value of making the kitchen one of the most sought after parts of the house. Mrs. Ihrig is a mother. She has spoken from experiences incident to that fine station in life. In one of her lectures, she brought out the fact that it was when having to try to keep the spark of life in a wisp of an infant that she first turned seriously to the consideration of food. It was necessary in this case and the success she had with the child, led her to go deeper into the subject of cookery, to study and experiment, and finally to take her place as one of the foremost exponents of the culinary art now in this country.

If The Democrat has actually succeeded in rendering a substantial service to this and other communities, the paper is well repaid for all the work and expense necessary to the proper functioning of this school. Entertaining musical programs, interspersed with readings, were given each afternoon as a friendly prelude to the work of Mrs. Ihrig. The artists who so kindly assisted in making these programs successful have contributed in a large measure to the benefits that were derived from the school. They were unselfish in their services and The Democrat is proud of the fine talent who so willingly gave of their best at each of the lectures and demonstrations.

This paper also appreciates the cooperation of local merchants, business men and out of town advertisers who helped to make the cooking school a reality. It is only such help as was received in this instance that permits a paper to grow and expand and to do those things for a community that is in keeping with the spirit of service and mutual helpfulness. All of the products used in the cooking school may be had in this city and if Mrs. Ihrig believes in them, surely other housewives may take her word as being authoritative on the subject.

For two weeks practically, the staff of The Democrat has been inundated with work. It has been necessary to keep on the job almost constantly in order to publish the paper as a daily. The force as a whole are tired and badly in need of sleep and rest. They are proud of the fact, however, that The Democrat is willing to undertake big things, and not only to undertake them, but to put them over in a big way. It might be interesting for some of our readers to know that the Wells Newspapers—the Democrat in Memphis and the Leader in Wellington—are the only two weekly publications in the state that have ever had the courage and the necessary enterprise to conduct cooking schools. These firmly entrenched institutions are always sponsored by large daily papers. The Wells Newspapers are the lone exception to the rule, so far as is known.

Long before the cooking school opened, the staff was busily engaged in planning for it and for the resultant daily paper. No issue of The Democrat was published last week, in order that the time could be spent in preparing the Sunday edition, which was the largest paper ever to make its appearance in this city. It consisted of 44 pages in six sections. The paper was replete with United Press wire news, special features, editorials, state and local news, a book page, and in addition carried a beautiful display of advertising. We do not intend to compliment or overrate the Sunday paper, but facts we have been detailing are self evident.

The Democrat, in its annual winter automobile section, showed the trend of fashion for the car of today. Sixteen pages, crammed full of automotive news, local stories of dealers and pictures of various makes of cars, were prepared for the general information of our readers. This job, of itself, was a phenomenal task for a weekly newspaper to undertake. Here, again, the spirit of cooperation was to be seen. The dealers in Mem-

getting over to the public those features of their respective cars that were and are outstanding, and we believe that the automobile section will be found as complete, in all details, as any published by the larger daily newspapers, upon the occasion of an automobile show or when a new car makes its appearance.

After getting out the Sunday paper, which was completed at about seven o'clock Saturday night, the staff took a well deserved rest and were back on the job shortly after dinner on Sunday, working on the Monday issue of the paper. Each day, a program has been followed that would insure getting the paper out on time. The time of going to press has been around 3:30 each afternoon and street copies were delivered to the several newsstands a few minutes later.

Readers of the paper should not lose sight of the fact that Memphis is a comparatively small town in which to publish a daily newspaper. As many local stories have been run as could be found room for and as could be gotten in the limited time left at the disposal of the staff for this particular kind of activity. Feature stories have been run in good measure and late wire reports of United Press have been used throughout the six day period.

Additional printers were added to the staff in order that the daily might be possible. The editorial, advertising, mechanical and business departments have worked at top speed to give the readers of The Democrat as good a newspaper as could be published under the circumstances. Special features, ordinarily appearing in the weekly edition, have not been discontinued. No "canned" editorials have been used.

What is the meaning of all this labor and expense? It is true that it has helped to put the cooking school over in a big way, but it has proven other things. The publication of a daily newspaper here shows that such an undertaking can be carried through to completion. This daily, we are inclined to believe, is in the nature of a forecast of what the future will bring. Within a comparatively short period of time, Memphis will have grown to the extent that a daily newspaper will be necessary. When that time comes, The Democrat will try to meet the occasion squarely, and if the volume of advertising justifies the move, it will in all probability become a daily, giving a complete news service similar to that rendered by the larger papers in all sections of the country.

We of the staff realize that the paper has been lacking in many respects during the time it has been published as a daily, but at the same time, we believe our readers understand something of the strain under which we have labored. We have given our best; more than that is inhuman.

In the time to come, those of our readers who have an interest in the upbuilding of Memphis and Hall County, should remember the prediction made in this editorial, for a paper is a potent factor in community life and enterprise and a daily newspaper doubles the field of action and trebles the opportunity for worthwhile service.

This and That

By L. E. R.

It takes a mighty smart person to write a column of nonsense every day for a week, which explains why I can't. But the conductor of "On the Level" has accomplished the feat. Furthermore, the same man (I promised to quit mentioning his name) has written absolutely pure, home made editorials every day for six days. One thing can never be truthfully said of The Democrat—that it ever prints "canned" or clipped editorials, for which I am duly thankful. Of what use is a newspaper if it has no voice? It doesn't get much farther than an automobile without gasoline.

On the other hand, a newspaper, like a human being, often says too much. But we are not infallible. We must admit we make mistakes—plenty of them, but none intentionally. Some of our editorials probably do not please everyone. Many of them are not intended to. They represent our opinion. You're entitled to yours. And often the two view points do not coincide. Have you ever known anyone who had the same opinion on every subject you have? We haven't.

Mrs. Ihrig has been in Memphis all week making cooking tests. Yesterday I made a little test of my own, but along a different line. I wrote a letter to Tarver Drug Company and enclosed it in an envelope bearing only these four words: "On the Corner, City." I wanted to see if a slogan in Memphis means anything. Theirs does. They got the letter.

Every merchant who participated in the Democrat's Second Annual Cooking School has been perfectly princely and to them should go the lion's share of the credit for the school's success. In gratitude, I'm going to mention their names again, and, praise Allah, may there be no omissions: Raymond Ballew and Frank Fore, Amarillo Furniture Company, Snell's Cash Stores, City Dairy, B & M Grocery, Hanna-Pope & Co., R. H. Wherry, Greene Drv

Chief Gardner's Meat Market, Doss Dry Cleaners, Tarver Drug Co., Webster Bros., Waples-Platt Co., Harrison Hardware Co., McKelvey's Quality Furniture, Cudd's Music Store, G. A. Evans, West Texas Utilities Co., and many others who were not, perhaps, directly concerned, but extended good wishes nevertheless.

I want also to thank City Inspector Wesley J. Mangum who permitted The Democrat to temporarily violate a city ordinance in order that the cooking school might secure a gas connection, and Judge A. C. Hoffman and the county commissioners who tendered use of the community auditorium. And for our musical programs, too, we are deeply grateful. The musicians who so kindly served us were: Mrs. C. L. Sloan, Jr., Mrs. Mac Tarver, Mrs. Margaret Garrett Morgan, The Baptist Church Orchestra, and Mrs. Elmer S. Shelley and the High School Symphony Orchestra.

Of course we've omitted someone. It never fails in the newspaper business. Someone is always left out. Whoever you are, you, too, have our thanks and we'll get around to you yet.

I had a barrel of fun yesterday at the Lions Club. Dr. Swastika, Charlie Meacham's psychologist, threw bouquets at a lot of us and told us what we were going to do in the next few years. He said Dr. Hicks was a good mechanic. Any one of Doc's patients could have told us that.

He also said Dave Fitzgerald will probably never get married. And the most of us suspected even that.

I'm not going to tell you what he said about Dr. Hyder. I want you to get that direct from the Doctor himself.

He accused Hollis Boren of being a wealthy man, and don't we know Hollis drives a big Cadillac that has to be taken outside the city limits to be turned around?

Among other things, Dr. Swastika declared that Dr. J. Hardin Mallard is not the ruler of his home. Incidentally, he intimated who the ruler is.

It Won't Be Long Now

that she was a good cook, and I distracted me and I failed to catch the balance of the program.

When the Doctor told me I was stubborn and that I want what I want when I want it, Tom Huff and Herschel Montgomery, who have to put up with me here at the office, laughed right out loud and entered into a head nodding orgy. He told me also that I would be in Memphis until 1937. When I relayed that information to the Boss, King's ambulance made a hurry-up call. He's doing nicely now though, thank you. "Ye gods," he said as he fell in a faint, "what have I done to be punished thusly?"

Something was said about Byron Baldwin, but I forget what. Reminds me of an old song, "What Does It Matter?"

Herschel Montgomery was informed that he would leave Memphis next October and go to a town about 100 miles away. Speaking of faith, which nobody is, Herschel went home and started packing, then phoned the station and reserved a lower berth to Amarillo for use about October 15.

The psychologist said Bailey Gilmore was a man in whom great trust could be placed. Immediately after the luncheon Bailey was rushed by half a dozen Lions who claimed they had made personal loans to him as far back as 1915.

It seems to me Dr. Swastika said something about Dan Mc Collum, but I failed to catch it. Dan "caught it," however.

I believe there were others, but Doc Hicks' attempts to sandwich the readings with wise cracks

There's no real key should not be City of Texas' on the civic part of the citizens of the peculiarly the ladies take the initiative home. The abundant supply able for irregular terprise.

Panhandle Press Paragraphs

We haven't heard or seen much of Christian Scientists lately and wonder if they are proselyting as ardently as they did some years ago. Regardless of how one feels about Mrs. Eddy, we have read some chunks of wisdom from her pen, which sounded like they might have been inspired.—Quannah Tribune-Chief.

The big "speakee" platform burned in California the other day. Guess we will have to worry along without the noise for a while

ew & Fore

School Refrigerator—Endorsed by Mrs. Ihrig

Harriet describes these charming coats in detail in the accompanying article. Coats of similar style are recommended for purchase now for wear next winter.

tannish homespun tweed, fitted slightly with quite a flare to its skirt portion. The sleeves are cut in one with the body of the coat and the closing is diagonal.

There are cuffs and a small collar of seal, a fur that always is charming and never out of style.

Any coat similar to either of these would be more than a safe bet to buy at the sales this late winter, if one can locate such models. Buying either, Milady can well boast a "bargain."

Soil Erosion Is Largest Problem Facing Farmers

Soil erosion or washing is one of the biggest problems facing the farmers who are farming rolling lands. H. H. Bennett, of the United States Bureau of Soils, has stated that an annual loss of at least \$200,000,000 is sustained by farmers of the United States as a result of soil erosion.

Although some types of erosion are readily noticed, there are forms of erosion, such as sheet washing, that are taking place so gradually that the loss is overlooked. Some soil washing takes place in a cultivated field, even when there is little slope to the land.

The severe erosion resulting in the formation of gullies is readily noticed. In many sections of the country gullying has progressed until millions of acres of formerly cultivated land have been thrown out of cultivation and under the present condition could not be profitably reclaimed.

Character of Rainfall
 The character of the rainfall has much to do with the amount of washing. If rains come in heavy downpours, much more soil washing will result, than under similar conditions where gentle rains are the rule. Some soils are more affected by the run-off water than others, due to their different abilities to absorb water and for their

Can Be Prevented
 Much of the loss from soil erosion can be prevented. By checking erosion the farmer is not only able to hold the soil that he now has in its place, but he is also taking the first step in a program of soil improvement.

Building of terraces and growing of cover crops are probably two of the most important means of checking erosion in cultivated fields. Terraces help to reduce the damage from run-off water by slowing down its movement over the soil surfaces, and thereby reduce the amount of soil that can be picked up by the water. This slowing down of the rate of run-off enables the soil to absorb a larger quantity of the water and at least on compact heavy soils this will be of benefit to the crop grown. Winter cover crops, such as small grains, or other suitable winter legumes, will not only reduce loss of soil through erosion but also will conserve soluble plant

SHERIFF COMES TO INSPECT AUTOMOBILE

L. A. Husband, sheriff of Montague county, together with a deputy sheriff, and Claude W. Townsend, came in Tuesday afternoon for the purpose of identifying the Chevrolet coupe taken in charge by local officers Monday afternoon. The car was identified by Mr. Townsend. It was stolen from in front of his residence Sunday night. The officers identified one of the two arrested and held on suspicion of having stolen the car, as a man by the name of Rector. They were not sure of the other man's name. The car was turned over to Mr. Townsend and the Montague county sheriff took the two men back with him. The local officers were highly praised for their quick and efficient work in connection with this case.

The Pleasure Was All Ours

It has been a distinct pleasure for us to participate in the Democrat Cooking School.

We believe we have profited and we feel every new customer who has been induced to buy meat at Gardner's will be highly satisfied with its quality.

We sincerely hope the meat cutting demonstration today has given you a broader vision of the wide variety of meat cuts.

Oil the Level

(Continued from page 1)

Mr. Morris Shepherd makes one of his infrequent visits to this state for campaign purposes.

And now, folks, I have about said my say. With your kind permission, I am going to call it a day and am going home and go to bed. Sleep may be a little thing, but it goes a long way sometimes.

Engineers—

(Continued from page 1)

sary, he said, to abandon a well-entrenched theory relative to electrical arc cathode temperatures, as the new breaker depends on the breaking up, or deionizing, of an electric arc by drawing it over metal plates. Much work was done in speeding up the deionization of an arc in order to avoid destruction of the plates, Dr. Slepian explained, in view of the existing theory that the intense heat of an arc cathode was constant. Not until it was forced upon his attention that frequently arcs could be obtained which did not have hot cathodes, Dr. Slepian added, did he have the courage to take a stand opposite to that espoused by so many eminent authorities.

President—

(Continued from page 1.)

esary to be rich to go into business, even on an extensive scale. The possession of money has never been sufficient to gain the social attentions of persons of culture and refinement.

The President pointed out that the very nature of America's development made mandatory a strict attention to the material side of life, but he was careful to emphasize the need of a spiritual and artistic equanimity.

"The material prosperity of our nation will be of little avail unless it is translated into a spiritual prosperity," Mr. Coolidge said. "We need a deeper realization of the value and power of beauty."

It was the happy balance of these elements that had given America its success, Mr. Coolidge pointed out.

"It would be a mistake to suppose that the organization of the material side of existence has been completed," the President said at one point. "It is more likely that it has only begun. But it has progressed far enough so that a moderate amount of industry and thrift is all that is needed to relieve the great mass of our people from the pinch of poverty, and when these are supplemented with such training and skill as it is possible for almost anyone to acquire, to raise them to a position of comparative affluence."

Mr. Coolidge referred to the Bok sanctuary as "another evidence of the breadth and completeness of the life of our Republic."

He then launched into a discussion of the artistic as well as the general progress of the nation. He said:

"When we erected our institutions on the basic theory of equality, our ability under such conditions to produce the finer things of life was immediately challenged. The correctness of our theory has been more and more demonstrated by the course of events. Our artistic growth has been constant and in its individual examples and its general application is not excelled by any other people.

"In its main purpose to create a nation and increase intelligence, stability, and character our Republic has met with unexampled success.

"Our institutions have endowed our people with insight and vision. The individual has been developed, the nation has become great. The belief that there is nothing which our people cannot do, and no power which our people ought not to have, has been the main source of our progress."

The Bok singing tower is one of thirty in the country. Almost a year was required in the manufacture of the 6-bells.

Get it at Tarver's.

GEM CHES DAVIS and his VAUDEVILLE REVUE and Last Times Today Karl Dane and George K. Arthur in Brotherly Love

Mrs. Moody is Not Worried Over Dan Junior's Politics

AUSTIN, Feb. 1. (UP)—Whether or not Dan Moody, Jr., born Jan. 6, 1929, follows in his dad's footsteps and becomes Governor of Texas, isn't of paramount concern to his mother, Mrs. Moody, but there is one thing on which she has a very definite idea in regard to her young son, and that—

"For many years to come I don't want to hear of anyone intimating to Dan Junior that there has been some doubt expressed about the existence of Santa Claus."

"And he is also to believe in fairies," she added.

As for his father, Governor Moody, he has two ambitions for the youngster—good sense and a degree from the University of Texas.

With these the rest of the lad's way will be easy, is the governor's belief.

Silence At Night

Without giving away too many secrets, it might also be made known that the youthful governor has a wish concerning his blue-eyed, red-haired son, who bids fair to resemble him closely, and that wish is, silence at night.

"His dad doesn't want him to cry at all," Mrs. Moody confided. "The minute the baby whimpers, he believes that someone ought to take him up. He has spoiled him already, and he is certainly doubtful about the theory that a baby strengthens his lungs by some lousy whoops."

"But what profession or career do I want my boy to follow?" Mrs. Moody thought for a moment.

Politics Exciting

"Governor of Texas? Well, politics and public life are interesting and exciting."

"But after all, the profession or career he selects to follow will be up to him. I don't believe in parents trying to determine their children's careers or regulating their lives."

"There is one thing certain. Dan Junior is going to get an old-fashioned raising, for I'm afraid that I do believe in some of the old-time principles of obedience and discipline."

During the day Governor Moody spends the hours administering executive clemency, contemplating the highway legislation, vetoing ponderous labors of tedious legislatures, opening bridges and closing schools.

After hours his gubernatorial mind is concerned with how long it will be before Dan Junior will say "Daddy," when will the first tooth come, and would an electric train or a drum be the next best present to get.

Perhaps that accounts for the red-headed governor's constant grin.

dead. It was such a scene as will live for long in the mind of this observer.

Severe Sore Throat

Immediately after the services, Rev. Miller was told that one of the little girls had severe sore throat. He carried her immediately to see a doctor in his car, purchased medicine for the child and gave instructions as to its use.

The attention of the United Charities has been called to this case, and an investigating committee from the organization will go into the case thoroughly today and render what ever aid lies within their power.

If anyone in Memphis has some warm clothes suitable for little girls that they would like to donate to these needy ones, if they are left at The Democrat office, this writer will see to it personally that the clothes are delivered to the four children. And then, some of our leading and honored citizens say that a United Charities is not needed in this city!

FIRST CHRISTIAN CHURCH

On Sunday morning I will continue the series of sermons on "The Ideals of Christ." The theme for Sunday morning will be "The Seen and the Unseen." On Sunday night I will turn the service over to the Christian Endeavorers for the observance of the 48th anniversary of the C. E. movement. There will be a service of songs, readings, and special papers. The service will be at 7:30.

On Sunday afternoon at 3 o'clock I am to preach at Giles. Arthur W. Jones, Minister.
