Deadline Near To Register Vehicles

Deadline for vehicle registration is Wednesday April 1, which is normal with approximately 3500 vehicles having been registered. This is about 75 percent of the vehicles in Lynn County. Last year 5329

vehicles was registered by April 1. You may register your vehicles at Moore Insurance Agency in O'Donnell; New Home Co-op; Wilson Co-op; or the tax office in the court house in Tahoka.

Lynn County Hospital Progress

Progress on construction of the new \$700,000 Lynn County Hospital, completion of which is expected by April 1, 1971, was told Rotarians at the club meeting last Thursday by Garland Thornton, board chairman. Most of the super-structure work is now complete, and inside work will start soon. He declared the board is well pleased with the apparent quality of construction.

Thornton reviewed events since closing of the local hospital four years ago, and the setting up of the county-wide hospital district as a non-profit organization.

Lynn citizens voted \$365,000 in bonds in November 1967, and a year later a matching Hill-Burton Federal grant of \$365,000 was approved for the hospital. Final plans were completed by architects last September, and contract for construction was let in November.

The county's \$365,000 bonds were sold March of last year at a remarkably low interest rate for this time of 5.89 percent average. These bonds were re-invested until needed and are now building up a reserve.

The tax rate was set at 35 cents, 19 cents of which or about \$30,000 will go into an interest and sinking fund, and 16 percent or \$25,000 set aside for operating funds.

General contract for the building was \$541,700; land, core testing, and site preparation cost \$15,000; equipment is expected to total \$130,000; and architects, consultants, le-

gal and other cost, \$43,000. The speaker says employment of Kenneth Dixon of Sweetwater Simmons Hospital as consultant is saving the district a lot of money and possible mistakes.

The concrete and tile building faced with brick, will be a 24-bed hospital meeting all latest state and federal standards. There will be eight private patient rooms, eight two-bed rooms, plus six nursery cribs, emergency, delivery, and operating rooms.

The hospital will be staffed by the two local doctors, at least one or two other doctors expected to locate here and one doctor from O'Donnell, if plans work out.

A qualified administrator will be hired before the hospital is opened, and a radiologist will probably work the hospital part time out of Lubbock.

Since the district went into operation, it has taken most of the indigent care responsibility off of the county to the tune of about \$5,500 a year.

In addition to Thornton, members of the board include Clint Walker, Elmer Blankenship, E. R. Blakney, Johnny Ellis, Borden Davis, and W.T. Kidwell all elected by vote of the citizens.

In the up-coming election, Davis and Blankenship are up for re-election and Ardis Pace of Wells is a nominee for the place now held by Mr. Ellis, the latter retiring by choice.

The Country Editor says a man cuts his wisdom teeth in the bites off more than can chew.

TBW The following is a note received by the Lynn County News. We thought that the people as well as the merchants would like to read it. Mr. Valentine, Thank you very much for printing the pictures and writing in your paper. We want to thank you to the merchants for the page on Girl Scout Week.

Yes, its that time again. It will be lighter longer in the afternoon, but darker earlier in the day. Daylight Saving Time begins at 2 a.m., April 26.

That's a Sunday. Why pick on that delicious rest to get up at 2 a.m.?

Because the Uniform Time Act of 1966 requires that all time zones be moved ahead one hour on the last Sunday in April at 2 a.m., except where the Legislatures rule to remain on Standard Time.

Anyhow, if your state goes with the majority, move your time-pieces ahead one hour before you go to bed Saturday night, April 25. That is, it is ridiculous.

TBW Puka-Lambro plans to have new directories ready for printing sometime in April, so watching for yours.

TBW Thought you might like to know that Llanfairpwllgwyngyllgrychyrndrebwillandysiloch is the name of a village in Wales.

The encyclopedia says it means Arch of Saint Mary in a town of White Hazel near to rapid whirlpool, and Saint Illio's Church of the Red Rock.

The encyclopedia neglected to mention how to pronounce it, however.

TBW The Tahoka Lion's Club have a Bake Sale planned for this coming Saturday at Collier - Parker Pharmacy with the proceeds going to CARE. The Sale will continue until they sell out. They might be looking forward to the event.

TBW The news announcement out of San Antonio that the Ford Foundation has threatened to revoke its grant to the Mexican American Legal Defense Fund (MALD) unless it moves headquarters out of Texas is heartening news to the least.

The executive director of MALD told a news conference last week that Ford Foundation officials in Washington, D.C., "Political Turmoil" assisted with his organizations reason for their decision.

The ultimatum came after an evaluation team spent several days in San Antonio recently.

MALD is backed by a \$2.2 million Ford Foundation grant and over eight years.

At the original intent and purpose of the mammoth grant being abused has been evident for some time.

The Ford Foundation director is to be commended for making a much closer look at the manner in which the money were being "utilized" in many areas of the state including Tahoka.

TBW If you would like to have something really big to stew on, why not consider the federal debt, which now stands at \$77 billion. If that is too overpowering, take the annual interest on the debt alone - ap-

proximately \$10 billion.

SEE TWO BITS PAGE 2

proximately \$18 billion dollars. Suppose that we had no national debt, and that the huge sum we pay in annual interest could be put to a really constructive use.

For example, President Nixon has proposed that an additional \$10 billion be spent for municipal waste treatment plants, over the next five years. If the \$18 billion now going to interest were available, the entire project could be under way this year!

Stewart Udall recently said that it would take about \$100 billion until the end of the century to restore the water, land and air to its natural quality. Again, if that \$18 billion didn't have to go for debt charges, pollution might be controlled in a half-dozen years instead of thirty.

Well, you may say, all this is useless speculation because the debt is there - all \$277 billion of it - and we have to pay the interest each year. True enough, but just stewing about the problem should show the folly of ever again having an unbalanced federal budget except in a national emergency. During the past five years alone interest costs increased by some 70 per cent. Isn't it about time for all of us to do more worrying and begin to apply the brakes on government spending?

TEXAS PRESS ASSOCIATION

Concern over the continuing rise in Texas' crime rate has brought new responses from top state officials.

Gov. Preston Smith created the new Texas Organized Crime Prevention Council to check organized crime encroachment and appointed Atty. Gen. Crawford Martin and Col. Wilson E. Speir, Department of Public Safety Director, as co-chairmen.

Also named to the Council were Harris County District Atty. Carol Vance, Dallas Police Chief Frank Dyson, Dallas County District Atty. Henry Wade, Bexar County District Atty. Marvin Ted Butler and Houston Police Chief Herman Short.

Speir set up a specialized criminal task force to assist in the new coordinated fight on crime. Unit will be composed of DPS criminal law enforcement division members who include Texas Rangers intelligence and narcotics agents.

Task force will work closely with the governor's Criminal Justice Council and local law

enforcement agencies in an "accelerated and coordinated drive to combat statewide lawlessness in all its forms." Number of officers assigned to the new unit remains restricted information.

Meanwhile, state and federal officials met in the governor's office to pledge continued cooperation in control of drug abuse. Smith told U.S. Justice Department representatives that Texas is "pledged to do whatever is necessary to stamp out illicit drug traffic." Governor also announced an April 2 conference sponsored by the Texas Pharmaceutical Association on drug abuse problems.

OIL ALLOWABLE UNCHANGED - For the fourth month in a row, Texas Railroad Commission set a high statewide oil production allowable of 68 per cent of potential for April.

Factor will allow a maximum of 3,655,018 barrels a day for next month, same as March. **COURTS SPEAK** - Mobile homes can be claimed as homesteads and made immune from seizure for debt, State Supreme Court agreed.

MORE THAN FOOD

When Tunisia suffered the worst floods in her history last fall, CARE rushed food to 2 of the worst hit regions while a CARE-MEDICO team instituted a typhoid inoculation program for 80,000 persons. Now, the agency is helping to rebuild devastated wells and homes. Such "food plus" aid is supported by contributions to CARE, New York 10016.

EARLY SLATON SETTLERS--A portrait of the Frank D. Young children during their childhood days is shown at the left. Pictured are, left to right, Clifford D. Young, Mrs. Jessie Standerfer and Mrs. Alice Joplin, Mrs. Standerfer is pictured in the right photo as she sits in her living room.

Pioneer Settler Recalls Start of Slaton in 1909

Linda Huffaker, CHD Agent, Says....

Perhaps some people may wish for "the good ol' days", but not Mrs. Jessie Standerfer, who has lived near Slaton for 72 years. She likes pretty hats, modern conveniences and friends, as did her late sister and brother, Mrs. Alice Joplin and Clifford Young.

Mrs. Standerfer said that her father, Frank Young and his brother, Alex, moved 11 miles west and south of Slaton in June 6, 1898. The Frank Young family arrived in a surrey, accompanied by one wagon. They moved into a half-dugout which had a sliding window in the west and a door in the east. The first winters were spent in Lubbock.

Mr. and Mrs. Frank D. Young were married in Comanche County where two of their four children were born, Jessie was born Nov. 21, 1884 and Alice Dec. 17, 1886.

Stories of West Texas must have interested Mr. Young and, in 1885, he and T. Garrett made a trip to this area. The trip took about three months. In 1887 the Young family moved to Fisher County where they lived for nine years. Their only son, Clifford D., was born while living there on Sept. 18, 1890.

Mr. Young and Mr. O'Bannon hauled lumber from Colorado City to build the family a house in which to live. Colorado City had the nearest railroad and it took an eight-horse team and two four-horse teams to haul the lumber. The house had four rooms with a porch across the east and south.

Another daughter, Esther, was born Dec. 1, 1899. The

Young children received five years of public school education. Since there were no schools nearby, they had private tutors. Alice attended Plainview College and Clifford attended Simmons College.

Mrs. Standerfer, the only survivor of the family, remembers her father's trips to Colorado City for supplies. She said be-

fore he rode out of sight, they could smell and taste the bread and fresh fruit he would buy. He bought 500 pounds of flour each trip. He usually made three to four trips each year. Ben Glazier would bring extra salt for the cattle twice a year. These trips took from 10 to 12 days.

Mr. Young bought the grazing rights on 20 sections of land from a Major W. V. Johnson. Fifteen sections were later deeded to him. Mrs. Standerfer recalls that eight sections were purchased with cash for \$1 per acre from Texas School Land.

Relatives who still live on the original estate include Raymond C. Standerfer, Mrs. Evelyn Nelson, Patsy Standerfer, Mrs. Lois Jones, Bobby Joplin, Mrs. Ethlyn Akin and a great-grandson, J. D. Stell.

The first farms were started in 1912 south of the Young estate. The Youngs started their farms in 1922 and 1923, and by that time most of the land around them was put into farm land.

Jessie Young married John F. Standerfer on July 26, 1906 in Tahoka. To them were born five children, Raymond C., Slaton; Mrs. C. T. (Edith) Ash-

ford, Whitney; Mrs. G. L. Nelson, Slaton; Patsy Standerfer, Slaton; and John Y. and John F. Standerfer who are deceased.

Alice Young married Jess Lee Joplin on Jan. 7, 1912 and they had six children. They are Mrs. B. B. (Lois) Jones, Slaton; Mrs. Mary Rose Phelps, Alamogordo, N.M.; Mrs. John (Ruth) Forbes, Spade; Harold L., San Antonio; Bobby, Slaton; and Mrs. Beth Miller, deceased. Clifford married Ethel Caldwell May 8, 1933. He had two children, Mrs. Glen (Ethlyn) Akin of Slaton and Frank, deceased.

Esther married Alvin White on April 1, 1919. To them were born three children, William F., Hobbs, N.M.; Howard M., Stratford; and Mrs. Orbin (June) Houchin, Plainview.

While living in what was once a wilderness - there being only one house between the Young Ranch and Lubbock, progress moved forward. Mrs. Standerfer, Mrs. Joplin and Clifford Young saw Slaton built in 1909. A Col. Robinson donated the land for the railroad shops to be built and then Slaton had three stores. The stores were near the railroad shops than the present downtown area, according to Mrs. Standerfer.

Mrs. Standerfer said she wishes her sisters could be with her to tell about their childhood, but most of all, she wishes her brother, Clifford, could tell us just a few of the many tales he loved to tell. She said he could be telling a story and when he cleared his throat, you knew he was going from the facts to his version.

While living here, the three saw the railroad, car, telephone, radio, airplane and television move into the Slaton area. Mrs. Joplin, who succumbed Jan. 24, 1970, lived to see the Moon landing. Mrs. Standerfer hopes to live to see the landing on Mars.

Calvery's Hatchery has recently installed a new hatcher at his plant here. The hatcher has a capacity of 6,000 eggs. Mr. Calvery explains that the eggs have been in the incubator a certain period of time, they are taken out and put in the hatcher. This gives more space in the incubators and thereby permits the hatching of more eggs. He now has a total capacity of 85,000 eggs. He states that he is doing a tremendous business, and that farmers and town people alike

are raising many "victory" chickens.

Tahoka girls basketball team had a busy day Saturday when they went to Sundown to an invitation tournament. The day held three games in store and the first game started at 10 o'clock. iversity Agricultural Research and Extension Center at Lubbock. He emphasizes the importance of considering past yields in determining the amount of fertilizer to apply. If yields have been inadequate during good crop seasons fertilizer will likely pay. Cotton has responded profitably to 20-40 pounds of nitrogen per acre in many instances, says Valentine, but phosphorus should not be overlooked. He points out that some sandy soils are so deficient in this element that crop response will not be realized from nitrogen until the phosphorus level is brought into balance.

A soil test by the Extension Soil Testing Laboratory at the Lubbock Center is the best guide for determining the need for phosphorus explains the soil chemist. If the element is deficient, 20-30 pounds per acre is usually adequate. Fertilizer may be applied pre-plant or as an early sidedress soon after a start is assured. Grain sorghum fertilization can also be a profitable practice on nutrient deficient sandy soils, points out Valentine. With higher than average production in 1969 some soils were severely depleted of plant nutrient especially nitrogen. Higher than normal fall rainfall rates have further depleted the soils nitrogen supply.

Although nitrogen is the most critically deficient plant nutrient in grain sorghum production, phosphorus should again be considered, emphasizes Valentine. About 30 pounds of nitrogen and up to 30 pounds of phosphorus per acre, depending on a soil test, would probably give adequate response. Here again, the fertilizer can be applied pre-plant or as an early sidedress. The seeding rate of dryland grain sorghum is also an important matter, points out the soil chemist. Two to two and one-half pounds of seed is generally adequate for near maximum dryland production. Higher plant populations from higher seeding rates increases root competition, thereby resulting in greater drought hazard and decreased yields.

Valentine adds that the Extension Soil Testing Laboratory is presently current with its work and that results on soil samples can be obtained in about a week. Information on collecting and mailing soil samples can be obtained at any county Extension office.

**Methodist Minister
Relates Fish Tale**

(Editor's note: This was taken from Page One by Kathryn Duff in the Abilene Press Reporter.

This must be true because preachers told it, and Methodist preachers, at that. The Rev. N. S. Daniel, retired Methodist pastor who lives now at Merkel and preaches parttime at Longworth and Mrs. Daniel are the secondary authorities for the story. They say it was related to them by their two preacher sons, the Rev. Wesley Daniel, pastor of the First Methodist Church of Spearman, and the Rev. Hugh Daniel, pastor of the First Methodist Church at Tahoka.

The scene of the happening was Stamford lake. The time, last fishing season.

The Rev. Wesley and the Rev. Hugh were vacationing and were spending a part of their leisure time seeking to catch fish. The fish were having none of it.

The two fishermen drifted their boat into a likely spot and the Rev. Hugh cast forth his line.

He thought he felt a bite. He yanked. And it was as if a great dead weight was pulling back.

He reeled in his catch. It was a rod and reel! Quite a catch.

The fishermen fished some more and with no success.

"What kind of bait were you using?" the Rev. Wesley kept asking the Rev. Hugh.

No luck and so they drifted into another likely spot.

The Rev. Wesley cast forth his line.

He thought he felt a bite. He yanked. And it was as if a great dead weight was pulling back.

He reeled in his catch. It was a rod and reel!

Maybe it was not in as good a condition as his brother's catch. But two rods and reels, well some days you can fish all day and not snare a one.

The preacher-fishermen kept on fishing and kept on catching no fish.

And all at once the Rev. Wesley felt something hit him in the back.

"What's the idea? What did you hit me for?" he asked, turning to look at his brother seated at the other end of the boat.

"I didn't hit you," Hugh said.

"Look THERE!"

And THERE was a bass.. a pretty nice fish..certainly an accommodating one. It had

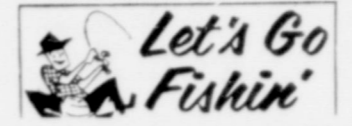

jumped into the boat with the preachers.

The sons told their parents of their experience and received from their father a bit of paternal advice.

"I don't believe I'd tell that story," the senior Rev. Daniel suggested.

"Some might not believe you."

Or, if they will accept advice from a layman, the might use as their text the experiences of Jonah.

Why not start the new fishing season by deciding that this is the year to catch a fish big enough to make the record books?

Almost all state conservation departments record large fish taken from a state's waters. Eligible species include almost every fish in the United States, and how you catch the fish isn't important as long as it was by a legal sport fishing method.

How do you go about finding and catching a trophy fish? Well, the angling authorities at Mercury outdoors suggest:

Peas in a Pod?

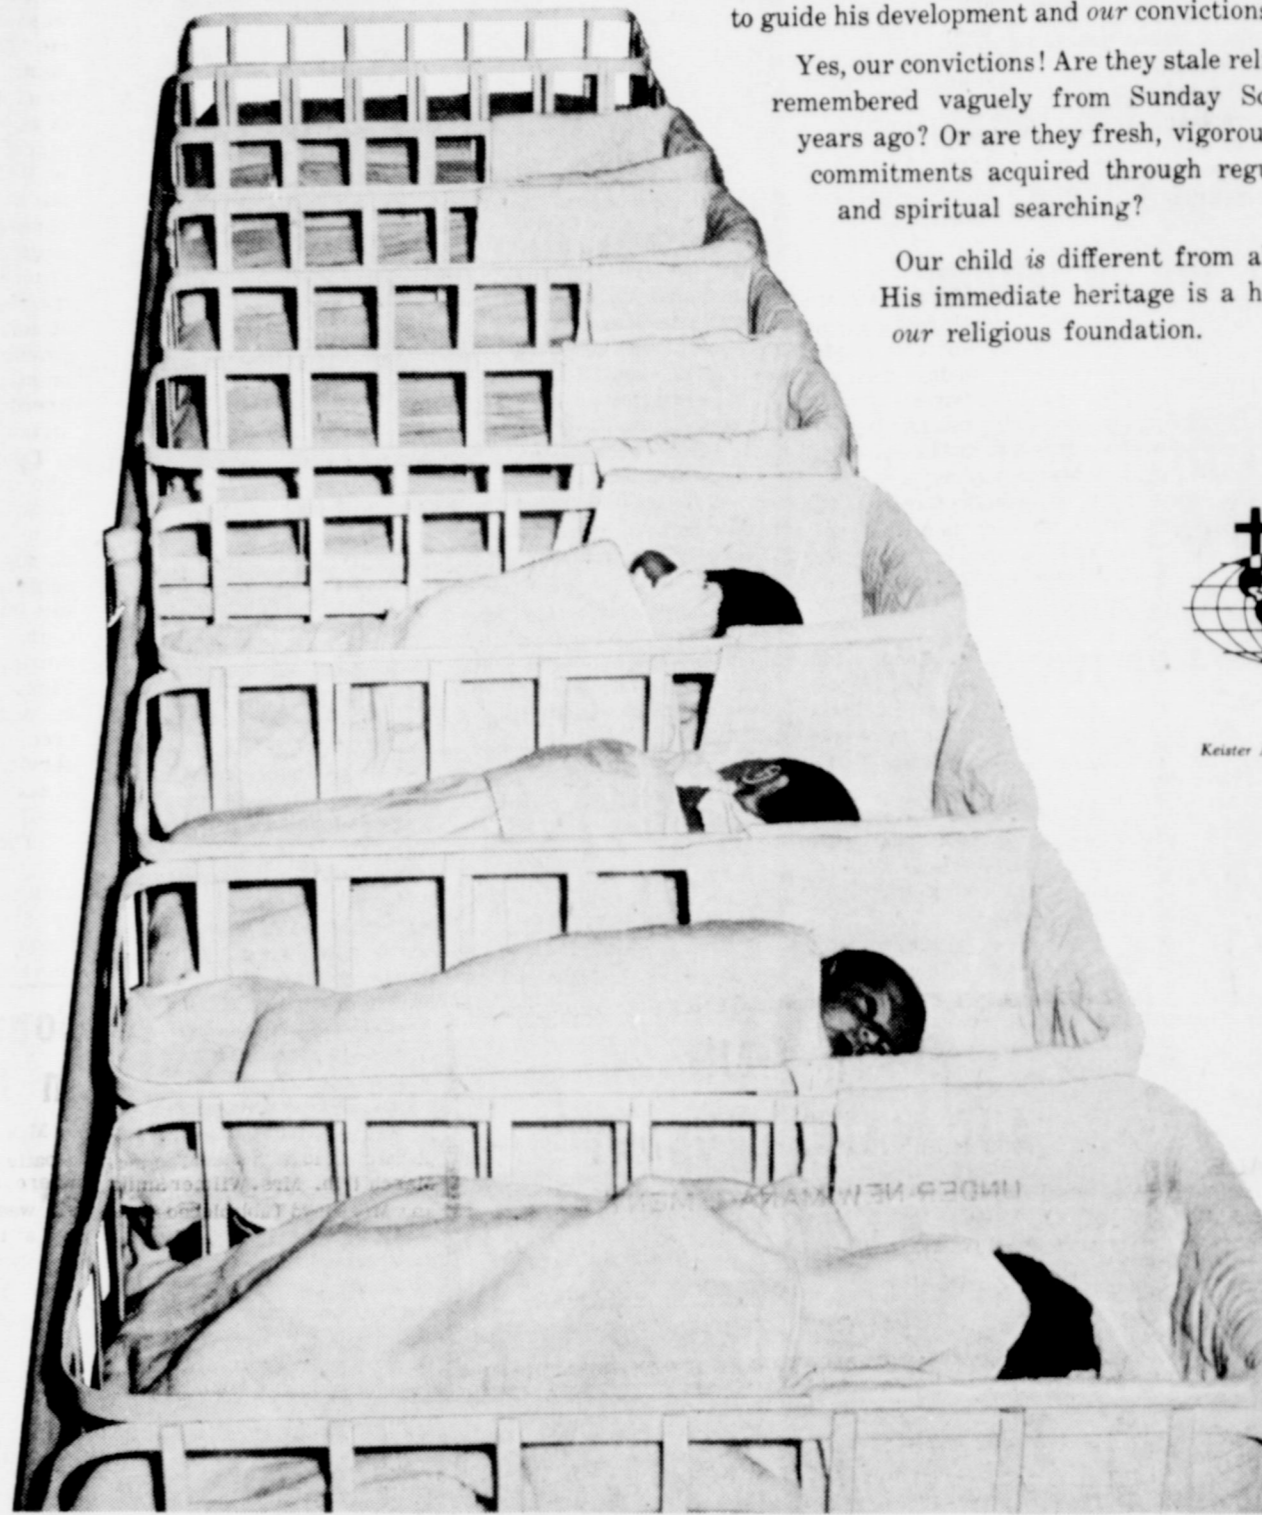

All men are created equal! But their mothers see it differently. And their fathers don't hand out cigars simply to attest to their part in the population explosion.

It's natural to believe that our child is just a bit different from all the others.

Surely he has *our* love to start him off, *our* good sense to guide his development and *our* convictions to mold his.

Yes, our convictions! Are they stale religious cliches remembered vaguely from Sunday School lessons years ago? Or are they fresh, vigorous beliefs and commitments acquired through regular worship and spiritual searching?

Our child is different from all the others. His immediate heritage is a home built on *our* religious foundation.

Apply Terraclor Super-X
and only
the first time you plant cotton.

Think for a minute what it costs to replant an acre of cotton that doesn't make a stand. There's the cost of seed, fertilizer, herbicides, insecticides, equipment, operators and the precious time. Multiply that by the number of acres you could lose to seed and seedling disease.

Now think about Terraclor Super-X Soil Fungicide. It could very well eliminate replanting. Here's why: Terraclor Super-X is a combination of two Olin discoveries that effectively control the fungi that cause cotton seedling disease.

How important is this to you? The regional Cotton Disease Council reports that losses average \$60,000,000 a year to seedling diseases alone.

Terraclor Super-X is applied while you plant. Your cotton seed is surrounded by protection in the furrow, where it counts. As the seed germinates and the seedling emerges, the fungi that kill un-

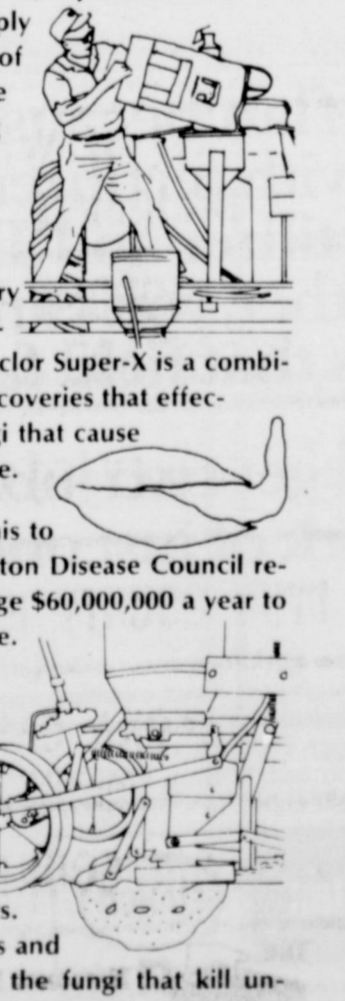

protected plants are held off by Terraclor Super-X. You get a healthy, vigorous stand from only one planting.

About seed treatments: They are great... as far as they go. But seed treatment protection lasts only until the seed coat opens and the seedling grows into untreated soil. That's when you need Terraclor Super-X in the furrow.

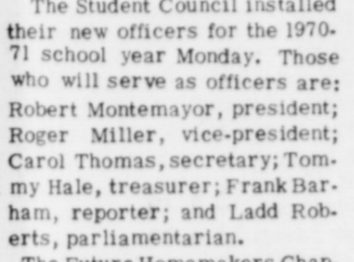

Terraclor Super-X is available from your Olin dealer in three formulations: granular, liquid and dust. A special formulation is available with a quality soil systemic insecticide impregnated in the granules for combination fungus and insect control.

If you don't know your local Olin dealer, write to Terraclor Super-X, P. O. Box 991, Little Rock, Ark. 72203 for his name.

You ought to get to know him. He can help you get a good stand from only one planting. That's one good reason he is known as **the rare bird in the business.** Olin

nothing comes up to Visualiner alignment

After all the claims and counter-claims, ask yourself this question, "Whose aligner is most specified, most widely used throughout the country, and most often praised by car manufacturers as well as by the men who operate alignment equipment?" You'll find the answer is, John Bean's Visualiner. Why? Because it is accurate. It gives you rifle-scope readings on caster, camber, toe and front end play. Then it projects them on a large, easily read screen - magnified eight times for clarity.

MRS. MUSICK'S GRANDSON RECIEVES HONOR

Jerry Tuckness, grandson of Mrs. E.O. Musick of Tahoka received the Boy of the Month at Azusa High in California. Jerry is a deeply religious person. During his lunch break, he and other interested students meet on the lawn and study the Bible. He also gives personal counsel to students who have had or have, a problem with drugs.

THE FAMILY LAWYER

This Way Out

Finished with her shopping. Mrs. Wilson headed for the automatic doors at the front of the market. But by mistake, she approached the IN side instead of the OUT side. Just then someone activated the IN door, which swung against Mrs. Wilson and knocked her down.

In due course, she filed a damage suit against the store.

"It is true the doors were labeled 'IN' and 'OUT,'" she said in court. "But the words were placed above eye level, where they were not easy to see. No wonder I got mixed up."

However, the court denied her claim. The judge said the store was entitled to assume that a customer would pay closer attention to where she was going.

Generally speaking, the law expects the normal shopper to be able to navigate safely out of the normal exit. As another court said, in denying damages to a tall man who bumped his head on a short door:

"The height of the doorway was obvious. It was not a source of danger to a person exercising reasonable care."

Yet, some doors are not obvious at all. A number of recent cases have involved all-glass doors, which sometimes give what the law calls "an illusion of space." Courts have usually held that if a person bumps unwittingly against such a door, the management may be held responsible.

But this applies only if the door is truly deceptive in appearance. If markings or handles give fair warning that the door is there, then the store cannot be blamed by the person who walks into it.

Whatever type of door it is, the management does have an affirmative duty to keep it in good working order. Thus:

A woman was seriously injured in a revolving door when someone speeded it around with a push. Investigation revealed that the brake brushes, which were supposed to hold the speed down, were all worn out.

Accordingly, a court ruled that the management was liable for the woman's injury. Its negligent upkeep, said the court, had changed a safe exit into a place of danger.
