Coeds And Lubbock Girls Vie For 'Miss Lubbock' Beauty Contest Honors

Tech Women See Film On Cancer

"Cancer is the most curable of all fatal diseases," said J. Louis Neff, director of the Texas Division of the American Cancer Society, before an audience of over 250 Tech women at a cancer lecture in the Aggie auditorium Tuesday.

"Basic surgery as a cure for cancer hasn't changed in 60 years, yet cancer is now the second leading cause of death. Cancer can be cured if it is treated while it is still in one place with removal by simple surgery. Radium and X-Ray are effective treatments also," said Neff.

"About one-fourth of the cancers which occur in women are in their breasts," Neff said. For this reason an American Cancer Society film titled "Breast Self-Examination" was shown. Leaflets illustrating the procedure for self-examination will be available in the office of the Dean of Women, women's physical education office or in the infirmary in about a week.

Dr. W. A. Bronwell, liaison member of the Lubbock County Medical Society and contact member on cancer education conducted a question and answer session after the film. Dr. Bronwell said that cancer was in no way hereditary or contagious. He also stated that constant smoking by both men and women in recent years has raised the death quota from cancer considerably.

"After you have taken all reasonable precautions against cancer, don't think too much about it," said Dr. Bronwell.

A number of cancer films may be obtained by writing to the American Cancer Society, Texas Division, 2307 Helena Street, Houston 6, Texas. Teachers from other communities are especially urged to write for these films.

"About one half of the women who have cancer are going to die unless you and I and people like us do something about it," Neff said.

Neff was introduced by Vice President E. N. Jones, committee head of the American Cancer Society which coordinates cancer education in colleges and public schools.

The search is on for "Miss Lubbock." She will represent the town in the "Miss Texas" contest to be held at New Braunfels late in July.

Tech women are eligible to participate in the "Miss Lubbock" pageant which will be held at the

DEADLINE SET

Men who have received notices to report for pre-induction physicals and those who have received their physicals may, from June 15 to July 15, volunteer for the branch of the service of their choice at the nearest recruiting office, national selective service headquarters has announced.

This choice will not be available after July 15, headquarters said.

Lindsay theater July 12. This annual contest is sponsored by the Lubbock Junior Chamber of Commerce.

Each contestant will be judged by a three-minute talent routine such as singing or dancing as well as her appearance in a bathing suit. The sponsor of each girl will provide her bathing suit, said Nolan Swain, chairman of the contest committee.

The winner will be given a wardrobe, courtesy of Hemphill-Wells Co., with which to compete in the contest at New Braunfels. She and her chaperon will also receive free transportation, hotel accommodations and meals.

Miss America Pageant
"Miss Texas" will be entered in the Miss America contest to be held in Atlantic City the first part of September. She will receive an all-expense trip to Atlantic City where she will spend a week at one of the city's famous waterfront hotels. She will also be provided with a wardrobe with which to compete in this contest.

Richard Dickey, member of the Jaycee publicity committee, announced the rules and regulations concerning entries in the contest Saturday. The rules conform to the requirements of the "Miss America" pageant, he said.

Contest Rules

- The rules are as follows:
1. Contestant must be resident of city, state or territory in which local contest is held, for six months prior to contest. This rule is only waived for contestants whose residence is out of the city or state, but who is a college or university student in city or state where contest is held and at time contest is held. She may not compete in more than one official preliminary contest each year.
 2. Contestant must be single and never have been married, divorced, or had marriage annulled.
 3. Contestant must be high school graduate, or a senior attending high school at time of contest.
 4. Contestant's age on September 1, 1951, shall be not less than 18, nor more than 27 years.
 5. Contestant must be of good character and possess poise, personality, intelligence, charm and beauty of face and figure.
 6. Contestant must possess and display in a three-minute routine talent. This talent may be singing, dancing, playing a musical instrument, dramatic reading, or she may give a three-minute talk on the career she wishes to pursue.
 7. Contestant may be either amateur or professional.

Joan Bolinger, Tech student and last year's "Miss Lubbock," will crown the winner.

Entry blank will be found on page 4.

Twilight Hour Features Flutist

R. A. Dhossche, director of the San Antonio high school band and flute instructor here in the summer, will be featured in the Museum's Twilight Hour at 4 p.m. Sunday.

Many West Texas high school band flutists have been tutored by Dhossche. He is a graduate of the Belgium Royal conservatory.

Dhossche will be assisted by William Harrod, violinist; Paul Huntington, oboist; Mary Ann Hammer, flutist; Ernestine Berry, pianist.

The program will include a sonata by Monquet, "La Flute de Pan," A Fantasy on "William Tell," Rossini-Demarsman; Melancolla from "Poem Symphonic," Benoit; "Romanze," Fuchs; "Serenade," De Boisdatte; Harrod and Dappier's "Andante et Rondo," Miss Joyce Carthel is the piano accompanist.

Girls' Dorms Show Earthquake Damage

Damage amounting to \$592.64, apparently caused from the earthquake in the South Plains vicinity June 20, has been discovered in Women's Dorms III and IV, said William T. Gaston, fresh comptroller and business manager.

Reports were received June 21, the day following the quake, of doors dragging and not closing properly. A check showed that the tremor had apparently cracked the walls and thrown the doors out of line in sixteen rooms of the two dorms. The damage was localized in the southwest wing of Dorm IV and the southeast wing of Dorm III.

"Checks on other buildings over the campus showed no further apparent damage," said Gaston.

The damaged rooms will have the wall cracks filled, be repainted and the doors realigned, the business manager said. It is not yet known if the damage was covered in the insurance carried by Tech, Gaston added.

Army Officers Visit Tech To Discuss ROTC Program

Lt. Col. D. L. Wilder, 4th Army ROTC section of Fort Sam Houston and Col. E. W. McGinn, army field forces of the ROTC section at Fort Monroe, Va., visited Tech Wednesday.

While here they discussed the policy, procedure and general nature of the Army ROTC program with Pres. D. M. Wiggins; Capt. Victor B. Penuel, acting professor of military science and tactics and J. Roy Wells, assistant to the president.

R. A. Dhossche

New Fire Dousers Fixed In Storeroom

Automatic fire extinguishers, resembling large light bulbs and operated by blank 22 calibre cartridges, have been installed at the supply headquarters in the storeroom, Charles F. Libby, supervisor of custodians announced.

The cartridge is exploded by the release of a small firing pin, spraying carbon tetra-chloride 100 cubic feet, when the temperature reaches 170 degrees Fahrenheit and melts the metal holding the pin. Twenty five of these glass globes have been installed at the approximate cost of \$5 each, Libby said.

This is cheap fire protection for a wooden building, considering the supplies in the storeroom are valued at \$18,000 Libby pointed out. Of particular concern is spontaneous combustion caused by the many combustible materials stored in the headquarters building.

There is no ventilation in many cleaning closets in the main buildings and a fire could easily result according to Libby. The recent fire in XI is an example of this combustion type fire, he added.

Some of the Tech girls who are aspiring to the title of Miss Lubbock are shown above posing in their bathing suits. The girls, who will also be judged on talent, standing from left to right are Tammie Argo, Sue Baker, Carolyn Hannah and Berna Bartlett.

Spring Honor Roll Names 239; Straight A Students Number 46

Traveling Exhibit Shows Jewish Art

An 18th century Italian marriage certificate is among the Jewish cultural and religious art objects in the Museum's Treasure of the Month.

The traveling exhibit is from the Hebrew Union college at Cincinnati, Ohio. This exhibit, consisting of 80 art objects, includes a Hanukkah oil lamp fashioned 1,500 to 2,000 years ago.

An 18th century german silver Torah crown, often placed on top of scroll rollers to emphasize the royalty of the law, was used during services. A Torah is a scroll upon which the five books of Moses have been inscribed.

A green plush Torah mantle which was used as a decorative dress for the Torah is displayed. On top of the Torah was placed a Rimoni-made of brass which also served a decorative purpose.

Included in this display is a brass breastplate which was used to hang over the mantle. Several Torah pointers which held the scrolls in place, are included with spice boxes, shields and other cultural objects of art.

Registrar Posts Exam Schedules

Final examination dates have been announced by the registrar's office. No individual changes in exam dates may be made without special permission from the head of the various departments, the announcement explained.

Class Hour	Quiz Hour
7:30-9:00	July 12 8:00-11:00
9:00-10:30	July 13 8:00-11:00
10:30-12:00	July 12 2:00-5:00
1:00-2:30	July 12 11:00-2:00
2:30-4:00	July 13 11:00-2:00
4:00-5:30	July 13 2:00-5:00

POSITIONS OPEN

Persons interested in working on the Treador staff may apply between 10:30 a.m. and 4 p.m. in J105, announced Berna Bartlett, Treador editor. A major in journalism is not required, she explained, nor must applicants be undergraduates.

Forty-six of the 239 students listed on the honor roll for the 1951 spring semester have 3-point grade averages, the registrar's office announced.

Of the students having 3-point averages, eight are graduates, 19 seniors, six juniors, nine sophomores and three freshmen.

Eighteen of these 46 students are from the division of arts and sciences; five, agriculture; 15, business administration; 3, home economics; 5, engineering.

Sixty seniors, 32 juniors, 22 sophomores, 48 freshmen and 20 graduates have grade point averages ranging from 2.56 to 2.94.

The total of 239 names on the honor roll is a decline of 19 since last fall.

The complete honor roll appears on page 3.

Photographs Depict Life Of The Navajo

"The Navajos," photographic exhibition prepared by the editors of Life magazine, will be shown July 1-28 in the Museum.

The photographs are by Leonard McCombe, photographer-journalist, and deal with the daily life of a single Navajo family—the Yellow-salts. The Yellow-salts are depicted performing their domestic chores, including butchering, herding, baking and business transactions at the trading post.

Following the section on the Yellow-salt family is a portrayal of ritual and religious customs, including a difficult-to-photograph ceremony of cleansing-by-sweating. Photography was particularly complicated because the only light came from a fire built in the middle of the "hogan," or ceremonial hut.

The third section is devoted to some of the problems of the Navajos as they tried to adapt to white culture.

McCombe lived among the Navajos many weeks before making any attempt at photography, due to their reluctance to admit an outsider to their intimate family life.

"The Navajo Weaver," life exhibit, further points up a major Navajo industry which brought the tribe over a million dollars in the past year. This exhibit may be seen in the natural history gallery of the Museum.

"Well, sir, there I was in the second chukker and my pony stumbled."

If One Battle Ends, Then What?

Jacob Malik, Russia's mouth-piece in America, has asked that a cease-fire be ordered in Korea and a settlement made. If Russia is sincere in this proposal, there is no doubt in anyone's mind but that it can be effected. If peace comes in Korea, what then?

Up to now, after every war America has fought, a cry has gone up to "bring home the boys," "scuttle the navy," "cut down military expenditures," "ground the air force." Remember, this has been the voice of America, and remember too that by listening to these pleas after World War II, we heeded them and this very thing has been one of the great contributing factors in bringing on the cold war and the hot one.

We hope that if peace comes in Korea, this cry will not be heard over our land. For Korea is not a war, but a battle in a global conflict with Russia and her satellites. Disarmament or a slackening in our arms program would be comparable to the U. S. having stopped the war effort in our country after the break-through in Saint Lo in World War II.

Undoubtedly, if peace in Korea comes, the questions uppermost in the minds of Tech students will be, "will I be drafted?" and "The war is over, why should I be drafted?" Tech men should remember the conflict is not over, only a battle fought, and that they have already received special consideration by the draft deferments for students and have even been given draft deferment tests which may entitle them to a longer stay in school. There should be no let down through the medium of study or of campus military preparation in the ROTC program by the students. This is America's war and it will not be won because peace has come in Korea, when and if it does.

Girl: "I think dancing makes a girl's feet too big, don't you?"
 Boy: "Yeah . . . (pause) . . ."
 Girl: "I think swimming gives a girl awfully large shoulders, don't you?"
 Boy: "Yeah . . . (pause) . . . You must ride a lot."

Dean Dysart Holcombe will leave for Lubbock today after attending the annual meeting of the American Society for Engineering Education at Michigan State university at Lansing, Michigan. He has been attending the meeting since Monday.

TECH DRUG 1101 College

Random Notes

By ALLEN HAMMER

Tech students can start saving their money soon for they are going to need about \$28 extra next year if they own a car. The Texas governor is expected to sign into law the driver responsibility bill, which provides roughly that if you damage someone bodily or their property with your auto, you must show that you are financially able to pay the damages involved. A person unable to prove up will be subject to having his license tags confiscated and his driver's license revoked.

There is no question but that most people will find it expedient to carry liability and property damage insurance. The standard liability policy usually pays up to \$5,000 for a single accident and a single person injured, while paying up to \$10,000 for a single accident and any number of persons more than one, hurt. Property damage pays up to \$5,000 per single accident. Public liability and property damage are usually written into one policy at an approximate cost of \$25-\$30, depending on the portion of the state in which the car is to be used. In the immediate Lubbock area it costs \$28 for the standard passenger car.

The foolish thing we see about the law is that no one has to show this financial ability until after they have a wreck. The man who hits you may have to stop driving his car if unable to pay your bills but that won't help the person who is not at fault and has to foot the bill for repairs anyhow.

Wouldn't it be more simple to re-issue driver's licenses over the whole state and let the car owner prove his responsibility at the time he picks up his license? This would seem more like patching the sack before the grain is lost.

We would like to make a suggestion to whomever is in charge of maintaining the "hot topped" parking areas and roads over the campus. These roads and areas are bleeding and the cars are tearing up the topping by running over it. If gravel or even sand is thrown over the surfaces where they are soft, they will stay in much better shape longer. This sanding or graveling should prove to be very economical certainly more so than re-topping the roads each year. We are surprised that a college which teaches engineering would let so simple a problem exist on the campus so long.

You still have time to get in a lot of free education with this being only the second week of the parade of film in the museum building auditorium. Go over and help Dr. Carroll and Dr. Mecham prove their experiment in audio visual resources is worth bringing to Tech.

All you girls who look typically American and have your vitamins and calories distributed in the proper proportions in the right places can enter the Miss Lubbock contest for July 12th. The rules are in today's Toreador.

If Jacob Malik had entered the ABC rodeo at Tech he would have undoubtedly have won the bulldozing contest for he is one of the best "bull" throwers that the world has seen.

Temperance lecturer: "If I lead a donkey up to a pail of water and a pail of beer which will he drink?"
 Unconverted: "The water."
 T.L.: "Right. Why?"
 U: "Because he's an ass."

POTPOURRI
 "See this jewelry?" asked the young lovely. "It once belonged to a millionaire."
 "Oh, gasped an impressed sister. "And what was his name?"
 "Woolorth," replied the young thing.
 Husband: "I hate to admit it dear, but I bought another \$10,000 policy from the life insurance salesman."
 Wife: "Oh, I could kill you."
 "Daughter, I don't mind that young man coming over here every evening, and staying up half the night with you, nor his standing on the front porch for a couple of hours saying good night, but please ask him to stop taking the morning paper when he leaves."

THE NEW SCIENCE BUILDING for Texas Tech is nearing completion on the exterior and is shown above as the new windows are being mounted and the stone facings being put on the building. When completed the new building will have a covered walk-way from the library around to the chemistry building. (Photo by Stewart Phillips.)

Non-ROTC Upperclassmen, Grads Find 'Fighting Chance' To Get Commissions

Tech graduates and upperclassmen who have not taken advantage of the ROTC program offered to students still have a fighting chance for commissions in the armed forces.

Even though present action gives some hope for a "peace of sorts" in Korea, the expansion program in the armed forces will continue until the military establishment is believed large enough to discourage Russia from attacking us.

This means that Tech grads who have not obtained commissions still have to worry about the possibility of being drafted.

Subject To Recall

In the event that a grad is drafted, he is required to serve 24 months on active duty and to stay in the reserve for an additional 60 months. He is subject to recall at any time, making a total of 84 months that he could serve on active duty.

If he should choose to volunteer as a "regular" he would spend 36 months in the service and then be released. No reserve time is required of regulars.

Even though the services have large numbers of reserve officers who are subject to call, additional personnel who have not seen service but who are qualified for duty are desired.

College students with 60 hours credit may apply for pilot training in the Air force or in the Navy.

Grads Can Apply For OCS

Grads may apply for officer candidate school in the United States Marine corps, and have a very good chance of being accepted, said Marine recruiters. In the event that a candidate fails to complete the required training period, he has a choice of discharge or of assignment as an enlisted man. The Marine corps has openings in aviation, sea duty, and the fleet marine force (ground force) for qualified officers.

Navy Commissions

The Navy offers to graduates who have eight hours of "math a commission after successful completing training in a four month officer candidate school, said Naval Reserve officials. Entrance exams for this school are given in Dallas. Students and graduates who have completed pre-med courses are eligible to join under the "X-12" program and complete their medical or dental training in the Navy. The Navy also has the Chaplains corps for persons who have completed four years of college and three years of graduate theological work.

Direct Reserve Commissions

The Air force offers direct reserve commissions to college graduates who can show one year of practical experience, Air force recruiters said. The experience is required in the case of engineering grads. Further information regarding commissions is available from Capt. James H. Oakley, USAF, room 205, 1011 1/2 Main street, Lubbock.

Business Grads
Dean George G. Heather, business administration division, said that graduates with accounting or business administration degrees who join the Army will be tagged as special professional personnel and assigned to Fort Myer, Va., to

await instructions from the adjutant general. Previously, the only way that accounting or BBA grads could qualify for this classification was in math.

Capt. Victor B. Penuel, Signal corps, ROTC, said that he knew of no regulation that would assure graduates who are classified as special professional personnel of a commission. He said that he knew several people with this classification who had not received commissions.
