Faculty Members and Parents To Attend Recognition Rites

By KARA HUNSUCKER
Treador Staff Writer

INVITATIONS have been sent to parents and faculty members to attend the Women's Recognition service at 7:15 p. m. Tuesday on the Ad building green. Approximately 196 outstanding women students will be honored.

Basis for recognition as announced by the awards committee is as follows: women students on the fall semester honor roll; members of scholarship societies admitting women (Alpha Chi, Alpha Epsilon Delta, Alpha Psi Omega, Phi Upsilon Omicron, Tau Beta Sigma, Kappa Mu Epsilon and Theta Sigma Phi); students who received prizes or honors at commencement exercises last June.

Women students who have done creditable work in college and outstanding work in women's organizations (AWS, WSGA, Home Ec Club, YWCA, WAA, Forum, Las Leales, Junior council and Freshman Honor society); for outstanding work in college activities (one-act plays, debate, THE TORCH, DOR, Student Religious council, Seven Last Words, La Ventana, Engineers' show and Home Ec open house).

Students with a B average and 35 or more activity points; the highest rating graduating senior from each division; members of AWS and WSGA; members of special recognition will be given to students who have been recognized for four or more years. The Roll of Honor, made by Maxine Ellis, is being signed this week by students to be recognized.

Judging Winners To Be Announced Later In Week

Winners in the annual dairy judging contest held at the dairy building last Saturday will be announced some time this week, according to K. M. Renner, head of the dairy manufactures department. Awards will be given to high-ranking judges next week at a formal affair staged by the Dairy Manufacturers club, but definite plans have not been worked out yet.

Divided into two groups, one consisting of freshmen and sophomores and the other of juniors and seniors, 35 students participated in the contests. The freshmen competed against the sophomores, and the juniors against the seniors.

Products judged on a commercial basis were ice cream, cheese, butter and milk for flavor, texture, color, capping, bottling, and containers, as the points from which to judge. Ice cream was served to all contestants immediately following the judging.

Plaques will be awarded to the senior and junior students making the highest score, and there will be awards for places in the various separate contests. As a special award in the milk judging contest, a certificate from the International Milk Dealers association will be given to the three high men of the entire judging group. Renner said.

Tech Professor To Go To Armour's Institute

J. Fenton Harding, instructor in civil engineering, will report June 1 to the Armour's institute in Chicago. Harding has been a civil engineering professor here for three years. He is a 1933 graduate of Tech.

Texas Tech Band To Give Concert Sunday, May 10

Final Program To Be Conducted Entirely By Student Members

PROF. D. O. Wiley will take a back seat in the audience Sunday, May 10, when the Matador band gives its final concert of the year, directed by student conductors.

The program will be in a lighter vein than the usual numbers directed by Professor Wiley. Highlight of the performance will be Bill McEachern's Rhapsody in E Minor, a number entirely original with the senior band major from Amarillo.

Numbers on the program and the student directors will be: The Steel Man by C. S. Beisterling, directed by Aubrey Walker from Altus, Okla.; Prelude to Faust by Charles Gounod, directed by James W. Williams, Marlin; Pictures as an Exhibition by M. Moussorgsky; The Hut of Baba-Yaga; The Great Gate of Kiev, directed by Woodyard McDowell, Little Rock, Ark.; March Paraphrase on My Hero, from The Chocolate Soldier, by Oscar Straus, directed by Frank Herring, Lubbock; Bridal Song from The Rural Wedding Symphony by Goldmark, directed by Victor Williams, Wellington; Childhood Fantasy, by C. P. Lilly, directed by George Mays, Laredo; Finlandia, Tone Poem by Jean Sibelius, directed by Harry Born, Lubbock; El Cabelero, Spanish March by J. Olivadori, directed by Gene Nickell, Stanton; Rhapsody in E Minor, composed and directed by Bill McEachern, Amarillo; Minuet a L'Antique and I. Paderewski, arranged and directed by James Nevins, Assistant conductor of the Tech band. The final number will be the Star Spangled Banner.

The concert will be open to the public and will be given in the Tech Gymnasium at 3:30 p. m., Sunday, May 10.

Large Enrollment Expected During Summer Semester

Enrollment of the 1942 summer session is expected to be larger than that of any summer in the history of the college because of the newly designed double program and the full offerings in every field.

The course offerings, recreational opportunities and special summer features arranged for this year are explained in detail in the summer catalogue which is now available at the registrar's office. Everyone who is interested in the summer sessions should go to get a catalogue.

Additional classes will be organized for courses that are not at the present listed in the catalogue upon the request of a sufficient number of students. Those interested in a course that is not mentioned in the catalogue should notify some staff member of that department.

Alpha Tau Omega fraternity recently celebrated the seventy-eighth anniversary of its founding. Co-eds of the Macalester college Hyperion society have turned "shoe shine girls" in a drive for funds to buy gifts for Macalester men in the armed forces.

Freshmen Honor Society To Hold Initiation Party

"Freshman Honor Society on Tech Campus" will be the subject of a talk by Nettie Belle Batton at the annual spring initiation banquet of the organization to be held at 7 p. m. Thursday at Hotel Lubbock. Evelyn Cooper will discuss "FHS on Other Campuses."

Iris and phlox will decorate the banquet tables, covered with tulle-ton shades or orchid, rose and pink. Special guests will be Denna Mary W. Doak and Margaret W. Weeks, Mrs. William Dings and Miss Mrs. Poindexter, co-sponsors, and Mesdames Eleanor Chitwood, Maxine Wilson and Clifford B. Jones, and Onita Belle Huttedler.

The program will include an invocation by Edith Paule, welcome, Ophelia May Beall, president; response, Moreene Roberts, president-elect; and a vocal duet by Gertrude Parrot and Jean Anderson.

Other officers to be installed are Rita Norman, vice-president; Martha Lou Kestler, secretary-treasurer; Betty Herron, AWS representative, and Anna Baker, reporter. Approximately 75 new members will be initiated.

Bahn Speaks To Lubbock Professional Fraternity

Dr. A. J. Bahn, associate professor of sociology and psychology spoke to Epsilon Sigma Alpha, Lubbock professional fraternity, Monday night at the Hilton hotel. His subject was "Personality and Society."

Disgusting, Isn't It? But They Will Pay For All This Nonsense

SLANT-EYED villains bombed Pearl Harbor! The same yellow-bellied rats killed thousands upon thousands at Bataan. They besieged Wake Island until the humble ancestors of the Orient could not take the hint that we didn't want them to have that strategic position, we might as well give it to them, rather than annihilate the Nipponese race. All this did not arouse my temper enough to make me want to fight.

They caused a rubber shortage and put me to walking. I could even stand that without losing my temper. Then things rocked on until Congress had taxed about everything in this country that was tied down, and a few of the things that were flying loose. I withstood their attack, still hoping that maybe I wouldn't have to go to war after all.

They dared to start their propaganda machines rolling in the South and mentioned racial segregation, Southerner that I am, they failed to heat my blood to the boiling point. They caused a bill in Congress to freeze all prices, after all prices had all ready jumped out of all proportions.

They set our clocks up an hour and now I take my date in before sundown (incidentally have you ever tried kissing your girl on the lawn in front of the girls dormitory while the sun is still up?) Although I was getting very mad at those little devils, I was still content to stay in school and try to prepare for the aftermath, depression, deflation, and dissipation.

Although I have not heard of it yet, they have killed several of my best friends, according to statis-

Coeds Make-up Is Indispensable For Rosy Cheeks

BY DOROTHY MONTGOMERY
Treador Staff Writer

Make-up and the college coed are quite inseparable. The coed guards her toilet articles as she would her life. From these come her indispensable rosy cheeks, her long, dark lashes, her red, red lips and that complexion all the boys rave about.

An ardent suitor might find himself suddenly cold if his date rushed down some night without her veil of glamour derived from a cosmetic drawer. A girl who is fortunate, may have features which lend to her personal attractiveness a natural loveliness, but there is no girl who cannot improve these good looks by a light touch of make-up here and there in the right spots, and even the homeliest girl can find at least one hidden charm that a skillful beauty treatment will bring to light. The art of improving feminine beauty by artificial means was a wonderful discovery, and every 1942 girl should know how to employ it to its best advantage.

The modern young woman often wonders how grandma got her man without the aid of this art, forgetting that although grandma did not have her facial beauty she had other means just as effective. Grandpa probably saw grandma, not her make-up, and found there desirable characteristics which are more lasting than lipstick, powder and rouge. Nor did he have to go through the shock of seeing his wife unmask.

Women today are more beautiful than they were 50 years ago, which is a step forward, very desirable and pleasant, but under that beauty there should be other qualities more important. The things that count way down deep and last throughout a lifetime after loveliness has faded and make-up on longer his its affect.

Geology Student Gets Commission

Harland Soper, graduate student in the department of geology who will receive a master's degree in June, has been commissioned an Ensign Aviation, Volunteer Specialist in the U. S. Navy, according to Dr. Leroy T. Patton, head of the geology department. Soper will be engaged in map interpretation work and will assume his duties in June. His home is in Emmetsburg, Iowa, and he is a graduate of Cornell college, Mr. Vernon, Iowa.

Tech Chapter of AAUP Holds Final Conference

The Tech chapter of the American Association of University Professors held the last meeting of the year Tuesday evening. Following a brief business meeting Dr. William Davis led an informal discussion of the activities of the Faculty Advisory committee.

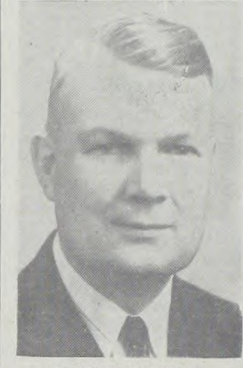

The officers of the association are Truman W. Camp, president; A. J. Bahn, vice-president, and Fred Griffin, secretary.

Warren To Speak At Theta Sigma Matrix Dinner

Journalism Society Honors The Twelve Departing Seniors

David M. Warren, president of the Texas Press Association and editor of the Panhandle Herald, will be principal speaker at the annual Matrix table dinner of Theta Sigma Phi, women's journalism society, Friday night at 7 o'clock in the private dining room of Hotel Lubbock.

★★★

DAVID M. WARREN

★★★

tel Lubbock. Mr. Warren will speak on "Problems of the Community Editor."

The dinner is given in honor of graduating seniors. Georgia Lee Powers, president for next year, will be toastmistress and will give a short history of each member. Special guests will be Prof. Cecil Horne, head, department of journalism, and Prof. Joseph E. Cowan, professor of journalism at Tech.

Mr. Charles A. Guy, editor of the Lubbock Avalanche-Journal, Mr. Charles Watson and C. M. Ratliff, also of the editorial staff of the Avalanche-Journal, Mrs. Louise C. Allen, sponsor of the organization, and alumni Mrs. Howard Hoffman, Miss Evelyn Clewell, Miss Bernice Borgman and Mrs. Mack Smith.

Club members attending will be: Georgia Lee Powers, Mary Margaret Tunnell, Betty Shryock, Kay Chaucey, June Crossley, Mary Lorraine Smith, Ruth Faust, Felicia, Louise, Gen. Bob Calley, Elizabeth Young Maxine Conner and Marianna Coffey.

A survey at Stephens college, Columbia, Mo., showed 47 per cent of the 1750 girls wanted courses in motor mechanics.

One hundred twenty engineering, science and management defense training courses are now underway in Texas.

Advanced Flying school in, gave some guys a blue uniform, and let nature take its course. Now I can no longer get a date. All this, although very aggravating, did not arouse me to the pugilist's tempo and the killer instinct, with which psychologists say we were all born, remained dormant. I had no quarrel with anybody.

I did not mind the shortage of sugar. I could easily drink milk chocolate instead of the traditional coca-cola. Or if I did want a coke, I could wait until we got our weekly quota. When the average hangouts put cover charge on dancing or refused to serve combination drinks, such as cherry cokes, lime grapejuices, etc. I still remained satisfied with the world, a conscientious objector.

But now they have gone too far, so help me. I am leaving as soon as I can. Nor do I want to stay over here for three years training. I am a red-dy-teddy. Enough is enough, too much is too much, I can stand so much and no more. That is the straw that broke the camel's back. They missed me in three registrations and kept my secret. For nineteen years I used only my middle initial, and no one was the wiser.

They made me sign my full name, and if anyone ever calls me Bartholomew, so help me, not only will their hides be cooked, I am going across there and take 'em by the seat of the pants and give him a face lifting job that would compare to Frankenstein as Dracula resembles Gene Tierney. There's a limit to all things.

I stayed and waited for those final exams.

They put a uniform on my competitor and now I ain't his. They put the Lubbock Army Air Corps

Plans Go Forward Despite All Doubts

PLANS are going forward for the annual Fish day picnic to be held at Buffalo lakes Friday evening, although a shadow of administrative doubt hangs over the head of freshman Prexy Everett Dale as to whether the council will allow the slimes to throw their annual day of reversal and what-nots.

Swick Replaces Finch As ROTC Head This Week

New Commandant Saw Overseas Duty In First World War

MAJOR Charles H. Swick arrived Friday from San Antonio to assume duties as head of the department of military science and tactics. Major Swick was recalled to active service to replace Colonel Henry A. Finch, who was recently called to active duty at Camp Berkeley, Abilene.

Holder of a reserve commission as captain in the army, Major Swick was, in 1917, called to service. He saw action overseas during the first World War. At the close of the conflict, the officer was honorably discharged, but again entered the army in January, 1920. His last post, before being retired with a Major's rank in 1933, was at Fort Du Pont, Del. During his term of service he has been stationed in numerous points over the country, as well as Hawaii.

A graduate of Cornell university, the Major also attended the engineers' school at Fort Belvoir and the Army Industrial college in Washington.

The Major's wife and her mother, Mrs. F. M. Allen, accompanied him here.

Radio and Visual Education Group Hold Conference

The national war effort was the theme of the second annual Texas conference on Radio and Visual Education, held in Waco, April 23-25.

Mrs. Janet M. McDonald, librarian of the visual instruction department, attended the conference as Tech representative and was chairman for the work-study groups that discussed "Problems and Function of Film Libraries," "Morale, Censorship and Education as the factors derived from radio and motion pictures." Mrs. McDonald explained these points, stressed in conference speeches by nationally known educators that included Dr. Winfred C. Cullis of the British Library of Information, New York; Wesley Greene, National Film Board, Ottawa, Canada; Karl Hobbizelle, president of Interstate Theaters, Inc., Dallas and member of Tech board of directors; and President Pat M. Neff of Baylor university.

The conference of Radio and Visual Education was organized in 1940 to provide a meeting place for educators, commercial broadcasters, producers of radio programs and visual materials.

Annual meetings, sponsored by the Texas State Department of Education, are held on the campus of Texas universities or colleges that provide adequate facilities. This year's conference was held at Baylor university.

Tau Betas Hold Spring Initiation

Members of Tau Beta Pi, national honorary engineering society, are having their annual spring initiation and banquet tonight at 7 p. m. at the Lubbock Hotel. New members are chosen from the upper one-eighth of the junior class and upper one-fifth of the senior class.

Students who will be initiated tonight are: John Ely, Norman Igo, H. C. Schuler, Sibley Neel, Merlin Birdsong, Jimmy Day, Henry Wigton Billy Akers, Leslie Culwell, James Hays, Harold Yeager, and G. L. Farrar.

Nylon Manufacturer, Tech Graduate, Visits Campus

Leo Trimm, 1937 Tech graduate in textile engineering, has been visiting on the campus this week. Trimm is on vacation from the DuPont company where he has been working since he graduated from Tech. He is with the nylon division in Martinsville, Va. This division has been handling defense work almost exclusively.

With a minimum of five hundred tickets to be sold before Sunday, the freshmen only sold 478. Thence hangs the questionable picnic. Stated to appear before the Administrative council Thursday evening, Dale announced that they were still making plans to hold the picnic to meet the requirements for the C average that was levied on all campus representatives this fall.

Establishing precedent, the class votes today to elect a freshman queen. Starting out with a field of six girls vying for the crown, candidates have been reduced to four, Frances Watson having dropped out of the race and Jerry Larrick failing to meet the requirements for the C average that was levied on all campus representatives this fall.

With this final elimination, the field is narrowed to Jackie Wilkinson, DFD; Faith McNamara, Las Chapparritas; Marjory Hall, Sans Souci; and Betty McCoy, Las Vitarachas. The winning lassie will remain a secret until the coronation at the dance to be held in the gymnasium Friday night should the administrative council allow them to proceed with their plans. Polls will be open in the Sullyport of the Administration building from 9 a. m. to 12 a. m., and again from 1 p. m. to 3 p. m.

Upperclassmen will be allowed to attend the doubtful dance, but will be required to buy tickets, which will still cost one dollar per person, and only if freshmen will be eligible to make the trek to Buffalo lakes for the picnic.

Two Tech Textile Profs To Leave For Military Service

Two of Tech's textile engineering profs are leaving in the near future for active duty with the United States armed forces.

Prof. C. M. Stanley, jr., head of the textile engineering department, will report today to the local air base for his physical examinations. Immediately after, he will leave for Camp Roberts, Calif., where he will be a second lieutenant in the field artillery.

John Worth Gamel, assistant professor of textile engineering, is scheduled to leave for the navy on July 1. Gamel will go for a one month's training at Notre Dame and then for three months' training in New York. He will be a candidate for an ensign's commission with the navy. After the four months' training at Notre Dame and New York, he will be assigned to active sea duty.

Dr. Jackson To Deliver Commencement Addresses

Dr. D. D. Jackson, associate professor of education, will deliver two high school commencement addresses this month on the subject of "America's Place in the World Today." He will speak at Smyer on May 15 and at Wink on May 22.

A University of Oregon "athletic honor roll" shows more than 100 former Webfoot athletes now in the armed service of their country.

Iowa Post-war Scholarship Plan Merits Consideration

A POST-WAR scholarship plan has been introduced by Iowa university, which insures the drafted college man his education should he return from the war. The plan was introduced after many students were heard saying such phrases as "it is not the war I fear, but the depression that follows a war" and "if I don't get my degree, how am I going to be able to get a job when the army turns me loose?"

The plan works thus: each student buys one ten-cent defense stamp every week. The stamp is then donated into a fund which is invested in government bonds. Returning soldiers who benefit from the plan must have spent at least six months in the service, must have been enrolled in school on or after Oct. 15, 1940, and have maintained a satisfactory scholastic average during that time. They must also have been in school at the time they were enlisted or drafted.

Soldiers returning, who are eligible for scholarships, can draw up to \$200, depending on their need for financial assistance. The dimes are collected through the different campus organizations, departmental societies, social clubs, and dormitories. For those students who live out in town, special representatives are sent out to collect from them.

It would be a whole lot of work for a similar plan to be inaugurated on Tech campus, but it would leave those students who are privileged to stay in school for the duration something to look back to, and make them feel as if they had done something in a material way to help the war effort.

And although it is true that some students do not have that dime to spare, it is that sort of a student who is willing to sacrifice for a worthy cause. Those of us who can spare a dime every Friday, would undoubtedly feel better if we knew that we were helping to educate those who are risking their necks.

We who are lucky enough to stay in school so that we may better serve our country as citizens and our army as soldiers once we are engulfed, should certainly be willing to give up one "coke date" a week for so worthy a cause.

It is a plan worth the consideration of the student body. It should receive attention from the Student council and from the Inter-club councils. Think it over students, would you be willing to have such a plan put into action here? If so, then tell us about it, tell the student council about it. The Toreador suggests that the student council make a closer survey of the plan and give a report to the student body through its columns.

Quotable Quotes

"Every high school, junior college and college should provide selected courses designated as National Service and should require every student to select a series of such courses that would prepare him to meet the nation's need. Rigid standards should be maintained and provision should be made for refresher courses. Much of what would be needed for such a program already is available in our schools. After the war camps, equipment and technically trained men could be added to such a program, and such a Civilian National Service program might be the answer to federal aid. The values of such a program to the nation would be millions of children and youth moving steadily through the schools, trained and ready on call to meet any national emergency our part in the post-war world may require. If our schools rise to the challenge, democracy never again will be branded as inefficient nor will the children of our children know the humiliation of those tragic words—'too little and too late.'" Dr. Frank W. Hart, professor of education at the University of California, believes world war, and armies must have a trained civilian population behind them.

Frank K. Telford, Wayne university alumnus, has been made production director in the radio section of the office of emergency management.

The current federal budget for agriculture and home economics extension work is \$19,000,000.

Endowment and gifts for research make up 3.7 per cent of the University of Pittsburgh's income.

Coe college, Cedar Rapids, Iowa, for six years has sponsored an invitational high school forensic tournament.

Do not accept a fact that looks too perfect, but be prepared to meet an eventuality that may be bad.

THE TOREADOR

THE TOREADOR, student newspaper of Texas Technological college, is published every Wednesday and Saturday on the campus of Texas Technological college at Lubbock by students of the Journalism department. Entered as second class matter, October 31, 1925, at the postoffice in Lubbock, Texas, under the Act of March 3, 1879. Editorial offices, Press Building, Rooms 103, 105. Telephones: college switchboard; Night editor, 8549.

Techsians Say:

Lubbockites Need Practice In Air Raid Blackouts

By CLEM SIMPSON Student Opinion Editor

Do you consider trial blackouts a worthwhile thing for an inland city like Lubbock?

MARY GLEN BATES, senior home economics student: Yes, I believe that a trial blackout is worthwhile here in Lubbock. I think that every town should be prepared for any type of emergency. This large education institution and the air base make our preparation even more vital.

LOYD JENKINS, junior industrial engineering student: Yes, only in cities where there are defense projects or army bases such as the Lubbock Bomber Base. I do not think inland cities which have no military objectives should worry about air raids.

LESTER KILPATRICK, sophomore electrical engineer: No, I don't believe trial blackouts necessary for a city as far away from the war zone as Lubbock. Our energies can be used to better advantage than in unnecessary activities.

BILL ANTHONY, freshman mechanical engineer: Yes, definitely. Although world conditions today may not warrant blackouts here, it is still possible that trial blackouts may be worthwhile.

DOROTHY JONES, junior chemistry major: I do consider a trial blackout a worthwhile thing for an inland city like Lubbock. Chances are we will never have an air raid, but the experience won't hurt us. It would help the people around Lubbock realize that a war is really going on.

JOZELLE JOHNSTON, elementary education major: Yes, I do. Everyone should know what to do if there should be a blackout; therefore I think a trial blackout would be worthwhile for an inland city like Lubbock.

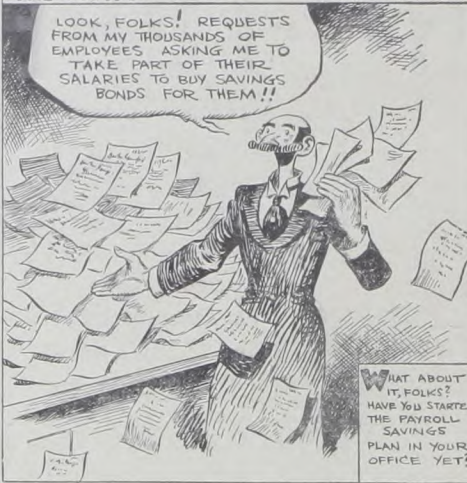

American Youths Send Greetings To Russian Allies

A drive for 1,000,000 signatures on a "Scroll of Greeting" from young people of America to the youth of Russia has been launched on college campuses throughout the country. The scroll will commemorate the first year of the fight by Russian youth against Nazi aggression.

The greeting will be no empty phrase. Each signer will make a contribution for emergency relief supplies for Russia and the decorated scrolls will not be amounts of contributions as material evidence to the Russian people of American support.

The scrolls with space for 20 signatures, are available from the Youth Division of Russian War Relief, 535 Fifth Ave., New York City.

THE GUMPS BY GUS EDSON

Campus Hobbies Stamp Collection Tells Stories Of Many Countries

Stamp collecting holds an equal appeal for a college professor as well as the President of the United States.

T. C. Root, professor of economics and business administration, has been a stamp enthusiast for the past seven years. He became interested in the collection started by his son, took it over and now has approximately 5,000 stamps. Although United States stamps are his favorite, included in his collection are stamps from all over the world. A German group, reprinted at the close of World War I, represents an interesting period when it took 2 billion marks to send a love letter, and the stationery used to write home for money, was of greater value than the money itself.

President Roosevelt is the first president to have his picture on a stamp while living. A South American stamp commemorating the 150th anniversary of our constitution carries the picture.

Stories of religion scandals and propaganda are portrayed on stamps in Root's collection. In Italy a religious person can be cited through his stamps. Persons not desiring to have their mail delivered on Sunday, simply leave a small perforated tag on the stamp, if they want their mail delivered the tag is detached! A stamp of a nude duchess made by the famous painter Goya, was issued in Spain. Tragedy was averted when friends of the artist helped him to escape from the wrath of the Duke of Alia, who heard his duchess was posing as a natural. An effort was made to prohibit the use of these stamps in this country.

Students have sent the professor stamps from various places. Several years ago, a first-day stamp of the Queen Mary was given to Root by two Tech students who carried a suit of clothes to England and who invited the king to the Texas Centennial.

Stamps make a complicated position of the picture on the perforated square, the cancellation hobby, according to Root, for the mark, condition of the stamp, type of stamp blocks and numerous other small details determine their value.

Naval V-7 Class Is Re-opened To Upperclassmen

College graduates and college seniors may continue V-7 enlistment in the United States Naval Reserve after May 1, despite the earlier announcement that beginning about that date this class would be closed to all men attending college who have not enlisted in Class V-1. It was announced this week by Commander F. C. Hutton, Director of the Office of Naval Procurement of the Eighth Naval District.

In addition to seniors and college graduates admitted to Class V-7, all juniors who while sophomores were not eligible for Class V-1 service may enlist in V-7, as may juniors who became members of that class prior to April 15.

CAPITAL to CAMPUS

ACP's Jay Richter Reports from Washington

WAR... WASHINGTON—(ACP)—In case you haven't noticed by this time, all college and university students are eligible for rationing books and their half-pound of sugar per week whether they live "on campus" or at home. It may be a good idea to get a book because there is likely to be further rationing of other products. However, it would be a good gesture to pass up purchases of sugar if you don't need it. "Ration for a bond, instead of a sweet!" Perhaps we've a campaign there.

Alien students in American colleges "absolutely do not" have to register for selective service. All they must do is to prove to local draft boards that their non-resident status is bona fide. Selective Service officials have been compelled to reiterate the exemption of "non-resident aliens" because of rumors floating about that alien students are subject to military service.

The majority of these students are citizens of sister American republics, here on scholarships granted by their home governments or Uncle Sam.

There is, however nothing to prohibit their volunteering for military service. This too is done through the local draft board which turns over their qualifications and personal histories to the War Department for final OK.

Officials here are skittish when asked about the probable requirements for commissions in either the Women's Auxiliary Corps or its counterpart in the Navy (Bills establishing both organizations have passed the House.) It's a good bet, though, that a college degree will help, just as it does in the case of men.

For Des Moines, Iowa, is being considered by the War Department as a West Point for women. Some 5,000 of them would be trained there in various war occupations.

The Navy auxiliary unit would be open to any woman over 20. Grade for grade, women would receive the same pay as seamen. Du-

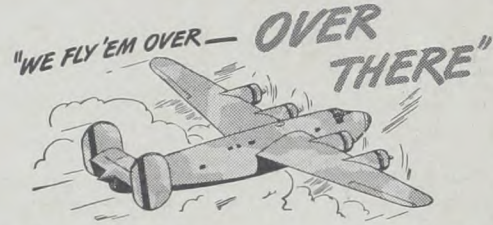

TECHNICAL TIPS FOR TECHSANS

Attention, ladies, the men are susceptible, too! At least the men on Tech campus are, as shown by a recent survey in which 20 per cent of those questioned admitted that they have clothing or trinkets which they bought on the spur of the moment and have never been able to find a use for! About 50 per cent of the women students interviewed admitted this weakness. Do you let the sales appeal of the many interesting articles in stores

add you to this list of "susceptibles"? Ninety nine per cent of those questioned take the clerk's word about the quality of articles with a grain of salt. About half read the labels on articles before buying them, but admit that it means little to them. Few realize that the laundering instructions on clothing add to their length of service. Advertising seems to have more effect on college men than on college women, as 80 per cent of the men compared to 40 per cent of the women make an effort to buy advertised brands. Many expressed their reason as "—then I'm sure of what I'm getting." Few were aware that the same brand often varies.

Almost 95 per cent of the women and 60 per cent of the men consider goods purchased at the "better" department stores superior to those attainable at other firms. University of Michigan student organizations gave 67 parties during the 1940-41 school year.

Tech Loses In Border Meet

Arizona Wins Conference 11th Straight Year

Arizona State Capt Second Place Honors As Tech Takes Third

Strong competition for the Raider track and field men in Tempe for the Border conference meet materialized as predicted by Tech track mentor, Walker Nichols.

The Raiders, comparatively inexperienced, came in for a low third in final tally of points, with the University of Arizona Wildcats and the Arizona State Teachers taking high scores for first and second.

University of Arizona, scoring points in all except one of the 15 events, won its 11th consecutive Border conference track and field championship.

Tech in Third Slot

Arizona scored 72 points, Arizona State Teachers college at Tempe 58, Texas Tech 16 1-2, West Texas State Teachers college 7 1-2, Hardin-Simmons university 7, Arizona State Teachers college at Flagstaff 2, and Texas Mines 2.

Five new conference records were established and one existing mark tied.

The Tempe Bulldogs, battling Arizona in every event, accounted for four of the new records, and their star hurdler, Don Kinzie, won individual point honors.

Techman's Record Goes

Kinzie, standout athlete of the meet, lowered the 120-yard high hurdle mark to 14.6 seconds from the 14.9 made by Marsh Farmer of Texas Tech in 1938, and cut Farmer's 22-yard low hurdle mark of 24.2 seconds, set the same year, down to an even 24 seconds.

Raquetees Take Third At Tempe

Despite Tech's early advances through tennis primaries, Coach James G. Allen's aggregation faded out in the finals and came to rest in third place behind the powerful University of Arizona and Texas School of Mines teams.

University of Arizona won the annual Border conference tennis tournament, annexing final matches in the Class A singles, Class B Singles and Class B doubles.

The final point standing gave Arizona 24, Texas Mines 15, Texas Tech 12, Arizona State Teachers college at Tempe 9 1-2, Hardin-Simmons university 7.

West Texas State Teachers college and the New Mexico Aggies tied for sixth place.

In the Class A singles final, Gil Procter, Arizona, defeated Buddy Shaffer, Texas Mines, 2-6, 6-1, 6-2.

Penny Gaines, Arizona, took the Class B final from Lloyd Brunson of Texas Tech, 6-1, 6-2.

The Texas Mines team of Shaffer and Munoz captured the Class A doubles title by downing Procter and Bob Leshner, Arizona, 7-5, 6-4.

Bill McIntosh and Gaines, Arizona, won the Class B doubles final from Francis Hightower and David Storey of Texas Tech, 4-6, 6-3, 7-5.

O'Mara Speaks to BA Class

W. C. O'Mara, manager of Sears Roebuck & Co., will speak to the marketing class this afternoon on "The Development of the World's Largest Retail Store." The class will meet at the store to inspect and observe management and sales methods.

Scout Circus To Be In Stadium Friday

By HELEN JOY SMITH Sports Feature Writer

BOY Scout Circus of 1942 will swing out into full stride at the Texas Tech stadium, 8:30 p.m., Friday, May 8.

This amazing entertainment will get underway with the grand entry of all the Scouts and Cubs from 20 counties surrounding Lubbock which are members of the South Plains Council.

Plans are now completed which will develop into a mammoth boy program, packed with thrills and action which will make every minute of the action inspiring and entertaining.

The civilian pilot training program at Iowa State college has been granted another unit of 10 men for primary aviation training.

With 13 stations scattered throughout the state carrying the program, the University of Wisconsin band is in its fifth year of broadcasting concert music.

In order to make the pioneering more realistic the boys have made a 60-yard timber bridge which will be featured in their display.

Parade Begins Affair

This gala affair will begin with a big parade Friday afternoon. R. L. Hooten, parade chairman, has announced that the parade will begin at the City Hall at 3 o'clock. It will go up Texas avenue to Broadway where it will turn west and continue till it reaches Avenue N.

An advance admission price of 25 cents per person has been decided upon in order to make it possible for the Boy Scouts of this region to stage their annual circus. Each ticket will admit a child if accompanied by an adult.

Scouts and Cubs are working at top speed to sell as many tickets as possible before Friday night, in order to make the competition for troop and pack prizes and for individual prizes more heated.

Prizes and commissions received from the ticket sales will be used in securing Boy Scout equipment. Tickets are now on sales at the Boy Scout office and by the boys themselves. It will be possible to purchase tickets at the box office

Stangel Elected In Faculty Meet

W. L. Stangel, chairman of the Tech athletic council, was elected president at the meeting of the Border conference faculty members in Phoenix, Ariz., May 2, the Associated Press reported early this week.

Stangel, who is also head of the department of animal husbandry, succeeds E. J. Knapp of the Texas School of Mines, of El Paso.

D. A. Shirley, West Texas State Teachers college, was named vice president, and C. Z. Leshner, University of Arizona, was re-elected secretary. F. C. Osborn, Arizona State Teachers college at Flagstaff, retired as vice president.

As a boon to schools whose athletic forces have been depleted by losses to armed forces came the announcement that the faculty representatives decided to allow freshmen to play on varsity football teams to help strengthen competition.

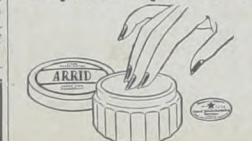

It was agreed that all freshmen entering college next fall would be allowed to play. Freshmen who entered during the current school year, however, must have made at least 10 units in their last semester of college work to be eligible.

The rule requiring junior college transfers to make at least 20 units during the previous year not altered.

Friend or Enemy? They're taking no chances

Day and night thousands of civilian volunteers at Army authorized observation posts report Aircraft Flash Messages to Army "filter" centers—by telephone. From this information, each plane's course is charted on filter maps...related to operations boards such as the one shown above—by telephone. Should checking prove the aircraft to be an enemy, the telephone would play an important part in the defense strategy...in warning endangered communities...in mobilizing civilian defense units.

Bell System men cooperated with Army authorities in designing and providing the telephone facilities used by the air defense system. This is but another example of a war-time job well done.

TO THE FAMILIES IN THIS COMMUNITY WHO RELY ON GAS FOR COOKING

- ★ In these days of national emergency—when meal planning, cooking methods and food economy are so important in keeping America safe—your Gas Company considers it a patriotic privilege to support our Government's National Nutrition Program.
- ★ Therefore, we urge our customers to choose their foods carefully, to cook them so as to secure their full nutritive value and to make every possible use of all left-overs.
- ★ By following the Government's advice in the selection of food and by using your Gas range so that you get the best results from your cooking, you can help win this war right in your own kitchen.
