THE CHALLENGE OF DISCIPLESHIP

A correct concept of the Christian life can come about only by a study of what Jesus said concerning it. In Matt. 23:24 all mankind is brought face to face with the challenge, the true challenge, of discipleship! Jesus said, "If any man will come after me, let him deny himself, and take up his cross, and follow me." From this passage says, "If any man..." Everyone should also be quick to observe that true discipleship demands that the LEADER be followed. The passage states: "...follow ME." To follow Jesus means that each of us must put self in the background and the Lord must come to the foreground of our lives: "...let him deny himself..."

Especially to be noticed is the challenge to "take up his cross." This means that the disciple of the Lord is to take up the burden of sacrifice. Our cross will be any hardship or sacrifice we are called upon to bear in becoming a Christian and living the Christian life. We may bear a cross of ridicule, family rejection, or the sacrificing of a good position. We may sacrifice the comfort of a warm home in winter, an air conditioned home in summer, or the pleasure of entertainment in order to follow the Lord and do His will. Luke 9:23 tells us that this is to be a "daily" challenge. It is not that the big moment of sacrifice that counts so much with the Lord but what really challenges us is to live our lives in a constant hourly awareness of the demands of God and the needs of others.

Since there are such great challenges presented to the disciple of the Lord why should anyone want to become a follower of the Lamb? Some question... can a person really afford to become a Christian? The real question is: "Can I afford not to become a Christian?" Simply stated, it is only when one does the will of the Lord can he enjoy the abundant life (John 10:10) and prepare himself for eternity (John 12:48). YOU cannot afford to refuse the Lord, His offer of grace, and the challenge of TRUE DISCIPLESHIP.

LETTER TO EDITOR

The Derby Town Jubilee that was held Friday night, May 16 went especially smooth. The audience was the most responsive we've had, both with their applause and their verbal comments. The comments went mostly like this, "Best show I've seen," "It's just wonderful," "I've never seen that much good talent in one place before," and so on.

One of the reasons for this particular show going so well was the advance programming. This was accomplished by notifying the prospective talent well in advance and holding an informal rehearsal prior to the jubilee.

Our sincere appreciation to Mayor Sam Haynes, Superintendent Homer Jefferson, Rev. Z.A. Myers, Naomi Ashcraft, Girl Scouts, and their personnel, entertainers, and all the individuals who contributed in various ways. Also thanks to the McLean News and Pampa Daily News. It's great being able to count on you like we always do. The area radio and TV stations also have supported us real well.

Those on the program were: Judy Grubb, Eudell Gifford, Richard Brantley, Jack Selby, Pampa; Miles Green and Family, Panhandle; Chris Rogers, Abilene; Norris Cunningham, Jr., Amarillo; Thurman Trew, Alanreed; Leland Daniels, Erick, Okla. From McLean were Buck Hen-

Heart Association Gives Course

A concentrated course in cardiopulmonary resuscitation was given by Dr. C. Forrest Sparger, president of the Gray County Chapter of the American Heart Association, and assisted by volunteer demonstrators-instructors, to the American Physical Therapy Association, Inc., annual meeting being held in the convention center of the Villa Inn of Amarillo.

The introduction was "Why C.P.R. for Physiotherapists and other physical therapy personnel."

Dr. Sparger stressed the need that physiotherapists be concerned about the prevention of cardiac arrests. He indicated that the plans for code "99s" should be concerned about the prevention of cardiac arrests as well as the treatment of cardiac arrest.

The participants in the meeting utilized the opportunity to not only see the demonstrations but to practice with each manikin, the resuscitator, the anatomic man, the resusci-baby, the recordi-ann, the arrhythmia ann, also the adult intubation manikin and the infant intubation manikin.

Gray County received all the major awards; however, they did not receive the award for per capita donation since a large number of other counties had a greater per capita donation than did Gray county.

Special recognition was given to the Gray county chapter of the American Heart Association by its receiving each of the four awards presented for service at the Region I annual meeting.

Dr. C. Forrest Sparger, president of the Gray County chapter commented on the important activities by the Gray County chapter for the past year. He mentioned that the success of C.P.R. week, proclaimed by the Mayors of McLean, Lefors, Pampa and the county Judge of Gray County, was due to the excellent work in disaster planning by several Pampa physicians, namely, Dr. Jor Donaldson, Dr. Julian Key, Dr. Royce Laycock and Dr. Whit Whitsell.

REV. AND MRS. JAMES BURT FORT WORTH - Rev. James Carlton Burt, son of Mr. and Mrs. Harris King of McLean and wife. Linda Burt, daughter of Mr. and Mrs. Nolan Cole of Pampa, recently received the diploma of theology during spring commencement exercises held in Truett Auditorium at Southwestern Baptist Theological Seminary.

Seminary President Robert E. Naylor presented degrees and diplomas to over 260 candidates from the seminary's three schools. This was the largest graduating class ever in the 68-year history of the Fort Worth institution.

Rev. Burt is pastor of Buckner Ranch Baptist Church in Burnet. Mrs. Burt is the former Linda Annelle Woodall.

AUSTIN—The 64th Legislature is deep into its last final week of activity, with all of its remaining Big 3 assignments still incomplete.

Conference committees have drawn the jobs of adjusting differences between House and Senate versions of these measures:

—The \$12 billion all-time record appropriations bill for 1976-77. There is really little controversy, and the budget will be ready for final approval by adjournment deadline Tuesday.

—Public school finance reform. There is plenty of controversy here, with the outcome likely to remain in doubt until near the final gavel. Gov. Dolph Briscoe shows every sign of being determined to veto any measure which overspends revenue in sight.

—Utility regulation through a state commission. Again, there are strong differences between the House and the Senate majority. House leaders insist they have compromised enough in getting their bill passed and want nothing weaker. They are backed by a well-organized citizens group which has served notice it

will have the House bill or nothing.

Conference reports can be passed by a bare majority, and they are subject to no amendments.

Oil Increasing

For the 39th straight month, the Texas Railroad Commission has set a wide-open 100 per cent statewide oil production allowable.

Commission Chairman Ben Ramsey said indications are Texas production is "beginning to stabilize and possibly show a slight increase."

The big East Texas field, a deviation from the all-out production pattern, will be held to 86 per cent.

V.F.W. Auxiliary Give Scrolls to Sr.

The VFW Auxiliary, Post #8565 presented "Esperanza" Parchment Scrolls to 26 graduating seniors at the Awards Assembly held in the McLean High School Auditorium on Thursday, May 22 at 9:30 a.m.

The presentation was made by Auxiliary President LaVer Brooks, who expressed gratitude to the youth who have taken advantage of the "Right to an Education."

Other Auxiliary members present were Susanna Horn, Mary Groves, and Lucille Cullison.

constitution or laws.

Charges Refused

Charges that \$500 million in erroneous payments were made to Texas welfare recipients due to clerical errors were challenged by State Welfare Commissioner Raymond W. Vowell.

Vowell disputed statements of the U.S. Department of Health, Education and Welfare concerning mistakes of state and local welfare officials.

HEW said another \$500 million was spent in error because recipient's provided incorrect information on factors determining eligibility for aid and size of payments.

Vowell said 70 per cent of welfare mistakes are due to recipient error or falsification. He said efforts are being made to cleanse Texas welfare rolls of ineligible recipients.

Short Snorts

A new form of health and accident protection will be available December 1 through Health Maintenance Organizations. Governor Briscoe signed the bill into law.

Comptroller Bob Bullock issued checks totaling \$19.9 million to Texas cities in the second round of monthly city sales tax payments. Payments were up from \$16.1 million in April.

The Senate refused to lower the misdemeanor penalty for possession of small amounts of marijuana.

Governor Briscoe has appointed former State Rep. Menton J. Murray of Harlingen to the Texas Board of Mental Health and Mental Retardation, replacing Paul Leonard of Fort Worth who resigned.

Briscoe also announced his intention to appoint Joe R. Carroll of Snyder to Texas Water Rights Commission. Carroll will succeed Otha Dent of Austin who resigned before expiration of his term.

Industries Slow

Only 15 new industries located in Texas during April, compared with a 25-per-month average in 1974.

Jim Harwell, executive director of Texas Industrial Commission, said the 15 will have an annual impact of \$137 million on the Texas economy and create nearly 4,000 new jobs.

The industries will locate in Longview, San Marcos, Brownsville, Corpus Christi, Gainesville, Clear Lake City, La Grange, Midland, San Antonio, Sherman, Summerfield, Tyler, Henderson and Liberty.

Courts Speak

The Third Court of Civil Appeals turned down Atty. Gen. John Hill's request for rehearing of an effort to stop a \$45 million Southwestern Bell Telephone Company intrastate long distance rate hike.

Hill's motion to modify judgment to prevent the increase going into immediate effect also was rejected. The Attorney General has promised to appeal.

Texas Supreme Court turned down a suit by Amarillo, Borger and Pampa against Canadian River Municipal Water Authority over distribution of costs for operation and maintenance of an aqueduct, dam and reservoir.

Plainview, Lubbock, Brownfield, Levelland, Tahoka, O'Donnell, Slaton and Lamesa sided with the Water Authority.

AG Opinion

A bill which would permit distribution of state-owned textbooks to pupils of non-public schools "probably" is constitutional, Attorney General Hill held.

In other recent opinions, Hill concluded:

Domestic relations courts may appoint masters in chancery, but only in exceptional cases for good cause.

An educational and recreational fund administered for benefit of state prisoners may be invested or spent for prisoners' benefit in any manner consistent with purposes of the trust, law and proper prison system management.

A weekly public service feature from
the Texas State Department of Health

Accent on Health

J.E. PEAVY, M.D., Commissioner of Health

If you regularly suffer with a throbbing headache, frayed nerves or even a flareup or peptic ulcer, you might blame it on "noise pollution" in your neighborhood. And state health officials agree that in some instances you might be pretty close to the truth.

Officials at the Texas State Department of Health, like their counterparts in every other state and at the federal level, see the noise problem as a mushrooming public health problem. Health officials estimate the overall loudness of environmental noise is doubling every decade. If not dealt with soon, the problem of this "fourth pollution" will be as difficult to deal with as the other three: air, water, and solid waste.

Because of industrial noise alone, an estimated \$4-billion is spent each year on worker inefficiency, lost work time, accidents and compensation. As many as 16 million U.S. industrial workers may be partially or totally deafened by factory noise. This occurs when the cilia (hairlike outgrowth) in the inner ear are destroyed, resulting in nerve sensation impairment and as a result, hearing impairment.

Besides deafness, noise can cause other bodily harm. The U.S. Public Health Service reports that "physiological changes including glandular, cardiovascular and respiratory effects may reflect a generalized stress reaction" to noise pollution. Some doctors believe there's a direct link between noise and heart disease, peptic ulcer, colitis, high blood pressure, migraine, and other health problems.

Community noise problems may generally be placed in two categories (1) noises produced outside the home, including industrial ground or air traffic, recreational, and neighborhood noise; and (2) noises produced inside the home, including small and large appliances.

Ground traffic may involve community noise problems from automobiles, buses, trucks, motorcycles and trains. Areas surrounding airports and on aircraft flight patterns may encounter quite serious community noise problems. Neighborhood noises such as those from power mowers, power tools, barking dogs and other such ordinary problems may present tension or annoyance to some residents.

Inside the home, various types and intensities of noise occur. These may be from such common home applian-

ces as the vacuum cleaner, garbage disposal, dishwasher, clothes washer and dryer, air conditioner and others. Even small appliances can produce noise problems in the home.

It is easy to determine from such a comparison that community noise sources can pose severe hearing problems just as industrial noise exposures do.

HOW'S The Electric Company DOING?

Let's ask Bert Ballengee — Reddy's financial man.

"It takes money to build for the future so that you'll have a dependable supply of electric power. We'll need \$345 million over the next five years. Of this amount, we'll have to borrow \$200 million. And, at today's interest rates, it's easy to see why electricity may cost more. But, it's all part of creating the good electric service you've come to expect from The Electric Company."

VICE PRESIDENT - FINANCE

Bert regularly visits the financial centers of the nation keeping in touch with the financial market and arranging for the millions of dollars it takes to assure your electric future.

Health Tips

This spring and summer ap-
 proximately 10 million Amer-
 icans will huff and puff, snee-
 ze, and wheeze and cough
 while dabbling at their watery,
 itchy eyes. The problem is
 one of the most common
 types of allergy--"hay fever".
 The Texas Medical Associa-
 tion notes that this unpleasant
 condition is neither caused by
 hay, nor does it produce fever.
 Hay fever is actually caused
 by a combination of exposure
 to pollen and a tendency to
 develop allergy. Susceptible
 people manufacture what are
 known as "antibodies" to the
 pollen allergens. When these
 antibodies combine with the
 allergens on the surface of
 cells, powerful chemicals are
 released producing these aw-
 ful symptoms.

Hay fever can cause the
 working person to lose an
 average of one work week per
 year. In addition to the mis-
 ery, it can affect general
 health through loss of sleep
 and appetite. Worse yet,
 complications can produce
 serious trouble with the ears,
 nose, throat and sinuses.
 Seasonal hay fever, caused
 by pollens in the air, is the
 most common type but it only
 occurs at the time of year when
 the plant causing it is in
 bloom. Spring hay fever is
 caused by tree and grass pol-
 lens; summer and fall hay
 fever is caused by grasses and
 weeds. In some sections of
 the state, pollen may be in the
 air nearly year 'round instead
 of the two months period expe-
 rienced in other parts of the
 country.

If you have hay fever, you
 also may find yourself sensitive
 to other substances--such as
 food, house dust, animals,
 etc. With the use of allergy
 tests, your physician may be
 able to determine which sub-
 stances are responsible.

After your doctor finds out
 the causes of your symptoms,
 he may suggest a series of
 treatments to reduce sensitivity
 and prevent further attacks
 for varying periods of time.

Various eye or nose drops,
 sprays or oral medications pre-
 scribed by your doctor may be
 useful in relieving the symp-
 toms of hay fever as many
 improved remedies have been
 developed recently.

The best protection against
 hay fever, naturally, is to
 stay away from the offending
 substance. Avoid exposure by
 keeping away from areas where
 it is prevalent. Your doctor
 can advise you regarding hay
 fever substances in your parti-
 cular area.

Resident Attends Denton Graduation

Mrs. Georgie Beasley and
 Mrs. Tom Weiser of Lake
 Charles, La., attended the
 graduation exercises of North
 Texas State University at
 Denton on May 16.

Among those graduating was
 Gary Joe Skelton with a Bach-
 elor of Science in Secondary
 Education with a Biology
 Teaching field.

Gary attended Jr. College
 for two years and was a mem-
 ber of Phi Theta Kappa, a
 national honor fraternity for
 the Jr. College. He also is
 a member of Kappa Delta
 Pi, an honor society in educa-
 tion at North Texas State.

Gary was a member of the
 1969 graduating class of Mc-
 Lean High and is married to
 the former Martha Beasley.

Mrs. Luther Petty was honor-
 ed on Mother's Day in the
 home of her daughter, Mrs.
 Zora Billingsley in Amarillo
 with the other daughter, Mrs.
 Nora Loveland flying in from
 Dallas from the occasion.
 Also present was her son Fran-
 cis L. Petty, who was return-

 ing with his mother. Mrs.
 Petty remained in Amarillo
 visiting relatives and friends
 there and in the home of her
 grandson, Vernon Kennedy.
 She also visited her sister-in-
 law Mrs. Roger Francis in
 Plainview. She will return
 home the last of the week.

Brush Management

Brush is a shrubby, low-growing woody plant that is found on thousands of acres of rangeland in Gray County. Brush competes with better grasses and robs them of sunlight and our scarce supply of water. In some instances, rangeland may be producing as little as 25-50% of the total pounds of grasses it is capable of producing. Brush plants commonly found in Gray County are shinoak, sand sagebrush and yucca. Shinoak can be controlled by spraying with 2, 4, 5-T from May 15 to June 20. Usually a follow-up spray the next year is necessary for good control. Deep plowing 10 to 3- inches depending on soil type will give good control but the area weeds to be reseeded following plowing. Sand sagebrush can also be controlled by spraying or plowing. The best time to spray is from May 1 to June 15 using 2, 4-D. Spraying yucca with 2, 4, 5-TP just before blood stage not earlier than May 15 or later than June 30 will give adequate control. Sprayed areas need rest during the summer following spraying to give grasses a chance to make sufficient growth so they can compete against any brush regrowth the following year. Overgrazed and overstocked ranges do not have grasses vigorous enough to compete with brush plants. Without proper grazing management, brush control is useless.

Also, wildlife habitat must be considered in a brush management program. Some brush should be left at selected spots for wildlife cover and food. Draw areas can be left in brush for quail and prairie chicken cover. Deer and turkey need larger trees for cover along bottomlands. For assistance in developing a brush management program, contact your local Soil Conservation Service office.

Baseball News

A new sport has been brought to life in the area-baseball. Two teams, the Cubs (Pee Wees) and Tigers (Jr. High) have been practicing to play games with area teams this summer.

The Little League Tiger team under Coach Cecil Reynolds won their first League Game last Tuesday night in a 13-3 victory over the Shamrock Yankees. Their next game will be held Monday night, June 2, at 6:00 p.m. when the Cubs take on Shamrock's Phillies in their first Pee Wee League game at Shamrock. At 7:30, the Tigers will attack the Little League Orioles.

The Tiger team consists of fourteen local youth: Stewart Ryan, Randy Suggs, Mike Smith, Brad Melton, Kevin Meacham, Mike and Dennis Butolph, Dudley Reynolds, Spooky Smith, Melvin Willis, Allan Turpen, James Matheny Terry Todd, and Mark Morris.

Practices will be held weekly. Thursday night the Little League will practice at 6:00 p.m. Pee Wees will practice at 6:00 p.m. on Friday.

Interest Rate On Tax Bill Jumps

The interest rate for taxpayers who are delinquent in paying Federal tax bills, or have been granted extensions of time to file, will jump to 9 percent per year beginning July 1, 1975, according to the Internal Revenue Service.

A.W. McCannless, district director of IRS operations in North Texas, said today that the higher interest rate will be charged on all overdue taxes as a result of legislation enacted on January 1, 1975. The present rate is 6 percent per year on most taxes.

The government, which now pays 6 percent per year on overpayments by taxpayers, will also pay 9 percent interest starting July 1. Interest becomes payable if the overpayment is refunded to a taxpayer more than 45 days from the due date of the tax return, or from the date the return is received by the IRS, whichever is later, McCannless said.

In addition to hiking the interest rate to 9 percent, the law provides for increasing or decreasing the rate in the future, to keep it in line with the prime interest rate commercial banks charge their largest customers.

FBLA Plan Bake Sale Saturday

Friday, May 30th the McLean FBLA will sponsor a bake sale to be held at Simpson's Market, also a garage sale will be held starting at 9:00 a.m. Saturday May 31 at the home of Mr. and Mrs. Joe Billingsley across the street from the high school. These projects are just some of the many money making projects that the FBLA members of 1975-76 will be undertaking. We will appreciate your support.

Cates Votes No On Appropriation Bill

State Representative Phil Cates voted against the massive \$11.9 billion dollar appropriation bill in the Texas House of Representatives.

"Far too much money is being allocated for boondoggle projects and unnecessary plans that only benefit the big cities," Cates said.

One especially sore spot Cates pointed to was funding appropriated for a state park site that would be built in a salt water marsh area.

"Spending funds for this pro-

"ISN'T IT ABOUT TIME YOU FIXED THE LAMP?"

ject is simply ridiculous," Cates said. "One hard storm would sweep away the portion of the project that is scheduled to be built two feet above sea level."

"I have always been opposed to big spending in state government," Cates said. "We are, after all, in 'waste not, want not' times in Texas and thrift should be the by-word---not spend, spend, spend."

"I am hoping that the questionable areas in the appropria-

tions bill will be cut when debated in a conference committee with members of the Senate," Cates stated in conclusion.

"Texas, I believe can adequately finance the needed areas of public education, health, highway safety others by enacting legislation for the public good yet, at the same time trim the fat from unnecessary state expenditures."
