

Upperclassmen To Attend Texas A&M Game

Reservation Deadline Set For Noon Today

Student Council Sponsors Excursion To San Antonio

TROY CALDWELL, president of the Student Council, will take reservations for the trip to San Antonio up until noon today, in room 109 Ad building. He has been assured of two buses by the Texas, New Mexico and Oklahoma Bus lines, carrying 57 passengers, and if applications run over this, then possibly two carrying 65. Those who go will be charged \$9.00 round trip to take care of the bus fare and sponsors expenses. The regular bus fare would otherwise run approximately \$17. The trip will be made under the approved sponsorship of Miss Dorothy Rylander, Cecil Ayers, and members of the Student Council.

Freshman Class To Hear Moore

Dr. Bernice Moore, of the Hogg Foundation of the University of Texas, will speak in the Agriculture auditorium on Friday, October 5th at 10 a. m. and 1 p. m., and Saturday at 9 a. m. Friday evening at 7 o'clock, she will speak in the First Christian church. This meeting is especially for Freshmen men and women students. Her lectures are sponsored jointly by the Hogg Foundation of the University of Texas and the State Board for Vocational Education, and will be open to all students and faculty.

Dr. Moore has visited the Tech campus on several other occasions. She holds a B. A. and M. A. degrees from the University of Texas and a Ph. D. degree in sociology from the University of North Carolina. She has had experience as a journalist, a social worker, and adult educator and is now sociological adviser in the field of community and family education.

Pre-Law-IRC Club Changes Meetings To Semi-Monthly

At a meeting of the Pre-Law-IRC club last Monday, it was decided that the constitution should be amended to enable semi-monthly meetings at 7:30 p. m., instead of weekly meetings at 8 p. m.

Because of American Legion meetings on second and fourth Mondays, several members of the club are also active in that organization. The members voted to meet on first and third Mondays.

Plans will be discussed at the next assemblage, Oct. 1, for initiation of new members and the fall semester mock trial, which is presented before the student body. Last year Pat Blount was tried for bootlegging, and he was found innocent. Bill Kennedy was the plaintiff.

In the spring Bill Guinn was tried for the murder of Max Gray which occurred in front of the Silver Dollar cafe, while Gray was having a date with Ned McClesky, supposedly going steady with Guinn.

Other activities of the club include a formal function in the fall and a picnic or hay-ride in the spring.

"Anyone interested in the activities of the club," says Troy Davidson, club president, "may join, since the Pre-Law and International Relations Clubs united during the war."

Letters were sent to all students in the government department encouraging them to become active in the club. Robert Cole, attorney general, was in charge of the letters, which serve as the first movement of the membership drive, now underway.

Officers of the organization for this year, elected last spring, include Davidson, vice-president, Patti Hall, chief justice, Darrell Carpenter, attorney general, Cole, assistant attorney general, Bob Davenport, defense attorney, W. O. Rucker, assistant defense attorney, Oliver McMann, Sheriff, Jack Burck, sergeant-at-arms, Stanley Beck, clerk of court, Bessie Burkham, reporter, Bea Green.

Potatoes Are Fed To Cattle, Sheep On College Farm

Agriculture Division Experimenting With New Type Of Feed

Cattle and sheep at Texas Technological college have consumed about 648,000 pounds of Irish potatoes during the past three months in a program to use a large amount of surplus potatoes.

On August 4 of this year the department of Animal Husbandry at Tech was contacted by the U. S. Department of Agriculture and asked to feed these potatoes as most of them are Grade 2, would not stand storage, and therefore could not be channelled into human consumption before excessive deterioration took place. It was therefore agreed to feed these potatoes as a means of preventing complete loss.

The bulk of the potatoes have been fed to beef and dairy cattle. Mature cows consume 50 pounds per head daily. They have also been fed to sheep in which case they consume six pounds per head daily.

The program closed on September 14 and the supply of potatoes will be exhausted about October 1. In all, 18 cars of potatoes have been used.

Similar experiments in Colorado and other parts where potatoes have been fed indicate roughly that potatoes have the feeding value of silage. The average composition of sweet sorghum silage is 25.1 per cent dry matter, 8 per cent digestible protein, 15.1 per cent total digestible nutrients. The corresponding analysis on potatoes is 21.2 per cent dry matter, 11 per cent digestible protein and 17.3 per cent total digestible nutrients.

The first potatoes were received August 7 and some of these were placed in a trench with the addition of 20 per cent de-headed bundles. As yet this silage has not been opened, but it is anticipated that the feeding value will be comparable to the regular silage.

Due to the fact that the college has had practically no rainfall and the pasture has been very limited, the opportunity to feed these potatoes was welcomed. Members of the agriculture division usually value silage at four dollars a ton in the silo and applying the same value to potatoes, it would be about 20 cents a sack.

Most of the potatoes fed in this experiment came from Hereford, and a few from Monroe.

Two Committees Named By Council

Two new committees were appointed at the first meeting of Junior Council, Thursday, Sept. 20. Betty Renner was named head of the program committee with Betty Jo Crisler and Dorothy Clift as other committee members. Jane Burns is to head a committee for investigation of various money-making schemes, and Jamie Trainer was appointed to assist her.

Junior Council is sponsored by Dr. Bernice Moore of the Hogg Foundation along with Forum and Phi Upsilon Omicron. Dr. Moore is to appear at Tech Oct. 4-5.

Now You Can Tell One Division From Another Without A Catalog

By DAVID BUCKINGHAM
Treasurer Staff Writer

There are five major divisions in the curricula of Texas Tech, including Agriculture, Engineering, Home Economics, Arts and Sciences, and Commerce. The question is: How does one tell what a person is majoring in merely by sight alone? Is it by speech, by action, or by appearance.

Two-Day Counselling Aids Fish

Saddle Tramps In Charge Of Victory Bells

The Saddle Tramps have been charged with controlling the ringing of the victory bells. In their meeting of September 20, 1945, they voted to limit the ringing of the bells to fifteen minutes upon the winning of any contest in which members of the student body represents the college. The ringing of the bells will be done by the members of the Saddle Tramps, only.

The reason for their decision is in accordance with these wishes expressed in a letter to the President by the Senior Class in 1936. This class is solely responsible for Tech having the bells.

It has been the custom in the past years for the bells to ring until the upperclassmen saw fit for the freshmen to stop. Now, however, with the quarter-hour restriction, the bells and the freshmen may rest in peace.

Fall Enrollment Figures Are 2,427

Increase Of 24 Per Cent Over Last Year's Total

A 24 per cent increase in enrollment for Texas Tech this fall over final figures of the fall semester last year was reported Thursday by W. P. Clement, registrar.

Mr. Clement said 2,427 men and women were on the campus, as compared with 1,949 totaling enrolled for the 1944 fall term. Of this number there are 1,463 women and 964 men, a gain for both sexes. Additional persons were still registering this week under special permission granted them.

Arts and sciences majors continue to outnumber other divisions with 904 enrollment. Engineers hold second place with 487, while there are 448 commerce majors, 428 home economics majors and 159 Aggies.

250 Girls Enroll In College Chorus

The college chorus, a class in which almost every division on the campus is represented, has an enrollment of 250 girls. This is a large college chorus in comparison with other organizations on campus.

The chorus meets every Monday at 7 p. m. and gives one hour credit. The group is concentrating on college songs and plans no appearance until near Christmas. After a study of the college songs the chorus will turn to Christmas music. The singers have officers who volunteer to help in the various functions of the organization, but it is not called a club. Dr. Julien Paul Bliz, head of the music department says the quality of the voices is very beautiful this fall.

Yearbook Staff Is Appointed

La Ventana staff has been chosen by Merrillyn Snider, editor. The following officers were appointed: Dorothy Cantrell, business manager; Bea Green, Associate editor; Sue Stockard, society editor; Ed Graf, Photographer; Ivan Tucker, Assistant Photographer; Maxey Pinson, Sports Editor; Trula Graff, and Mary Lee Logan, Art Editors. Other staff members are Pauline Lokey, Billie Griffin, Lou Green, Nelva J. Halbert, and Hoppy Maas.

Merrilyn stated that in the last staff meeting plans for selecting La Ventana beauties were discussed. Four beauties instead of eight will be nominated, and one personality from each of the four classes will be chosen. There is also to be a campus wide contest for a Miss Texas Tech and Tech's most popular boy. These plans must be approved by the Student Council and further arrangements can be made.

Miss Snider stated, "Every student should have an appointment before October 1, to have his picture made for the annual." Students wishing to have snapshots in their annual may turn them in to Ed Graf, photographer.

WSGA Elects Stovall Prexy

Jan Stovall was elected vice-president of the Women's governing association of Dorm II at the first regular meeting Thursday, September 20, at 10 p. m. in the dormitory lounge. This office was left vacant when La Nell Doshier assumed the office of president. Sarah Anderson the president elect did not return. Other officers include Anita Hale, secretary; Dorothy Clift, finance chairman; LaVerne Riley, Senior representative to the senate; Mary Troy, Junior representative to the senate; Sue Thompson, sophomore representative to the senate; Laura Lou Johnson, A.W.S. representative. Marjorie Crews was elected the Freshman representative to the senate by the freshman residents.

La Nell Doshier presided over the meeting and gave the usual reminders to the old students and explained the regulations to the new ones.

Tech War Vets To Hold Smoker

The Tech War Veterans Association will hold its first smoker of the year Thursday night at 8 o'clock in the Cadet lounge of the Hilton hotel.

All veterans attending Tech are cordially invited to attend.

Sock And Buskin Invites Tryouts For Membership

Students wishing to try-out for membership in the dramatic club, Sock and Buskin, may sign a paper in the Speech office, room 205 of the Administration building now.

Any student is eligible to try-out. New members will pay \$1 initiation fee plus yearly dues of \$1.

Others walk around as if in deep thought, when they are really memorizing shorthand, bookkeeping methods, etc. Due to these people, business firms would be in a mess if it wasn't for great knowledge of how to balance books properly.

Last, but not least, there is the Arts and Sciences division. Quite a variety of major subjects are in this division, including Music, Chemistry, Law, Journalism, History, Government, Economics, etc. The Arts and Sciences students seem to be everywhere, and when they go to class, it invariably seems to be an 8 o'clock, a 1 o'clock, or a three-hour lab. They vow and declare their division is the best, but what student doesn't? The outstanding characteristic of these people is their ability to publish annuals and Yearbooks, give musical concerts, make chemical reactions, teach others the fundamentals of law and government and give an all-round good showing of various accomplishments. One can spot them on the campus by their leisurely walk, and an air of knowing much about nothing in particular.

New Students Taking Active Parts In Clubs

All Observations Favor Pre-Registration Quizes

FRESHMEN students who now compose the largest and most active body on the campus are generally regarded as a more intelligent group of newcomers than the fish of former years. The giant influx of new students has not brought a crop of genius minds but due to the two days devoted to freshmen they have a more general knowledge of campus life than those in previous years.

In first meetings of departmental clubs and campus sponsored social affairs the freshmen are taking a more active part. Even more surprising is the fact that they are reporting to classes on the hour and going about their scheduled lives in a more businesslike manner. All these observations cause general opinion to favor the two pre-registration days of counselling.

Sandals Ruining Co-ed's Feet Survey Reveals

Huracas and sandals are ruining the feet of the college girls was shown by the examination given the freshmen by the Physical Education department this week. Corns and calluses have developed on their feet and they tend to rotate their ankles inward. The girls also turn their feet outward instead of walking straight. This is caused because they have to twist their toes to keep their shoes from coming off.

The girls were also examined for posture and poise. A crude heart examination was given to show how the student reacts to exercise. After all examinations are finished, a program will be set up to help the girls correct their defects. Coordination, flexibility and the proper way to walk will be the main features.

The physical examination given in Tech is similar to those given in other colleges. The reports of each student will be kept and put on file and later a comparison will be made in accordance to height, weight, age, and deformities of all of the students.

Sears Students Given Dinner

Sears Roebuck Scholarship students were honored with a dinner Thursday night, September 27, at the college social center.

W. C. O'Mara, manager of the Lubbock Sears Roebuck store, sponsored the dinner and introduced Dean W. L. Stangel and A. H. Leidigh, who appeared on the program.

Freshmen scholarship holders who were honored at the meeting were Bruce Barber, Harold Elder, Don Montgomery, Sam Owens, Jr., Clinton Ritter, Orville Robinson, Carl Glendon Schneider, Ed Dorell Sims. Former scholarship holders were R. V. Ball, Jack Earl Creel, C. W. Dennison, Carl Dwyer, Bill Griffin, Willis Paul Phillips, Billy Joe Snodgrass, James Welch and John White.

Stangel, Leidigh Honored At Meet

Dean W. L. Stangel and A. H. Leidigh, Dean Emeritus, were honored at the regular monthly meeting of the Aggie club last Tuesday night, September 25 in the auditorium of the Agricultural building. A Stetson hat and Schaefer pen and pencil set were presented the guests of honor by former members of the Aggie club. Jason Gordon, Lubbock County Agent and former Aggie member, presented the gifts.

Officers for this year assumed their positions. They are Tom Miller, president; Norman Hoback, vice president; Carl Dwyer, treasurer; Judd Morrow, secretary; J. B. Potts, reporter; and Bob Mendell, song leader.

Activities of the year were discussed and plans were made for a rodeo, pig roast, carnival and Aggie banquet. Section one and two of the club constitution, concerning the nomination of officers, were revised.

Lt. Lee Michie Liberated From Japanese Prison Camp
First Lt. Lee Michie, who has been a prisoner of the Japanese since March 1942, was liberated from Camp Hotei at Mukden, Manchuria on Aug. 17.

Not only are the students themselves at an advantage of knowing what lies ahead but the division deans already have at their disposal an abundance of information concerning each new student. This year many of the psychological and vocational tests, usually given in orientation classes were given and graded within the first few days. Heretofore the tests had to be sent to Austin and results were not available until late in the first semester. Although orientation classes will not be abandoned because of these counselling periods they will be completed much earlier.

Because the dean has at his disposal high school transcripts and test scores he may refer to these in advising students. Many students found out before registration that they were not suited or interested in the work which they had chosen. The afternoon counselling periods left the students prepared to go into the registration lines knowing the courses in which they wanted to enroll.

Mr. W. P. Clement, registrar, states that almost 50 per cent of the adds and drops usually occurring within the first weeks after registration have been eliminated by the program. He also believes students did a much better job of registering simply because they understood the process. Dean of Engineering, O. V. Adams, found students reported for classes with a much better understanding of the work ahead of them and that the information speedily afforded him by the tests given freshmen engineering will enable him to better understand their individual needs. Dean W. L. Stangel of the division of Agriculture says in the short time he has had to observe the Aggies they have had a more sincere interest in their work. "I think the program was a wonderful idea and entirely worthy of the time devoted to it," states Dr. W. B. Gates, head of the department of English.

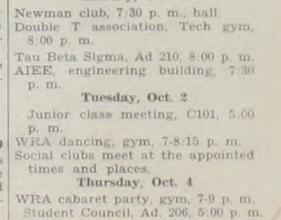

Miss Edith Coleman of the Home Economics division feels that the freshmen girls have less feeling of timidity and are ready to lend ideas to class room discussion rather than simply accepting the thoughts of the teacher.

Other than technicalities which arise in putting any theories into practice the counselling days went smoothly with the main objection being that the period of time given was not sufficient and the hope was expressed that next year the program would be expanded.

Forum Meets To Discuss Plans

Forum met this morning for breakfast at 7 a. m. in the College Avenue Drug to discuss plans for the year. The society will aid the Junior Council in arrangements for the appearance of Dr. Bernice Moore on the campus. Programs, which include Fireside Forums held on Sunday afternoons throughout the year, were discussed.

Activities for the coming year were discussed at a meeting held Friday afternoon, Sept. 21 at the social center.

COLLEGE CALENDAR

Saturday, Sept. 29
Tech vs. A&M, 8:15, Alamo stadium in San Antonio.

Monday, Oct. 1
Newman club, 7:30 p. m., hall.
Double T association, Tech gym, 8:00 p. m.

Veterans And School

With the fall registration figures of veterans enrolled in Texas Tech reaching upwards to three hundred and with the next semester predictions for over five hundred a new problem confronts this college.

For twenty years Texas Tech has each year started off a group of young freshmen. The ages of these plebes in higher education has averaged around seventeen of eighteen years. By the time they are graduating seniors most of them have reached the ripe old age of twenty-one or twenty-two. They are still literally "children." Tech has been catering to this younger set very capably. They plan entertainments, form clubs and organizations that fit in with the thoughts and ideas of young people this age. This has been going on for twenty years.

Today a new era has begun. Men are returning to the campus who are many years older than those around them. Not only are they older in years, but also in experience, in the hard life of the Army or Navy or Marines. Many have lived a life-time in a very short time on the battlefield. Is it natural that these men would have no time for the frivolities of comparative "kids" still in their teens? Would they want to participate in things so natural to the growing-up of a normal peace-time Techsan? Almost a whole these veterans are interested in one thing. Paramount in their program is to finish their education and get a good one while they are at it. They require no special attentions, only encouragement in the goal for which they are striking. A very good organization has been founded on the campus, the Tech War Veterans association. This organization answers the purpose for most of the extra-curricular activities of a majority of the returning veterans. In addition, many are members of departmental clubs. However, these organizations are mere side-lines. The main thing is the degree.

Weighing all these points does it seem strange that a veteran is the last person to walk a class when the professor is late? Doesn't it seem right that he would want all that he is entitled to in the way of an education? Why would he want to pass slipshod through college when he is exchanging the most important years of his life for this education—these years when many of his buddies are settling down in business, or piling up priority on a job. He is passing up the opportunity for security of this type to get an education in order to be better prepared for the post-war world.

Most of the teachers here realize the fact that the veteran is more serious as a whole than other college students. That he is more interested in learning everything about the subject than the average Techsan. These instructors and professors are doing everything in their power to help the veteran. They are more than willing to help.

Texas Tech is waking up to the fact that the returning veteran is no ordinary student.

Needed—Some Doctors

As Techsians dream on master plans for a student union building and hope for a new gymnasium, while legislative riders change faculty personnel and enrollment reaches the 2500 mark, Tech proceeds with its illogical medical provision for the students.

One "pill roller" for over 2400 young people living energy draining lives! One professionally trained woman responsible for all the non-emergency cases, equipped only with room space, a few antiseptics and the will to serve the aching multitudes. Office hours cannot even be day long for she must tour dormitories to visit these cases which are confined to bed.

Psychology teaches and all thinking people know that good health goes further in promoting interested intelligent students than the impetus of genius. A brilliant student with a poor health may write masterful essays but will not develop into the useful person civically that an educated citizen should. College life is strenuous, young people by nature are not cautious. Tech needs to provide for its students a 24 hour service of good medical attention. A service not entailing dollars worth of taxi fare going to and from hospitals, hopeless hours spent out of classes waiting for a doctor's attention. As a school in a world of science Tech is over-looking the most needed phase of scientific research... Medicine.—J.W.

The University of Texas is the first institution of higher learning in the Southwest to offer training in ceramics.

The average wounded G. I. Joe on Europe's battlefields had first aid treatment from a medical soldier within 12 minutes, whereas the average wounded Nazi waited for four and a half hours for comparable service from his medical aid men, according to Major General Paul R. Hawley, College Corner, Ohio, the Army's surgeon general in the European theater of operations, who spoke recently at the University of Cincinnati.

Irwin Edman, author, and professor of philosophy at Columbia University, has been appointed visiting professor of philosophy at the National University in Rio de Janeiro, Brazil. Professor Edman's lectures, planned to acquaint Latin American students with United States' contributions to intellectual freedom, are sponsored jointly by the Brazilian government and the Department of State in Washington.

Life With The Exes...

Lt. Jack W. Miller, former Tech student who received his wings and been commissioned a second lieutenant in the Army Air forces at Douglas, Arizona.

Cpl. Jim R. Allen, former Tech student and son of Mr. and Mrs. R. H. Allen, 2010 19th St., is studying agriculture at the U. S. Army University Center in England. This school is designed to give soldiers a chance to get college instruction while waiting to return to the United States, and has started its first semester with an enrollment of 3,611 students.

Lt. (j.g.) John R. Sanderson, USNR, has been assigned duty in the register publications offices of the Eighth Naval district headquarters. He recently returned from the Philippines where he completed 18 months of work on the staff of the commander of the Seventh fleet. He had served with the staff at its earlier locations in New Guinea and Brisbane, Australia. Lt. Sanderson took a master's degree from Tech before entering the employment of the Social Security board.

Foster Vernon Williams, MM2/c, USNR, former Tech student, is serving in the Admiralty Islands where he has been stationed for 18 months. He has been in the Navy since Nov. 1943.

Hubert L. Burgess, jr., seaman, first class, USNR, has been at sea only four months, but he has taken part in the Navy's initial bombardment of the Jap homeland and the intensive Okinawa campaign.

Burgess intends to continue his studies at Tech after he is discharged.

Capt. Cash M. Stanley, former head of the textile engineering department, is serving with the occupation troops in Germany.

Capt. Joe E. Alford, 39 Tech graduate, serving with occupation forces in Germany, is helping ground troops keep alert to apprehend Nazis, SS Troops and to guard against sabotage in occupation of the area south of the Danube and West of Munich.

Lt. Jerry Beavers, ex-Techsan and College club member, visited on the campus last week. He was recently commissioned in the Marine Corps reserve after a ten weeks course at officers school in Quantico, Va.

M. A. Rogers RM 3/c, 1942 graduate of the textile engineering department, is a radio operator on board the USS Attu. Rogers recently met Norman Wiley, son of D. O. Wiley, in a group of marine fighter pilots being transported to Guam aboard the Attu.

Lt. (j.g.) C. B. "Chocky" Fair, 1942 textile engineering graduate, is somewhere in the Pacific aboard the USS Barbaro.

Lt. (j.g.) T. George, 1942 graduate of the textile engineering department, is recuperating in a U. S. naval hospital in New York from burns received when his ship was sunk in the Pacific. George expects to receive a discharge from the navy soon.

Both captains are discharged servicemen, Turner leaving the Army as a sergeant after 19 months service and Schlinkman serving 19 months as apprentice seaman in the Naval reserve.

TOM HALEY, new Soci member escorted KATHERINE PARISH to the Soci dinner party last Sunday.

The Count extends congratulations to MAXEY PINSON and TED CRAGER. Uncle Sam has put them on his payroll.

We wonder if JANE LAWSON has torn up those love letters as per FRED T's request.

ED BOAZ has been seen staggin' git lately.

BILL FLEMING had the pleasure of escorting BETTY BELEW to dinner Tuesday.

And now let's all be a little amazed at how this got by without being seen and censored by our editor ANN HURT reports to the Count that she has been seeing a lot of WAYNE KITTLEY, the self-styled bachelor, lately.

TROY CALDWELL and MARY JEAN WEBB are being seen around the local hot spots together again.

Latest engagement: JOE BREWSTER and "SLATS" AUSTIN. He nopped the question last Thursday.

Students Awarded Three Textile Scholarships

Textile engineering scholarships have been awarded to three textile students of freshman and junior classes. The awards are made on the basis of scholarship, character and leadership ability.

Nancy Rhee, junior textile engineering major from Lubbock, received the Elsie M. Adams Memorial Scholarship, which is the first sophomore textile award. The \$200 scholarship is based primarily on the scholastic average for the 31 hours of required work for freshmen textile engineering majors.

Carl Schmidt, textile engineer from Mexico City, was given a freshman award contributed by Carl Hoblitzelle, member of the Texas Tech board of directors. Schmidt attended the American high school in Mexico City, where he was an outstanding student.

Bobbie Jean Knowles, freshman textile engineer from Tulsa, received the W. C. Stricklin award. Both freshman awards are granted on the basis of high school scholastic averages, and students must meet engineering requirements.

Jannie Lee Pointer, Anton sophomore, was elected president of Casa Linda, girls' cooperative house on the campus last week. Elected vice-president was Odessa Weems, junior from Rotan; secretary, Mrs. Avis Fuchs, Abernathy sophomore; and business manager, Corinne Stinson, junior from Morton.

Joanne Crabtree, Levelland, sophomore, was appointed representative to the Association of Women Students. Angelina Kveton, senior home economics student from Abernathy was elected social director.

Casa Linda, located just north of the Home Management house is a cooperative girls' residence. Eighteen Tech students live there.

Deans Margaret W. Weeks and Mary W. Doak met with residents of Casa Linda Wednesday to discuss the annual Homecoming banquet.

The University of Kansas has received a federal grant of \$52,257, allotted by the Federal Works agency, to cover cost of maintenance and operation of child care projects in Lawrence and at Sunflower Village. Senator Arthur Capper has announced.

A FLIGHT THAT NEVER LEAVES THE GROUND

A bomber crew needs training as a team. And now those hazards which are too dangerous for air-borne drill can be duplicated on the ground. This is made possible by an electronic flight trainer perfected by Bell Telephone Laboratories' scientists for the Navy.

At remote controls the instructor follows the "flight," sets up various dangerous conditions, coordinates the crew's reactions.

Tubes glow, switches click much as they do in a telephone exchange, to duplicate such flight perils as icing, fouled fuel lines, "conked" motors. It is the science behind the telephone that here performs another new service to the Nation.

Red Raiders To Meet Texas Aggies This Saturday

Men-In-Red Will Play Aggies For Sixth Time

THE THIN, red line of Aggie-land may break this week for the first time against Tech when the Raiders meet Texas A&M at Alamo field in San Antonio. Kickoff time is set for 8:30, Saturday night.

This will make the sixth time in the history of the two schools the Raiders have faced the Aggies. They first met A&M in 1927 and suffered a defeat of 47 to 6 and each game has been heavy on the A&M side since. Last year the Raiders mustered a pass offensive against the Farmers, of which few people at that time believed the Raiders capable. This offensive threw a scare into the Aggies and at one time Tech was in the lead. However, the A&M manpower and frequent substituting wore the Raiders down and the Farmers were able to come from behind to win the ball game in the last five minutes. The score was 27 to 14.

This year A&M with her heavy line and strong backfield plan to do more of their famous "steam rolling," but the Raiders have been studiously attending workouts and skull practices this past week to stand in its path and according to Coach Morgan, intend to stop it.

From the statistical standpoint A&M has a far superior team in many ways to that of Tech. For that matter, Southwestern was classed over the Men in Red until the 7-0 game last Saturday night upset statistics. The Farmers, like Southwestern, have a military program that contributes to their team giving them more weight and speed.

In the history of the two schools A&M has scored 113 points to Tech's 20 and has always outclassed the Raider eleven. It will be even more outclassed this year says representatives of A&M, because they are maintaining their best team since 1940.

To lead the Raiders against the so-called invincible Farmers will Walter Schlinkman, whom the Aggies know only too well from last

To Captain Raiders

Co-captains for this year's Raiders, pictured above, left, is Walter Schlinkman, 190 pound back and right, Otis Turner, 180 pound center.

guard performers Russel Birdwell and Joe Snodgrass. Otis Turner along with Clyde Black, Frank Ottmers, Dub Montague and John Branton will make holes for the ball carriers.

Coach Morgan, who is the quietest man on the campus about this week's game, is expected to pull quite a few surprises from that lucky Stetson. About all he says is: "Put the school spirit behind us and we will do the rest."

Probable Starting lineup will be: right end, Moyers; right tackle, Black; right guard, Birdwell or McSwain; center, Turner; left guard, Lawhorn; left tackle, Snodgrass; left end, Branton or Ottmers; quarterback, Hardey or Dillon; left half-back, Shahan; full-back, Schlinkman; right half-back, Norris.

year. He booted both the extra points in the game in San Antonio. The Aggies also will be on the lookout for Arthur Shahan and Gene Hardey who scored one of the goals last year. Both were outstanding against Southwestern and are expected to be in even better shape in San Antonio Saturday. A&M fans will remember how Cecil Norris plowed through the Farmer line several times last year. Norris has had a year's

football experience since then and from his appearance in last week's game, he will deal the Farmers much trouble. Jack (Spider) Dillon is also expected to play for the Raiders and he has a way with the ball that will keep the Aggies reaching.

From The Bench

By SPLINTER-PANTS PINSON

Texas Tech's Red Raiders move into San Antonio to meet the Texas Aggies this week-end. Backing the team will be the band and the student body. Tech has never beaten the Aggies, let's make it different this year.

Southwestern proved to be a tougher team to beat than expected. The Raiders came through, racking up a 7 to nothing victory over the Pirates. Tech's main weakness proved to be end play. The ends did look improved Tuesday night against LAAF, and they should be going strong against the Aggies.

The Aggies have defeated the Raiders four times, running up 113 points to Tech's 20. Last year, A&M ran over two touchdowns in the first five minutes of play. Tech then recovered and was leading 14-13 in the last quarter. The Men-in-Red could not cope with the Aggie's reserves, and lost the game by a score of 27-14.

Guards, supposed to be the weak spot of the Raiders' line, have shown up well against both Southwestern and LAAF. Russel Birdwell, Floyd Lawhorn, Reeves Moran, John Staewen, MacWeaver, Charles Walsh and Douglas McSwane have all been looking good in scrimmage.

Last week the Aggies swamped Ellington Field 54-0, despite 10

fumbles. The Share-croppers are working out twice daily this week, trying to learn to hold the ball. Tech, however, is not planning to win the game on breaks, they are working hard and will give the Aggies the battle of their life.

Reporting for practice this week were Bernie Winker, letterman fullback from the '43 team now at end; Ed Robnett and Tom Polk, both backfield men. I'll string along with Tech this week-end; this is our time to win.
