

# Contest Entries Due Friday

## THE DAILY **TORREADOR** TEXAS TECHNOLOGICAL COLLEGE

Vol. 38

Lubbock, Texas, Thursday, January 31, 1963

No. 69

### Entrants Have Opportunity To Make Tech History

By MAX JENNINGS  
Assistant Managing Editor

Zero hour—the hour when some Tech coed will etch a place for herself in the pages of Tech history and La Ventana as Miss Mademoiselle—is 5 p.m. Friday.

What does a coed have to do to become a Tech beauty?

First she has to submit an entry blank, along with a \$1 fee, by 5 p.m. Friday in Room 102 of the Journalism Bldg.

Then she has to attend an instruction session for entries at 6:30 p.m. Friday in Agriculture Engineering Auditorium. At this meeting she will be given instruction on posture and walking by a member of the women's physical education department.

25 finalists will be selected. This judging will not be open to the public.

Next she must appear at preliminary judging at 1:30 p.m. Saturday at the Ag. Eng. Aud. where

The final step is the pageant itself, to begin at 8 p.m., Feb. 9 in Municipal Auditorium. She will appear at that time in a swim suit and again in a formal.

Yes, that's all she has to do to be a beauty.

What are the rewards?

Well, best of all, Miss Mademoiselle will be featured in a full page color picture on the cover of La Ventana's Mademoiselle Magazine. She will also be featured elsewhere in the annual.

She will receive a souvenir album with pictures of the highlights of the contest.

But that's not all there is to this year's Extravaganza — not by a bunch.

The 1963 Miss Playmate will also appear. She will be chosen by judges before the Extravaganza, but will not be revealed until the Extravaganza in the Coliseum.

## ROTC To Consider Changes

WASHINGTON (AP)—The Pentagon proposed Wednesday a drastic shakeup of the reserve officers training program, streamlining the college program and withdrawing support of the junior ROTC course in high schools.

There were indications the plan would run into opposition in Congress.

Secretary of Defense Robert S. McNamara outlined the proposal to an executive session of the House Armed Services Committee.

Rep. Carl Vinson, D-Ga., the committee chairman, already has ordered a subcommittee study of ROTC affairs, and said he expected recommendations that would insure continuation of a proper ROTC program.

### Elective ROTC Course

McNamara proposed that military departments be authorized to offer an elective two-year ROTC course leading to commissions in the Army or Air Force. The two-year program would be in addition to the current four-year ROTC course.

The defense secretary said a two-year course would include 12 to 14 semester hours on the college campus, and up to 12 weeks of summer camp training at Army or Air Force bases.

If the plan is successful, he said, it "would gradually replace the four-year program on a school-by-school basis in all except military colleges."

### Wants Special Scholarships

He also called for authorization of a limited number of special scholarships, stressing engineering and physical sciences, to go to promising students who agree to accept regular commissions and serve four years of active duty.

That would be used at first only by the Air Force, to "increase the input of technically trained junior officers. If this program proves as successful as we anticipate, the Army may later adopt it."

McNamara said the compensation paid advanced ROTC students should be increased. It hasn't been changed since 1947.

The Army's junior ROTC program is offered in nearly 300 high schools, McNamara said, with 200 officers and 700 enlisted men assigned to it and a yearly cost of \$6 million.

"After thorough study, we have serious doubts whether most of this program is worth the cost," McNamara said.

FEMININE FOURSOME—These four lovelies posing so prettily are entrants in the 1963 La Ventana Extravaganza to be presented Feb. 9. They are (l. to

10,235  
STUDENTS

Registration Topples  
All Previous Springs

ALL-TIME  
RECORD

A spring semester enrollment record was set Wednesday when the number of students registered reached 10,235. This figure, determined after registration lines closed at 6 p.m., is second only to last semester's enrollment figures.

Adrian Vaughan, director of public information at Tech, speculated that some of the students had not yet finished the final step of paying the fees.

When asked about the spring enrollment, Don Renner, assistant dean of admissions and registrar, said that it was "about what was expected." He believed that two days for registration is adequate despite the occasional delays in some of the lines.

### Last-Minute Registration

Renner emphasized that registration was definitely officially over Wednesday, but some emergency last-minute cases will be allowed to register late.

Renner said the enrollment process seemed much less complicated Wednesday than it had been Tuesday. Vaughan apparently agreed with this viewpoint in saying, "The lines seemed to dwindle in the afternoon, and not many students were still trying to enroll toward the end of the registration period."

Vaughan said such a large enrollment as this one indicates that many students who go to school in the fall semester are interested in continuing their education another term.

Questioned further about the scholastic order of registration, Renner recognized the fact that athletic participants and band members are allowed a special time for registration.

### No Scholastic Difference

He explained, however, that he believed that there is not really a great deal of difference between the scholastic ratings of these students and the rest of the student body. He added that these students were able to register early in order to work out appropriate schedules to allow time for their extra-curricular contributions to Tech.

Renner also said every major institution of higher learning in the United States provides similar opportunities for athletes and band members and that Tech would de-emphasize the importance of these students only at the risk of de-emphasizing its present status among institutes of higher learning.

## Tempest In Coffee Pot Causes Stir

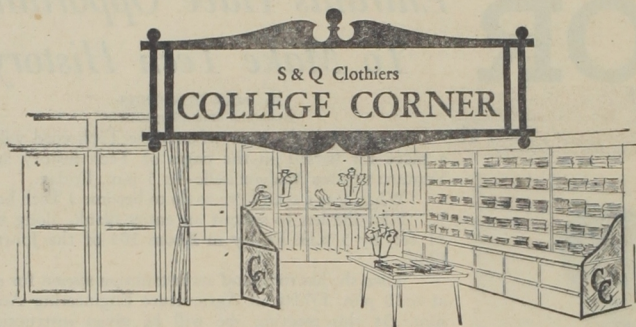

A coffee pot, a hotplate, nine fire trucks and their accompanying firemen combined at twilight Wednesday to cause a little excitement on campus.

A large group of hopeful students and other passers-by gathered outside the west wing of the Ad Bldg. as firemen combed that section of the structure for the cause of the alarm.

Three writers for THE DAILY TORREADOR, clutching copy paper and pencils rushed to the scene and entered the building. After a few short, apprehensive moments an officer appeared and explained what all the excitement was about.

A hotplate in the basement of the registrar's office had been left on and burned a hole in the coffee pot that caused all the trouble.

# Welcome to Texas Tech

Come in and browse thru College Corner, a separate department devoted exclusively to fashions created for College Men and Young Men in business, featuring Natural Shoulder Apparel.

## INSTANT CREDIT To College Students

As soon as you are registered and officially a student you are immediately eligible for a continuous COLLEGE ACCOUNT charge plan of continuous credit.

You determine your own credit limit depending upon what monthly payment is convenient with you. Then 6 times that amount is yours in the form of Credit. This is how it works:

S and Q Clothiers will extend you continuous Credit up to	\$30	\$60	\$90
If you can pay each month	\$ 5	\$10	\$15

If you want to raise or lower your Credit Limit after Your College Account has been opened, just stop in at our Credit Department.

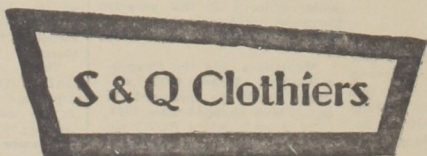

ALL YOU NEED IS YOUR ID CARD OR REGISTRATION SLIP.

## NASA, Welch Foundations Provide Aid

Texas Tech is taking applications for the six graduate training grants it received from the National Aeronautics and Space Administration.

Tech was one of 88 colleges and universities in the United States to get the grants which are designed for those studying toward doctoral degrees in chemistry, psychology or the geosciences.

Each of the grants has a basic stipend of \$2400 for 12 months. Under certain conditions an additional allowance may be made for dependency or other expenses.

### Traineeship Awards

Traineeships will be awarded on a yearly basis, to begin with the academic year starting September, 1963. Reappointment up to three years is contingent upon satisfactory performance by the recipient.

Undergraduate records, scores on aptitude tests of the graduate record examinations and recommendations constitute basis for selection.

"Students interested in these traineeships should write at once to the head of the appropriate department," said Dr. W. B. Gates, dean of the Graduate School.

The grants will go to predoctoral trainees who have chosen a graduate study research program that is space oriented. Approximately 800 students across the country are expected to participate in the program.

### Grants Awarded

The Robert A. Welch Foundation has approved two additional grants-in-aid for Texas Tech chemistry professors, bringing to six the total number of Tech faculty members holding grants from the foundation.

The new recipients are Dr. John Anderson, assistant professor of chemistry, \$36,000; and Dr. Harry G. Hecht, assistant professor of chemistry, \$42,000. At the same time Dr. Henry J. Shine, profes-

sor of chemistry, received notice of a renewal of his present grant in the amount of \$45,000.

Dr. Hecht's research is electron paramagnetic resonance studies of inorganic compounds. Dr. Anderson's project is pyridoxal phosphate containing enzymes.

### Chemistry Grants

Dr. Shine's additional grant will cover work done on the chemistry of acyloxy radicals. These radicals are fragments of thermal decomposition of certain peroxides. From it will come an understanding of the oxidation of hydrocarbons, a process of considerable interest to the oil and rubber industries. The grant provides for one post-doctoral fellow and two pre-doctoral fellows, each of whom will be working on a separate phase of the research.

Currently holding Welch grants are Dr. Fred C. Trusell, assistant professor of chemistry; Dr. Wesley W. Wendlandt, professor of chemistry; and Dr. Richard J. Thompson, assistant professor of chemistry.

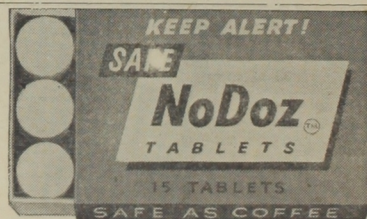

The Welch Foundation has now approved a total of \$11.5 million to foster and encourage fundamental chemical research in Texas.

### \$1,774,000 Total

The new grants and renewals, totaling \$1,774,000, involve 44 scientific investigators and 16 educational institutions.

According to a release from the foundation in Houston, the investigators whose research is being supported are working on problems of their own free selection, in direct contrast to so-called "contact" research, which so often is not research at all.

The Robert A. Welch Foundation was established in 1954 by the will of the late Robert Alonzo Welch of Houston, who died in 1952. The assets of the foundation exceed 50 million dollars.

## THE SAFE WAY to stay alert without harmful stimulants

Never take chances with dangerous "pep pills." Instead, take proven safe NoDoz®. Keeps you mentally alert with the same safe refresher found in coffee. Yet NoDoz is faster, handier, more reliable. Absolu-

tely not habit-forming. Next time monotony makes you feel drowsy while driving, working or studying, do as millions do... perk up with safe, effective NoDoz. Another fine product of Grove Laboratories.

**In Shakespearian Artistry**

**Stage Presents Hayes, Evans**

By ANDEE STRONG  
Toreador Staff Writer

There were three artists on the stage of the municipal coliseum last night as Civic Lubbock presented "A Program for Two Players" . . . they were Helen Hayes, Maurice Evans and William Shakespeare.

Before a crowded and enthusiastic house, the three talents blended to provide an exceptional evening for Lubbock theater goers.

On the stage, three steps rose to a wooden platform backed with muted hangings which gave the effect of the tapestry walls of an

ancient castle. Upon the boards strode, among others, gentle Portia, saucy Rosalind, tragic Anne . . . haunted Hamlet and Macbeth.

Miss Hayes, her contralto voice vibrant with passages from the plays of the immortal bard, conveyed the regal grace of the queens she portrayed. Yet so great is her art that when she entered the forest of Arden in "As You Like It," she became the impudent, naughty Rosalind, wooing Orlando, disguised as a boy. When reciting Sonnet 18, "Shall I Compare Thee to A Summer's Day,"

she was as a young lover in spring.

Maurice Evans exhibited his great versatility also. He changed from the slightly silly, lovesick Orlando to a sinister, crippled Richard III as easily as theatre lights turn from rose to black. The audience was stilled as in the darkness were heard the sepulchral tones of the ghost of Hamlet's father.

In *Midsummer Night's Dream*, Evans inserted the famous Shakespearean comic relief as he cavorted and mimed clowns rehearsing their lines, taking in turn the parts of the old man, the lover, a young girl, her mother . . . and a lion.

The program was an excellent blend of excerpts from passages familiar and those not as well known . . . characters both loved and hated . . . the tragedy of humanity and the comedy value of life.

**SKI QUEEN**—Sheila Helbing was named 1963 Ski Queen on the Ski Club trip to Santa Fe, N.M. Sheila is a sophomore from Richardson, a member of Angel Flight and Delta Delta Delta pledge.

**ROTC Cadets Receive Honors In Ceremonies**

Several of Tech's Army and Air Force ROTC cadets have been honored in ceremonies here recently.

Fourteen Army cadets and five Air Force cadets were commissioned Monday afternoon during exercises in the Tech Union Ballroom.

Army cadets were John L. Harst, John P. Schacht, Jimmy W. Hiett, Laurie W. Johnson, Erwin E. Meier, Ronald H. Moerbe, Carl G. Quisenberry, Don E. Richardson and Gary E. Welch.

Also included were Bryan J. Williams III, L. C. McCullough, Richard F. Malone, Lawrence G. Schmidt and Robert N. Harris.

Air Force cadets who received their second lieutenant bars were Donald H. Sledge, Tony B. Whittington, Jackie L. Wiles, John W. McCormack Jr. and Tommy L. Laney.

Addressing the Army's newly commissioned second lieutenants, Dr. Paul J. Woods, associate professor of history and a Lieutenant Colonel in the Army Reserve, admonished the group against "illusions of grandeur."

"It's up to you," he said, stressing the theme of his talk. "Whether you are a success or a failure in your military career."

Col. Roscoe B. Woodruff Jr.,

commander of the 3500th Pilot Training Group at Reese AFB, spoke to the Air Force officers on "The Need to Be Successful."

Just before finals, three Air Force ROTC students were presented awards for outstanding achievement, and seven others were honored with Commendation Ribbons for outstanding contribution during the fall semester.

During the presentation ceremonies Cadet Col. Joe W. Barnhart Jr. was recipient of the Professor of Air Science Award for outstanding all-round achievement for the fall semester.

Cadet TSgt. Jack C. McClure received the Chicago Tribune Gold Medal for his selection as the outstanding Air Science II cadet of the 820 AFROTC Cadet Wing.

Cadet AB Larry S. Franks was awarded the Chicago Tribune Silver Medal as outstanding Air Science I cadet of the same Wing.

Cadets awarded the Commendation Ribbon were Cadet Lt. Col. Joe L. Dittrich, Cadet Lt. Col. Joseph C. Giles, Cadet Lt. Col. Wayne L. Harrison and Cadet Lt. Col. George L. Metcalf.

Others receiving the award were Cadet Maj. Joedale T. Reising, Cadet Capt. Serge A. Chernay and Cadet Capt. Robert (Sarge) Klinger.

**Angels Inform About Tryout**

A general information meeting concerning tryouts for Angel Flight will begin at 4 p.m. today in Tech Union. Practices will be Monday and Tuesday while tryouts are scheduled for Wednesday, Thursday and Friday.

**SDX Meets Today To Plan Pageant**

Sigma Delta Chi, professional journalistic society for men, will meet at noon today in Room 209 of Tech Union. All members and pledges must be present, as plans for the preliminaries in the Miss Mademoiselle contest will be made. Those planning to eat lunch must sign up by 10 a.m. at the newsstand.

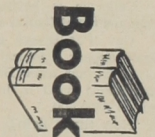

**NEW SUPER SMOOTH SHAVE**

New "wetter-than-water" action melts beard's toughness—in seconds. Remarkable new "wetter-than-water" action gives Old Spice Super Smooth Shave its scientific approximation to the feather-touch feel and the efficiency of barber shop shaves. Melts your beard's toughness like hot towels and massage—in seconds.

Shaves that are so comfortable you barely feel the blade. A unique combination of anti-evaporation agents makes Super Smooth Shave stay moist and firm. No re-lathering, no dry spots. Richer and creamier... gives you the most satisfying shave...fastest, cleanest—and most comfortable. Regular or mentholated, 1.00.

# Scarlet Scatterings . . .

by Charles Richards

Not even registration can compete with a fire when it comes to making a newspaperman's hair turn gray.

Especially when it comes just as the front page has been laid out and deadline is not far off.

There wasn't a fire Wednesday. But there almost was. Alarms sounded from all directions about 7 p.m., with nine

Richards

fire trucks roaring in from two Lubbock stations. Destination? The Administration Bldg.

I grabbed a couple of sheets of paper, ran over at full speed to see firemen running in with hoses.

I got there about the same time as two other staffers on the paper and a couple of photographers. And we all found out the trouble at the same time.

A coffee pot was left on in the basement under the registrar's office. Net damage was a smoldering coffee pot and a slightly damaged hot plate.

Ho-hum.

—SS—

California is having a hassle right now that makes Tech's room and board figures seem like Salvation Army rates.

Gov. Pat Brown is asking for a governor's mansion, which would appear a logical enough demand. The only controversy involved is that after Brown finished adding up the different trimmings he'd need in his little estate, the bill totaled something around \$875,000.

Now that's livin'!

—SS—

Of course, when it comes to spending, no one can outdo Texans.

And that's precisely why the words are flying back and forth on the floor of the Texas Legislature right now.

Some are criticizing the purchase of golden-colored carpet in the House, while others are concerned about the \$7,400 worth of drapery that has been put up.

You can see easily enough why Texas Tech and other schools need to trim their budgets as closely as possible. With too much in our request for air conditioning, faculty salary increase or other inconsequential items, the solons in Austin would have to walk on plain-colored carpet.

## LITTLE MAN ON CAMPUS

"YES I DID WANT TO BEA ENGINEER—BUT I THINK NOW I'D LIKE SOME KIND OF MAJOR WITH CLASSES CLOSER TO TH STUDENT UNION."

Serving Texas Tech Since 1925

## Support Needed

# Outside Help--Appreciated?

It is not often that an off-campus group is responsible for anything that is of more than passing benefit to Texas Tech.

That only serves to accentuate the rare occasions that such an event does come along. Such an occasion is Saturday.

The park and recreation department of the City of Lubbock, ordinarily confined to planning, constructing and maintaining city recreational areas, is sponsoring an indoor track meet in Municipal Coliseum for the second straight year.

A special group operating within the department—the Lubbock Amateur Athletic Union—has already announced a large number of highly-rated athletes who will appear here this weekend, and the list has been growing daily. The meet promises to be as explosive and spectacular as last year when two world records were tied.

Tech students will not be admitted free to the meet, nor will Texas Tech share in the profits. It is an event, however, that could help "sell" Texas Tech to the many hundreds of persons who will be coming into Lubbock especially for the meet.

Efforts such as this by the Lubbock AAU too often go without due praise. It is help such as this which is an invaluable aid to Tech in keeping its curricula—athletic or otherwise—at a high level.

—Charles Richards  
Acting Editor

## Then Abolish It

# Pay Your Poll Tax!

The freedom to vote in Texas is burdened.

It has been burdened since 1902 when an amendment requiring the payment of a poll tax in order to vote was added to the state constitution.

Today is the last day to pay the poll tax, and Techsans should pay it. But not because it is a good tax.

Last year Texas citizens voted in a referendum to do away with this law which suppresses our voting rights. In all probability the Texas Legislature will bring the question before the public this year in the form of a constitutional amendment.

Techsans should pay their poll tax in order to win the right to vote against this stigma on voting rights. The result in this election should be an overwhelming answer: **abolish the poll tax in Texas.**

The poll tax is a form of suppression sugarcated with the word "revenue." But underneath this sweet cover-up, the poll tax is only a barrier designed to keep certain racial groups from voting.

The poll tax smacks of backwardness and past prejudices. State after state has repealed poll tax laws until only Mississippi, Arkansas, Alabama, Virginia and Texas are left to claim the dying remains of a law which should be buried with the past.

Some tottering politicians cry "revenue, revenue," and it is true poll taxes bring in some

revenue, part of which goes to the county school system and part to the state. In 1960, poll taxes brought in \$2,239,189.

But is two million dollars worth it? Does the money brought in by the poll tax compensate for the thousands who stay away from the polls because they will not or cannot pay \$1.75 to vote?

The answer should be "no." And this can be corrected very simply—by voting "no."

The League of Women Voters will be in Tech Union today between 10 a.m. and 1 p.m. Lubbock County students can pay their poll taxes right on campus.

An unmarried student eligible to vote, but whose home is in another county, can send a check for his poll tax, along with his birthdate, home address, how long he has resided in Texas and his home county back to his county seat. It must be postmarked before midnight tonight.

Those who are 21 years old anytime after Jan. 1, 1962, are eligible to claim an exemption from the poll tax for their first vote. The exemptions can be requested 30 days before the election in which they plan to vote.

The important thing to do, in any case, is to be sure you are eligible to vote. Eligible to vote against backwardness and suppression. Eligible to vote against the poll tax.

—Jeannie Bookout

## News Analyst Comments

# Negro Situation Improves

By J. M. ROBERTS  
AP News Analyst

Two Southern governors and two Southern Negroes have, within the past few days, taken the route of courage along a road which for much of its way has borne only poorly discernible signs of its destination.

It goes much farther back than Supreme Court decisions about racial segregation and other civil rights. It began with the change from an almost solely agricultural society to an industrial nation.

Production and consumption are the twin keys to industrial progress.

Because of ingrained ways of thought, the South has drastically limited participation of a large part of its population (the Negro) in both industrial production and consumption. There are various causes for this,

causes which are seldom understood except by those who have lived and worked there, and not by any means by all of them.

Among these causes are differences in color and ancestral culture; a need for participation of the Negro in production only since industrialization began to outgrow the white population; a lack of preparation by both Negroes and whites for development of Negro skills; and an actual shortage of money for general educational purposes such as is required for philosophical changes.

Politicians have played upon ignorance and upon ingrained tradition which is based upon some very real grievances borne by people of the South who are still alive to remember.

But as knowledge and toler-

ance progresses, the demagogues begin to lose their holds.

The other day North Carolina's Gov. Terry Sanford told the state press association, "The time has come for American citizens to give up this reluctance to employ Negroes, to quit unfair discrimination, and to give the Negro a full chance to earn a decent living for his family and to contribute to higher standards for himself and for all men."

That means the time has come for more people in the South to become both producers and consumer, as machinery diminishes the need for them on the farms.

The idea is by no means new in Southern business and intellectual circles. But so far as I can recall Sanford is the first important Southern political leader to express it.

# Student Council Slates Key Activities

By MAX JENNINGS  
Asst. Managing Editor

will also begin work soon in co-operation with the placement office.

A possible change in campus traffic flow, a program of academic recruiting, plans for a convocation, the spring election and the allocation of funds to various campus organizations were outlined Saturday as the key items on the Student Council spring slate of events.

James Cole, agriculture representative to the Council, and also head of the SC Traffic Committee, Monday painted this picture of an

● Under the heading of recruiting, Cole said that work by the Council on both athletic and academic recruiting will continue, but that "the big emphasis this spring will be on academic recruiting."

This year's Academic Recruiting Committee, headed by Ginger Butler, will be primarily concerned with bringing members of high school National Honor Societies onto campus, and it will also make

students throughout the world.  
● "As far as the Student Council can see," Cole outlined emphatically, "the name change will not be an issue this spring. Apparently no further action will be taken until the ex-students reach some agreement."

Cole did say, however, that, "The Council foresees the school years '63-'64 will see a lot of activity as far as the name change is concerned."

● The honors program will also come in for its share of attention by the Student Council, Cole said. "We are going to help it in any respect we can."

● Cole said that from information obtained from Karen Anderson, one of the major concerns of the Student Council during the spring semester will be that of student morale.

Cole said this is always a concern of the Council, but this spring it was expected to be especially important because of the "athletic situation and the unofficial tightening of scholastic standards."

● Also important on the

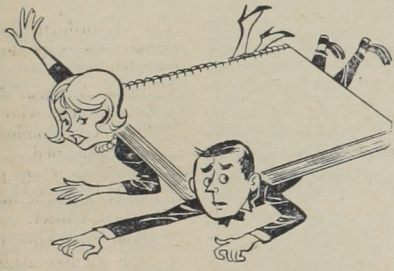

Council agenda for the semester are several conventions to be attended by Council members.

Among these are a conference on desegregation to be at TCU and a Texas Intercollegiate Student Assn. meeting designed for "the pooling of ideas."

"As far as we can tell, there will be no parking problems on the Tech campus this spring," Cole explained, delving for a minute into the oft-mentioned parking situation.

The Student Traffic Safety Subcommittee, which sponsored TACSOR, will begin Thursday afternoon to re-evaluate the campus traffic situation as it now exists, Cole said. He said there is a definite possibility that a change will be made in traffic around the circle in the center of campus.

This change, he said, could involve stopping traffic around the circle for 10 minutes between classes.

COUNCIL FACES WEIGHTY PROBLEMS

active program for the Student Council for the next few months.

Cole, a junior from Slaton, said one of the main items facing the Council in the near future is the allocating of funds by the Council to various campus organizations.

According to Cole, these funds, which will total from \$16,000-\$18,000, will be distributed by the Allocations Committee, headed by Kenny Abraham.

These allocations, said Cole, are "based on the relative good they do for Texas Tech and the organizations' need for funds."

● The summer employment program, under a Council committee headed by Tommy Morris,

tours to contact some academically talented students.

● The spring elections, at which time new Student Council officers will be chosen, along with class favorites and Mr. and Miss Texas Tech, were also singled out by Cole as significant projects in the Council program.

● The Council, Cole said, will also assist with the model U.N., to be in the latter part of March, although the Union probably will be responsible for much of the work.

● Immediately after that, Cole said, the Council will sponsor the World University Service Drive, which will be a campus-wide drive for funds for needy

# Harbinger Features Top Talent

By NANCY MILLER  
Toreador Amusements Editor  
Look, look, it's a new Baccanal. No, no, it's the spring Union calendar. No, it's a new cover design for Mad magazine. No, it's the new HARBINGER.

To those new students, and the unlitary contingent of the stu-

dent body, the new HARBINGER is unlike anything ever seen before. The cover is a startling black pink and orange, the printing is slick and professional, and the size is that of a regular magazine instead of the usual college-bulletin measurements. The HARBINGER has a fresh, new face, and the

result is arresting, even though some of the contributors still insist on their names being in the lower case.

What is inside the new cover ranges from the excellent to the —well, let's say the n. s. so excellent. The lead article is Jim T. Richardson's, "Thoughts While Crossing the Desert," the second-place essay award winner. It begins with a stark picture of the desert. But along toward the middle, it gets philosphic and is dotted with paragraphs containing sentences that make the reader wonder what Richardson's talking about. At the bottom of the page is one of those lever-case things without a title by I. b. cebik that makes the reader wonder not only what he was talking about but what he was thinking about as well.

I. b. cebik is also in evidence on the following page with two more poems, also nameless. In these, he succeeds in creating images; but images, like smoke, drift away, and the reader longs for something more substantial. Also on the page is the magazine's first poem by a girl who is undoubtedly the pos-

essor of a great talent, Karen DeWe's. Titled, "Roses From Stone," the poem is subtle, with a breathtaking quality and attention to detail.

**SHORT STORIES**  
Following the poetry is the third place short story, "Kaleidoscope," by Beverly Zeleny. It is good. It misses excellence only because the characters are rather stereotyped.

The first place short story, "Long Return Home" by James Ivy, hit excellence. It is well thought out, well-planned, and well-written. It is one of the selections in the HARBINGER that makes it deserving of the title of a literary magazine.

And now we've progressed to another poetry section. The passing of Robert Frost has left the nation without a poetic spokesman, and the gap has many candidates if the poetry of Hunter Heath III and M. E. Strother are any indication of the nation's poetic state of mind.

"Ricardo" and "Sport" by Hunter Heath III and "For the Humble Passed" by M. E. Strother are good in a Frosty sort of way, but they lack individual style. Joan

Strandtman's "Masques" has an intense quality, but it's topic is to styeleized.

**BEST ESSAY**  
"No Loves Had She" by Phyllys Axtell, rightly deserves the first place award. It is clear, and the humor of the author shines through in several places. Bill Heard's "The Shell" has the delicacy and fragility of its name. "My Hotel," Carol Ann Norman's second-place poetry winner is rather vague and confusing, but Arthur Chandler's, "When My Days Were Blue" is a rarity—a thing of absolute beauty.

It's a shame that the HARBINGER should have to include essays, but Hunter Heath's third place essay, "An Unscholarly Explication of John Donne's SONG," overcomes the title of "essay" with its readability and clear writing. Joan Strandtmann's "Esperanto" is foggy upon first reading, clearer on the second and rather good on the third. But Karen Elaine Moore's "The Status Symbol" remains foggy from the first through the hundredth reading. Oh well . . .

Hunter Heath's "Maddelle" seems pointless, and rather Shakespearean. Libby Malley's "Extending Papini's Corridor" reads like something out of a sociology book; but then it's an essay, and maybe they're supposed to be that way. But G. Edward Snow's "A Reminiscence" shines through as one of the top stories ever to appear in the HARBINGER, and makes it worthwhile to buy the magazine.

**MORE POETRY**  
And now we're back in the poetry again. "Poetess" by Joan Strandtmann is vague. Arthur Chandler's "Aftermath" makes one wish that wine really led to the blackberry winter of sleep instead of the dry heaves and a hangover.

*Assignment: put more pep per pound into Ford-built engines*

**Result: New family of lightweight powerplants . . . including a new V-8 that weighs 110 pounds less than the comparable V-8 it replaces**

In our search to provide good performance with lighter powerplants, Ford Motor Company engineers and foundrymen have pioneered new techniques that now let us cast our engine blocks with such precision that much lighter engines are made possible.

New materials used to make cores and molds and new casting methods enable us to make engine parts with walls as thick as necessary—but no thicker. This eliminates weight of extra material which must be used to provide adequate strength with less precise casting methods.

Reducing engine weight through precision casting means more performance per pound—and since

lighter engines mean overall car weight can be reduced, better fuel economy results.

Another assignment completed—another Ford First—and one more example of how Ford Motor Company continues to provide engineering leadership for the American Road.

*Curtain Lifts On Hellman's 'Toys'*

**AFTER THE FRAUD**—Lily, played by Irene Hicks, attempts to aid her badly beaten husband, Julian Berniers, played by Charles Benton, in the speech department's production of "Toys in the Attic."

—Staff Photo

A story of sisterly love and sudden wealth will be presented by the Tech speech department at 8:15 p.m. today in the speech auditorium.

"Toys In The Attic," a drama by Lillian Hellman, tells the story of two aging sisters who are threatened by the loss of their main joy in life. Their formerly dependent younger brother suddenly becomes wealthy, and the new money makes him independent of his sisters and their commonplace jobs.

The sisters, Anna and Carrie, discover that Julian and a lady friend of long standing got the money by pulling a real estate fraud on the friend's husband. Carrie then influences Lily, Julian's psychopathic young wife, to call the husband and disclose the scheme.

Author Hellman's message is presented through the character of Albertine Price, Lily's mother.

Members of the cast are Linda Eberly as Anna Berniers, Charles Benton as Julian Berniers, Glenda Ferguson as Carrie Berniers, and Carol O'Connell as Albertine Price. Others are Barry Corbin as Gus, the ice man, and Irene Hicks as Lily.

"Toys In The Attic" will also be presented at 8:15 p.m. Friday, Saturday, Monday, Tuesday and Wednesday in the speech auditorium. Admission is \$1.00 per per-

son. Tickets will be on sale at the door, but prior reservations will receive first consideration. Reservations may be made by calling Ext. 2152 or by obtaining tickets at the box office in the Speech Bldg.

**YWCA Offers New Courses**

Foreign students interested in polishing their knowledge of the English language may take an English course at the Young Women's Christian Assn., 1641 Broadway, beginning at 6:30 p.m. Tuesday.

Pre-registration is any time prior to Feb. 5. It is not necessary to have Y-membership in order to take the course. Classes will be taught by Anna Jo Pendleton, formerly head of the Tech speech department. There is no course charge.

Classes will meet at 6:30 p.m. every Tuesday as long as the students are interested in studying the language.

French, German and Spanish classes will begin at the YWCA at 7:30 p.m. Monday. Both beginning and advanced classes are offered at a charge of \$10 for eight lessons. Classes will be 7:30-9:30 p.m. each Monday.

# CAMEL

## EVERY INCH A REAL SMOKE!

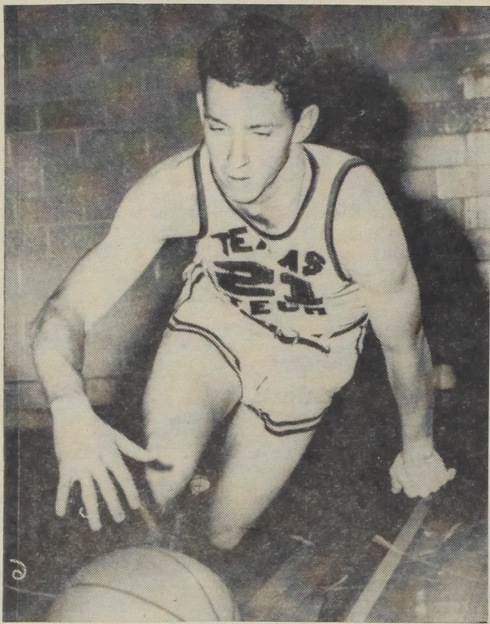

Those in the know go for Camel... a real smoke... for real smoking satisfaction. Get the clean-cut taste of rich tobaccos. Get with Camel. Every inch a real smoke... comfortably smooth, too!

**The best tobacco makes the best smoke.**

**JIM ARENDER—World's Champion Parachutist. His cigarette? Camel.**

**SCRAPPY FIGHTER** — Mike Gooden at 5-9, often seen dashing around the legs of giant opposition chasing the ball, will be available for play Saturday when the Raiders meet Baylor in Waco. Gooden was high point man last Saturday night against UCLA with 21 points.

## Lynch Vividly Recalls Game With Baylor

Charley Lynch, now helping coach Texas Tech, slated to meet Baylor in Waco Saturday night, never will forget his game in the Bears' lair as a player.

A hastily-arranged bus trip over icy roads after the Raiders' plane was grounded provided only a minor hazard to Tech's peace of mind that Feb. 11, 1958. Baylor furnished the big nightmare.

Texas Tech had led all the way after the first six minutes of play—even by as many as 10 points with eight minutes remaining. But Baylor irresistibly crept up to within a single point, 71-70, with 27 seconds remaining.

Baylor delayed 14 seconds then sent Tom Kelly in for a driving lay-up that put the Bears ahead 72-71.

With 13 seconds showing on the clock, Lynch passed in to Gerald Myers. The 5-10 floor general wove through the entire Baylor team—trying to avoid a foul—and sank a lay-up putting the Raiders ahead 73-72. Fouled on the shot, Myers sank a free throw to give the Raiders their 74-72 margin with one second left.

## Cronin Reveals AL Schedule

BOSTON (AP) — An unusual morning game, a morning-night twin-bill and a record 428 night contests spice the 1963 American League baseball schedule announced by President Joe Cronin Wednesday.

The junior circuit will engage in 38 more night games this year than it did last season, playing 52 more arc games than in 1961, when the league expanded from 8 to 10 teams.

The morning game is slated for May 30 when Minnesota entertains Washington. The morning-night doubleheader will be at Minneapolis-St. Paul Sept. 2, Labor Day, with Kansas City the visitor.

The traditional Presidential opening game is set for April 8—one of the earliest starts in history—with the Washington Senators playing the Baltimore Orioles.

# ENMU Sinks Raiders

Texas Tech's swimming team had its season record evened at 1-1, Tuesday night, when the tankers from Eastern New Mexico University topped the Raiders, 60-35, in a dual meet in Portales, N.M.

Phil Simpkins, Houston sophomore, had a part in setting three new pool records for the Red Raiders in a losing cause. Simpkins was first in the 200-yard free style with a new record of 2:57.2; top man in the 200-yard free style at 51 and was a member of the 400-yard free style relay team which set a new standard of 3:33.8. The other members of the record team were Terry Schmidt, Bill Spahn and Dick Haase.

Other Tech swimmers and their places in events were:

220-yard free style—Ron Grim, third.

50-yard free style—Schmidt, second and Haase, third.

200-yard butterfly—Grim, third. 100-yard free style — Haase, third.

200-yard back stroke — George Steele, second and Jon Kott, third.

500-yard free style—Grim, second.

Springboard diving — Elton Floyd, third.

200-yard breast stroke — Bob Smith, second.

200-yard individual medley — Smith, second.

Swimming coach Jim McNally commented that the 200-yard back stroke was definitely an upset win for Eastern New Mexico, because Steele is one of the top back strok-

ers in the southwest. McNally also said he was pleased with the work of Bob Smith, Pearland junior, who, according to McNally, "is one of the most improved swimmers on the squad." Smith should be far enough along to qualify for the Southwest Conference final, McNally added.

The race for the 200-yard butterfly was a close one all the way with the top three finishers battling to the wall, but Grim was awarded third place.

Friday night the Raiders will meet Southern Methodist University at Dallas. According to McNally, SMU has the finest team in the southwest, and possibly the eighth or ninth ranked team in the country. They have lots of depth, are strong in all phases of the sport and are definitely favored to take the conference title, he said.

Saturday night the Raiders move up to Norman, Okla., to engage Oklahoma University and the University of Colorado in a meet. Last year OU handed Tech its worst defeat of the season, but the Raiders are improved and eager. Colorado is extremely strong in the distance divisions, while Tech reigns in the sprints.

## Tech Enters Ten In Indoor Meet

Ten athletes will represent Texas Tech in the second annual Lubbock Indoor Track and Field Meet in the Coliseum here Saturday night.

In the meet are 11 colleges and universities, 4 junior colleges, 26 high schools, 5 girls teams, and 4 junior high schools.

By event, Coach Don Sparks' entries include:

Mile — Jerry Brock of Fort Worth.

1000-yard run—Gary Don Bove of Happy and, tentatively, Eldon Mongold of Amarillo.

500-yard dash — Noel Carter of Seminole.

600-yard dash — Norman Donelson of Stanton and, tentatively, Mongold.

60-yard dash—Richard Vogan of El Paso, Walter Cunningham of Galena Park, Rodney Smith of Rising Star.

High Hurdles — Ronny Biffle of Anton.

Mile relay — To be chosen from Bove, Vogan, Cunningham, Carter, and Donelson.

Broad jump—Vogan.

High jump — Twink Terry of Amarillo.
