## Faculty Senate sets goals for 1991-92 school year

by AMY COLLINS  
THE UNIVERSITY DAILY

Speaking at Wednesday's Texas Tech Faculty Senate meeting, Paul Goebel, senate president and associate professor of finance for the College of Business Administration, said he is looking forward to addressing such issues as health insurance, academic advising and tuition benefits for spouse's and children of faculty members.

"These are areas which we wish to address and become a reality at Tech," he said.

Donald Haragan, executive vice president and provost, said the strategic planning program developed through the senate has reached the first stage of completion.

"We have thus far identified academic areas which are Tech's strengths," Haragan said. "We have also identified some areas which will offer Tech great opportunities in terms of funding in the future."

Haragan said cooperation among different colleges at Tech has been helpful in identifying these opportunistic areas.

"We do not have a lot of money lying around for these enhancement programs," he said. "I hope this will change in the future."

Haragan said another priority of

*We do not have a lot of money lying around for these enhancement programs. I hope this will change in the future.*

— Donald Haragan

the senate is to recommend to the board of regents that teachers be evaluated more on the basis of their formal roles in teaching rather than on student evaluations.

One of the faculty senators expressed concern about the negative effects a student evaluation can have over a teacher's evaluation.

"This type of evaluation is not very objective," Haragan said. "It is much easier for the board of regents to evaluate the progress of a teacher's research and student evaluation, as opposed to teacher performance evaluation."

He added that more emphasis should be geared toward an alumni evaluation, which would give graduates of Tech an opportunity to evaluate the education they received while at Tech.

Haragan said the idea for a teaching effectiveness center, which was proposed last spring, has been abandoned for numerous reasons.

"It was proving too costly and this was definitely not the time to embark upon something like that," he said.

"There were also already many interesting and innovative things going on at Tech."

Haragan explained that an effort toward a more efficient university operating with fewer faculty may result in raises for the Tech faculty.

"If something like this is not done, we may have a hard time raising faculty salary," he said.

Another concern of the senate was the previous rejection of the drop date issue, which was approved by the senate committee, but rejected by a majority of the faculty senators.

Haragan said if the drop date issue is approved, students will be able to drop a class after 30 days of classes have resumed at Tech.

"I would like to hear more from the majority of senators who rejected the proposal from the associate deans concerning the drop date issue," he said.

He added that an across the board raise of 2 percent has been approved for Tech faculty and staff.

"An additional 1 percent raise may be certified," he said. "This additional raise may be used in a merit pool."

Don Cosby, vice president for fiscal affairs, addressed the issue which is concerning many older faculty members; the 1.9 percent cut in the Tech retirement plan.

"This is a dangerous direction for the Legislature to be moving," he said. Cosby said there was a slightly greater reduction in the non-academic programs at Tech as opposed to the academic.

"However, we have received additional money for the new law library and international cultural center," he said.

Cosby addressed a question from one senator concerning the availability of funds for academic purposes from the \$35 million general fund balance.

"Most of this money is not available for educational use or faculty raises," he said. "We are trying to utilize all the interest we can from these fund balances."

Cosby said the majority of those funds are used for outstanding debts on things such as Tech buildings and auxiliaries.

The academic council report was addressed by faculty senators who hope to eventually correspond numerically with courses offered at other junior colleges to courses offered at Tech.

The research council was another area of discussion within the faculty senate, which if approved, would produce more service within the collegiate unit in terms of funding.

Many of the faculty senators said they feel donations accepted at Tech for research should be treated equally. One senator said many large donors might be turned away if the small donors are not treated with the same degree of appreciation.

Goebel said Don Wickard, registrar for admissions and records at Tech, will speak at the second meeting of the Faculty Senate concerning the problems and possible solutions for registering at Tech.

THE UNIVERSITY DAILY: WALTER GRANBERY

### Hell hath no fury

Carl Giordano, an ordained minister from Dallas, clashes with Tech student David Graham, left, Wednesday at Tech's free speech area. Giordano, along with two other ministers from the Metroplex, were

preaching to students passing by the free speech area. The trio condemned everyone in the crowd of more than 200 onlookers to hell, saying the Bible had the right to do so.

## Students, ministers clash at free speech area

by FRANCISCO RODRIGUEZ  
THE UNIVERSITY DAILY

It wasn't quite the Second Coming, but three Dallas ministers raised enough hell to rile more than 200 Texas Tech students at the free speech area Wednesday.

Passing students stopped and listened to the preachers, who started speaking at 10 a.m. and continued until mid-afternoon.

The confrontation between the three ministers and the crowd never reached a violent encounter, although several passers-by yelled obscenities at the preachers. Students began screaming at the preachers when they were told they were "all going to hell."

Carl Giordano, an ordained minister from Dallas, said he uses aggressive preaching to reach more people. People wouldn't listen to him, he said, if he talked to them about love.

"They say 'we don't want to hear that, we don't want to hear that,' and that doesn't accomplish anything," Giordano said. "This way, they'll stay and listen. We give credit to God for the way this works out."

Giordano said he has been nicknamed "Reverend Rambo," because he "machine guns people with the

word of God."

The three preachers condemned everyone in the crowd to hell, saying the Bible gave them the right to do so. They also condemned rock 'n' roll, the Greek system and Amy Grant, calling her a fornicator and a "child of the devil."

Giordano and the other two ministers would not reveal their church affiliation. Campus ministry organization representatives said that no campus organization invited the three to come to Tech.

A man took the stand, identifying himself with a campus ministry, and said none of them would "bring this kind of crap to campus."

Members of the Wesley Foundation and other campus ministry organizations gathered to counterattack preachings of the ministers.

Sean Gladding, an intern at Wesley from Norwich, England, said the three ministers had a twisted interpretation of the Bible.

"I am not a preacher, but I know that Jesus talked about love," he said. "He didn't go around calling people faggots, fornicators or told them they were going to hell."

"He touched lepers and cured them. He didn't care what they looked like. Jesus loves me just the way I am."

Gladding's speech was followed

by other speeches, by Wesley members and other students at the free speech area after Giordano said sorority and fraternity members, homosexuals, and people with long hair will all go to hell. Gladding, who sports long hair and an earring, said Samson did the same.

Giordano, Steve Cooke and Rick Bradley travel from university to university preaching in this manner.

"Our biggest opposition are those who are professed Christians," Cooke said. "Christian hypocrites are our biggest enemies. They think they know God, but it's not the truth. We fight against false prophets."

Brad Kaelin, a senior engineering major from Lubbock, said that while he didn't agree with the preachers' methods, he agreed with their message. Free speech, he said, must prevail.

"There's a lot of people jeering and making fun of them, but they are doing something about what they believe," he said. "They just have to be willing to withstand the consequences."

Kaelin made references to the apostle Paul, who according to the Bible was whipped, beaten and jailed for preaching.

Pat Greene, a sophomore psychology major from Waco, said it was Cooke's job to get people angry.

"People don't seem to understand that talking to him gives him more power," he said. "He's not there to listen."

Greene said the ministers' abusive preaching scared people away from God.

At one stage in the rally, Cooke said the venereal disease gonorrhea was a punishment from God to fornicators.

He quoted from a medical pamphlet dos and don'ts of gonorrhea patients, which include not drinking alcohol and refraining from sexual activity.

Chris Stetson, a Ph.D. student in chemistry, said the ministers twisted science to fit their preaching.

"If you're undertreatment for gonorrhea, scientifically, alcohol will deactivate the effect of the medication," he said.

"They want to make it sound like God meant it this way to punish sinners."

Stetson added that he can conduct an experiment with bacteria "which have not sinned" and get the same effect.

Campus police kept vigil during the affair, and no violence was reported.

The preachers plan to return to the free speech area today.

## Tech Ag Sciences professor dies in Germany after sudden illness

Howard M. Taylor, a Texas Tech professor in the College of Agriculture Sciences' department of agronomy, horticulture and entomology, died Friday.

Taylor is survived by his wife Marjorie Claire, his two sons Steve and Scott, and his granddaughter Catherine Lynn.

Taylor died following a sudden illness in Frankfurt, Germany. Services will be held at 10 a.m. Saturday at St. Luke's Methodist Church in Lubbock.

Memorials in Taylor's name can be made to Tech's Agronomy Graduate Student Scholarship fund in the department of agronomy, horticulture and entomology.

Taylor graduated from Lohn High School in 1940. He earned a bachelor's degree in agronomy from Tech in 1949, and graduated from the University of California at Davis in 1957 with a doctorate degree in soil science.

In addition, he did graduate work at the Massachusetts Institute of Technology, and was a Fellow of the American Society of Agronomy, the Soil Science Society of America, the Crop

Science Society of America and the American Association for the Advancement of Science.

Taylor also was a university scholar at the University of Aberdeen in Scotland in 1974.

He was employed by the Soil Conservation Service in the West Texas area between 1949 and 1955.

He held faculty appointments at Auburn University and Iowa State University before coming to Tech in 1982.

During his eight years at Tech, Taylor worked with graduate students and was a Rockwell Professor of Soil Science.

He hosted a number of foreign scientists for collaborative research in addition to traveling and lecturing overseas.

Taylor was considered an authority in soil-plant root relationships, and his research has been published in numerous scientific journals and books.

He served in the Army Air Corps during World War II and as a photo-intelligence officer during the Korean War.

### Good Morning!

#### News

Congressman Larry Combest, R-Lubbock, has taken student financial aid seriously. He has co-sponsored a new student loan program, that if initiated, could save the federal government money and help eliminate defaults on student loans.

page 4

#### Features

The dim lights, the smoke-filled atmosphere and the sound of jazz; all part of the University Center Activities sponsored opening of the UC jazz room. The room will open Sunday in the UC's Coronado Room and will feature the Dave Catney Trio as the special guest for the evening.

page 5

#### Sports

After a successful season opener, the Texas Tech Red Raiders face a tougher task when the Oregon Ducks roll into town. Oregon is 1-0 on the season after a 40-14 drubbing of Washington State. The Ducks return eight starters on defense, including junior safety Eric Castle, who picked off two passes last week against the Cougars, returning one for a touchdown.

page 6

#### Weather

Mostly cloudy skies in the morning, turning to partly cloudy in the afternoon with a high of 85 degrees. Winds will be out of the south at 10-20 mph. Tonight's forecast calls for considerable cloudiness with a 30 percent chance of showers and thunderstorms. The overnight low will be between 60-65 degrees.

## Investigation finds origin of BA fire

An investigation has cleared speculation into Tuesday's one alarm fire at Texas Tech's business administration building.

According to the University Police Department report, the fire apparently was caused when plumbers, working on a nearby laboratory, burned insulation of a restroom wall on the 11th floor.

Sgt. Lawrence Payne, of UPD, responded to a call from the building at 5:47 p.m.

After Payne and two other officers smelled smoke and searched the building, they sounded the alarm and called the fire department.

The building was evacuated and police sealed an area of north and south Flint from 18th to 15th streets. Engines from Station Four at

Third and University arrived on the scene at 6:02 p.m., and Payne said in the report, "after searching the 11th, 10th, and 12th floors, a small fire was located under the lavatory of a ladies restroom."

Due to the fire and the building being a high-rise, several other stations were dispatched to the site. The report listed damage estimates at \$400.

Howard turned the situation over to the Tech fire marshal at 6:40 p.m.

"As far as we're concerned the situation is in the hands of the Tech fire marshal," he said.

The fire marshal would not comment on the case Wednesday and it is uncertain whether or not a report from the fire marshal's office has been filed.

## Why things are: #1, Calvin & Hobbes

FRANCISCO RODRÍGUEZ

As I wandered about the newsroom Wednesday, I heard the frolicking of young people outside the journalism building. I expected to see some skateboarders gleaming the mass communications building, but instead I saw a somewhat large group of people sitting on the concrete, having what appeared to be a catered picnic.

I yelled out that I had hungry reporters, they yelled back something I couldn't understand, as I am hard of hearing. I did, however, hear something about me not deserving any food for cutting "Calvin and Hobbes." "Really... *Doonesbury*..." one of them said.

I guess I won't hear the end of it for a while. The University Daily underwent many changes over the summer, and the rest of the world didn't stand still, either.

Bill Watterson, creator of "Calvin and Hobbes," is taking a leave of absence, which means Universal Press Syndicate is running old "Calvin" strips. They're on re-runs.

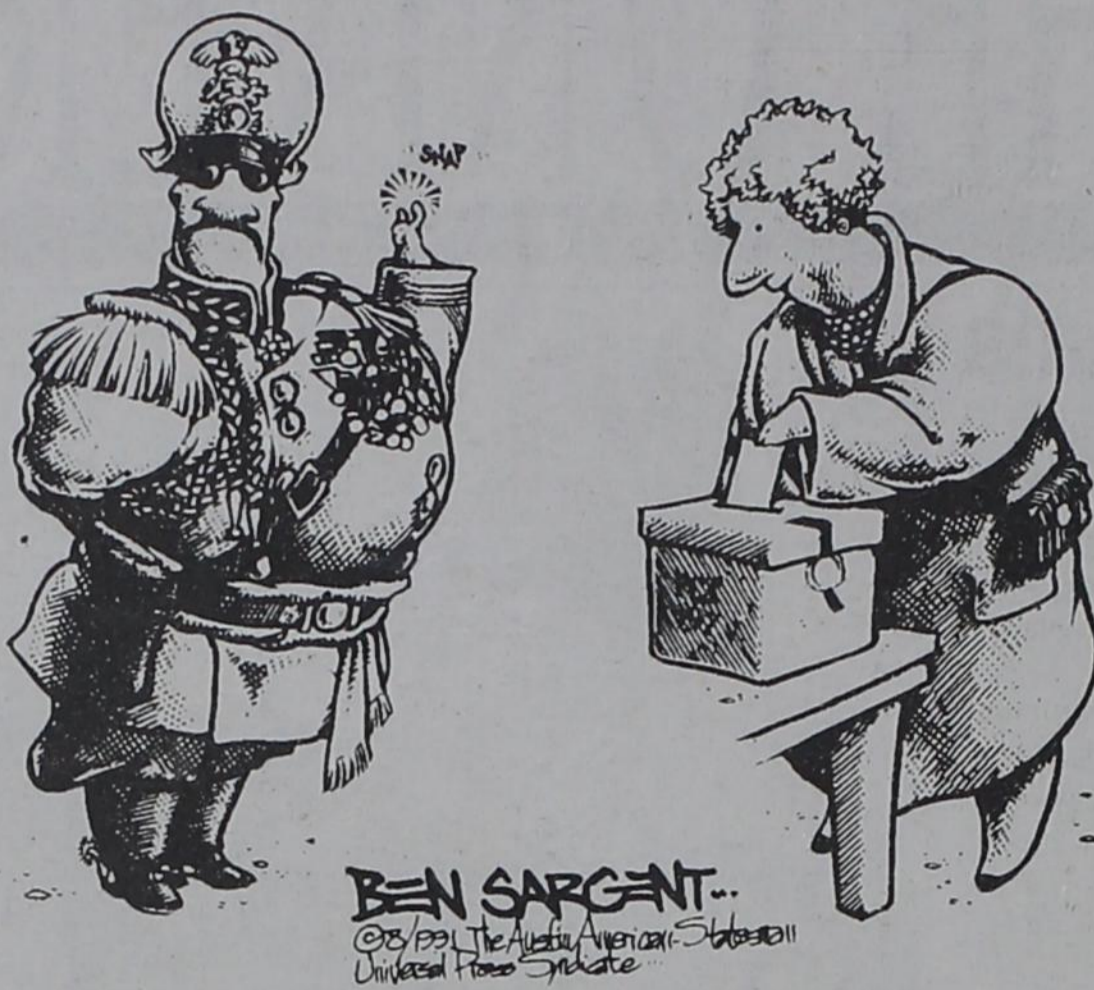

"Doonesbury" seemed like the best replacement since many people indicated that they would like to see it in *The University Daily* on a recent survey. So there. I'm not really a villain, really.

Francisco Rodríguez is the editor of *The University Daily*.

### Scientific method doesn't apply to Bible

With the successful inclusion in his offering of September 10 of practically every faddish political buzzword known to humankind—sexists, misogynists, homophobic, bigotry, heterosexist—one would suspect that Mark Thoman anticipates his nomination to the Supreme Court.

However, that key component of a letter to the editor, a sound argument, is nowhere to be found.

I guess the point was to voice displeasure at the refusal of a fundamentalist minister to conduct a marriage ceremony for an interracial couple. I enthusiastically concur. Neither do I object to his use of this incident as a

springboard for propounding a theological method with which I disagree.

I suspect his is a widely held position, and I would enjoy seeing it clearly elucidated.

Troubling is the strident, intolerant tone of his unconvincing pronouncements.

In a 300 word essay, this self-proclaimed "critical" thinker skids through a treatment of women's issues, church government, and apartheid, only to end with the following weighty pronouncement: "I have been told that the Bible also commands that a woman marry her rapist." (I once watched a TV evangelist lay hands on and pray over a satellite dish, and failed to draw any sweeping conclusions about the state of the Church Universal.

I guess Mr. Thoman and I have a different understanding of the

scientific method.) Such nonsense, intertwined with an exercise in biblical exegesis that makes Phil Donahue look like Thomas Aquinas, offers the reader paltry sustenance. It is hardly a secret that harmless nut cases, lend legitimacy to their causes by ripping biblical injunctions out of context.

Written over a vast span of time and space, addressing a wide variety of complicated issues, the Bible is vulnerable to this type of license; witness Mr. Thoman's article.

He seems to imply that the difficulties forced on the modern mind by verses in Leviticus and the Pauline Epistles are to be solved by an immersion in pop psychology and a scientific method which he fails to employ.

No, Old Testament regulations regarding animal sacrifices, mildew, and infectious skin diseases are not directly applicable to the contempo-

rary Christian experience. (Ditto in reference to the fabric blend controversy mentioned by Anna Quindlen in her "provocative" article.)

In spite of this handicap, men and women throughout the ages have wrestled with difficult teachings, engaged in meaningful dialogue, and attempted to apply Christian teachings to their daily lives. Most importantly, this has been done without wholeheartedly adopting a fashionable system of ethics, which Mr. Thoman implies with his reference to "Christians of the 90s."

Equip this animal with a rigorous scientific method and I suppose you have a critical conformist.

One could scour the planet for a better example of self-congratulatory, predictable, trendier-than-thou theology and come away empty.

Lance Vanzant

## The Lone Star-Red Star connection

JOE MURRAY

ANGELINA COUNTY — Pavlik came back from his four-mile run along the beach of Cape Cod feeling good that Sunday morning. It was a feeling that lasted until he entered the beach house where he and Natasha were staying with friends.

One of the friends was waiting for him, to tell him what he hated to have to tell him, that Gorbachev had been ousted. Pavlik laughed.

Just the night before this same friend had asked him what he thought were the chances of a coup against Gorbachev. Pavlik had said it was next to impossible. For one thing Gorbachev was a skillful politician. For another, the KGB, the military and the Communist Party were very much divided among themselves. Thirdly, to go against Gorbachev — against the democracy movement — would require great bravery to face the anger of the Russian people.

His first feeling, once he realized this was no joke, was fear, for their young son, Sasha, they had left with grandparents in Moscow, for other relatives and for their friends. Russia has always been an unpredictable giant. Civil war was not unlikely.

Pavlik did what any Russian might do in similar circumstances. He went to the store and bought several bottles of vodka.

They were waiting out not just the coup but Hurricane Bob as well, which arrived at the Cape shortly after they had. Much of the time they were without electricity. They sat in their friend's car late into the night, listening to the news on the car radio.

But when two days had passed and nothing of importance had happened, Pavlik found reason for hope. Things should have moved quickly. The Parliament should have been taken over by the military. Yeltsin should have been arrested. Pavlik, a history teacher, knows how coups are made to work. He knew, too, how the people felt about the communists and the KGB.

Then came word that Gorbachev was flying to Moscow. The coup was over. Pavlik felt a great relief. The Cox Washington Bureau had messaged our correspondent in Moscow and she had checked on Sasha and the family, reporting back that all were well, which I relayed. Even as the coup fell apart, there was still no TV where they were staying. I relayed news as well. When I told Pavlik that the head of the KGB reportedly had been arrested, Pavlik laughed long and loud.

On the last day that we talked, as he and Natasha were preparing to return to Moscow, Pavlik was once again serious:

"No doubt that things have changed for the better, now that the KGB and the Central Committee have been eliminated," he said. "But I think before we had the dangers from the right wing, now the left wing could grow into a dangerous thing. This could be a time of total disintegration of the country, a time of violence and of persecution of innocent people who just worked for the KGB, not only the real criminals but ordinary people as well.

"But still I am eager to go back. First thing, I want to see what is going on, to speak to people who saw it first-hand. Second thing, I am eager to tell them all about America."

I'm eager to see for myself as well. Assuming my visa comes through, I'm heading to Moscow within the week. My plan is to take the Trans-Siberian Express across the whole of Russia, which is 11 time-zones wide, to learn everything I can of this brave new revolution. I'll tell you all about it when I get back.

Joe Murray is a columnist for the Cox News Service. ©NYTNS.

### Bible transcends tribal origins

I have to admit I was disturbed by Mark Thoman's letter.

This well-intentioned young man exhibits a very shallow understanding of the true nature of the Bible. He speaks of taking "a critical approach to the Bible" and uses many impressive phrases such as "level of scientific" and "sociological understanding."

He implies that those are stupid hicks who believe "that no prophecy of scripture came about by the prophet's own interpretation, for prophecy never had its origin in the will of man" (2 Peter

2:20-21).

As one who believes that the Bible transcends its original tribal setting by virtue of its divine authorship, I find his thesis not only offensive but also erroneous.

Mr. Thoman wants us to think his thesis to be the enlightened point of view. I, for one, believe wholeheartedly the Bible, and I too can banter polysyllabic words and employ esoteric phraseology.

His attempt to use intellectual rhetoric does not impress me since I too must often use sophisticated reasoning and composition in my areas of life. "See to it that no one takes you captive through hollow and deceptive philosophy" (Colossians 2:8).

Contrary to his innuendo that scripture is tainted with racism and

sexism, Paul writes "there is neither Jew nor Greek, slave nor free, male nor female" (Galatians 3:28).

A few passages do seem to support slavery and sexism, but one should recall that the Bible teaches a most unusual method for the overthrow of unjust authority as seen in Romans 12:17-21 and I Peter 3:1.

Of course, these passages are not intended to encourage abuse and dependency, and I think only a malicious non-believer, a sick legalist, or an idiot would take them to be so.

The original hearers of scripture had had slavery and chauvinism ingrained into their psyche since childhood; it was a reality they had to deal with. The scripture shows us a bloodless and gentle means of

annihilating societal evils not by legislation but by changing the hearts and minds of individuals. It also offers a constructive pattern of behavior for otherwise powerless victims of society. Many alleged Christians do take verses out of context and make sick re-interpretations thereof for their own purposes.

However, the Bible is no less divine and no less practical simply because immature Christians and pseudo-Christians attempt to abuse its authority. Unbelievers can no more affect its power than Ptolemaic astronomers can make the Earth stand still.

Only one thing can keep that power from your own life: your own choice. See Revelation 3:20 and Romans 1:21.

W. Craig Yerger

### There are choices other than feminism

I take issue with Gwendolyn Sorell who says she is not a radical feminist. Feminism, which has as its premise that men and women, husbands and wives, fathers and mothers, are fungibles and interchangeable, is radical.

The move to restructure language into a gender-neutral society to fit feminists' power-hungry mold runs counter to common sense and eventually freedom.

In the words of one fully "liberated" woman, "free men and women will not voluntarily submit to social engineering to restructure society."

Even more radical than the silly notion of gender-neutral language, however, is feminism's definition

of a woman's "choice" — the choice to choose any career, rise to any rank, and even choose to end the life of her baby.

I am a professional woman, successful business owner, mother of three pre-school children, and part-time graduate student. All these being my choices and aspirations. I took the opportunity last year to ask a feminist what she would think if I chose to leave the professional world and become a full-time homemaker.

She promptly and emphatically asserted that I could never do that. It would be detrimental to the "cause" and keep women in oppression. So much for my choice.

Here's another example of radical feminist ideology: Ever ask a pro-abortion feminist about a woman's right to choose life for her unborn baby? After the blank stare, you'll most assuredly be told that such a position is not pro-choice, because as feminist-turned-conservative

columnist Debra Saunders puts it, feminism "doesn't simply advocate the right to abortion, it preaches the rightness of abortion."

Feminism is not about achievement for women; it is about taking power away from men and giving it — not to women, but — to a small group of left-wing, power-hungry women.

How do they do this? By making excuses and feeding upon the senses of the masses.

I like the words of Judge Clarence Thomas. "I had an advantage over black students and kids today. I had never heard any excuses made. Nor had I seen my role models take comfort in excuses. The women who worked in those kitchens and waited on the bus knew it was prejudice which caused their plight, but that didn't stop them from working... Sure, they knew it was bad. They knew all too well that they were held back by prejudice, but they weren't pinned down by it...

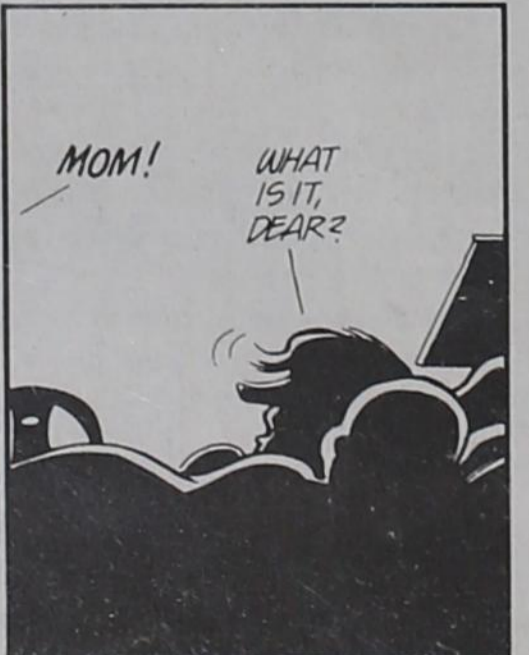

I had the benefit of people who knew they had to walk a straighter line, climb a taller mountain and carry a heavier load... You have a much tougher road to travel. Not only do you have to contend with the ever-present bigotry, you must do so with a recent tradition that almost requires you to wallow in excuses... You must overcome the lure of excuses. You have twice the job I had." Substitute Ms. Sorell's word sexism for Judge Thomas' word prejudice, and I say "ditto."

My advice to young women today? Dare to be all you can be with your own choices. Evaluate your priorities carefully. Do not allow someone else's urgent agenda to cloud the things which are really important in your life.

Practically speaking, avoid the Women's Studies Programs of this or any other campus and avoid the excuses.

Cheri N. Isett

# Vandalism third highest reported campus crime

by JENNIFER SANDER  
THE UNIVERSITY DAILY

Criminal mischief, or vandalism, is the third most reported crime on Texas Tech's campus, said Gene Minnick of the university police department. Anyone caught committing vandalism, depending on the amount of damage, may serve time in a state penitentiary.

"More than likely a person will be put in jail for vandalism," Minnick said. "There are different levels of criminal mischief with different punishments."

Minnick said a Class C misdemeanor is property damage under \$20, and a Class B misdemeanor is damage from \$20 to \$200. A Class A misdemeanor is property damage between \$200 and \$750, and any damage above \$750 is considered a third degree felony and the suspect is automatically arrested.

Within the last six months the Tech police department received reports of about 110 cases of criminal mischief with damages totalling \$17,309.

Minnick said most of the cases were damages to automobiles, such as keyed cars and broken windows.

Vandalism has always been a problem in the Lubbock area, said Cpl. Ken Brendle of the Lubbock Police Department.

"Criminal mischief is a juvenile crime," Brendle said. "Most of the time it is committed by young adults between the ages 12 and 25."

Brendle said the reason juveniles commit vandalism is because they are either trying to get even with someone who has hurt them, or just breaking the rules.

He said the criminal is probably trying to hurt someone they are mad at or they are just against society in general.

Brendle said the most common types of vandalism in the Lubbock area are damage to autos, such as slashed tires, keyed cars and broken windows. Painting on houses, "papering" trees and any sort of graffiti are also considered forms of criminal mischief.

Brendle said the Lubbock police department received 324 reports of

criminal mischief in August, 85 of which were cleared.

"The total cases of criminal mischief in Lubbock has increased," he said. "However, the clearance rate is a little higher."

Most of people who commit criminal mischief are never caught, Brendle said. The most difficult part for him to understand is why people commit the crime.

"This crime makes no sense," he said. "It is just plain destruction of property without any sort of profit for anyone. It is a waste. Most of the time the victim feels worse when their property is vandalized rather than stolen."

Brendle recalled one case when he caught juveniles breaking windshields in parking lots with a golf club. Their reasoning behind the mischief was because "we liked to hear the sound of glass breaking."

Brendle said there is no specific area in Lubbock where vandalism occurs most often.

"People who commit this crime are mobile," he said. "They aren't tied to one certain spot or group. They are all from different races, neighborhoods

and lifestyles."

Most people who commit vandalism intend to steal something from a car, not damage the automobile.

"Criminals have a curiosity to see what someone has inside their car," said Porfirio DeLeon of the Lubbock Police Department.

"They will break in a car, go through the glove compartment and seats, and if they do not find anything, they will leave."

DeLeon said that car stereos are a big attraction for criminals.

"The best way to protect anything from being stolen from a car is to keep anything valuable out of sight," he said. "Open the glove compartment to show that nothing is in there and the criminal has nothing to be curious about."

"Basically, do not display what you have," DeLeon said.

"Keep cars parked in well lit areas and keep the grounds around the home well lighted. Do not leave your car unattended for long periods of time. Most vandalism occurs at night time because the criminal is covered by darkness."

### Support group focuses on coping with death

Life After Loss is a group support program of the American Cancer Society designed to help bereaved people better understand the grief process, their emotions, and how to cope with them. Sessions are open to those who have experienced the death of a loved one, and there is no charge for the service.

Lubbock's first Life After Loss Program will start Sept. 3 at 7 p.m. at the American Cancer Society office, 3411 73rd St. Anyone needing more information on Life After Loss can call the American Cancer Society Office at 792-7126.

### Computer service analyzes student eligibility for financial aid program

To assist families in determining exactly how much money they are eligible for in the form of state, federal and special campus-based student aid programs, Power Image Consultants, is offering a computer service that analyzes a student's individual family circumstances and prepares a computerized step-by-step outline illustrating what action needs to be taken for student aid qualification.

Students may request free information and an application by contacting Power Image Consultants, 40 West 135th St., Suite 12R, New York, N.Y., 10037.

## Moment's Notice

Moment's Notice is a service of the Student Association for student and university organizations. Publication of announcements is subject to the judgement of the Student Association staff and availability of space. Anyone who wants to place an announcement should come to the SA office on the second floor of the University Center and fill out a separate form for each Tuesday and Thursday the notice is to appear. ALL QUESTIONS SHOULD BE DIRECTED TO THE STUDENT ASSOCIATION OFFICE AT 742-3631. The deadlines are as follows: Friday at noon to be printed on Tuesday and Tuesday at noon to be printed on Thursday.

### PSI CHI

The first meeting will be on Sept. 12 in room 303 of the Psychology building at 6:15 p.m. If you have any questions call Lorilyn Cartwright at 791-3016.

### AELA (LATIN AMERICAN STUDENT ASSOCIATION)

The first meeting will be on Sept. 13 in room 207 of the UC at 6:00 p.m. If you have any questions contact Juan Segura at 744-7605.

### COLLEGE REPUBLICANS

The first meeting will be on Sept. 12 in Holden Hall room 6 at 8:30 p.m. For more information call Clayton Carroll at 744-7227.

### TEXAS TECH CHESS CLUB

Registration will be on Sept. 15 in the UC cafeteria at 5:00 p.m. For more information call Mehrdad Pedram at 742-4262.

### CARDINAL KEY

The first meeting will be on Sept. 12 in room 103 of the Industrial Engineering Building at 6:00 p.m. For more information call Karen McDuff at 798-3294.

### AGRICULTURAL ECONOMICS ASSOCIATION

The Hotdog Supper will be on Sept. 12 in rooms 122 and 123 of the Livestock Arena at 6:00 p.m. For more information call Dallas Goodman at 762-1038.

### M.A.S.O.

The first meeting will be on Sept. 12 in room 208 in the UC at 7:00 p.m. For more information call Jesus Piaz at 744-1460.

### ANTHROPOLOGICAL SOCIETY

The first bi-monthly meeting will be on Sept. 12 in room 28 of Holden Hall at 7:30 p.m. For more information call Todd Reynolds at 797-7845.

### ALPHA KAPPA PSI

1991 Fall Rush will be on Sept. 12 in the BA Rotunda at 6:30 p.m. For more information contact David Long. CO-ED professional dress.

### DOUBLE 'T' FENCING CLUB

Instruction and bouting will be on Sept. 12 in the Rec Mat Room 116 from 7-9 p.m. For more information call Mike Husband at 765-7347.

### ALPHA GAMMA RHO

Open Rush will be on Sept. 15 in the Meats Lab at 7:00 p.m. For more information call Daniel Stanton at 798-2794.

### VIETNAMESE STUDENTS ASSOCIATION

The first meeting will be on Sept. 13 in room 207 of the UC at 7:00 p.m. For more information call Thinh Ngo at 744-6772.

### TEXAS TECH CYCLING CLUB

The first meeting will be on Sept. 12 in room 201 of the REC Center at 8:30 p.m. For more information call Terry Berridge at 742-6856.

### TEXAS TECH HIGH RIDERS

Orientation for Rush will be on Sept. 15 in the UC Lubbock at 2:30 p.m. For more information call Emily Fortner at 793-1307.

### STUDENT FOUNDATION

Now accepting applications for membership due Sept. 27. Applications available in the Ex-Students Assoc. Bldg. For more information call Nick Federspiel at 796-1065.

## Proposed legislation could prevent default

by JULIE COLLINS  
THE UNIVERSITY DAILY

Financing current and future college educations for Texans is a concern that Congressman Larry Combest, R-Lubbock, has taken very seriously. Recently, Combest co-sponsored a new student loan program that, if initiated, could save the federal government money and help eliminate defaults on student loans.

The program, known as the Income Dependent Education Assistance Act, would collect the loan at the end of the borrower's college education in the form of personal income tax collected by the Internal Revenue Service.

The U.S. Department of Education has estimated the default rate for federally insured student loans will be approximately \$3.6 billion.

Combest indicates that some students are not repaying their student loans because of cracks in the government process of collecting those debts.

The federal government could stand to save approximately a quarter of a billion annually, and could save the taxpayer's approximately \$1 billion each year, according to a Combest press release.

Ronny Barnes, assistant vice-president for Student Affairs and director of the Financial Aid Office at Texas Tech, said Combest's IDEA proposal is not a necessarily new idea.

"There has been at least one piece of legislation proposal for a new student loan program for every year that I have been a financial aid adviser," Barnes said.

While the idea is not new, Barnes said the proposal to have the IRS collect money from college students' paychecks after graduating is a positive way to collect on the loan.

If initiated, the loan would allow anyone, regardless of their family

income, to qualify for the loan. A student may borrow up to \$50,000 for their education through the program with the interest rate at no more than 10 percent.

"Not checking the background of each student who applies for this loan could encourage excessive debt on the part of the student," Barnes said.

Currently, the national default rate for college student loans is approximately 14-17 percent.

Tech's default rate is ranked as one of the lowest in the country, hovering around 4-8 percent.

Barnes attributes low default rates to pre-loan and exit loan counseling sessions.

10 percent, he said.

Barnes said many more students applying for college loans and pell grants have been chosen for federal financial verification.

"Approximately 35 percent of our applicants have been chosen for verification for the fall semester. It's a random selection and is a part of the federal financial aid process," Barnes said.

While Barnes admits the Financial Aid Office is currently understaffed, it was not due to the 3.2 percent budget cut.

"We've had five positions turn over since the beginning of school, and we are in the midst of training three new people. The budget cuts are not going to affect our office at this point," he said.

Students could feel the effects of the budget cuts when receiving financial aid award letters.

"Some students will have to come to the office and pick their award letters up instead of having it mailed to them. Things like postage will be affected because of the budget cut. Basically, a lot of things that have been implemented for the students' convenience will have to be minimized," Barnes said.

Recently, voters rejected a proposed constitutional amendment that would have enabled the Hinson-Hazelwood student loan program to increase its holdings by approximately \$300 million.

The constitutional amendment failed by a thin margin.

Barnes said if 10 percent of all college students had voted for the constitutional amendment, it would have passed.

"Many students were unaware of the amendment that could have benefited them," he said.

The constitutional amendment was given another try by legislators in Austin and will be on the Nov. 5 ballot.

"At Tech, we stress these programs to all students qualifying for a loan so that it helps to eliminate a lot of default cases.

"We really do have good borrowers, we really don't have a big problem with our students not repaying their loans," Barnes said.

The 1991-92 school year has seen no obvious increase in the number of loan applications, but the number of loans turned into the financial aid office from August compared to September has increased approximately

*There has been at least one piece of legislation proposal for a new student loan program for every year I have been a financial aid officer.*

— Ronny Barnes

## Professor named to scientific board

by CATHERINE DUNN  
THE UNIVERSITY DAILY

Mohamed M. "Moh" Ayoub, a Horn professor of industrial engineering, said he considers it a great honor to be named to the Board of Scientific Counselors of the National Institute of Occupational Safety and Health.

"Not too many people are on it. The board is made up of 11 people. These people are considered to be experts in their field," Ayoub said.

His appointment to the advisory board is effective through Dec. 31, 1994.

The board consists of people active in research related to the institute. NIOSH is a division of the Centers for Disease Control in Atlanta, Ga. It has the responsibility of developing the research arm, which provides a basis for developing safety and health standards, Ayoub said.

Board members advise the institute on the evaluation of research hypotheses and the documentation and dissemination of scientific findings. They also evaluate the degree to which the institute's funded research meets scientific standards, and addresses relevant needs in the fields of occupational safety and health.

"The board advises the government on the type of research that is needed, the quality of research that is being funded and future directions," Ayoub said.

The board meets in Washington, D.C., three times a year. Its first meeting will be in November.

"Most of us have our own biases," Ayoub said. "I'm doing a part of research that no one else is doing. Each one has his or her own expertise, and he is more or less the speaker to promote that particular section."

Ayoub's primary research involves occupational biomechanics, which deals with the physical stress imposed on the human body while performing physically demanding jobs.

"We consider the body as a me-

chanical system. After all the muscular skeletal system performs movements just like a mechanism would," Ayoub said.

Ayoub's research concentrates primarily on back injuries.

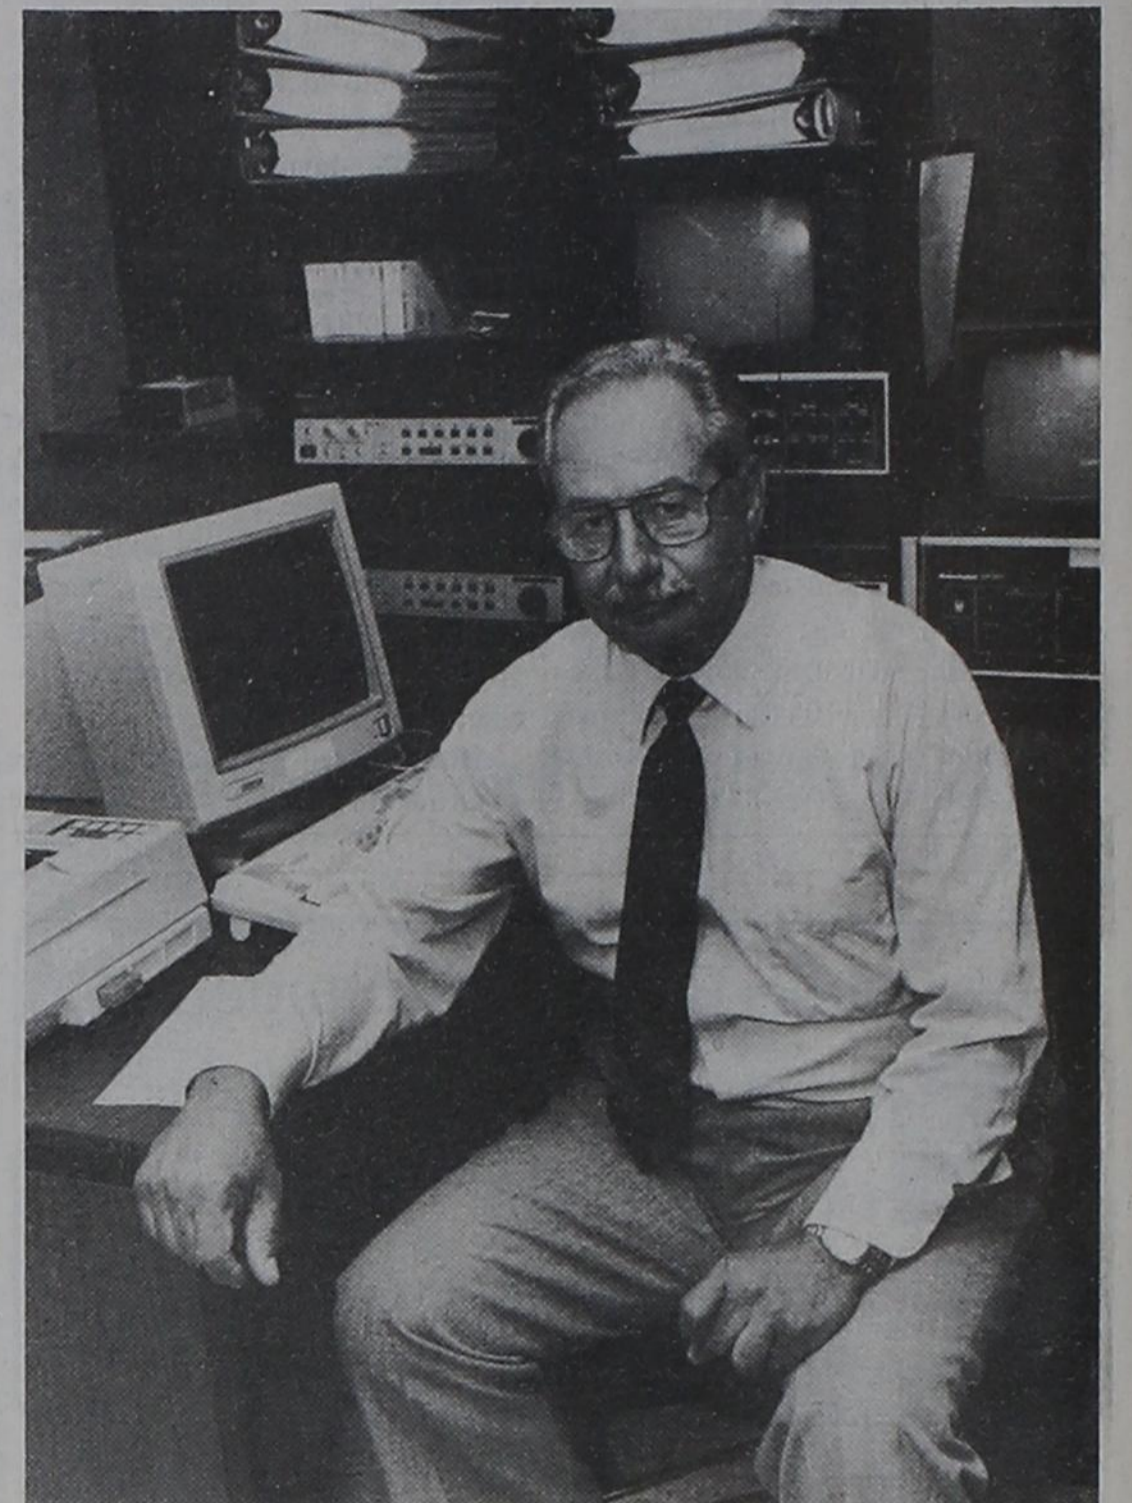

"Back injuries in the United States costs us over \$30 billion a year," Ayoub said.

"We're trying to find means and

ways of understanding what happens to the back in handling weights or in physically demanding jobs.

"This leads to how to design jobs that reduce the frequency of severe injuries."

Recent sponsors of Ayoub's work are NIOSH and the U.S. Air Force, Navy, Postal Service and Bureau of Mines.

**New board member**

Industrial engineering professor, "Moh" Ayoub, sits in front of some of the equipment used in his biomechanical research. Ayoub videotapes subjects to determine what forces act on the body during strenuous activities. He was recently named to the Board of Scientific Counselors.

# New UC jazz club to feature Houston act in opening

Dave Catney

by LYDIA GUAJARDO  
THE UNIVERSITY DAILY

A darkly lit room filled with smoke and a musician with a goatee gently strumming his bass are all part of the myth surrounding jazz clubs. A myth that Texas Tech students can explore when the University Center's Coronado Room is transformed into a haven for jazz.

The transformation begins at 8:30 p.m. Sunday.

The University Center Activities office is sponsoring the grand opening of the jazz club for jazz enthusiasts to listen to local and well known groups.

"The idea we had behind starting this club was to offer a different kind of club setting for those interested in jazz," said Gail Littleton, UC activities fine art's adviser.

"We wanted to offer a jazz club-like environment but not so smoke filled."

The Coronado Room's interior will be dressed in black table cloths, candles and black and white prints of famous jazz musicians.

Gourmet coffees and desserts also will be an added extra with the ticket price.

Tickets can be purchased at the UC Ticket Office and will cost \$5 for Tech students with their ID.

"This will be a traditional jazz setting as opposed to the fusion setting," Littleton said.

The pilot program will feature the Dave Catney Trio as the special guest of the evening. After the release of their debut album, "First Flight," the trio received several good reviews from area critics and scheduled several gigs in the band's hometown of Houston as well as the Dallas-Fort Worth area.

"There was a strong reaction toward him (Catney) when we were reviewing bands for the grand opening of the jazz club," Littleton said. "He has got a lot to offer; there is a lot of variety to him."

Littleton said the club's live musical format will feature a regional touring band and a local up-and-coming band.

Bright Moments will be the opening act Sunday night. Bright Moments, which consists of Tech faculty members as well as a married couple, will open the event under the lead of a female vocalist.

"We thought it would be a compliment to have a female vocalist to open for the Catney Trio," Littleton said.

A second musical performance is scheduled for the evening of Feb. 29, 1992 to end the jazz club's inaugural season.

"If there is a lot of interest in the club, then we may consider expanding the season to a few more dates in each semester," she said.

Littleton also said there seemed to be a growing interest in jazz. Consequently, she wants to bring more jazz events to the Tech campus.

Littleton added, however, that there was not a real demand for tickets to this first event.

"I hear a lot of interest in jazz, but unfortunately, the register is not ringing in the ticket sales," she said. "I also just think Lubbock is a last minute audience."

## Castle eyeing royal season

by LEN HAYWARD  
THE UNIVERSITY DAILY

Defense is an important part of any football team, and for the Oregon Ducks it could be the difference in their season.

Junior free safety Eric Castle is one of the leaders on an Oregon defense that helped trounce Washington State 40-14 in the Ducks' season opener.

Against Washington State, Castle had two interceptions — one for a touchdown — with seven tackles and six unassisted tackles.

Castle credits his interceptions to the quarterback pressure put on by the defensive line of the Ducks.

"Our defensive line put a lot of pressure on him (Cougar quarterback Drew Bledsoe) so he could not throw the ball. On my first interception I was up the middle, and he threw it right to me," Castle said.

Castle came to Oregon originally as a wide receiver, but made the tran-

Castle

sition to defensive back his freshman year, when he was redshirted.

"My first year I was a wide receiver. Some people were injured and some were ineligible (defensively). The coaches asked me to make the change, and the transition was pretty easy for me," Castle said.

Castle said he likes the free safety position, and the pressure from the defensive line makes his job a lot easier.

"I think it is a good position. Some people call it the center fielder of football. With the pressure our defensive line puts on the quarterback, it makes my job more fun," Castle said.

Castle, who raised his career interception total to nine against the Cougars, entered the top 10 list of career interception leaders in the Oregon record books.

## Dierdorf not competent for announcing

CHARLES POLLET

Why does Dan Dierdorf hate the Dallas Cowboys? Why does

Dierdorf belittle every positive aspect of Jimmy Johnson's team?

Why is Dierdorf a co-announcer for ABC's Monday Night Football? I have no answer for the first two, but I have a guess for the third.

ABC needed a former NFL lineman with little intelligence who constantly plugs, "In the trenches. That's where games are won and lost. You have to dominate the line of scrimmage if you expect to compete in the National Football League."

Almost a verbatim quote, I'd say.

I can live with that. Al Michaels carries the show by giving excellent play-by-play. Frank Gifford, who played eons ago, can relate to the audience how much the game has changed since he played, i.e., helmets lacking facemasks. But what can Dierdorf contribute?

"...in the trenches..." If that is the extent of his job, he's as necessary as a snowblower in the SilverDome.

Back to Dierdorf's low opinion of the Cowboys. Maybe it's because he played for division rival, the St. Louis Cardinals, during the height of the Cowboys' dynasty. Or maybe it's because the Cowboys have left the Cardinals with sole possession of the NFC East cellar. Or maybe it's because "Dierdorf" is an imbecile.

His negative comments during

Monday night's game against the Washington Redskins were as enjoyable as a kick in the groin.

The most vivid remark came after Redskin cornerback Darrell Green slipped, allowing Cowboy wideout Michael Irvin to catch a slant pass.

"That's the problem with this (Texas) stadium. When it rains, the hole in the ceiling doesn't let enough sunlight in to dry out the field, so you get wet, slick spots. That's what happened to Green on that last play," was basically Dierdorf's statement.

He couldn't say that Irvin put a good move on Green. He came up with an off-the-wall statement about architecture and the weather affecting the play of a defensive back.

The negativism exploded from Dierdorf as the game went on. He

failingly attempted to cover his bias at the end of the game by saying the Cowboys had proven they are a team to reckon with in the NFL. Sorry, Dan, that doesn't cut it.

Dierdorf is a has-been trying to relive his glory days (if he had any). His mentality still views Dallas as the adversary. But his attitude has no place in the announcer's booth.

He could always try his hand at television sitcoms, like many other former athletes. Oops, my mistake, you have to be able to read scripts and cue cards to do that.

Well, "Dierdorf," I guess you could dig ditches for the highway department. Then you'll be back in your beloved trenches.

Charles Pollet is sports editor of The University Daily.

The Lebanon, Ore., product said the secondary around him is talented, as well as deep.

"I think our secondary is solid, and we have some young players coming up who should do well. We have a lot of depth in the secondary," he said.

Castle and the Oregon defense are aware of the potency of the Texas Tech offense and he said the Red Raiders have a stronger rushing game than

Washington State.

"We are well aware of what kind of team Texas Tech has. Offensively, they are more diverse than Washington State, and they run the ball a lot more," Castle said.

One thing Castle mentioned was the improvement of the Oregon offense in last weekend's blowout against Washington State.

"There has been a lot of talk about

our defense, but our offense has come a long way, and our offensive line played an impressive game," Jones said.

After watching the game films from Saturday night's game, Castle said the defense played overall fairly well, but needed to improve a few things.

"After watching the game films, we played pretty well defensively, and we didn't have too many assignment

breakdowns. We did have some big plays we didn't need to give up, though," he said.

Even though this is a non-conference game for both teams, Castle said he feels the Ducks have to treat the contest the same as any PAC-10 game.

"I think when we play Texas Tech, it is just as important as any game in the PAC-10," Castle said. "I think we have to treat every game the same."

### Club Sports This Week

#### Bowling

The Texas Tech bowling club officers are in Austin this week at the Texas Intercollegiate Bowling Conference. When the officers return, more information will be made available concerning dates and locations of any bowling tournaments in which the Raider team will be participating.

#### Women's soccer

The Texas Tech women's soccer team will take on the University of Texas this Saturday in its season opener at the sports club field, located adjacent to the Student Recreation Center.

#### Men's soccer

The Texas Tech men's soccer team

will travel to New Mexico to try to improve on its 1-1-1 season record. The team lost to West Texas State 3-1 on Tuesday.

The squad will play on Saturday against New Mexico Military Institute.

#### Rugby

The Texas Tech rugby squad will travel to Fort Sill, Okla, Saturday to participate in its first match against Fort Sill.

#### Cricket

Also traveling to Oklahoma this weekend, the Texas Tech cricket team will be taking part in a tournament held in Oklahoma City.

### Sam Houston running back charged with theft

THE ASSOCIATED PRESS

ARLINGTON — Arlington Sam Houston running back Jeff Godley probably will not face jail time if he is convicted of stealing two videocassette recorders from a department store, his attorney said.

The Tarrant County district attorney's office Tuesday filed a misdemeanor theft charge against Godley, said attorney George Thompson.

"He's a first offender, and he shouldn't be punished severely," Thompson said. "He possibly stole something, then tried to run away and pushed somebody. I think it would be stretching it quite a bit to have filed robbery."

Thompson said he would ask the district attorney's office to dismiss the case. If prosecutors refuse, Thompson said he will ask that Godley be admitted into a deferred prosecution program, where he would report to county officials for six months.

*He's a first offender, and he shouldn't be punished severely.*

— George Thompson

Godley, a first-team Associated Press All-State selection last year, was arrested last week on a felony warrant charging that he stole two videocassette recorders from a department store on Aug. 2.

Godley, 17, was held at the Arlington jail about an hour before being freed on a pretrial release.

Sam Houston football coach Ken Ozee suspended Godley from last week's season opener against Grand Prairie, which the eighth-ranked Texans lost 27-7. Sam Houston dropped out of the state poll after the defeat.

Ozee said Godley will miss Friday's game against Irving MacArthur, but will be reinstated in time for the Texans' Sept. 20 game against South Grand Prairie.

## The most reusable piece of plastic on campus.

The *AT&T Calling Card* will never go to waste. You can use it to make a call from almost anywhere to anywhere. Once you

have one, you'll never need to apply for another. And it's the least expensive way to call state-to-state on AT&T when you can't dial direct.

What's more, if you get your *Calling Card* now, you'll get a free hour's worth of AT&T long distance calling\*  Of course, when you use

your *Calling Card* you'll always be connected to the reliable service you've come to expect from AT&T.  And when you get your *Calling*

*Card*, you'll become a member of *AT&T Student Saver Plus*, a program of products and services designed to save students time

and money.  So, as you see, there's only one way to describe the *AT&T Calling Card* in today's college environment. Indispensable.

**Get an *AT&T Calling Card* today, call 1 800 654-0471, Ext. 4811.**

\*Good for one hour of direct-dialed, coast-to-coast, night and weekend calling, based on prices effective 2/16/91. Offer limited to one \$8.25 AT&T Long Distance Certificate per student. Offer valid through June 30, 1992. ©1991 AT&T
