

Students Send Letter Of Protest

— 52 Delegations —

MUN Opens

By MICHAEL O. READ
Toreador Feature Editor

Texas Tech's second annual Model United Nations opens today with the kick-off session of the General Assembly at 10 a.m. in the Tech Union Ballroom.

Delegations representing 52 countries will gather for roll call preceding the day's activities. Dwight Young, president of the General Assembly will introduce three resolutions, and the day will be devoted to presentation of position papers on the resolutions by the delegates.

The nations represented in the Assembly have been grouped into six blocs and South Africa. Each bloc and South Africa will present a 10-minute position statement, and the remaining countries will be allowed five minutes to outline their positions.

The Model U.N. discussion topic is Human Rights and Apartheid in South Africa, and the delegates will focus attention on the potentially explosive situation under the South African Verwoerd government's racial policies.

NO debate on the resolutions will take place today, but each country will outline its stand when debate does occur. A committee—the six bloc leaders, the six bloc faculty advisers and Dr. Paul J. Woods, over-all Model U.N. adviser—will judge the presentation papers. Awards will be given the best 10-minute paper and the three best five-minute papers.

The Saturday session will be highlighted by an address by Philip Deane, director of the United Nations Information Center in Washington, D.C.

Following Deane's appearance, debate on topic resolutions (See Page 5)

APPEALS DECISION — Doug Boone, senior from Christoval, has sent a letter to the Tech Supreme Court protesting the Student Council's ruling establishing a cheerleader screening Board.

Appeal To Supreme Court

By PATRICIA WATKINS
Toreador Staff Writer

Two senior students Thursday sent a letter of protest to the Student Supreme Court concerning the recently approved cheerleader screening board.

Doug Boone, electrical engineering major and David Northcutt, sociology major, challenged the constitutionality of the board on the grounds that cheerleaders are elected, not appointed.

TENTATIVE DATE

Ronnie Suiter, Chief Justice of the student Supreme Court, says the Court has tentatively set the hearing for Tuesday at 5 p.m. Suiter says the Court wants to hear the case before the board has time to go into effect.

BOONE SAID HE feels the screening board is an attempt to combine appointive and elective methods of seeking offices.

He said he considers the present system of choosing cheerleaders effective, and feels the board cannot solve the only problem involved in electing cheerleaders — student apathy.

THE PROTESTING students think the student body can carry out all stated purposes of the screening board. They also feel a screening board could not effectively carry out some of the stated purposes.

NOT QUALIFIED

For instance, Boone said, the board would not be qualified to judge candidates in suggested areas of body control, crowd control and appeal or value of new cheers.

BOONE SAID HE felt the proposed board is unnecessary and bureaucratic. He feels it is infringing upon the cheerleaders right to be elected and the student body's right to elect its cheerleaders.

"If a screening board is necessary for cheerleader elections, why not set up boards to screen candidates for Student Council elections and completely subordinate student election processes to minorities in the form of boards? This election process has worked in world democracies and has worked for Texas Tech."

THE PROTESTING students will be able to present information and witnesses to the Court. David Black, member of the Pre-Law club, is considering representing the plaintiffs.

—Fraternity Focus: Part 3—

Fierce Housing Battle Continues

By CECIL GREEN
Toreador Copy Editor

On a far western edge of the Tech campus is a peaceful-looking plot of South Plains prairie land.

The field is cultivated, rests on a gentle slope and is a perfect picture of an idyllic farm scene.

Yet, this land is the turbulent battleground of a fierce verbal fight between Tech's social fraternity and sorority systems. The battle began about six years ago when the campus sororities and fraternities combined forces to buy the land and build individual greek lodges or houses out there.

But, since that time, no progress has been made toward the building of anything on the 20-acre tract, due to sporadic indecisions and bickering between the two greek systems.

However, the end to the perplexing situation that has been hindering the 20-some-odd student organizations is almost in sight. The final showdown—which could end in a working truce or a continued war—will take place at 7 p.m. today in the Mesa Room of Tech Union.

At that time, the Tech Interfraternity Housing Corporation will meet. The group, composed of alumni representatives and a student member of most fraternities and sororities, is the governing board that controls the land and decides what will be done about it.

CECIL GREEN

NOTHING ACCOMPLISHED

"For the seven years the Corporation has been in existence, it has not accomplished anything," said Gary Lawrence, Interfraternity Council president, "but after this meeting, we hope to come to a mutual agreement and move ahead with the Corporation and the building of lodges.

"Actually," he continued, "the board will be voting (tonight) on whether to go ahead and okay the installation of utilities on the land, but in effect, the decision will be on whether lodges can be built immediately."

According to prior agreements, none of the greek groups can proceed with building until three-fourths of the Corporation members agree on installing utility services. "But after the utilities are in, each group should be able to move at its own speed," Lawrence said.

However, some questions which have been hashed and rehashed in the past will probably have to be clarified once more at the meet tonight. Some of the disputes and questions posed in the past include the following:

- Should the fraternities and sororities try to build houses or lodges on their land?
- What provisions can be made for the new groups which have since come on campus—since the Corporation was formed—and have no land?

- What will the obligations be to build when and if the move is ever made?

To answer these questions, it is necessary to dig into the past and fully understand what has happened and what may happen.

ORIGINATED IN 1953

The idea to build special units for fraternities and sororities originated in 1953. At that time, the college administration wrote the Texas attorney general, requesting information concerning leasing college land to fraternal groups. The reply was that the matter would have to go to the legislature and, at that time, it seemed highly unlikely that action would be taken—either by the groups on campus or by the legislature.

Then, in 1955, another plan was proposed, one which suggested special dorms for fraternities and sororities. The idea was that space would be allotted according to size of the individual groups.

However, the greek organizations rejected this plan and began immediately to work on another one. But before anything could be definitely planned, the legislature attached a rider to another bill. This rider stated that no college building or portion thereof could be used exclusively for one group.

A third idea was started soon after this incident, in 1956. This time, the plan was to find private land the greeks could buy out of their own funds—and find it they did.

And their discovery was the land they finally bought, the 20-acre tract located in the area around Quaker Avenue and 16th Street. This section is bordered by college land on the east and north and faces onto Quaker Avenue; the area to the South is zoned for duplexes and could be used for future expansion.

COST OF \$3,750

After the land was located, each group was asked to put up \$3,750 to be used for the purchase of the tract. Also, the Interfraternity Housing Corp. was organized in the spring of 1957 for the purpose of holding the land once it was purchased.

At that time, there were 10 fraternities and 10 sororities on campus, and each was a member of the Corporation. Since that time though, another fraternity—Kappa Alpha—and two more sororities—Phi Mu and Chi Omega—have joined the campus scene and are not members of the board of directors.

One of the recurring questions is the aforementioned one concerning houses or lodges. Some of the campus organizations are still trying to get housing units instead of lodges.

"The distinction between these two terms is quite important," explained Lawrence. "A lodge is a place where the fraternities and sororities can hold special functions, parties and study halls, whereas a house would actually have sleeping and rooming quarters."

And, if the greeks tried to have houses, it would be about (See FRATERNITY FOCUS, Page 5)

Dr. Guilds Announces Resignation

—See Story, Page 2

Council Seeks Aid In HS Recruiting

The Student Council Academic Recruiting Committee is offering assistance to Tech students who want to tell high school students in their home town about Tech.

A meeting for recruiters will be held Wednesday at 7 p.m. in the Aggie Auditorium. Dr. Floyd Boze, Dean of Admissions, will tell the audience some of the things Tech can offer the college student.

Students attending the Wednes-

day meeting will receive various types of folders to take with them when they visit the schools and a letter of introduction will be sent to each high school principal.

Royal Furgeson, Student Council president, said the purpose of the meeting is to find out how many students are interested in promoting Tech.

The new program is aimed at getting better students — not just more students — to attend Tech.

Application Due Today

Applications for Mr. and Miss Texas Tech and class favorites must be filed before 5 p.m. today.

Applications can be obtained and also filed at the Student Council office.

The election for these personalities will be Wednesday. The student body will vote for Mr. and Miss Texas Tech and each class will decide upon its favorites.

The outcome of the election will be announced Friday night at the Coronation Ball.

Dr. Guilds Confirms S. Carolina Position

Dr. John C. Guilds, head of Tech's English department, has resigned his position to assume direction of the English dept. at the University of South Carolina.

Dean of Arts and Sciences S. M. Kennedy said Thursday that Dr. Guilds had informed him over the phone that he was resigning his post at Texas Tech.

Kennedy said that he felt that Dr. Guilds had accepted a "very good offer" from the University of South Carolina and that the new position would be a definite step up for the English Dept. head.

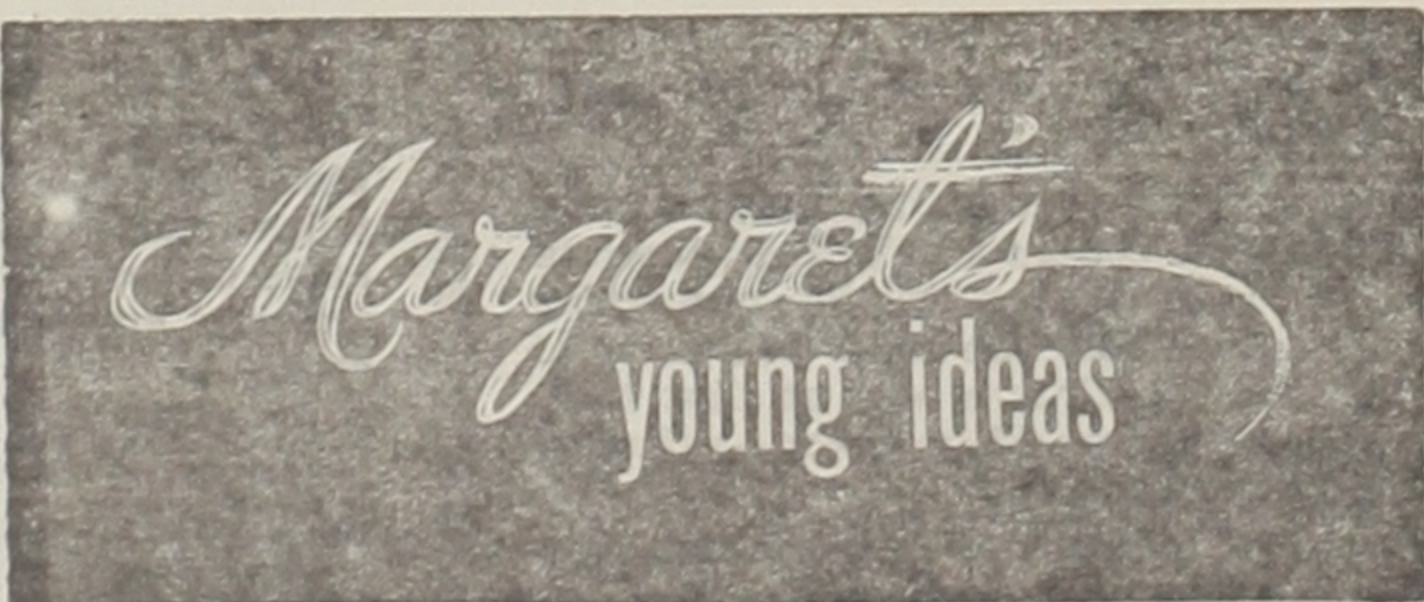

Guilds said, "It's a better position with a more attractive salary and with more favorable fringe benefits." He said that the new position would give him a greater opportunity for research.

In response to questioning, Guilds said that he wished to emphasize that, although he has worked for the name Texas State University, the Board of Directors' choice of Texas Tech University had nothing at all to do with his acceptance of the South Carolina position.

Special Showing Lanz

The most exciting show in town will be at Margaret's Saturday, March 14th. from one 'till three with informal modeling of the Lanz collection. These clothes have personality all their own and run the gamut of chic little town dresses, madly feminine date dresses, sharp career dresses for young executives and the "most" in feminine swim and sportswear. Do drop by between 1 and 3. For a teaser, we've sketched a hand drawn linen with long sleeves

Sizes 5 to 13.

-South Plains Maid-

Cotton Entries Open

The Lubbock Chamber of Commerce is accepting applications for the South Plains Maid of Cotton Contest to be staged in Lubbock on April 10 and 11.

The young woman must be a potentially good model who is photogenic and exemplifies the young American woman at her best.

Qualifications require that she has never been married, is not less than 19 years of age or over 25 as of January 1, 1965 and is at least 5 feet 5 1/2 inches tall without shoes.

Chamber officials emphasize the importance of the photogenic quality because tens of thousands will see the Maid in person, in print and on television. The National Maid will appear on magazine covers, newsreels and in newspapers around the world.

Another important attribute is the Maid's ability as a model. Candidates in the South Plains selection will be given instruction in the proper use of make-up, walking, posture and speech. To prepare her for the national contest, the South Plains Maid will be featured in fashion shows and will make other

public appearances on the South Plains and across Texas from the time of her selection until December.

Selection representatives emphasized that the South Plains and National Maid of Cotton selections are not just beauty contests. The candidates never appear in public in a swim suit.

Candidates must have been born in a cotton producing state and have their home residence in one of the following South Plains counties: Bailey, Borden, Brisco, Castro, Cochran, Crosby, Dawson, Deaf Smith, Dickens, Floyd, Gaines, Garza, Hale, Hockley, Howard, Lamb, Lubbock, Lynn, Motley, Parmer, Swisher, Terry and Yoakum or be a student in a school or college in one of the mentioned counties. She must be a resident of Texas.

The winner of the South Plains selection will receive a \$1000 all-cotton wardrobe, an all expense paid trip for her and a chaperon

to the national contest in Memphis in December. The first alternate will receive a \$200 gift certificate and the second alternate a \$100 gift certificate.

Application forms are available at the Chamber, 902 Texas Avenue and at the offices of county agents. Deadline for filing is 5 p.m., Wednesday, March 25.

Any civic organizations who are interested in sponsoring a candidate are encouraged to do so. There is no cost.

Last year's Maid of Cotton was Susan Elliott, a past student of Tech. Susan was 20 years old and a senior at SMU when she was selected. While at Tech Susan was a member of Kappa Kappa Gamma sorority, president of Mortar Board, Sigma Tau Delta and a vice president of a dorm. At SMU she was chairman of elections, Alpha Lambda Delta, engineering queen nominee, University scholar for four years and a Dallas city scholar.

Time For Decision

A breakthrough may come today in the Tech Greek lodge dilemma. The Greek Housing Corp. will meet today to try to hurdle major problems.

Gary Lawrence, IFC president, said he hopes at the meeting the way can be cleared for fraternities and sororities to start developing their land. This would mean beginning work on curbs, gutters and utilities on the plot.

Tech Greeks have met with many obstacles in getting lodges. But problems have just kept stacking up. It's time the difficulties were settled.

Tech Greeks need and deserve lodges. And if they want them, it's time to get the ball rolling and stop hum-hawing around.

For one thing, townspeople have protested about Greek groups having lodges close to Lubbockites' residences. This causes ill-feelings between some Techs and city folk.

Also, fraternities and sororities spend money on renting or leasing buildings in town. Then with a little more cash Greeks polish up the buildings, and then when the Greeks move out, they have nothing to show for their expenditures. This seems like a needless waste.

But if Greeks had their own lodges, they could afford to spend a little cash for fancy fixtures and the money would not be soaked up ineptly.

Lawrence believes "it's time to make a choice. We need either to sell the land to the college or some other party or go ahead and build."

The Texas Legislature and the Board of Directors have approved the sale of 10 additional acres of land to Greeks. This means all Tech fraternities and sororities have available acreage.

The original 10 fraternities and sororities which formed the housing corporation have been at a stalemate on the project seven years.

If the project doesn't get off the ground and move soon, the idea is going to rot right out from under the Greek system. This would be an unnecessary slap in the face to the fraternities and sororities.

Texas Tech Greeks need lodges. Let's hope the primary issues can be settled today and Greeks can begin constructing lodges within the year.

Council Scope SC Maintains Yell Board Is Legal

By ROYAL FURGESON
Student Council President

Recently THE DAILY TOREADOR has roundly criticized the Student Council for its action concerning the cheerleader screening board. This criticism has been directed primarily against the manner in which the council reached its decision.

The Daily Toreador contends that our action violated the By-Laws to the Constitution of the Student Association; thus they argue we failed to follow procedural due process of law and our decision should be voided.

Since The Toreador's specific contentions against the action have been listed in earlier issues, their arguments do not need to be enumerated further.

However, the reason that the Student Council has felt that its action was in accordance with the Constitution have not been as yet enumerated.

With this in mind, I will attempt to explain the constitutional grounds upon which the Council based its decision.

SECTION 204 PARAGRAPH A of the Constitution states that the "Student Council shall provide for the holding of elections and shall enact an election code therefor," and we feel that this provision gives us the right to enact an election code containing a cheerleader screening board.

Also, in the By-Laws under the Election Code provisions, the Election Committee has the right to "formulate detailed election rules" with the approval of the Council.

AGAIN, THE STUDENT COUNCIL feels that this provision enables us to create the screening board. Under these constitutional stipulations we contend that our action concerning the creation of a Cheerleader Screening Board is in conformance with procedural due process of law.

Since both the Student Council and The Daily Toreador disagree on this particular matter, we both feel that the question should be resolved.

At this time a student is in the process of bringing a case against the Student Council concerning its action in regard to the Cheerleader Screening Board. If the Supreme Court hears the case, then this question will probably be resolved within the next week.

THERE ARE CLEARLY TWO opposing points of view in this issue and the Council feels that this will definitely be a trial case which can have direct bearing on Council action and Council proceedings in the future.

U.S. Opposes South African Apartheid

EDITOR'S NOTE: This is the last in a series of articles on apartheid, the topic to be debated in today's Model U.N.)
By MIKE READ
Toreador Feature Editor

"An ally of the Free World in two World Wars, South Africa participated in the Berlin airlift and the Korean War, has completely repaid its war debt to the United States, and is the only country in Africa unequivocally aligned with the West, both in fact and in outlook."

MIKE READ

This statement from the Information Service of South Africa vividly indicates that certain difficulties face the United States in its program of opposition to apartheid in South Africa. There are many other extenuating circumstances which enter into the picture than the few cited above.

South Africa is the only country in Africa which has never asked for or received any foreign aid. It is, furthermore, one of only three countries in the world which has repaid its war debt to the United States in full.

Foreign investment in South Africa by both the United States and her allies is an important factor to be considered in the policies of the Western powers toward the situation in South Africa.

Britain's investment in South Africa is over \$11 billion—one-fourth of its total overseas investment. U.S. investment is much smaller, but has risen rapidly in the past two years.

United States policy is also influenced by the solidly anti-communist position of the Verwoerd government, and by a concern that South Africa under black control would be, at best, neutral.

Also influencing Western thoughts on the subject is South Africa's economic position in Africa. Although her industry runs on deprived black labor, South Africa is the only industrial and the most highly developed country on the continent of Africa.

With only 6 per cent of Africa's population, South Africa creates 20 per cent of the continent's total geographic income. It is most unfortunate that only a

small percentage of the South African population generates this income.

The Information Service points out that "South Africa's industrial complex is unparalleled in Africa. Her mineral production represents 43 per cent of the whole of Africa. She also generates and produces twice as much electricity and six times as much steel as the rest of Africa combined.

"The Republic's transport system is the most modern and comprehensive in Africa; there are 14,000 route miles of railway and 200,000 miles of main and secondary roads.

"Nearly half of all Africa's vehicles and telephones are in South Africa."

The situation is not all as it seems, however. The facts cited by the South African government are correct, but there are a lot of facts that could be cited to balance the picture.

Most of South Africa's mineral production is exported, with the profits going to the white Afrikaner. Most of the electricity generated in South Africa is both generated and consumed in the white Afrikaner areas. Most of the steel produced in South Africa is produced in white mills in white areas, and most of the steel used in South Africa is used for expansion in the white areas.

Most of the 14,000 miles of railway is, not only white-owned, but, found in the white areas—serving the white-controlled industry. Most of the 200,000 miles of roadway is found in the white areas. Most of the telephones are in Afrikaner possession, and most of the vehicles are white-owned.

Yet the Afrikaner population is less than one-fourth the total South African population.

Although control of both industry and resources remains almost completely in white Afrikaner hands, the Bantu living standard is the highest in Africa—except for that of the Afrikaner.

There is one doctor for every 1,800 people in South Africa. Although most of these doctors practice for the Afrikaner, the African in South Africa receives better medical care than almost any other African on the continent. The ratio in many parts of Africa can run as high as one doctor for every 58,000 people.

The Bantu have been better educated than any other black group on the continent. More than 80 per cent of the Bantu children are in government schools. There are 28,000 Bantu teachers and every year an additional 2,000 teachers graduate from the 47 training colleges.

Expenditures on education for the Bantu are more than four times higher than in any competing African state. The Verwoerd government claims that "in 15 years more Bantu have graduated from South African universities than in nine African states, with a combined population of 70,000,000, during the past 30 years."

Bantu wages are the highest by far paid to black peoples on the continent. The South African government points out that there are already 12,000 Bantu who own their own businesses, and that South Africa's non-white people own four times as many motor vehicles, per capita, as the people in Russia.

What these figures fail to point out is the outstanding fact that the non-white peoples of South Africa are still deprived of any political or economic rights outside the homelands—and that more than 60 per cent of the Bantu reside in the Afrikaner area.

What these figures don't show is the great difference in living standards between the black Bantu and the white Afrikaner—a difference that becomes more and more dangerous as the Bantu become more and more educated.

The facts don't illustrate the fact that the 12,000 Bantu who already own their own businesses represent less than 0.12 per cent of the total South African Bantu population. The Bantu who own motor vehicles represent less than one per cent of the Bantu population. These percentages are much higher when the Afrikaner's situation is considered.

The situation in South Africa is an extreme problem for U.S. policy makers. South Africa is the most prosperous country in Africa, she is the only industrialized country, she is the only country completely aligned with the West. More than one-third of all U.S. exports to Africa go to South Africa, her mineral production is a necessary part of Western defense, her income from national production is increasing yearly. South Africa is more economically solvent than any other country on the continent.

Fraternity Focus...

(Continued from Page 1)

30 or 40 years before they could be built. The reasons for this are quite simple.

When bonds were sold to finance the new dormitories several years ago, they specifically stated that no special housing units could be built by campus groups until the bonds were paid for. And, at the rate Tech is building dormitories, it is conceivable that there will never be a chance for houses.

ANOTHER PROBLEM

Therefore, the groups are actually committed to building lodges.

Another problem concerns the new fraternity and sororities that have come on campus. For a while, the sororities, through the Panhellenic Council, delayed building because they argued that the National Panhellenic organization wouldn't let them move until all sororities were provided for.

Upon investigation by the Dean of Women's Office, this was found to be incorrect, but it didn't make any difference anymore.

Last year, the 58th Texas Legislature approved the sale of college land to the groups, through the approval of the Texas Tech Board of Directors. The directors later approved the sale, so the land is available to the groups once they put up their money for it.

Now, the only thing remaining is for the greek groups to okay the installation of the utilities so that building can commence.

"The total cost for each organization to pay for the utilities should run in the neighborhood of \$2,500," Lawrence said.

But the question still remains as to when the groups would have to build once the utilities are ever approved. "Once they are okayed, there is actually no deadline for building," Lawrence said, "but there will undoubtedly have to be problems worked out as to the style of architecture, floor space and other technical details."

"I can't speak for the sororities," Lawrence said, "but I know that most of the fraternities are really ready—and have been for many years—to get lodges."

"As it stands now, all the greek groups are having to pour money down the drain to rent or lease the lodges they now have in Lubbock; some fraternities have spent several thousand dollars to make improvements on old houses—money they can never reclaim or make use of again."

"We are more than ready to put our money to a better use where we can buy our houses on our own property as a group," he added.

And the showdown is here. By Saturday, the fraternities will know whether they can go ahead and build their lodges and if the sororities will follow suit.

MUN Kickoff...

(Continued from Page One)

will get underway. Three resolutions have been chosen for consideration by the Assembly. These resolutions were proposed by delegations representing the Soviet Union, Nigeria and the Netherlands.

The Assembly is scheduled to adjourn following the vote and closing remarks at 4:30 p.m.

The awards banquet is set for 7 p.m. in the Coronado Room of Tech Union.

SMU Tankers In Early Lead

Southern Methodist went after their ninth straight Southwest Conference swimming championship in a determined way last night, by placing 11 men in 30 possible places on the first night of competition.

Tudor Lacey led off the SMU assault in the first event in the finals by smashing the SWC record in the 500-yard freestyle race. Lacey went the distance in 5:05.1, busting the old record of 5:10 set by Jim Graves of Texas last year.

Another SWC record was also broken by another SMU swimmer in the 50-yard freestyle relay. David Quick upset Tech's Phil Simpkins in the feature event of the night, breaking the old record of 22.2 set by Bob Baker of Texas A&M in 1963, with a 22 flat effort. Simpkins was second with a 22.7 time.

Both Quick and Simpkins had identical 22.3 times in the preliminaries, but it was Quick who came through in the race that counted.

In the 400-yard individual medley, SMU placed first, second and fourth to dominate the event completely.

Another Quick, this time by the name of Richard won the event with a 4:32.2 time. Quick upset teammate and defending champion in the event, Tiny Barnetson to take the blue ribbon by a narrow margin.

In the other events held on the first day of competition, Philip Cline of Texas edged Tech's Jes-

se Marsh, 403-397, to take the honors in the one-meter diving, and SMU ran away from the field in the 400-yard medley relay to take first place with a 3:44.5 time. Texas took second in the same event with a 3:56.3 time, barely edging third place Tech, who had a 3:57.6 clocking.

After the end of the first day of competition, favored SMU leads the field, collecting 55 points. Texas is second with 40, Tech is third with 21 and Texas A&M is in last place with 9 points.

Prelims and finals will be held today in the 200-yard butterfly, the 200-yard backstroke, the 200-yard breaststroke, the 200-yard freestyle, the 200-yard individual medley and the exhibition diving competition.

Staff photo—Harrison

QUICK SETS RECORD IN FREESTYLE RACE — Richard Quick of Southern Methodist is shown edging out Phil Simpkins of Tech in the featured 50-yard freestyle race in the first round of the South-

west Conference swimming meet. Quick's 22-flat time in the event set a new record, breaking the old record of 22.2 set in 1963 by Bob Baker of Texas A & M.

Raider Baseball Team Plays Season Opener

Coach Burl Huffman's Raider baseball team travels to Abilene today to engage the Abilene Christian Wildcats in the Raiders' season premier.

Slated to start on the mound for the Raiders is Frank Ray, a former Abilene High School player. Left-handed Ray hurled a seven-hit 1-0 shutout at the Wildcats last year.

The Raiders will also have two other Abilenians in their lineup, outfielder Bob Fielder, a junior, and second baseman Billy Monk, a sophomore.

In the second game of the doubleheader, Huffman will probably go with right-hander Morris (Moose) Dudley, a junior from Lubbock.

Slated for most duties at the other slots are team captain and catcher Doug Cannon of Leveland; John Dudley of Lubbock, Donnie Anderson of Stinnet at first, Ronny Holly of Lubbock, Jim Miller of Amarillo and Monk at second; Jim Westbrook of Dallas and Foy Williams of Lubbock at short; Richard Perry of Hobbs, N. M. and Bob Colvard of Wichita Falls at third base; and Ronnie Ayers of Lubbock, Jimmy Murrell of Waco, Bernon Gunn of Stephenville, and Larry Thorne of Andrews at the outfield positions.

Last season the Raiders and the Wildcats split a pair of doubleheaders. ACC took one of the contests in Abilene by 1-0, while the Raiders took the other by the same amount.

In Lubbock, the Raiders romped over ACC, 7-4, and ACC took the other contest, 7-6.

Thirteen lettermen return from a Tech team that last year posted an 11-11 mark.

PERSOL VS. COTTEN

NEW YORK (AP) — Unbeaten Johnny Persol, who got up off the floor and won a split decision over veteran Eddie Cotten last month, is aiming for a more convincing verdict over Cotten Friday night at Madison Square Garden in the nationally televised light-heavyweight fight.

TECH ADS

Fast, accurate typing in my home. PO 3-0573.

Will keep children in my home day or night. Mrs. James Knotts, 2121 14th, PO 2-1422.

Golfers Go To Match At Andrews

Texas Tech's surprising golf team leaves today to participate in the Andrews Invitational Golf Match.

Lead by team captain Housty Brewer, the Raiders hope to post their first win after three outings.

In their first meet of the year, Coach Jay McClure's linksters finished second to a strong North Texas team in the Southwestern Recreational Meet in Fort Worth.

Last week, the Raiders weren't quite so lucky, finishing fifth in the Border Olympics in Laredo.

Also entered in the meet for Tech are Richard Yates, Steve Le-Crone, Joe Huber, Rick Rogers and Jimmy Wilcoxesen.

Other Tech entries are Charles Bishop, Doug Ehle, Tom Hamilton, William Hill, Jerry Hrniciar, Barry Rogers and James Scarbrough.

Yates, 1962 Texas Amateur Champion, and Brewer are the only returning lettermen from a Raider team that finished fourth in the Southwest Conference last season.

Four Players Hit Over 300

The record setting Red Raider basketball team which wound up season play with a 16-7 mark, saw five players go over the double figure average for the season

FINAL TEAM STATISTICS

	RBS	TP-AVG	HIGH
Denney	204	403-17.5	33
Malaise	67	358-15.6	30
Patty	131	319-13.9	30
Reuther	182	303-13.2	27
Hallum	184	274-11.9	22
Murren	44	153-7.0	16
Wilkinson	34	66-3.8	9
Wall	30	50-2.9	12
Wollard	6	19-1.9	8
Farley	3	8-1.0	4
Gooden	0	8-1.0	2

Tech set a new school and SWC record with its 85.3 points per game average, but it also allowed a new all time high for its opponents, 79.3.

Tech's opponents outdid the Raiders under the boards, 49.3 to 44.4.

Cincinnati Pitcher Walks Out

TAMPA, Fla. (AP) — Pitcher Joey Jay, two-time 20-game winner for the Cincinnati Reds, walked out of the club's spring training camp Thursday and Manager Fred Hutchinson called it an "unauthorized absence."

Jay said he was leaving for Cincinnati, and planned to be back here late Friday.

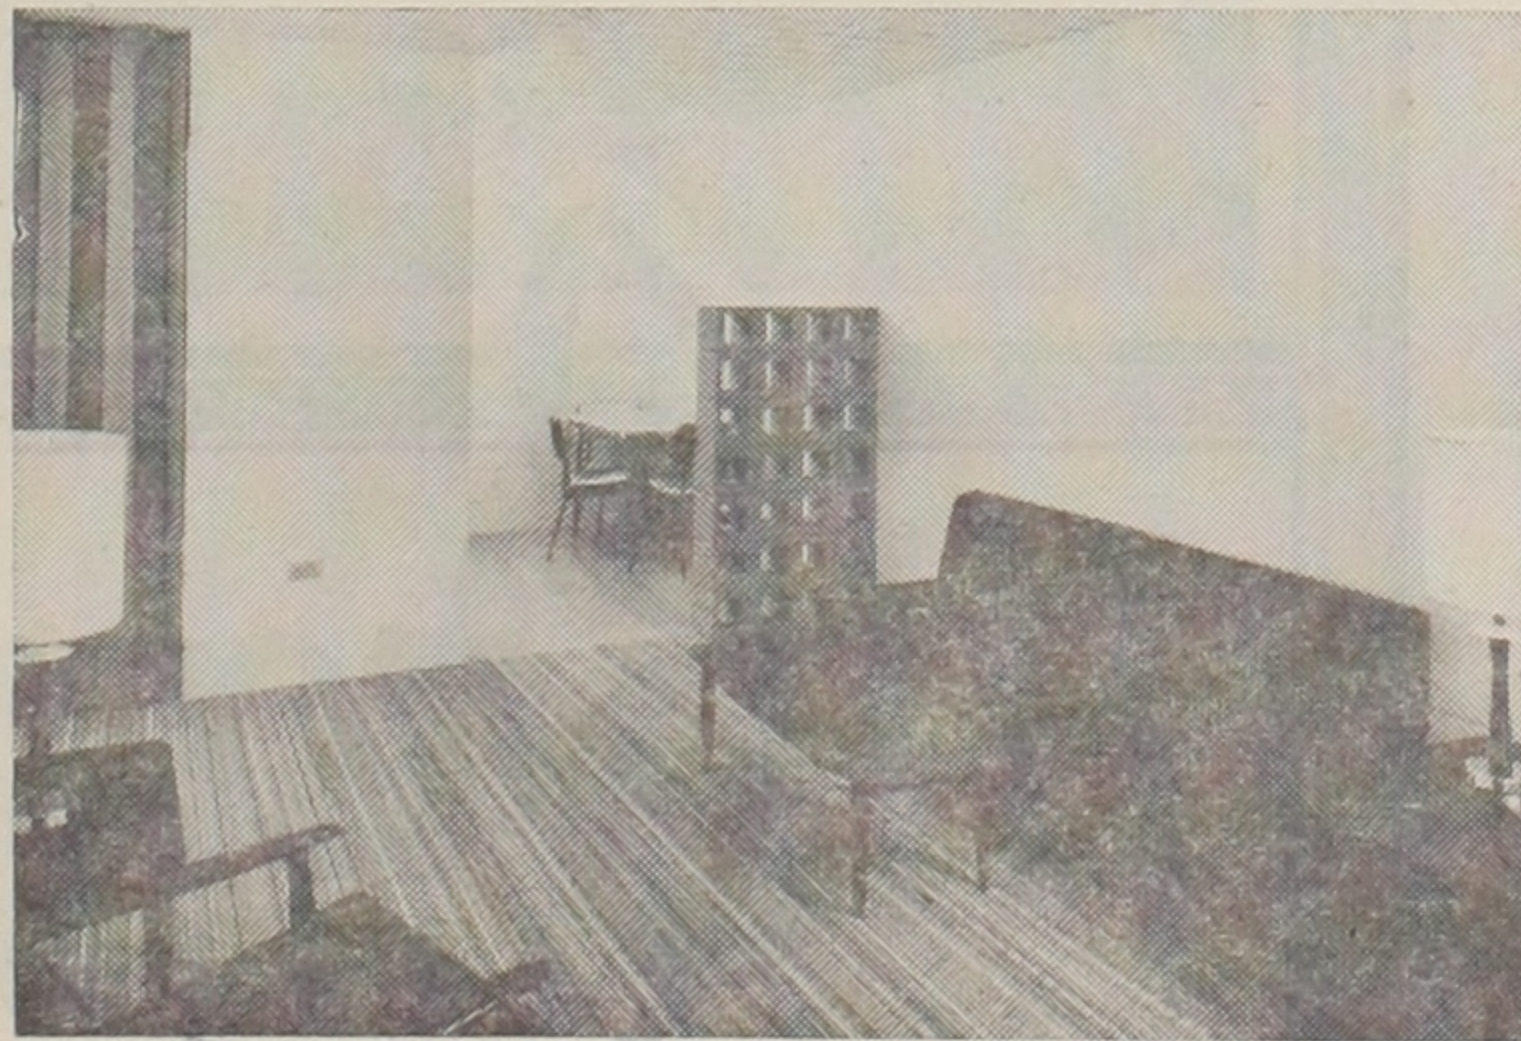

Our Bridal Registry proves it. Smart brides list their choices in sterling at our Bridal Registry. The members of the wedding then consult our registry and duplication is avoided. Furr's Jewelry Department has such brand names as Wallace, Reed & Barton, Towle, Heirloom, International, Lunt and Gorham, all at 20% off list price.
