## Scott elected president; more than 5,000 vote

By DONNY RICHARDS  
Assistant Editor

Bill Scott, Barbie Anderson and Mike Levenson took top honors in Executive elections Wednesday with the vice president's race locked in a runoff between Barry Brooks and Dennis Graham.

The runoff will be next Wednesday at the same time as the Senate elections and referendum.

Scott took the presidential election with a landslide vote of 4,141 to Rob Kellenbecks 619. Over 5,000 students participated in the elections.

THE WINNER OF the secretary's post was not announced until almost two hours late after Election Secretary Jim Wood called for a recount. Miss Anderson, ahead on the first count by 62 votes, gained five more votes on the recount and finished with a 2,481 to 2,414 total over Gayle Snure.

Levenson took his Business Manager's post strong, posting a 3,035 to 1,485 win over Curtis Brown.

Brooks and Graham swapped the lead in the vice president's race several times but neither managed to get a majority as Jim Chidester and Candy Hall pulled enough votes to force the runoff.

Graham led all candidates in the VP race with 1,913. Brooks was next with 1,767, Hall with 385 and Chidester with 322.

The vice president's race was perhaps the most controversial contest of the elections because of disqualification of

one of the leading candidates. Doug Williams was removed from the ballot at noon Tuesday by the Senate's Government Operations and Relations Committee for illegal campaigning. Tuesday night Tech's Supreme Court turned down Williams appeal to reduce the penalty and added to it by ruling Williams also was ineligible to run as a write-in candidate.

Besides Williams, David Lamb also was removed from the vice president's race by the Senate committee in charge of elections, Tuesday after he failed to turn in a budget report.

The Committee, chaired by Senator Rene Freeman, voted 3-1 to disqualify Williams. Senators Gary Lambert and Tom Powers with Freeman acted over the dissenting vote of Senator Bill Sewell.

### Oops! Campaigner 'Mrs.' vote

During the thick of election campaigning Wednesday in front of the University Center, one of Bill Scott's campaigners confronted a coed entering the Center and asked if she had voted yet.

The coed said she had not voted, so true to his candidate, the electioneer asked her to vote for Bill Scott. The campaigner was not deterred when the student said

she was going to vote for Rob Kellenbeck, Scott's opponent. In fact, the campaigner spent 10 minutes attempting to convince the coed that Scott was the man to vote for.

The coed stayed with her candidate, Rob Kellenbeck. When the campaigner asked why, she replied ...

He is my husband.

### Voting mix-up draws complaints

Four persons complained to the Student Association office Wednesday after they were turned away from polling places. The students had brown validation stickers on the back of their ID cards instead of white stickers.

A brown sticker indicates the student did not pay the student activity fee, while

a white one shows the student has paid the activity fee. A student may vote with either of the two stickers, on the back of his ID.

Election Chairman Jim Wood said the election officials were not correctly informed about the voting qualifications and after the error was corrected the students were allowed to vote.

### In tentative House vote

## Tuition increase approved

AUSTIN (AP)—The Texas House Wednesday tentatively approved, 96-49, a bill which more than doubles state college tuition for Texas residents and increases it more than triple for non-residents.

Final action on the tuition increase bill is expected today.

The bill, sponsored by Rep. Grant Jones of Abilene, sets tuition at \$7 per semester hour for residents, and \$47 per semester hour for non-residents.

JONES'S MEASURE originally provided a \$9 per semester hour resident tuition fee, but the House voted, 89-52, for an amendment by Rep. Tom Uher of Bay City reducing it to \$7.

Uher's amendment did not affect non-resident tuition.

A resident would pay \$105 a semester and a non-Texan \$705 if he carried a course load of 15 semester hours. Current tuition rates are \$50 for residents

and \$200 for non-residents, set by the legislature in 1957.

The original bill would have raised an estimated \$110 million over the next two years, but Uher's amendment trimmed this to \$88 million.

SOME \$9 MILLION more was knocked off by an amendment offered by Rep. Jim Nugent of Kerrville. This amendment allocated 50 cents from each hourly charge for residents and \$3 from non-residents' hourly tuition fee for scholarships for needy students. The amendment passed on voice-vote after an effort to table it failed, 66-75.

An amendment by Rep. Tom Moore of Waco to keep resident tuition at its present level failed, 98-45. Rep. James Cole of Greenville also failed with an amendment setting tuition at \$5 a semester hour.

"This bill will make it tougher on young people to try to get an education," Rep. Jim Clark of Houston said.

But Rep. Bill Clayton of Springlake said the bill was not intended as a burden on students "but so we can finance these institutions of higher learning."

Jones said the original intent of the legislature when it first enacted tuition at state colleges was that students pay 20 per cent of their educational costs, which now are estimated at \$700 per year.

"You are painfully aware of what has happened with instructional costs," he said.

By Preston Smith

## Three Texans named to Tech regents posts

Gov. Preston Smith Wednesday morning appointed three Texans to serve six-year terms on the Tech Board of Regents pending Senate approval.

Named to the Board were Bill E. Collins of Lubbock, Dr. John James Hinchey of San Antonio and John Clinton Formby of Hereford. The three terms will end Jan. 31, 1977.

COLLINS is the president of Hemphill Wells Department Store in Lubbock and was named to replace Marshall Formby.

HINCHEY, a San Antonio surgeon and Tech graduate, was named to the place vacated by Roy Furr, Sr.

JOHN CLINTON FORMBY, a nephew of Marshall Formby, Sr., and a past president of the Tech Student Association, was named to replace Retha Martin. The new regent is a Hereford broadcaster and past president of the Texas Association of Broadcasters.

Appointments are subject to Texas Senate approval.

## Tech Black Week plans readied

An attempt to convey black experiences and attitudes through a series of programs on black art, music, fashion and education is the purpose of Black Week, Mar. 8-12.

Theme of the week is "The Black Experience" and all events are open to all students without charge.

Black week is being sponsored by SOUL and is an outgrowth of the "Black Day" last year, which was highlighted by a film and a panel discussion.

Speakers for the week are being brought to campus in conjunction with the University Center Speaker Series and the Free Speech Committee which contributed money for films.

Maurice Williams, SOUL member, said although all events during Black Week are admission-free, boxes will be placed in the University Center (UC) for anyone wishing to contribute to a proposed scholarship fund for SOUL.

Black Week will begin Monday with 3 p.m. general assembly, open to the public, in the UC Ballroom. A committee will discuss the aims of Black Week and the black population.

At 8 p.m. Monday a 45-member group, the Langston Review, will entertain in the UC Ballroom by combining music, dancing and acting concerning blacks, past and present. The troupe is from Langston University in Oklahoma, a predominately black school, and the

members of the group are all black. Admission is free with ID.

Activities Tuesday will begin with a 15-minute film, "Blossom", which is about the easy relationship between two six-year-old children, one white and one black. A seminar with a panel will be conducted after the film to discuss its implications. Panel members include T. J. Patterson, Assistant to Dean of Business Administration; George Scott, Assistant Dean of Students; Student Association President Mike Anderson and one member yet to be selected.

An Afro mod fashion show will be featured at 8 p.m. Tuesday in the UC Coronado Room. The show will be presented by SOUL members, and during its intermission a seven-member theatre group within SOUL, called the Revolutionaries, will present a play about American fraud, or what Williams termed the "white man saying one thing and doing another." The play was written by Tech sophomore Rita Jones, theatre arts major.

Wednesday at 8 p.m., a 60-minute film, "Grass Roots", will be shown in the Coronado Room. The film concerns black attitudes toward whites and will have an audience — panel discussion afterwards. "Black Man's Pride," a film, will be shown at 1:30 p.m. Thursday and will feature a panel discussion by Williams, Miss Jones, Ken Baker and Brenda

Alexander in the Coronado Room.

Black writer Charles Hamilton will conduct a caucus or "rap session" at 9:30 p.m. Thursday in the UC Mesa Room. Hamilton, who co-authored the book "Black Power" with black militant Stokely Carmichael, is expected to present proposals "to straighten out the disunity among people," Williams said.

Black week will conclude Friday, Mar.

12, with a talent show at 8 p.m. in the UC Ballroom. Talent will be all black and will be drawn from the Lubbock community as well as from Tech. Williams said white stage hands would be used.

Students work on Black Week include Noah Mayes, Williams, Miss Jones, Miss Alexander, Bernard Seal, graduate student Henry Jonson and faculty sociologist Tom Calhoun.

## Door, stolen telephone team up against TAs

Tech maintenance would fix the door in X-40 if they knew about it.

The English and history teaching assistants occupying the building would call the maintenance department if they had a phone.

Such is the plight of the TA's in one of the temporary buildings on campus. The entrance door on the north side of the structure was blown down during the first snow storm of the year, said one of the assistants who wishes to remain anonymous.

"We can't call anybody," said a TA,

"because our phone has been stolen for the fifth time this year."

The occupants of the structure can't lock the outside doors to the building because not all of the TA's with offices in X-40 have keys which fit both the outside door locks and the one to their particular office.

"If we lock the door," said one of the English TA's, somebody gets locked out."

Meanwhile the situation at X-40 remains one of two types of cold. One irate teaching assistant said, "We can freeze in the john or our office."

UD Photo by Mike Warden

DOOR REPAIR HINGES ON PHONE...but the phone's been swiped.

### No platforms printed in UD

University Daily Editor Jim Davis has announced that platforms for Student Senate candidates will not be run because of lack of space.

Letters to the editor pertaining to the candidates, campaigns or platforms will not be run until after the elections.

# Letters to the editor

## Open letter on disqualification of vice presidential candidate

This letter is addressed to Doug Williams and all of the people who have taken an interest in his disqualification from the current vice-presidential election.

Let me begin by saying that not all of us are in agreement with the Supreme Court decision concerning Doug Williams' right to hold a write in campaign. In my opinion, this issue was not in debate and, at the very least, a second protest and trial would have been needed for the court to offer a ruling on this issue.

This write-in issue, however, is of secondary importance to the intent of this letter. My intent is to justify the disqualification ruling of the Government Operations and Relations Committee, which many felt was too severe. In this, instance I agree with the Court decision if for different reasons.

Consider this theoretical example: Suppose a sane adult, for any reason whatever, suddenly picked up a rock and tossed it through the window of the nearest car and was sub-

sequently arrested. Having been tried and found guilty the judge then sentenced the man to 20 years in prison. Obviously, this penalty is excessive and would not be tolerated.

The point I am trying to make is not the severity of the crime, but rather, that the law has set limits of punishment for various crimes, all clearly stated. A judge can not decide to set any punishment that arbitrarily comes to his mind; he must abide by legislative guidelines set for him.

In the Doug Williams' case,

the only penalties outlined in the election rules under which these elections were held were either qualification or disqualification. No limits were set on the penalties for various degrees of infractions. As I and the majority of the Committee viewed it, our interpretation of the infraction could only result in one of these two outcomes. All consideration given to the gray areas of the issue in an effort to determine the seriousness of the infraction could only be directed toward reaching either of these two results, not a penalty in between.

The same argument can be applied to the late expense sheet questions. The infraction was not considered to be of a serious enough nature in regard to its effect on the outcome of the election to warrant disqualification of the four candidates. Since an account of all campaign expenses must be submitted the deadline was extended to allow the candidates to remain qualified as determined earlier.

Let me remind the reader at this time that these arguments apply only to the set of rules under which the elections were held. To be in keeping with the

Court decision, a new set of election rules must be drawn up clearly stating limits for penalties other than disqualification to be assessed for varying degrees of infractions. This will indeed be a challenging task.

## Tuition charges can be bad

By HENRY STEELE COMMAGER

The decision of the trustees of the State University of New York to nearly double tuition fees at state colleges and universities over the next three or four years is an aggravation of a policy that is basically unsound and should never have been adopted in the first place.

Tuition charges are unsound because they are based on an erroneous principle: that higher education is a luxury and a privilege, not a service and a necessity. If higher education were indeed a luxury in which the state indulged a few privileged young men and women then it would be quite logical to require them to pay for the privilege. But if it is preparation and training for services essential to the well-being of the community we are no more justified in charging for it than we would be in charging for elementary and high school education.

In 1920 approximately 20 per cent of youngsters between the ages of 14 and 18 attended high school; today almost 50 per cent of those between the ages of 18 and 22 attend some kind of college, and in states such as New York the percentage is substantially higher. Clearly college is today what high school was 50 years ago. Yet no one in 1920 proposed charging tuition for high school on the ground that the few who enjoyed high school education were privileged characters. Are we so much poorer now than we were in 1920? Or are we merely more muddled in our thinking?

What are the arguments for public support of education? First is the principle—a principle

Editor's note: The commentary appeared in the New York Times on Feb. 5, 1971. It was sent to The University Daily as a letter to the Editor. We are fully in agreement with the arguments expressed.

invented in this country—that self-government cannot work without an educated citizenry. That principle was foreshadowed in the school laws of the Massachusetts Bay Colony as early as 1642 and 1647, and was given national endorsement in the Northwest Ordinance of 1787: "Knowledge being necessary to good government and the happiness of mankind, schools and the means of education shall forever be encouraged." What was true in 1787 is surely even more true today, that knowledge is necessary to good government, for surely the responsibilities of citizenship are more arduous now than they were in the eighteenth century, or even in the almost pastoral days of Harding and Coolidge.

The second argument for public support of higher education is equally familiar: that as our society grows every year larger, more complex, and more important, it demands more and more expertise to run it. Those who train themselves for the technical jobs of medicine, law, teaching, architecture, engineering, forestry and so forth—jobs that implacably require study beyond the high school—are not a privileged few enjoying special benefits denied to other citizens; they are public servants acquiring the skills to perform services that society must have if it is to survive.

Every other country in the Western world recognizes this and acts accordingly. The United States—the richest of them—is also almost the only one which requires university students to pay tuition. Not only is university education free in almost every Western country, but most enlightened nations, such as Britain, Denmark, Norway, even Russia, customarily pay the total cost of living for university students and a few, such as Denmark and Russia, make modest payments to students as well. They do this on the same principle that they, and we, pay not only for the cost of training, but salaries to those in the armed services. Are we indeed prepared to say that those who serve society by saving lives, or teaching the young, or advancing justice or providing essential scientific services, are less worthy of support than those who serve in the military?

Proponents of tuition charges always fall back on the argument that the beneficiaries of higher education earn more money in the long run than those who are not, and should be prepared to pay for the privilege. True enough, they do, and they are. For their earnings pay taxes and, as we know, on a graduated scale. It is a safe assumption that university graduates more than pay back the full cost of their education in higher taxes on their higher earnings. From even a hard-headed business point of view, what better investment of public money is there? Vietnam?

Henry Steele Commager is about to retire as professor of history at Amherst after 45 years of academic life.

**American Revolutionary**

Don Perkins plays a long-haired revolutionary, John Adams, in the cast of "1776," an historical musical highlighting the months leading up to the signing of the Declaration of Independence. "1776" will be presented in the Municipal Auditorium, March 15.

**Tickets available**

**Dance division to give concert**

A variety of dances choreographed by the faculty and students of the dance division of the women's physical education department, will be presented March 11-13 in a concert entitled "Celebration in Dance." Tickets for the concert are available at the Lab Theatre. Admission is \$1.00.

"Entrada," choreographed by Donna Larson, is the processional opening which serves as an invocation to the evening of dance. This modern ballet is traditional and ritualistic following the Baroque style. In the modern vein, "Easy Living," choreographed by Debbie Hefner and Gabrielle Jakobsmeyer, portrays a negative view of today's physical and mental degeneration, resulting

in a feeling of hopelessness and futility. "Designs" by Miss Hefner and Vauinie von Storch is an experiment combining bodies, color, time and lines through movement.

Two other works in modern style are choreographed by Tech dance instructor and production director, Janet Kerr. Mrs. Kerr has employed the technique of using light and shade in pictorial representation in "Chiaroscuro." This group movement emphasizes design and space with contrasting vocal sound and lighting effects. "Continuum," also by Mrs. Kerr, is in direct contrast to "Chiaroscuro" representing lyric movement styled for special costume effects.

A spark of humor is added by

student choreographers, Suzon Marx and Gabrielle Jakobsmeyer. Miss Marx' "Fuzashma" is a comical dance which characterizes clumsiness through its humorous use of costumes. "Variations on a Favorite Theme, Popus What?" by Miss Jakobsmeyer, reveals the results of many long hard torturous hours of the ballet dancer.

Included among the various styles of dance is the media of jazz. "Experiments in Jazz," Part 1, choreographed by Lelan Redline, reflects the night life of the big city, capturing the slow, mediodic moods of the city's inhabitants as they lazily prepare for evening. Part 11, choreographed by Gail Broussard, contains a more fiery and explosive flavor, thus making this section a definite contrast to Part 1.

**Factory projects exhibited**

"Blood, sweat and tears are among the elements involved in architecture projects plus many man hours," said Walter Calvert, assistant professor of architecture.

The sophomore architecture students have a display of a concrete block factory project on the 4th floor of the Architecture Building.

The students were divided into 28 teams of three members. Each were assigned to build a scale model of a concrete block factory, illustrate it and then

create a display. They were allowed three weeks to complete the project. During their lab the students worked on their project plus spent time outside of class on them. The seven sophomore architecture professors supervised the students work both in class and outside.

"The students spent about 200-250 man hours on this project. Their work is the best I've seen since I've been at Tech," said Calvert.

The projects will be on display for about two weeks.

**Clinic features Barone, Bell**

**Tech hosts Stage Band Festival**

Band leader Mike Barone and woodwind specialist Tim Bell will head the team of guest clinicians at Tech's fourth annual Stage Band Festival Friday and Saturday in Lubbock Municipal Auditorium.

Some 25 bands from junior and senior high schools in Texas, Oklahoma and New Mexico will participate in the two-day event sponsored by the Tech chapter of Phi Mu Alpha music fraternity in cooperation with Tech's Department of Music.

In addition to clinic sessions, Barone and Bell will be featured performers with the Tech Stage Band at the 8 p.m. Festival Concert Saturday. Tickets to the concert are \$2.

Other clinicians will be Paul Mazzacano, director of the Tech Stage Band, and Roy Roberts, music administrator in the Lubbock Public Schools. Bands will receive division ratings and top bands in each class will award trophies at the Saturday concert.

Barone, a nationally known trombonist, has worked with a

number of big bands and has written for such musicians as Gerald Wilson, Louis Bellson, Terry Gibbs, Al Hirt, Count Basie, Ertha Kitt and Doc Severinsen. His own band is now in its fourth year at a Los Angeles supper club.

Bell is a member of the music faculty at Tarleton College where he directs the College

Jazz Ensemble. His credits include the big bands of Buddy Morrow, Warren Covington, Ralph Marterie and Claude Gordon and a three-year tour of duty as woodwind soloist with the U.S. Navy Band.

Roberts is a former director of Lubbock's award-winning Dunbar High School Band and has played professionally with

the jazz band of famed tenor star Illinois Jacquet. While in the service he was a member, along with Jacquard and Clark Terry, of the Great Lakes Navy Station Band.

Mazzacano, who joined the Tech faculty two years ago, has had extensive experience as a free-lance arranger and percussionist. He has performed with Tommy and Jimmy Dorsey, Charlie Barnet, Sammy Davis Jr., Tex Beneke, Victor Borge and Tony Bennett.

**500 spaces blocked in Coliseum lot**

Parking in the Coliseum parking lot will be limited Tuesday, March 9, due to a program at the Municipal Auditorium, said Frank Church, traffic and parking counselor.

Five hundred spaces will be blocked off for the program. Students should park east of Jones Stadium, at the Law School, or B.A. dirt lot.

**Mutation topic of seminar**

Prof. Charlotte Auerbach, member of Britain's Royal Society and "Founding Mother" of chemical mutagenesis, will discuss "Applications of Mutation Research" at 10 a.m. Saturday, in Room 101 of the Biology Building.

Dr. Auerbach's seminar is sponsored by the Department of Biology. Dr. Ira C. Felkner of the biology faculty is a former student of the world-famous scientist.

She is an emeritus member of the University of Edinburgh faculty and associated with the Institute of Animal Genetics. She also is honorary director of the Edinburgh Institution's Medical Research Council Mutagenesis Unit.

Upon her retirement, a special issue of the "International Journal, Mutation Research" was dedicated to Dr. Auerbach, who is noted especially for the range of her studies. She has explored in depth the whole range of possibilities offered by working with systems from bacteria to mammals.

The Auerbach seminar is free to interested scientists and students.

**Well blows but not afire**

SABINE (AP)—A Sun Oil Co. wildcat well blew out in the Gulf of Mexico and was blowing gas bubbles high into the air, the Coast Guard reported Wednesday. No fire or oil pollution was reported.

A spokesman said the blowout occurred Tuesday morning when a drilling rig, set up 120 miles south of Cameron, La., reached a gas reservoir at 3,900 feet.

He said the well was properly

equipped with safety devices, but it blew around the drilling casings, sometimes blowing bubbles 20 feet into the air.

No injuries were reported, but the work crew abandoned the drilling platform and moved the rig.

The Coast Guard said high seas, reaching 25 foot swells, hampered workers' efforts to re-man the rig.

Because the gas is bubbling, the spokesman said, "it would be hard to set on fire the way it is coming up, although it would be possible."

He said the area was closed for two miles surrounding the rig.

**KTXT-TV gets Office of Education grant**

KTXT-TV, has turned an \$800 investment into dividends of \$24,000.

The investment involved paying for the publication of a booklet describing an 11-television program series about urban problems in the City of Lubbock.

Working under guidelines set forth in a grant awarded by the Coordinating Board, Texas College and University System, KTXT-TV produced and filmed the series, "People and Problems."

The series was funded by the Department of Health, Education and Welfare through the U.S. Office of Education.

"Originally," said D. M. McElroy, director of KTXT-TV, "we sent out 200 copies of the booklet to various agencies including the Coordinating Board, Texas College and University System."

"We sent a copy of the booklet of community services, Coordinating Board and he took it to Washington with him and showed it to the U.S. Office of Education."

"When the Office of Education officials reviewed the booklet on the series," said McElroy, "they said that it was the best document in support of continuing grants to educational television stations in the U.S."

McElroy said that prior to that time, the Office of Education had considered canceling the funds because they had no evidence as to the effectiveness of the program.

The primary objective of the program is to educate community leaders and public officials to contend with urban problems.

The U.S. Office of Education has made available \$9.5 million

for universities in the U.S. to produce special programs in community services and continuing education. Texas was allocated \$325,000 last fiscal year.

Only two television programs were funded like this in Texas, Tech received \$34,000 to do the 11-program series.

"We have had numerous requests for reprints of the booklet," said McElroy, "and because of this response from the Office of Education, Tech received another grant of \$24,000 to continue programs of this type during the next fiscal year."

In Texas more than a million dollars worth of applications were made for funds and only \$300,000 was given out for this coming fiscal year. "So," said McElroy, "I'd say our batting average has been improved

considerably due to spending a little extra cash for the printing of this booklet."

"In addition," he said, "when we asked for a four month extension on the original time limit this last fiscal year to use the funds we got it right away. Normally you have to use the fund during the fiscal year."

The 37-page booklet contains photographs and identification of panelists, moderators, outlines as to each program content and summaries of results.

In addition, a supplemental section describes programming aired about the tornado that struck Lubbock on May 11, 1970.

That series was entitled "The Road Back" and was made possible by the four-month extension granted by the Coordinating Board which administered the funds.

Spokesmen for Sun were not immediately available for comment.

The Coast Guard said the drill pipes were equipped with storm chokes—the safety devices which automatically shut off the pipes in an emergency. The absence of storm chokes was noted after a Chevron Oil Co. fire and spill off the Louisiana coast.

Shell Oil Co. is currently fighting an oil fire on a drilling rig in another part of the Gulf, south of New Orleans. That fire has been burning since a well blew out on Dec. 1, killing four men.

The Coast Guard said Sun Oil Co. probably would be able to stop the wild flowing gas by drilling a relief well—a three week process in which another well is drilled nearby.

**Maryland city, nickel laden**

BALTIMORE, (AP) - This is a nickels town.

"We're up to our necks in nickels," said a spokesman for the Chesapeake and Potomac Telephone Co., which collects almost three times as many nickels as dimes and quarters combined.

The trend has slowed in the past five years, he said, "but we still must make twice as many collections to empty public telephone coin boxes as do the companies in Washington, D.C. and Virginia. This is, because of the significantly higher usage of nickels."

Tech dance instructor Barbara Weadock, is choreographer of a romantic ballet entitled "The Wheat Maiden." After the harvest of fall wheat has been completed, a festival is held to choose a queen. The young maidens compete for the honor in a display of their charm and dancing talent.

 League of Women Voters will meet at 8 p.m. Wednesday at 2818-28rd St. This coffee will provide an opportunity for exploring the possibilities of forming a unit for college women. All interested coeds should contact Mrs. Duane Jordan, League President, at 785-9718.

## Rank has rights

SAN ANTONIO (AP) - Visitors to Brooke Army Hospital here found this sign recently at one of the two elevators in the main lobby.

"Reserved for the 7th floor only."

The patient, who had no knowledge of the sign, was former President Lyndon B. Johnson. He was under treatment in a special penthouse suite for pneumonia.

## Edinburg murder case to be retried

AUSTIN (AP)—The Court of criminal Appeals ruled Wednesday that two youths involved in an Edinburg murder trial had been placed in double jeopardy because of their age.

The case was sent back to the lower court.

The case involved Rene Rodriguez and Efrain Miranda, who were arrested in December 1965 for investigation in the

slaying of Daniel Garcia in Elsa.

Rodriguez then was 15, Miranda 16. They were sent to the Gatesville home for boys for prior burglary cases, records showed.

They were returned to Edinburg in June 1967 on a murder charge and found guilty in November 1968. They were tried as adults, with Rodriguez

receiving a 15-year sentence and Miranda 10 years.

In their appeals, the two contended the state had sufficient evidence to prosecute them for murder at the time they were sent to Gatesville, and thus they were entitled to a hearing on whether they should be certified and transferred to district court and tried as adults.

Proven by research

# Grain-fed hogs all same

Preliminary conclusion of a group of Tech researchers from the Animal Science and Food and Nutrition Departments is that the ham turns out the same whether the hog was fed corn, wheat or grain sorghum.

Experiments on 120 pigs have been conducted on feeding value of various grains for hams. The study is nearing completion, according to Dr. Zealand Tribble, swine specialist and project leader.

Others participating in the research are Drs. C. B. Ramsey and K. D. Lind and John Howell, graduate animal science major, all of the Animal Science Department; and Dr. S. P. Yang, Food and Nutrition chairman; and Clara McPherson; Dr. Ruth Carus and Marcie Moreland of the Food and Nutrition Department.

Data on the performance of hogs fed corn, wheat or grain

sorghum showed no significant differences in rate or efficiency of gains.

"A study indicated that the grain sorghum was less digestible than corn or wheat," Tribble said. "The ration containing grain sorghum was found to contain 94.1 per cent as much digestible energy per pound as those containing corn or wheat."

Data showed no significant variations in length, backfat thickness, loin areas or in the four lean cuts of carcasses from the three categories.

"However, there was a trend for the pigs fed grain sorghum to be meatier and have less fat than those fed corn," Tribble said. Carcasses of pigs fed corn had a significantly lower specified gravity than those fed wheat or grain sorghum.

No differences were found in color, firmness or marbling of hams and loins from pigs fed corn, wheat or grain sorghum.

The Sonray, an instrument used to measure depth of fat and muscle, was used to evaluate changes in depth of backfat and loin muscle. No significant differences were found in the increase in backfat or loin muscle depth during the experimental feeding period.

Weights of several organs and glands including liver, heart, kidneys, adrenal glands, pancreas and spleen showed no significant differences although the weight of the pancreas from pigs fed corn was smaller than those fed wheat or grain sorghum.

The pancreas is the source of several digestive enzymes and the heavier weight would indicate a greater activity of the gland for pigs fed wheat or grain sorghum. The significance of this finding has not been determined.

No differences were found in shelf life of pork chops from pigs fed the different grains. Neither was there difference in the shrinkage of the hams during the curing and smoking processes.

However, one taste panel found the flavor of cured ham slices from pigs fed wheat to be more desirable than those from pigs fed corn.

A loin roast from each of three animals from the different categories was given to the Food and Nutrition Department for evaluation of cooking characteristics, palatability and visual characteristics as affected by the different grains.

Pigs 'n' feed

Story of the three little pigs is this little piggie ate corn, this little piggie ate wheat and this little piggie ate sorghum.

# Space shuttle site launches big battle

CAPE KENNEDY, Fla. (AP) — Quietly and outside the limelight, a big battle is shaping up among various states for a huge economic prize: location of the launching base for the space shuttle of the future.

Cape Kennedy, from where man first went to the moon, is the leading contender in the treasure hunt.

But its premier position is being threatened by California and New Mexico. Oklahoma and Utah also are in the running, but are given only the slightest chance to pick the plum.

At stake are billions of dollars, thousands of jobs and a possible economic boom for the area that wins the launching site for the shuttle, the rouseable spaceport, scheduled for operation later this decade.

Politicians and lobbyists, backed by hundreds of thousands of dollars, are hard at work in Washington, trying to convince President Nixon and Congress that the space shuttle should be launched from their respective states.

A decision may come later this year.

Cape Kennedy is the leading candidate because the National Aeronautics and Space Administration already has invested \$1.5 billion here for land and for launch and support facilities for the Apollo moon program and other projects.

But the shuttle will be a unique craft, and some advantages that favored Cape Kennedy on earlier programs might now work to its disadvantage.

The complex vehicle is being developed to ferry men and supplies between the earth and orbiting space stations. It will be a fully rouseable two-stage

craft which will take off vertically.

The booster stage, the size of a Boeing 747 jumbo jet and manned by two pilots, will kick the orbital section into space and then turn around and fly back to the launch site, landing on a runway like an conventional aircraft.

The Boeing 707-sized orbital section, with two pilots and 12 or more passengers and 50,000 pounds of cargo, will continue to the space station. It later will return to earth with equipment and passengers from the space lab. It also will land like a plane.

Both segments of the shuttle will be designed to fly 100 or more times, greatly reducing the cost of operating in space. The price tag for the Saturn 5 rocket and spaceships for the current Apollo moon launch program is \$325 million and none of the hardware is reusable.

## Nominations open for top engineer

Nominations for the Distinguished Engineer award at Tech are being accepted by Dr. John R. Bradford, Dean of Engineering. Recipients of the award will be honored for their distinguished contributions to society at the annual Distinguished Engineers Award Luncheon on April 23.

In selecting nominees for the award, the broadest aspects of engineering such as cultural, managerial, educational and civic, as well as technological accomplishments, are considered.

Names for the honor may be submitted to the dean as well as any personal and professional data.

# Police say bombing possible

(AP)—When legislators heard about the bombing of the Capitol in Washington, a lot of them wondered if it could happen in Austin.

The answer is: Yes. Officials think they have a good Capitol security force but quickly admit it is undermanned.

The Capitol building is open to the public 24 hours a day, except on rare occasions. Christmas Day is the only holiday when the Capitol is closed to the public.

There have been numerous bomb threats in the past, followed several times by wholesale evacuations of employees and officials from the old pink granite building. All have been false. Presently, the Capitol security force consists of 20 men and officers, including Chief J.R. Smith. They work three shifts with four officers and a captain on duty at a time.

The Department of Public Safety also stations at least one patrolman on duty in the Capitol building at all times, plus others on duty at the governor's mansion nearby. Other state police can be called to the Capitol in just a few minutes. Austin Police also answer any emergency calls at the Capitol.

"We have asked for six more security officers for the next two-years and we really need them," said Homer Feerster, executive director of the State Board of Control which administers the security force. "These 20 men now, with one patrol car, have to keep an eye on all the Capitol complex plus

the state cemetery in east Austin."

Feerster says all security commissioned officers have completed the state law enforcement officers training course and are certified. All 20 officers are authorized to carry guns and have been trained in marksmanship, but the guns are kept locked up most of the time.

"Our major problems are at night and on weekends when at times there are large numbers

of tourists and visitors throughout the building," said Feerster. "At times we are not able to cover the building as we should."

At times, particularly late at night, the east and west wings of the Capitol are closed to visitors. Closed circuit television monitors near the east and west entrances give the central security office and indirect view, particularly around the elevator entrances to the living quarters of the lieutenant governor and the speaker of the house.

Feerster said other TV monitors have been requested for other parts of the Capitol.

A special citizens' committee of 100 studying legislative workloads and responsibilities last summer recommended that the Capitol be closed from 8 p.m. to 6 a.m. every day except when the legislature is in session. There has been no followup on the recommendation in this legislature.

—Vincent Canby, New York Times

**Reward offer for lost pin**

A reward has been offered for the return of a Pi Beta Phi sorority pin lost shortly before noon Wednesday on campus. The pin is shaped as an arrow with a guard and crest of the sorority at the bottom.

The Pin can be returned to Denise Westbrook at 6001 Norfolk Ave., or by calling 799-3906.

RATED GP EYES. 7:30 & 9:30 Sat. & Sun. Matinee 2:00

# Dr. Durham, Jones Aggies of the Month

Carl Jones and Dr. Ralph Durham were chosen as Aggies of the Month for February by the Student Agricultural Council. Jones as a student, Durham as Agricultural Teacher of the Month.

Durham is a professor in the department of animal science, where he was department head from 1959-1965.

Durham received his Bachelor of Science in Animal Husbandry from Colorado State in 1948, and his Masters and Ph.D from the University of Wisconsin in 1949 and 1951, respectively. He previously has taught in New Mexico State and Iowa State, and has worked with the U.S. Department of Agriculture. Durham holds membership in the American Society for the Advancement of Science and the American Society of Animal Science. In addition, he has been honored as a Fellow at the American Association for the Advancement of Science; as an Honorary Master Swine Producer in Iowa; and an Honorary Block and Bride Member. The principal research interests of Durham have been in nutrition, breeding, and carcass aspects of cattle, sheep, and swine.

In addition to his animal science activities, Durham is active in civic affairs, particularly the Lubbock Little Theatre, for which he is playing the male lead in Don't Drink the Water. He is married and has eight children, three of which have (or are) attending Tech.

Selected as Aggie of the Month for February was Carl D. Jones, a Senior Animal Science major from Witharal, Texas. He attended South Plains Junior College for two years before coming to Tech. While at South Plains, Jones served as President of the Rodeo Association, was a member of winning Judging Teams, was selected as South Plains Outstanding Aggie in 1969 and Outstanding Student by Texas Jr. College Agricultural Association (1969), was on the Dean's Honor List, and was selected as member of Phi Theta Kappa Honorary.

During the Fall of 1969, he transferred to Tech and has become active in Block and Bride, Rodeo Club, and Judging Teams. He has held TTAESBA and King Ranch Scholarships, and has been on the Dean's Honor List. He represented the local Block and Bride Club at its National Meeting in Chicago in the Fall of 1970.

"Boys In The Band" once more — this time as a movie. This movie is one of three new releases to be shown at the University Center. "A Man Called Horse" was the first movie shown. "Boys In The Band" will be showing March 5-7. The last movie, "The River," scheduled for April 2-4.

## 'Boys In Band' made into movie

Admission for Tech students with ID's is 50 cents. Only students can see these movies. "Boys In The Band" is showing March 5 at 4 and 8 p.m., March 6 at 8 p.m. and March 7 at 3 and 8 p.m.

### The Fight

It's The Fight, and for seven bucks a head on closed circuit television, it's also The Expensive Fight of the century, but when Muhammad Ali and Joe Frazier meet Monday night in New York, it ought to be quite a show.

The fight is so exclusive that it won't even be heard via radio, which is the first time this memory can remember such a thing. Seven dollars seems to be quite a chunk to see it in Municipal Auditorium here, but the bet is the auditorium will be pretty full when Ali and Frazier begin swinging.

NO MATTER what you think of their moral characters, the two heavyweights comprise what appears to be the best heavy-weight championship match-up in recent years. Sports Illustrated has billed it the Slugger (Frazier) vs. the Boxer (Ali).

Frazier definitely is a slugger, but remembrances from his bouts when he won the Olympic Heavyweight Championship in 1968 portray not only a hard-hitting pounder, but also a man quite adept at the art (yes, there is an art to it) of boxing.

But Ali (there still is a habit of calling him Clay), when it comes down to art, has to be the best of modern times. Never has boxing seen such a loud-mouth braggart who is actually as good as he says he is.

Ali brought something back to boxing at a time when it was on the downfall in popularity of American sports. For that, boxing owes Ali something.

BUT HIS personal problems and religious convictions or confusions, however you want to look at it, kept him from attaining the true, greatness he seemed destined for. Either that or the beating some wish he would get.

Frazier had to fight a battle with someone he could not see, since he was beating opponents in the ring, but he was never the true champion with Ali unable to fight.

Now Joe has a chance to prove he is the real champ, and Ali can silence the critics he had when he couldn't fight. The two men have so many qualities that make their battle The Fight, it seems a fight fan's dream.

Both are Olympic champs and both are unbeaten in their professional careers. And last, but far from least, both need the fight for financial reasons.

Clay had paid court costs which must at least have depleted, if not outlasted, the millions he made when he was the true champ. Frazier, on the other hand, has little education and would be working as a layman if he were not boxing. He has never had much money, so he will be hungry.

It should be a good fight, and both men will profit greatly financially. But when it's all over in The Fight, the winner has to be The Champ, Ali.

## Golfers begin action in Laredo meet today

The Red Raider golf team competes in the Border Olympics today in the first competition scheduled for the three-day festivities in Laredo.

The linksters, led by returning letterman Brad Wilemon, will take the course for three consecutive days in an attempt to win the team trophy. The Border Olympics will mark the first time the Raiders have competed in a tournament this year.

Also in action in Laredo this weekend will be the Tech track team. Always one of the top outdoor cinder events of the

season, the Border Olympics will feature teams from the Southwest Conference and other schools in the West and Southwest, as well as many of the state's top high school track teams.

The cindermen will run Saturday, with prelims in the morning and finals slated for the afternoon.

The coach of the golf team is Gene Mitchell and Vernon Hilliard tutors the track squad.

JOHNNY OWENS - Big bat for Raiders so far on road trip in South Texas.

## Raiders face rough going on trip

By MILLER BONNER  
Sports Writer

Tech's traveling baseball team dropped their fourth consecutive game in two days as the Red Raiders were victimized by Pan American in a double header Tuesday.

Today, however, the Techs will try to get back on the winning side of the slate against St. Mary's in San Antonio. The Raiders are scheduled to play both St. Mary's and Trinity University in the Alamo City before meeting the University of Texas at El Paso in Odessa on March 12.

Coach Kal Segrist's team managed only 10 hits in the twin bill as Pan American collected almost twice that number against the red and black hurlers.

Raider Doug Ham was charged with the loss in the first

game as the Bronchos claimed a 7-1 win while the Edinburg bunch squeaked out a 3-1 victory off Tech's Jack Pierce in the finale.

Segrist's ball club was 1-2 going into the game following a

win in the season's opener against Hardin-Simmons before losing a doubleheader to Pan American Monday.

Third baseman Johnny Owens led the Raider hitting attack in the first game with

two hits in three trips to the plate. Second baseman Barry Hoffpauir, centerfielder Randy Walker, right fielder Spain and left fielder Cecil Norris were the leading batsmen in the second encounter with one hit each.

## June grid tilt names coaches

Bob Devaney and Charley McClendon, who faced each other in the 1971 Orange Bowl, will renew acquaintances on the gridiron June 26 when they lead the East and West teams into battle in the 1971 Coaches All-America Football Game scheduled for Texas Tech's Jones Stadium.

Devaney's National Champion Cornhuskers defeated McClendon's LSU Tigers 17-12 in the Orange Bowl to clinch the national title. McClendon's LSU eleven rolled to a 9-3 record in 1970.

The All-America game will mark McClendon's second straight visit to Lubbock. He coached the East team to a 34-27 victory in the 1970 All America contest played before 42,150 at Texas Tech.

Devaney, the nation's winningest coach, will direct the West eleven. His assistants will include John Ralston, whose Stanford Indians upset the previously unbeaten Ohio State Buckeyes 27-17 in the 1971 Rose Bowl; and Bennie Ellender, the new coach at Tulane, fresh from a 11-0 season at Arkansas State

including a victory over Central Missouri in the Pecan Bowl. Ralston also is back for his second stint in Lubbock. He was an assistant to former Missouri coach Dan Devine who coached the West in 1970. Devine is now the head coach of the Green Bay Packers.

McClendon, who has led his Tigers to a 70-24-4 record the past nine years, will lead the East forces. He will be assisted by Northwestern's Alex Agase, who was named National Coach of the Year by the Football Writers of America.

# PUT OFF YOUR READING THIS SEMESTER?

## TAKE HEART! EVELYN WOOD WILL TEACH YOU TO READ 50-100% FASTER TODAY. FREE!

Sample the Only Reading Course taught at the **WHITE HOUSE**, and to **CONGRESSMEN, SENATORS, and KEY EXECUTIVES**

Reading Dynamics is the only reading course taught at the White House during the Kennedy and Nixon administrations, to the key executives of almost every major corporation (such as IBM, General Electric and General Motors), and special Congressional classes. Why? Because it works.

Read faster, understand more, in less time!

If you don't understand and remember what you read, you've wasted your time. Unique techniques taught only at Reading Dynamics enable you to read and understand material at least 3 times faster (it's guaranteed!) . . . or your tuition is refunded. The average: comprehension increases 12%; speed jumps 470%. Learn to read in 12 minutes what before took an hour. Even homework and technical material!

No machines, No gimmicks. Reading Dynamics **WORKS!**

Learn to read fast naturally. Research has shown artificial aids inferior to the techniques taught in Reading Dynamics. You learn to read groups of words (not word by word), quickly, easily, and almost as fast as you can turn the pages.

Techniques taught **ONLY** at Evelyn Wood **READING DYNAMICS INSTITUTES.**

You learn comprehension, recall, concentration and how to read 4, 5, even 6 times faster through exciting, new techniques discovered by Evelyn Wood and taught only in her Institutes. You'll learn more in one lesson than most "reading" courses teach in a semester. And follow-up studies have shown Reading Dynamics graduates retain their skill . . . and most become even faster, better readers. Because it's the natural way to read faster.

Over 500,000 People have learned to read 3-10 times faster

Locally, hundreds of students, executives, and housewives have learned to read "Dynamically." They're part of more than 500,000 who've taken the Evelyn Wood course and learned to read all they need to read, quickly and thoroughly. If they can learn to read 3 to 10 times faster in only 8 weeks, you can too!

Over 150 Institutes located throughout the world.

Teaching over 100,000 people a year makes Evelyn Wood Reading Dynamics the world's largest school of reading. And each person who enrolls has free lifetime privileges they may exercise at any of 150 Institutes throughout the world — from Australia to New York, Hawaii to Germany. The reason for the world-wide success of Evelyn Wood Reading Dynamics? Because it works! And it will work for you!
