Commissioner King Assures Committee On Tyler Interests

by GARTH JONES

AUSTIN, Feb. 28 (AP)—State Securities Commissioner William M. King assured the house investigating committee today that Tyler interests were not trying to "whitewash" a life insurance company investigation.

"WE'VE HEARD rumors like that," Rep. Joe Chapman of Sulphur Spring told King shortly before the committee recessed indefinitely its probe of the financial affairs of the Empire Standard Life Insurance Co.

King, the only witness heard today, told how his agency became suspicious early this year of a request from Empire Industries Inc. to sell Empire Standard stock, and began an investigation. He said the permission was denied on the grounds of "the promoter's reputation," and because of "fraudulent misrepresentations."

Previous witnesses have testified that Empire Standard was solvent but five subsidiaries, all promoted by Arlin Anderson, were in bad financial shape. Anderson was removed as Empire Standard president at the request of the state insurance commissioner.

This morning Dist. Judge Otis Dunagan approved an agreement between attorneys for the appointment of J. O. Daughtry, Tyler insurance man, as trustee of the assets of the three Anderson firms until the suit against Anderson could be tried on its merits.

REP. REAGAN HUFFMAN, chairman of the House committee, tentatively called a second session of the committee for next Thursday at 2 p.m. in hopes that Anderson would be able to testify at that time.

MARCH CAME in like a lion, so these two Texas Tech "lambs" took no chances! Taking to the trees are Mary Kay Carr (left), Hereford, and Leta Merle Roberts, Littlefield, both sophomores.

Raiders Travel To Fort Worth

by BILLY ELLIS

FORT WORTH, March 1—Red Raiders will be fighting for their very existence in the Southwest Conference basketball race here tonight, when they meet the tough Texas Christian Horned Frogs at the public schools gymnasium.

It is clearly a do-or-die battle for Coach Polk Robison's crew, which goes into tonight's action one game back of SMU's Mustangs, with only two games remaining.

THE MUSTANGS, meanwhile, can clinch at least a tie for the crown by downing rampaging Texas A&M. But the Aggies would have to pull their biggest upset yet in order to win, since the contest is to be played in SMU Coliseum, the Ponies' favorite stomping grounds.

In playing the Horned Frogs at Fort Worth, the Raiders have their work cut out for them. The Froggies have been a rugged squad on their home court this season, as evidenced by their 11-point win over SMU last week.

Coach Buster Brannon's quint will be out to revenge the 83-70 loss to the raiding team, in Tech's first home conference game. That was the game in which big Pat Noakes suffered his broken ankle bone, being lost to the team for more than a month.

TONIGHT'S GAME will actually be the third meeting between the two teams this season. In the second round of the pre-season tournament in Houston, the

Page 4, RED RAIDERS

Theme Stresses 'Logic of Belief'

Dr. John P. Newport, Fort Worth, and a team of eight visiting speakers will be on hand March 3-6. Religious Emphasis Week, as Techsians turn their attention to the importance of religion in college life.

The theme, "The Logic of Belief," will be developed in a series of lectures, seminars and special services.

The program for the week includes classroom lectures, 4 and 5 p.m. seminars, morning watch services and evening vespers each day.

Newport, main speaker for the event, will deliver principal speeches at 7 p.m. Monday, 10 a.m. Tuesday, 8 p.m. Wednesday and 7 p.m. Thursday in the Union Ballroom.

OTHER VISITING speakers for the week are Dr. Jack W. Bates, Lubbock Christian College dean; the Rev. Morris Bratton of Austin, assistant director of the Methodist's Wesley Foundation there; the Rev. Thomas R. Miller, rector of St. Christopher's Episcopal Church in Lubbock.

Chaplain (1st Lt.) Sheldon E. Hermanson of Craig Air Force Base, Selma, Ala.; Dr. W. F. Howard, Dallas, director of student work for the Texas Baptist convention; the Rev. David Zacharias, Westminister Presbyterian Church, Lubbock; Mrs. Galen Carr, former Methodist missionary, Lubbock, and Mrs. Roy Bass, Lubbock.

Page 3, RE WEEK . . .

THE REV. JOHN R. NEWPORT

Abundant Suds Harmful

by GAY PHIPPS

"Housewives use too much detergent," says Charles Libby, Tech supervising custodian.

As proof of how little detergent it takes to do the job, he performed an experiment. Do you believe a needle will float in water? He proved that it would.

"THE NEEDLE is held up by surface tension," he explained. When he added one medicine drop-

per of detergent to the small pan of water, the needle immediately sank.

The tension was released and the water softened. The same principle is true for household purposes such as floors and dishwashing.

"TOO MUCH or the wrong kind of detergent ruins floors," he stated. Housewives would do well to check the products they are using. While manufacturers' advertising may be legally correct, the implications may be misleading.

To emphasize, he pointed to a bottle marked "safe for porcelain and metal." Many women will look at the word "safe" and assume that it is safe in the full meaning of the word, to hands, clothes or nearly any surface. In many cases it is not true.

ANOTHER misleading fact is the price. Because a product costs less does not mean that it is less expensive.

To illustrate, he related the story of a salesman who approached him with a detergent selling for 80 cents a gallon, assuring him that it would save him one-half in detergent cost.

LIBBY immediately tested the liquid and found it to be highly alkaline. He deduced that no detergent that would ruin a floor could be really inexpensive.

"The detergent would actually have cost about \$2100 a gallon," he declared.

LIBBY puts his knowledge to excellent use as head of the custodial department which is one of the best organized on campus. In 1955 his program received widespread publicity and endorsement in the custodial field.

PICTURED ARE O. C. Renfro, left, and Roland Myers during their winning performance of Cinderella on Junior Stunt Night. Both are members of the Sock and Buskin Club which took top honors in the all-campus division. Other winners were Pi Beta Phi, sorority division, and Delta Tau Delta, fraternity division. The annual affair was held in the Tech Union Ballroom. (Tech Photo)

Sock & Buskin Cops Second Win in Row

Sock and Buskin won, for the second consecutive year, the award given for the best skit in the all-campus division at the junior class's annual stunt night Wednesday.

Receiving first place honors in the sorority and fraternity division were Pi Beta Phi and Delta Tau Delta respectively. Inscribed trophies were presented to the winning groups.

SOCK AND BUSKIN members placed first in their division with an interpretation of the story of Cinderella. Participants were Marsha Reilly, O. C. Renfro, Roland

Myers, Barbara Garnett, Gert Cooper and Benni Dunn.

Pi Beta Phi captured the honor in the sorority division with a skit entitled "Eloise at Tech." Members of this group were Alice Ann Peters, JoAnn Dobbs, Marilyn Gardner, Barbara Underwood, Jan Phluger and Eleive Blair.

IN THE fraternity division, Delta Tau Delta took first place with a take-off on the movie "Raintree County." Included in the group were Gerald Dobbs, Norris Green, Jimmie Lake, James Thruston, Bob Gray, Pete Rasch and Jerry Lobdill.

Annual on Way, Says Pat Cullum

The 1958 LA VENTANA is on its way to the printer today with the exception of Tech Salutes and Tech's last two basketball game results.

La Ventana editor Pat Cullum said her staff worked day and night last week to meet new deadline demands.

"WE RECEIVED special permission from the printer in Iowa City, Iowa, to hold back personalities and basketball sections at the last minute," Miss Cullum said.

Tech Salutes nominees will be announced Tuesday. Tech has a basketball game with TCU tonight and one with Rice Tuesday. "WE ARE determined not to let the book go without knowing the outcome of the basketball race and without a salute to outstanding Techsians," she said.

Tech Salutes candidates will be announced next week in THE FOREADOR.

MISS CULLUM wishes to "thank everyone who has helped in any way in getting the yearbook to the printer on time."

The yearbook should be ready for distribution about mid-May.

Thetas Elect Jean Elliot President

Jean Elliott has been elected president of Kappa Alpha Theta for the ensuing year.

Other officers elected are Libby Balzer, vice president; Martha Kenley, recording secretary; Gretchen Chappell, corresponding secretary and Mary Ann Lindley, treasurer.

Other new officers are Carolyn

Jenkins, editor; Margaret Fincher, fraternity education; Helen Locke, chaplain; Elsa Dockray, marshal; Patty Eubank, archivist; Carolyn Porter and Sarah Panson, Panhellenic representatives.

Also Donna Pearson, song leader; Sharon Snow, historian; Amanda Ward, parliamentarian; Linda Chappell, house manager; Ann Selecman, AWS representative; Helen Locke, Mary Ann Lindley, Kay Alexander and Margaret Fincher, standards board.

Chairmen elected were Kay Morrison, scholarship; Marilyn Warren, rush; Beth Davidson, social; Patsy Pearce, courtesy; Betty Maloy, activities.

Applications Due

Students wishing to apply for editor's or advertising managers posts on THE TOREADOR or LA VENTANA must make applications not later than 12 noon today.

Letters of application should be addressed to the Student Publications Committee and delivered in person to the Publication's Business Office in Journalism Building 101.

Display Shows History Of Area Indians

History of the South Plains Indian dating from prehistoric days to the last Indian battle 84 years ago is now on display in the West Texas Museum.

Human remains identified by Cobalt 14 method are an estimated 10,000 years old. These remains were found near Lubbock and indicate that human life existed on the South Plains 7,000 years before the state of Egyptian civilization.

Studies show that these people hunted animals now extinct in the Western Hemisphere such as the elephant and camel.

Early Spanish explorers or "Comancheros" established trade routes in Texas. These routes and summaries of Spanish dealings are shown on wall maps and side brackets in the museum.

Buffalo guns, arrows, spears and other Indian hunting equipment are on display. Colorful sketches depict Indian buffalo hunts.

The Indian killed buffalo for his immediate needs and used the entire carcass, whereas the white man slew the beasts for hides alone with sold for \$3.75 each.

An Indian burial ground is shown just as it was discovered. Human bones in sand and clay are wrapped in buffalo hide and

deer skin. Battle equipment, pottery and weathered clothing are found near the bodies.

Model village scenes show the Indian at work and play.

The Battle of Adobe Wells is colorfully portrayed in model scenes, and an actual letter dated July 7, 1874 describes the battle. This battle marked the end of Indian strength on the South Plains and aided in bringing him to the reservations.

Kireilis Studies Health Education

Dr. Ramon W. Kireilis, head of Texas Tech's department of health and physical education, has completed a study of health education in public schools as a member of a national committee.

The committee's findings show that the primary responsibility for a child's health rests with the family, but the family must work with the community and its schools if future citizens are expected to achieve new highs in health standards.

The committee also studied the integration of health studies and projects into many phases of school activities instead of a few scattered health courses.

Chest X-rays and eye examinations were cited as important practical devices that could be used as educational opportunities for youngsters.

Health education, if properly used, can make children not only more aware of good health but can also raise the general health standard of an entire community, the committee reported.

Delta Taus Initiate Tau Delt Pledges

Six pledges and one alumnus of Tau Delta Tau have been initiated into the Epsilon Delta Chapter of Delta Tau Delta.

Pledges initiated were Jerry Wayne Brooks, Fort Worth; Henry Dean Raish, Fort Worth; John Barlow Sparar, Galveston; Robert O. Gray, Midland; John Jordan, Monahans; and Charles McWilliams, San Angelo. William L. Morrow, Dallas, is the alumnus initiate.

A plaque was given Robert Gray for best pledge, and Gary Hall was awarded the highly esteemed "Brick Award" by the pledge class.

Drane Hall Elects Stephens Prexy

Drane Hall has elected officers for next year.

Chosen were Shirley Stephens, president; and Carolyn Jenkins, vice president.

Run-offs are scheduled Monday for AWS representative and chaplain. Competing for AWS are Donna Christopher and Joanne Sweet. Celeste Ullrich and Kay Krings will vie for chaplain.

LLT Tryouts Set Sunday, Monday

Texas Tech students are invited to Lubbock Little Theatre tryouts for Molnar's "Liliom" Sunday and Monday at the playhouse, 2508 Avenue P.

Tryouts will be 2 p.m. Sunday and 7:30 p.m. Monday.

Molnar's classic drama production will replace the previously announced production of "Family Portrait" in April.

Songsters Meet

Song leaders for the Interfraternity Sing will meet in Music 205 at 5 p.m. Tuesday.

Entry blanks for the sing will be turned in at the meeting, according to Phi Mu Alpha, professional music fraternity, sponsor of the event.

Planetarium Spring Per

By JIM

"Parade of the Planets" will be shown at the Planetarium, announced at the West Texas Museum.

The Spitz planetarium, one of the finest in the world, is now on display in the West Texas Museum.

By use of special attachments, the relative positions and movements of the planets are shown in their actual positions at any time in the past or future.

As the demonstration begins, the disk effect is painted on the planet's surface and one can watch the planets as they appear in the night sky.

Public demonstrations will be given at 4:30 p.m.

From time to time, new exhibits will be added to the scope of around 300 in conjunction with the planetarium.

Southwe

Recent implications are pointed out to be a complete revival in the "old" cast, tom cats, wigs, regalia, and a new dialect employed.

It has impaled too many people on the "old" dialect.

Jargon can operate effect in the "old" dialect. It is used in the "old" dialect.

This is not a thing of new years. Critics stand back and look on with an askance look.

The new dialect has passed its peak. It disturbs many people of our civilization have kept up will retain their correct usage.

State was faced with a situation. It seemed that a "sliced" Center, stopped a professor and said, "Say, man, I'm hip there's where's the happenings?"

The professor didn't bat an eye. "I believe you are referring to upstairs in the ballroom."

Not all people could have passed. Some at least, would nearest door thinking that the "It's typical lingo. (And this in Mr. Webster's dictionary.)" stopping place. It could go on indefinitely at its current pace we need another language so it wouldn't be a complete conversation and be.

The point being, there's got to be a "master" can fall off. It's got to be.

Planetarium Plans Spring Performances

By JIM WALSH

"Parade of the Planets" will be the theme of the spring performances at the Planetarium, announced Dr. Fred Wendorf, acting director of the West Texas Museum at Texas Tech.

The Spitz planetarium is small in size compared to gigantic Zeiss machines located in New York and San Francisco, but its ability to project myriads of stars, constellations and planets is just as effective.

By use of special attachments, the Spitz planetarium can show the relative positions and motions of more than 2,300 stars in their actual positions at any time from the beginning of one-celled animals to any time in the future.

As the demonstration begins, the lights slowly fade and a light blue dusk effect is painted on the dome-shaped ceiling. This fades into dark and one can watch the different stars, planets and constellations as they appear in the night sky. Then demonstrators Jimmy C. Humphries and Donald Myrick, Tech student, lecture on the different wonders of the sky.

Public demonstrations will be March 16, April 20 and May 18 at 4:30 p.m.

From time to time, when weather permits, demonstrations are given in the evening in order to use the facilities of a six-inch telescope of around 300x in conjunction with the planetarium.

Southwest Crosscut

everett groseclose

Recent implications are pointing the way to what may prove to be a complete revival in the English language. With all the "cool cats, tom cats, wolfs, rogues" and what have you, there has been a new dialect employed. It isn't a simple case of jargon for it has ingulfed too many persons.

Jargon can operate effectively without altering the basic pattern of English. It is usually highly effective in shop talk, operating in closed circles. But when it is let outside that circle, it becomes a group of "strange" words to anyone who is not thoroughly familiar with such.

This is not a thing of new. It has been developing in recent years. Critics stand back and stare at the "Monster of language" with an askance look.

The new dialect has pushed its ugly nose into everyday usage. It disturbs many people. Some of the better developed of our civilization have kept up with the "monster's" advance and still retain their correct usage. One professor at North Texas State was faced with a situation of this nature recently.

It seems that a "sliced" musician walked into the Student Center, stopped a professor and said:

"Say, man, I'm hip there's a real tough scene goin' tonight. Where's the happenings?"

The professor didn't bat an eye as he replied: "I believe you are referring to the Valentine dance which is 'upstairs in the ballroom."

Not all people could have managed to control their composure. Some at least, would have been tempted to run for the nearest door thinking that the animal was about to attack.

It's typical lingo. (And that latter word just happens to be in Mr. Webster's dictionary.) Trouble is, there is no apparent stopping place. It could go indefinitely. If it (the dialect) continues at its current pace we may find ourselves having to learn another language so it wouldn't leave doubt. Now one may carry on a complete conversation and never say anything understandable.

The point being, there's got to be a cliff somewhere that the "monster" can fall off. It's got to go, but where?

... RE Week

NEWPORT, Professor of philosophy of religion at Southwestern Baptist Theological Seminary, has spoken at youth and college meetings in most Southern and Southwestern states. During his undergraduate years at William Jewell College, he took part in many student activities, including football, basketball, debate teams and editor of the school annual.

After receiving his bachelor's degree, he attended Southern Baptist Theological Seminary in Louisville, Ky., where he received his master's and doctoral degrees, and the University of Edinburg, Scotland, for his second doctorate.

HE ALSO HAS studied at the Universities of Basel and Zurich in Switzerland, Tulane University, Union Theological Seminary, and Columbia and Tulsa Universities.

Newport has been minister of churches in Mississippi, Kentucky and Oklahoma. He has been professor and director of graduate studies in religion at Baylor University and associate professor of New Testament and philosophy of religion at New Orleans Baptist Theological Seminary in addition to his teaching post-at Southwestern.

NEWPORT WILL develop the week's theme with talks on the growing importance of belief, religion and ideology in today's world and the urgency of commitment to the principles of Hebrew-Christian tradition.

Guest speakers will be available for personal conferences during the week.

Music Department Features Faculty Members in Concert

Selections by Bach, Schubert, Stravinsky, Bernstein and Creston highlight the Faculty Chamber Music Concert, a music department presentation, Sunday at 4 p.m. in the Music Building recital hall.

Performers are Mrs. Gertrude Post, who has made several concert appearances with the Denver Symphony Orchestra; Charles Post, Texas Tech vocal instructor, formerly a professional tenor with the Robert Shaw Chorale; Miss Mary Jeanne van Appledorn, Tech music theory professor, well known for her compositions which have been performed throughout the Southwest.

Also Charles Lawrie, Tech opera workshop instructor, co-director of "Like You Like It," and Keith McCarty.

The program includes Bach's "Partita I in B Minor" performed by Keith McCarty, clarinet; Schubert's "Der Hirt auf dem Felsen, op. 129" performed by Gertrude

Red Raiders, Frogs Clash In 'Must' Battle for Tech

(CONTINUED From Page 1) Frogs slipped by the Raiders, 71-69, handing Tech its first loss of the season.

Tech will be facing the conference's leading scorer over the season in TCU's Ronny Stephenson. The 6-5 hotshot has scored a total of 396 points during the year, an 18.0 average in 22 games.

Stephenson lost his lead in scoring for conference games last Tuesday by virtue of his team being idle. SMU's Rick Herrscher hit an amazing 28 points to forge into the lead, with 229 points to Stephenson's 211.

WITH TECH'S duo of Podd Hill and Gerald Myers added the game will have three of the top four scorers, by average, for the SWC season. Hill's average dipped slightly to 16.6, after getting only nine points in the Aggie upset Tuesday.

Myers, still battling for the lead in the free throw division of conference scoring, kept his average steady in Tuesday's game, and also hit nine of nine charity tosses to help his mark there. The Borger junior has a 14.2 season mark.

Besides Stephenson, the frogs will probably start with H. E. Kirchner, their big 6-10 center, with 6-4 Derrell Nippert playing opposite Stephenson at forward. At the guard post, the starters will come from among 6-3 Kenneth Brunson, 6-2 Kenneth King,

Tech Rifle Team Competes in Meet

Texas Tech ROTC rifle team is competing in the annual Southwest Invitational Rifle Meet sponsored by Texas Western University, El Paso.

Three matches were scheduled with the finals today. Teams from all over the Southwest are competing for awards and plaques that will be presented to the winners.

Harold Conway, J. B. Copeland, John T. Tiano, James L. Mays, and Tom Bacon are the team members. Col. James B. Carvey, PMST, and Sgt. Michael Modis, team coach are the faculty sponsors.

Rifle coaches from Ft. Benning, Ga., are scouting the meet looking for prospects for firers in Army matches as well as the Olympics.

Top pistol experts from the FBI will also perform in the meet.

5-11 Bob Tyler or 5-11 Tommy Turner.

TECH WILL probably go with its customary all-junior starting lineup of Hill at center, Myers and Charley Lynch at guard and Chuck Key and Wade Wolfe at the forward spots.

Ready for immediate action will be Noakes, who will undoubtedly be counted upon to even the board strength for Tech while Kirchner is around, and Gene Arington, another dependable sophomore. Noakes came in to score 13 points in Tuesday's Aggie game.

After tonight, only one game remains for Tech, against the Rice Institute Owls here Tuesday night.

'Mural Briefs

All persons interested in officiating in the softball leagues this spring are urged to be present at a meeting to be held at 5 p.m. March 3 in room 204 of the new gym.

Dormitory and independent softball team managers are asked to be present at a meeting to be held at 5 p.m. March 5 in room 204 of the New Gym. Fraternity team managers will meet at the same time and place March 6. The purpose of both meetings is to draw up schedules and discuss rules concerning the intramural softball leagues this spring.

Entries are being accepted for the table tennis tournament from now through March 9 in room 205 of the New Gym. Entries are accepted only on the official entry blank, which can be obtained at the intramural sports office, Room 205, New Gym. The tournament is tentatively scheduled to be held on March 16. Trophies will be awarded to first and second place winners in the singles tournament.

In the first round of the intramural volleyball tournament, the Triple Threats defeated Pi Kappa Alpha three games to one to move into the quarterfinals, and the Aces defeated the Setups three games to one to advance also into the quarterfinals.

In another game the Athletes defeated the Newman Club three games to none to advance to the semifinals.

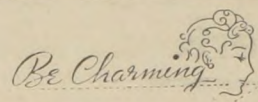

No Mark for Ron Delany He's Not Running

NEW YORK, Feb. 28 (AP)—The IC4-A Track and Field Championships are on the card for tomorrow and for a change the talk doesn't concern whether Ron Delany will break the mile indoor record. In fact, he's not even in the mile.

This is the one meet on the Madison Square Garden circuit that dwarfs the individual. The team man is in the spotlight, and as a result, Delany goes on the 1,000 and 2-mile in an effort to help bring Villanova its second consecutive IC4-A team title.

There is a special mile, all right, but it will be among the also-rans. The favorite is Hungary's Istvan Rozsavolgyi, who leaves for his homeland Monday. He may even break Gunnar Nielson's world indoor mark of 4:03.6.

He has had only two races on boards and made a fine impression in both. Each time, he was second to Delany. He won't have to watch Ron tomorrow and that should permit him to make his own pace. As his playmates, he has Phil Coleman of Chicago, George King of New York, Jim Beauty of the Army and Velisa Mugosa of Yugoslavia.

A Campus-to-Career Case History

Paul A. Twigg, Bachelor of Architectural Engineering, University of Detroit, '53, in front of the 6-story building whose construction he supervised.

Paul Twigg's Baby

Paul A. Twigg had been with Michigan Bell Telephone Company for about a year when he was assigned to a project that was a "dream" for a young architectural engineer. He was to supervise construction of a 6-story, 175,000-square-foot addition to the telephone building in Grand Rapids.

"For the next two years," Paul says, "I lived with the job as assistant to the Project Engineer. I interpreted the architect's plans and specifications for the contractor, inspected construction, made on-the-spot revisions where necessary, and worked out the many problems which arise on a project of this size."

"I kept the Engineering office in Detroit informed through daily logs and weekly progress reports. My boss pro-

vided reassuring supervision and advice on major problems by means of periodic visits to the job."

The building was completed last August. Understandably, Paul thinks of it as his "two-million-dollar baby."

"An assignment like this really gives you a feeling of accomplishment," Paul says. "It provides invaluable experience in your field. In fact, I've already been able to complete the first section of my Professional Registration Examination as an Architectural Engineer."

To engineers in many fields, the Bell Telephone Companies offer big and interesting assignments—assignments that challenge your ability, capitalize on your training and provide real advancement opportunities.

Many young men are finding interesting and rewarding careers in the Bell Telephone Companies. Find out about the career opportunities for you. Talk with the Bell interviewer when he visits your campus. And read the Bell Telephone booklet which is on file in your Placement Office.
