Six Delegates Attending International Relations Conference At Alpine

Howell And Long Appear On Program At State Teachers College

By ELIZABETH DRYDEN

SIX delegates of the Tech International Relations club left Thursday morning for Alpine to attend a conference of the New Mexico-West Texas International Relations clubs at Sul Ross State Teachers college, today and tomorrow.

Members of the Tech delegation are James Toothaker, chairman, George Long, James Howell, Jimmie Gammill, Professor M. E. Ogden, sponsor of the club, and Ernest Griffith.

Long To Present Paper

Long will present a paper on "The Attitude of the United States in Economic Nationalism vs Internationalism." Howell will speak on "Attempts at Practical Application of Disarmament."

Sir Herbert E. Ames, former financial director of the League of Nations Secretariat, will be the principal speaker at the conference. Miss Amy Hemingway Jones, division assistant for the Carnegie endowment in New York City, will attend the meeting.

Opens Today

The conference opened this morning with the registration of delegates, and Dr. Morlock, president of Sul Ross, is to welcome the visiting delegates at convocation at 10 o'clock.

"Economic Nationalism vs Nationalism," "Disarmament," and "The Present Situation in Mexico" will be the three subjects to be discussed by the delegates.

Return Sunday

A luncheon at Ft. Stockton Saturday with a drive through the scenic loop will close the meeting. Tech delegates will return Sunday.

Members of the conference are Amarillo Junior college, Texas Tech, West Texas State Teachers college, Sul Ross State Teachers college, Wayland college, University of New Mexico and New Mexico State college.

Band Director Named Judge

Professor Wiley Will Be Guest Director At Festival

Professor D. O. Wiley, director of the Matador band, has been chosen by Russell L. Wiley, band director at the University of Kansas and general director of the National Band Festival to be held at Kansas university May 9, 10, and 11, as guest director and official judge of the contests.

High school bands from any state in the Union are eligible for competition.

Other judges are: Edwin Franko Goldman, director of the Goldman band of New York City; Herbert L. Clarke, world's premier cornetist and director of the Municipal band of Long Beach; Earl D. Irons, director of the North Texas Aggie band; Arthur J. Gagnier, Carl Bush, eminent composer of Kansas City; Harold Bachman, director of the "Bachman Million Dollar Band" of Chicago; William F. Ludwig, president of Ludwig and Ludwig, drum manufacturers, Chicago; D. M. Swarthout, dean of School of Fine Arts, University of Kansas.

Professor Wiley is president of the Texas Bandmasters' association. He will be one of the judges at the Tri-State Festival at Enid, Oklahoma, April 3, 4, 5, and 6.

Aggie Night Class Discusses Cattle

A class for members of the part-time course, which the class in Agricultural Education 442x is conducting at Lorenzo for boys of school age, was held in the Tech pavilion Friday night.

"Selecting Dairy Cattle," was the subject of the discussion led by Obie Norton and Herbert Davis. Three breeds of cows, Guernsey, Jersey, and Holstein-Friesian, were used in the teaching of selection.

Nearly 25 Lorenzo boys attended. Refreshments were served after the class, and the group was shown through the boys' dormitory.

The class met twice a week at Lorenzo, and is taught by boys taking work to qualify, under the Smith-Hughes law, to teach vocational agriculture.

SOME KIND OF RECORD

Something in the way of a record was made by the Joliet High school basketball team during the past season when they defeated the Mokena five, 25-6, in a district tournament contest.

Don't forget to bring that Nickel (5c) to school Friday, the 28th for your April Fool Edition.

Speech Students Will Be Judges For League Meets

Miss Ruth Pirtle, professor of the speech department, will serve as a critic judge at the Panhandle Speech Festival to be held at Amarillo Friday and Saturday.

Students who will serve as judges this week-end for county inter-scholastic league contests and the places they will go are:

Levelland: Truman Hines, Clay Thompson, Edwin Butler.

Brownfield: LaVada Baze, Alton Hankins, Mary Scott.

Borden: Jane Woodruff, Buster Moxley, Mary Lou Hopper.

Lubbock: Lola Beth Blackwell, Verna Carson, Helen Davis, Alice Fyffe, Lola Mae Grundy, Anabel Carter, Nell Hughes, Jerry Kerbow, Frances Burns, Charles Cox, Lois Darice Daniel, Tommie Echols, Nancy Faver, Mary Lou Hopper, Elsie Marie Hudson, Louise Pfarr, Mary Scott, Beth Butler, Minnie Horton, Emma Smith, Caroline Sweet, Mrs. Lee Fields, Ione Porter, Rosella Dixon, Charlene Stovall, Mrs. Alford, Sunny Rhodenbaugh, Helen Lehmburg, Florence Stark, Eunny Dow, Carl Nowlin, W. L. Porterfield, Paton Price, Charles Still, Charles Cosgrove, Woodrow Howell, Wilton Lynn, F. L. Heide, Kline Nall, John McNeill, Ted Wilson, Norman Wilson, Clinton Hoard, Harry Kelsey, Pat Marse, Paul Patillo and Dunk Richards.

Dorm Girls Make Plans For Dance At House Meeting

That the spring dance in the girls' dormitory is to be semi-formal was decided Tuesday night at a house meeting. A motion that it should be a program dance was defeated.

Jean Ayres, president, appointed the following committee to make arrangements for the dance.

General arrangements: Christine Bundy, Helen Francis Eiland, Pauline Hooser, Mary Frances Self, Judith English, and Helen Lehmburg.

Music: Crystelle Scudder, Lena Belle Brown and Ruth Rutledge.

Entertainment in the lounge: Fern Hudson, Jackie Conner, and Adelaide Self.

A motion was made and passed for one o'clock privileges on dance nights. The change will be submitted to Mrs. Doak for approval.

Textiles To Test Hawaiian Grass

Dr. Baltazar of the Agronomy department of the University of Hawaii has sent the textile department a sample of Ballan, a grass used by the Hawaiians to make rope. Dr. Baltazar asked the textile department to use this grass for experimentation purposes to see if it can be used as a textile.

The fibre in the grass is similar to linen, and the textiles are experimenting with this grass to see if it can be used as a material.

Block And Bridle Club To Initiate Pledges April 1

The Block and Bridle club will hold its next meeting on April 1st, and will be in the form of a "fun night" for prospective pledges.

Committees are now at work on the annual Block and Bridle banquet which will be held sometime in May.

Judging contests are also being planned for freshmen, sophomores and juniors.

The meeting will be in room 109 of the aggie building at 7:30 o'clock.

Only a limited number. You had better get one early.

Tech Co-Eds "Apple-Polishing" Ability Accounts For High Grade Average

"GIRLS have more 'apple-polishing ability,'" said one member of the faculty when asked to explain why Texas Tech coeds made a higher average last semester than the men students. The grade-point average for women was 2.83 as compared to a 2.18 average for the men students.

Several students, both men and women, and a few professors agreed with the above opinion, that girls have a way of putting things over on the professor and thus receiving higher grades than they deserve. One young member of the faculty said he thought professors were susceptible to this "apple-polishing" even when they thought they were not.

Other coeds were indignant when told of this insinuation. "That idea

April Fool Edition Will Spill All Dope

"All the hokey that's fit to print" will come out in the April Fool edition of The Torreador, which will be sold next Friday, since the first comes on an in-convenient day.

Walter Winchell and Wind through the Sully Fog will have nothing on this edition. Hitherto hidden facts about students and faculty members will be made public. Nothing will be suppressed which is fit to print.

In past years many curious facts and incidents which had remained a secret have been revealed on the pages of the April Fool edition. Hokey and wisecracks, usually located in the Torreador pages, will come into their own.

Students may read about the private lives of their instructors and fellow students. None will be spared who has something to conceal.

Price of the paper will be five cents a copy.

Stadium Rally Is Postponed

Affair Is Cancelled Due To Knapp's Absence; Plans Outlined

Because Dr. Bradford Knapp has been called to the bedside of his brother in Ames, Iowa, the all-college rally and free dance planned by the Stadium club for Tuesday night has been postponed until Thursday, April 4, tentatively.

Dr. Knapp, who was to speak at the rally, left Thursday for the home of his brother, Dr. Herman Knapp, who is critically ill.

The dance will be given in the gym from 7:30 to 10:30. The Matador band, directed by Professor D. O. Wiley, will open the program.

Speakers Named

The rally will feature short speeches explaining the necessity and possibility of the new stadium, by President Bradford Knapp; Professor W. L. Stangel, head of department of animal husbandry; and P. W. (Pete) Cawthon, head football coach. A public address system is planned and Leon Ince, president of the student body, will introduce the speakers.

Following the rally, a free dance will be held. Ned Bradley's orchestra will play.

The committee for the affair is Leonard Bishop, Braxton Gilmore, Ned Bradley, Bruce Zorn, Genevieve Hardberger, Jim Lindsey, Lomer Nelson and Jack Nowlin.

Expresses Appreciation

"I wish to express my appreciation for the attitude of the student body," Dr. Knapp said, "which now seems to be aroused and active, and full of spirit, looking toward this important step in the development of our college plant."

"I am hoping," Dr. Knapp continued, "that before long a meeting of the board of directors of the college may be held, at which time preliminary steps may be taken toward the employment of an engineer and of a final perfecting of the plan."

Dr. Knapp urges the student body and faculty to attend the rally and dance.

First Grade Students Visit Aggie Department

More than 100 first grade students from the local Dwyer school visited the aggie school Wednesday. The youngsters were conducted through the green house, propagation house, livestock pens, dairy barn and dairy plant.

When the group came to the large livestock scales they were weighed in groups according to the rooms from which they came in order to see whose room was heaviest.

Upon completing the rounds one small boy exclaimed, "I want to be a dairyman." The rest of the boys were quick to exclaim that they wanted to be dairymen, also.

Soil Erosion Director Visits In Aggie School

L. P. Merrill, regional director of the soil erosion service, and Allen Goforth, both of Lindale, were business visitors in the aggie school Friday.

The two men conferred with members of the staff with views on the soil erosion service.

They reported that the Tech men who are in the service at Lindale are doing very satisfactorily.

JUDGES TO SPEAK

Judging team members are to talk to the Aggie club at its next meeting Tuesday. They will discuss the Fat Stock show, which they have been attending at Ft. Worth.

Engineers Plan To Open Show On April Fifth

Plans For Seventh Annual Affair Are Nearing Completion

PLANS for the seventh annual engineering show, which will be open to the public April 5 and 6, are nearing completion, according to reports from a meeting last Saturday of the directors, managers, and departmental superintendents of this year's show.

The sixth annual show, April 13 and 14 of last year, was a success with nearly 6,000 visitors. The first show in 1928 had only 1,000 visitors.

Starts In Shops

The show starts in the mechanical engineering shops and power plant where metal works and arc and oxy-acetylene will be featured.

It proceeds to the textile engineering building, the printing plant in the engineering building will be the final feature.

Gifts for this year include fabric souvenirs from the textile engineering department, wooden gavel from the mechanical engineering department, and blue prints from the engineering department.

A plaque will be awarded to the freshman showing the most interest and working the hardest in the show. The prize, a bronze Tech seal, bearing the winner's name, on a wooden background, will be made in the mechanical engineering shops.

Freshman Support Asked

Freshmen are urged to take special interest in the show, according to Fred Fairly, manager, not only because of the award, but because success for the show is largely dependent upon them.

Students are urged to invite their parents to the show, which will afford them opportunity to see the progress made by Tech and the type of work students are doing.

Invitations were sent from Billy Martin, secretary of the junior engineering show of Amarillo High school, inquiring about the Tech exhibit.

Democracy Is Program Topic

Alpha Chi Convention At Austin Summarized By Delegates

"Democracy" was the theme of the program at the meeting of the Alpha Chi Tech scholarship society, Thursday afternoon, which was a reproduction of the national convention theme held at Austin for the regional chapters in February.

Delegates from the Tech chapter attending the convention rendered the program. Mrs. E. L. Pitts gave a humorous sketch of the banquet.

Voyle Vaughn gave a summary of the first day's program, and Lloyd Gower presented excerpts on the last day.

Hurmece New Member

Ruth Hurmece, a senior in the arts and sciences division, was elected as being eligible for membership in the society, making 25 seniors who have been elected for membership. Miss Hurmece, who ranks high in her division, was overlooked when the membership committee elected the new eligibles last fall. The upper ten percent of the junior and senior classes are considered for membership.

Committee Appointed

A resolution committee, composed of Dollie Clements, Jean Ayres and Hermena Shadle was appointed by the president to draft a resolution of thanks to Phi Beta Kappa, Texas university honorary society, and Dr. H. Y. Benedict, president, for the entertainment provided at the convention. Professor R. A. Mills, one of the sponsors of the club, was voted the scholarship key for having been sponsor of the society for seven years.

The new key was discussed and tentative plans were made for the annual tea and banquet to be held in April and May.

President

MARVIN COLLIE

Boys' Meeting Begins Today

Dr. Bradford Knapp Will Be Principal Speaker On Program Here

Northwest Texas Older Boys' Conference will begin its sessions here today, continuing through Saturday and Sunday. The First Methodist Church will be headquarters for the conference.

The Tech Matador band will play as part of the entertainment. About 15 delegates from Tech will attend the conference, according to Melvin Schumpert, president of Tech Y. M. C. A.

Grover Good Here

Grover C. Good, associate secretary of the Texas State Y. M. C. A., in a talk given in the boys' dormitory Tuesday night extended an invitation to all members of the Tech Y. M. C. A. to attend the conference.

Other principal speakers will be Judge George Dupree; Herbert W. Carter, Denver, Colorado; Hal C. Gossard; and Pat Henry, Marvin Collie, Amarillo, Texas, is president of the Northwest Texas conference.

Between 500 and 600 delegates from northwest Texas cities are expected to attend. The purpose of the meet is to instruct the boys in establishing and improving Y. M. C. A. organizations in their respective towns.

The Older Boys' work of the State Y. M. C. A. has organized groups of Hi-Y clubs in 175 high schools of Texas, total membership of about 6,000. These are the young men who promote and conduct the four Older Boys' Conferences of Texas each year.

Phi Psi Initiates New Club Members

At a banquet last night five Phi Psi pledges were given the third and last degree of their initiation in the textile fraternity.

The banquet was given in their honor in the Chimayo room of the Hilton hotel.

Spencer Wells, of Hemphill-Wells, talked to the group on his impressions of the textile market in New York. Dr. Knapp also spoke.

The pledges gave a program, composed of songs, dances and recitations. The new members are Fred Williams, Ursel Matthews, Worth Gansel, Joe Christian and Robert Butcher.

Renner, Buie Speak At Sudan Farmers' Meeting

K. M. Renner, head of the dairy manufacturing department and Eugene Buie, agricultural engineering professor, attended a meeting of the Sudan Farmers association at Sudan Wednesday.

Professor Renner gave a talk and demonstration on cream grading. A demonstration on title sub-irrigation gardening was given by Professor Buie.

Davies Opera Company Sings Classical And Modern Songs In Presentation

CONCERT numbers, negro spirituals, excerpts from light operas, and popular songs were given by the Davies Light opera company Monday evening in the Lubbock High school auditorium.

"We sing anything from light operas to 'The Last Round-Up,'" William Davis, director of the company stated.

Born In Wales

Davies, tenor, was born of Welsh parents in Wales, educated at the University of Wales, and came to America at the age of 20. After studying in Chicago, he organized the Davies opera company of five members about six years ago. Since that time 1500 different programs have been presented. The company came here from N. B. C. studios.

Favorite songs determined by applause, were "My Lindy Lou," sung by the contralto, Mildred Fleet; "Shortening Bread," sung by the quartet; "My Hero," from the "Chocolate Soldier," sung by Winifred Goodman, soprano; and "If I were as Young as You," sung by Davis and Miss Goodman.

Popular Songs Listed

"On the Road to Mandalay," sung by William John Thomas, bass, who also comes from Wales; "The Dawning," sung by the tenor and soprano; and modern "American Lullaby," sung by Miss Mildred Fleet. Several quartet numbers were presented.

Excerpts from "Of Thee I Sing," "No, No, Nannette," and "Rio Rita," were presented. A kitchen scene (Continued On Page Six)

Tech Junior Livestock Judgers Place First At Fort Worth Stock Show

Brandt Will Go To Textile Meeting In South Carolina

A meeting of the Textile Foundation has been scheduled for April 8, 9, and 10 in Greenville, South Carolina, for all heads of textile departments of the South and Northeast and officials of the Textile Foundation.

Professor Carl Dewey Brandt, head of the textile department of Tech, will go from here. This will be the third meeting of the textile foundation college survey that Brandt has attended. The other two were held in Boston and Atlantic City.

The delegates will work on a report compiled by Frederick M. Eaker, director of the educational survey of Textile Foundation, to determine if textile students are given the correct curriculum for employment in textile mills.

Yearbook Will Be Ready For Printer Early Next Month

La Ventana, college yearbook, will be in the hands of the printers, Economy Advertising company, by April 15, according to Howard Reed, editor.

Soap caricatures, photographs, and sketches of college life will be the theme of this year's annual.

There will be over 300 pages of this year's book. There are five main divisions with 14 subdivisions. The eight beauties have answered 50 questions to be used in their character sketches.

The sports section is finished except for tennis, track and WAA activities.

Approximately \$900 of advertising has been sold and work on the layouts for the advertising section has been started.

Four Professors Go To Conference

Dr. A. W. Evans, head of department of education; President Bradford Knapp; C. Laker, associate professor of vocational agriculture and agricultural education; and Dr. Albert Barnett, education professor, will attend an educational conference at West Texas State Teachers college, Canyon, this week.

Dr. Evans will discuss "Actual and Needed Changes in the Curriculum of Secondary Schools," Saturday. Dr. Barnett will speak Friday.

Junior Class To Consider Prom, Queen At Meeting

Nominations for junior queen will be considered and the Junior prom dance committee will be appointed at a junior class meeting Monday evening at 7 o'clock in room 220.

Class officers are Bob Harding, president; Leonard Curfman, vice-president; and Pauline Yeager, secretary-treasurer.

Dr. Knapp Is Scheduled For Commencement Talks

Dr. Bradford Knapp's spring speaking engagements include an address to the First District Federation of Women's clubs at Mineral Wells, April 22, and six commencement addresses.

Commencement addresses will be delivered at Slaton, May 14; Wellington, May 16; Shamrock, May 17; Clarendon, May 23; Tulla, May 24; New Mexico A. and M., May 28.

Pre-Med Club Dance To Be Given April Fifth

Ned Bradley's orchestra will play for a Pre-Med club dance Friday night, April 5, from 9 to 12 o'clock in the auditorium. Decorations will be in black and white, club colors.

Members of the orchestra will be dressed in surgeon uniforms. Club members and guests will attend.

Dr. Martin H. Benson addressed the club at its last meeting. His subject was "History of Medicine in the Last 150 Years."

Following his address, plans for the dance were discussed.

The next meeting of the club will be April 2.

MAYBE IT'S THE NAME?

Because she outplayed men, Nathalie Colvocoress now has a regular place on the Cornell polo team.

Ohio State university contributed \$43,367 to the federal and state governments last fall as taxes on its five home football games.

Dairy Team Is Fifth In Exhibition Finals Last Monday

IN competition with eight college and university teams the Tech junior livestock judging team won first place in the livestock judging contests at the Southwestern Exposition and Fat Stock show in Fort Worth last Saturday.

In all events, Arvie Elliott of Lubbock and Howard Preston of Sudan were high men for Tech. Elliott placed fourth and Preston was fifth. In departmental competition among individuals Preston ranked first in horses and cattle while Elliott placed second in cattle.

Dairy Team Ranks Fifth

The Tech dairy team which competed at the show on Monday placed fifth in the finals. Members of the dairy team are: Winburn McAllister, Arvie Elliott and Leldon Hudson. Dr. F. C. Harbaugh is coach of the team.

Tech swine exhibit, including eight each of the Duroc, Hampshire, and Poland China breeds, won several honors. Tech won grand champion and barrow, grand champion pen of barrows, and grand champion litter. The barrow and pen of barrows were Durocs, and the litter was Hampshires. It was the first time for Tech to win these honors.

Team Standings

As a whole, the Tech junior judgers were second in the judging of cattle and second in judging horses. Standing in points of the competing teams are as follows: Texas Tech 4,173; Nebraska U., 4,155; Kansas State Agricultural college, 4,135; Oklahoma A. & M. college, 4,108; Texas A. & M. college, 4,104; Missouri U., 4,058; Wyoming U., 4,021; Panhandle Oklahoma A. & M. college, 3,910; and Louisiana State U., 3,889.

Livestock Judging

Other members of the team besides Preston and Elliott are J. T. Henry, Sterling City; Lee McElroy, Eldorado; and W. B. Rogers, Lubbock. Professor Ray C. Mowery, associate professor of animal husbandry, is coach of the team.

Double T Men Give Program

Annual Performance At Gym Given Big Hand By Large Crowd

Broadway musical producers and wrestling bout promoters would find difficulty in producing a performance as full of entertainment as that unrehearsed by the Double T Association in the gymnasium Monday night. Fourteen hundred fans witnessed the "Double T On Parade," consisting of dance numbers by Tech co-eds and wrestling and boxing

They Win Again

THE ranking of Tech's junior judging teams at the Southwestern Fat Stock Show and Exposition at Fort Worth, with the livestock team winning first place and the dairy judging team placing fifth, adds to the recognition which the agricultural division is receiving. Leading colleges and universities from seven states were entered in the contests. These schools are recognized as having the best agricultural departments in the United States.

As a college not yet ten years old, Tech has established a remarkable record through her division of agriculture. Enrollment in this division has increased to such a point that room and equipment to handle agricultural students is inadequate. Each year the demand for agricultural teachers exceeds the number turned out. Graduates from this division are receiving good jobs all over the country as managers of creameries, farm superintendents, terracing experts and various positions with the United States department of agriculture. Recently 12 aggie graduates received appointments to the soil erosion service and more will probably be appointed later.

Last fall the Senior Livestock Judging team won second place at the American Royal in Kansas City, in competition with 15 colleges and universities from all over the United States. In December 1934 the Senior team won first place at the International Livestock exposition in Chicago, bringing home the famous bronze bull Spoor trophy. In these contests Tech competed with 25 entries from the United States and Canada making the Tech judges international champions. Such feats as this along with the recent winnings at Fort Worth gives the Texas Tech judges widespread fame.

Tech as well as all of West Texas should be proud of the school's division of agriculture and especially proud of the judging teams and their coach.

Strike Against War

A group of national student organizations plan a strike against war Friday, April 12, at 11 a. m., the anniversary of America's entrance into the World War.

Student leaders estimate that at least 100,000 students will respond to the strike call by leaving their classrooms at several American colleges.

The immediate incentives to the strike this year, the leaders declare, are the decision of the U. S. Supreme Court upholding compulsory drill, the Hearst campaign against liberal and radical students and professors, and the various student loyalty bills that have been introduced into the state legislatures, such as those proposed in New York and in California.

These students do not feel that the government made its largest peace time military budget and appropriated \$4,000,000 to the R. O. T. C. as an unemployment measure. Danger with Japan seems to be expected by the government considering the increased naval appropriations, fortification of the naval base at Hawaii and centralization of our defensive powers on the Pacific coast.

This strike will directly affect only a very small number of the five million or more college students of America. Such an action is futile in itself but it will cause discussion on the college campuses and crystallization of opinion, either for or against war.

The Last Laugh

WE saw him crossing the campus with the load of books under his arm, and watched him after reaching class as he took down very carefully the professor's lecture. We know how he loves the library and the smell of midnight oil. He uses books as a substitute for bull sessions and notebooks go to bat for "Ballyhoo." He has no time for dances and parties.

Somewhere he had picked up the idea that he was sent here to work, and he persistently sticks to it. He told some of the boys that he had only four years here, and that he wanted to use them to good advantage.

He has been criticized from time to time for the attitude that he takes. They have laughed at him and have made fun of him.

He's smiling a little now, and next week he will laugh out loud, will have some real fun.—*Old Gold and Black.*

Somewhat Literary

APOLOGY

THIS space is usually spent on something with a grave intent; But now, with gentle change of season (Forget that sandstorms sometimes wreck The coming of spring to Texas Tech) The writer feels there's valid reason To do as they do in a hundred climes: Greet balmy days with balmy rhymes!

SEASONAL EXHORTATION

The spring is near, and lad and lass Are tired of lab, fed up with class— And even the prof is bored and dour With talking only half his hour. How now the students groan and rage When sense upon the printed page Baffles the eye and balks the mind (And they already weeks behind, No doubt, with term report and theme)— When spring makes every thought a dream! And still we have two months to jog— It says so in the catalogue! Many shall fall, the goal in sight, Betrayed by balmy noon and night, But most of us will muddle through. The same way as we always do. But think, ye shrewd, of note and quiz: Spring A's aren't won by the mental whiz. But by the one who keeps the grind Till June's first week is left behind. If you can forget about springtime dating, Here is a chance for an all-A rating!

AFTERNOON CLASS

When winter comes it's quite a shock To crawl out of bed for an eight o'clock. But when air is warm and sky is blue It's hard to think from one to two. . . . Half asleep, I know too late I should have taken this course at eight!

SOUTH PLAINS LOVE SONG

My love, it's only Monday— But how about next Sunday? May I come over—say half-past two— And spend the sandstorm just with you?

From Other Campi

Pity The Poor Editor!

THE editor of a college newspaper is between a rock and a hard place, so to speak. He might think he is pleasing someone when in reality he is ruffling up their feathers badly. He even takes the blame from people who say they read between the lines and is the target of those who just imagine that a crack was made about them. He is the victim of every organization which fails to get one of their member's name on the front page.

He catches it because an article was not placed at an exact spot. He is an enemy because he failed to give just the proper amount of praise, then he gets it because he gives too much praise. He is unfair because he favors some organization, but then he is prejudiced because he doesn't favor another. He has favorites because he doesn't put everyone's article on the front page, but then he is a poor editor because he doesn't know how to pick his front page stories.

He is against athletics because he doesn't run all the athletes' pictures at least once a month, but he gives them too much attention because he does run their pictures now and then. He is a failure because he runs too many columns, but he is even worse because he doesn't run enough.

He is mad at me because he left out my name and mentioned others. He has it in for me because my name came last while he likes that other fellow because he heads the list. He must be a member of that club and is trying to kill us. He is just a tool of the Literary society. He protects the administration because he wants a pull, but he fights the administration to satisfy personal grudges.

So what is the poor editor to do?—The College Star.

Results of A "Bull Session"

IN one of their informal "bull sessions" a group of students at the University of Washington elevated their discussion to a plane higher than usual in such forums and worked out a singular plan of education.

Five points were outlined in their plan:
1. Class attendance will not be compulsory.
2. Only one final test will be given.
3. No grading system; either pass or fail.
4. A 25-hour week; five-hour day, and five-day week.
5. One subject will consume all of the students time until it is completed.

The first three suggestions are not unusual. They have been argued about many times. But the last two are sufficiently new and interesting to be worth comment.

The request for a 25-hour week sounds like the ultimatum of a heavy over-worked group. However, it might be a neat bit of dramatic irony if the sequel of such a plan proved more onerous than the present system.

Their last suggestion seems better motivated, especially at the present time. When the press of finals necessitates a frenzied packing of five subjects into one brain, one has the feeling of attempting to select a lunch in a cafeteria in five seconds, and finally getting hash.

Hash may be better than starving on nothing, but reason suggests the inexpediency of everlasting compromise.—*Minnesota Daily.*

The wisdom of conducting the nations affairs with so many theorists and so few practical men is being seriously questioned.—Frank Calcott, Columbia professor (before the last election.)

Perhaps the most striking resemblance between the regime of the Roman Caesars and the modern totalitarian state lies in the complete disappearance of respect for personal dignity.—Calvin B. Hoover.

CAMPUS EHOES

By JIM LINDSEY

Students at the University of Georgia recently protested the high prices charged by two theaters in Athens. After 200 students created a small riot by storming the movies, a mass meeting was held on the campus at which time it was decided to boycott the theaters.

A girl Pre-Med student at Kent college works her way through school operating her own shoe repairing room. Digging graves allows a Butler university freshman to attend college.

The total number of books in the Harvard university library at the present time is 3,602,040—the largest university library in the world. At a recent university of Missouri election, 200 more votes than registered students were cast.

Jane McGowne, assistant professor of physical education at the University of Washington, says that "Nine out of ten university coeds walk ungracefully. They carry too many books."

Students at Ohio State now have a state controlled liquor store adjoining the campus. Much criticism has been forthcoming because of the belief that a store so close to the campus would tend to increase student drinking.

It is estimated that approximately three-fourths of the college women in the United States attend co-educational institutions.

The influence of smoking upon intelligence has often been debated so a survey of 100 coeds was held at a northern institution to settle the argument.

Results of the classification showed that 40 per cent were constant smokers with 1.7 grade averages; 25 per cent were non-smokers and possessors of 1.6 average; while the remaining 35 per cent, who were occasional smokers, made an average of 1.8. . . . which, like most surveys means exactly nothing.

There are two ways for a storm to get you. It can either attack you directly or it can beat about the bush and cause you to commit suicide. The latter method was recently discovered at Cincinnati university by Dr. C. A. Mills, whose studies have shown that there is a correlation between suicide waves and wave of turmoil in the weather. There are also homicide ripples.

RECALLING THE PAST

By E. D. FYKE

SIX YEARS AGO— From all we can hear the Matadors will get a royal reception when the special train pulls into the city of evil smells. They are going to have the police out to protect us, maybe to keep the fish from stealing lamb globes from the awnings and lamp posts. Well, they had better be ready for action. Tech has been looking forward for this incident and it will be a big day in stock town for the Technicians.

The college students are turning out by the hundreds to accompany the Matadors to the biggest game scheduled for the season. They are off to give the T. C. U. Horned Frogs a battle that they will never forget.

The school of home economics has the largest enrollment in the history of the school. One hundred and twenty seven students are enrolled and 20 liberal arts students are scheduled for one or more classes in the school.

NINE YEARS AGO—

The Tech Matadors entrained Wednesday night for Austin where they will enter into the annual Texas Relay games being conducted at Texas Memorial stadium under direction of the University of Texas.

Miss Glenys Honey, Lubbock, was elected queen of the first annual junior prom yesterday. She will lead the grand march with Winfield Nicholas, Amarillo, president of the class.

During the last 28 years, retired faculty members of Harvard university (Cambridge, Mass.) have received more than \$2,250,000 from the Carnegie foundation.

Dr. C. A. Mills, whose studies have shown that there is a correlation between suicide waves and wave of turmoil in the weather. There are also homicide ripples.

ONE-MINUTE INTERVIEWS

Question: Does the library need a bounce to remove all loafers and lovers.

Janita Jo Beasley: "I suggest a larger study hall to accommodate rather than have a bounce for eliminations."

Reudell Irby: "A bounce for the library would remove the best social center on the campus but might make possible a better study hall."

Hazel Bryant: "If we had a bounce to remove loafers and lovers the studios students wouldn't have to park on the stairs and benches."

Charlene Stovall: "A bounce would help, but the loafers and lovers removed would only make more noise in the halls and on the stairs."

James Atcheson: "I think its a good idea."

Woodrow Waggoner: "But where else could the students go to loaf and love?"

Margaret Mayhugh: "I think its a good idea to bounce out the studios people to make more room for lounging and courting."

Only Yesterday

ONLY YESTERDAY. I WAS talking. WITH A man. WHO HAS seen. NEARLY SIXTY winters. COME AND GO. AND HE WAS talking. ABOUT THE "good ole days." AND HE SAID. HE WAS impatient. WITH THOSE people. THAT WANT to go back. TO WHAT they call. "THE GOOD ole days." I ADMIRED him. AND I told him so. AND I walked. AND THOUGHT about. WHAT HE said. AND I hoped. THAT IF I live. FIFTY years longer. I CAN say. THE SAME thing. ABOUT TODAY. THAT HE said about. "THE GOOD ole days."

Women's Athletic Association Sponsors Dance Saturday

Lull In Campus Social Life Precedes Spring Dances, Picnics And Parties; Social Events For Week-End Listed

WITH much attention diverted to the Older Boys' conference, which begins its sessions here this week-end, social activities are at a standstill preceding the spring dances, picnics and parties. Several campus clubs are planning spring affairs.

Women's Athletic association is sponsoring an all college dance in the gymnasium Saturday evening. Ned Bradley and his orchestra will furnish music.

Proceeds Go To W. A. A.
Proceeds of the dance will be used to promote the annual Play Day held by the women's athletic department in the spring. Dollie Clements, president of the W. A. A. stated.

Dancing will begin promptly at 9 o'clock. Chaperones will be W. A. A. sponsors.

Sunday afternoon at 2 o'clock in the women's dormitory, sciences in everyday life will be discussed by the Fireside Forum members.

Programs for several campus clubs have been worked out to be presented at regular meetings next week.

Mrs. George Langford will meet with the Forum Monday evening at 7 o'clock in room 313 of the administration building.

Miss Ruth Douglas, president, will preside for a regular business meeting. Routine business and plans for the spring affairs will be discussed at the meeting.

PERSONAL MENTION

Merle and Stella Green visited in Levelland last week-end.

Pauline Anderson visited her parents in Fort Worth over the week-end.

Jack Bostick went to his home in Fort Worth last week.

Elsie Pendleton, Wilson, visited her parents during the week-end.

Bob Koger visited in Lamesa last week-end.

Jane Tinsley and Eva Mae O'Neal visited in Big Spring the past week-end.

Marjorie Scott and Billie Boyd visited Pauline and Clarence Bule in Stamford last week. They also visited in Haskell and Abilene.

John Manning of Fort Worth attended the Southwestern Exposition and Fat Stock show last week.

Martha Vernon Smith, freshman student, has returned from a visit with relatives in Fort Worth.

Winslow Dahnke, of Boyce, 1934 June graduate, visited here last week.

Latin Club To Entertain High School Students

Tech Latin club will entertain Latin students from high schools throughout the Panhandle at a tea to be held at the Women's dormitory March 30.

The students will come to Lubbock as the guests of the local high school to attend a meeting of Latin students. The session will close with a banquet, at which Mrs. Dingus, of the foreign language department, will speak on "Horace."

One hundred and thirty-five undergraduates at Princeton university, working as waiters in the dining halls during 1933-34, received \$31,971 wages.

CLOTHES DISCUSSED

"Clothes and What to Wear in the Spring" was the topic discussed by Mrs. Lois Lively before members of Las Leales club at the home of Ruth Douglas, 2913 Twenty-first street, Wednesday evening. Mrs. Lively, a local seamstress, discussed street, evening, sport and afternoon clothes.

Dramatic Club Has Versatile Program

Members of the Sock and Buskin club were entertained Tuesday evening at their regular meeting with a varied program. Gordon Gaines presented two vocal solos, "The Two Grenadiers" and "Young Richards." He was accompanied by Charles Fike. A play, "He Said and She Said," was presented by Jerry Kerbow, Helen Davis, Pat Marse and Anabel Carter. The play was directed by Lola Mae Grundy. Nancy Faver, a former member of Sock and Buskin, presented three of her puppets in tap-dancing and ballet dancing numbers.

The new members: Helen Lehman, Mary Howell, Pat Marse and Stiles Thomas, are to present the program at the next meeting.

Dean Weeks Will Discuss Nutrition At Meeting

"Newer Phases of Nutrition" will be discussed by Miss Margaret W. Weeks, dean of home economics division at the March meeting of the Quarterly club Wednesday evening at 7:30 o'clock in the home economics tea room.

Mrs. W. B. Gates, president of the club, will preside during a business meeting. Dr. Bessie League is chairman of the program committee.

Botany Club Gives Party

St. Patrick's Theme Is Featured; Shamrocks Given To Guests

John Marr reviewed a paper entitled "Outdoor Library of Living Plants Developed by the Fort Worth Park Department" at a meeting of the Botany club Monday evening.

A short business meeting was conducted and Martha Cox and Charles Weddle were appointed as members of a program committee.

The club had a St. Patrick's party Friday evening in the chemistry building. Dancing, bridge and other games were the diversion.

Shamrocks were given to each club member and their guests attending.

Guests and members at the party were Misses Josephine Kay Lee, Martha Emma Cox, Ruth Bennett, Helen Weatherford, Bessie Jaye Donnell, Helen Jennings, Elizabeth Montfort, Maxine Langford, and Messrs. Rogers Orr, James McKinon, Walter Coulson, Novice Chant, George Phillipbrick, Charles Weddle, Lloyd Miller, John Marr, W. J. Burck, Jesse Browning and Dr. E. L. Reed, one of the sponsors.

At the next meeting of the club, Monday April 1, Dr. R. A. Studhalter, one of the sponsors, will discuss a paper he has prepared, "Dr. Jekyll and Mr. Hyde of Reilia Americana."

Tech Graduate Awarded Doctor's Degree At Iowa

Elliot Powers, Overton, Texas, who graduated from Tech in 1930, took his Ph. D. degree in geology at the University of Iowa recently. Powers took his Master of Science degree in geology from Iowa university in 1932. He will remain at the university for the rest of this school year as research assistant in sedimentation in the geology department.

The theme of Powers' thesis toward his Ph. D. degree was "The Problem of The Prairie du Chien."

Delegates Attend Dramatic Meeting At Waxahachie

After making talks, inspecting a theater, being entertained with a banquet and dance, and presenting a play, two members of the Tech Sock and Buskin club and the sponsor returned Sunday from the first annual conference of Alpha Psi Omega, national dramatic fraternity, held at Trinity university, Waxahachie.

Charles Maedgen, Mrs. E. R. Heineman and Miss Ruth Pirtle, head of the speech department, were the Tech delegates representing the Tau Cast, Tech chapter "The Power of Suggestion" was the name of the play presented by the local delegation.

Mrs. Heineman spoke on "Producing Without an Audience," and Miss Pirtle on "The County Speech Clinic" and "Marionette Construction."

Saturday afternoon they inspected the Dallas Little Theatre, that evening they were entertained with a banquet on Peacock Terrace and a dance in the Crystal ball room, both in the Baker hotel. After the banquet a play was presented by the Southwest School of Drama.

Next year's meeting will be at Baylor university, Waco.

True Speaks On Child Study At Club Meeting

An open meeting of the Double Key society was held Tuesday evening in the tea room of the home economics building. Representatives from the campus clubs attended.

Miss Agnes True spoke to the group on "Opportunities of Child Study."

LECTURES TO CLASSES

Mrs. Waldo Trotter, head of Lubbock High school music department, lectured to Tech classes in public school music last Friday. She discussed musical pedagogy in relation to problems confronting teachers and pupils in public school music.

Only a limited number. You had better get one early!

Book Reviews

A historical novel, "Yonder Sails the Mayflower," by Honore Morrow, is my idea of the way all history should be presented. Don't let the reference to academics scare you off or you will miss some good entertainment. The love story woven through this tale makes it read well, the dialect, setting and descriptions are harmonious, and the facts are said to be historically accurate.

This is the story of the Puritans when they started for America, in the Mayflower and the pinnace, "Speedwell," after having fled from the religious persecution and intolerance in England. The spirit of the voyage, the hardships and failures, hopes and joys, are very real. Characterizations are excellent. The story does not tell of the end of the voyage, the landing of America, but takes us with the Puritans when they have to put in for repairs at Plymouth, then gives us a final picture as the Mayflower sails courageously into the unknown, leaving the battered and destructed Speedwell behind.

The author succeeds in enlisting our sympathies with the characters even though we may feel that they are slightly effeminate with their almost biblical speech, their sentimentality, and their richly colored, silken clothes.

For the person seeking excitement or escape from life, this book might be dull. For those who want something different from the hard, brittle, realistic fiction of today, it offers excellent reading.

Four Speakers Are On Physics Club Program

Several talks will be given Tuesday evening at a meeting of the Physics club at 7:30 o'clock in room 116 of the chemistry building.

Thomas Young, senior electrical engineer, will talk on "Hysteresis." Bill Davis will tell about a new method of weather forecasting called "mass analysis." Joe Caldwell and Ben Thompson will demonstrate an electrolytic cell and a selenium cell and will talk on photoelectric cells.

Plans Outlined For Geology Field Trip

Ninth annual field course of the department of geology and geological engineering will be held during the first term of summer school June 10 to July 20.

Two courses are listed on the program which will include a trip across the Sangre de Cristo range of New Mexico and into other regions of that state. The work will be carried out from a permanent

camp in the Santa Fe National forest. A similar field trip was conducted last year in this region.

The staff will consist of Dr. Leroy T. Patton, head of the department of geology and geological engineering, director; Dr. M. A. Stainbrook, associate professor of geology in charge of paleontology.

Registration for the field courses is limited to 12 students. Students interested in these courses should see Dr. Patton.

There are more than 60 football conferences in the United States.

University sports in Germany are still in their infancy, having been introduced only about 14 years ago by ex-soldiers. Up to now they have considered dancing to be the only sport worthy of them.

All-Conference

Occupying a forward position on the all-Border conference basketball team announced by Commissioner Emil Larson is Matadors, The Olney High product finished his collegiate basketball career by taking scoring honors with 192 points for the season.

Gilmore Gets All-Star Post

Weaver And Priddy Land Positions On Second Border Loop Five

Co-Captain Wilson Gilmore of the Tech basketball team was placed at forward on the all-Border conference team announced by Commissioner Emil Larson. Len Weaver and Lawrence Priddy received berths on the second quintet. All three are seniors.

The circuit teams were chosen from selections turned in by each coach of the six member quintets. The selection of a player from the mentor's own team is credited with two votes; other nominations are given one vote.

FIRST TEAM

Forward, Wilson Gilmore, Texas Tech.
Forward, Walter Schlotzhauer, Arizona university.
Forward, Anastasio Apodaca, N. M. Aggies.
Center, Ralph Bowyer, N. M. university.
Guard, Alvin Overson, Flagstaff, Guard, Chester Fuller, Flagstaff.

SECOND TEAM

Forward, Howard Church, Flagstaff.
Forward, Lauro Apodaca, N. M. Aggies.
Center, Ralph Winters, Arizona university.
Guard, Laurence Priddy, Texas Tech.
Guard, Len Weaver, Texas Tech.
HONORABLE MENTION
Guards, Herman Lanebring and Melvin Sizemore of Tempe and Sinner Vickers of Arizona.

Matadors To Start Spring Drills April 2

Tech Gridders Meet Sul Ross Lobos April 26 On Matador Field

Head Coach Pete Cawthon and his assistant, Dutchy Smith, will send Texas Tech's football candidates through their first official spring training session on April 2. Fifty-five prospects are expected from last year's varsity and freshman squads.

Although 14 players were lost this year via graduation, the Tech mentors will have 13 lettermen and 24 Picadors numeral winners out for spring workouts. Several additions who have not been on either squad are expected to swell the ranks.

After four weeks of practicing, the Matadors meet the Sul Ross Lobos here April 26 in their only spring contest. Two weeks will be left in which to iron out the mistakes uncovered in the teacher struggle.

CAWTHON WANTS YOU

Coach Cawthon urges that all students who have ever played football or who are ever interested in this sport to answer the initial call.

"We should have at least a 100 prospects on Matador field the first workout. Other schools of this size do. We can work with 100 candidates just as easily as we can with 50," the Tech head mentor commented after naming stars of the past who were discovered in intramurals.

According to Coach Cawthon, little time will be spent in conditioning. Most of the players have been participating in some winter sport and are in good condition. Starting with the fundamentals, the candidates are to take up play formations in preparation for Sul Ross game.

Candidates Listed
Varsity lettermen expected to report for spring training are: Line-men: Gaines Davis, Sam Jones, Walker Nichols, John Prim, Alvin Kotzola, Bill Holcomb, Bert Williams, Leslie Browning and Tox Wiginton. Backs: J. V. Beauchamp, Jim Neil, Wintred Baze and Charles Duval.

"This May Be Used For P. T. Credit Work"

DEAR TOREADOR READERS—

We wish to whisper in your ears that our food is as appetizing — and of as good quality as it was before prices on Meats and Foods went skyrocketing to the present levels.

Besides a good meal in a beautiful Coffee Room, we now have Don Harper and his Orchestra, recently from New York, playing that soft, syncopating music that is equally pleasing for Dancing or Entertainment.

You will be assured of a pleasant evening that can come only with the satisfaction of knowing you have had a good meal in an attractive and pleasant environment.

COME AND BRING YOUR—
THE HILTON

Farmer Is Golf Champion With Win Over Bell

Panny Farmer is the new Texas Tech golfing champion. The Knox City youth shot four under par to defeat John Bell of Lubbock, 5 up and 4 to go, in the championship round of the annual student golf tournament at Meadowbrook.

Farmer, who was medalist with a qualifying score of 89, succeeds Jack Wilson as Tech champion.

John Bell won the right to meet Farmer in the finals by winning over Al Ray Cooper of Ralls, 3 and 2. The new champion entered the last rounds by defeating L. G. Rainey of Childress, 3 and 2.

Coach Lonnie Langston and W. G. McMillan gave a picnic at the club Saturday for participants following the championship match. Special guests were Dr. Bradford Knapp and Dr. and Mrs. W. A. Jackson.

Four Matador Gridders Receive Tryout Offers

The third offer to play professional football came to Gwynn "Mule" Dowell last week in the form of a contract from the Brooklyn Dodgers of the National Professional Football league.

The star halfback of two seasons had previously received offers from the Pittsburgh Pirates and Philadelphia Nationals.

Truett "Juicy" Owens, tackle and guard; Captain Malcolm "Moon" Martin, end and captain of the 1934 Matador team, and Gaines Davis have been mailed tryout contracts with professional teams.

MORRISON WARNS

Ray Morrison upon accepting the position of head football coach at Vanderbilt bulletin board warning that no positions on the football team were assured.

Cinder Artists Prepare For Meet With Buffaloes

West Texas Comes Here April 6 For Opening Track Engagement

Despite adverse weather conditions, Texas Tech's track candidates continue preparation this week for their spring engagements under the watchful eye of Coach Virgil Ballard.

When the elements would not permit work on the cinder path, the Tech mentor carried on workouts in the gymnasium.

The first track opposition will be the West Texas Teachers here, April 6. The Matadors return the visit on April 13. Other meets are carded with New Mexico A. and M. and University of New Mexico. The Border conference meet will be held in Albuquerque during the week of May 4.

The Matador track and field squad and the events they are entering follow:
100-yard dash — William Sasser, Bonham; Ben Thompson, Lubbock; Ersel Matthews, Floydada; D. M. McElroy, Dallas; Yancy Price, Lubbock, and Morris Lane.

220-yard dash — Sasser, Thompson, Matthews, Price, McElroy and Gwynn Dowell, Royce City.
440-yard dash — Richard Austin, Gordon Hall, Cleburne; Kendrick Green, Lubbock; Judge Garrett, Bellvue, N. M.; Marion Harris, Salisaw, Okla.; J. T. Epperson, Cleburne; and Claude Thompson, Lubbock.

Half-mile — Bob Case, Petersburg; Henry Roberts, Lubbock, and Claude Thompson.
One mile — Howard Traweck, Matador; Harold Matejowsky, Chrisman; J. H. Freeland, Lubbock; Bob Case and Larry Priddy, Gainesville.
Two miles — John Case, Peters-

Lobos Win Border Loop Tournament

New Mexico university took the annual Border conference boxing tournament held in Albuquerque Friday and Saturday by winning five of the eight final matches.

The Arizona university Wildcats annexed second place honors with victories in the other three bouts. Wilmetta Nichols, Texas Tech's lone representative in the finals, was knocked out by Ralph Gallegos of New Mexico Lobos in the second of a scheduled three-round bout.

Four of the six members of the loop were represented in the meet. Three Matador fighters were eliminated Friday in the prelims. F. Livingston, New Mexico U. division Alton Hankins in the 153-pound division. G. Johnson, Arizona U., knocked out R. C. Mitchell in the first round. They fought in the 175-pound class. C. Cobb won over Bert Williams in the heavyweight division. Nichols drew a bye in the preliminaries.

burg, and Freeland.
Pole vault — Travis Martin, Westover; Maurice Cowan, Lubbock; Coleman Cowan, Lubbock.

Broad jump — Maurice Cowan, Coleman Cowan and George Hancock, Tahoka.
High jump — Maurice and Coleman Cowan.
Low hurdles — Forrest White, Cleburne; Travis Martin.

High hurdles — White.
Javelin — Gordon Ball, Judge Garrett and Truett Owen.
Discus — Leon Ince, Cleburne, Gwynn Dowell and Truett Owen.
Shot put — Bill Holcomb, Sulphur Springs; Leon Ince and Dowell.

TEXAS TECH COLLEGE

New Member Is Elected To College Group

Hardin-Simmons Becomes Thirteenth Member Of Congress

Hardin-Simmons university was elected to membership in the Southwestern Journalism Congress recently, according to a statement from J. Willard Ridings of Texas Christian university, secretary-treasurer of the organization.

Hardin-Simmons is the thirteenth member of the Congress. Other member schools are: Texas Tech, Baylor university, Louisiana State university, Mary Hardin-Baylor college, Southern Methodist university, Texas A. & M. college, Texas Christian university, Texas State college for Women, Tulane university of Louisiana, Trinity university, University of Oklahoma and University of Texas.

To Meet At Baton Rouge

The Congress will meet in Baton Rouge April 12 and 13. Tech will send delegates to this conference. M. G. Osborn, professor in Louisiana State university journalism department, is president of the organization. H. H. Herbert, University of Oklahoma, is vice-president, and J. Willard Ridings, Texas Christian university, is secretary-treasurer.

The executive committee is composed of Cecil Horne, Texas Tech; Delos Nooe, Texas State College for Women, and the officers of the organization.

Graduate Is Employed By Electric Company

Dean O. V. Adams of the engineering division received a letter from Willard M. Nott, who received his B. S. in electrical engineering from Texas Tech and has been employed in Waco, Texas, saying he has accepted a position in the engineering field with the Sangomo Electric company in Springfield, Illinois. After working there for two months he will be transferred to San Francisco, California and will be permanently located there.

It is estimated that more than \$100,000,000 changed hands in the United States in gridiron betting during the nine weeks of the last football season.

"Featured In Gold Diggers Of 1935"

Glenda Farrell and Dick Powell, above, play leading roles in "Gold Diggers of 1935," which will be screened at the Palace Sunday, Monday, Tuesday and Wednesday.

AMUSEMENTS

By WAYNE SELLERS

PALACE
"SEQUOIA"—Current attraction at the Palace is Metro-Goldwyn-Mayer's bid for the public's approval of nature pictures. With Russell Hardie and Jean Parker the producers have attempted to portray the great American wilderness of the Northwest. Featured for its excellent photography and perfection of technical details, "Sequoia" is said to be far better than "Trader Horn" or "Tarzan," from which pictures the idea of "Sequoia" was no doubt evolved.

Gold Diggers of 1935—Sunday Monday, Tuesday and Wednesday at the Palace, has Dick Powell, Glenda Farrell, Adolphe Menjou, Gloria Stuart, Frank McHugh and Alice Brady in the cast. The picture features the type of musical comedy which has won fame for Warner Bros. and is said to be a fitting successor to "Gold Diggers of 1933," and "Dames." Ten Texas girls from Austin, Dallas, San Angelo, San Antonio, Saint Joseph and Waco appear in the chorus numbers.

The Mystery of Edwin Drood.

—Next Thursday at the Palace, Claude Rains, star of Universal's thriller, "The Thin Man," shares the honors in "The Mystery of Edwin Drood," with Douglas Montgomery, Heather Angel and David Manners. Universal has undertaken to solve the mystery of what became of Edwin Drood, the psalm-singing opium fiend in the last and greatest of Charles Dickens' works left unfinished at his death.

LINDSEY
 Inside Information — Bert Sternbach presents a police "melter" with Rex Lease, Marion Shilling and Tarzan, the Police dog, today and tomorrow.

"When A Man's A Man," Harold Bell Wright's famous novel is brought to the screen with George O'Brien, Dorothy Wilson and Paul Kelly at the Lindsey Sunday, Monday and Tuesday.

"It Happened in New York" Gertrude Michael, Heather Angel, Lyle Talbot and Hugh O'Connell bring to the screen the affairs of a New York taxi driver, Lyle Talbot, who wants to marry Heather Angel, and a temperamental movie actress, Gertrude Michael and her manager, Hugh O'Connell.

Honor systems of some kind or another exist in approximately 20 per cent of the colleges and universities in the United States.

Dean Receives Rhodes Rules

Scholarship Regulations Of 1935 Announced By Representative

Dean J. M. Gordon, local representative of the Rhodes Scholarships, announces regulations of scholarships for 1935.

Rhodes scholars are elected for two years the first time but a third year may be awarded to men who made an outstanding record during their first two years, and whose program of studies makes a third year necessary.

Competition Staff
 "There is a competition for Rhodes Scholarships each year in every state," Dean Gordon said. For the purpose of this election, the 48 states are divided into eight districts of six states each.

Each state committee is empowered to nominate two men to appear before the district committee. From the 12 men nominated, the district committee selects four to represent their states at Oxford. The state may thus receive two scholarships or none in any one year according to the merits of its candidates.

Clements Gets Award
 Applications must be in the hands of the secretary of the state committee not later than November 2, 1935. Candidates must secure the endorsement of their college or university before this date. Students interested in these applications should see Dean Gordon for further details.

Canon Clements, who holds two degrees from Texas Tech, is the only student from this college to receive a Rhodes scholarship. He received the award, a two-year fellowship at Oxford, in January.

Theories As To Origin Of Planets Are Given; Mercury Probably Uninhabited; Mars May Contain Low Form Of Life

(Editor's Note: This is the fifth of a series of articles on astronomy written by Dr. R. S. Underwood, professor of mathematics.)

SOME two or three thousand million years ago, when the sun was a well grown but lonesome ball of flame, a big vagabond star came traveling by and strangely attracted our globe. So great, in fact, was this gravitational attraction that the tidal effect pulled out great masses of hot material and left them separated from but still dominated by the sun, swinging about it in gathering clots which cooled eventually into the earth and other hard-crusted planets.

Gives Probable Picture
 This, in brief, is the "planetary hypothesis" concerning the origin of the solar system. It has so many technical points in its favor that it at least gives us a consistent, fairly probable picture of what actually happened in the far distant past.

By this theory the inner, smaller planets, including Mercury, Venus, Earth, and Mars, as well as thousands of smaller stone-balls called "planetoids," came out of the side of the sun turned away from the passing stranger, just as lesser tides appear on our oceans on the face of the earth which is away from the tide-causing moon. The greater mass of material went farther out and condensed into the major planets, Jupiter, Saturn, Uranus, Neptune and Pluto. The debris left over was in part captured but not incorporated by the planets, making moons or meteoric rings, and in part left to wander in the far-coursing but sun-controlled orbits of meteors and comets. By this theory the planets would all be approximately in one plane, as they are, and would revolve in the same direction, as they do.

Mercury Uninhabited
 But whether or not present theories about the origin of the earth and the solar system are correct, there are many facts about this system which are well established. Mercury, the small inner planet, keeps the same face toward the sun and is probably hot, airless, and uninhabited.

Venus, which shows up so brightly in the present evening sky, is much like the earth in size and in density of atmosphere; but blanketing clouds hide its surface and leaves unsettled as yet the all-important question of its "day," or rotation period.

Mars May Contain Life
 The earth, next in line, we know to be a highly interesting place. Outside its orbit is that of Mars, a red planet with a day slightly longer than ours, a thin atmosphere, winter and summer seasons, white polar caps, changing seasonal colors, and other significant features which may or may not indicate some low form of life on it. The

planet now rises shortly after sunset, and is nearly as close to the earth as it ever gets.

Beyond Mars come the many planetoids, from five to five hundred miles in diameter; Jupiter, a nine-mooned, swift-whirling cloud-zoned monster; Saturn, a flattened, lighter-than-water globe encircled not only by nine moons, like Jupiter, but by a bright ring made up of meteors and unmatched elsewhere in the solar system; Uranus and Neptune, sporting four moons and one moon respectively; and Pluto, the small outermost planet discovered in 1930.

Ninety per cent of last year's graduates in engineering at Washington university (St. Louis, Mo.) have obtained jobs, a recent survey revealed.

By JIM LINDSEY
Toreador Sports Editor

Oh! Somewhere in this happy land the sun is shining bright. The band is playing and somewhere the hearts are light. And somewhere men are laughing, and somewhere children shout. But there is no joy in Mudville. The Mighty Casey has struck out. —Clipped

It won't be long now before the curtain goes up for another scene in this drama called Baseball. The landscape from semi-tropical Florida to sunny California is dotted with spring training camps. When these baseballers take the field next May they will find that much has happened in the Big Tent since the World Series ended last October. Above all, the most significant items are the retirement of George Herman "Babe" Ruth from active service and the appointment of Ford Frick as president of the National League.

Here on the campus the thoughts of some young men have turned to baseball with the approach of spring. The area between the Broadway drives has taken on the appearance of a miniature training camp as student baseballers "warm up" for the approaching intramural flag chase. Representatives from the social organizations and Los Ratos, winners in the diamond warfare last season, met with Coaches Cawthon and Ballard last Sunday. Plans were made for two leagues, one made up of social clubs and the other of independent clubs including Los Ratos and teams from the dormitory. Much interest is being manifested and if Mother Nature is kind with a gift of good weather, the lid will fly off the intramural race April 1.

The silver lining to Panny Farmer, Tech's newly crowned

golf king. The Knox City youth sharpened his putting blade to snuke the Meadowbrook course four under par despite adverse weather and an injured finger to defeat John Bell. And the Lubbock lad knows his way about the links, too.

But let's hand a piece of the lining to Coach Lonnie Langston and Bill McMillan. These gentlemen were the main cogs in the unreeing of the successful tournament. And the downtown merchants deserve a hand for the swell gifts donated for the champion and flight and consolation winners.

Spring football gets underway in ten days. Fifty-five candidates from previous squads are expected to report. The Matador team will be in the making. Thirteen lettermen, many reserves and numerous promising freshmen will be out to show themselves capable of filling the positions vacated by fourteen gridders that graduated from the varsity last fall.

Despite this anticipated large turnout, Coach Cawthon wants all students interested in football to answer the first call. Your presence will not only help the mentors, but it gives you a chance to show your stuff since intramural football was n't played this year.

Optimists are generally conceded to have been outlawed by the dark days of 1929, but there still are a few left among the Cryptographers and code-enthusiasts. And with this week's Cryptograph, we give you a new definition of the height of optimism—but before we give away the entire contents of the puzzle, we'll tell you to try it yourself. The answer will appear in next week's issue of The Toreador.

ABC BDEBA FG PHADIDI; CKACILHLJDJDKM NPOADFKD; JA AOQJ ORFKM PFHS FG "OKAEFKS OTNCLJC" — DK PFTC!

Professor George W. Woodbury of the plant industry department attended a short course in Sudan Tuesday night. He gave a talk on home beautification.

Primarily, industry should exist for man and not man for industry.

Tech Co-Eds

(Continued From Page One) pay off their obligations than boys.

Men Retain Beliefs
A few men students, however, still cling to the notion that men are mentally superior to women, but that they will not study as hard for several reasons. One freshman said, "I have argued, many times with my sister about which sex was the smarter, and I always came to the conclusion that the men have the edge on the women as far as intelligence goes. The girls make higher grades than boys, because they are just dumb enough to study."

"Boys have so many conflicting interests they just don't have time to study," stated one student, removing the cigar from his mouth and looking self-satisfied. Another remarked that girls would get up their assignments rather than get bawled out, whereas boys were less timid and more thick-skinned.

Says Girls More Intelligent
One coed came out flatly and claimed that girls have "more intelligence and more sense." A woman member of the faculty said that from the registrar's report it looked as if the boys were going to have to admit that the women were naturally more brilliant.

One professor, accented in the hall, when he found no names were to be used in this article, stated that the only explanation for the higher grades made by the girls was that "Texas Tech coeds are so unattractive that the boys will not take them out and they have nothing else to do but study." Those who do court, he added, can manage to put in a little studying during the 15 minutes between the time they finish combing their hair and the time their dates arrive. Boys, he concluded, have not the will power to use their spare moments in this way.

The only other explanation offered was that of a professor who is famous for the cracks he makes at football players. "The girls made a higher average, because there are few if any football players among them," he grinned.

To this a varsity man replied that football players were too "darn tired to study after workouts."

STUDENTS JUDGE MEETS
About sixty students in the speech department are judging in county interscholastic meets, this week in Brownfield, Floydada, Borden and Lubbock.

College Students Will Be Tried For Houston Murder

Trial of three suspects for the murder of Mildred Houston, freshman liberal arts student, will be the second pre-law mock trial of this year. Grand jury hearing on this case will be held April 1.

Jane Woodruff, Clay Thompson and Paul Eubanks will be tried as suspects of the murder. Miss Houston was shot Monday night, according to information given, while practicing a one-act play for Sock and Buskin. In the script of the play Thompson was supposed to shoot Houston in the last three minutes of the performance. When she did not move after the play ended she was examined and found to be dead.

Chief Justice George "Huey" Long has called a special session of the Pre-Law Supreme court for the 15th of April. Sheriff Clifton Crawford had an extra guard on the Tech pre-law jail, until all of the three suspects were released on \$5000 bonds.

The annual banquet of the pre-law club will be held at Seaman hall on April 12. Tickets will go on sale April 1.

Davies Singers

(Continued From Page One) from the opera "Martha" was the final number.

Jubilee Singers Next
Miss Fleet, who comes from Missouri, has studied in Washington college, Missouri. Miss Goodman, Iowa, studied in Chicago after being graduated from Cornell college, Iowa. Thomas has studied with Davis in Wales. The pianist is Miss Marie Adolph from the American conservatory of music and Smith college.

The Jubilee singers will appear here as the next and final number on the artist course. They come from a negro school in Mississippi.

Just as with all other good things there will not be enough for everybody so you had better get yours early! The April Fool Edition!

Uncle Billy Ditch has won 19 Southwestern baseball championships in the 24 years he has coached at Texas university.

Education Department Head Speaks At Canyon

"Actual and Needed Changes in the Curriculum of Secondary Schools" is the subject to be given by Dr. A. W. Evans head of the education department at Canyon Saturday morning at West Texas State Teachers college.

Dr. R. E. Garlin, professor of education at the college, made an address to the Women's society at Plainview last Saturday.

Double T Parade

(Continued From Page One) decision with the Matador fighter getting the upper hand.

Odie Ludlow, former champion at Oklahoma A. and M. and Harry Guthrie, Tech boxing instructor, battled to a no-decision match. "Moon" Martin and "Bear" Curfman, football stars, made the spectators think they were viewing a bout on Sled Allen's weekly card in a wrestling match with nothing barred. The Techsters opened the bag of professional tricks and threw in unorthodox tactics for good measure.

Jackie May took on Alton Hankins in a wrestling engagement. "Blackie" White and Winston Watkins staged a saner match in the prelim.

CORRECTION

Through a typographical error, it was stated in last week's Toreador that Coleman Cowan set a new Border conference vaulting record of 14 feet, 4 inches which is incorrect. Coleman, not Maurice, set a new loop record of 12 feet, two and one-half inches despite a spiked arm.

Dr. Armistid V. George, youthful discoverer of "element 91" and a University of Chicago professor, is now searching for a way to produce radium more cheaply.

Just as with all other good things there will not be enough for everybody so you had better get yours early! The April Fool Edition!
