Woodwind Quintet Plays Tonight As Feature Of Rec Hall Program

Summer Enrollment Shows Big Variety

Texas Tech is becoming a cosmopolitan college, according to figures released by the registrar's office. There are 15 foreign countries, 31 states of the United States and 180 counties of Texas represented by students on the campus the first summer semester.

Tech has 19 foreign students, two of whom are women; they come from following countries: Belgian Congo, Brazil, Burma, Canal Zone, China, Costa Rica, Colombia, Hawaii, Honduras, India, Iran, Lebanon, Mexico, Panama and Peru.

The college has 121 students, including 22 women, who come from states other than Texas. The following states are represented: Alabama, Arizona, Arkansas, California, Colorado, Idaho, Illinois, Indiana, Kansas, Kentucky, Louisiana, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, South Dakota, Tennessee, Vermont, Virginia, West Virginia and Wisconsin.

Texas has a representation of 1751 men and 866 women students. Lubbock leads the counties represented in the state with 947.

A breakdown of the undergraduates into classification shows 212 freshmen, 260 sophomores, 487 juniors and 1060 seniors for a total undergraduate enrollment of 2099.

Belgian Flutist On Twilight Hour

R. A. Dhossche, graduate of the Royal conservatory in Ghent, Belgium, will be the principal performer at the next presentation of the Twilight Music Hour. The program will be presented at 4 p. m. on Sunday, July 9, in the newly air conditioned auditorium of the museum.

Dhossche will present two flute solos, including, "Hills of Home" (Fox) and "First Andante" (Moulique) and will combine with J. W. King to present a flute-French horn duet, "Till's Serenade."

After coming to the United States in his late teens, Dhossche entered the army and became director of a U.S. Army band at an early age. During this time he was a band director with J. J. Pershing in the Villa expedition into Mexico at the turn of the century.

Following his retirement from army duty, Dhossche was director of the Magnolia Petroleum company band in Beaumont for 10 years. He also directed the Beaumont high school band. During the early 1930's he moved to San Antonio where he was first flute with the symphony orchestra of that city, when it was organized. For the past 10 years he has been band director at San Antonio Tech high school.

Mrs. Mary Doak Resigns After 25 Years At Tech

Mrs. Mary W. Doak, Dean of Women, Emeritus, has resigned according to Ed Smith, assistant to the president. Dean Doak was Dean of Women from the time the college opened until 1945.

Dean Doak has been on a limited teaching schedule during the past five years as professor of English. Mrs. Doak has served continuously at Texas Tech during its first 25 years.

Doak hall, men's dormitory, was named for the former dean.

The New York Woodwind quintet will be featured at the next presentation of the Artists Course series at 8:15 p. m. tonight. The program will be presented on the Rec Hall green.

The five members of the quintet include Samuel Baron, flutist; Bernard Garfield, bassoonist; Anthony Gigliotti, clarinetist; Raymond Alonge, hornist; and Ray Still, oboist.

The group was organized in 1945 during the Tanglewood Festivals and has been featured on programs at the Library of Congress, Washington, D.C., Pro Musica Society of Montreal, Ohio State university, Princeton university, and Cornell university.

Each of the performers holds a regular position with a symphonic group or is a solo performer when not on tour with the woodwind quintet. Anthony Gigliotti has been a solo clarinetist with the Philadelphia Symphony Orchestra. Raymond Alonge now plays solo horn for the Little Orchestra society and Ray Still is a visiting teacher at the Peabody Conservatory of Music during the winter months. Flutist Samuel Baron is on the boardman in Germany of the New York Flute club.

Bernard Garfield, the bassoon player and founder of the group, began the study of the bassoon at age 13 after three years experience on the piano. During the war, Garfield served as an army bandman in Germany for 18 months. At the war's end he applied to the Royal College of Music in London, taking examinations in bassoon and theoretical subjects and received the College graduation diploma.

In 1946 Garfield returned to the Tanglewood sessions of the Boston Symphony orchestra where he had been first bassoonist in 1942. There he organized the New York Woodwind quintet which has since been playing at various eastern events for colleges and chamber music societies.

In commemoration of Tech's 25th anniversary this year, the Tech Ex-Student association will present a silver service to the college for use in the Student Union building.

The service will include a large 18-inch bowl and 400 cups which are to be sold to members of the association. The name and class

See EXES PRESENT Page 4

Final examinations are not bringing worries on the campus this coming week because there will be 40 new smiling faces shining around the campus.

The men of the Texas Tech Glee club are returning to the campus next Tuesday to start rehearsals for the concerts they will give at the International Lions club convention in Chicago. Following three days rehearsal the group will board a chartered bus and begin the series of concerts that will terminate in Chicago.

Will Stay At The Stevens

Thursday evening the glee club will give the first concert of the tour in Drumright, Oklahoma. Friday and Saturday nights concerts will be given in Jefferson City, Missouri and Quincy, Illinois. The bus will arrive in Chicago Sunday at noon where the men will debark and find a room in which they may lounge at the world's largest hotel, the Stevens. While in Chicago the group will

New Business Department Added

Qualia To Receive French Testimony

An award as "testimony of gratitude in the teaching and diffusion of the language and culture of France" will be presented to Dr. C. B. Qualia, head of the foreign language department at Tech, at a celebration of Bastille day in Houston on July 14.

The "les Palmes d'Officier d'Academie" award will be presented to Dr. Qualia by Lionel Vass, French consul-general of New Orleans. The award is one of a few to be extended to citizens of other countries who have contributed to a better understanding of France among their people.

Dr. Qualia is intimately acquainted with France and its people. He served as interpreter for the American Commission to Negotiate Peace while on his first visit there in 1918. It was on this first visit to France that Qualia met the woman who is now his wife. They were married on his second visit in 1922.

After their marriage Qualia attended the University of Lyon. While on leave of absence from

Pre-registration Ends Today

Preregistration for the second summer semester at Tech ends today. Boxes and forms for your preregistration have been placed in the Administration, Engineering, Agriculture, and Home Economics buildings.

Registration will get underway at Texas Tech on the 12th of the month and students will avoid standing in line for their permit to register if they will fill out the proper forms now so that their permit to register may come to them through the mail.

In addition to the above information on registration, Dean George Heather, head of the division of business administration, has requested that all business administration students who wish to enroll for more than six semester hours of work during the second summer term secure approval of the dean of business administration prior to the registration date for the second summer term.

give performances which will include all types of music from the most modern to the classical Latin hymns. The glee club will be featured as the entertainment for "Texas night" during the convention. They will help in the musical "International night" extravaganza being given by professional showmen for the convention.

Richards Will Direct

Aiding the glee club will be the accompanist, Margaret Wilson, a Tech student, and soloist Grace Goodwin of Lubbock. Lion Richard G. Richards will direct the group. Richards has been the director of the club for two and one half years.

While in Chicago the men will be guests of the International Lions, and arrangements have been made for entertainment for the men during their off hours.

Following the convention the members of the club will make two concert stops on their return trip in Fulton, Missouri and Vinita, Oklahoma. The group will arrive back in Lubbock July 23.

ShIPLEY Heads Business Education And Secretarial Training Dept. At Tech

Probationary Rule In New Catalogue

New regulations regarding students who are dropped from school under the six hour rule and re-admission to the college have been handed down by the council of deans.

Under the present system, a student who fails to pass six hours work out of a regular load in a semester will be dropped from the rolls of the college for one semester. When he re-enters he will be placed on scholastic probation; if he fails to clear his status on probation, he will be dropped from the institution again. After he has been dropped the second time he may not re-enter.

The new regulations, approved by the council of deans, will become effective in September. Under these new regulations a student who does not pass the required amount of work to stay in school will be dropped and will remain out for one semester, being placed on scholastic probation when he re-enters. If he fails to clear himself of his scholastic probation status, he will again be dropped from the college and will have to remain out of school for two semesters. The same holds true for those being dropped from the rolls of the college a third time; they must stay out of school three semesters.

Students who have had to drop out of school for scholastic reasons will be re-admitted according to the regulations set up in the new catalogue, and will be dropped from the college under the rules set up in the 1949-50 catalog.

Under the old catalogue, a student is eligible for readmission only twice after he has been dropped. The new ruling permits him to be re-admitted a third time with approval of the council of deans.

When a student re-enters the institution after he has been dropped, he will re-enter on scholastic probation and will clear this probation under the rules set up in the old catalogue for the fall semester. If he is on probation next spring he will clear his probation under the rules set up in the new catalogue. These rules are as follows:

If the student is in his second semester he must pass in nine hours and make a minimum of three grade points. Students in their third or fourth semesters must pass in nine hours and make a minimum of six grade points. Fifth and sixth semester students must pass nine hours and make nine grade points. In the seventh or following semester a student must pass nine hours and make a minimum of 12 grade points.

Graduating Senior Deadlines Are Set

The following dates have been set as deadlines for the graduating seniors at Tech this summer.

The last day for ordering senior invitations at the College Bookstore for the August commencement will be July 13. The final date for making cap and gown reservations at the College Bookstore will be July 20.

All final examinations in correspondence courses should be completed not later than August 1. The deadline for turning in personnel information forms and two 2"x3" photographs has been set at August 10. These forms and photographs are a definite graduation requirement.

Others Are Named To Tech Faculty

Dr. Clifford B. Shipley has been named to head the new department of business education and secretarial training that will be organized for the start of the fall semester at Tech.

Dr. Shipley is now an associate professor and director of graduate business-teacher training in Bowling Green, Ohio. The new professor graduated from Turner high school, Turner, Kansas, and received his Bachelor of Science degree in mathematics and science from Baker university, Baldwin City, Kansas. He was awarded his Master's degree in education and business administration at Michigan university, Ann Arbor, Michigan. Dr. Shipley also holds a Doctor's degree in business education from Teachers college, Columbia university, New York, N.Y.

The primary responsibility of the new department head will be the development and direction of a new Master's degree program of study for secondary-school business teachers. The program will be operative on a full scale during the summer session, 1951. He will also direct the undergraduate business-teacher training program, the secretarial administration program, and will offer the Tech courses in office management.

Dr. Shipley has 15 years of experience in teaching and school administration. This experience has been gained in a small rural high school, a metropolitan high school and junior college as department head, a graduate teaching fellowship in business education, Teachers college, Columbia university, two summers as Professor of education in New York State College for teachers in Albany and three years in the position at Bowling Green which he now holds.

The agriculture division will also have a new associate professor in agronomy in Prof. Nobel K. Peterson. The new professor received his Master's degree from Purdue university in 1950.

Two new instructors are also being added to the Tech teaching staff with Francis J. Brock, Master's from Tech this year, and Terry Eric Wilson, L.L.B., U. T., being named. Brock will instruct in agricultural economics and Wilson will be a part time instructor in Music. Terry Wilson is also a former Tech student of 1942-43.

Dean Superintends Fair Livestock

W. L. Stangel, dean of the division of agriculture at Texas Tech, will serve as general livestock superintendent during the 1950 State Fair of Texas Mid-Century exposition, according to announcement of James H. Stewart, vice president and general manager of the exposition.

Stangel served as manager of livestock exhibits at the 1936 Texas centennial and in 1941 was superintendent of the National Aberdeen-Angus show at the State Fair. Previously he had judged the National Hereford show in 1939 at the State Fair.

Since organizing the livestock judging for the first post-war State Fair in 1946, Stangel has served annually as general livestock superintendent.

L. M. Hargrave, associate professor of agricultural education, will also return to the livestock division of the fair. He is to be assistant superintendent of the Junior Pig show and Junior Negro Pig show, a position he has held for three years, Stewart said.

THE TOREADOR

THE TOREADOR, student newspaper of Texas Technological college, is published every Wednesday and Saturday during the regular sessions and on Friday during the summer sessions on the campus of Texas Technological college at Lubbock by the associated students of the college.

Entered as second class matter, October 31, 1925, at the postoffice in Lubbock, Texas, under an Act of March 3, 1879.

Give The Education Undergrads a Break...

It is a wonderful thing to see so many graduates and teachers in school this summer, but it surely does put the poor undergraduates at a disadvantage. This is not the fault of the graduates, of course, as they have as much, or more, right to study here as anyone else, but it is how the subject is taught.

After teaching several years, a person naturally would have better ideas as to what needs to be taught in the schools and would have many other theories that undergraduates have not yet had the opportunity to acquire.

In case education instructors grade on the curve the undergraduate would not stand a chance. The instructors might keep this in mind when they begin grading. When they come to the "50's" that belong to undergrads, they might stretch the curve a little.

In many education classes on this campus, there are as many as 35 graduates and teachers and as few as three or four students still working toward their bachelor's degree. In a situation such as this, the undergrads naturally do not feel as free to participate in classroom discussion as they normally would. They feel that any idea that they might have would probably be wrong when compared to the ideas of those who have been teaching for a number of years.

Some of the education classes that are listed in the catalogue as "undergraduate" courses, but which graduates may take for credit, are being taught as any graduate course would be, without regard for the sophs, juniors and seniors. Quite a few "bachelor degree seekers" have been writing theses this summer, just because the instructors of these "undergrad courses" feel that the grads should write them. Good luck to the undergrad.

It is important that the grads get higher education, but it is also important that those students who are intending to teach school when they graduate learn the material that they are supposed to be learning.

If we do have a war, one of the very most important jobs will be the one of schoolteaching. More teachers are going to be needed than ever before and the situation will even be worse as the teacher load will be much heavier. She will have to take more responsibility in teaching the children the more important things in life. She will have to teach many of the things that heretofore have been taught in the home. She must teach them how to be able to adjust themselves to a peacetime society, which we hope they will be living in when they get out of school. Many of the students will be in a state of confusion and even dependency as their homes will be torn up and their mothers away from home working. Therefore much of the reading, writing and arithmetic must go by the wayside while the children are being taught how to take care of themselves.

To sum this up, we will say that it is just as important for the undergraduate to learn his or her field as it is for the graduate to get some higher education. Therefore, it is just as important that the instructor spend his time helping the sophomore as to discuss "over-your-head" topics in class with the grads. . . . BLF

Out of The Hat

By H. A. TUCK

Texas U's paper, The Texan, printed a little gem of wisdom this past week that seems to be worth passing on in this column.

"Lesson in California logic: "1. The Legislature doesn't want Communists in the University of California, so it passes a loyalty oath.

"2. The Communists, although slightly reluctantly, sign the oath and stay in school. As hardened cynics, why shouldn't they do so?"

"3. California U. then fires 157 employees and faculty members who refused to sign the oath and did not state their reasons.

"4. Therefore, there are now no Communists at California U."

Texas U. in the same issue replied to statements made by "The Plainsman" some weeks ago in the Lubbock paper. For the information of you who missed the column, TU was called a "platinum-plated, diamond-studded, tax-supported country club." Mention was

also made of the so-called "Parsman's Fund," which largely supports TU and A&M.

Latest joke making the rounds of the college papers is this: A Scotsman had to send an urgent telegram, and not wishing to spend more than necessary, wrote: "Bruises hurt erased afford erected analysis hurt too infectious dead." The Scotsman who received the wire decided it was: "Bruce is hurt. He raced a Ford. He wrecked it and Alice is hurt too. In fact she's dead."

Every publication in the country with the possible exception of the "Morticians' Monthly," if there is such a magazine, cried, begged, threatened and warned that Americans would go out on the highway and calmly slaughter each other over the Fourth. Well, that's exactly what happened this past weekend and the same thing will occur again and again during other holidays.

I'm surprised some organization hasn't asked for a revival of the "Blue Law" which prohibited travel on the Sabbath. Maybe if it were illegal to travel on holidays and weekends, Americans would realize that it is actually a privilege and not a right to be able to operate an automobile.

This is the last issue of THE TOREADOR for the first term, but we have decided against giving you the worn-out song-and-dance about not waiting until the last minute to study for exams.

being honest, and all of the un-called-for last-minute trivia which seems to be traditional.

TCU'S Skiff decided the same thing last spring and, instead, offered this advice to the graduating class: "Go out and give 'em hell in a Christian way!"

For those of you who won't be back for the second term, we would like to remind you to have a wonderful time during the rest of the summer, corral a lot of freshmen for Tech and remember that we start off the football season this year against Texas U. in Jones Stadium. Be here!

Holleman Holle

By JIM HOLLEMAN

Mike Brumbelow, new football coach and athletic director at Texas Western, is a coach on the southwestern circuit. The ex-football star at C. U. was coach at El Paso in 1944. In 1944 he was coach at Lufkin high school. In 1946 he returned to T. C. U. to coach under Dutch Meade. After serving a three-year term in the Navy, Brumbelow was named as line coach at the University of Mississippi during the 1947 and 48 seasons. In 1949 he went to Southern Methodist and is given a great credit for the Mustangs' success against Notre Dame when the Irish were barred to take out a 27 to 20 win against Kentucky when the upset win.

For the last two years Brumbelow has been in the sporting business at Midland and El Paso. He was appointed to the Western post at a special request of the athletic council on June 15 to succeed Jack Curtice who had taken the position of head coach at Utah university. Brumbelow has two strikers, Mike already when he takes office about July 14. The two strikers all but disappeared with graduation of such stalwarts as Ernest Kelly, Wayne Hanson, Jim DeGroot. Adding to the fact that Brumbelow does not know the members of the team and faces a tough schedule for 30 seasons and it is easy to see that the landies are in a lather. Plans will do a land office by crying towels during the 1950 year.

A fact which might slow down, however, is that the backfield which won the record-gaining title for the two years will return. Brumbelow has stated that formation used by Curtice and four seasons will be used. He prefers the pit but will not disrupt the team with drastic changes. The new coach will be for a good act. Jack Curtice put quite a record in his four years at the Miner helm. Besides being the nation in ground-level teams have been among top contenders for the Border defense championship and have been invited to two post bowl games. The 27-11 record is very good for a team of the size of Texas Western. Teams scheduled by the for the coming season include Texas U., New Mexico A&M, U. of Idaho, U. of Arizona, New Mexico U. Tech, Texas State, Hardin-Simmons U. of West Virginia, and Hawaii.

New Oil Discoveries Brightens Consumer Outlook

The discovery of new oil is speeding the consumer's outlook for petroleum and brightens the nation's long-range supply. A Texas Tech petroleum engineering expert has declared. Prof. W. L. Ducker, head of the department of petroleum engineering, said that about three years ago the nation appeared to be in a 12-year supply of oil. The new discoveries, he said, have caused a revision of the estimate. Known reserves carry the load of consumption to 1963, according to his figures.

"We have about 25 billion barrels of known reserves, and 170 billion cubic feet of gas reserves," he said. "It is more than the national gas one natural gas demands are multiplying."

The Tech professor said that the natural gas reserves increased demand has diminished to the present estimate of 1970. New discoveries of gas have not been as prolific as those of petroleum. "The figures represent an outlook for alarm," Professor Ducker said. "Estimates during t

Holleman Hollers

By JIM HOLLEMAN

Mike Brumbelow, new head football coach and athletic director at Texas Western, is an old hand on the southwestern football scene. The ex-football star at T. C. U. was coach at El Paso high school after his graduation in 1930. In 1934 he was appointed coach at Lufkin high school, and in 1936 he returned to T. C. U. as line coach under Dutch Meyer.

After serving a three-year hitch in the Navy, Brumbelow was signed as line coach at the University of Mississippi during the 1946-'47 and '48 seasons. In 1949 he was scout for Southern Methodist university and is given a great deal of credit for the Mustangs' performances against Notre Dame when the Irish were barely able to eke out a 27 to 20 win, and against Kentucky when the ponies scored an upset win.

For the last two years Brumbelow has been in the sporting goods business at Midland and Odessa. He was appointed to the Texas Western post at a special meeting of the athletic council on June 23 to succeed Jack Curtice who has taken the position of head football coach at Utah university.

Mike may have two strikes on him already when he takes up his duties about July 14. The T. C. U. line has all but disappeared with the graduation of such stalwarts as Ernest Kelly, Wayne Hansen and Jim DeGroat. Adding to this the fact that Brumbelow does not know the members of the team and faces a tough schedule in the '50 season and it is easy to imagine that the laundries around El Paso will do a land office business in crying towels during the coming year.

A fact which might stem the flow, however, is that the great backfield which won the national ground-gaining title for the last two years will return intact. Brumbelow has stated that the T formation used by Curtice in the past four seasons will be retained. He prefers the split T but will not disrupt the team with any drastic changes.

The new coach will be following a good act. Jack Curtice piled up quite a record in his four years at the Miner helm. Besides leading the nation in ground-gaining, his teams have been among the top contenders for the Border conference championship and have been invited to two post-season bowl games. The 27-11 won-lost record is very good for a school the size of Texas Western.

Teams scheduled by the Miners for the coming season include Cincinnati U., New Mexico A&M, Loyola U., U. of Idaho, U. of Arizona, New Mexico U., Tech, West Texas State, Hardin-Simmons U., U. of West Virginia, and U. of Hawaii.

New Oil Discoveries Brightens Consumer Outlook

The discovery of new oil fields is exceeding the consumer demand for petroleum and brightening the nation's long-range supply outlook, a Texas Tech petroleum engineering expert has declared.

Prof. W. L. Ducker, head of Tech's department of petroleum engineering, said that about two years ago the nation appeared to have a 12-year supply of oil. He said the new discoveries, particularly the Scurry field in Texas, have caused a revision of the estimate. Known reserves would carry the load of consumption into 1963, according to latest estimates.

"We have about 25 billion barrels of known reserves, and about 175 trillion cubic feet of natural gas reserves," he said. "It seems that petroleum's outlook is better than the natural gas one because natural gas demands are rapidly multiplying."

The Tech professor said that in 1947 the natural gas reserves were expected to last until 1984. The increased demand has dimmed the outlook to the present estimate of a reserve which will be depleted in 1973. New discoveries of natural gas have not been as productive as those of petroleum.

"The figures represent no occasion for alarm," Professor Ducker added. "Estimates during the last

Jap Students May Enter Texas Tech

Japanese students may join those of 11 other nations on the campus of Texas Technological College before too long.

Pres. D. M. Wiggins has received an inquiry from Tokyo on just how young people of that nation may enter Tech. Requested information has been sent. Students of 11 nations were on the campus during the spring semester.

"Thanks to the generosity of the United States Occupation authorities, selected Japanese students, though still limited in number, are provided with the means of studying in the United States," wrote Yoshio Akao, Tokyo publisher. "This has not only encouraged Japanese students to a vast extent, but has also raised great expectations in the hearts of the people at large for the seeds these students will bring back to the soil of Japan to aid in establishing a permanent democracy as well as to enhance the promotion of modern culture."

"A large number of Japanese students are desirous of studying in some American universities, and are ardently seeking information relative to the question of enrollment. We shall be grateful to you if you will let us know the conditions, and outline the possibility for Japanese students to become enrolled in your esteemed institution."

The publisher said that about 300,000 senior high school students of Japan will attend universities on graduation. Photographs showing buildings and student life at Texas Tech have been sent to Tokyo.

40 Tech ROTC Men To Get Special Training

Forty-one Air Force ROTC Cadets from Texas Technological College are receiving instruction in administration and logistics at Kelly Air Force Base, San Antonio, Texas, according to Lt. Col. E. E. McKesson, the camp commander.

They are members of a thousand-man group who enrolled for the six-week's summer encampment from 24 colleges and universities in 12 states. Each cadet is receiving interesting and valuable experience in the practical application of military training he received in the classroom during the school year.

Graduates of the four-year course, which is taken in conjunction with regular academic college work, are commissioned second lieutenants in the Air Force Reserve.

The Air Force ROTC program is being conducted in cooperation with outstanding educational institutions throughout the United States. The program is primarily designed to provide the Air Force with top-quality, well-trained and educated young officers for highly essential ground staff positions. Air Force statistics show that seven men are required "on the ground" for every man who is flying.

Following graduation, the new officers may request assignment to active duty or participate in any of several phases of the Air Reserve program, where he may receive further training, pay and credit toward promotion and retirement.

Cadets from Texas Technological college who are attending are: Travis C. Allen, Milton K. Bennett, David P. Blackburn, John J. Boyd, Neal C. Brigham, Gerald T. Buchanan, James N. Byers, Don Q. Caple, Homer J. Clements, Bill F. Cox, Billy L. Cunningham, D. Gene Grice, Harry R. Hamilton, A. Wade Hardesty, Vennon A. Harrison, and William E. Hayes.

William E. Howard, Thomas R. Hunter, Glendon T. Johnson, John A. Johnson, Robert Kral, G. B. Lindsey, Jeral V. Miller, James B. Morris, Donald L. Pope, Benny D. Pryor, Marvin C. Reeves, Ervin L. Pezer, Louis E. Rinn, Ronald L. Rushing, Harold B. Harpe, Leslie H. Pellings III, Arledge W. Eggs, Billy F. Sylvester, James W. Thompson, Jack R. Trammell, Malcolm W. Tisdell, Bobby L. Williams, Jim B. Young and Walter O. Edrington.

three decades have been as low as seven years, and yet new discoveries have successfully kept ahead of demands."

Air Reservists Report For 15 Days Duty At RAFB Qualia

Twenty-seven Texas Technological college graduates, undergraduates and former students, all Air Force reservists, have to date reported to Reese Air Force Base for 15-day tours of active duty under the mobilization training program. This does not include the large number who are members of the 8611th Maintenance and Supply Group, the collary unit, who take their training periods on week-ends.

One other Tech student, 2nd Lt. Carroll C. Sanders of Hobbs, who was recently commissioned from the ROTC unit, is now serving a 90-day tour of active duty and has been assigned to the Reese AFB Public Information office.

Following are the present and former Tech students who have reported for 15-day tours, together with their reserve rank.

Major E. C. Blythe, Captains Douglas S. Adams, William S. Borders, Herbert S. Erskine, Tom L. LeMond, James W. McAllister, Elmer H. McKinney, Robert D. Richardson, Dennis S. Setliff and Rowen O. Lipton.

First Lieutenants Ted J. Alkire, John H. Baumgardner, Everist L.

Qualia

Tech, where he was one of the original members of the faculty, he also studied at the University of Paris in 1929. Qualia acquired his master's and doctorate from the University of Texas.

Due to the proximity of this area to Mexico the major portion of the work carried on by the foreign language department is in the field of Spanish. However, due to the efforts of Dr. Qualia and other teachers of French, the activities of the department in the French language and culture have been a source of amazement to visiting Frenchmen.

Bednorz, William C. Brewer, Zane C. Brewer, Harold E. Brougham, Thomas D. N. Douthit, Edward C. Gahl, Jack W. Miller, George W. Morgan, Charles E. Seed, Billy D. Smith, Jack D. Tippit and Charles E. Yates, jr.

Second Lieutenants Bill F. Horn, Robert L. Sellers and Ira T. Taylor.

Exam Schedule

TUESDAY, JULY 11, 1950

8:00-11:00—Classes meeting 9:00-10:30 or portion thereof
11:00-2:00—Classes meeting 1:00-2:30 or portion thereof
2:00-5:00—Classes meeting 10:30-12:00 or portion thereof

WEDNESDAY, JULY 12, 1950

8:00-11:00—Classes meeting 7:30-9:00 or portion thereof
11:00-2:00—Classes meeting 2:30-4:00 or portion thereof
2:00-5:00—Classes meeting 4:00-5:30 or portion thereof

If there is any class which has not been included on this schedule, a petition should be made to the schedule committee to place the examination at a certain time. Any change in this schedule which would affect a group of students must be approved by the schedule committee.

Shown above is the Texas Tech Summer band, which has about 110 pieces. This is the 17th annual summer band school to be held at Tech and has drawn players from all over the northern and central portions of Texas. In the center foreground are two

men who have done a great deal in making the summer band schools a success. On the left is Dr. D. O. Wiley, director of the Texas Tech bands and on the right is Dr. A. A. Harding, band director at the University of Illinois for 43 years and guest conductor at the Tech summer band school for eight years.

Kids Come To See Mom's M. A.

By DONNA PYKA
Toreador Staff Writer

In August the three children of Mrs. Johnie Marljar, graduate student from Hobbs, N.M., will, for the third time, see their mother graduate. Mrs. Marljar was married before finishing high school and did not complete her secondary education until her youngest daughter started primary school.

When starting back to high school she did not feel out of place for there were nine other married women also attending. She said that "everyone was real nice and accepted her." This she contributes to the fact that she tried to be a pal to the other students rather than acting superior to them.

Chose Teaching

Mrs. Marljar finished high school in 1935 and entered Tech in September, 1936. At this time she had a daughter in elementary school, a son in junior high and another daughter in high school. Realizing she would have to make a living for the children she chose teach-

MRS. JOHNIE MARLJAR

ing as the best method. In May, 1939, she received her degree in education.

Since then she has taught the second grade, with the exception of one year in high school, first in Monument, N.M., and later in Hobbs.

Corrected And Sent Back

During all the time of her schooling the Marljar children were "thrilled to death about her going." While teaching in high school Mrs. Marljar had, as one of her students, her son. She was, at the time, teaching him typing, and they were constantly in competition with one another. But Mrs. Marljar always won out. That is, until her son was overseas during the war. Mrs. Marljar typed her letters to him and after read-

Langford Retires As P. E. Director

Mrs. Johnye Langford, for 25 years director of women's physical education at Tech, will end her connection with the college this summer, when on July 12, she retires from her position.

Among the first 30 members of the faculty to be employed in 1925, Mrs. Langford's years at Tech have all been spent in the women's P.E. department, which she has directed from its beginning. During this time she has taught all of the courses in this subject. From 1945 until 1948 she also held the position of Dean of Women.

A graduate of Texas university, Mrs. Langford received her B.B.A. degree from that institution in 1924 after which she attended Columbia university as a condition of her acceptance by Tech. She received her M.A. from the University of Southern California in 1929.

Exes Present

year of the purchaser will be engraved on the cup. The price of the cups will be about \$25, according to O. B. Ratliff, chairman of the anniversary homecoming committee. Decorations for the service will include a double T emblem.

The campaign is calculated to serve a double purpose. The first is to honor Tech's silver anniversary appropriately. The second, to raise funds to finance the activities of the Ex-Students association for the coming year, said Ratliff.

Other members of the committee appointed by Ed McCullough, president of the association, include: Bruce Zorns, Brownfield; and Homer Maxey, Dutch Wington and Dub Rushing, all of Lubbock.

ing them, he corrected them and sent them back to her.

This is the fifth summer Mrs. Marljar has spent at Tech working on her Masters. She will finish this semester and in August will receive her degree with a major in education and a minor in psychology.

Would Walk To See Mom

And next month all of her children and four grandchildren, will be present to see her receive the degree. A daughter, now living in California, said she had seen Mom graduate twice and would come again if she had to walk.

Now approaching graduation for the third time Mrs. Marljar says she is grateful to Mrs. Mary Doak, former dean of women, and Dr. Agnes True, associate professor of education and psychology, who helped considerably.

In regard to receiving a part of her education after her children were in school, Mrs. Marljar says, "It has given me a younger outlook, and I am better able to appreciate the actions of my children and other young people."

Always Buy CHESTERFIELD

A YOU buy a pack of Chesterfields and you open it up.

B YOU smell that milder Chesterfield aroma. No other cigarette has it. Make your own comparison.

C YOU smoke Chesterfields and prove what every tobacco man knows—Tobaccos that smell Milder...smoke Milder.
