VOL. 4

TEXAS TECH, LUBBOCK, TEXAS, SEPTEMBER 27, 1928

NUMBER 2

## Schreiners and Matadors to Untangle Tie Saturday

### New Record Set In Registration

Some students expressed fear yesterday that several of the old students would be missing this year. The freshman registration created the same congested condition which has occurred in previous registrations. But there was very little congestion during the enrollment of the upper-classes. This fact seemed to create the fear that the expected number would not be back. However, the difference in the registration condition (between freshmen and upper-classes), may be explained not only by the fact that the freshman class is larger, but by the fact that upper-classes, having registered before, were able to finish the task in a shorter time than the freshman. This made it appear at the moment that the expected number of upper-classes had not returned. The rush of enrollment during the third day was largely caused by old students returning.

### LeMaire Plans 2 Bands For Year

Tech musicians are getting off to a flying start. The Tech Concert band began rehearsals the first day of registration. Rehearsals will be held this year in the basement of the new Engineering Building, instead of in the stock judging pavilion, known more affectionately as the "Mulebar." According to Mr. LeMaire, director, the band will be on a different basis this year. Instead of one big band, open to all, two bands will be organized. The central organization, the concert band, will be composed of those students who pass a musical examination; and a college credit of one term hour will be allowed in this band, based on attendance at rehearsals held Mondays and Thursdays, each week. The second band will be a "feeder" band for the concert band. It will rehearse once each week, the time for meeting to be announced later; and credit will not be allowed for work in this band. However, positions in the concert band will be filled solely on competitive musical ability; and as soon as a member of the Supernumerary band shows sufficient ability he will be given a place in the concert band. Mr. LeMaire is expecting a larger band this year than ever before, and a better one as well, since a number of three-year members will be back this year in their regular places.

### New Equipment For E. E. Dept.

New equipment in the E. E. department of the Engineering school includes: four motor generator sets, one rotary converter, three power supply sets (two of which convert from alternating to direct current and the other from direct to alternating current), an eight panel, plug-type switchboard which is twenty-one feet long, a mercury arc rectifier and a fifty-six cell, 112 volt storage battery. W. M. Tucker and Andrew Allen, two senior E. E. students, have been engaged all summer in installing the equipment. They have been using a two ton traveling crane, which is also new, in placing the equipment. A new flume has been installed in the Civil Engineering Department. It is an outfit for testing or measuring flow of water. "Bobbie" Burns has been setting up gas and steam engines in the mechanical department.

### Grad Student Marries Tuesday

Miss Verna Wilson, last year graduate of the Technological college, was married last Tuesday morning at 9 o'clock at the First Baptist church to James Dudley Caldwell of Bakersville, Cal., with Dr. W. R. White, pastor of the church, officiating. Miss Willette Waters and Miss Beniah Dunn, schoolmates, played for the wedding and accompanied Miss Virginia Johnson who sang "At Dawning" as the pre-nuptial music. Miss Sylvia Wilson, sister of the bride, was her only attendant, and Prof. H. B. Carroll of the Tech college faculty, acted as best man. Immediately following the wedding ceremony, Mr. and Mrs. Caldwell left for Bakersville where they will make their home. Mrs. Caldwell was honor guest at a number of brilliant events after her approaching marriage was announced at a reception given on September 12. She has spent virtually all of her life in Lubbock, and has been prominent in social and church circles.

### Dickerson Claims All-College Band

Dancing students who have been wondering what orchestra will claim the title to be the Tech Orchestra—made up solely of Tech students—will meet Dick Dickerson and his bunch soon. The first all-college orchestra has been announced to date and is expected to be on the social calendar soon. Dickerson says that he will have a band to equal college bands elsewhere. He has been in the north recently and has been paying special attention to the class of bands which appear in the colleges of the states about the Great Lakes. He has about fifteen of the latest names perfected already and expects to add more to the list. "The thing that my band lacks is more tricks and stunt work," Dickerson remarked while commenting on the orchestra prospects, "and I believe we will have plenty of that soon," he added.

### Gives 2 Relics To The College

A gun used during the Civil War—a muzzle loading Enfield rifle—which was captured on the battlefield by Confederate soldiers from Union troops, was presented to Tech on September 14 by Mrs. Lucy Higgs of Mercedes, Texas. The gun was last used in the battle of Atlanta by S. H. Stephenson, color-bearer in Company C, Thirty-Sixth Mississippi Regiment in Hixson's Corps and Claiborne Division, Army of Tennessee. Mrs. Higgs also presented one text book in Geography used by T. R. Beck, printed in Philadelphia in 1836, entitled "An Easy Introduction to the Study of Geography," by Thomas T. Smiley, A. M., M. D.

### Tech Engineers Get Big Jobs

After having at least two or three offers of employment, two graduates of the West Texas Institute, Benjamin Biggers, of Dallas, member of the first graduating class in civil engineering at Tech, have left for Youngstown, Ohio, where they will work for the Tuscon Steel corporation, one of the world's largest reinforcing materials companies. Their positions in future will entail the designing and detailing of reinforced concrete structures. Thelmer Rogers, also member of the Class of June '28, and graduate in electrical engineering, reported for duty Sept. 1, with the Commonwealth Edison company at Chicago, where he will take a course of practical study before starting work. The Commonwealth Edison company is the largest public utilities corporation in Chicago. Zed A. Glimp, graduate in electrical engineering in the same class with Rogers is due to report in November to Pittsburg, Penn., where he will take a course of study before going to work for the Westinghouse Electric and Manufacturing company there. Neville Graham and Tommy Morris, civil engineering students from Tech, are now working for the state highway department at various phases of civil engineering connected with highway construction.

### Extension Dept. Helps Schedule

According to the purpose of the Department of Extension, resident students may enroll for correspondence courses, with the consent of the dean of the school in which they are enrolled, for the following purposes: 1. To give up a schedule. 2. To make up a subject for college entrance. 3. To secure a teacher's certificate. 4. To take a subject which they are not able to take in class because of conflict of schedule. College credit will be given for the work. The office of the Department of Extension is in room 309, administration building. Further information in regard to the extension service for resident students may be secured there from Mr. McDonald, head of the department.

### 500 Fish Register For Orientation

It is interesting to note that an even number of freshmen registered for Orientation this year. Five hundred signed registration blanks were distributed at the first meeting, September 21. This figure includes 200 more than the figure for freshman Orientation last year. Out of the Orientation registration this year, 149 were engineering students, 33 were agricultural, 55 were home economics and 263 were liberal arts.

### Edelmon Plans Bigger Yearbook

Library Deposits Necessary To Make Plans Work; Business Manager to be Elected by Student Body. Wilbur Edelmon, editor of La Ventura, plans the greatest college annual ever undertaken in West Texas. An attempt is being made to change the size of the book both with reference to the size of the pages and the number of pages. The plan is to change from the 8x11 page to the 9x12. The editor also plans an additional hundred pages in the book this year. It is pointed out that these contemplated changes are possible only by the cooperation of the student body. It is necessary, Edelmon states, that a great number of students sign their library deposits to La Ventura. By doing so a student agrees to purchase an annual with his library deposit instead of having the unused portion of it returned to him at the end of the year. A very unique art theme is to be carried out in the book and is such that it is adapted to the college. However, the theme is not disclosed yet. The material for the engraving of the art work is already in the hands of the engravers and will soon be ready for the editor's approval. If the entire La Ventura staff has not been announced to date, a business manager will be elected by the student body soon. Other members of the staff will be appointed by the editor-in-chief. Edelmon says that the staff will be required to meet once each week this year.

### History Magazine Carries Article By Miss E. West

A recent issue of The Hispanic American Historical Review carried an article by Miss E. West, of West Tech, Lubbock, entitled "The Right of Asylum in New Mexico in the Seventeenth and Eighteenth Centuries." This article brings out the fact, not generally known, that the medieval right of church asylum was a legal right in one form or another throughout the whole area of the present United States. The introduction gives a brief history of this phase of church and secular law, especially in Spain and Spanish colonies. The body of the article gives in some detail the history of thirty-odd cases recorded in the Archives of New Mexico wherein criminals or political offenders took refuge in churches or other religious establishments to escape the consequences of their misdeeds or to get protection from political enemies.

### Schreiner Editor Writes Toreador

EDITOR'S NOTE: The following letter is a reply to an inquiry by The Toreador about prospects for Saturday's game. It arrived too late to be put in news form. KERVILLE, Sept. 25. — That Schreiner will be doing well to hold Texas Tech to a low score, is the opinion voiced by Head Coach "Bully" Gilstrap about next Saturday's game. In the first place, according to Coach Bully, the 35-mile trip from Kerville to Lubbock isn't calculated to improve the condition of the Mountaineers, and in the second place, the team has not yet recovered from injuries received in the opener against the Flyers from Kelly Field. Capt. Brutus Harris, who was in the thick of the fray during most of last Friday's game, is suffering with a sore leg. Roy Coolege is still nursing an injured shoulder retained from pre-season skirmishes and the team may be without his valuable services as guard. Bohm Hilliard, playing his first season for Schreiner, received a sprained arm at the conclusion of one of his sensationally long runs last Friday, which put him out of that game, and may keep him out of this. Coach Gilstrap isn't exactly blue, but he is cautious. He will leave Kerville Thursday with 24 men, via automobile, and will spend Thursday night in Big Spring. The team will reach Lubbock Friday in time for a work-out Friday afternoon.

### Pep Squad Girls Choose New Name; Will Be On All Special Trains That Are Sponsored By College

With the assurance that the Arena-Ritas, Tech Girls Pep Squad, will be right behind the Matadors, the organization started their workouts Wednesday afternoon at 6 o'clock. Due to the closeness of the first game and the late registration of the upperclassmen, the Arena-Ritas will not perform Saturday afternoon at the first game with Schreiner Institute. The name Arena-Ritas has been selected by this organization which has heretofore been known as the Tech Girls Pep Squads. Hereafter the organization will be known by the new name. More than fifty girls have handed in applications for membership in the squad. Twenty old girls will be back. Only thirty new members will be taken into the squad making a total of fifty. Others interested who do not fill the requirements will be tried out and drilled and kept on the waiting list to fill in vacancies during the year. Wednesday afternoon at 5 o'clock Anna Belle Collins, leader of the squad, and D'Aun Sammons, assistant leader, will talk to all girls interested in the organization in room 209 of the administration building. Thursday afternoon the girls will be taught some of the mechanics of the various drills of the squad which will be used during the season. Every afternoon next week the girls will drill for the coming games. Wednesday afternoon Oct. 6, Misses D'Aun Sammons and Anna Belle Collins are giving a Silver Tea at the home of Miss Sammons at 207 13th street from 3:30 to 5:30. All girls and ladies of the town are cordially invited. The money will be used to take the girls to Fort Worth with Tech beats T. C. U. While on the Fort Worth trip the Arena-Ritas will broadcast a program over W. B. A. P. The girls will go on the all-special train sponsored by the college.

### Home Eco. Dept. Active In Slaton

The Home Economics Department of Tech has established in Slaton High School, Slaton, a demonstration center for observation and practice teaching in connection with the regular work of the high school. This extension is for the benefit of those students working toward a Smith-Hughes Certificate. Miss Vivian Johnson is in charge of this practice teaching. She has her Masters degree from Columbia, and comes to Tech from the State Teachers' College at Kingsville. Students engaged in practice teaching under Miss Johnson's supervision go to Slaton by automobile each day. This work is in connection with the regular practice teaching done in the Lubbock schools.

### Debate Activity Will Begin Soon

Forensic activity may begin again this year, as last year, with an international debate. In case such a debate is held it will be with Cambridge University of England. Miss Anna Jo Pendleton, debate coach, plans a big schedule this year. There will probably be a girl's varsity squad, a boy's varsity squad, and a freshman squad. Miss Pendleton explained the fact that, because there was to be a freshman squad, freshmen are not barred from the varsity squad. Anyone who desires to try out for any of the teams should see her this week. Sweater awards have been received for the letter men of last year and will be made soon. Those who will receive the forensic letter are: Alton Hutson, Lowell Croder, Bob Crozier, J. W. Jackson, William Sewell, Clarence Whitesides, Otis Koon, and Hal Lary.

### Prof. Beck Delays Ph. D. Degree To Do Extra Amount Of Research

THE LANDLADY When I look for a place to harbor my trunk or sleep when the night grows late, I care not for vases that adorn the room or pictures that make it sedate. Just give me a room that is decent and clean and a bed that will comfort my frame, and I will be close to shelter the junk that I have, regardless of its purpose or name. And the lady in charge should remember the fact that the interest of boys is diverse. And that all entertainment isn't found in a pursuit of the Edgar A. guest form of verse. This motherly stuff is a thing we lament though noble in purpose it be. For the best they can do is to wreck your affairs and deal you a legal right suit. If a bottle of fluid be found in the room and the contents seem overly stout, She needn't get riled like a kitten-scratched child and threaten to throw the bunch out. If these motherly dames could inspire up, of course, with a love like our mothers have shown, We wouldn't be tempted so often, you see, to let out a pitiful groan. But they do not inspire us with love that's almost world as we really would call them a glutton. For they look for our secrets and private affairs and never do give us a room that is modestly "done" and the boys will always be fair. But specifically, our landlady must be broad and equally square.

### Doctoral Thesis Accepted By Departments of Germanic and Romantic Languages at Columbia

Professor Thor J. Beck has done and is still doing an extra amount of work toward his doctor's degree. He, accompanied by Mrs. Beck, has recently returned from California where he conferred with an eminent authority on French comparative literature, Fernand Baldensperger. Mr. Baldensperger is a professor in the University of Sorbonne, Paris, who was visiting at Stanford during the summer session. The subject of the conference was Prof. Beck's Ph. D. dissertation which deals with Northern and Southern French Evidences and Literature and which was started seven years ago in Paris at the suggestion of Professor Baldensperger. Prof. Beck spent an entire year in research at the libraries in Copenhagen and Paris. He has had this research the following years in American libraries, has now completed the work, and has had it accepted as a doctoral thesis by the departments of Germanic and Romantic languages in Columbia University, New York. He has had the honor of advance mention in French books and reviews. Leading domestic and foreign scholars, who have gone over Prof. Beck's manuscript, declare that the work will be received by the scholarly world as an outstanding contribution. Speaking in terms of quality, it is worthy of notice that this book is undoubtedly the biggest piece of sustained research that has ever been produced for an American degree. In printed form it will comprise some five hundred pages. It will be published as the first volume of a work in two volumes. Incidentally, the second volume, which will go to print shortly after the first has appeared, was accepted by Columbia already two years ago. Professor Beck, however, being more interested in his work than in a sadly commercialized degree, withdrew his book temporarily (thereby delaying his degree) until the first volume could be completed.

### Exchange Papers Have Tech News

Combing Toreador exchange papers reveals that Tech continues to get foreign publicity. A recent issue of the Daily Texan carried an article on the Tech athletic situation. The article contained comment on the two weeks training period prior to the opening of school and a review of prospective men for the Matador team. The Southwestern Stockman, Farmer of which Virgil E. Hobby, former Tech student, is associate editor carried a number of articles dealing with agriculture at Tech. One article was a general feature of the agriculture school. Another was about the Tech dairy plant. Several pictures of the agriculture school were included. Dean Weeks, announces a big enrollment in the school of Home Economics.

### Jearful Seraph

My kind of advice to Freshman Students: If you have thoughts original, Do not dispute instructor's creeds, Keep your in darkness Stygian.

### Scarlet and Black Season Opens After Two Weeks Intensive Drill

Close-up of Squad Showings Matadors Are In Good Condition; Schreiners Usually Furnish Surprises. Tied Last Game New Athletic Council Has Representative From Student Assn., Alumni Assn., Faculty, Board, Business. It won't be long now! Saturday, "Big U" Freeland will present his fourth edition of Matadors. For the past two weeks, preceding the opening of school, Freeland, with his assistants, Payne and Higginbotham, have driven his charges as never before in the history of the school. But it will all be needed, as you will realize when you glance over the schedule for the ensuing season. All eyes are now turned toward the Schreiner game, Saturday, at Tech park. The next week the Texas Longhorns will get as hosts to the Matadors at Austin. Then before long T. C. U. will be waiting in Fort Worth for Tech's third attempt to take their measure. In addition to all of this of the strongest teams the T. I. A. A. and Texas Conference are yet to be disposed of before the season comes to an end. Just now Freeland is directing all time and effort to whip into shape a team that can cope with Schreiner Saturday. Little is known of this football team from Kerrville, except that it has a big heavy team with a smashing attack. Old students will remember for a long time to come the ushering in of the 1928 season when Tech and Schreiner Institute battled to a scoreless tie in a sea of mud and wind cut at Fair Park. The game played during and immediately after a cloudburst was more of an exhibition of water polo than a football game. Water was from shoe-mouth to knee-top all over the gridiron. The best way to gain yardage that day was not kicking the line of passing, but by sliding. However little may be known of the lads from Schreiner, it is certain: It is a school that is free to play any man it chooses. The last time they appeared against Tech many ex-high school and college players were seen. In fact it was rumored that even the squad had at some time in the past been the captain of his particular high school squad. Only last Saturday Schreiner crushed a crack Army team from Kelly Field, San Antonio, to the tune of 44 to 6. Any team that can turn a trick like that is deserving of attention. Situated down in the hill country of Southwest Texas, little is heard of this particular school until it spills the dope by ruining the reputation of the state's best known teams. Captain Walker and his mates will have their hands full Saturday from gun to gun. Glance At Line-up. A close-up of this year's team shows two distinct sections: First, a little weakness in the backfield, and second, a powerful line. Due to the fact that Tech is this year playing under the Southwestern Conference rules, no new recruits can be added in the form of fish or transfers. Floyd Woodridge and Jack Hardy, quarterbacks, are not in school this year and the coaches are "hard put" to find a worthy successor to fill this gap. At this time J. D. Walker, Duck Marr and Archibald are waging a merry battle for this position. One bright spot, however, is seen in the return of "Satch" Hill to the place most vacated by graduate of Wilcox, Nicholas Clarence Hodges, Charley Woodridge, and Pickett are due to offer him stiff opposition. Hodges is being transferred from half to full. Pickett, it will be remembered was the man to score Tech's only touchdown against T. C. U. last year. Captain Walker, will have as a running mate, a large number of men with a smaller degree of experience. Levi Walker, Brothers, Smythe, Emison and Lassiter, and others are waging a battle royal over this position. In the line things are entirely different. Even the most pessimistic will admit that Tech will have two super-charging lines. Al Jennings (graduate), Dops White, "Tubby" Vermillion, and Preacher Galoway will get back but this loss is somewhat offset by the return to school of Vipsanz, end, and Red Smith and Sid Knowles, tackles. Candidates for ends are less numerous than any position on the line. "Vipsanz," "Cheesy" Lockhart, and Doc Barfoot, are showing up best at the present time. However, none of these have their positions clinched. Carpenter, Smith, Coppage and Knowles are towers of strength at tackle. Or Red, last year's captain, and Chubby DeWitt, have their positions clinched if present conditions prevail. Other candidates must "hump it" if they displace these men. Corley still is depended upon to carry the brunt of the

### Students Make Movies For Tech

Glacier National Park, Devil's Tower, Yellowstone National Park, Great Salt Lake, and Royal Gorge were some of the places visited this summer by students on the Geology field trip. Four states: New Mexico, Colorado, Wyoming, Montana, Idaho and Utah were visited. Those making the trip with Dr. Fetter were: Ira Clingingsmith, Ned Camp, Frank Wilson, Carl Stultz, L. V. Forley, P. A. Hargrove, Claig Perry, Wayne Gault, Daniel Boone, and Russell Thompson. The group carried a movie camera and made over one thousand feet of movie film which will be shown to Tech students and faculty members sometime during the year. The position made vacant in the Geology department by the resignation of Dr. Graham has been filled by the promotion of Dr. M. A. Stambrook to be associate professor in Dr. Graham's place. The organization of the staff has been completed by the appointment of Dr. W. L. Robinson of Portland, Michigan. Dr. Robinson has just completed two years of work in South America with the South American Gulf Petroleum company. He holds his bachelor and master degrees from the University of Michigan and the doctorate from Michigan State University. He has taught in Vassar and in the Colorado School of Mines and was formerly assistant state geologist of Michigan.

### Astronomy Added To Math Courses

As Tech branches out to include more and more courses of study we find here including astronomy. This year, Professor Michle, head of the mathematics department, announces that there will be a class on the subject at eight o'clock T. T. S. Dr. Earl L. Thompson of the University of Chicago will have charge of the class. A clipping which Professor Michle handed to a Toreador reporter included the following paragraph: "Astronomy is a great integrator among the sciences. Few surpass it in the demand they make upon the other sciences for collateral aid. The great practical astronomer must be mathematician and physicist and chemist. So much the better if he is geologist and biologist as well. But astronomy does not alone demand; it contributes. The mathematician glories in the conquests of his science; the physicist unites his universe when he finds the evidence of earth elements in sun and star, the physicist finds his great laboratories of cosmic processes in worlds forever beyond his reach but not beyond his study. The mother of science is still queen of the family of sciences."

### Buy An Activity Ticket, Beat The Schreiners

Glacier National Park, Devil's Tower, Yellowstone National Park, Great Salt Lake, and Royal Gorge were some of the places visited this summer by students on the Geology field trip. Four states: New Mexico, Colorado, Wyoming, Montana, Idaho and Utah were visited. Those making the trip with Dr. Fetter were: Ira Clingingsmith, Ned Camp, Frank Wilson, Carl Stultz, L. V. Forley, P. A. Hargrove, Claig Perry, Wayne Gault, Daniel Boone, and Russell Thompson. The group carried a movie camera and made over one thousand feet of movie film which will be shown to Tech students and faculty members sometime during the year. The position made vacant in the Geology department by the resignation of Dr. Graham has been filled by the promotion of Dr. M. A. Stambrook to be associate professor in Dr. Graham's place. Dr. Robinson has just completed two years of work in South America with the South American Gulf Petroleum company. He holds his bachelor and master degrees from the University of Michigan and the doctorate from Michigan State University. He has taught in Vassar and in the Colorado School of Mines and was formerly assistant state geologist of Michigan.

### New Building To Be Ready January 1st

According to the general contractor, the new chemistry building will probably be ready for use at the specified time, January 1, 1929, unless unforeseen delays occur. For some time it has been feared that delays during construction would cause the opening date to be much later than the contract time. However, by means of extra shifts and working overtime, the work has been speeded up to such an extent that the building will probably be ready on time. The new building is of brick, tile, and reinforced concrete construction, and its Spanish design is in harmony with the architecture of the other buildings on the campus. Inside the building there is a central lecture hall which will be used for general lecturing to the entire science department, besides smaller lecture rooms and laboratories, and an exhibit room. Eventually, as the title signifies, and as soon as ample accommodations are secured for the other science departments, the building will house the department of chemistry alone. Immediately after its completion, however, due to crowded conditions, all science departments will be housed there.

### Cafeteria Ready With Good Eats

Miss Katherine Harper, director of the Tech College Cafeteria, announces that they are ready to serve the students with food of excellent quality at low prices. The cafeteria is used as a laboratory for Miss Harper's classes in school lunch room and institutional management. The cafeteria is part of the college and as such is on the campus for the use of the students. It is located in the square stucco building south of the home economics building.

### CONFERENCE

The Dallas News recently carried an article to the effect that Arkansas University would be asked to resign at the coming meeting of conference officials to be held in Dallas in December. Distance to and from Fayetteville is given as the reason for such action, with the attending difficulties in direct train service. But the real reason is due to the fact that Arkansas is unwilling to play all of its conference games away from home. T. C. U. is the only member of the conference that swaps games. S. M. U. does it in a grudging way. The other members absolutely refuse to journey to Fayetteville because of the small gate receipts. And even at the other cities in the conference, Arkansas is a poor drawing card. Many think that Oklahoma A. & M., recently turned out of the Missouri Valley Conference, would ask for re-instatement, from the conference from which they recently resigned. Still others take it as a move to admit Simmons, or Centenary College of Shreveport. Both of these institutions are eager for a berth in the conference. Both applied last year at the same time that Tech did. The only information that the officials gave out was a recommendation for Tech to follow conference rules in the future. Whether or not any school will be admitted this year or not is open to speculation. And, if one is, the name also is open to speculation. Tech, to our way of thinking has the inside track.

### A SOUTH TEXAS TECH

"And Now It's a South Texas Tech" was the name of an editorial which appeared in the Dallas News not long ago. Kingsville and Edinburg wanted a South Texas Technological College. The News said you couldn't blame Kingsville and Edinburg but: "If the State is foolish enough to empty its treasury in a multiplicity of so-called colleges, Carrollton, Mesquite, Hutchins, Seagoville and Lancaster would like one apiece. There are plenty of towns to take the appropriations. But spattering appropriations out over Texas to gratify the demands of chambers of commerce isn't going to build an educational system for Texas. Let's make thoroughly modern, thoroughly efficient, and thoroughly wholesome the State schools we have in the fields to which they have been assigned, before we add anything more to the competition they now meet and the problems they now face. In the long run Kingsville and Edinburg will be better off by that. And so will the rest of Texas."

### THE GATES ARE CLOSED

Modern success of any kind requires a great amount of mental concentration. The average man does his particular task better if he is isolated—to a certain extent at least—from outside distractions.

Coach Freeland realizes the truth which we have mentioned. Furthermore, he realizes that he can not produce a champion team when spectators are around trying to talk to the players. He realizes that he and his assistants can not give the best they have to the team when some concession-hunter is pestering them for a position about the stadium this Fall. Just the other day a peanut and popcorn man from downtown delayed the coach considerably. The coach almost had to become impolite to get rid of him. The next day the gates were closed!

We'll see the results of this concentration of effort later.

### SPEAK

Last year an editorial was printed in The Toreador which criticized the faculty for not being more social with the student body of Tech. In an issue of the paper which followed there was a rebuttal editorial. In general, there was quite a bit of discussion throughout the entire school on both sides of the question. Several faculty members mentioned the topic to their classes.

Someone has mentioned the subject again this year. A faculty member declares he does not speak to any other than his own students because he has sometimes

been "cut" when passing a group of students, greeting them, and failing to receive a reply. Yet this faculty member is broad-minded enough to explain—later in the conversation—that the incidents were probably not intentional.

Often, misunderstanding results in incidents like this simply because one party or the other does not realize what the proper thing to do is.

This year, EVERYBODY SPEAKS AT TEXAS TECH.

### VESPER SERVICES

(Subdued emotion of a student who was present)  
"There was something refreshing and rare about the Vesper Services. A quietness and peacefulness descended upon the spirits of all during the hour. A sure and steady strength, which comes only in the quiet thoughtful moments, came down and enveloped the group. The crying, pitiful needs of humanity, the full realization of richness, pureness, gloriousness, rareness and beauty of the Spiritual Life came to each one like a rose-bud opening in the Spring. The complete uplifting of thought and spirit, the humility of body and the complete submission of the Soul to His will, made life and belief worth living."

## Attitude Test Given Freshmen; To Reveal Interesting Results

A systematic study of the Freshman mind was made during Orientation by classifying reactions to one hundred and five statements concerning campus and life problems. Every Freshman could register his opinion in regard to each statement in one of five ways; namely, true, probably true, doubtful, probably false, or false. The primary purpose of the study was to determine the attitude of the student in regard to problems which lie ahead of him. The results, although not completely tabulated, indicate the quality of Freshman material that Tech needs. Of equal value with the objective study made is the early stimulation to think constructively on matters which are of vital concern.

Interesting Results From the Study Will Appear in Later Issues of The Toreador.

A list and classification of the study follows:

- 1.—College life is far different from high school.
- 2.—College prepares me to begin real life in the future.
- 3.—College is for the purpose of making better citizens.
- 4.—College is an opportunity for freedom that I haven't known.
- 5.—College is life in reality, and not merely preparation.
- 6.—After college days students will not think of doing the things they do in college.
- 7.—Graduation from college is a signal to cut loose from the frivolity of college days.
- 8.—The world expects a college man to have higher ideals than others.
- 9.—College graduates are better citizens as a result of college experiences.
- 10.—One can live one kind of life in college and immediately change to another on graduation.
- 11.—College education does all we claim for it.
- 12.—College students are of a better quality than is the average run of American citizens.
- 13.—The purpose of college is to train one to make a better living.
- 14.—The purpose of college is to give polish and culture.
- 15.—The purpose of college is to make specialists.
- 16.—During the first year it is not necessary to know what vocation one will follow.
- 17.—If one follows his interests in college he will discover his life vocation.
- 18.—The majority of students enter college with a definite life purpose.
- 19.—Discovery of Life Vocation is the most important decision a student has to make.
- 20.—Our actions depend on our attitudes and habits.
- 21.—We should have an agreement that board and room is not to be paid in advance.
- 22.—If I break, mar, or deface furniture or property in my room, or any other room, I should pay the damage.
- 23.—Any change of room should have permission from the room bureau in Cecil Horne's office.
- 24.—A college student should inform the landlady of any contemplated change in board or room at least a week prior to removal.
- 25.—If I do not have money to pay a bill when due I should mention the fact and make arrangements to pay on a definite date.
- 26.—To go crashing into another's room, without knocking is not the mark of good home training.
- 27.—Rough houses is all right if I have paid my rent.
- 28.—The students in a house should agree to a regular quiet time study.
- 29.—It is an honor to have work-ways through college.
- 30.—If one has plenty of funds he should work part of his way along the benefit of all.
- 31.—Working ones way adds to the value of college education.
- 32.—A student should take 5 years to do a 4 years college course if he works his way.
- 33.—Several hours employment every day tends to make for lower grades.
- 34.—The grades one makes honestly is a standard by which the value of college education can be judged.
- 35.—Employment should be reserved for those who need it to get through school.
- 36.—Budgeting time increases one's efficiency.
- 37.—Budgeting time makes for better grades.
- 38.—Budgeting time makes it possible to participate in extra-curricular activities.
- 39.—We waste much time because it is not budgeted.
- 40.—It is of no particular value to plan carefully how I will spend my time.
- 41.—This budget of time will work hardship by compelling me to do routine work instead of something else.
- 42.—College is a place where those who have had desirable experiences come to share such experiences with those who have not had them.
- 43.—The personal contact of students with professors is one of the best things in college education.
- 44.—The kind of friendship between a student and a professor depends on the professor.
- 45.—The kind of friendship between a student and a professor depends on the student.
- 46.—The kind of friendship between a student and a professor depends on both.
- 47.—A student would welcome having a professor take the initiative in the above.
- 48.—High grades are generally an indication of how well one knows a subject.
- 49.—High grades obtained unfairly raise the value of the work done by every other student at Tech.
- 50.—Cheating of any kind prepares one for the business world.
- 51.—Cheating is a part of college education.
- 52.—Cheating prepares one to be at his best.
- 53.—Students cheat because they haven't taken time for study.
- 54.—Students cheat because they do not want to fail.
- 55.—Students cheat because they are unable to learn.
- 56.—Students cheat because they are not interested in their subjects.
- 57.—A diploma is of less value because cheating is tolerated.
- 58.—Cheating is an easy way to go through college.
- 59.—Students who cheat are not dishonest in other ways.
- 60.—Cheating in college makes it easier to go crooked after college.
- 61.—Cheating can be eliminated from college.
- 62.—Cheating can be eliminated by students.
- 63.—One can trust a student who cheats on examinations.
- 64.—Cheating starts before college.
- 65.—Giving a fellow student the correct answer in examination is not helping him.
- 66.—A student should report all instances of cheating.
- 67.—The students should deal with all cases of cheating.
- 68.—If a student cheats in high school he will have too much self-respect to cheat in college.
- 69.—Cheating in college is the beginning of crooked business and rotten politics.
- 70.—It is all right to break a rule with which I disagree.
- 71.—Rules and regulations prevent one from being himself.
- 72.—Rules and regulations are for

- 73.—Rules and regulations should be made without any consultation with students.
- 74.—A lawbreaker in college will be a lawbreaker after college.
- 75.—Rules and regulations help make our education more effective.
- 76.—Rules and regulations are to help the weaker ones to go straight.
- 77.—If I do not agree with the rules of a college I should not register.
- 78.—Ignorance of a rule is no excuse from punishment.
- 79.—College students should be required to pass an examination on rules and regulations at the college.
- 80.—New students should expect old students to set the standards.
- 81.—The old students have thought through and put into operation the best things for college life.
- 82.—A new student should not openly question the authority of an old student.
- 83.—A new student should make his own decision regardless of what old students think.
- 84.—When old students break the law by hazing, a new student should inform the dean of his school.
- 85.—Students come to college primarily to study.
- 86.—Anything that detracts from this is undesirable.
- 87.—All extra curricular activities have a place in college life.
- 88.—It is more important to get a college letter in athletics or in some other activity than to be an 'A' student.
- 89.—The college grind really represents what we come to college for.
- 90.—One should excel in his studies first and extra curricular activities afterward.
- 91.—Excellence in extra curricular activities means excellence in the game of life.
- 92.—The team must win even though ones grades suffer.
- 93.—The quality of the college depends more on the success of the team than on high scholarship.
- 94.—One should engage in several extra-curricular activities.
- 95.—It is very desirable to excel in one extra-curricular activity.
- 96.—Those who excel in extra-curricular activities are sure to succeed in business.
- 97.—Those who excel in extra-curricular activities at the expense of higher grades.
- 98.—The spirit of Tech is deter-

### Student Opinion

How fine to be among the many boys and girls who are getting to enter college. It is good to be back on the dear old Tech campus again. The one who loves it dearly would like to go on to school forever. It is great to hear again the cheerful, friendly greetings from all the friends he enjoyed so much last year. Many times during the summer he thought of them and hoped that each would be back again. Freshmen, the upper-classmen welcome you, and hope Tech will mean as much to you as she has to us.

### PATRONIZE TOREADOR ADVERTISERS

Students are urged to patronize Toreador advertisers. Business firms that advertise in The Toreador are local enterprises. They usually have some particular piece of merchandise which is adapted to the needs of the college student. Besides, according to the general rule of advertising, any standard product must possess a certain amount of quality before it justifies its producer and distributor the expense of advertising it. Local merchants speak to you through their advertisements, telling you that they are willing to stand behind their goods. READ THE ADVERTISEMENTS. PATRONIZE TOREADOR ADVERTISERS.

### Green Things Are Growing Things President Horn Tells Freshmen

Addressing the freshmen in the gymnasium at the beginning of Orientation Dr. Horn emphasized the opportunities which the freshman of today possesses that the former freshmen have not had.

"The student of today has a rich heritage than ever before," Dr. Horn said. "One great thing about the freshman is that he hasn't been where he is going. Older men and women like the ones who are on the platform, in many cases, have been 'where they are going.' You freshmen haven't been where you are going. Your accomplishments are before you. I wish, if it were possible—and I am sure that these things here would do the same thing—gladly exchange places with you."

**Honesty is Essential.**

"There is no doubt that men do not all possess the same mental ability. There are five students on the front row here. They probably have had different environments. Some will probably make greater achievements than others. Yes, I believe, that 'how you go' is as important as 'how you use that which we do have.' Habits of studiousness and of thoughtful competence, in a measure, for variations in the amount of in-born intelligence. I am inclined to believe that you will not cut the grade just about as much as you put into it."

**"Green Things Grow."**

In commenting on his impression of seeing so many green caps Dr. Horn said: "Green is the color that is green. A leaf for instance, which is green in the growing stage. But as it becomes yellow or brown it has just about ceased to grow. So it is with you freshmen. You are still growing, still developing. If I were you I would resolve to give the best that I have to the college. Yet, you should not take college life seriously. I hope you are in good physical condition now and I hope you are in just as good physical condition when you finish the year's work. If you are coming here just to have a good time you are not likely to have it. The pleasure which comes from college life is a secondary thing. This is true in many phases of life."

**Undergraduate Years Are Most Pleasant.**

Dr. Horn said he believed the freshmen, who were seated on the platform, would agree with him that the four years of their undergraduate study were the most pleasant of all their university life.

After the address Dean Gordon of the School of Liberal Arts introduced the other deans of the col-

**CALENDAR**

Friday — Open house of churches, evening.

Saturday—Football. Schriener Institute vs. Tech. Tech Field. Reception given by President and Mrs. Horn to all students. Administration Building, 3 p. m.

Sunday — Opening sermon, gymnasium, by Dr. L. N. D. Wells, pastor, East Dallas Christian church.

lege, the president of the Lubbock Ministerial Association and the president of the student association. He then introduced the secretary of the College Y. M. C. A., Roy McCullough, who supervised the distribution of a freshman number of "The Inkologist" together with an attitude test.

The test is to be found in another part of this issue of The Toreador. The results will probably be printed in next week's Toreador.

### School To Be At Tri-State Fair

At the Tri-State fair, to be held at Amarillo September 22 to 29 inclusive, the Agricultural School will display some of the largest heads of high year ever grown in West Texas. The school has six heads which are about fourteen inches long and which weigh about a pound and a half. Twenty-five varieties of grain sorghum and sixteen varieties of beans and peas will be displayed.

The dairy products department plans an educational exhibit which will be a miniature representation of the dairy industry. The exhibit will show the different products which can be made from milk.

Five students, outside of the members of the association, will be employed to prepare and deliver milk for the student Dairy association.

In addition to the past which they receive they will satisfy certain requirements for a major in dairy work.

"I owe that man a great deal. He alone, among all others, showed confidence in me when the clouds were dark and threatening."

"How?"

"He lent me an umbrella!"

### Tech Enrollment Increases 358 In 4th Year; Is 1572

**Total Registration Up To Date Is Thirty Per Cent Increase Over This Time Last Year.**

A thirty percent increase in enrollment was announced by officials of Texas Tech following the convocation officially launching the fourth college year, which was held in the gymnasium this morning.

Total registration up till today—first day of the new term—was 1613 or an increase of 369 students over the same date for last year.

Mrs. Helen B. Moore, state representative-elect from Galveston, delivered the principal address of the opening exercises. Stressing the importance of good citizenship in education, she spoke particularly to the girls of the college student body.

Ten other speakers figured in the exercises this morning, which packed the gymnasium to capacity.

Short addresses were made by Senator J. T. Holbrook, of Galveston; J. T. Kimbro, of the board of directors of the college; John Darroast, Galveston attorney; Mayor Harley D. Woods, of Lubbock; Pink L. Parrish, senator elect from this district; Dr. J. T. Hutchinson; E. W. Kenyon, of Galveston; Senator W. H. Bledsoe; and Dr. Paul W. Horn.

**Tells Girls' Opportunities**

Centering her remarks chiefly around the activities of the girls of today and tracing briefly the position of women on the basis of suffrage and equality, Mrs. Moore said that the college girl of today was fortunate in the wealth of opportunities offered to them.

Opening with a prayer by the Rev. W. R. White, pastor of the First Baptist church, the convocation lasted little more than an hour, ending with the mass singing of the Tech song, "O College Mother Beautiful." Music was furnished by the Tech band of approximately eighty pieces.

**Hopes For Enlargement**

Texas was pictured by Senator Holbrook as one of the leading states in the nation from the standpoint of education with the next few years. He expressed a hope that the next legislature would provide an assembly hall and an agricultural building for Tech.

This session of the college was shown by the speakers as having greater prospects than any previous term. Dr. Horn, the college, Lubbock, and the South Plains were eulogized by the speakers. Prog-

### Fish "Button Up" Writes Sweetie

Dear Girl!

Please don't let me forget to give you a little of my own medicine.

I sure did get a lot out of my first impressions; the first one I received was at the Tech Drug Store. I was happily engaged in singing 'T'd rather be a Freshie and an ignorant fool; than to be an Upperclassman in Texas Tech School—'

An overlarge pair of shoes had attracted my eye. The singing ceased abruptly. Glancing upward, I saw a Sophie with a deep frown on his face. I at once began to edge closer to the protection of the door sill, thus giving myself a headstart. But I suddenly received a striking inspiration, from the rear, which seemed to have an uplifting effect; leaving a great impression upon me. I was, then, immediately beset with questions; remembering that, "Ignorance was Bliss," I kept silent. I received some more of the Texas Tech spirit at this time. I certainly have developed a deep respect for the Tech; especially the Tech belts. These Upperclassmen are getting in shape for the Matador team by fighting the Freshmen "BULL." They have had a pretty successful season so far, with a succession of wins on their side. The freshmen are winning the honors for the track, though, by running ahead of

ress of the school from its beginning four years ago to its present standing high among the other leading institutions of the state was pointed to with pride.

**Announcements Made**

Numerous announcements concerning the activities at the college within the near future were made by college officials. Open house will be held by all the churches of the city Friday night in honor of the students. The first football game of the season will be Saturday afternoon at the Tech field with the Matadors playing Schriener Institute of Kerrville. Dr. L. M. D. Wells, pastor of the Dallas Christian church, will preach the opening sermon in the Tech gymnasium Sunday night.

The president's address will be delivered at the second convocation of the students on the morning of October 3. The first all-college pen meeting will be held tonight at the gymnasium. It was announced by W. R. Sewell, yell leader.

Dr. Horn pointed out that several hundred students were in the process of registration and will bring the total initial enrollment to a still higher point as soon as a complete check-up can be made. The present count showed the increase over last year to be 358.

the Upperclassmen. The competition is great. Every time I see an Upperclassman, I want to call him "NIAGARA," because he is "ALL WET."

My first impressions are beginning to have a sort of painful memory connection, so I'll have to close for this time.

Your Sweetie,  
SLIME BUTTEN WFF.

### Housing Problem Faces Horne; Few Bachelor Quarters This Year

With the approximate initial enrollment of 2,000 students, the largest in the history of Texas Technological College, the problem of housing is facing Prof. Cecil Horne, director of housing, with publicity. During the past week this problem has grown to be a much greater question than was expected.

The housing committee plans to establish the students in comfortable, convenient homes throughout the city and at the same time form a spirit of strong co-operation between the school officials and those who keep the students. An effort to produce an atmosphere of home for the students in these places is being made.

**"Those keeping students,"** Mr. Horne says, "should have comfortable rooms with proper conditions for study and for moral and social environment. They should report all cases of sickness and all cases of drinking. A special effort will be made this year to curb drinking around the campus. A large part of our disciplining can be traced to housing," Mr. Horne stated.

"Students who habitually fail to establish study hours should be reported. We do not have a lot of rules to enforce regarding housing. We merely want the students to live natural lives while in school here," he added.

In order to make the rooms more comfortable, not more than two are to be allowed in ordinary single rooms. Where a student has settled in one home, only in rare cases will he be allowed to move. Bachelor quarters will be allowed in only a few instances for some of the working students. Boys and girls

will not be permitted in the same residences and the house committees plan to make regular inspections, especially of the larger houses.

As a result of Mr. Horne's investigations during the summer of the housing conditions of other schools, he states that special efforts will be made to better them here.

"The average price for room and board has been set at \$32.00; ranging from \$25.00 to \$40.00," he said.

An approved list has been compiled and no student is allowed to register until he is in an approved boarding place. Three hundred and twenty-five houses capable of caring for 1224 boys have been approved, while 1193 may receive board at these places. Mrs. Doak, dean of women, reports that there are plenty of places for keeping girls.

## Series Of Orientation Lectures Acquaint Many New Students With Problems Of Registration, Etc.

### Registration, Housing and Library Rules Given by Faculty Members; Vesper Evening On Program.

Over six hundred new students heard President P. W. Horn when he spoke on "The Freshman of Today," Friday, September 21, the opening day of Freshman Orientation. Music was furnished during the program by W. R. Waghorne and Dorothy Knickerbocker.

In the afternoon Freshmen assembled in the gymnasium for other lectures. Dean Wm. J. Miller explained the college organization and working agreements. Registrar E. L. Dohoney showed the importance of having high school and college records, and the difficulties arising due to failure to have records when the time comes for registration. Cecil Horne, director of the Bureau of Information, discussed "Board, Rooms and Employment."

W. R. Waghorne and Miss Pirtle were in charge of the program Friday night, which was Freshman Joy Night.

Saturday morning at eight, Professor W. E. Clement greeted the students with an outline on "How to Study." Elizabeth H. West, librarian, told of the benefits derived from study in the library.

"Budgets for Life," by Dean A. H. Lehigh and "Things which Eliminate You from College," by Dean J. M. Jordan, were other lectures of the morning hours.

The program for Saturday afternoon consisted of conferences with department heads and representatives, and a talk on "Personal Hygiene," by Dr. J. T. Hutchinson of the Lubbock Sanitarium.

Sunday's program was arranged by the church leaders of Lubbock so that the new students would have the opportunity of meeting those connected with the churches of Lubbock. Brief talks were given on "The Significance and Place of the Church in the Life of a College Student," by Dayle Wallace, Margaret Turner, and Dr. W. T. Read.

Vesper Service. In the evening, Vesper Services were held. Call to worship was made by Irwin W. Coleman. The group sang, "Day is Dying in the West" after which Hal Lary led in prayer. Dorothy Knickerbocker rendered a violin solo, Dean Doak read a Scripture lesson and Dean Gordon led a prayer in concert. Mrs. T. J. Beck sang a solo, Roy McCullough led in a period of devotion, and Miss Anah Jo Pendleton read Alfred Noyes' "In the Cool of the Evening." The group sang, "Abide with Me." Dr. Horn closed the services with prayer.

has been given this date on future schedules.

This change will leave Howard Payne out in the cold, so far as a Thanksgiving date is concerned. These two schools have tangled up on this date for years in the past.

Shorty Hayhurst, last year's quarter, is coaching this year at Brownfield. His first games have resulted in ties. Two weeks ago Brownfield tied Littlefield 13-13. Last Friday his team held the heavy Big Spring team to a scoreless time. Reports from Brownfield are to the effect that "Shorty" does not fail to "bawl 'em out."

Windy Nicholas, at Tahoka, has won his first two games. The first game he beat Russel Dennison's O'Donnell outfit 13-0. Last Friday they beat the Lubbock second team 7 to 0.

### The Megaphone

The first all-college pep meeting is scheduled for Thursday night at 7:30. Yell leader, Scott Poage says he wants a good representation of both upper-classmen and slimes. Another all-college pep meeting will be held Friday night at 7:30, at which time definite plans for the future will be announced.

Be sure to "make" both of these meetings.

Slimes showed their stuff Monday night at the first all-slime pep rally. They were very apt at learning the yells and showed some real "college spirit." Fish Bohannon, leader for the freshmen, says class will be out Thursday and Friday.

Let's go, upper-classmen.

"Big" Jim Cloud issued his first call for members of his "Rough Necks" Monday night and was literally swamped with slime applicants. Practically every slime present answered the call.

Slogan ribbons bearing the slogan "Fight 'em Tech," will be ready Thursday. Everybody should be out to the first game Saturday wearing one of these ribbons. They will be sold by the yell leaders at the pep meetings Thursday and Friday. Price one dime.

The yell leaders are using the means of raising money so they will not be forced to ask the student body for donations, as was the case last year.

Everyone who wants to show that he is behind the team, and at the same time benefit the yell leaders, should buy one of these ribbons.

The Matadors are certainly primed for the Mountaineers. No tie this year. A win.

"Fight 'em Tech."

### Sister Movement Begun This Year

The "Little Sister" movement which is used with such success in many colleges was initiated at Tech last week when members of the Woman's Forum sponsored the adoption of Freshmen and new girl students by old students.

Beginning on Monday all trains and busses into Lubbock were met by committees from the college. New girls were taken to their rooms, introduced to college customs and helped in various ways to feel at home.

Misses Margaret and Sarah Williams had charge of the adoption of the new students. A file has been made and a permanent record is to be kept of the accomplishments of the initial year.

Big sisters are to take the little sisters to the reception given by Dr. and Mrs. Paul W. Horn Saturday evening at the Administration building, or see that they have dates to go. On Sundays they will accompany them to church, and in every way possible be as big sisters are.

Although this plan is new to many former students of Tech, the sponsors appear elated over its success thus far. If any upper classman does not have a little sister and desires to adopt one she is requested to see Margaret or Sarah Williams.

### Athletic Items

Among the man men who are ineligible to play this year because of the barring of transfers and freshman, is found Sides, star tackle of past years with Howard Payne. Sides is working out daily with the varsity but will probably play with the freshman team this fall. He can be depended upon to fill Carpenter's place next year in an excellent manner.

Waco High, which has an obnoxious habit of winning the state high school championship year after year sends four men to Tech this year. Swift, center, and Nixon, half, both all-state men, are accompanied by Jenkins, linesman, and Buckler, a back. These men were lamenting the fact that Waco High had no team this year, based upon the fact that Waco only beat Belton High 62 to 0. This is the first time in 6 years that Belton has been able to score against Tyson's Tigers.

Sad Sanders and Big Tussell were in town this week arranging to re-enter in the school of engineering. Both of these men are star guards from last year's A. C. C. team. Inability to get desired courses is the cause of the change of schools. This will provoke no sorrow from Tech, especially when it remembers the outcome of last year's Armistice Day game with A. C. C.

Up Canyon way, they are announcing to the world that the Buffaloes will have the fastest backfield in the history of Tech's example, a steel stadium is also being erected. Two such stadiums will be needed (and then something) on Thanksgiving when they lock horns with the Matadors. Incidentally, this is the last year in which Canyon will play Tech on Thanksgiving. Simmons University

### Big Budget For Ensuing Year Adopted By College Association

The Board of Management of the Tech College Y. M. C. A. has adopted a budget of \$7500 for the academic year of 1928-29.

W. W. Rix is chairman of the committee on finance which directs the work of securing funds. The money will be spent in the interest of an indigenous campus organization with primary responsibility for a spiritual movement among the students of Tech and the boys of the South Plains. This budget will be met by students, faculty members and friends.

Class In Gang Leadership. Roy McCullough, student Y. M. C. A. secretary, will offer a course in gang leadership. It will be open to college men who are interested in making "boy's gangs" assets to the community rather than a liability. It is not known whether the course will carry credit or not. Authorities seem inclined to believe the course should be taken primarily by the student who has a natural interest in social work.

"Dad" Elliott to Be Here. Former regional secretary of the student Y. M. C. A. of the central states, A. J. "Dad" Elliott, who has recently been transferred to the New York office with responsibilities to the entire student movement of America, will be at Tech October 6 to 10 for a series of conferences. "Elliott is a man who hits straight from the shoulder on moral and spiritual issues, not forgetting the problems of the social order," a faculty member said in reporting Mr. Elliott's future appearance here. "He has been in this kind of college work for twenty-five years. He is probably closer to the athletic situation than anyone in the middle west outside of Griffith. He was an All-Western football man at Northwestern University."

On October 6 and 7 a group of

older boys of the South Plains and eastern N. M. will meet with Mr. Elliott. On October 8, 9, and 10, conference for college men and women.

### Dr. and Mrs. Horn Receive Faculty

The annual reception for the Tech college faculty was given by Dr. and Mrs. Paul W. Horn at their home on the campus Thursday evening, September 20, with one hundred and twenty-six members of the instruction staff in attendance.

A program was given during the course of the evening which consisted of a vocal solo, "Hasta Manana," Edgar Shelton; a piano solo by Mrs. E. F. George; music by W. R. Waghorne; vocal solos by Mrs. Beck, and Donald Murphy; a violin solo by Mrs. Kenneth Knickerbocker, and a reading by Miss Ruth Pirtle.

Mrs. James G. Allen was designated as the official faculty bride for the year; Joseph Thomson Patton was designated as the official baby of the faculty, while Dr. W. L. Ray and R. W. Fowler were selected as official college bachelors for the year.

Miss Mabel Irving, head of the Clothing Department, will be a judge at the Dallas State Fair, October 3rd to 6th.

Miss McCrery is again in charge of the practice home. Students are always welcome to the home during visiting hours, to be announced later.

### Tech Studes Know 87 Businesses; Over 750 Apply For Positions

Professor Cecil Horne, head of the Employment Bureau, Accepts Only Bona Fide Applications.

Between 750 and 800 students have filed their applications for employment with the Texas Technological College Bureau. Eighty-seven different types of business are represented.

"No student's application for work is taken unless it is known that he needs work in order to go to school and is capable of filling the position he seeks," Mr. Cecil Horne, head of the employment bureau, said.

Applications listed with Mr. Horne which include experienced students in the positions sought, are: Abstract clerks, 6; advertising, 16; architect's office, 1; baker, 1; bank clerks, 2; bookkeepers, 32; boys' club assistants, 10; canvassing agents, 8; care of floors, 12; carpenters, 26; cartoonist, 1; chauffeurs 32; child companions, 12; choremen, 39; church sextons, 10; civil engineers, 3; clerks, drug, 40; dry goods 54; grocery 44, hardware 10; coach as-
