No. 32

## CONSTRUCTION OF SCHOOL TO BEGIN NEXT WEEK

### More Than 100 Men Report To Work

The work of staking off the ground floor of the new Eldorado Grammar School was started Thursday morning and actual construction on the building will begin probably not later than Monday according to Superintendent R. D. Holt. More than 100 men reported for work Thursday morning, but as the money which was realized from the sale of the school bonds has not been received, no work could be started Thursday morning except that of staking off the ground floor. The school bonds were sent to the State Board of Education on July 21. The bonds are issued for \$45,000 and carry a 5 per cent interest.

Superintendent Holt estimates that the new school building will consume practically all of the \$45,000 by the time it is finished and completely equipped. The building is to be heated by steam, equipped with modern desk and standard equipment, and is to have electric clocks which will ring period bells. It is intended that the building will be completely finished and fully equipped in time to be occupied by the beginning of the second semester.

The building is to contain eight class rooms, a gymnasium, all of which has been badly needing the Eldorado school system during the past few years. With the completion of the new school building, Eldorado will boast one of the best school systems for a town of its size in West Texas. The system will also be in position to grow and expand as rapidly in the future as it has in the past.

### Action Must Be Immediate

Action on the Fair Park has recently been brought to a showdown, and prompt attention is necessary. Eldorado is to lose or to keep its Fair Park by whatever course its citizens take within the next few days. Because we have no other place suitable for rodeos, football games, fairs, and other forms of entertainment and recreation, several citizens have indicated that Eldorado must keep the park and the Lions Club, along with other interested parties, are working diligently at the matter.

**Williams Explains Situation**

George Williams, virtual owner of the park at the present time, states that he is willing to do all that he can toward a satisfactory deal. He says that he is not willing to see that Fair Association and the town lose the park, but that something must be done and done immediately.

Mr. Williams stated that the original plot of ground out of which the Fair Park was carved consisted of 100 acres for which he paid \$77 per acre. He sold 28 acres of this plot to the Fair Association at \$120 an acre. Four notes of \$560 each were made for the ground. One of the notes has been paid, leaving three outstanding notes of \$560 each plus interest.

Mr. Williams states that he is willing to sell the three notes to the county or school board for face value without interest. As an alternative, Mr. Williams states that he is willing to let the matter stand if the Fair Association can pay the face value of one note.

### Pat Murphy To Support South For Congress

Following his strong organization squarely behind Judge Charles L. South, E. E. (Pat) Murphy of San Angelo has issued a statement that he intends to vote for the Coleman Candidate for Congress in the 21st district run-off.

Mr. Murphy, who polled nearly 12,000 votes to run a strong third behind Judge South in the first primary said he was taking this step because "it appears that the great majority of my organization is already working for Mr. South, and my decision has been reached after hundreds of my supporters have asked me to support him."

"I will be very busy with my law business during the next 30 days and do not at this time contemplate taking an active part in the congressional run-off, but I shall vote for Charles L. South of Coleman and possibly may make two or three speeches for him before the end of the campaign," Mr. Murphy's statement said.

Mr. Murphy also expressed his deepest appreciation to each of his friends who so loyally campaigned for me and for the splendid vote given me, especially in my home county of Tom Green."

Green county, which gave Mr. Murphy a majority of several hundred in the first primary is climbing aboard the South bandwagon. The Coleman candidate was busy in San Angelo this week perfecting his local organization, opening up a headquarters, while a South-for-Congress club was being organized.

Mr. South has installed a loud speaker equipment in his automobile and already has started a whirlwind speaking campaign that will carry him to all parts of the far-flung district.

### INTERNATIONAL LIONS TO MEXICO CITY, JULY 1935

#### Covey Describes Grand Rapids Convention

At a regular meeting of the local Lions Club last Wednesday at noon Superintendent R. S. Covey of Sonora, president of the Sonora Lions Club, gave an interesting description of the Lions International Convention at Grand Rapids, Michigan, July 17-23. Lion Covey stated that the convention was well attended and very worthwhile. The Lions elected new officers, reviewed the past year's accomplishments, and outlined the working program for the coming year at the Grand Rapids Convention. In addition, the Lions met their fellow Lions from all over North America and enjoyed a great get-together.

At the concluding meeting, the Lions selected Mexico City as the next convention town which will be July 23-26, 1935. Vincent C. Hasall of Omaha, Nebraska, was selected as the new president.

### Saturday Final Day For Signing Exemption Blanks

Saturday, August 11, has been set for the county cotton allotment board as the final day for signing cotton exemption certificates. It is necessary that everyone who will have cotton to sell, sign one of these blanks. If a producer does not have his exemption certificate, he will be forced to pay a tax on the cotton that he sells. The cotton allotment board is asking that all who have not signed do so by Saturday, August 11. The allotment committee will be located at the county house today and tomorrow and the committee states that it will be glad to help each one fill out his application.

C. Snell, County agent.

## Eldorado Must Keep Fair Park

### HUMBLE COMPLETES DERRICK; FULL OPERATION TO START SOON

#### JUDGE WILSON TO SPEAK HERE IN BEHALF OF ALLRED

Hon. G. T. Wilson of San Angelo is slated to speak in behalf of the candidacy of James V. Allred, candidate for governor, here at the courthouse Friday evening, August 17, at 8:30 p. m. A cordial invitation has been extended to every voter of the county to hear Judge Wilson discuss the issues of the campaign. Judge Wilson is an interesting speaker and is a man to whom his acquaintances have utmost confidence. The Judge assures those who turn out to hear him that he will speak the truth and he asks that every voter in the county hear him if possible.

#### THREE WATER WELLS COMPLETED

According to reports from Mr. Griffin, tool pusher at the Humble No. 1 like Honig, rigging up the 126 foot steel tower over the new Humble wildcat was completed Thursday morning and further preparations are now being made to begin operations in earnest.

Three water wells have been finished and the work of plugging back to fresh water in the sulphur well is now occupying the time of those employed on the well.

More machinery is yet to come, but it is expected that full operation will begin within the next two weeks.

### SENATE RACE NOT YET DECIDED

**DAVIS IN LEAD**

So close was the race for the office of State Senator, that the race is not entirely decided yet, but the majority of people now concede Judge E. M. Davis of Brownwood the victory. Davis is given a 75 lead over Penrose B. Medcalf of San Angelo according to Brownwood Bulletin tabulations, Medcalf's own tabulations show Davis a slightly less lead. Medcalf has made no statement as to whether or not he would contest the election, indications are that he does not intend to do so. Tabulations from the 16 counties in the district, thirteen of which have reported complete official returns, give Davis 20,672 and Metcalf 20,584. The race has proven to be one of the closest races for state senate in the history of Texas.

### SOUTH SPEAKS HERE SATURDAY

Attorney C. L. South spoke here last Saturday in behalf of his Candidacy for Congress in the new 21st district.

South pointed out that he was second in the first primary but carried his 35th Judicial District by a large majority.

South favors adequate tariff laws to protect the growers of wool mohair and other livestock and farm products and along this line would support a truth-in-fabric bill.

South says he favors a low rate of interest on Federal money loaned to farmers. He favors reorganization of silver to aid agriculture and business. He is for the removal of profit from warfare through government ownership of all munition plants. He also favors a fairer distribution of the nation's wealth.

South said he opposes the issuance of tax-exempt bonds. He opposes entangling alliances with foreign countries. He also opposes cancellation of war debts.

South believes that control of the crime situation may be brought about through closer coordination of effort between Federal, state and local officers and through the abolition of county and state line restrictions in the pursuit and capture of criminals. He is not backed by any special group or faction. He serves no special group or interest but will work for a square deal for every industry in every section of the district.

Fighting almost single handed Mr. South won a place in the run-off undaunted by expensive advertisements of militant group and organizations.

### Troop 18 Hikes To Whitten Ranch

Troop 18, Eldorado boy scouts, took a very entertaining hike last Thursday afternoon to the Judge Whitten Ranch, about five miles northeast of Eldorado. The boys took supper Thursday night and breakfast Friday morning on the ranch. In addition to being lucky enough to catch three little snags, the boys enjoyed three refreshing swims. Thursday night the troop held a council fire.

Members of the troop who made the hike were John Thomas Ballew, Marshall Bailey, R. W. Gray, Harold Gray, Wallace Cozons, Billy Green, James Henderson, M. C. Laird, and Bob Bradley. The boys reported a delightful time.

V. G. Tisdale was in town Wednesday on business. Mr. Tisdale states that he is still hoping for rain, and is planning on it so strongly that he does not intend to sell any of his cattle to the government. We hope that Mr. Tisdale is right.

### Presbyterian "Men-of-the-church" To Resume Meeting

On Tuesday evening of next week the "Men-of-the-Church" of the Presbyterian church will resume its monthly meetings. Supper will be served by the ladies at 7:30, after which the men will gather in the auditorium for a program and discussion, the subject of which will be "What the Depression Has Taught Us." All of the men of the Presbyterian church are invited and a profitable time is promised.

### GOVERNMENT CATTLE NOT TO BE GIVEN AWAY

Cattle that have been purchased and condemned by the government must be killed and destroyed according to Dr. S. L. Noyes, district inspector. It has been pointed out that certain persons have abused the privilege of the use of condemned cattle. For that and for unsanitary reasons, no more condemned stock will be given away. Condemned stock must be either burned or buried.

When government purchasing first began in this section, a large number of people followed the appraisers and inspectors about, taking the condemned meat for their own use. All inspectors are now ordered to see that none of the condemned meat is used for human consumption. This order, however, has not been carried out heretofore; but unless other instructions, which are momentarily expected, arrive soon, the inspectors state that they will undertake to carry out this order.

### 6,826 Cattle Appraised To Date In Schleicher

Up to Thursday afternoon, 6,826 head of cattle had been appraised in this county. 1,593 of that number have been condemned. This number of cattle for government sale comprises 167 completed contracts. It was estimated that the sales of cattle to date have brought \$85,000 into the county, and that total sales of cattle will bring more than \$100,000 to Schleicher county.

### Notice

I am the representative for the Charis Foundation Garment. I shall be at the Andrews Grocery each Wednesday to take orders from now on. Mrs. Clyde Golbreath (33p)

### Station A Trounces Ellis Parts

In a conference game of the Concho Basin League, Station A, Schleicher county's fast entry in conference competition, walloped Ellis Parts of San Angelo to the tune of 9-3 here Sunday. Station A garnered six timely hits coupled with three errors on the part of the Ellis team to put the game on ice. Ellis parts managed for five scattered hits. Ellis pitchers, Duke and Breed, walked eight men; Station A pitchers, Smith and Ratliff, walked only 4, and Smith snuffed four men at the bat.

Station A lineup: Hudson, 1f; W. McLeod, ss.; P. McLeod, c; Gardner, 1b; Ohlenburg, 1f; Ratliff, 2b-p; Smith, p-cf; Bishop, 3b; Archer, 2b.

### Hunter Outlines Recovery Program

"To accomplish a rehabilitation of this state, to make available funds for the employment of our thousands of jobless, to restore hope for the other thousands on our relief rolls, we must do two things. These required accomplishments are the restoration of an easy available credit and the retention of a buying power for the people of Texas the profits and proceeds of our state's natural wealth," Hunter said, recently in a campaign speech.

"In order to restore an easy available credit it is necessary that the unfair tax burden now resting on real estate be relieved. While real estate bears 77 per cent of the ad valorem tax burden it brings us but 15 per cent of our income. The other 85 per cent of values in this state, representing income from sources other than real estate, is bearing only 23 per cent as contrast to real estate's load. A blended tax plan must be adopted in order that the tax burden may be reallocated so that all pay in proportion to their ability and that the interests which have been dodging their fair share of the taxes may be reached. An easy available credit cannot be restored until real estate, our basic wealth, is placed back on a profit paying basis. As long as it is cheaper to rent than to own a property or a home the safety of our state is endangered.

In his blended tax plan, Hunter explained, a net earnings tax is proposed to be placed upon the larger brackets of income.

"Such a plan will eliminate a case in point, that of a great pipe line company, which during a depression year made a net profit of over twenty See Hunter Outlines page 5

### J. C. Carr Again Officer of Christian Encampment

J. C. Carr, past president of the Christian Encampment of West Texas, was elected to the post of vice-presidency of the encampment for the coming year at Mertzon last Sunday in the final session of the 1934 encampment. Carr was succeeded as president of the encampment, having served as president for the year 1933, by Lehman Walters of Mertzon. Mrs. Callie Craven was named secretary-treasurer.

A number of Eldorado citizens attended this, the eleventh annual encampment of the First Christian Church. Several hundred people from neighboring towns attended the encampment.

### Eldorado Man Responsible For Arrest Of Car Thieves

After suspecting the strange actions of two youths who passed through Eldorado, driving a model A Ford sedan, Fred Matthews reported the matter to sheriff Conner. Conner notified officers at Sonora to hold up the boys. The boys were arrested at Sonora and the license on the car was checked. It proved to be a car which had been stolen from Colorado, Texas, last Sunday. The boys gave their names as Ray Sherman, 19, Fulten, Oklahoma; and Sam Johnson, 18, Cincinnati, Ohio.

The Mitchell county sheriff returned the two youths to Colorado City last Tuesday.

## EDITORIAL BRIEFS

### Two Dogs and a Bone

Over in Europe, two dogs lie just opposite each other, growling and awaiting their chance to show supremacy. Between these dogs, there lies a bone which is covered by both dogs. When the dogs fully decide that it is time to begin their struggle for supremacy, the world is likely to be affected if not actually drawn into the trouble. The two dogs are Hitler and Mussolini. Austria is the bone of contention.

### American Civilization And War

It is our belief that American civilization is rapidly approaching a point above war. American people are beginning to realize that war is barbaric rather than a characteristic of civilization. Just a little more education will teach us that the manly way to settle trouble is through understanding, not war. The coward fights because he is afraid to face facts.

### An Education Within An Education

A visit to the World's Fair is an intellectual treat for anyone; but for high school and college students, the World's Fair is (or rather, would be) an education within an education. In our estimation, a week at the World's Fair is worth nine months in anybody's college. There are collections and collective exhibits of an educational nature gathered at the Fair which can not be duplicated by the combined efforts of several colleges. And when group trips to the Fair are so inexpensive, it is a pity that school boys and girls are not given any better opportunities to visit the Fair.

### NRA Criticism

Criticism of the NRA is growing more and more adverse; and according to report, much of the adverse criticism is well founded. NRA failure, however, is not due to the fundamental principles of that most publicized organization, but rather to mismanagement and misguidance on the part of those handling the functions of the organization, as well as misinformation on the part of the public. NRA is missing its mark; it has been turned into a tool by those whose byword is greed. The NRA was established to create employment, raise wages, increase purchasing power, and establish fair business tactics. The ultimate aim was to increase profits and restore prosperity, but Big Business used NRA for a passport to increased profits without considering employment, wages, etc. Before the NRA or any other such organization can be successful, someone with stamina, ability, and a general understanding of the mechanism of the world must head the organization.

### ARE THE DAYS OF RAILWAYS OVER?

Several people have been thinking lately that the railroad has seen its best days; but the railroad is yet to see its best days. . . rails are here to stay, here to sing again. Truck transportation is not an improvement over rail transportation. Transportation calls for forward progress, and the railways are just getting into shape to recover the business it once had. And why shouldn't it? Railroads pay taxes, encourage progress, spend vast sums for improvements, employ thousands of men, render services in various other ways, and do not "hog" the highways. Railway service is more comfortable and in due time will be much faster and even more serviceable. The time will come when bus

and truck transportation running services parallel to the railroads will be taken off the highways.

How much taxes does your local bus and truck transportation pay into school fund and your general community funds? How many thousand men does your local bus and truck transportation hire? How much money do they spend for improvements in your community? Yet they push you off of the highway which your money has built. They demoralize railroad business to such an extent that men are thrown out of employment and services are crippled.

With the production of the fast streamlined trains such as Burlington's Zephyr, the railroads are making ready for their comeback. The streamlined trains are light, fast, and comfortable; yet the entire train costs less than one ordinary Pullman car. At the rate of 110 miles an hour, the train will carry you to your destination in less time and with greater comfort than ever before. And because the railroads have done so much and will soon continue to do so much for the United States, we advise the people of this nation not to boycott the railroads as they seem to have done in the past few years. Railroads offer the improved transportation of tomorrow.

### LIVING BABIES IN INCUBATORS AT WORLD'S FAIR

Scientific Care of Prematurely Born Infants Is Interesting Exhibit.

In astonishing contrast to the festive atmosphere of make-believe which surrounds it, the Infant Incubator exhibit at A Century of Progress suddenly brings the visitor face to face with the serious, but fascinating, business of saving human life.

Here is no mere bit of scientific demonstration—no clever imitation for the edification of the millions who attend the World's Fair. This exhibit is in fact a real infant incubator station of major size, fully equipped and in full swing, under the supervision of the most prominent pediatricians and employing the most competent and experienced registered nurses.

Prematurely born infants, or underdeveloped babies whose one chance for life lies in scientific treatment, are received from hospitals or individual physicians, just as they would be received in any incubator station attached to a hospital—only here at the World's Fair, visitors may witness the entire process of nourishing the delicate mites of humanity to health and vigor.

This exhibit is in charge of Dr. Martin A. Conroy, who has devoted his life to the work of saving premature babies.

Visitors See Everything  
As one enters the exhibit, he passes within a few inches of the dozen glass incubator "machines" in which the

### Feels a Lot Better When Black-Draught Relieves Constipation

From many states come reports like the following from Mr. W. M. Henderson, of Jasper, Fla.: "I have been taking Theodor's Black-Draught twenty years. I take it for constipation that gives me a dull, tired, aching feeling, and I have headache, too. Black-Draught relieves me of this trouble. After a few doses, I feel as good as new. I keep it in my home. I have a big family. When one of us is ailing (from constipation), we take Black-Draught and almost always feel a lot better. It has been worth its weight in gold to my family." . . . Sold in 25¢ packages. "Children like the Syrup."

barely-living babies are placed. A lecturer, who carefully describes the treatment given and answers all questions, tells you that the male babies are designated by blue ribbons, while the little girls wear pink.

All the infants in the incubators are dressed in swaddling clothes, which are removed in the adjoining nursery when they are taken there for their baths and for feeding. The glass front of the nurse affords a clear view of all that goes on inside, where the nurses are busy twenty-four hours a day.

### Every Precaution Taken

Temperatures within the individual incubators in which the babies are kept during the early period of their treatment is maintained at proper levels, the air entering the small enclosure is purified by the latest scientific methods and a flow of oxygen is fed into the compartment to stimulate life. The infants rest upon downy white pillows and they are under the constant eye of attendants.

Willie L. Isaacs, Jr., a member of the Success staff, spent the weekend in Brownwood.

### HOUSE JOINT RESOLUTION

No. 42  
BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS:

Section 1. That Section 30, Article 16 of the Constitution of Texas be amended so as to hereafter read as follows:

"Section 30. The duration of all offices not fixed by this Constitution shall never exceed two (2) years, except that the elected officials of a city that has adopted and amended its Charter as provided in Section 5, Article XI of the Constitution of Texas may, by amendment to such city's charter, hold office not to exceed four (4) years, provided, that when a Railroad Commission is created by law it shall be composed of three (3) Commissioners who shall be elected by the people at a general election for State officers, and their term of office shall be six (6) years; provided, Railroad Commissioners first elected after this Amendment goes into effect shall hold office as follows: One shall serve two (2) years, and one four (4) years and one six (6) years; their terms to be decided by lot immediately after they shall have qualified. And one Railroad Commissioner shall be elected every two (2) years thereafter. In case of vacancy in said office the Governor of the State shall fill said vacancy by appointment until the next General Election."

Section 2. The foregoing Constitutional Amendment shall be submitted to the qualified electors of the State on the next General election to be held on the first Tuesday after the first Monday in November, 1934, at which

### SENATE JOINT RESOLUTION

No. 21  
BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS:

Section 1. That Section 1 of Article 9 of the Constitution of the State of Texas, be amended so as to hereafter read as follows:

"Section 1. The Legislature shall have the power to create counties for the convenience of the people subject to the following provisions:

First. In the territory of the State exterior to all counties now existing, no new counties shall be created with a less area than nine hundred square miles, in a square form, unless prevented by the preexisting boundary lines. Should the state lines rendered this impracticable in bordered counties, the area may be less. The territory referred to may, at any time, in whole or in part, be divided into counties in advance of population and attached, for judicial and land surveying purposes, to the most convenient organized county or counties.

Second. Within the territory of any county or counties now existing, the Legislature may by a two-thirds vote of both Houses, create new counties, combine existing counties and parts of counties and abolish existing counties and change county boundaries at will, provided that no new county shall be created with an area of less than nine hundred square miles nor shall any existing county be reduced in area so as to contain less than nine hundred square miles, unless such new county or such remaining county, and both shall have a population of not less than fifty thousand according to the last United States census prior to the date of the creation or change of such county. When any part of a county is stricken off and attached to, or created into another county, the part stricken off shall be holden for and obliged to pay its proportion of all liabilities then existing, of the county from which it was taken, in such manner as may be prescribed by law. Third. No part of any existing county shall be detached from it and attached to another existing county until the proposition for such change shall have been submitted in such a manner as may be provided by law, to a vote

of the electors of both counties and shall have received a majority of those voting on the question in each."

Section 2. The foregoing amendment to the Constitution shall be submitted to a vote of the qualified electors of this State at an election to be held throughout the State on the first Tuesday after the first Monday in November, 1934. At this election all voters favoring said proposed amendment shall write or have printed in that ballot the word, "For the amendment to Section 1 of Article 9 of the Constitution of Texas, providing that the Legislature may by a two-thirds vote of both Houses create new counties and change the boundaries of existing counties." Those voters opposing said proposed amendment shall write, or have printed on their ballot the words: "Against the amendment to Section 1 of Article 9 of the Constitution of Texas, providing that the Legislature may be a two thirds vote of both Houses create new counties and change the boundaries of existing counties."

A true copy.

### MAC'S MESSAGES

In filling my duties as a roving reporter I found numerous and vitriolic complaints about some unknown person or persons who seem to find a pleasure in giving poison to the dogs of this town.

Dogs one of the first of all animals to be domesticated, the ever faithful friend, guardian of the home, the seeker of the lost baby, rescuer of the helpless in water, the one animal we can cuff and kick but remains ever loyal. How could human beings get malice and hatred enough in their hearts to poison their neighbors harmless deminutive dogs and the children's puppies?

Old Hamburger, old, feeble, and traveling in the evening of her life is the only being that ever, occasionally, recognizes me as being head of the family. I love her for it. If there is a good place where good dogs go old Hamburg will inherit a front row with all the fixings. The eventual destiny of our good dog is clear, but should she happen to an untimely and violent end grief and remorse would fill our breast to the starch on the shirt front.

Let us hope that this unknown person who gives poison food to our ever faithful servant, the dog, will realize the error of his way and cease this on harmless dogs in our town. I would close with these words, "Man teaches obedience to his dog, but never to himself."

### Some Features Of The World's Fair

Note: It would be impossible to describe everything at the Fair and that is not our intention, but in the next few issues we intend to describe from first hand, for those readers who are interested, the highlights of the 1934 Century of Progress, the greatest International Exhibit ever displayed.

As one enters the 23rd. Street entrance of the Century of Progress in Chicago, one's attention is first caught by the Havoline thermometer, which is 227 feet in height. It records the temperature accurately and is the world's largest thermometer.

In the Firestone exhibit hall, there are two miniature rubber plantations and a demonstration of the process of tire manufacturing. The Fair visitor sees the actual making of the tire start to finish. Just back of the Firestone hall is the Firestone singing color fountain, one of the most attractive and interesting exhibits of the Fair. Music and song near the fountain, changes the color of the fountain, thus the fountain translates musical variations into light variations and in this manner registers the mood of the music. The one and only word which describes the fountain is the word gorgeous.

Also near the 23rd. street entrance is the famous Sinclair Lost River and Prehistoric exhibit in which one may see the forty-ton brontosaurus, the trachodon, the triceratops, and the tyrannosaurus, as well as a reconstruction of how oil originated.

Just across the street from the Sinclair exhibit, the ship in which Admiral Byrd made his polar expedition is anchored in the south lagoon. The ship is a very interesting exhibit containing a number of relics of the polar expedition.

Further toward the north entrance of the Fair is the Hall of Religion with a number of interesting paintings and relics pertaining to religion and several antiques, including the famous Caliche of Antioch which dates back to about 50 a. d.

Back across the street from the Hall of Religion lies the large General Exhibit Hall which might easily take two or three days of a Fair visitor's time. Just a few of the interesting exhibits in the General Exhibit Hall are the \$5,000,000 diamond exhibit; including the 128 carat Tiffany, a miniature diamond mine, and crowns of former kings of Europe; the Gutenberg

print shop which dates back to 1488; thirty-six life-sized wood carvings of the passion play; miniature coal mines; a life-sized wood carving reproducing the famous painting, The Country Doctor; and thousands of other exhibits just as interesting. But time and space prohibit a detailed account. More Fair Features will be described next week.

The Fair is educational and worth anyone's time. You should see it.

### Every Conceivable Force WORKED TO TEAR THESE TIRES TO PIECES

As thirty-three speed demons careened and slid around the steep banked curves of the hot brick track, tires shrieked and smoked... break-neck speeds, 150 miles and more down the straightaway—tremendous centrifugal force tugging to rip the tread from the body of the tire. In fact, every conceivable force worked to tear the tire to pieces, but not one cord loosened—not one tread separated—and not a single blowout. What amazing proof of Tire Strength—Safety—Quality and Dependability.

Every one of the thirty-three drivers at the Indianapolis 500-mile sweepstakes chose and bought Firestone High Speed Tires. The fact that not one of the 132 tires failed is your greatest guarantee of the Extra Safety—Strength—and Dependability built into Firestone Tires.

The New Firestone High Speed Tire for 1934 is Safety-Protected on the outside by a wider tread of flatter contour, deeper non-skid, more and tougher rubber, giving you more than 50% longer non-skid mileage—Safety-Protected on the inside by eight additional pounds of pure rubber absorbed by every 100 pounds of cords. This additional rubber surrounds every cotton fiber inside every cord in every ply. This is accomplished by the Firestone patented process of Gum-Dipping.

### Now A TRIPLE GUARANTEE

- for Unequaled Performance Records
- for Life Against All Defects
- for 12 Months Against All Road Hazards\*

\*When used in commercial service, these tires are guaranteed for 6 months.

## Self-Serve Grocery

Wholesale And Retail  
FRIDAY AND SATURDAY SPECIALS

When you trade at the Self-Serve you save from 1c to 25c on almost every item. Why fool your money away? When a merchant can't meet the other fellow's price he usually squawks "quality." We do not claim to have the best groceries in Eldorado, but we do claim to have as good as money can buy. We never stress quality in our advertising. Our hundreds of customers who live in 8 different counties are proof of quality and price. Follow the crowd to the Self-Serve and save the difference.
