Green Leaf Weather...

JANUARY BLOSSOMS—All the barren trees on the Tech campus just didn't seem to match the unexpected January "heat wave" so Karen Day, Midland senior, and Chi Chi Davis, Abilene sophomore, decided to do something about it yesterday. Even though there won't be any real green leaves on the trees for several more months, the U.S. Weather Bureau expects the unseasonably warm temperatures to remain for a few days, with the West Texas winds picking up this afternoon.

Registration Permits Ready After Jan. 13

Permits to register will be available for currently enrolled students after Jan. 13 due to a simplified registration method which will cut down on the number of forms usually required prior to registration.

Permits for currently enrolled students have already been processed. However, new or former students must accomplish requirements for admission or readmission.

To apply for admission, undergraduates should report to room 162-A and graduates to room 150 of the Ad Bldg. They will be issued a registration packet containing all basic source forms including the permit to register and housing validation forms.

Complete Forms

These forms must be completed

Peace Corps Slates Exams

Peace Corps placement tests will be given at 8:30 a.m. Saturday in the Lubbock Post Office Building, room 16A.

Completed Peace Corps questionnaires should be brought to the testing center by all interested applicants. Questionnaires may be obtained from the post office, the Peace Corps liaison worker on campus or through the college placement office.

Applicants must be American citizens, at least 18 years old. Married couples are eligible if they have no dependents under 18.

and returned to the registrar in the Ad Bldg., room 160, before the new or former student can obtain a valid permit to register.

Registration permits will be distributed to on-campus students through the residence halls. Off-campus students can get theirs in the Ad Bldg., room 165.

Undergraduate students who will complete degree requirements in January and desire to enroll in the Graduate School must meet the requirements for admission to the Graduate School through the office of Dean of Admissions and Registrar in Ad Bldg., room 150. New registration packets for completion by the new graduate students will be issued to those meeting admission requirements.

Number Reduced

Although some information will need to be duplicated by currently enrolled students, the number of forms to be completed will be reduced over-all under the new procedure.

All students, including those who have already completed a "Form H," will be required to complete a "Form H" during the registration process and turn it in to the final checker.

As a part of the revised procedure, registration permits must be validated by the Office of Dean of Men or Women before they are issued and students must sign in the space provided before they can obtain "Form B" (departmental trial schedule) to begin the enrollment process.

None Re-Made

"Students are warned not to lose their permits or mutilate them, since duplicates will not be pro-

cessed until the last day of registration," Don Renner, assistant dean of admissions and registrar said.

Any student who needs to report a change in name or mailing address for grades should do so with the dean of registrar immediately following registration.

If a student wishes to transfer to another school, he should check with the dean of the school in which he is currently enrolled and complete an application for transfer. He must have both the permit and application for transfer in order to register during his assigned time.

Class schedules are available in the registrar's office.

Seniors planning to graduate in May should consult their catalogue to be sure they meet all requirements, Renner added.

Artist Series Starts Tuesday

Rabbi Alexander Kline of the local Jewish synagogue will present a series of 10 lectures on outstanding artists beginning Tuesday in the museum auditorium.

Lectures featuring the topic "Post-Impressionists Acrole De Paris" will be conducted Tuesdays from 10-11 a.m. through March 16.

Student rates will be \$5 for 10 lectures. Rates for the general public are \$2 for each lecture. The art seminar is sponsored by the Women's Council of West Texas Museum.

—In Legislature—

'Uphill Battle' Foreseen By Rep. Quilliam

STATE REPRESENTATIVE Reed Quilliam, who pulled a name-change surprise out of his hat shortly before the Christmas holiday, is recording a favorable reaction to his proposed name, "Texas Technological College and State University."

The Lubbock legislator intends to introduce his bill for the "compromise" name early in the session which opens Tuesday in Austin.

"I expect a terrible uphill battle because of the inclination to go along with the Board of Directors," said Quilliam, "but I have high hopes that the legislature will see the merit in adopting a name for a leading state institution which reflects the broad academic offering of that institution."

In order to have approved a name which they feel will be best for the school, Quilliam urged students, faculty and ex-students to send petitions and letters to the state legislature. Through this correspondence legislators can have a better understanding of the attitudes of Techsans about the name change.

Quilliam says a fight in the legislature over the name change could have some ill effects on the college, but, he said, this aspect has been vastly overestimated by some people.

Far greater damage could be done to the school in the long run by saddling it with an inappropriate name, he said.

★ ★ ★ ★ ★

New Group Will Meet To Air Name Issue

The newly-organized Committee of Interested Students will meet to discuss the name-change issue at 7:30-8:30 p.m. today at the Episcopal Youth Center.

Guest speaker Dr. Keith Marmion, head of the Civil Engineering Dept., will discuss the issues at present and the progress of the Joint Name-Change Committee.

New Organization

The Committee of Interested Students is a relatively new organization composed of approximately 20 students who are interested in getting more Techsans to better understand the controversy so a decision can be reached.

"Our organization will work in connection with the Joint Name-

Change Committee," said Phil Roberts, chairman. "We favor the name Texas State University or a compromise name. We feel students should take a more direct part rather than let graduates and the Name-Change Committee voice their opinions for them."

Future Plans

The success of the committee and future plans will be largely determined by tonight's meeting, according to Roberts.

Petitions for proposed names will be available for students to sign during the meeting, which will be open to the public. The main purpose for the meeting is to publicize facts concerning the name change.

Students Protest Plan Of Aggie 'Supervision'

ARLINGTON, (AP) — State Rep. Jack McLaughlin of Fort Worth told a protest rally at Arlington State College that the "issues facing the legislature are now clear cut."

McLaughlin told the rally called to protest plans proposed by Texas A&M University which would draw ASC under close supervision of the parent facility that the main question facing legislators is "what is best for the college?"

An estimated 2,500 students, ex-students and Arlington citizens heard the speaker warn that demonstrations "will not be of any help at this stage of the controversy."

"It could hinder the college

and could block passage of legislation. Go back to your classes," he told the students.

Dr. J. R. Wolfe, president of Arlington State, said Tuesday night the proposed Texas A&M system reorganization "is a logical one," but he assured student Council members only, Wolfe said he had "assurances of autonomy" from someone he declined to name.

Later, at a session of college department heads, he said ASC would remain free to set its own curriculum and prepare its own college catalogue.

Chamber Music Scheduled

The accent will be on contemporary composers when the Music Dept. presents the fourth in a series of 10 chamber music presentations Friday at 8:15 p.m. in the auditorium of the West Texas Museum.

The performance will feature Francis Bowen, instructor of flute and music theory, in a performance of "Sonatine" by Pierre Boulez.

Bowen, who held a Fulbright Scholarship to the Amsterdamsch

Conservatorium where he was a member of the Netherlands Wind Ensemble, will be accompanied by Mary Helen McCarty.

The program will open with a "Quintet" by Hans Werner Henze written in 1952. This work will be performed by the Faculty Woodwind Quintet, composed of Bowen; Keith McCarty, clarinet; Benjamin Woodruff, oboe; Anthony Brittin, horn; and Richard Brown, bassoon.

The Quintet made its interna-

tional debut in television performances in Mexico City last spring and boasts members who have been heard as individual artists in Canada, Europe, and throughout the United States.

Also to be presented will be Bela Bartok's "Contrasts," performed by Miss McCarty, Virginia Kellogg and Keith McCarty.

There will be no admission fee for the performance.

Footnotes

By MILLER

What has black hair, brown eyes, countless women, and is NEVER seen in Lubbock?

The man from U.N.C.L.E. Napoleon Solo — in real life, cleverly disguised as actor Robert Vaughn — is the hero of this wildly improbable series which is aired on NBC every Tuesday at 7:30 p.m. As Agent 11 for the United Network Command for Law and Enforcement, Solo is faced with a variety of situations, all involving master criminals, that would make law-abiding citizens turn pale if they were for real.

Escapes Tortures
Fortunately, they're not. "The Man From U.N.C.L.E." is strictly a comedy-suspense series. Solo gets away every time, escaping ghastly tortures and near-extinction by virtue of his wit and quick thinking and with the help of his fellow agent, Ilya Kuryakin (David McCallum). It's all good, clean fun.

And it's an enjoyable series — for the lucky people who get to see it.

Unknown Here
But "The Man From U.N.C.L.E." is unknown in Lubbock. And it isn't likely that things will change until next year.

Like stations in many other cities, the Lubbock television stations are combination network setups. Both stations are able to buy programs from two networks. "The Man From U.N.C.L.E." is an NBC program that just happens to fall in a time slot when the station that carries NBC programs is on ABC time. And so instead of seeing Napoleon Solo, Lubbock viewers get "McHale's Navy."

Another Slot
"The Man From U.N.C.L.E." is not the only program to suffer this fate. In a vice versa situation on Friday, ABC's "The Addams Fam-

ily" falls in an NBC time slot.

It's a shame, too. "The Addams Family" is a rather clever series which is loosely based on the Charles Addams cartoons. All the characters are there — Morticia (Carolyn Jones), Gomez (John Astin), Lurch (Ted Cassidy), and an array of guest stars.

Not Insurmountable
But the problems involved in getting all the network shows in Lubbock are not insurmountable. All it would take is a third television station. Then all the stations could stick to one network. Or enough pressure on the existing stations to cause them to buy NBC time when "The Man From U.N.C.L.E." is on and ABC time when "The Addams Family" is scheduled. Meanwhile, we'll just have to wonder what Napoleon Solo is doing on Tuesdays.

THOUGHT FOR TODAY—I love my country better than my family; but I love humanity better than my country.

—Fenelon

A Man And His Beliefs

THE DAY BEFORE CLASSES were dismissed for the holidays State Rep. Reed Quilliam announced his intention to oppose "Texas Tech University" in the legislature.

In taking such action he said, "I cannot . . . shackle it (Texas Tech) with a name I feel would do serious harm."

Rep. Quilliam also announced he would introduce a bill for a compromise name such as Texas Technological College and State University.

"I do not claim this to be the ideal name, principally because of its length, but I think it is the best possible name to obtain the legitimate objectives of a name change," he said.

Rep. Quilliam also disagreed with the argument that the Board of Directors has the final authority on the name change.

He said that since the state legislature voted the college into existence, voted on its location and, finally, voted on its name, he felt the legislature had the authority to change the name.

Quilliam added he thought other equally important members of the college community, such as the students, faculty and ex-students had a right to voice an opinion.

Quilliam, who is serving a third term, received statewide attention two years ago when he fought against a bill to teach a "special government course" of political indoctrination in the Texas public schools. His amendment to the bill passed overwhelmingly.

During his first term he was voted the most outstanding freshman legislator.

We believe that by his courageous action on the name change, Rep. Quilliam has again demonstrated his outstanding qualities.

We admire a man who is willing to stand up for what he believes is right and fight against the powerful minority that is making a grave mistake.

Although other local legislators have said they know "TTU" is not the best name for this university, Rep. Quilliam seems to be the only one with the political courage to do what he thinks is right.

LITTLE MAN ON CAMPUS

"NOT ONLY ARE HIS EXAMS TOUGH—I UNDERSTAND NO STUDENT HAS EVER BEEN ABLE TO SWIPE A COPY OF HIS TESTS."

Archeologist Reports Destruction In Texas

AUSTIN (AP)—The march of progress and ambitious relic hunters are fast destroying the record of the past in Texas, according to Dr. E. Mott Davis, director of research in Anthropology at the University of Texas.

"Signs of prehistoric man are to be found throughout Texas, and here as elsewhere they fascinate layman and specialist alike; man has always been intrigued and challenged by his own history," Davis wrote in an article for the official publication of the Texas Memorial Museum.

"There have been Texans for at least 12,000 years, but we hear less about them than about Cro-Magnon or Neanderthal Man because they have been little studied compared to those much-investigated foreigners."

But archeology is often confused with the popular hobby of relic-hunting, Davis said. He defined a relic-hunter as one who "wants objects—things he can amass and perhaps swap, sell, or buy—and of course, brag about." On the other hand an archeologist, either amateur or professional, is after information and evidence of specific past human activities.

"The archeologist who finds a site after the 'pot hunters' have been there is in the same plight as the legal investigator who reaches the scene of an accident or a crime after the curiosity seekers have finished swarming over the place," said Davis. "In both cases, not only are many objects gone, but the original arrangement of things has been stirred up so that it is no longer possible to reconstruct much of what went on."

Davis' article cited some specific examples:

In 1962 highway work on the north side of San Antonio uncovered a rich archeological site. Museum workers were able to carry on limited excavations before the site was destroyed "but was much hindered by spectacular public plundering of the site."

The Amistad Dam and reservoir on the Rio Grande above Del Rio will inundate more than 300 archeological sites. An archeological salvage project is underway but "most of the richer and most important sites have been objects of relic-hunting for many decades and this destruction at an increased pace today."

The Belton Dam is to be made higher so the level of Belton Lake can be raised. Archeological salvage workers found that "relic-hunters have ignored No Trespassing signs, broken down fences, uprooted trees, and generally so violated the rights of the land owners that most of the ranchers in the area now refuse to allow any interested in archeology on their land. . . Scientifically, the area is nearly a total loss."

In northwestern Austin a large pre-historic burned rock midden, or refuse heap, is being engulfed by an expanding real estate development. Preliminary tests showed it was the camp ground of Indians several thousand years ago. "More recently, a dealer in heavy machinery who is a relic hunter took a bulldozer and spread the midden out over a large area so that he could walk around and hunt for arrowheads. Nothing is left now in the way of useful information."

On the other hand, a real estate developer at Jamaica Beach on Galveston Island uncovered an Indian burial ground in 1962. With the help of the developer the site was fenced off and guarded while museum and archeological workers could carry on excavations. "Some 20,000 persons visited the site while the digging was going on. A permanent exhibit has been made on the site, which attracts wide interest."

Davis recommends that Texas adopt an antiquities law to stop archeological plundering. He recommends that the state start immediately to salvage archeological site on highway rights of way and in state parks and game preserves.

"And there should be a State Archeological Commission whose first task would be to survey the situation in Texas with regard to its antiquities, and to recommend steps to be taken for their conservation and development," Davis said.

VOICE

Newth Discovers Truth In Colorado

Dear Mr. Editor:

Until recently I had been inclined to view the importance of the name-change issue as being stressed unnecessarily — Texas Technological College seemed an "adequate" name.

But during my tour with the Texas Tech Finance Association in Denver, Colo., this past week I became aware of non-Texans' lack of understanding of the class of "college" that Tech is.

The guide (an engineer) who led the tour through Gates Rubber Co said, "I see that you are all from Texas Technological College—are you all engineers?"

We immediately rallied to the defense of our university with explanations for the misleading name. Other executives in financial institutions visited by the Association seemed equally confused by the name.

I am now convinced that the issue is a real one and must be settled correctly for the sake of future graduates. I would prefer not to have to explain to my future employer that I am not what my old alma mater's name indicates—an engineering finance major!

Roberts Says USSR Must Pay UN Dues

Dear Editor:

In regard to Russia's non-payment of her UN dues: even as every member nation is responsible for the UN's actions, so is every country responsible for its upkeep, so as to continue the peace-searching aims of this body of nations.

It has been said that a showdown on this non-payment of dues would wreck the UN, since perhaps Russia would withdraw from the organization in protest.

In 1950, I believe Russia quit the UN over a disagreement on UN action in Korea. When she saw that the organization would continue to seek world peace without her and would not die, she rejoined to have a voice in the hope of the future.

Russia's actions not in refusing to pay her debts are as big a threat to the solidarity of the UN as a showdown would be. Here is the UN now, facing a threat of collapse on one hand through a walkout and financial failure through non-payment of dues on the other. Why not let the UN, even though prodded by the United States, try to force Russia to pay her obligation and keep the UN from possible ruin?

If, as it has been said, Russia should not pay her dues because the UN's actions were not Russia's best interests, is it not obvious that her interests are not those of a peace-loving society and her "best interests" could best be served by her withdrawal from the UN?

Yours truly,
Phil Roberts

Application Date Extended For White House Fellows

An intensive nation-wide search for the 15 young men and women in the country with outstanding leadership talents will draw to a close this month under the White House Fellows Program.

Deadline for applications to the program has been extended to Jan. 15 so that civic, professional, academic and business leaders and organizations throughout the country will have a chance to submit nominations.

The Fellows Program, financed in its first year by the Carnegie Corporation, is designed to bring some 15 individuals between the ages of 23 and 35 into personal participation in the Federal Government at the highest level for one year. The fellows will serve for a year either in the White House or in one of the 10 Executive Departments working directly with the respective Cabinet officers.

Fellows will serve for 12 months instead of a previously announced 15 months and their assignments will begin on Sept. 1 instead of June 1. After the year of work they would be expected to return to private life.

Candidates for the program must be graduates of an accredited college, American citizens and in the prescribed age limit. Each must have demonstrated high moral char-

acter, exceptional ability, marked leadership qualities and unusual promise for future development.

Inquiries and requests for application blanks should be addressed to the Commission on White House Fellows, the White House, Washington, D. C. 20501.

UI Professor Speaks Today

The Psychology Dept. will welcome Dr. O. H. Mowrer, research professor of psychology at the University of Illinois, today as guest lecturer.

Dr. Mowrer will speak to graduate students and faculty in an afternoon session and follow with a public talk in the Agriculture Engineering Auditorium at 7:30 p.m. His topic in the evening session will be "Basis of Psychopathology: Malconditioning or Misbehavior?"

The psychologist is author of more than one dozen books and hundreds of journal articles. His latest books include "Crisis in Psychiatry and Religion" and "New Group Psychotherapy." His research field includes psychoanalysis, learning theory and guilt association.

Raider Roundup

RODEO ASSN.

Members of the Rodeo Assn. will meet at 7 p.m. today in the Aggie Engineering Auditorium. Membership buttons and cards may be picked up following the meet.

MECHANICAL ENGINEER WIVES' CLUB

A representative from the Department of Meat Industry will be special guest at a meeting of the Mechanical Engineer Wives' Club at 7:30 p.m. today in the Presbyterian Union Bldg., 2412 13th St.

THETA SIGMA PHI

Pledges of Theta Sigma Phi, women's journalism fraternity, will

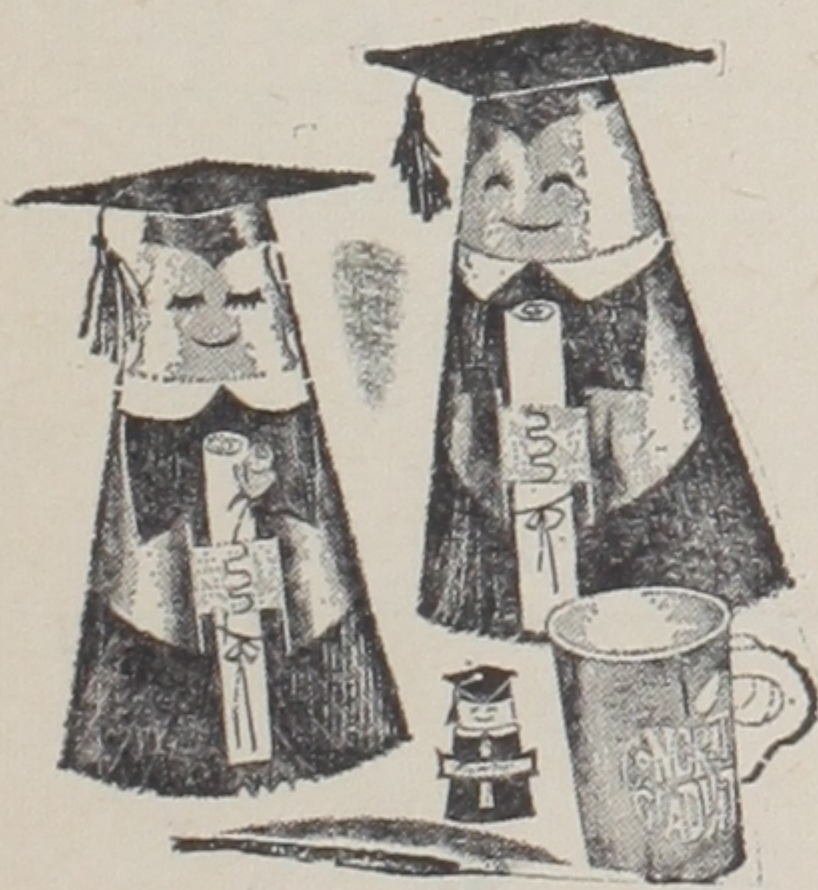

be initiated at 1:30 p. m. Sunday in the Ione Hutchinson Conference Room of the Journalism Bldg. Regular meetings will continue the first Wednesday following registration for the spring semester.

FACULTY SPEAKS FORUM

Dr. Van Mitchell Smith, history professor, will speak on the "The American Negro and the African Revolution" at a noon luncheon Friday at the Christian Student Center. The luncheon is free.

"ON THE
CAMPUS"

So you're
going to
buy a
diamond

Simplicity

\$325

PROBABLY you have never bought a diamond before. While there is no substitute for the advice of a highly trained jeweler in getting full diamond value, here are some basic diamond facts you should know:

SIZE, (carat weight) alone does not determine value. Color, clarity and cutting are even more important. One diamond of half-carat weight, for example, may be worth \$300 more than another of the same weight.

COLOR, or rather lack of color in the body of the stone, denotes quality. A crystal-clear stone is more precious than a yellowish stone. All well-cut diamonds show surface flashes of rainbow color called "fire," however, and this should not be confused with body color. It takes a "trained eye" and much experience to accurately judge color. We determine exact body color by comparison with professionally graded Master Stones.

CLARITY is the degree to which a diamond is free of blemishes and inclusions (interior marks). These tiny marks, which reduce the price of a diamond, are often invisible to the naked eye, and are part of the stone's personality. Here, again, it takes a highly trained jeweler to determine and set a proper value.

CUTTING accuracy is essential to the beauty of a diamond. The slightest deviation will rob the finest stone of fire and brilliance. Unfortunately, the untrained jeweler may not appreciate the importance of this factor.

If you are ever offered a "cut-price" or a "discount" diamond, just remember that expert examination of the gem will reveal why it is unworthy of a higher price. Here at Anderson's, we jealously guard our 54 year reputation for integrity, knowledge, and honest values... your assurance that we know and guarantee the quality and value of every diamond we offer for sale.

Dubber Still Leader Of The Pack

DUB MALAISE

Texas Tech's entry into the Southwest Conference basketball race had something in common with most of the other games the Raiders have played this season.

Dub Malaise once again led the team's scoring effort.

The Dubber, who is putting in points at a 24.4 per-game clip, sank 21 as the Techsans downed Texas 66-62 in Austin Tuesday. The win was the first skirmish for the local quintet in what promises to be quite a league race.

In initial league contests, SMU nipped the Rice Owls, 64-62, Arkansas beat TCU, 88-70, and the upstart Baylor Bears knocked off defending champ Texas A&M, 80-77.

So four teams are crowding that top spot.

Two will meet in the Lubbock Coliseum Saturday night as Arkansas comes to town to see if the Red Raiders are as good as they are supposed to be.

Harold Denny is Tech's second scorer with a 16.6 average while Norman Reuther has 14.2 and Glen Hallum 10.2.

Leads Squad

Reuther, who dumped in 18 points against Texas while grabbing 10 rebounds, leads the squad in the latter category with 93 in ten games.

Denny has 76, Hallum 70 and Billy Tapp 50.

Arkansas, which evened up its record at 4-4 with the easy conquest of Texas Christian, will be challenging a strong home court

tradition when it invades this weekend.

Tech has lost only one game in the last two seasons in the Coliseum.

Different Story

But the story on the road is a little different.

The Raiders dropped four straight contests on foreign grounds this year before finally outlasting Georgia Tech in the consolation bracket of the New Orleans Sugar Bowl Tourney.

Coach Gene Gibson was glad to see that one come, fearing a "mental block" that his charges were forming about traveling.

But Tech proved at Austin that it could keep its poise while hostile crowds looked on. The Raiders fell behind by five in the first half and then by seven in the final period, but fought back for the win.

NORMAN REUTHER
