

PLAIN TALK

By BILL PERKINS

It looks like McLean may soon be one of the best known towns along Highway 66 as soon as the Lions Club completes its latest chore.

Two or three years ago the Jaycees had several signs painted welcoming tourists to stop in McLean. Since the group disbanded shortly after the signs were completed they were never erected along the highway. They have been stored since that time in the Public Service Company warehouse.

The Lions Club has accepted the job of erecting these signs and at Tuesday's meeting several teams of Lions were charged with the responsibility of putting up one sign each.

The colorful advertising signs will be placed at five and ten mile intervals as far as 80 miles both east and west of McLean. For the first 20 miles they will be erected five miles apart and for the remaining 60 miles one sign will be found every ten miles.

There may be a lot of confusion about Thanksgiving in Texas this year. All of the calendars we've seen show November 22 as the day. The local schools will observe this date for their holiday, according to the school calendar. But the Texas A&M-University of Texas Turkey Day game is scheduled November 29. Now figure that out.

The Democratic and Republican national conventions have just about dominated the television scene for the last two weeks but it proved quite a relief from some of the summer repeat shows that they filled in with while the viewer got a much needed rest. Some of the better shows are scheduled to make their fall debut in a couple of weeks.

The country music fans will certainly get their eyes and ears full, according to the advance programming schedules sent out by the Amarillo stations. Bob Wills and his Texas Playboys rate a full hour now on KGNC-TV, and beginning Monday, September 3, KFDD-TV will start the Grand Ole Opry our way.

Workmen are busy this week making repairs to the roof and also in the interior of the building that will house the Form O Uth Brasserie factory in McLean. Construction on the new Lovett Memorial Library is going right along and it already looks like it will be about the most attractive building in town.

David Dwight has opened a Humble station on the north lane of Highway 66 just across the street from the factory building and the Magnolia station that he was operating.

FARMERS' CASH INCOME DOWN 12 PER CENT

Texas farmers' cash income was 12 per cent lower during the first half of 1956 than during the comparable period in 1955, the University of Texas Bureau of Business Research reports.

The mid-year comparison shows \$571,925,000 was the total income for January-June, 1956, against \$648,920,000 for January-June, 1955.

Decreases were recorded for nine of the 17 major commodities: flaxseed down 83%; wheat, 75%; oats, 48%; cotton, 22%; cattle, 19%; eggs, 14%; mohair, 12%; calves, 11%; and wool, 1%. Combined decreases in cotton and cattle meant a loss of \$66,652,000 from last year.

Gains were registered by peanuts, up 37%; poultry, 19%; fruits and vegetables, 18%; corn, 17%; grain sorghums, 15%; milk and milk products, 12%; and sheep and lambs, 9%. There was no significant change in income from hogs.

Prices received by farmers for all products in June stayed at approximately the same index level as in May, or 4% lower than June, 1955.

The fact that prices are running only 4% below last year, while income is averaging 12% less indicates that farmers are taking less to market, the bureau points out.

Public Service Company Sets NEW SAFETY RECORD

Employees of the Southwestern Public Service Company have established a new all-company safety record of working 3,020,404 man-hours without a lost-time accident. It has been reported by A. R. Watson, executive vice president and general manager of the electric light and power company.

The new record, exceeding the old company standard of 3,019,075 man-hours, set in 1954, was reached at the end of the working day last Friday. However, a check of working time of all employees was necessary to verify the new accomplishment, and that check has just been completed.

"We are proud of the fact that we have set this new record, and that we are still adding to it. But records, in themselves, are merely the statistics that measure the accomplishments of individuals. The important fact about safety is that our employees are enthusiastic about it, interested in it, and have made it an integral part of their work. Everyone gains from safe working habits: our customers, our employees and their families," Mr. Watson said, in announcing the safety accomplishment.

Southwestern Public Service Company employees have not had a disabling injury this year, the current accident-free period getting underway on November 3 of last year. Presently the company boasts the top safety record in the Southwest Personnel Exchange Group, made up of 14 electric light and power companies in the southwestern states.

The new safety record, and it continues unbroken and grows with the passing of every hour, is, in addition to being the company's best performance, the third longest accident-free period ever recorded by any electric and power company.

There are eight safety groups within the company, made up of the five divisions, headquartered at Amarillo, Gayton, Plainview, Roswell and Lubbock; the operating

department, which includes all of the company's generating stations; the system construction department, which is responsible for transmission line and sub-station construction; and the employees of the general office in Amarillo.

Each of these safety groups is recognized for its individual safety accomplishments by the National Safety Council and the Edison Electric Institute, as well as the entire company group. However, an accident in any one of these units immediately brings a halt to the entire company record, while the other individual groups continue with their accomplishments.

For example, two divisions, the Panhandle, headquartered in Amarillo, and the Pecos Valley, with Roswell for its headquarters, each completed a million man-hours without a disabling injury last week. It was the second time that the Panhandle group had reached the million mark.

Presently enjoying the longest individual unit standing within the company record is the Plains division, headquartered at Plainview, which has gone accident-free since January, 1953, and has recorded 1,568,926 hours without a lost-time accident.

Other individual records are: Southern division, which has accumulated 512,656 hours since August 9, 1955; Oklahoma division, which has been without an accident since March 11, 1955, and has chalked up 162,628 accident-free hours; operating department, accident-free since November 2, 1955, and now up to 660,102 man-hours; system construction, which hasn't had a lost-time accident since April 7, 1955, giving them a total of 155,756 man-hours; and the general office employees, who had their last disabling injury on April 27, 1955, and have accumulated 634,327 accident-free hours since that time.

As can be seen from the various lengths of time involved, the size of the safety unit is an important consideration in the amount of time necessary to accumulate large numbers of accident-free hours. A 300 employee group, for example, will work 1,000,000 man-hours in approximately one-tenth of the time that it will take a 30-man unit.

The fact that the smaller the group, the more difficult the accomplishment is an important consideration in Southwestern Public Service Company's effort to become the leader of the entire electric industry. Both of the companies which presently top Southwestern's record are considerably larger in employee numbers.

"This is a great safety team, ever-conscious of the fact that when you are free of accidents you are free of heartbreak and suffering and morale and work-interest are high. Each of us is determined to set new standards, not for the mere purpose of accumulating records but for the self-satisfaction of knowing that the job done safely is the job done well," Watson concluded.

Gray County Designated for EMERGENCY FEED PROGRAM

Reserve Seat Tickets Are Now on Sale For Five Home Games

Reserve seat tickets to all five of the McLean Tigers' home games are now on sale. Freeman Melton, Jr., reminded fans this week.

First choice is being given to those persons who purchased season tickets last year, until August 27. After next Monday the reserve tickets will be sold on a first come first served basis.

Price of reserved seat tickets for the five games is \$5. Reserve seats cost no more than regular admission when purchased in advance, and by buying tickets early football fans are always assured of a choice seat, it was pointed out.

Walter T. McKay, state director, Farmers Home Administration, this week advised the Gray County supervisor of the designation of Gray County for assistance under the Emergency Feed Grain Program.

Farmers Home Administration county committees may now take applications from farmers and ranchers through October 1, 1956, to provide feed for basic livestock through October 31, 1956.

The emergency feed grain program is now authorized in 185 counties in Texas, McKay advised.

Farmers may sign up at the City Hall in McLean on Wednesday morning or at the ASC office in Pampa.

Band Organizational Meeting to Be Held Here Friday Night

McLean Band Director Bruce Cook has announced that there will be a meeting of all band students in the band hall Friday night at 7:00 o'clock.

All students who plan to take band this year and their parents are invited to be present at this meet which has been set as a get-acquainted and organizational meeting.

Band rehearsal time will be set at the Friday night meeting.

Mr. Cook added that those wishing to try out for twirlers should contact him this week. Twirlers will be selected before school starts.

KENNETH M. GIBSON, son of Mr. and Mrs. Leo Gibson, has accepted a position as instructor at Louisiana State University where he will begin teaching this fall. Gibson, who received a bachelor's degree at Texas Tech in June, will work on his master's degree while teaching at LSU.

MIDWESTERN TO HONOR H. A. GLASS

(Editor's Note: The following article appeared in the Austin American-Statesman Sunday and concerns H. A. Glass, son of the late Mr. and Mrs. J. T. Glass of McLean. Mr. Glass formerly taught school in McLean and has many relatives and friends here.)

H. A. Glass, director of the textbook division of the State Department of Education for 19 years, will return Friday to Wichita Falls to be honored by Midwestern University.

He will receive an honorary doctor of humanities degree at the university's summer commencement exercises Friday at 10 a. m. Mrs. Glass will be in the audience to share the honor.

For 12 years—from 1919 to 1931—Glass was a school administrator in Wichita Falls. He founded the junior high schools in Wichita Falls, among the first in the state.

The degree is being conferred upon Glass in recognition of his long service to the youth of Wichita Falls and Texas and his outstanding career as director of the textbook division of the State Department of Education. E. B. Clark, Sr., president of the Midwestern University board of directors, said, in announcing Glass' honor.

Dr. Travis A. White, new president of MU, will confer the degree.

Glass, who holds a master's degree from the University of Chicago, has served as teacher in McLean, West Texas State College, Austin College, North Texas State and East Texas State Colleges. He has been an administrator in Canadian, Wichita Falls and Bonham.

He is a member of the University Christian Church in Austin, a life member of the Texas State Teachers Association, Austin Kiwanis Club, Texas Public Employees, Texas Association of School Administrators and the American Association of School Administrators.

Methodist Revival Slated at Heald

A revival will begin Sunday, August 26, at the Heald Methodist Church. Rev. Sharp will do the preaching.

Morning services will be at 10:00 o'clock and evening services will start at 8:00 o'clock. Rev. O. C. Evans pastor, cordially invites everyone to attend.

The first American pilot's license went to Glen Curtiss in 1911.

Beginning Saturday, September 1, 1956, the post office in McLean will be closed Saturday afternoons, Postmaster Johnnie R. Back has announced.

Postmaster Back pointed out that this has been the trend of post offices in larger towns for some time.

"In so far as the receipts, distribution and dispatch are concerned, the service will be maintained just as in the past. That is the mail will be received from the trains and put up in the post offices boxes just as has been done in the past," Mr. Back said.

"Also, the out-going mail will be dispatched just as in the past. All mail posted by 2 p. m. will be dispatched to train at 2:30. Mail posted later than 2:00 will be dispatched both ways at 6:00 p. m.," Back concluded.

There will be no window service Saturday afternoons. Parcel post mail will have to be in the office before windows are closed.

THE COST OF CRIME

J. Edgar Hoover of the FBI states: "We complain about high taxes, but last year crime cost every man, woman and child in the United States \$122.00, or a staggering estimated total of 20 billions of dollars. Perhaps this figure could become more meaningful if we realized that for every \$1.00 spent on education, crime cost \$1.46; and for every \$1.00 which went to the churches of the nation, \$13.00 went to crime."

Mr. Hoover said this in a speech urging improvement in crime control—especially as it affects the parole system and the problem of the repeater. And the challenge of this, he added, "is a challenge to all of us."

NEW MARKETS FOR AGRICULTURE

It has been proposed that Congress appropriate \$100 million to finance a program for finding new uses for farm products. The American Meat Institute urges that basic research be stressed in carrying out that program.

In a statement to the Senate Committee on Agriculture and Forestry, the institute observes that "In spite of the wonderful advances made by science, there are great gaps in our basic understanding of the natural laws and the biological processes." It lists a number of areas vital to progress in the livestock and meat industry in which augmented research is needed. These include studies of the chemical composition and characteristics of meat and meat by-products, carcass quality of beef and pork, meat preservation, nutritive value of animal fats, meat flavor and tenderness, new commercial uses for animal by-products, physical and chemical properties of meat proteins, and meat pigment research. In the case of farm products other than meat, of course, there are comparable areas where basic research could open new horizons of knowledge.

The institute's suggestion is a sound one. Research—basic as well as applied—has been the very heart of industrial progress. But in this all-important field agriculture has so far lagged behind. There is every probability that over a period of time research could create and develop vast new markets for the products of agriculture. That, conceivably, could prove the solution to the vexing farm surplus problem.

Greensboro, N. C. Democrat: "... the hot dog is simple and down-to-earth and economical. It's within the reach and pocketbook of everybody, and it has the taste of America. Let's toast the American way, the hot dog way. It's a national tradition to be proud of. So pass the mustard. Hot dog!"

Bassett, Neb., Leader: "It is the consumer who will pay for the increased wage and fringe benefits the steel workers may gain. There is nothing remarkable about this, for obviously if a business does not recover its costs, and a reasonable profit for re-investment and for dividends to those who have provided the facilities, it cannot hope to remain a going concern for very long."

Montpelier, Vt., Evening Argus: "It shouldn't be too hard to keep your temper. Who else wants it?"

Sells Fine Calves

C. M. Carpenter this week closed a sale to J. M. Noel of about 80 head of heifer yearlings, the consideration being \$50 around. These cattle are from Mr. Carpenter's grade herd and are a fine bunch of stuff, as the price paid by Mr. Noel will indicate.

Proposed Highway Route

Through the efforts of some boosters who have not lost sight of the "main chance," interest is again aroused in the proposed highway from St. Louis via Oklahoma City to Amarillo. One of the most feasible routes for this highway lies through McLean, and our interest should center in its establishment. The following letter from the secretary of the Board of City Development of Amarillo is self-explanatory and it is hoped local citizens will make an effort to have a delegation at the Sayre meeting next Monday:

"A meeting is to be held in Sayre, Okla., on August 21 in the interest of the new proposed highway between St. Louis, Oklahoma City and Amarillo. One of the proposed routes for this highway is via McLean, and Amarillo is now supporting the route via McLean, and it is therefore very necessary that your city be represented at the Sayre convention. This new highway should divert an enormous traffic in this direction and McLean would be a big beneficiary in that thousands of tourists would pass by and stop there, purchasing thousands of dollars of goods there annually besides advertising your city and community. Can you wire us immediately on receipt of this that McLean will be represented? You must be there."

Personals

C. S. Rice and family and W. B. Upham and family were visitors to Pampa Friday of last week.

A salesman, phoning a prospect at home, was answered by a child. "Tell him Mr. Brown called," he said.

"How do you spell Brown?" the child asked. "B-R-O," the man began. Then there was a labored silence.

"How," asked the child, do you make a B?"

The father played possum while his youngsters tried their best to rouse him from his Sunday afternoon nap to take them for a promised walk. Finally, his five-year-old daughter pried open one of his eyelids, peered carefully, then reported: "He's still in there."

If it is just a Sunday afternoon drive or a business trip your car will give top performance when you use Chevron products.

Van Johnson Learns Fans Same Any Place

While filming "23 Paces to Baker Street," the Twentieth Century-Fox Cinemascope murder mystery coming soon to the Derby Drive-In Theatre, Van Johnson learned that movie fans the world over are the same, but he learned the hard way.

Van went shopping along Oxford Street, one of the city's busiest thoroughfares. His wife, Evie, tried to dissuade him, saying that admirers wouldn't give him much opportunity to shop.

"Don't be silly," Van objected. "I doubt that anyone here in England will even recognize me. And if they did, the English are so calm and reserved that they wouldn't think of asking for autographs in public."

The Johnsons' first stop was Selfridge's right in the heart of Oxford Street and advertised as "The World's Largest Department Store."

While they continued to move along from counter to counter, nothing happened. But when Van found an embossed leather book cover that he liked and stopped to buy it, the salesgirl recognized him and squealed: "Van Johnson!"

It was only a matter of minutes then before Van was surrounded by a crowd of female customers and salesclerks pleading for the star's autographs.

A movie fan himself, Van began

to oblige, but when those young ladies who had nothing to be autographed began to strive for more substantial souvenirs, such as Van's buttons, cuff links, and tie, he decided it was time to make a strategic retreat.

"By the time I got Evie out to a taxi," Van reports, "I had lost all the buttons from my coat and shirt, my tie, one jacket sleeve and even my belt."

Vera Miles and Cecil Parker share starring honors in "23 Paces to Baker Street," which was filmed entirely in London in color by DeLuxe.

Edward VIII abdicated the British throne on December 11, 1936.

Dr. James Naismith invented basketball in the winter of 1891-92.

Why people who used to buy higher priced cars are changing to Chevrolet

More and more buyers are deciding that they prefer a sweet handling Chevrolet to a big, unwieldy high-priced car!

When you consider Chevy's reputation for performance and roadability, you wonder why any-

one would pay hundreds of dollars more for a higher priced car. Well, a lot of people have been wondering the same thing, and the result has been a big switch from high-priced cars to Chevrolet. Of course you save plenty, too. Come in and sample the fun and get the facts!

America's largest selling car—2 million more owners than any other make!

"Too old to work any more," said Professor O. A. Carnahan upon retiring from Syracuse University after 27 years of teaching mechanical engineering. But he kept on working in his basement shop with his wife, a skilled lathe hand, as his assistant, and, according to the July issue of Popular Science Monthly, is successfully developing something inventors have been tinkering with for 150 years. Professor Carnahan redesigned the old "hot-air" engine with the thought it might run an automobile. But the Coleman Company, of Wichita, Kan., became interested and retained the professor to perfect his motor as a gas-operated power plant for home air conditioning systems. Coleman already is in production on an internal combustion gas motor air-conditioning unit and is conducting research on the external combustion motor, open-type absorption, and binary-type refrigerant jet units. Any of these is intended to team up with a gas furnace for central year-round air conditioning.

One completely new provision contained in the 1956 amendments to the Social Security Act is that for the payment of cash disability payments. To qualify for these payments, which will be effective in July, 1957, the following requirements must be met:

1. The worker must be disabled to the extent that he cannot engage in any substantial, gainful work. This disability must have been in existence at least six months and must have started before the worker became 65 years of age.
2. The worker must have been

in social security covered work for at least five of the 10 years just before he became disabled, and for at least 1 1/2 of the three years before disability began.

3. To receive cash disability payments he must be at least 50 years of age. However, to protect his wage record the worker should make an inquiry at the nearest social security office if he meets the requirements and is under age 50.

4. Medical proof of the disability must be furnished.

Anyone who meets these requirements should contact his nearest social security office unless he has already done so during the past two years in connection with establishing his disability under the old law. Workers who have already filed proof of disability will be contacted by their social security office after October 1 in order to obtain an application for these payments.

Gray County

SOIL DISTRICT

Stubble Mulch Tillage

In a review of stubble mulch tillage studies carried on the past seven years at the Amarillo Conservation Experiment Station, we find that the average rainfall is approximately 18 inches per year. These rains fall in torrential showers, so in order to keep these light soils in as loose condition as possible, it became necessary to devise some new method of cultivation.

The one way has been used on the Plains for many years. It is found that they have a tendency to form a hard pan in the soil, thereby causing the rainfall not to be able to penetrate to a depth where it becomes available to the root systems. Consequently, the production of crops is reduced considerably.

The conservation technicians at the experiment station set out to find out what could be done about this condition, to improve production and soil-crop relation.

This GMC has "muscles" unsurpassed in its class!

The facts speak for themselves. This new GMC 250-8 has 180 V8 horsepower standard. No other truck in its class comes even close. The extra power delivers 276 foot-pounds of truck-propelling torque. Over-the-road trucks call it "guts" — and this GMC's got up to 33% more than the others. It's at the top of the heap in frame-strength, too. There's as much as 10% more "muscle" in its chassis than in comparable trucks. And there's more. For this rugged

GMC has 3500 lb. front axles and 7200 lb. rear — unsurpassed in its weight-bracket. It has extra-size brakes and springs. Add it all up and you can see what GMC Blue Chip stamina really means. Especially when you team it with a GMC's dependable performance and Hydra-Matic* savings. For here's a truck that not only delivers the goods at lowest cost — but keeps delivering long after an ordinary truck would have faded out. Come in and talk it over!

IN THE EDITOR'S MAIL

The Editor
 McLean News,
 Dear Sir:

I am enclosing a check for \$2.00 to subscribe to your paper. My husband will be the new grade school principal and I will teach first and second grade room. We have a daughter, Martha, who will be a sophomore. At the present she is visiting her grandparents, Mr. and Mrs. Cecil Cardwell of Shamrock.

We are very happy to be in McLean and are looking forward to a successful year.

Nancy Tate Named Winner Friday in Dress Review

Nancy Tate, 16-year-old daughter of Mr. and Mrs. O. O. Tate, was a top winner in the district dress review held in the Pioneer Natural Gas building in Amarillo Friday, August 17.

Each county in district one sent their county winner to the district contest. Five winners were announced from that group. There were 17 counties represented and about 500 girls competed for the county winner.

The girls were judged on posture, grooming, poise, attitude, the outfit worn by the girl, construction and records.

The five winners will model their dresses at the State Fair on October 5. They will be accompanied by two agents.

McClellans Back From Chicago Trip

Mr. and Mrs. Bernard McClellan and children have just returned from a two weeks tour of Chicago, Ill., and the central United States.

They returned home by way of Omaha, Nebr., where they visited with Mr. and Mrs. Bob McBride. It was the first meeting of the two men since 1945 and 1946 when they were on a tour of duty together with the 32nd Red Arrow Division in Japan.

Campaign headquarters of Price Daniel, Ralph Yarborough and Will Wilson have been beehives of activity.

Daniel and Yarborough have gone all out to win the Democratic nomination for governor of Texas.

Wilson has been working even harder than he did in the primary, in order to increase his lead in the attorney general's race.

But withering Texas heat has sapped campaign enthusiasm among the voters. Interest that developed in the July primary has dwindled considerably.

Last month brought the largest primary vote in Texas history—1,576,870 in the governor's race. However, if the second primary vote beats that of two years ago it will surprise everyone.

Nevertheless, the conservatives and the liberals are working for a big voter turnout on Saturday. Delegates Return Home

Weary Texas delegates to the Democratic national convention have returned home to face still bigger tasks.

Their goals: (1) to win undisputed party control at the September 11 state convention, and (2) to swing Texas back to the Democratic column in November.

In both efforts they will have the guidance of two of the party's most influential leaders—U. S. Senator Lyndon Johnson and

House Speaker Sam Rayburn. Hopes are based on the mild civil rights platform plank adopted at the Chicago convention. Both Johnson and Rayburn are credited with significant roles in gaining this "moderate" victory.

Many of the Texas delegates say they will have a hard time selling the Stevenson-Kefauver ticket in this state. There is considerable muttering about the prospects of victory in November. And Former President Harry Truman's cracks at Stevenson didn't help a bit.

Drought Aid Program
 Federal and state machinery are grinding out a three-phase drought aid program for Texas farmers and ranchers.

Action came as mounting disaster conditions caused federal officials to release "one of the bleakest crop and cattle situation

reports in 22 years." Present plans would provide (1) certificates good for \$1.50 per hundredweight toward feed grain purchases, (2) certificates for \$7.50 per ton to buy roughage and (3) Farmers Home Administration loans to refinance debts on family-size farms.

Initial details were worked out at an Austin conference of U. S. Dept. of Agriculture officials, Gov. Allan Shivers, Agriculture Comm. John White and the Texas Emergency Drought Committee.

USDA is providing \$1 million to finance the roughage program. Gov. Shivers has allocated \$100,000 from his emergency funds for administrative operations.

Texas reaction to the federal offers ranged from "fairly satisfactory" from Gov. Shivers to "too little and too late" from some South Texas farmers.
