ROLE OF THE BULL DOG

By CHARLES SLOAN REID.

Miss Catherine Doskey was noted for doing unconventional things. But there were five men at the White

Plains hotel who seriously wanted to marry her, though not all of them were seriously in love with her, for two of them were of the insusceptible sort and were thinking only of Miss Doskey's beauty and her financial at tractiveness. Three others were in love, enwrap ped and entangled beyond the hope release, and among these were Trent Gilmore. Trent was just

of college and, though he had loved Miss Doskey for some time, the last few weeks had added desperately to his burden, for burden it was when Miss- Catherine

persisted in throwing him somersaults, as it were, every time he became so bold as to attempt to offer himself and all the prospects of his ambition at her feet.

But one evening Trent saw her stealing away from the hotel with a book in her hand, and he knew she was off for a quiet afternoon in some shady dell of the forest not far away: and he determined to follow her later on in the evening.

It was near sundown when he set out. After a walk of twenty minutes. he had passed entirely through the large body of woodland lying north of thing of Miss Doskey. And beyond the forest was an old apple orchard.

Climbing over the fence he dropped heavily to the ground inside the orchard and started across the lot. But he had not gone a dozen yards before a deep, bass growl, coming from an indistinguishable source, suddenly smote the air and sent a chill along Trent Gilmore's spine, which was accompanied by those tremors that only the voice of a bull dog can induce.

There was just light enough left to discover this, and Trent made a wild dash for a tree. He caught the limb and dragged his feet clear of the ground just in time to save his ankle from the vicious snap of the beast.

And the space between Trent and the bull dog still seemed entirely too small. He reached outward in search of an adjacent limb by which he might steady himself preparatory to climbing higher among the branches, and his hand came down upon a very tiny, warm, pulsating little foot.

"Catherine, I've found you," exclaimed Trent, as soon as he could find his voice.

Some time during the night Trent got Miss Doskey's hand in his and kept it. Then, after awhile, the chill of the night atmosphere grew insistent, Catherine shivered and yawned, her head became tired, her eyes heavy, and Gilmore drew her close to him, cloaked her about with his arms, pillowed her head comfortably upon his shoulder-and her deep breathing whispered to him of sweet sleep.

The morning sun climbed from his bed and smiled down upon the two in the tree top, and Catherine's eyes opened wide. For a moment she gazed about her.

"Oh, oh, now comes the ordeal," said Catherine.

"But we shall announce our engagement at once, shall we not, sweetest?" 'Are you quite sure you are not now playing the martyr?"

"Not by several bright heavens of happiness, dearest."

The rescuing party had been out since early in the night searching for Miss Doskey. Among those composing it were four young men who very suddenly thereafter found White Plains hotel a very uninteresting place, and they departed therefrom during

PEARLS FIND READY MARKET

Thore From the Mississippi Only Slightly Second in Demand to Deep Water Products.

Arkansas is the greatest pearl producing state in the Union, and hundreds of men engage in the pearl hunt. It is said that the fresh water pearl of Arkansas of the highest class cannot be distinguished from the finest deep sea jewel. Throughout the south generally thousands of people 03 follow the pearl fishing industry and make a comfortable living at it. Up to a few years ago the jewel wealth contained in the river beds of the Mississippi valley was completely hidden. It was not supposed that the of fresh water mussel was a pearl bear-15 er, or that it had any value except for 2 | fish bait.

The fresh water mussel is sought now not only for the precious stone it may have hidden in its shell, but for the shell itself, which is manufactured into stick pins, cuff links, and buttons of every description. The shell fisheries have for years extended far up the Mississippi river. A recent writer on the subject puts fresh water pearls into four classifications -true pearls, baroques, slugs, and chicken feed.

The first, or true, pearls are of a definite shape, and regular form, round, oval, or pear shaped. These command the highest prices. Baroques are pearls of irregular form. Slugs are low grade baroques. The smaller size, the kind used in inexpensive though genuine and neat jewelry, go by the professional name of chicken

Scholars Question Whether the Apple Was the "Forbidden Fruit" in the Garden of Eden.

Why and how it has happened that the apple has been spoken of as the fruit that was forbidden in the Garden of Eden is one of the great puzzles of Biblical scholars. The fact is that in Genesis 3, where the incident of the eating of this fruit of the "Tree of Knowledge of Good and Evil" is mentioned, no name whatever is given to the fruit. All that is said is: "And when the woman saw that the tree was good for food, and that it was pleasant to the eyes, and a tree to be desired to make one wise, she took of the fruit thereof, and did eat, and gave also unto her husband with her; and

he did eat" (verse 6). In fact, scholars doubt very seriously whether it was the apple at all. They suggest that all evidence points to it having been the quince, fragrance of which was held in the highest esteem by the Orientals. Another point in favor of the quince is that it is the fruit which was sacred to Venus, the goddess of live, and in a great many of the ancient writings the quince is very frequently mentioned in this manner. In Babylonia Ishtar took the place of Venus in the Roman mythology, and it should be remembered that the story of the creation originated with the Babylonians. All evidence seems to point away from the apple having been the "Forbidden Fruit," and towards the quince as having been that fruit of the "Tree of Knowledge of Good and Evil."

Wordsworth on Real Estate.

There is an interesting story of Wordsworth, who went to call on Miss Harriet Martineau at Ambleside, in the house which she had built and laid out, writes A. C. Benson in the Century Magazine. There was a gathering of neighbors present, and Wordsworth and said:

"Miss Martineau, I congratulate you on your beautiful little domain. The views are wonderful, and it will turn out to be the wisest thing you ever did in your life."

He paused for a moment, and the guests expected some comment on the

Spiders Catch and Eat Fish. Specimens of the spider known as Thalassius Spenceri are in the museum at Durban, Natal, and the curator, E. C. Chubb, has just made scientific announcement of the discovery

One of the spiders was captured several years ago by the Rev. N. Abraham at Greytown, and it was placed in an aquarium. A servant boy soon noticed the creature eating a pet fish, and the startled clergyman left his study to watch.
