Singleminded to the interest of education, the people of Tahoka are directing their energies to what might be termed, "a great school movement," The board with this in mind has lost no opportunity to make this term of Tahoka Public School the best in its history. And from a teacher's point of view, no lack of energy will be the cause of a failure this year. While this is the case we realize very forcibly the need of co-operation upon the part of the patrons. Therefore we most respectfully solicit your hearty co operation in this

school of 1911-12. Pupils are requested to report at the school building at 9 o'clock with the texts they pursued last year together with reports of the work completed last term. This will be necessary as it will be helpful to the teachers in charge in getting pupils classi-

Tangled In Live Wire At The Fire.

Gus Otto, one of the fire boys, got taugled up with a live electric light wire just after the fire Monday night, and had an experience which he does not care to ever again repeat.

The current on the northside circuit was turned off when the fire started, but was put on again County News will kindly return M. Bartley, of this city, returned after the fire, and Otto came in contact with a wire from one of the transformers in the vacant space between the Third National Bank and Sewell's grocery. He had on his rubber coat, but was barefooted. The wire at once wrapped about his body and limbs, he was thrown to thu ground, and at once began calling for help. Messrs. Dorsett, Les Harland and Peyton Rar dolph went to his asistance, and in the excitement Mr. Dorsett came in contact with the wire and was thrown a somersault. Finaly they got Otto loose from the wire. His neck and one of his legs were burned, but otherwise he was not hurt.

We have been told that the current was of only 110 voltage hence was not sufficient to have killed him. - Plainview News.

Contract for Ketner Building Let.

Last Saturday J. E. Ketner let he contract for his new brick siness building to Charles D. sler for \$3,650.

While this will be the third rick building to begin construction work, it might be said to be the first mercantile building as the others are the public school uilding and the First National Bank building.

The Ketner building is to be 0x75 feet, one story with 16 foot walls and a solid plate glass front. It will be built on the

BELIEVE thoroughly in intercollegiate sport, but, in general, viewing the number of athletic contests occurring between coleges throughout the country, I should say unhesitatingly yes to this question. The tendency of the last twenty years has been toward the increase of intercollegiate contests in each sport, and the addition of new sports, until the number has passed the normal for an institution of higher learning. Schedules of over 25 games in term time in any branch of intercollegiate athletics certainly transcend the laws of proportion in college life. The general public recognizes that.

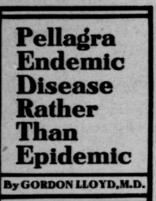

Any reduction in schedules concerns the scholarship, the physical condition and the ideals of the men on teams and the ideals and finances of the student body. All these factors should be given due weight, therefore, in determining their length.

Of these scholarship, of course, stands paramount, but the views of athlete, manager, trainer and coach should receive due consideration and if possible a harmonious result obtained.

For training and coaching a team a certain number of contests are necessary. Sufficient financial returns come only from a number of games. The interest of the student body in the sport is maintained only by a modicum of exhibitions.

The ideal number of contests in each spoft may be considerably less than that at present engaged in, but the reduction should not be made so suddenly as to lose the support of all concerned. History may be made too fast and have to be unmade. For instance, one may consider one game of baseball a week or ten in a season, the ideal for a college, but a reduction from twenty to eighteen the first year may be all that it would be wise to make. Schedules, however, should never be so long or require so many absences as to make special legislation on the part of the faculty for athletics necessary. This militates against the democracy of the college.

> The "delayed varsity season" plan suggested by Mr. Derby, a former Harvard varsity football player, in the Outlook last fall has much to commend it, especially its fostering of widespread collegiate sport. It consists in allowing only about four weeks for the varsity season in each sport previous to which there shall be as many teams as possible-interclass, interfraternity and what not-in which the athletic material shall get conditioned physically, learn the game and be tried out for the varsity squad. Intra-collegiate games having concluded, an end-of-the-season varsity series concludes the schedule.

Pellagra is not hereditary. Pellagra is not contagious.

Strong evidence points to the "sand fly' as the agent responsible for the transmission of pellagra to human subjects in Italy.

These statements are extracts from the reports of Dr. Sambon, who was sent by the pellagra investigation committee to Italy to investigate the pellagra situation there. There are more than twenty hospitals for the exclusive care of victims of pellagra in Italy, and Dr. Sambon carried his exhaustive studies into the provinces of Perugia, Rome, Padova, Milan, Brescia and

Bergamo. He reports that the disease is endemic rather than epidemic, and that the centers of infection have remained the same for a century He found that when a person affected by the disease moved into a nonpellagrous district no spread of pellagra occurred. He observed, horeover, that wherever pellagra was, there, too, was the sand fly, and that tillers of the soil who were most exposed to this fly were oftenest affected

The sand fly is a midge, or gnat. Whether we have the same kind of sand fly in this country that Sambon studied in Italy the writer is not prepared to say; but he is informed by a state entomologist that we have with us in the south a small gnat-like insect called the sand fly. Our sand fly, however, seems to be largely restricted to the coast country, not penetrating very far inland, as a rule. The puncky of the Adirondacks is one variety of said fly, also.

Dr. Sambon's theory is that the sand fly is the carrier of the paraof pellagra, whatever they are. The fact that the parasite of pellagra has not been identified does not necessarily count against his theory, because no one now doubts the role of the mosquito as the carrier of yellow fever, despite the fact that the germ of yellow fever has never been discovered. Are we about to add the gnat to the mosquito as the distributor of in January or February and marketed a great disease?

All true southerners will pray that time may justify the sand fly theory of pellagra transmission and infection; for, like our beloved Joel Chandler Harris, whose tribute to the corn-meal dumpling is so full of charm, we hope long to cherish the hoecake and the pone.

Those Who Succeed and Others

By B. G. CLARKE

I am glad that some one has a good word to say for the members of the unfortunate class whom custom stigmatizes as "bums." When people get a little virtue their first instinct seems to be to blacker the character of others in order to secure a contrast which can show up their own imaginary white wings. The first man they meet who is penniless or sick falls a victim of their virulent vanity.

No one who has seen life has missed the sight of some cheap braggart, elated with some little success, browbeating and arro-

gantly overpowering some poor fellow who happens to be less experienced, younger, older or otherwise at a disad-

I, for one, believe that phenomenal success or failure is accidental While andoubtedly one of average ability and average industry stands an everage show of meeting with average success, it does not follow that a needy man deserves his misfortune or that a billionaire is excessively vir-

No polite man could sit at a table and devour all the good food in sight while others out of reach of the dishes sat fasting.

The excessively rich need not worry as to whether the extremely poor are or are not deserving and appreciative.

The giver gets his reward whether the recipient profits or not.

Pair of Prize Winners.

SHEEP FARM PROFITS value of the sheep as a preserver of

Many Valuable Services of Animal Not Fully Credited.

Need Variety of Feed, But Will Do Great Things in Ridding Place of Various Weeds-Three Avenues of Money-Making.

(By W. A. M'KERROW.)
The most profitable and pleasant kind of farming is that which embraces the growing of live stock. The farmer who is continually taking fertility away from his land by selling grain crops is a robber of the soil. In a trip through a rural community we will invariably find that all the most prosperous farmers are growers of live stock in some form, and the far-sighted ones, those that intend to leave a better farm than they found, have sheep. Sheep serve a threefold purpose and many of their most valuable services are not fully credited. They have been one of the chief tactors in the development of British agriculture, and wherever given an opportunity have done wonderful things in our own country. The fame of the sheep as a killer of weeds and general scavenger has in many cases really done them harm. It is not possible to make a flock of sheep pay and make them subsist entirely on weeds and rubbish which other animals will not eat. This must be distinctly understood, but on the other hand, they want a variety and will do great things in ridding a farm of weeds. They relish young burdocks, ragweed, dandelions and will eat thistles if sprinkled with salt. Their three most

important avenues of profit are: First,

mutton production; secoid, wool pro-

duction and, third, the preservation of

Mutton as a food is gradually becoming more important and prices should remain steadily on the increase regardless of the increas of supply. There is no reason why the American people should not eat as much mutton per capita as the English, and this would mean practically a doubling of the present consumption. Furthermore, the big flocks on the western prairies are gradually decreasing and this deficiency must be supplied from some other source. There is a bright future for the farmer's sheep. The cost of maintaining a flock of sheep is very light, and with fair wool prices, the fleece should nearly pay for the year's keep. Then we have the lamb as profit and pay for our time. The time spent in caring for the flock is a small item, and in summer should be considered as a recreation. Lambs of some good mutton type should be ready for market at from three to seven months old, depending on the trade which they supply. The small flock owner will usually find a good local demand, especially for the early or Easter lambs. Any man located near a large city will find it profitable to grow early lambs, to be dropped about Easter time. The selection of good ewes and a pure-bred ram of the right type are essentials in this business and are great factors in the successful flock, no matter what the aim We must have breeding before good feeding can help us. The best ewe lambs must be retained and ewes past their usefulness discarded. It is impossible to set any definite age at which ewes pass their best, for it is largely a matter of individuality.

maintenance fund, as we call it, is the fleece. Wool prices have been rather discouraging this year, but there are numerous causes for this, and it is not likely to occur again. Tariff agitators and the manufactureers have both been working against the poor grower and consequently prices have been low. But taking normal prices, we find that a good clip becomes quite an item. It is possible to get a fairly heavy fleece without sacrificing mutton conformation, and this is the type that is most profitable. Length of staple is necessary, but the fiber should be fine and of sufficient density to shed rain. The sheep with a long, coarse fleece that parts along the back as soon as wet is subject to colds and other relegated diseases. The time for shearing and marketing the wool is subject entirely to local conditions, but we do not think there is any danger of not finding a ready market at the current price. American woolen manufacturers import large quantities of wool each year, and even without a tariff could afford to pay a higher rate than the present price. Last, and of great importance to the farmer is the Both are always ready.

The second source of revenue or the

that of the sheep is most valuable. Feed given to a sheep will either be utilized in making mutton or returned to the land in the most useful form for plant growth. They thrive best on a class of food which is in itself helpful to the land upon which it is grown. Clovers and alfalfa are suitable for the bulk of their ration. The great danger in a mild climate is disease. Sheep are especially subject to parasites and parasites multiply very rapidly during warm weather. Let a flock become thoroughly infected with the deadly tape worm or even the little stomach worm, and they are perfectly useless. Keep them healthy an with a moderate amount of feed they will always be fat and ready to turn into money. Old pastures are the spreading grounds for the intentinal parasites, and it is the lambs that are harmed by them. It is entirely during the warm weather that the worms can be contracted, and it is from short grass that the lambs usually get them. The older sheep drop them in their feces, then they breed if the weather is warm and are ready to be taken in by the lamb that nibbles the grass whereon they are lodged. New pasture fields for the lambs in the summer months are an essential to profitable sheep farming. The danger of keeping too large a flock is very imminent where the acreage is small.

There are certain qualifications which a man must have before he can be successful with sheep. He must be willing to pay some attention to them and know when they are ailing. During the lambing season there are many little things that require attention, and in order to do them right a man must have a real love for his work. The time required in caring for them is not long, but the way which it is done is important. To him who understands the sheep there is a certain pleasure in caring for them which no other occupation can afford. Gentle, cleanly, intelligent and quick to respond to good treatment, the sheep affords a source of pleasure and profit combined.

If a colt is worth raising at all he is worth raising well.

Milk clean, but do not "tug" to

keep up the milk flow. The drains should be properly laid

out and carefully graded. A little care at farrowing time will

often save a valuable litter. Study the methods of successful

sheep men and imitate them. Encourage the boy to fit some live

tock to show at the local fair.

A small amount of linseed meal added to the horse ration is invalu-

Wherever you find the dairy cow you will find a well established civili zation.

A bull tied in the stall will get lazy and useless, besides making extra work in his care and feed. Bran is coarse and fibrous, and

therefore not the best feed for the digestive organs of the pigs. The real value of a sheep cannot be

determined, particularly as a breeder, until he is one year of age. A dairy farm of a dozen cows can

maintain a flock of fifteen to twenty sheep almost without expense. Rich horse manure and urine from

grain-fed cattle is far superior to fertilizers and very much cheaper. Grubb files worry the sheep in hot

weather. Provide a dark, cool shed or let them run in thick underbrush. Leaf blight is the disease that makes black spots on the leaves, and often defoliates the trees in August and early September.

Millet is a catch crop. It grows best in hot weather and feeds in the surface soil. Three pecks per acre is about the right amount of seed to sow,

Good Implements Essential.

Good garden implements are essential for successful gardening. Much of the benefit and pleasure derived from work in the garden is missed by having poor tools.

Dried Beet Pulp.

Dried beet pulp may become as much a standby for green feed as meat scrap is a source of animal feed.

CHAPTER XII.-Continued.

"And that's what might have hapd, oh, so easily, to you. Yes, it I've been realizing that. And I shan't forget." Her eyes had brightened and she pressed her hands to them for just one moment; then she ed up briskly. "Anyway, I'll not make a scene about it now," she said. "I'll show a little practical and help you with the break-

"No, we're camping out today, and on such occasions the men always do the cooking. Go back to your book while I skin this fowl and dress it." Then as she still hesitated, he went on: "The most beautiful garment I ever saw, anywhere, was on a Chucotte Indian girl. It was made of nothing but the breasts of these eiders. But the process isn't pretty. I'd much rather you went back to your book."

Secing that he meant it, she did as he asked. A single half page of what was written upon those closely pages was enough to absorb her completely. The power it had to lessen. When Cayley came up with the big bird which was to serve for their breakfast, impaled upon a sharp sticks ready to be roasted over the fire, she no more than looked up at with a smile very friendly, but her reading. He crouched down near by her, built a little frame-work of sticka above the fire and began his

was, perhaps, ten minutes after d up at her, she was looking sat erect. seaward-out over those miles of plunging, heaving ice. And, under his face, were still wide with fear-a lips trembled. But in an instant her eyes, her face turned white as marble. deeper-seated fear, really, than her first will had taken command again. "I

did not move at all and they looked as if they were frozen. He could not see that she was breathing. Her eyes were turned away from him and he was glad of that. For another moment re, at least, he need not read the look in them. For now, at last, he was sure she understood. He himself fixed his eyes upon the fire and

"There's something here." she whisered, "here in this book of father's, that-that I want you to read."

It was still open at the page she had en reading when she had dropped t. With his first glance at what was written there he saw how she had come, so suddenly to understand.

September 18th.-Field-ice came into the bay last night, just as it has come at about this season in the two preceding years—a dense fog and a whole gale blowing from the east. To me its coming is a relief. It is, in a way, the official beginning of winter. The tantalizing hope of a rescue is now put away on the shelf to wait for another summer. After all, to men in our condition a temporary hopelessness is much more comfortable than hope itself. The long winter night reading. gives an opportunity to revive our belief that with another season of open water, rescue will come.

"I have been very busy lately stocking our larder for the next six months. Fortunately, I have succeeded in killing bears and walruses enough to keep us supplied. I wish I could feel as easy about our fuel. We have swept the beach clear of drift-wood, but shall have barely enough to get through the winter with. For myself, who have no real hope at all, it doesn't greatly matter. I greet the dawn of each of these interminable arctic days with intense weariness. And I never bid farewell to the sun for another winter without an involuntary 'In manus

Cayley read the entry through slowly. "I'm glad it happened this way," he said when he finished, "glad it was your father who told you. All this past hour I've been wondering how I could tell you, how I could make you understand."

The girl had been half-reclining upon the great sheepskin, her weight supported by one hand. While Cayley read, this support fatled her, and she sank down, rather slowly, until her head was buried in the arms which were stretched out as if in blind sup-

As Cayley spoke, he covered those clasped, outstretched hands with one of his own. The touch and the sound her seemed to grow rather than of his voice steadled her a little.

"You've known, then, from the first?" The words came brokenly, half-voiced, muffled. He bent down over her to hear

them. "Yes, I knew from the first." He said no more than that just half-apologetic, and then went on with then, but remained as he was, his possibly have foreseen." hand covering her two, holding them tight, his body bending over hers protectingly

After a little while she ceased shuddering, and answered the pressure of know. Ours isn't as simple as that" when he saw the book drop sud- his hand with a sudden clasp of her from her hands. When he two; then drew them away again and

Her eyes, when they rose to his is lips were parted. They momentary panic. But now she had

and spoke steadily

think?" "For the Aurora to come back? No,

not this season, at least; no possible chance. "And-how much ammunition have you, Mr. Cayley?"

"Thirty-one cartridges, besides the ones in the revolver."

He would have said something more but with a little gesture she prevented him. "You've been thinking it out," she said. "You know what it means now, and I-I feel that I don't. I can't me a little time to think, too."

He had to assent to that, though he knew, in advance, the direction her thoughts must take, and foresaw the dreadful conclusion of them. And the answer he had to make to that conclusion? Well, he had it ready.

How long that silence lasted, neither of them knew. He sat there beside her, and yet even his eyes allowed her perfect solitude. He mended the fire and attended to his cooking as quietly as before, when the girl was

Finally a little move of hers, preparatory to speech, gave him leave to look at her. In those silent minutes, however long they were, her face had changed. It was grave now, intensely thoughtful, but the color had threat that calls itself a promise?" come back into it. It was alive again.

"When I asked you a while ago if there were any chance, you asked me if I meant a chance for the return of the Aurora, and said there was none. That was what I meant then, but it's not what I mean now. Is there any chance at all? I haven't been able to see any myself, and I've been over it they sent a boat ashore for you, I all pretty carefully. Do you see any? You-you must tell me the truth,

"I haven't been trying to assess the chances. I spent my hour thinking about something else, and I can't answer your question really with a yes or a no."

"Not with a yes, but can't you answer it with a no? Aren't you perfectly sure, in your heart, that there's no chance at all?"

"Not yet," be answered. "There may be a chance, and if there is, we can meet it half way." Then he stretched out his hand. "That redbound book there is our Bible now. Do you remember what your father said? 'We can live like Christians, and we can always hope.' He thought. when he put that bottle, which contained his message, into the sea, that there was hardly one chance in a million of its resulting in an effectual relief. Yet he went on living as a brave man lives, a day at a time. And when he died, he died without fear. Doing that, he not only helped himself, but he helps us in a way that he couldn't

Her eyes filled suddenly with tears, and a smile, of a divine sad tenderness, touched for an instant her mouth. "But that isn't our case, you "What makes the difference"

"Your wings." She said it hardly above a whisper, and as she said it she turned a little paler and her brave am sure you see. It's quite plain." she went on steadily. "If you will spread them, those great wings of yours, and take to the air with them, and fly away, as you are free to do, and leave me here alone, as I really am alone, the only person marooned here-if you'll do that, then I'll follow my father's gospel.-But you won't go away. You can't-not a man like you, and I know that. I know I mustn't even suggest it."

Her voice sank again and grew unsteady. "While I am starving, you will be starving, too. And while I am freezing, you will freeze." She stopped there with a shudder and a deep, gasping sob; then, "Won't you go?" she cried out. "You said once that one of us might be dreaming, but that one was not I. Can't you believe it's so? Can't you wake up from the dream that is turning into a nightof it!"

There was the conclusion he had could formulate it-the inevitable conthat the answer was ready.

But before he could speak she tion of mood, which left him gasping. The face she turned upon him now was radiant, flushed with life, fearless. She held out both hands to him. to forget it ever happened, and you're for me?"

Her color fluttered like a flag at

"Thank you-Philip."

"We'll have our holiday, Jeanne but we must have a better understanding

"No! No more!-I can't!"

But he went steadily on: "You said rights. During the five years that I with a roast duck." spent at Sandoval I always regarded when I chose. Perhaps that is one of the reasons I never exercised it. But, quite realize it yet. You must give Jeanne, if you elect to take that way, I shall take it with you."

> She struggled away from him, turned and faced him with horror-stricken without dismantling this one. There eyes. "You must not say that! You've no right to threaten me with that! No right!" Then, clutching at his hardware store where they could have hands again, "You must promise!"

Again she pulled her hands away and covered her face with them. She was trembling uncontrollably.

ily. "It was a promise, a promise I it's in pretty good repair." have the right to make. I make it again, now, Jeanne a solemn promise before God. Whether it's living or dying, I shall go beside you."

"No right-" she repeated in a whis per. "What possible right could you have to make a promise like that-a

"I have the only right there is. Listen. Last night, when you were lying there asleep, I sat thinking, thinking about you, about the love I had for you; about the change which that love had made in me and would go on making after I had lost you. For I faced losing you. I knew that when should have to let you go without a word. If I could have heard a prophecy then, that today I should be telling you I loved you, telling it with a clear heart and conscience, I should have gone half-mad for joy. It seemed as if the thing could never happen. I am a man with a stain upon me, and yesterday that stain made it impossible to say anything to you but goodby. I meant to say it, and take my way through the air again and live out the rest of my life on what, from your bounty, you had already given me.

"But the coming of a new day has changed all that. It has given me the right to tell you what I have told you, and it gives me the right to make that promise. Isn't that quite plain? Don't furnished. The great heap of smokeyou understand?"

"I must think," she gasped. "You must let me think."

"No," he said. "I have not asked for in answer. There is nothing that you have to tell me. Nothing that I'm waiting to hear. No decision that you must make. You understand what I said and you know it's true. The supreme fact in my universe is just you. That gives me the right to follow you wherever you go. But you are still free. You can stay here, where Fate has put you, the black smear it left. and let me stay here, too, being sure that all the happiness in the world there is for me is to be found here at your side, in helping you. And then if the torture of privation, loneliness and despair become too hard-"

She turned to him then and interrupted. Her words came quietly, unaccompanied by any gesture of her expressive hands. She spoke with the utmost simplicity.

"They won't be too hard. I thinkneither the privation nor the loneliness. There won't be any despairnot with you, my friend. And-and we will follow my father's gospel."

She saw the blood go ebbing out of his face, and then come back with a surge. He drew in two or three great breaths of the keen, winelike air, Then, in a strangely matter-of-fact fashion, he seated himself beside her. "That gospel begins with breakfast," he said.

CHAPTER XIII.

Captain Fielding's Gospel.

Side by side, upon that great sheepskin, they sat, those two people, in the very lap of death. A reasonable estimate of their chances would give mare, and fly away? .- No, you can't! them, perhaps, a week to live. With long ago in an attempt to pull them You can't!-There is only one way out exceptional fortune, that week might out. And that patch on the wall was which he thought would serve till stretch itself into a month. The great put on within a month. The men greater leisure should allow him to blue spirit of the arctic would darken foreseen, had foreseen long before he to purple, and to black. The icy hand ly and showed no great degree of imag- and looked, first down and then up of the savage polar winter would get ination. They hadn't much time, you clusion that had led him to pray for its clutches upon them. They had an hour. And now he thanked God nothing to resist it with. No stores of ammunition or of food. No clothing, of the yacht. They had finished the except what they wore. No fuel, save job before they could send a party turned to him with a sudden transi- what they could contrive to gather ashore." along the talus before the winter gales would make further search impossible.

Neither Jeanne nor Cayley was of a sort to face the prospect of that death "Come," she said: "that's over. You're with resignation. They were young, intensely alive, and with Jeanne, at to do something for me that I want. least, the best and biggest part of life Will you? I want this for a holiday, lay, or had lain until yesterday, in a did you mean about the drift wood?" just as I set out to make it when I broad open road before her. But a saw the yacht was gone. The day's prospect like the one that lay before as bright as it was then, and we them brings its own anaesthetic with can make the hours pure gold. It all it. It was so utterly hopeless that it They've been burning coal-or oil, perdepends on us. Come, will you do that became unreal. The face of the future, haps. I hadn't thought of that. That's into which she had cast just one hor-Giving him her hands, she had rifled glance, was so hideous that to there on the talus. You remember

ously. That is partly the reason why she

that, and she caught her breath, succeeded in surprising Cayley by sitting down to breakfast with him in the same mood and spirit which she had shown before when she did not know.

"I'm about half famished." she said as they began their meal, "at least there was only one way out, and I that duck smells perfectly irreknew what you meant. It is a way sistible. It's done to a turn, I think, out-a way that I can't deny your In a way, it's rather a joke that we right to take, if we're talking of should begin our arctic privations

"There's something queer about that it as a right that I could exercise hut," he said, "something that gets queerer the more I think about it. Why do you suppose the Walrus people abandoned it? Or, rather, do you suppose they did abandon it? They couldn't have built another house are no trees on this land to furnish timber, and there certainly isn't any those doors swung on hinges. But those doors swung on hanges last night and the bolt worked, and, more or less, the walls and roof kept out

> The girl was only half convinced. "That great heap of stones in there," she began, "doesn't look like good repair or recent habitation."

"No it doesn't," he rejoined. "It's been made to look as little that way as possible. It wouldn't have got into that condition otherwise in 100 years Come, let's have a look. It's something to hope for, at any rate."

"To hope for?" she repeated questioningly.

He had already entered the but, and did not at once volunteer any further explanation, but from the shine of excitement she could see in his eyes, it was evident that he contemplated something better than merely holding death at arms' length for a little while.

To the girl's eyes there was but little about the interior of the hut to account for such a hope, even though she saw that all of the things he had said about it were true. The filmsy inner doors were still hinged to their frames, and were provided with a miscellaneous assortment of catches. It was marine hardware, all of it, evidently from her father's ship, the Phoenix. The bunks and shelves which lined the walls looked perfectly solid and well built. But the general appearance of the room presented a look of disrepair. It was absolutely unblackened stones, of various sizes and shapes, and the hole in the roof above them, attested that they had once been a fire-place.

From the forlorn aspect of the room the girl gladly turned her eyes away and stood looking at Cayley instead. He had been sweeping the walls," roof and floor in a general survey. Now, abruptly, he went over to the heap of stones, picked up one of them, rubbed his thumb over it and scrutinized, with an air of considerable interest,

"That would account for the driftwood," he said absently.

At that he might have seen in the girl's face a look of half-amused im- "You'd Better Take Belt and Holster patience, but his abstraction was too deep for him to notice it.

walls, pulled open what proved to you go and begin carrying in fire be a big solid shutter, revealing a wood, and as many of those ducks and glazed window, and, for a long while, geese and loons as you can find there stood there, unconscious of the look along the talus?" the girl had turned upon him, unconscious of his present surroundings.

"Yes, something to hope for, certain-He turned away from the window as he said it, and smiled at her. that when the relief comes back next smile with one of her own, she added: summer they'll find you here alive."

the girl, "because you told me the ders-only-" truth before. But do you mind telling me why?"

though if you look closely you can see that some one gave a tug at them not see, because they couldn't have begun until they caught their first glimpse

"But why in the world should they do such a thing?" the girl protested. worked that out yet, not fully, at any rate. After all, it's not the question that concerns us."

"Why, the soot on these stones burning drift wood in this fire-place. need it. So they must have had some ne. other sort of fuel."

"You mean they've got a supply somewhere-hidden?"

He nodded. "Not only a supply of fuel, but of food, too. You remember your father also speaks of having his larder completely stocked for the winter at this time? Well, these fellows weren't expecting any relief. They must have stocked their larder, too .-Of course," he went on a moment later. "I realized vaguety all along that there must be stores somewhere here on the land because men were living here, but on the theory that they had abandoned the beach and were living in some undiscovered part of the mainland, our chance of finding those stores was almost nothing at all. Finding them would be like trying to find Point Barrow in a fog. But you see, if they kept them here in these huts, and then hid them when they caught sight of the yacht, while they may be well hidden, they can't be far away. There wouldn't have been time to move them far; certainly not over the glacier and into the interior there. "It was not a threat," he said stead- the gale. For this style of architecture It must all be hidden somewhere, here on the coast. When we find that hiding place, we shall probably find all the stores we need for the winter." "Then, I suppose, the next thing for

us to do is to go out and find it.'

"Not quite the next thing. Unless we have exceptional luck, we can hardly hope to find it for several days; it may take a fortnight, and we must have some temporary security first. In the meantime there is no telling what sort of weather we will have. It's rather late for these beautiful, mild days, I fancy. No, the first thing to do is to rebuild this fireplace and bring in a lot of drift wood and all those birds that were killed last night by flying against the cliff. When we have made this hut habitable against a spell of 40 below zero weather, such as we're likely to have at any time, and have accumulated stores of fuel and food for a few days, then we'll begin our search. I had better get to work at once. I think I can re-

and All."

He walked over to one of the side build this fire-place by myself. Will

She nodded, and turned to leave the hut. "Take the revolver with you," he called after her.

At that she halted abruptly in the doorway. "Why should I have it any "A good hope—a good fighting hope more than you?" Then, answering his "I suppose a well-trained crew doesn't "If you say so, I'll believe it," said demand reasons for the captain's or

"There's a perfectly good reason. I'm working in the shelter, and you "I should have thought of it soon- in the open. Besides that, I'm stronger I should have noticed it last and I have my sheath knife. If I were night. My guess was right, that's all. attacked by anything, I could give a This is not an abandoned hut. Don't better account of myself than you you see, it's in almost perfect repair? | could. You'd better take belt and The hinges on this shutter work, al. holster and all, and buckle it right around your waist."

When Philip finally had his fire place rebuilt, in a temporary fashion who wrecked this placed worked hastl- perfect it, he stepped outside the hut the shore in search for her, and was disappointed at finding her nowhere in sight.

She must be dreadfully tired, he thought, and with that thought decided to set out to find her. First, however, he transferred the remnants of the fire from the flat stone before the He shook his head. "I haven't hut to his newly constructed hearth, heaped on more wood and noted, with satisfaction, that his makeshift chimney drew well and did not smoke in-"I'm still in a maze about it. What tolerably. He had discovered an empty cask under a heap of rubbish in the storeroom and this he filled with showed me that. They haven't been chunks of ice and set by the fire to

Five minutes later he was just a wheeling, glinting, sun-bathed speck why the drift wood collected again out in the amber air, the thrilling, pringling, winelike air. special session of a grand jury was called by the district judge last Monday to convene in Floydada on Wednesday of this week at 10 o'clock. The same grand jury was reconvened, with the exception of J. W. Sims and B. E. Hawkins who were unavoidably absent from duty and S. I. Farns worth and Chas. Boswell were chosen in their places.

The immediate cause of the re convening of the body if our in formation is correct was an affray in Lockney last Saturday when F. E. McGonagill, of Dallas, Texas, representing the Southwestern Life Insurance Co., of Houston, made an attack on Lee Glasscock, of Abilene, representing the Sam Houston Life Insurance Co., of Dal'as, Texas, the difference between the two arising in some manner over a difference as to the respective values of their polices. Glasscock was standing, so the report goes, on the hotel porch with his grip in one hand and his coat on the orher arm, when EcGonagill met him and cut him severely in the arm in two or three places with his knife, one cut in the forearm cutting a vein causing the loss of much blood, Glasscock then caught his arm and held it til parties could separate them. This matter is being investigated before the grand jury at present and indictments will probably be turned in at a later date in the matter. As the parties are both responsible business men bail will be made for their appearance at a court trial at a later date.-Floyd County Hesperian.

Since clipping the above from the Hesperian we find that it was highly prejudiced. Glasscock being the aggrsser, and the grand jury merely charged Frank Me-Gonagill with an aggravatd as-

DISTRICT SUNDAY SCHOOL CONVENTION

All the Sunday School workers n the counties of: Floyd, Dickens, Fisher, Garza, Howard, Hale, Kent, Lynn, Martin, Swisher, Terry, Borden, Gains, Mitchell, Motley, Crosby, Brisco, Dawson, tonewall, Lubbock and Scurry, us at the Methodist Church in Lubbock, Texas, on September oth to 11th. Josephene Jane Green is coming all the way from Bosting to at tend the Convention at the court house September the 8th.

Nice fresh barbecue at the Palace Meat Market every Saturday morning in plenty of time for dinner. Try some of it.

Uncle Dan McDonald, of the outh west part of the county, was visiting in Tahoka Wednesday night.

best prices.

the life and happiness of the people try depend upon quality, cost and durability of our water supply.

Ever since the days when Moses smote the rocks and water gushed forth to quench the thirst of the children of Israel, the people have murmured for water. In time of drouth it is the custom of the people of the rural districts to pray for rain and of the inhabitants of cities to curse the waterworks. Irrigation is solving the problem in agriculture in the arid regions of the state and pure artesian water is available for most cities. Nature has done her part by depositing vast lakes of pure water beneath the surface and numerous rivers traverse the state, offering an abundance of surface water to the cities and it merely an engineering problem of watering the cities of Texas.

A permanent source of water is one of the most important questions confronting many growing cities in the state and one which may be, by comnon consent, postponed, but, 1" Banquo's ghost, it will rise up again with increased frightfulness.

Solve the water problem and solve It now.

Good Roads.

Prosperity follows good roads as commerce follows the flag and no community has advanced far in civilastion that has not improved its pubhandled usually gauge the progress and development of communities. Get in line and build good roads.

Texas Needs Capital.

Yexas cannot be developed with nome capital and if this generation purposes to develop the state, we must get men and money from the outside. and an invitation to homeseekers and capitalists is cordially extended.

A CARD FOR THE PATRONS OF THE POST OFFICE.

Within the last few days you have had the first change of Post Masters for several years, and the people should take into consideration, that I as a new Post Master, have many things to learn, and while a 'new broom' is supposed are cordially invited to meet with to "sweep clean," it requires efficient hands to help manipulate it, and on the same principal the public should make due allowance for the Post Master, and assist him by a hearty cooperation in the trans-W. C. North the best song leader actian of their business in the Post Office, and charge all mistakes made by an entirely new office force, in a strange business that is entirely new as a part of the Post M. Adams. W. E. Hawkins and office where all the work is done, to ignorance.

Uncle Sam is very exacting in his regirements of the office force, and there are a great many things that he adds to the duties of the office that the general public know nothing of, that take time and patience to fulfiill. He does not excuse ignorance in any one, but requires the same service from the LOST—Blue auto veil bought at new, as the old employees with Finder years of experience.

> Now I as your new Post Master do not expect to make any great changes in the administration in the affairs of the office, but any changes that I can make that tend to give you an increased and more efficient service, I shall make.

Any mistakes made in the receiving or delivery of mail matter will be due to the fact that we are all new, but it shall be my ambition to give you the best service it is in my power to give.

I shall try and arrange the office so that you who have lock boxes half waw ground. can get your mail at any time. HOT WEATHER HINTS.

Rise very early and do the hot work sfore the heat of the day. It is surng how much more can be done from five to six than from ten to elev-There are no interruptions, as the majority of people prefer to take their "forty morning winks."

Have the work dresses made simply with a square or round neck, without a collar, and the sleeves elbow length. ch a dress is a real comfort if it is

Simplify the house furnishings in the warm weather as we do our food and clothing. Put away the bric-abrac and dust-gathering things. Fill the house with flowers, cover the cushions with linen, remove heavy rugs and simplify housekeeping in every department. If there is a small porch off from the kitchen big enough for a table and covered with vines, have that for a breakfast room. It is a splendid way to start the day.

Iron only the necessary articles, press out the hems of sheets and buy white crepe cloth for underwear that needs no froning.

Serve fresh fruit oftener for dessert, and do away with the cooking. The result will tell in disposition as well as in digestion.

If the house is lighted by lamps or gas, use candles for going to bed, they give sufficient light with much less heat.

If one is using gas it is necessary to do as much as possible with the heat because of the expense, as well as the comfort. If water must be heated for any purpose while the oven borners are lighted, set the pan in the lower oven under the flame. A small portable oven is a great convenience, and if a flat iron or two is put on top it is kept steady, which is its greatest disadvantage. For a small family this oven will do about all the baking except the bread, and a single loaf may be nicely baked in one of the small burner ovens.

Pick out of tales the mirth, but not the He pares his apple that will cleanly feed. -George Herbert.

A FEW SPANISH DISHES.

Anything that savors of the Spanish must of necessity be peppery, as their dishes are so frequently seasoned with the piquant pepper.

Spanish Rice .- Put two frying pans over the heat, in each put one teaspoonful of bacon fat. Chop very fine one onion and four green peppers; add salt and put into one of the trying pans. In the other put a cup of well-washed and well-dried rice, stir until brown, then add the mixture from the other frying pan and a cup of tomato. Add boiling water and let

String Beans, Spanish .- Take a quart of string beans and chop fine. Put one tablespoonful of bacon drippings in a frying pan and one onion cut fine, half a dry red pepper cut fine. Let the onion and pepper fry brown, then add three ripe tomatoes, stir in a tablespoonful of flour and add a quart of cold water; add the chopped beans and salt, and pepper to taste, and let the beans cook until tender, keep adding water as needed, not to let them cook dry.

Chili Con Carne.-Take the pods of two dried red chili peppers, remove the seeds and discard them. Soak the pods in warm water until soft, then scrape the pulp from the skins, discarding the skins and saving the pulp and water. Cut two pounds of round steak in small pieces, and cook in a hot frying pan in pork drippings until brown. Add three tablespoonfuls of flour, and stir until browned, then add a clove of garlic, in which two gashes have been cut, the chili water, which should measure about a pint. Let simmer until the meat is tender. Season with salt to taste.

HEN a man will trust his wife with his name, his honor and children, and will not trust her with his purse, it is easy to see on which he puts the highest value.

CARING FOR CURRANTS.

This pleasant acid fruit is most refreshing in hot weather and a dessert of red and white currants in a pretty glass dish is one that will please the most jaded appetite. Currant jelly holds the highest place among jellies, the red is usually used because of its greatly prized by many of the older landing was effected.

usekeepers; in fact they were faus remedies for colds and sore throat in our grandmother's youth. Large black or red cherry currants nake a beautiful garnish for a dessert if prepared as follows: Dip nice es of the fruit into the well beaten white of egg, then roll in sugar and lay on a paper to dry.

Spiced Currents.—Take two pounds of brown sugar, half a teaspoonful of salt, a cup of vinegar, a tablespoonful each of cinnamon, ginger, allspice and cloves. Cook all together thirty minntes. Keep in a stone jar well covered and sealed.

Black Currant and Raspberry Ice Cream.-Rub a pint of black currants through a sieve with a quart of raspberries, add a pint of sugar and let stand an hour. Add a quart of whipped cream and freeze.

Black Current Jam.-Gather the fruit on a dry day and see that it is perfectly ripe. After stripping the currants from their stems put them in a preserving kettle with just water nough to cover. Let them come to a boil and boil five minutes. Warm the sugar in the oven and allow a pound for every pound of fruit. Stir and cook for forty-five minutes, reckoning from the time it simmers all over. Try a little on a cold plate, and if it does not set quickly, boil a little longer. Put away in sealed jars.

This jam is delicious for steamed puddings and for dumplings.

When the currants are fresh the following pudding is a good one:

Black Current Pudding.-Line plain buttered dish with buttered bread and pour over it a pound of black currants and a pound of sugar that have been cooked together. Place more bread on top and put a weight to press out the juice. When cold turn on a deep dish and serve with cream.

Every addition to true knowledge is an addition to human power.

SUMMER DRINKS.

There is no drink that quite takes the place of lemonade for most palates, and with the addition of a sprig of mint and a few bruised leaves a simple julep is made.

Crushed currants and mint, with a little lemon juice, makes a delicious drink.

Pine Apple Cup.-Put into a bowl the juice of three lemons, two oranges, sliced and the seeds removed, one grated pine apple, and one cup of sugar. Let stand an hour to extract the juice, then strain carefully. Add as much cold water as desired, two slices of shredded pine apple, and fill the glasses half full of cracked ice before adding the fruit juice.

lced Tea .- Make tea, using a teaspoonful for each cup of boiling water, let stand to brew or steep, but not boil, for five minutes. Then pour over cracked ice in a pitcher. Serve with loaf sugar and slices of lemon. Raspberry Cup.-Mash and strain

two cupfuls of currants stripped of stems. Mash also an equal quantity of raspberries. Mix the juice, sweeten to taste, and serve in glasses half full of cracked ice and decorate with a sprig of mint.

Mint Sangaree .- Crush two or three sprays of mint with a lump of sugar. Put into a glass half full ice. Add four tablespoonfuls of grape juice and fill the glass to the brim with charged water. Shake thoroughly and strain into another glass.

Raspberry Dash .- Fill a tumbler half full of cracked ice, add a tablespoonful of sweetened raspberry juice and a tablespoonful of sweet cream. Fill the glass with soda water.

Nellie Maxwell.

Carnegie's New Benevolence.

Andrew Carnegie is developing a scheme for re-populating Scotland. The plan now under consideration is ambitious. It is proposed to extend assistance to any Scot whose conditions of employment in England, Wales or Ireland threaten to render him a burden on the ratepayers. If a man of good character, and anxious to work, he will be provided with a plot of land which will enable him to get a comfortable flving. Financial assistance will be given him to allow him time to realize the products of his labor. The idea of the scheme is to place Scotsmen back on the land and to prevent them from being, as at present, exposed to the caprice of shooting landlords.

Curlous European Legend

A curious legend is associated with the chain of lakes in the Desert de Carlitte, in the Pyrenees, over which the airman M. Vedrine, made a successful flight a few days ago. These akes, according to local tradition, were left at the time of the Flood. When the waters subsided, Noah and his family landed on the Puy de Prigue, one of the highest peaks in the district. Convincing proof of the truth of this tradition is found in an fron ring, to which, the peasants debeautiful color. The black current is clare, the Ark was moored when the

But the red nosed man arose and walked swiftly but determinedly toward a doorway which was flanked with brass signs

Handicapped.

We listen, delighted, while the stranger plays for us many beautiful selections.

"You should go upon the concert stage," we say. "With your talents, you would easily rank as the world's greatest violinist."

"Alas," he sighs, removing his hat and showing up his bald head, "I can never be anything but a fiddler.' Later we learn, furthermore, that

his name is easily spelled. Then we give up the idea of inducing him to buy a wig.

Country Life.

"Sorry, but we can't have no fresh green corn for dinner today," says Mr. Takumin; proprietor of the Rural Retreat, where the boarders get fresh air and other genuine country luxuries. "What's wrong?" asks the new

boarder. "Is the cool weather keeping it from ripening fast enough?"

"Nope," thoughtlessly explains the landlord. "Ma was straightenin' up the kitchen yistuddy an' somehow or other lost the can opener.'

Capturing the Ammunition.

"Here is a campaign song I have written," said the poet, "and strange to say, the manager of the other party offered to buy it from me, when it is worded in favor of your candidates."

"So I see it is," answered the chairman. So I see. And I'll buy it of you. Great Scott. It's such a fiercely rhymed thing that if the opposition got hold of it they could win all our votes away from us by singing it to ridicule our talent."

Twenty-five years ago the popular | let his calves lose what is known as "calf fat." It is well known that young animals gain more rapidly in proportion to their live weight and to 100 pounds of food than do older animals. economical use of their feed than the the kind of animal, for meat was older animals, but they take a shorter cheap and the consumer could buy time to make a certain total gain. The arge cuts. But new factors have man who turns off a steer that weighs brought about a change in values. As 1,000 pounds, has, if that calf weighed 100 pounds at birth, been given 10 per cent. of the total weight by the dam, while the man who keeps the animal till it weighs 1,250 pounds has been profit just that much. Then he found given only 8 per cent. The man who can make a steer weigh 1,000 at 12 months has more return for his trouble than the man who keeps it who had been engaged in raising cat- 24 months, with an additional weight

Butchers, too, have changed to suit ccupying cheap lands and finished the demand of the consumer. Alcorn belt the popular steer has ranged a luxury in the diet of the poor man's classes. But, where people formerly ordered large roasts and steaks, they are ordering steaks and roasts now that are from 50 to 75 per cent. smaller on account of the advanced prices. They find that if they get a small roast from a large animal that it is "long" on bone. The butcher then to suit the demands for smaller bone demands smaller animals, and during the last few months they have been willing to offer, not a premium on smaller steers so far as dollars per west, and irrigating projects have 100 is concerned, but they have brought the price of small steers up so close to that of the large ones that there is really a premium on little o invest in cattle. Then, too, great steers when we consider the cost of production.

We do not think that the 1,200pound steer will ever be entirely eliminated from the market, but we do think (if a conjecture is allowable) fronts the cattle feeder of today is that the baby beef animal will con-where to get hold of feeders. tinue to increase in popularity in tinue to increase in popularity in those districts where men do not wish

No Luck.

"I never do have any such luck as

'Why, I am surprised!" answered his mother. "You have roller skates, a bicycle, a football suit, and a ticket to the gymnasium. Some boys would think themselves very lucky if they had those things."

"Yes, but Willie Swaddling's house burned down, and he helped to save things! Tom Anderson's home was robbed, and he heard the burglar! And Jack Turner is sick, and the neighbors are carrying ice cream and stuff to him."

DISFIGURED WITH CRUSTS

"Some time ago I was taken with eczema from the top of my head to my waist. It began with scales on my body. I suffered untold itching and burning, and could not sleep. I was greatly disfigured with scales and crusts. My ears looked as if they had been most cut off with a razor, and my neck was perfectly raw. I suffered untold agony and pain. I tried two doctors who said I had eczema in its fullest stage, and that it could not be cured. I then tried other remedies to no avail. At last, I tried a set of the genuine Cuticura Remedies, which cured me of eczema when all else had failed, therefore I cannot praise them too highly.

"I suffered with eczema about ten months, but am now entirely cured, and I believe Cuticura Remedies are the best skin cure there is." (Signed) Miss Mattie J. Shaffer, R. F. D. 1, Box 8, Dancy, Miss., Oct. 27, 1910.

"I had suffered from eczema about four years when boils began to break out on different parts of my body. It started with a fine red rash. My back was affected first, when, it also spread over my face. The itching was almost unbearable at times. I tried different soaps and salves, but nothing seemed to help me until I began to use the Cuticura Soap and Ointment. One box of them cured me entirely. I recommended them to my sister for her baby who was troubled with tooth eczema, and they completely cured her baby." (Signed) Mrs. F. L. Marberger, Drehersville, Pa., Sept. 6, 1910.

Although Cuticura Soap and Ointment are sold everywhere, a sample of each, with 32-page book, will be mailed free on application to "Cuticura," Dept. 4 L, Boston.

Another Pressing Need.

It's well enough to devote a lot of time and a good deal of prize money to the composition of a National anthem, but what's the matter with giving us a National wedding march, too? Must we be forever indebted to the marches of an erratic Bavarian and a visionary Deutscher?

Here's an opportunity for ambitious

native composers. Think of the pride that would follow such an announcement as this: The happy pair passed down the aisle to the pulsating strains of Bolivar P. Gibson's exquisite 'Marche Nuptiale!' "-Cleveland Plain Dealer.

A TRAIN LOAD OF TOBACCO.

Twenty-four Carloads Purchased for Lewis' Single Binder Cigar

Factory.
What is probably the biggest lot of all fancy grade tobacco held by any factory in the United States has just been purchased by Frank P. Lewis, of Peoria, for the manufacture of Lewis' Single Binder Cigars. The lot will make twenty-four carloads, and is selected from what is considered by experts to be the finest crop raised in many years. The purchase of tobacco is sufficient to last the factory more than two years. An extra price was paid for the selection. Smokers of Lewis' Single Binder Cigars will appreciate this tobacco.

TO DRIVE OUT MALARIA

Take the Old Standard GROVE'S TASTELESS CHILL TONIC. You know what you are taking. The formula is plainly printed on every bottle, and the form of the Quinine drives out the maintain and the from builds up the system. Sold by all dealers for 30 years. Price 50 cents.

-Peoria Star, January 16, 1909.

Lots of people who are thoroughly convinced that we shall know each other in heaven succeed admirably in forgetting each other here.

Rapidly and Harvest Is **Now Approaching With** a Great Demand for Harvest Help.

Last week it was pointed out in

these columns that there would be a yield of about 200,000,000 bushels of wheat throughout Western Canada, an increase of about 100,000,000 over the previous year, and that the demand for farm help was very great. Confirmation of this news is to hand and the cry still is for more help. The Canadian authorities are hopeful that the friends of the 400,000 or 500,000 Americans whe have gone to Canada during the last few years will come to the help of these people and induce as many able-bodied men as they possibly can to take advantage of the low rate which is being offered from all points on the Canadian Boundary, and particulars of which can be had from any of the following Agents of the Canadian Government: M. V. Mcthe other boys!" complained young Innes, 176 Jefferson Avenue, Detroit, Mich.; C. A. Laurier, Marquette, Mich.; J. S. Crawford, Syracuse, N. Y.; Thos. Hetherington, Room 202, 73 Tremont Street, Boston, Mass.; H. M. Williams, 413 Gardner Bldg., Toledo, Ohio; Geo. Aird, 216 Traction-Terminal Bldg., Indianapolis, Indiana; C. J. Broughton, Room 412, M. L. & T. Bldg., Chicago, Ill.; Geo. A. Hall, 2nd Floor, 125 Second Street, Milwaukee, Wis; E. T. Holmes, 315 Jackson Street, St. Paul, Minn.; Chas. Pilling, Clifford Block, Grand Forks, N. D.; J. B. Carbonneau, Jr., 217 Main Street, Biddeford. Me.: J. M. MacLachlan, Box 197, Watertown, S. D.; W. V. Bennett, Room 4, Bee Bldg., Omaha, Neb.; W. H. Rogers, 125 West 9th Street, Kansas City, Mo.; Benj. Davies, Room 6, Dunn Block, Great Falls, Montana; N. Grieve, Auditorium Building, Spokane, Wash.

Every facility will be afforded men of the right stamp to secure advantage of these low rates. To those who propose to go, it may be said that they will have this splendid opportunity of securing first hand information as to the excellent producing character of the lands in Manitoba, Saskatchewan and Alberta. They will have the opportunity of seeing some of the greatest wheat fields in the world and probably the largest yield of wheat, oats and barley that has ever been grown on the Continent. And all this on land some of which cost the settler only the \$10.00 necessary to enter for his homestead, or, if he purchased, in some cases, costing him from \$7.00 to \$10.00 per acre, but which is now worth from \$15.00 to \$20.00 per acre. Even at these prices the land is remarkably cheap as will be realized when the statement is made that from 20 to 25 bushels per acre and over of wheat are grown, netting the farmer from \$8.00 to \$10.00 per acre; and this on land that he got for nothing or paid merely a nominal price. In fact the production shows that \$18.00 to \$20.00 per acre would be a nominal price for land that would produce as these lands produce.

Rifle for Under Water Action.

When he is working in water infested by sharks and other sea monsters ! likely to do him harm, the diver has at present to rely for his safety on the use of the knife, or, failing that, on a quick return to the surface. Now comes the invention of Captain Grobl, a German diving instructor, who has constructed a rifle which can be fired under water, and is designed for the better arming of the diver. The most remarkable thing about this is that it fires, not bullets, but water, which is propelled with such force that it has an extraordinary power of penetration. Indeed, he inventor himself has pierced armor plate of medium thickness with the water jet from his weapon. The rifle has a stout barrel and is loaded with a cartridge cased in india rubber.

Work for Extinction of Tuberculosis. Exhibitions showing in graphic form the prevention of consumption have been shown in every state in the United States, except Nevada, Arizona, New Mexico and Wyoming, and also in most of the Canadian provinces and in Mexico, Porto Rico and Cuba, according to a statement made by the National Association for the Study and Prevention of Tuberculosis. There are now 25 states and 16 cities having permanent and traveling exhibits besides the two operated by the National association itself, and the total number of similar displays is over 200, including about 150 small school exhibits. The first tuberculosis exhibit in America was shown by the Maryland Tuberculosis commission in January, 1904. In 1906 there were

CURE THAT SORE THROAT

four such exhibits.

Sore throat is inflammation of the mucous membrane of the throat, and if this membrane happens to be at all sensitive a predisposition to sore throat will exist.

Paxtine Toilet Antiseptic is both a preventative and a cure for sore throat because it possesses extraor. When the Crop Is Laid By dinary cleansing, healing and germicidal qualities. Just a little in a glass of water, used as a gargle, will quickly relieve all soreness and strengthen the mucous membrane of the throat, and thus overcome all tendency to sore throat.

Paxtine is far superior to liquid anhygienic uses.

Paxtine may be obtained at any drug store, 25 and 50c a box, or sent postpaid upon receipt of price by The Send for a free sample.
