## Kerrville Hospital To Be Dedicated Sunday Afternoon

The Sid Peterson Memorial Hospital, now nearing completion in Kerrville, will be formally opened at 2 p. m. on Sunday, July 3, according to an announcement by the Hospital Board of Trustees.

People of the Hill country and others from all over Texas will be invited to attend the opening program and to inspect the million-dollar, 55-bed hospital. Patients will be admitted beginning about July 11.

The Sid Peterson Memorial Hospital is the first undertaking of the Hal and Charlie Peterson Foundation, a non-profit corporation dedicated to humanity. The Foundation was formed in 1944 by Hal and Charlie Peterson, prominent Kerrville businessmen, as a means of returning something to the community where their enterprises have been successful.

Born on a ranch near Kerrville, the Peterson brothers are now owners of the Kerrville Bus Company, the Peterson Garage and Auto Company, several ranches, a part interest in a bus manufacturing company in Ohio, and various other businesses.

The two brothers gave the money for the Foundation, which was incorporated as an institution "limited to and exclusively for public charitable or educational purposes." Its charter specifies that no profit shall go to any individual or private shareholder, but that it will operate on a non-profit basis.

The Petersons chose the hospital as the Foundation's first project because of the need for more medical facilities in the Hill country. And after long planning, they devised a means of making the hospital self-supporting for all time on a non-profit basis.

Friends here are expecting Mr. and Mrs. George Barnett of Kilgore visit here on their vacation. They had planned to be here this week but postponed the visit because of illness of their son.

## Texas Veterans Free To Select Privately Owned Land Tract For Farm or Ranch Home

By BASCOM GILES  
Commissioner of the General Land Office  
(Editor's Note: Second of a series of articles on the Veterans' Land Program.)

The recently enacted legislation implementing the Texas Veterans' Land Board will be the means of making the dream of thousands of Texas Veterans for a farm or ranch home of their very own, come true.

One of the most attractive features of this bill is that section which permits a veteran to personally select a tract of land suitable for agriculture or grazing held under private ownership in any sector of the State. It might be owned by kinsmen or by a corporation—it matters not to the Board. What will matter to the Board will be that the veteran feels reasonably sure that it will serve his purpose and needs; that it must have at least half of the mineral rights unencumbered and that the land is worth the asking price.

After the veteran has made his selection his next step will be to furnish the Board with a complete abstract and description of the property so that it may be appraised. At the same time he files his application with the Board, he will pay to the Board his initial down payment of NOT less than five per cent of the total purchase price. In the event the application is rejected the veteran's money will be refunded and he will be free to make another selection.

After the Board has appraised the land and approved the application for the loan for the balance, the applicant will be required to execute an on or before note for four years at three per cent interest for the balance. After receiving his contract of sale he will be entitled to take possession.

## Two Schleicher Wildcats Begin Drilling This Week

### Judgment Necessary In Use of Credit, Says Mrs. Jack Hext

Little Orphan Annie made a profound statement a few years ago, in one of her un-childlike philosophings. "Banks," she said bitterly after trying to borrow a million dollars, "only lend money to people who have money!"

Annie was only partially right, points out Mrs. Ernestine Hext, manager of the Eldorado Retail Merchants' Association. Banks lend money to people "who have money" but their most important requirement is good character.

"The last depression taught businessmen a great lesson," Mrs. Hext said. "Many folks out of work or with incomes drastically reduced proved that their word was 'as good as gold.' Truly, credit is a person's most valuable asset." Mrs. Hext quickly pointed out, however, a recent survey by Professors Henry C. Langer, Jr., and Roland L. Warren of Alfred University, (Alfred, N. Y.) shows what popular delusions exist regarding the use of credit. Professors Langer and Warren are engaged in an area survey around Hornell, New York. They have studied local unemployment and the mental attitudes of the unemployed. Figures given to the Associated Credit Bureaus of America, the trade association to which Eldorado Retail Merchants belongs, show the unemployed now to be 3.2 percent of the total population.

In a city the size of Eldorado, this figure would mean that approximately 65 would be out of work. While this is not dangerous under present conditions, a consistent increase in unemployed folks—which means unpaid bills—would affect business, and in fact everyone else. Mrs. Hext says the Alfred survey shows that unemployment's repercussions are felt in the social, economic, and even religious life of a community. If workers are unable to maintain the same scale of living, they can't meet current living expenses either, certainly not doctor, hospital bills and even church obligations.

The attitude Professors Langer and Warren found among the unemployed shows a definite need for consumer education. Of those interviewed, 76 percent thought they could use credit "to weather the financial storm of unemployment."

Mrs. Hext points out that customers should not feel it is wise to obtain credit without a reasonable idea of when they can pay. Local merchants and others who extend credit must not go too far in permitting customers too much latitude beyond agreed-upon terms.

Let's go back to Little Orphan Annie's statement. Banks, merchants and other credit granters are prepared to serve you in emergencies, but it is best for you to discuss the matter frankly with your banker, grocer, gas company, department store—and, of course, your doctor, dentist, or hospital if you have unexpected illness.

Usually any type of credit granter will make special arrangements for people who are unemployed or in some type of financial embarrassment. But too liberal a credit policy, Mrs. Hext emphasized, at times causes merchants to go broke.

Substantial credit losses and business failures add on to the cost of the good things available on credit. Intelligent credit-granting, however, has so far kept these losses at an infinitesimal low of one-tenth to one-third of one percent.

Considering these points, then, Mrs. Hext says Alfred University's survey indicated that every adult should find out about credit privileges and their accompanying obligations. "It is terribly important," she added, "that the use of credit and the necessity for maintaining a good credit record be explained in every family. The young folks of today build the homes of tomorrow."

Billy Oglesby and Ford Oglesby, Jr., attended a wedding at Ozona Wednesday.

Mr. and Mrs. Sam Lowe and Richard Lowe and family of Menard spent the day Sunday with Mr. and Mrs. Sam McGinnes.

Drilling activities in Schleicher county are taking a sudden spurt as crews move in for two wildcats in the Ft. McKavett and Henderson Ranch localities, and apartments and houses are again at a premium. Two rotaries were moved in during the week end, and a number of families have already moved to this city, and others are expecting to arrive in the coming week. Both Eldorado trailer courts have a number of trailers in their parking areas, and some families have moved to apartments or houses. Two Wildcats

Crews have moved in the rotary for Southern Minerals Corp. of Corpus Christi No. 1 J. F. Webster, 1980 feet from south and 660 feet from west lines section 2, block 8, TW & NG survey. The test is near Ft. McKavett in Schleicher county, three miles from the Menard county line. Contract depth is 5,000 feet, with Guy Mabee of Midland drilling.

Morris and Scherck of San Angelo No. 1 T. R. Henderson was down to 240 feet yesterday on their wildcat, 330 feet from south and east lines of SW 160 acres, sec. 3, block V-28, five miles northeast of the Cooper Page field. The wildcat is a farmout from Globe oil and Refining company. Theck and Cross are drilling this wildcat with rotary.

### Shallow Offset

This test, the first shallow test to be put down in that neighborhood for some time is 467 feet from S & W lines Sec. 4, M, GH & SA. The location is diagonally located between the Lovelace producer and the southwest corner of the block.

### San Angelo Men Visit Bible Class Here, Give Program

A delegation of men from San Angelo were special guests at the Business Men's Bible Class Sunday in the Memorial building. The visitors, who are members of a similar organization in San Angelo, gave the entire program for the service.

Charlie Poulter was song leader and Ralph Masterton was pianist. Poulter also sang a solo, and Masterton accompanied Jake Houston, violinist, who played a special number. Pat Murphy spoke to the group on "Christ the Giver of Peace." Rev. F. E. King of Eldorado read a poem on the Father's Day theme.

There were about a hundred men present for the class. At 10:45, the group scattered to the various churches over town and assembled again at 12:30 with their families for a barbecue dinner given by the Eldorado Bible class. Special music and a group song service concluded the meeting.

Members of the class feel that the service stimulated attendance at all of the churches, since all of the men present attended church at the 11:00 hour.

**COUNTY AGENT PRESENTS GUIDE FOR SPRAYING LIVESTOCK, DISCUSSES DDT SPRAYING OF MILK COWS**

The best, safest and most economical all-round spray recommended for ticks, lice, and hornflies is DDT and benzene hexachloride, according to W. G. Godwin, county agent. The formula is: 8 pounds of 50% wetttable DDT and 4 pounds of 6% wetttable gamma benzene hexachloride for each 100 gallons of water.

Since Benzene Hexachloride comes in varying percentages of gamma content the following table may be used:

% Gamma To Be Used	No. Pounds Per 100 Gal. Water
5%	5
6%	4
8%	3
10%	2½
12%	2
25%	1
33%	¾

Remember this: This spray of DDT and benzene hexachloride should not be used on dairy cattle or beef cattle to be slaughtered within 30 days.

Calls continue to come in to the county agent's office about DDT being poison to milk cows. The story briefly is this: so far as statistics go no person or animal has ever been killed with DDT when used as a powder in water. However, since milk is such an important food to the American public, precautions are being used.

Spray your milk cows with methoxychlor, which is non-toxic.

Do not give DDT up as a spray on beef animals, and sheep especially if BHC is added. BHC is added for the quick kill and to kill lice eggs and the pupae of the sheep tick. The DDT has staying power in the form of a residue which will control the insects mentioned for 14-21 days.

Stock 1029 is still the recommendation for the ear tick due to its staying power.

DDT-BHC spray definitely assists in controlling ear ticks when sprayed on the neck and shoulders of an animal.

Rotenone as a dust, paste or spray is recommended for the cattle grub.

**EASTERNER VISITS BUDDY**

Harry McCreary finds life in the Southwest quite different from his daily activities as an employee in a plastics factory at New Brighton, Pennsylvania — but an army buddy is a friend for life and he has enjoyed spending the past week with L. E. McCalla, who was with him at Camp Clayborn, La. and later in the Philippines during the war. McCreary brought with him his wife and daughter Helen. While their present employment is widely different, the men found it easy to renew their old friendship, and the two families spent a pleasant week visiting at the McCalla home in Eldorado. They expect to leave for the East Friday.

Jess P. Cross, drilling contractor, and his wife and young daughter, have moved to the Scott rent house. Their son, J. E. Cross, also employed by Theck and Cross, and his wife have rented a Davis apartment.

**Gilmer-Aiken Bill Effective Soon in Texas**

AUSTIN—State Auditor C. H. Cavness, under Senate Bill 116 which was signed by Governor Jester recently, given the job of temporarily performing the duties of Commissioner of Education thereunder, stated that plans are being made to put the Act into effect just as soon as possible. "Getting the public school Foundation Program financing section of the Gilmer Aiken laws under way will be a rather large task, which I did not ask for," said Cavness, "but with the cooperation of everybody involved I am sure we can do it and on time. In a few days we will have set up a corps of competent public school administrators, tax men and program organizers who will work with the School Boards, the County and School District Superintendents, and the School Tax officials, and will get the necessary information into the hands of all concerned with little delay."

Cavness announced that the director of the State Auditor's Foundation School Program Act division will be L. P. Sturgeon, on leave from his position as superintendent of the New Boston, Texas, school system. He stated "We are fortunate in securing Mr. Sturgeon's services—he has been in school work for many years, having been superintendent at New Boston for the past eight. He is past president of the State Association of Equalization Schools, is a director of the Texas Association of School Administrators, and is a member of the Executive Committee of the Texas State Teachers Association. He received both his BA and MA degrees at East Texas State Teachers College of Commerce."

J. Warren Hitt, personnel and research director on leave from the Austin Public Schools, will be assistant director; Wm. A. Harrison, now First Assistant State Auditor, will be Audits Supervisor; and P. E. Hutchinson will head the program review section; Cavness also announced, stating "All of these men have excellent qualifications for this work. For several years Mr. Hutchinson has been with the Joint Committee of the Legislature on the State's program of Equalization and Transportation Aid to schools."

Further announcements will be made soon of additional key personnel and of procedures to be followed in putting the State's new public school financing program into effect, Cavness said.

**Tonic Can Help Yellowing Shrubbery**

Schleicher county gardeners have had little trouble this year with the usual summer problem, drouth. But many have been puzzled by the yellowing of shrubs, shrubs which have had plenty of water.

If your green-leaved shrubs have turned yellow about this time of year, give them a little tonic — tonic in the form of a quarter to a half pound of copperas and one pound of sulphur for every large shrub or small tree.

This copperas-sulphur tonic will turn the leaves green again, like they should be. Fertilizers mixed with the soil at the same time also help prevent further yellowing of leaves.

Here's something else that will help keep the plants going this summer. Spread a vegetable mulch around the shrubs to keep the roots from drying out when the summer temperatures soar. Mulch holds moisture in the soil, making it available to plant roots. The mulch, spread over several square feet several inches thick, will gradually work itself into the ground.

Compost, grass cuttings, straw, or any kind of decaying plant material are all good. Grass cuttings furnish nitrogen and other plant foods. They also make the soil acid, making iron more available for plant use. This helps the leaves stay green.

Luke Thompson of Borger visited here last week with his wife and children.

J. A. Jeffrey accompanied relatives to Eldorado from Brady, and is spending a few days here.

Mrs. Ora Davis has gone on a vacation trip to Louisiana, where she will visit relatives, and on her way home will stop in Denton to visit her daughter, Catherine, who is attending school at NTSC.

Mrs. Ben Hext spent the day Friday in Brownwood with her father, W. O. Turner, who was celebrating his 94th birthday.

**JUNCTION METHODISTS COMPLETE NEW BUILDING**

Opening of the new 15-room educational building, apex of the \$25,000 building program of the Junction Methodist Church, will initiate the use of the building and the fiscal year's program, Sunday morning, and in the afternoon open house is to be held, Dr. J. E. Wiedeman, building committee chairman, said this week.

The new educational building culminates the building program which got underway last fall with the construction of a master bedroom and bath at the parsonage and included remodeling of the annex building and class rooms in the church basement. Walks have been built and carpet grass is being set out.

The L-shaped building adjoining the church on the west covers about 3500 square feet. It is concrete tile construction with plastered walls, Celotex ceiling, and casement windows. Work on the new building started about February 1st. —Junction Eagle.

**MIDLAND CONTRACTOR GETS IRAAN HOSPITAL JOB**

The Midland firm of E. D. Porter, general contractor, filed a low bid of \$62,507 for the general contract on construction of the new Iraan community hospital when the Pecos County Commissioners Court met Monday to receive bids, and a prompt start on the job was expected.

Revised plans prepared by the firm of Wyatt C. Hedrick, which also is architect for the Memorial Hospital at Fort Stockton, provide for a masonry structure with 15-bed capacity, and complete facilities to serve the Iraan area.

The hospital is designed in a modified T-shape, measuring 96 feet across the front, and extending back 36 feet on its entire length. An additional space of 30 by 31 feet at the rear provides space for modern operating and delivery rooms and storage.

Two private bedrooms are provided, along with five double rooms and one 3-bed emergency ward. Office space is also provided for a dentist to serve the community.

The construction and equipping of the hospital will be financed with \$50,000 from the original \$300,000 county bond issue, a \$25,000 fund donated by oil companies operating in the area, and by a part of maintenance and operating funds provided in county tax levies. —Fort Stockton Pioneer.

**DISCOVERY OF POLIO VICTIM SPURS CLEAN-UP AT SONORA**

Although spraying, fogging and other cleanup operations had started here several weeks ago, Sonora was faced with its first polio case of 1949 Wednesday when Margarita Romero, eight-months-old daughter of Mr. and Mrs. Guillermo Romero, was diagnosed by Shannon Hospital doctors as having polio. The Romero family resides across the street from one of the Elliott School auxiliary buildings. Romero is a shearer.

Meanwhile city spray and fog units redoubled their efforts to give the city a complete DDT bath after the last rain. City officials started the town early this week inspecting septic tanks, outdoor toilets, cesspools, places where livestock is kept, and other locations where flies and mosquitoes are likely to breed.

One of the worst problems is the dump ground about three miles out on the Del Rio highway. Carcasses, garbage, and other refuse are indiscriminately dumped on these grounds and the situation becomes worse each day. The city had fogged and sprayed with DDT repeatedly and Wednesday poured oil and kerosene on the refuse and burned it. Members of the Lions Club will discuss a permanent solution to the problem next Tuesday. —Devil's River News, Sonora.

**EDEN GRAIN HARVEST SLOWED BY RAINS**

The weather continues to be the principal handicap to both harvesting and shipping of grain out of Eden. At intervals of every two or three days, thus far, showers have interrupted the influx of the crop, but in spite of these delays, Santa Fe agent J. E. Greer reports 27 cars of wheat and 8 cars of oats already shipped through Tuesday, with 12 more cars spotted and being loaded for shipment Friday. There are about 14 cars stored in the elevators here.

Reports indicate that there is a considerable amount of grain sacked in fields that are too wet to get trucks into for hauling it out, and lots of this is being dried out before being brought to the car. —Eden Echo.

**ROAD BOND ELECTION CALLED IN REAGAN COUNTY**

Reagan County voters are reminded of the road bond election which is scheduled for Saturday, June 25. The proposition calls for the issuance of \$100,000 in road bonds for the purpose of constructing a hard surfaced road to the Benedum Field. Voting will be at Big Lake, Stiles, Texon, North box and Reaganview box.

The proposed road, meeting the approval of the State Highway Department, will be designated as a state highway. Reagan County will furnish the right-of-way and 75% of the construction cost while the state will assume the remaining cost and the maintenance of the road. Tentative location of the road has been placed in the west part of the county beginning on Highway 67 near Texon and extending into the Benedum Field, an approximate distance of 10 or 12 miles. **SCHOOL BOND ELECTION**

All three issues in the school bond election, held Tuesday at the City Hall, carried approximately 4 to 1. About 155 votes were cast, but several of the ballots were mutilated, the election officials announced.

The election resulted in bonds amounting to \$275,000, according to Supt. G. R. Day.

Mr. Day said, "It is our hope and belief that this sum will be enough to build a new grade school building and cafeteria and buy furniture for the school."

The school board plans to let the contract for the building within the next 30 days. It is hoped that construction will get under way by August 1, Mr. Day concluded. —Post Dispatch.

**CUT DOWN GRAIN LOSSES BY PROPER STORAGE**

Those tiny insects in your grain bin may be small, but they do a tremendous lot of damage to stored grain. That's the word from the USDA Bureau of Entomology and Plant Quarantine.

The first place to start getting rid of them is right inside the bin itself. By doing a good job of bin cleaning, and afterward spraying with 5% DDT before the newly harvested grain is put in, you can go a long way toward killing out the hold-over infestation. Also, you're giving the new grain a chance to escape damage.

Dr. H. G. Johnston, head of the Texas A. & M. College department of entomology, says these tiny insects get one out of every eight bushels of farm stored grain in Texas. Missouri loses one bushel in ten, according to 1948 figures. But in the same year, the national loss average to insects was one in twenty. So, Texas is practically at the top of the "high loss" list.

Entomologists point out that grain losses can be lowered quite a bit by harvesting the grain as soon as it's dry enough for safe storage and by storing it in weather-tight bins that have been made insect free by a thorough cleaning and spraying. —A & M Extension Service.
