LIONS DISCUSS PLANS FOR ANNUAL RODEO

Discussion at the weekly session of the Lions Club on Wednesday centered around plans for the annual rodeo, to be held on July 25. Advertising for the rodeo is being designed, and will be distributed in this and neighboring counties in the near future.

Each member of the club was asked to write his ideas and suggestions as to the most practical and worthwhile program for the club during the year, and these suggestions will be considered by the committee chairmen at a special meeting to be held at the Baptist church Saturday evening, beginning at eight o'clock. The year's program and objectives of the club will be determined at this meeting, and will be presented to the members at the regular meeting next Wednesday.

School Next Week At Presbyterian Church

A daily vacation Bible school will open next Monday at the Presbyterian church in Eldorado. The school will be directed by Miss Martha Taylor of San Angelo, who has had special training in this type of work. The school will continue thru the next two weeks, and a large attendance is hoped for.

BRADY GOOD WILL VISITORS IN ELDORADO ON WAY TO SONORA

Between fifteen and twenty cars of Brady citizens will form a motorcade Friday to Sonora, where they will advertise the approaching July Jubilee and race meet at the Sonora race meet and rodeo. Friday is Brady Day at the two-day meet at Sonora. The caravan leaves Brady on Friday morning between six and seven o'clock, and will make short stops at Eden, San Angelo, Christoval and Eldorado. They will return home this afternoon via Junction, Menard and Mason.

PLANE FLOWN ENTIRELY BY WIRELESS SIGNALS DEVELOPED IN ENGLAND

The development of an airplane flown entirely by wireless signals has been revealed by the air ministry in England. Climaxing ten years of research, the "robot ships," without pilots, can do almost everything humanly guided craft can do. They have been successfully tested in secret during the past year.

Main limitation of the new type officially named the 'Queen Bee' is the restriction of its operating radius to ten miles from the controlling station. They can do better than 100 miles an hour and climb more than 10,000 feet. Equipped with floats instead of wheels, they have performed as successfully over water as over land.

While the robot planes thus far have been used only to sharpen the eyes of British gunners, airmen also expect to learn new facts from them regarding the vulnerability of airplanes.

Mr. and Mrs. V. G. Tisdale returned Tuesday from a visit at Hutto with their daughter, Mrs. D. Tinning, Jr.

RELIEF ROLL OF COUNTY REDUCED TO LOW LEVEL

Following a visit to this county by representatives of the Texas Relief Commission the first of this week, Van McCormick, local relief administrator, announces that there are at present only 18 on the relief roll in the county, and of these, 14 are classed as unemployable and are on direct relief.

During the past few weeks a total of 55 have been removed from the roll due to having secured employment, and nine others were removed this week by order of the state relief officials.

The relief roll for Schleicher county is now at its lowest point in many months. According to figures in the office of Mr. McCormick, the list contained 39 names at the end of June, 1934.

FARM CONTEST WILL TO ENHANCE RURAL VALUES

Widespread participation by Texas farm families in the Centennial farm and home demonstration contest will mean millions of dollars in enhanced values of Texas farms and better farming results on hundreds of thousands of acres records of joint stock land banks reveal. Officials of these banks joined with publishers, editors, life insurance executives, lumbermen and others Tuesday in expressing unstinted approval of the plan under which a fund that now has passed \$2,500 will be distributed in fifty-four prize awards to farm families residing along designated highways in nine districts and in the State as a whole in July, 1936.

A letter of commendation in endorsing the contest as a splendid idea for the improvement of conditions in the State was received from Harry L. Seay, president of the Southland Life Insurance Company and along with the letter was a \$50 contribution to the prize fund. A similar letter and \$50 inclosure was received from James W. Rockwell of Houston for the Rockwell Brothers Lumber Company of which he is president.

The plan of the contest conducted by the cooperative extension service of the A&M College of Texas through district and county agents was given warm approval by Frank A. Briggs, editor of the magazine Farm and Ranch.

"The contest is a splendid idea," Mr. Briggs said, "and the members of our organization including Frank P. Holland, president, and the rest of us intend to give it our support. Already I have written an editorial for July publication pointing out the benefits to be derived by the State and by our farmers from participation in such a contest. For years in cooperation with A. & M. College we have advocated better farm homes and more attractive surroundings as a means of achieving better farming generally. Farm homes are living places as well as places from which farmers make a living. Wherever farmers have improved their homes and there are hundreds of instances of that character all over Texas better farming has resulted to the benefit of the individual, the community and the State.

CHANGE MADE IN TIME OF WATER PAYMENT

In an announcement published elsewhere in this issue of the Success, the Interstate Public Service Company, owner of the Eldorado waterworks system, makes public a change in their system of charges for service.

The minimum charge of \$2.50 per month remains unchanged, but collection will be made after service is received, instead of in advance, as has been the custom in the past.

This change amounts to skipping a month in collections, and will return to the customers several hundred dollars formerly held to secure payment of bills.

RODEO AT SONORA TWO DAYS OF THIS WEEK

The rodeo season in Southwest Texas picked up speed this week when the two-day meet at Sonora got under way Thursday morning.

The first day was well attended, and today, the closing day of the event, will probably find a still larger crowd in the neighboring city.

Sale At Ratliff Store To Close Wednesday

The big summer sale which has been in progress at the Ratliff Store in Eldorado for the past two weeks will close next Wednesday, July 3, according to announcement from the store.

The sale has been a decided success, and many new customers and friends have been drawn to the Ratliff Store during its progress.

The people of the Eldorado trade territory are urged to visit this store during the remaining days of this sale and take advantage of the many unusual bargains being offered. Read their ad on pages four and five of this issue of The Success.

STOCKMAN URGES USE OF PEAR AS RATION

The prickly pear, the most common form of cactus in this section of West Texas, is a godsend to the ranchman and should not be cleared from a pasture unless it is absolutely "taking over the land," believes John P. Lee, widely known pioneer ranchman.

During the two years drouth which was conclusively ended only about two months ago, the prickly pear, with spines burned off, or ground up, saved many thousands of West Texas cattle, Mr. Lee recalls. He says the pear should not be cut and burned, as one can never tell when it will be needed as an emergency ration for livestock. It furnishes a good subsistence ration and is the one plant that can grow in the arid regions where others will not succeed.

That even the Russian thistle, known in this territory as the tumble weed, has a subsistence value, was proved during the recent drouth. It was pulled and prepared for livestock by dozens of big ranchmen when the rest of the plants failed to come thru. It proved a decent ration, particularly when a protein supplement

(See No. 2, Last Page)

CAUTION ON CODES NOW NRA'S POLICY

A policy of caution toward voluntary business codes was adopted by NRA today as possibilities of new NRA legislation at this session virtually disappeared on Capitol Hill.

After a conference with the federal trade commission, NRA warned its personnel against "actively encouraging" code submission, but simultaneously prescribed methods for offering "simple and inexpensive presentations."

Congressional leaders meanwhile had definite word from Pres. Roosevelt that in all probability, there would be no new legislation. This position prompted little official reaction at NRA, though some officials, known to be working on a bill, professed surprise that any final determination of policy had been made.

The president was represented as feeling a satisfactory method of meeting the supreme court's decision had not yet been found and that precedence would have to be placed on other legislation now before Congress.

This legislation included Wagner labor disputes bill, now in conference between the senate and house to reconcile differences; the Guffey coal stabilization bill before the house ways and means committee and the bill to preserve NRA labor standards in government contracts which is just starting its course through congress.

Efforts of the trade commission and NRA to work out a co-operative program were directed, in today's conference, "largely to consideration of the scope of permissible action" under voluntary codes, a joint commission-NRA statement said. A committee will be appointed to study this question further, but officials said there was nothing to indicate that a cooperative program would not be worked out.

"NRA must avoid premature action which will necessitate retracing steps to conform to a subsequent revised policy," NRA advised its personnel in a memorandum.

"If a structure of voluntary agreements is to be built up, it must be built solidly and without undue burden of time, energy and cost upon industry.

"At the present time, no definite and final program relative to procedure for and scope of such voluntary agreements has been formulated."

The submission of codes, it added, should not be discouraged and industry should be advised that although NRA can not act yet, information contained in the codes will be most valuable if simply presented.

"We feel that a genuinely constructive program will be evolved in the immediate future. Every effort will be made to expedite final decision," the memorandum said.

Mrs. Sam Roberts visited her children in Llano last week-end. She was accompanied by Mrs. Oscar Martin, her sister, Mrs. John Christie and her mother, Mrs. H. Claire.

Mrs. C. C. West has as her guests this week her daughter, Mrs. C. T. Womack, and son, of San Angelo. Mrs. Womack is historian of Mias Amigas club.

Read and use Success ads.

BRADY READY FOR BIGGEST CROWD YET AT BIG JULY JUBILEE

Brady, June 26.— Preparations have been completed for Brady's three-day annual July Jubilee and race meet and rodeo on July 3, 4 and 5.

A wide variety of amusements is offered the thousands of visitors who annually come to Brady for this event. Horse races and rodeo each afternoon, starting at two o'clock, will be the main attractions. There will be five running races daily, with thrilling rodeo features during the intermissions between races. A 12-stall starting gate will be used. One of the rodeo features will be a cowboy basketball game each afternoon, just preceding the races. This game is played on horseback, is thrilling and exciting, and offers an entirely new attraction to the people of this section. Plenty of horses will be on hand to make Brady's tenth annual race classic one of the best ever staged in this section.

No admission will be charged to the huge picnic grounds at Richards Park, where a wide variety of free entertainment will be provided for the Jubilee visit of July 2 the Queen of the Jubilee, speaking, free moving pictures and other amusements will be staged daily. On the evening of the Predatory Animal Division of Lee will be crowned at a colorful coronation ceremony.

Governor James Allred will arrive by airplane on the morning of July 3 to lead the grand opening parade of beautifully decorated cars and floats. The parade, featuring the Queen of the Brady July Jubilee and her duchesses, will move in royal procession thru the streets of Brady and out to the Jubilee grounds at Richards Park, where Governor Allred will make the opening address.

State Law Says Stock On Highway Unlawful

Of interest to the farmers and stockmen of this county is the new law passed by the legislature, prohibiting the grazing or wandering of livestock on the state highways. A penalty of not exceeding \$200 has been set for any person owning livestock who permits the same to traverse the highways unattended.

A part of the Act follows: "Prohibiting any owner or person having control of any horse, mule, donkey, cow, bull, steer, hog, sheep, goat, or any livestock, from permitting or allowing the same to traverse or roam at large upon the right-of-way of any designated state highway of this state, where same is enclosed by fences, unattended; providing a penalty and declaring an emergency.

Miss Inez Cobb has as her house guests this week Miss Gwendolyn Higginbotham, from Bronte, Mrs. Bruce Clift, Miss Dorothy Clift and Bruce Clift, Jr., from Robert Lee. They will be here during the Sonora rodeo and dances.

Mrs. Stephen Perner and children, of Ozona, are visiting her father, C. C. Doty, this week.

BIOLOGICAL SURVEY MAN IN COUNTY THIS WEEK

James Poore, field foreman of this county with county officials, the U. S. Biological Survey, was in Eldorado this week discussing predatory animal control work in

The county has for a number of years offered a bounty of one dollar for coyotes and fifty cents for cats killed in the county, but no bounty money has been called for in some time. It is stated that effective control measures and the increasing number of wolf-proof fences have practically made this section free from predatory animals.

Banquet For Men At Methodist Church

The regular monthly banquet for the men of the Methodist church of Eldorado will be held next Tuesday evening at 8:15, at the church.

Rev. P. S. Connell, pastor, invites and urges all men of the church to be present. An interesting program will be given, and everyone is assured of an enjoyable evening.

MIAS AMIGAS CLUB HOLDS ANNUAL MEET THIS WEEK

Members of the Mias Amigas Club, an organization of graduates of the Eldorado high school, are holding their annual session here this week.

The meeting opened Thursday morning, and will continue thru today (Friday).

A feature of the meeting was the noon luncheon each day at the West Texas Cafe. Members are present from many sections of the state.

WOOL INQUIRY FAVORED BY SENATE COMMITTEE

According to dispatches from Washington, the Senate agriculture committee yesterday authorized a favorable report on a resolution by Senators Adams of Colorado and Steiwer of Oregon demanding a Senatorial investigation of the production, transportation and selling of wool.

The resolution was introduced by the two western Senators as a result of widespread complaints from farmers and wool producers against the treatment they said they received at the hands of the wool dealers and brokers.

West Texans asking an inquiry into the transportation and sale of wool seek especially an inquiry into the sale of consigned wool in Boston this year.

TRIMBLE MURDER CASE TO FREDERICKSBURG

The case of L. E. Trimble of Eden, a former special ranger, charged with the murder last November of Wiley Tomlinson, Menard county commissioner, was transferred yesterday from Llano to Fredericksburg.

Trimble was tried last month at Llano on a change of venue from Menard, the trial resulting in a hung jury.

Date for the new trial was set as August 26.

Mrs. Ray Howland of Hext arrived in Eldorado Wednesday for a few days visit.

MOSQUITO CONTROL

Recent heavy rains in Ozona
have presented a problem that is
not altogether new to the city,
but one that has not presented it-
self in the last three or four years
—that of controlling mosquitoes.

Water standing pools in the
draws and in low places about
the city, in tin cans in back yards
and in various forgotten vessels
on every premise furnish the set-
ting for a quick scourge of mos-
quitoes. The dangerous little
pests have already begun to put
in an appearance in some num-
bers.

Residents should see that all
tin cans are drained, and water
holes in the neighborhood should
be oiled, thus killing the larvae.
Another factor in mosquito con-
trol that is often overlooked is
that of weeds. Mosquitoes do not
breed in weeds, as many think,
but tall, rank weeds often harbor
the insects during the hot part of
the day, giving them shelter
when otherwise they might ex-
pire or be blown away during the
daylight hours. Such shelter
keeps them in the vicinity of your
home, ready to redden the
of the family at night. Cut the
weeds.—Ozona Stockman.

The above advice applies not
only to Ozona, but to Eldorado
and every other town and com-
munity in West Texas. We are
faced with a plague of mosqui-
toes unless every citizen takes
prompt and thoro action to rid
his own premises of all possible
breeding and hiding places for
the pests.

IT'S A TOUGH LIFE!

The extreme of indolence was
observed in Sohora this week,
when a well dressed magazine so-
licitor "worked" at the curb in
front of the First National Bank.

Wearing dark glasses, proba-
bly to aid in his plan, Mr. Maga-
zine Solicitor beckoned to the un-
wary passer-by as if to inquire
something about the town.

The unwary one, ever anxious
to be helpful to the stranger,
stepped to the car door, which
was partially open. A card was
handed him and a sales talk for
an agricultural magazine was im-
mediately released.

What price earning one's daily
bread by the sweat of one's
brow!—Devil's River News.

The same "laborer" or at least
one using the same tactics, was
parked near the post office in El-
dorado for several days this
week. He called us over, "gave"
us a card, a pocket knife and a
magazine, and wrote out a re-
ceipt, all before we could get in a
word edgewise, and then looked
considerably peeved when we fi-
nally succeeded in making known
to him the fact that we were not
interested.

It looks like NRA now stands
for Next Republican Asset.

Everybody wants to back the
Constitution. Some want to back
it up, and others want to back it
down.

LONG'S LENGTH

On one issue raised in the day-
and-night filibuster recently con-
ducted by Huey Long, the aver-
age American will be inclined to
agree with the Senator from Lou-
isiana. When the "Kingfish" re-
quested that the vice president
make all Senators remain on the
floor and listen to his talk against
time, Mr. Garner countered with
his usual neatness. He said that
would constitute "cruel and un-
usual punishment." But after all,
why shouldn't the Senators be
forced to take it?

One of the purposes of the
"lame duck" amendment, ending
the short sessions of Congress,
was to end filibusters, which un-
der the old system usually took
advantage of the closing hours of
a session. This time the close ap-
proach of the expiration date for
NRA, June 16, offered Senator
Long his opportunity. Such a
chance will not occur often. Yet
talking against time is still too
common and frequent a method
of legislating in the upper house
of Congress. It may be said that
the filibuster has been used for
worthy purposes at times, that it
is a useful check on haste. The
Senate has not yet become so im-
potent as the ancient Polish par-
liament which required a unani-
mous vote. But the Senate has
its unanimous consent rule. And
its filibusters.

If Senators insist on having
legislation controlled by endur-
ance rather than reason, they
ought to have to listen. If the
country can stand it, Senators
should. But they wouldn't.
—Christian Science Monitor.

SAFE AND SANE

When folks first began to talk
about the importance of "safe
and sane" Fourth of July cele-
brations they had in mind the
deadly blank cartridge and its
companions in crime, the toy
cannon and the giant cracker.

Now, however, the great holi-
day danger does not lie so much
in tetanus germs as in reckless
motoring.

Time was when firemen were
held constantly at their posts,
and doctors and nurses ventured
not far from headquarters on the
Fourth of July. They knew by
experience that thousands of fire-
works victims would be the har-
vest of the day.

Today the attention of the hos-
pital authorities has been divert-
ed from firecrackers to automo-
biles. It is a shameful fact that
certain hospitals not far from the
dangerous sections of state high-
ways must now plan extensively
for the care of those injured in
motor accidents on days when
the roads are crowded.

Millions of motorists will be on
the highways over the holiday.
How many will land in hospitals
or morgues depends entirely on
how they drive.

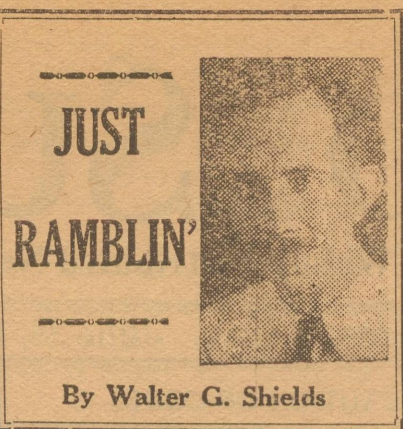

Trying to make a week's trip
in three days will be a favorite
diversion. If only those who thus
indulge were endangered, it
would be bad enough. Unfortu-
nately the reckless driver is a
peril not only to himself, but to
others.—Miles Messenger.

A lot of verdicts indicate that
after the jury gets the case, the
case gets the jury.

The next war will be fought at
eighty miles an hour. War al-
ways has exceeded the speed
limit.

When a man gets foolish about
the movies he's likely to be fool-
ish about lots of other things.

The fellow who expects to get
something for nothing may be
described as the nothing which
expects the something.

Before another issue of The Success reaches you, the United States will have celebrated another birthday, another Fourth of July, another anniversary of independence. But we are very much of the same mind as the well known humorist who a few years ago voiced his Fourth of July sentiments in the form of a question: "Independence — of what?"

And we'll let our patriotic outpourings on the subject remain unpoured. The whole has already been said, more briefly and to the point than we could or would say it.

Our attention for the Fourth of July turns toward the Jubilee and race meet at Brady. We were in Brady during the Jubilee for three years, and were too busy each time to see the big show. This year being located quite several miles from the scene of festivities, we hope to get over and take in at least the last day of the fun.

And while thinking of celebrations, don't forget the big rodeo to be presented here under the auspices of the Lions Club. It's going to be something worth going a long way to see, the Lions tell us.

And probably that's enough for the moment about celebrations of all kinds. If you are awakened these nights by the sound of violent hand-clapping, it isn't applause — it's just your columnist waging a losing war on the million skeeters in our bedroom.

Most of our farmer friends seem to have their crops pretty well in hand now, and are about ready for that next rain. Maybe we'll get it, maybe not. At any rate they have more moisture than in the past several years.

Our space is limited this week, which is fortunate, as our supply of ideas is even more so. We hope that maybe they'll come out somewhere near even. At any rate, that's all.

FOR YOUNG PEOPLE

Who are your three best friends?

Fix their names in your mind. Tell yourself that, at the present appalling rate of motor accidents one of these friends is likely, at some time in the future, to be killed or seriously injured in an automobile crash. Your own chance of being killed or seriously hurt in an auto accident has mounted so rapidly that it is now one to three.

And we are sorry to report that the very boys who are reading this editorial— boys of 18 and under—cause far more driving accidents than older people.

Let's do something about it. The worst year in history was 1934, with 36,000 deaths. But 1935 will be what we make it. When you drive a car, remember that most accidents come from too much speed. Remember, too, that driving after dark is twice as dangerous as driving by daylight.

When you are on foot, obey the traffic signals. If you cross against the light your chance of getting hit is three times as great as if you waited. If you cross in the middle of the block, your chance of injury is twice as great as if you had gone to the street intersection.

Remember, the safe way is the quickest way.—American Boy.

In soft coal, the going is al-
ways hard.

Before we condemn tinkers,
let us remember that genius has
to tinker a good while before it
makes a hit.

Good brakes don't amount to
much when the driver's head is
not that way.

If there are no arguments in
heaven, we wonder what the an-
gels do with their spare time.

**Refreshing Relief
When You Need a Laxative**

Because of the refreshing relief it has brought them, thousands of men and women, who could afford much more expensive laxatives, use Black-Draught when needed. It is very economical, purely vegetable, highly effective. . . Mr. J. Lester Roberson, well known hardware dealer at Martinsville, Va., writes: "I certainly can recommend Black-Draught as a splendid medicine. I have taken it for constipation and the dull feelings that follow, and have found it very satisfactory."

BLACK-DRAUGHT

Five Errors:

- A MAN —
- 1 Struck a match to see if the gas tank of his car was empty. **It Wasn't.**
 - 2 Patted a strange dog on the head to see if it was affectionate. **It Wasn't.**
 - 3 Speeded up to see if he could beat a train to the crossing. **He Couldn't.**
 - 4 Tried to repair a high tension electric line with his bare hands **He Couldn't.**
 - 5 Cut out ADVERTISING to see if he Could save money. **He Didn't.**

TEXAS FLOODS PLACE THOUSANDS ON RELIEF

More than 1000 families were left homeless and approximately 5,600 relief cases will be re-opened as a result of the devastating floods that swept thru Texas during the past two weeks. Tabulation of reports from relief administrators in 51 counties show that 6,130 additional families are in need of assistance as a result of the high water.

The survey showed 150 homes of relief clients destroyed and 753 homes damaged.

Some 300 houses of non-relief clients were destroyed and 1,500 houses damaged.

The bulk of the loss appeared to be in the counties along the Colorado river. Principal sufferers among the counties already reported are Travis, with 140 homeless and more than 600 homes destroyed or damaged; Bastrop, with 500 homes damaged, and a check-up yet to come from Wharton and Matagorda counties.

In Northeast Texas, Fannin county reported 300 homes damaged, and Bowie county reported 250 families temporarily homeless.

In the Hill Country, Kimble county reported 30 homes destroyed, 275 damaged, and 31 families homeless.

West of San Antonio, Medina county reported 25 homes destroyed, 275 damaged, and 45 families homeless.

Extent of the damage in Brazoria, Matagorda, McMullen and Cameron counties was yet to be determined. In the latter county a project had been rushed thru to permit 200 relief workers to aid in the reinforcement of strained levees.

Meanwhile, several thousand dollars had been sent to the 51 affected counties to be used in meeting the emergency. Adam R. Johnson, state relief director, said relief funds will be used in aiding certified relief cases. In addition, local relief agencies will supply budgetary labor for the general cleanup of public property and to repair and rebuild the homes owned by relief clients. Budgetary labor may also be used to rebuild and repair houses occupied by relief clients, provided the landlord will acknowledge receipt of such labor in lieu of rent for a proper period of time.

In accordance with recognized practice followed before the existence of the Texas Relief Commission, all other forms of disaster relief, including aid to non-relief families, are administered by the American Red Cross. H. F. Keisker, assistant to the manager of the midwestern branch, has established an office in Austin and has sent representatives into the affected areas of the state to meet the emergency.

It was pointed out by Mr. Johnson that families never before on relief whose present need is the result of the flood condition should apply to the Red Cross, and not to the county relief office.

HOME CANNING LEADS IN RELIEF PROGRAM

Austin, June 26.— With the aid of 78 rural home supervisors, Texas rural rehabilitation clients in May made rapid progress toward permanent self-maintenance, according to a report issued last week by the rural department of the Texas Relief Commission.

Home supervisors made 5,548 home visits, and interviewed 3,605 clients in county relief offices giving instruction in canning, gardening, and other features of home economy. These visits and interviews benefitted 14,515 different families, representing 70,377 individuals.

Outstanding was the home canning program conducted by the home supervisors in an effort to see that rural families provide themselves with sufficient food for next winter. From 3,683 gardens 21,005 quarts of vegetables were canned, in addition to 11,307 quarts of fruits and 294 cans of meat. The food supply was further enlarged by 1,743 quarts of preserves, 2,077 quarts of jellies, 715 pounds of stored vegetables, 269 quarts of pickles, and 20 quarts of kraut. All conservation of foods was done in the homes of the clients, special portable canners being carried from house to house by the supervisors for the purpose.

Surpluses of milk, eggs, and garden products were exchanged in many instances for cans, fruit jar lids, clothes, and other necessities.

On rainy days when full time could not be devoted to food conservation or yard improvement, women in the families devoted their energies to production and repair of mattresses, pillows, bed spreads, sheets, pillow cases and garments.

Yard improvements included cleaning, fencing yards and gardens, planting shrubbery and flowers.

In addition to the above pro-

grams, rural supervisors gave assistance in uses of food, planning of meals, refrigeration, budgeting, repairing equipment, care of clothing, and helped clients add the following items to their home equipment: cook stoves, utensils, sealers, tables, chairs, sewing machines, washing machines, beds, springs, mattresses, pillows and quilts, smoothing irons, tubs, and wash boilers.

SINGLE SALES EXEMPT UNDER SECURITY LAW

"I own a piece of royalty near an oil field. I want to sell this interest," one man recently wrote to the secretary of state. "I understand that oil and gas leases and royalty interests are classified as securities under the new Texas Securities Law. Will I have to register and get a license before I can sell this interest?"

In answering the question the secretary of state pointed out that isolated transactions are exempt under the terms of the law. But if a person is engaged in the business of buying and selling oil leases, royalty or other such interests, he must qualify as a dealer and in some cases as an issuer of securities. The lease 'peddler' must qualify.

In a single deal, it is not necessary to qualify under the Texas law.

The same applies to vendor's lien notes and other forms of commercial paper. However, if a person makes a practice of selling commercial paper, the transaction is not an isolated case and that person must qualify under the law. The simple rule is that single and individual transactions are exempt. Multiple transactions are not.

The New Orleans cop who arrested Huey Long's chauffeur for speeding was fired. Officers are expected to display judgment as well as courage.

INTEREST RATE CUT ON FARM LOANS JUNE 24

Further reduction in interest rates on new loans made on or after June 24 by the Federal Land Bank of Houston thru National Farm Loan Associations has been announced by A. C. Williams, president of the Federal Land Bank of Houston. This new interest cut completes a series of reductions which have lowered the interest cost of mortgage loans a full one per cent in the last three months.

On April 1 the bank lowered the rate on new loans from 5 to 4 1-2 per cent, and on April 10 reduced the rate from 4 1-2 to 4 1-4 per cent. The latest reduction of 1-4 of one per cent completes the one per cent cut in three months. Thus loans will be available at the lowest interest rates ever offered farmers by the Federal land banks or by any large lending agency.

"This is not an emergency rate," Mr. Williams said. "On June 24 the bank will begin to make loans which will bear four per cent interest during their entire life, with the exception of an emergency rate of 3 1-2 per cent for interest payable in the one-year period beginning July 1, 1935. This new, low four per cent rate is a direct reflection of the lower rate of interest borne by federal farm loan bonds sold by the federal land banks. It is in keeping with the policy of the Farm Credit Administration to

adjust the interest rate on new loans as the rates on their new bond issues vary.

"The interest rate on the Land Bank Commissioner loans will not be affected by the cut, and will remain at five per cent."

Some people seem to think that the only thing their head is for is to keep their ears apart.

Trouble results when one driver is in a big car and the other is in a revereie.

YOU ALWAYS GET BETTER QUALITY AT NO HIGHER PRICE WHEN YOU BUY A FIRESTONE TIRE WITH FIRESTONE NAME AND GUARANTEE

Tires may look alike on the outside, but on the inside where blowouts start, they are different. Firestone Tires are made blowout-proof by Gum-Dipping, a patented extra process which soaks every cotton cord and insulates every strand with pure liquid rubber. In fact, every 100 pounds of cotton cords absorb eight additional pounds of liquid rubber. This special process prevents internal friction and heat, the main cause of blowouts. No other make of tire is Gum-Dipped, yet you pay no more for Firestone blowout-proof protection than you are asked to pay for tires built without this patented safety construction feature.

The make of tires you buy for your car becomes a matter of vital importance when you realize that there were 882,000 automobile accidents in 1934 injuring 954,000 people and killing 36,000 and that 43,000 of these accidents were caused by blowouts, punctures and skidding.

Firestone High Speed Gum-Dipped Tires hold all world records on road and track for safety, speed, mileage and endurance. These records emphasize the undisputed evidence that Firestone Tires are not only blowout-proof but give greatest protection against skidding.

THERE ARE THREE QUESTIONS AND ANSWERS THAT WILL SOLVE YOUR PROBLEM OF WHAT TIRES TO BUY

1 "Will the tread give me the greatest traction and protection against skidding?"
Recent tests by a leading University show that Firestone High Speed Non-Skid Tires stop a car 15% quicker than any other of the leading makes.

For eight consecutive years Firestone Tires have been on the winning car in the dangerous Pike's Peak Race where a skid means death. This is undisputed evidence that Firestone gives car owners greatest protection against skidding.

2 "Are they blowout-proof?"
Firestone Gum-Dipped Tires have the most amazing records for being blowout-proof of any tires ever built. In the grueling 500-Mile Race at Indianapolis, May 30th, every one of the 33 cars was equipped with Firestone Gum-Dipped Tires. Kelly Pettilo won the race and broke the record over this 26-year-old rough brick track without tire trouble—in fact, not one of the 33 drivers had tire trouble of any kind.

Ab Jenkins drove his 5,000 pound car on Firestone Gum-Dipped Tires over the hot salt beds of Utah, 3,000 miles in 23 1/2 hours, at an average speed of 127.2 miles per hour, with temperatures as high as 120°, without tire trouble of any kind. These are most amazing proofs of blowout protection ever known.

3 "Without sacrificing these two important safety features will they give me longer mileage, thus making them the most economical tires I can buy?"
Firestone High Speed Tires not only give you more than 50% longer wear, but also lowest cost per mile. This is made possible by the tough, wear-resisting tread built with higher shoulders and a wider, flatter contour. This thick, rugged, scientifically designed tread is held securely to the Gum-Dipped cord body by Firestone's patented construction of two extra layers of cords under the tread. This is a special construction feature not used in any other tire. Unequaled mileage records by thousands of car owners add undisputed evidence of the longer wear and greater economy of Firestone High Speed Tires.

1 University tests show Firestone High Speed tires stop cars 15 to 25% quicker.

2 Gum-Dipped cords give greater blowout protection. Gum-Dipping is not used in other tires.

3 Wider, flatter tread gives more than 50% longer non-skid wear.

ALLRED ANNOUNCES INDUSTRIAL SURVEY

Austin, June 26.— Governor James V. Allred announced this week completion of plans for a far-reaching industrial survey designed to provide jobs, attract outside capital into Texas, and rehabilitate dormant and ruined industries.

The governor stated that Dudley P. South, of Houston, an industrial engineer of exceptional training, has already done several weeks of work in determining the feasibility and possibilities of the survey. Mr. South, a graduate of Rice Institute and Columbia University, and a close associate of Dr. Walter B. Pitkin, will head the survey.

Governor Allred pointed out that an industrial survey of Texas, with particular reference to getting men and women off the public relief rolls into gainful private occupation, had been recommended by the Democratic party in its convention last September.

"Inauguration of the Texas industrial survey," the governor said, "with Dudley P. South as director, offers almost unlimited possibilities for co-ordinating the public and private initiative to the end that jobs for the jobless will be provided and the entire industrial welfare of the state be promoted.

"We have already received assurances of co-operation from leading civic organizations, including chambers of commerce throughout the state, the University of Texas and Southern Methodist University, also from many public spirited citizens. An advisory council composed of prominent commercial and industrial leaders of Texas will be announced very shortly; also a co-ordination committee, composed of several men who have worked with Mr. South in the preliminary surveys and will assist him in furthering the work."

The governor released a statement from Mr. South, briefly outlining the objectives of the survey as follows:

"The function of this survey is to make available for all business enterprises such data as will enable them to expand their work, undertake new development, to hire more men, and judiciously invest more capital.

"There are many types of manufacture which require little

investment and use considerable hand labor. We are beginning our survey with this type in the foreground.

"There are also many major industries outside of Texas which do not have important branches in the state and which could profitably establish such branches. We hope to furnish them with data that will convince them of the wisdom of coming here.

"The survey will be entirely impartial with respect to the different cities and sections of the state, and will make its findings available to all. It invites the co-operation of all institutions which have been doing this sort of work on a local or regional scale, and we have already received assurance of help from many of these.

"National and world opportunities for Texas business enterprises will be studied. We hope to increase the scope of the survey, and this increase will come steadily if we receive the co-operation we have been encouraged to expect."

"Cut out the old dewberry and blackberry vines now," says J. F. Rosborough, Extension horticulturist. "Leave three or four of the new canes, and when they get about three feet high, top them. All this makes for increased production next year; also, picking will be easier."

Tomatoes are suckering too much, due to the recent rains. The thing to do is to pinch back all except three or four suckers, and when these have set a cluster of fruit pinch their tops off, so that all the strength of the plant will go into development of quality tomatoes.

Nervous, Weak Woman Soon All Right

"I had regular shaking spells from nervousness," writes Mrs. Cora Sanders, of Paragould, Ark. "I was all run-down and cramped at my time until I would have to go to bed. After my first bottle of Cardui, I was better. I kept taking Cardui and soon I was all right. The shaking quit and I did not cramp. I felt worlds better. I gave Cardui to my daughter who was in about the same condition and she was soon all right."

CARDUI

Thousands of women testify Cardui benefited them. If it does not benefit YOU, consult a physician.

FARM AGENTS KEEP UP WITH REGULAR WORK DESPITE ADDED AAA

College Station.— "There is little truth in the idea that AAA work, which has fallen on the shoulders of county agricultural agents has taken so much of their time that regular Extension work has suffered," George W. Johnson, Extension district agent of district 8, said last week. "On the contrary, the Agricultural Adjustment programs have fitted in so well with Extension work that the number of demonstrations has increased in many of the divisions."

Figures on demonstrations indicate that Extension work is being carried along at normal speed regardless of all the AAA work being done. The crop adjustment programs which have taken land out of cotton production have resulted in more feed crops raised, which have made a decided increase in demonstrations of raising hogs for home consumption. This crop adjustment has also effected an increase in beef cattle demonstrations, and introduced sheep demonstrations into the district.

Terracing demonstrations in 1931 totaled 541, while the plan

of work for 1935 shows that terracing demonstrations have more than doubled.

By denying the popular fallacy that the county agent's time is being taken up entirely by AAA or federal work, this district's plan of work drew comments from high officials of the Texas Extension Service.

Old railroad ties for posts with two strands of wire run between two and four feet above the level of the ground doubled the yield of berry vines in Marion county. The berries were trained to grow on the wires. The owner has been able to sell all that he grew, and is increasing his patch to an acre.

By doing extra pasture improvement work, such as mowing weeds, cleaning out brush, and sowing permanent pasture seed on 15 acres, a 4-H club boy in Titus county figures that he increased the grazing capacity of his pasture enough to give pasturage for five cows. He estimates that this additional pasturage was worth \$60 to him for the past year.

In American matrimony, man proposes and Reno disposes.

This country is in the position of a hostess who has so much food prepared for her family that she can't get it from the kitchen into the dining room.

One person out of every hundred in this country was injured in an auto accident last year.

The average production of a bee is not more than a teaspoonful of honey per year.

Drive far—drive fast —without a worry!

With Conoco Germ Processed Oil in your crankcase, you KNOW the strain won't hurt your motor!

Tests prove this new alloyed oil has 2 to 4 times greater film strength than plain mineral oils and resists heat better!

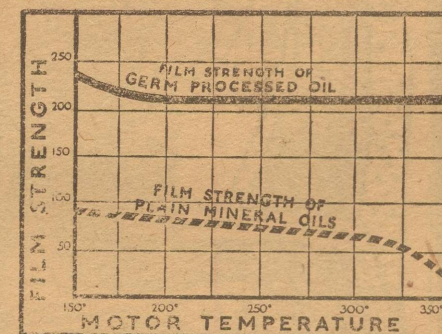

On July 4th or week-end and vacation trips, you'll want to drive far and get there in a hurry. And you don't want that nagging worry of "I wonder if this speed and heat will hurt anything in my motor."

You can't always be sure when you use plain mineral oils, for they have little film strength and oils over-refined by new cleansing processes have even less. Moreover, as motor heat goes up, these oils rapidly lose film strength.

Film strength is the load-carrying ability of an oil, the quality that keeps bearings and cylinders from wearing out. Lack of film strength results in costly damage.

You can drive without a worry when you use Conoco Germ Processed Motor Oil! It has 2 to 4 times greater film strength than any plain mineral oil. Heat does not lessen this advantage.*

Supervised road tests—over good and bad roads, at low and high speeds, in all kinds of weather—give practical proof that Germ Processed Oil pro-

CONOCO GERM PROCESSED MOTOR OIL PLAIN MINERAL OILS

***HERE'S THE PROOF**

Note that as heat increases, the plain mineral oils continue to lose film strength, but that above 225° (Minimum Summer crankcase temperature) Germ Processed oil's film strength is not affected by heat. Tests made with Timken machine.

ducts motors better. In every test, gravimetric measurement of motor bearings showed that Germ Processed Oil prevented wear far better than plain mineral oils. Tested in a fleet of cars equipped with the new alloy-metal bearings used in many 1935 cars, a high-quality plain mineral oil permitted 45% more wear on connecting rod bearings than did Germ Processed Oil.

Conoco Germ Processed Motor Oil is the first alloyed oil—alloyed, much as metals are, by adding concentrated oily essence to highly refined oil. It is the only oil made by the Germ Process. It is the oil with the "Hidden Quart" that stays up in your motor and never drains away!

Say "O. K.—Drain"—fill with Germ Processed Oil. Drive far—drive fast—without a worry!

MISSIONARY CIRCLES HOLD ALL DAY MEETING MONDAY

Circle No. 1 of the Methodist Missionary Society was hostess to Circle No. 2 with a barbecue luncheon served at an all-day meeting at the D. E. DeLong ranch home last Monday.

Executive reports and business were attended to in the morning. Luncheon, served at one o'clock, consisted of barbecue, potato salad, red beans, green beans, pickles, hot rolls, cakes and iced tea.

At the afternoon session a very interesting program was rendered by Circle No. 1 on "The Witness of Women in Methodism," with Mrs. G. A. Neill as leader and Mrs. O. E. Conner, Mrs. Ben Isaacs and Mrs. Reuben Dickens taking part.

About thirty-five members and a number of guests, including Mrs. Allen Palmer, Mrs. W. M. Bearce, Mrs. H. W. Smith, Mrs. Walter Shields and Mrs. Eldred Roach, were present.

Mr. and Mrs. Ernest C. Hill are enjoying a visit from Mrs. Hill's sister, Mrs. Ernest S. Goens, of Tyler.

Mrs. J. W. Walker of Plainview is visiting her parents, Mr. and Mrs. D. C. Hill.

An item in last week's Success stated that Miss Violet Lee Tuck underwent an operation in a San Angelo hospital. This was an error in our part, and should have read the Sealy Hospital in Santa Anna.

To carry out a color scheme of orchid and cream, Alice Mund, a 4-H bedroom demonstrator, papered her room with paper having a cream background and a floral design of orchid. She then enameled the bed, chest of drawers and top of vanity dressing table in an ivory enamel. She also painted the woodwork in ivory. She made the window curtains and drapes for dressing table and stool of solid orchid material. Her bedspread is solid orchid, having a design of natural color tufts.

"A little experiment worked in putting rollers securely in my bed," said Ouita Cheatham, Eldorado 4-H bedroom demonstrator. "I started to put rollers from an old table in the bottom of the bed posts, but found that there was nothing to hold the rollers in, so I found four spools that fit closely into the posts, and pushed my rollers up into the posts."

ADAMS NEWS

Mrs. L. T. Cave of Eden visited her son, Everett Selman, last Thursday and Friday.

SELF-CULTURE CLUB IN CALLED MEETING

The publishing of the year a report on the Girl Scout move-discussed at a called meeting of the Self Culture Club at the home of Mrs. L. M. Hoover, June 21.

Mrs. Joab Campbell, president, stated that the club would cooperate with the school board in opening a school for the colored children of the town.

Raising more funds for the county library was discussed and ment was given by Mrs. George and stored in a covered jar in ice Williams.

After the business meeting, 42 and other games were played.

Refreshments were served to Mrs. Bill McSwain, Mrs. J. E. Hill, Mrs. Jim Williams, Mrs. Reuben Dickens, Mrs. Williams, Mrs. Campbell, Mrs. O. E. Conner, Miss John Alexander, Miss Chris Enoch, Mary Hoover and Nell Campbell.

DINNER FOR FOUR

Veal Salad Escalloped Potatoes
Biscuits Strawberry Preserves
Vanilla Ice Cream
Chocolate Sauce
Loaf Cake, Unfrosted
Iced Tea or Coffee

Veal Salad

1 cup diced cooked veal
2 hard boiled eggs, diced
1-2 cup sliced cucumbers
1-3 cup diced celery
2 tablespoons chopped pimentos
1 tablespoon chopped onion
2 tablespoons chopped sweet pickles
1-3 teaspoon salt
1-4 teaspoon pepper
1-3 cup salad dressing
Chill ingredients. Combine and serve on crisp lettuce leaves.

Escalloped Potatoes

3 cups sliced cooked potatoes
3 tablespoons butter
3 tablespoons flour
2 cups milk
1-2 teaspoon salt
1-4 teaspoon paprika
1 tablespoon chopped parsley
Melt butter and add flour. After mixing, add milk and cook until creamy sauce forms. Stir constantly. Add rest of ingredients. Pour into buttered, shallow baking pan and bake 20 minutes in hot oven, 15 minutes below broiler.

Chocolate Sauce

2 cups sugar
2 tablespoons flour
1-8 teaspoon salt
3 squares chocolate, cut fine
2 cups water
2 teaspoons vanilla
1 tablespoon butter
Blend flour with sugar and salt. Add chocolate and water. Boil gently, stirring frequently, until a creamy sauce forms. Add rest of ingredients, mix well and serve. This sauce can be cooled and stored in covered jar in ice box for future use. Serve warm or cold.

Dinner Quickly Served

Sliced Baked Ham Potato Salad
Dill Pickles Radishes
Bread Plum Conserve
Sliced Peaches Sponge Cake
Iced Tea

In principle there is no difference between those who want to do a half week's work for a full week's pay, and those who demand full pay for doing nothing.

This year's world wheat crop is expected to be the smallest in nine years.

MRS. RAMSEY HOSTESS TO CONTRACT CLUB

Mrs. Seth Ramsey entertained the Wednesday Contract Bridge Club on Wednesday afternoon.

Seven club members and Mrs. Hollis Miller of San Angelo enjoyed the occasion. Mrs. Clarence Knight won high score for club members, and the hostess presented gifts to Mrs. R. D. Holt and Mrs. Miller.

Mr. and Mrs. W. B. Terpening and son, Billy, are visiting her mother, Mrs. T. W. Johnson. They will return by way of Colorado and New Mexico.

WE LIVE AGAIN

Protect your Crops

Crops will soon be at the point where a hail-storm can do costly damage. Don't take a chance on losing your year's work, or having to start over with nothing to show for your early crop. Hail insurance costs little, and gives you positive assurance against loss if a storm strikes your fields. We are writing hail insurance for many farmers in this county, and would like to give you information on how cheaply you can be protected. Come in and talk it over when in town.

RURAL WORK IN TEXAS SEVERED AS STATE UNIT

Austin, June 27.— Adam R. Johnson, state relief director, today announced complete severance of rural rehabilitation work as a function of the Texas Relief Commission. This step was ordered effective June 30.

He said the work would be taken over by the Resettlement Administration, and employees in the state rural department would become federal workers. Harry L. Hopkins, federal administrator, ordered transfer of all funds and inventories of goods and chattels to Texas Rural Communities, Inc., the holding corporation for the rural department.

V. R. Smitham, general manager of the rural program for the state agency, will hold a similar position in the new set-up. Location of the administrative offices was uncertain, but Dallas, Waco and College Station were under consideration.

Johnson said responsibility for rural relief cases not accepted for rural rehabilitation prior to May 31 would remain with the state commission until they were either dropped from the rolls or accepted on new works projects.

FARMERS TO ARGENTINA

Jose Castells, governor of the Argentine Chaco territory, said this week that within the next three months he will visit the southern United States to study a project for bringing a number of American cotton farmers to the Chaco.
