Don'ts Listed On Child Labor

Some of the important "don'ts" for employers of Texas on the employment of minors during the summer vacation period have been listed by the Department of Labor. This advice is for employers subject to the Fair Labor Standards Act (Federal wage and hour law): Don't permit children 14 and 15 years old to work more than 40 hours a week when school is not in session, or more than three hours a day and 18 hours a week when school is in session. Don't permit children 14 and 15 years old to work between 7 p. m. and 7 a. m.

Don't forget to get employment and age certificates and keep them on file. Don't forget to pay minors at least the minimum wage set by law, and time and a half for overtime after 40 hours in any work week.

If the firm is working on a contract under the Walsh-Healey Act, employers should not hire boys under 16 or girls under 18 years of age to work on such contracts, or pay them less than the minimum wage and overtime.

H. Sweatt and Palmer West were appointed as a committee to determine whether the club would have the annual bit-terweed pulling this year or not.

MRS. SIMPSON BURIED IN LOCAL CEMETERY

Mrs. Jennie Simpson, 65, a former resident of Eldorado, died Friday afternoon in a San Angelo hospital following a long illness. Funeral services were conducted at 10 o'clock Monday morning from the Robert Massie Funeral Chapel with burial in the Eldorado cemetery following.

Mrs. Simpson had lived in San Angelo for the past 30 years, and at the time of her death made her home with her son, Davis Simpson.

Surviving in addition to her son are five brothers: Tobe Whitley of Montell, Pete Whitley of Christoval, Marion Whitley of Menard, George Whitley of Mercury and J. A. Whitley of San Angelo; and two sisters, Mrs. Lela Hill of Lockhart, and Mrs. Sallie King of Mason.

JOHN SIDNEY WILLIAMS TO MOVE TO PYOTE

John Sidney Williams and family will leave Eldorado June 28, for Pyote, where he will be a clerk-typist at the army air base. He expects to take Civil Service exams as soon as they are given in this classification to obtain Civil Service rating. The house which he built here last year has been rented partially furnished to a Magnolia employee, who will occupy it when their Seismograph crew moves to Eldorado from Big Lake. It is not known as yet who will take Williams' place at Ratliff's store.

NEW FORDS ON DISPLAY HERE TOMORROW

An interested public will have opportunity Friday to see the new Ford, on the showroom floor at Charlie Trigg Motors. Two sedan cars, a two-door metallic maroon 8 and a four-door metallic blue 8, arrived in Eldorado recently and were unloaded "in secret", to await June 18, when Ford dealers throughout the nation will show their models. A final polish job tonight will prepare the cars for their triumphal trek to the showroom—where they will be on display all day Friday.

Sharing honors with the new sedans will be two other late Ford arrivals: two 2½ ton F7 trucks, which will be sold soon. Mr. and Mrs. Charlie Trigg are extending a cordial invitation to all, to attend the showing of the much-publicized new Ford. Improvements Made

Economy of operation has been increased up to 10 per cent improvement in gasoline mileage for the new six-cylinder engine and the extensively redesigned V-8. Both are offered as power plants in all Ford models. Other engineering features result in better performance and longer engine life.

New standards of safety have been set in the rugged construction of the chassis and body. The box-type frame is of all-welded construction. Although the frame is lighter, there is 59 per cent more rigidity when combined with the body.

Steering has been greatly improved. The new Ford may be guided by a minimum of effort even under severe wind conditions. Road shocks have been minimized. This is the result of a newly designed linkage in which the pivot point of the tie rods is on the same center line as the wheels.

Engineering changes in the engines, some of them already mentioned, contribute to smoothness of operation. These include the new cooling system, intake manifold, redesigned combustion chambers and improved crankcase ventilation system as well as other features.

The 114-inch wheelbase, convenient for parking and in moving through heavy traffic, has been retained.

BUILDING PROGRESSES

Workmen are preparing to build forms for the floor of the county recreational building, and in 10 or 12 days will be ready to start tile work, report county officials.

Mrs. Perry Mittel and Wallace Joiner returned Monday from Lampasas where they attended the funeral of a cousin, Teddy O. Craft, who was killed overseas during the war.

Accord Reached In Gas Controversy

Expansion of gas and water facilities in the city of Eldorado is seemingly assured, with promise of a more adequate gas supply in Eldorado, and completion of the city's new water pump.

The city's gas problem has been dropped on the desk of the State Railroad Commission, as the result of a meeting between Eldorado's city fathers and Cooper Gas officials last week. Present at the meeting were Cooper Gas Company officials and attorney of San Angelo, Mayor Jess Thompson and City Gas Manager Palmer West.

Cooper Gas Co. has agreed to build a new line from the Page field to Eldorado, a distance of about 12 miles. The new line will probably be of 4-inch pipe, a size which, it is generally agreed, would be adequate. The present line is composed partly of 2-inch pipe, and partly of a smaller pipe with 2-inch outside measurement, the equivalent of 1½ inch.

Settlement of the problem is assured with agreement of Cooper Gas Co. to leave setting of a fair gate price with the Railroad Commission. The city agreed to pay the rate set by the commission, and Cooper agreed to accept the rate.

The total number of gas meters has been steadily growing, with

the city's growth in population. Because of increased consumption and inadequate piping facilities, the gas supply has been abnormally low in winter, especially at time of peak consumption during coldest weather.

The city is now encouraged to increase consumption further by making a survey this week of potential gas users in Little Mexico, with the view to piping gas through the streets of the Latin American settlement in areas where the demand will justify the expense. Pump Starter Installed

With installation of the new automatic starter switch on the new water well pump Tuesday, the project of installing a new pump for the city's water well number one is entirely completed.

Acidizing of well no. 1 in preparation for installation of the pump was done in March. Purchase, delivery and installing of the pump has occupied attention of city officials through the spring and early summer months.

By tripling production of well no. 1, this water, with that produced by well no. 2, will assure an adequate supply to take care of average growth for at least two years. Both wells supply plenty of water, officials state.

RECREATION PROGRAM WELL UNDER WAY

Interest is growing in the summer recreational program, according to Mr. and Mrs. Wilburn Currutt, directors. The program has been under way for two weeks now, with grade school and high school pupils participating in a varied program of sports and games.

The competitive spirit has been aroused with the lighting of the grounds, to provide contests between various teams at all age levels. Of especial interest are the volley ball games and horse shoe and washer pitching contests.

Attention of grade school children is called to a change in time for their play night. The hour is now 4:30 instead of 5:00 on Monday and Thursday evenings for their play period, which is held on the school yard and in the gymnasium. Tuesday and Friday afternoon, the grade school children are meeting at the school at 3:00 to go swimming.

The high school play night is on Monday beginning at 7:00. Monday night, June 21, a horse shoe pitching contest is scheduled, with a prize for the winner. There is also a lighted outdoor volley ball court which should interest volley ball fans.

Other games available to both groups at the play period are archery, badminton, tennis, washers, shuffleboard, box hockey, and table tennis.

Also on the high school calendar are swimming on Tuesdays with the group meeting at the school at 7:00; and a trip to San Angelo on Thursdays for skating, movies, and bowling, the group meeting at the school at 7:00.

Washington News Letter

By Cong. O. C. Fisher
Preparedness Advances

On the heels of a warning from General Omar Bradley that there is a "plausible possibility" of a war with Russia, the House last week appropriated \$6½ billion to operate an expanded Army and Air Force in the fiscal year 1949. This brings the total 1949 defense costs to \$13.3 billion, since Congress already has granted \$3.2 billion extra for Air Force and Navy plane procurement.

General Bradley pointed out the Soviets have an armed force of four million men and 14,000 planes. This, he said, provides an iron fist for the aggressive policies of Moscow and presents an alarming menace to the security of the United States.

Secretary of Navy Sullivan disclosed that the Russian navy potential includes more than 250 submarines, which is five times greater than that of Germany at the start of the recent war.

It is believed this stepping-up of American strength will be a strong deterrent to Russian ambitions and is the best possible insurance against war.

Texas Looks Good

Taking advantage of a slack period, I was recently able to get away from Washington for a few days and visit in the district for the first time since Christmas. It is always inspiring to do that and have a chance to talk with some of the folks and inhale some good old Texas air.

At Uvalde I addressed a convention of Home Demonstration clubs and was able to go to Rocksprings and speak at the Charter night of the Lions Club. Good rains have fallen there and the country looks fine.

My friends at Bracketville invited me over, and I met with a delegation on REA business and also spoke to the Rotary Club. I was able to accept invitations to address high school commencement programs at Leakey, Sabinal, London and San Saba. I was also on the program of the 21st district postmasters convention at Del Rio. My sincere regret was that due to shortage of time I was unable to respond to other invitations.

I have promised to return to the district this week-end and speak to the Directors' meeting of the Sheep and Goat Raisers' Association on June 11 at Uvalde, and will stop over at Lometa for a Ladies Night event of the Lions Club there.

Thad Thomson III came to Texas by plane from the East, Monday, and is now at home on Thomson's Ranch for the summer. He has completed his sophomore year at Princeton.

Mrs. Mattie Thornton spent the week end in San Angelo with her son, Joe Thornton and wife.

County Agent News

MESQUITE FACTS
Mesquite trees have shown a gradual increase in Schleicher County for many years, especially in the last five years. Ranges that were comparatively free of the mesquite now have seedlings to the extent of a very few to hundreds per acre. To what extent the mesquite may damage the range a few facts are listed:

1. Perennial grass production was measured under several degrees of Mesquite thinning. On the check plots there was an average of 115 trees and 90 pounds of grass forage produced per acre. On the completely eradicated plots, 285 pounds of grass forage was produced—over three times as much by eradication of the mesquite.
 2. Mesquite beans from a stand of 80 trees per acre usually produce less than 10 pounds per acre annually. Foliage production within reach of cattle is usually less than 40 pounds per acre annually. Even counting this 50 pounds of feed equal with grass, the total forage production on mesquite areas was less than 1/2 that on cleared areas.
 3. The mesquite seed may remain viable for a period of 44 years. The seed was taken from a herbarium sample. This means that mesquite seedlings will appear on cleared lands for many years after eradication even if livestock are excluded.
 4. The mesquite can be killed with diesel oil. It should be applied at the ground level like kerosene. Better results have been secured in the fall and winter months. Diesel oil is usually cheaper than kerosene but both are effective.

Baptist Vacation Bible School Present At Angelo Parade

Commencement exercises for the Bailey Ranch Baptist Church Bible School were held Friday evening after a successful week which included sessions each morning from 8:30 to 11:30, with an average of 31 students enrolled. On Wednesday, the students joined with those from the Eldorado First Baptist Church, in a parade in San Angelo which included 800 students from vacation Bible Schools in the Concho Valley Association. The parade followed a mass meeting of students, faculty and pastors from the various churches in the summer Sunday School taught by 26 Baptist college students. The Bailey Ranch group was the only one with 100% attendance at the parade.

Workers in the school included Mrs. Archie Mittel, principal; Miss Dorothy White, state worker, superintendent of the Beginners, and Mrs. Pete Griffin, helper; Mrs. Edgar Spencer, superintendent of the Primary department, and Mrs. Fred Spinks, helper; Miss Virginia Keeter, state worker, head of junior department, and Mrs. Carl Stevens, helper; Miss Lula Mae Green, song leader and secretary.

From where I sit... by Joe Marsh

How to Live Longer

Someone asked Pappy Miller last week how he stayed so spry at ninety. Pappy told him:

"Well, sir—when I work, I work hard. When I set, I set loose. When I think, I go to sleep."

According to Doc Hollister, that formula isn't far amiss. "Hard work," says Doc, "never wore out anyone before his time, providing he knew how and when to relax."

Doc himself works overtime, with his daytime patients at the office, and his evening calls. And

when he gets home he takes it easy with a mellow glass of beer and chats with the missus until it's time to go to bed.

From where I sit, relaxing is a fine art—especially in these tense, fast-moving times. And there's nothing like a temperate glass of beer—enjoyed with pleasant company—to restore that easy frame of mind that one needs after a hard day's work.

Health Department Issues Directions On Polio Prevention

The prevalence of polio in Texas leads to widespread discussion of methods of prevention and control of the disease.

The state department of health has issued the following instructions concerning prevention to Co. Judge C. L. Meador:

The primary way by which the virus of Poliomyelitis is transmitted from person to person has not been definitely determined. Some think it is spread by direct contact through droplet infection of the nose and throat. Others believe that the primary mode of transmission is by way of the gastrointestinal tract through ingestion of contaminated food or drink. It is also possible that flies, mosquitoes and insects may be important factors in the dissemination of this dreaded disease.

Since the exact way in which Poliomyelitis is spread has not been determined, preventive measures against ALL possible sources of infection should be taken when this disease is prevalent. The following suggestions should be taken during the summer and fall months when Poliomyelitis is more likely to occur:

1. When suspicious symptoms (headache, undetermined fever, vomiting, drowsiness, stiffness of neck or back) appear, a physician should be called at once.
2. Sudden chilling and over-exertion should be avoided.
3. Elective surgery involving the nose and throat should be postponed.
4. Good personal hygiene, especially of children, is very important at all times.
5. Children should avoid crowds and sick persons when polio is prevalent.
6. Individual home sanitation should be perfected to include approved water supply, waste disposal and proper control of insects, especially flies and mosquitoes. Raw fruits and vegetables should be cleaned well before using. Garbage containers should be covered at all times.
7. Community sanitation should be rigidly controlled the year around. The following recommendations are offered:
 - a. Approved water and sewerage systems.
 - b. Proper disposal of garbage and other waste products.
 - c. Sanitary supervision of public swimming pools.
 - d. Adequate supervision of all food handling establishments in order to assure compliance with State Food and Drug Laws, especially regarding sterilization of dishes and utensils.
 - e. Elimination of flies, mosquitoes, insects and rats as far as possible by use of DDT and other approved chemicals.
