

— Over Board's Decision —

Council, FAC Express 'Regret'

By **BRONSON HAVARD**
Toreador News Editor
The Student Council and the Faculty Advisory Committee Monday released official statements expressing "regret" over the Board of Directors' name change decision. In separate special sessions Sun-

day, the two groups debated what action they should take in light of the Board's vote to change the school's name to Texas Tech University.

FAC MAKES STATEMENT
The FAC's statement, prepared behind closed doors, said, "The

FAC regrets the decision of the Board of Directors to request the legislature to change the name of Texas Technological College to Texas Tech University.

"WE CONSIDER the proposed name inappropriate for a university of the first class; nevertheless, we will not diminish our efforts on behalf of academic-excellence."

Student Council members gave approval to the drafting of a much stronger resolution after heated floor debate during the Council session Sunday.

RESOLUTION RELEASED

The resolution drawn up by the Executive Committee said:

"Although we realize that the action taken by the Board of Directors to rename this institution Texas Tech University constitutes an almost final decision, the Student Council of Texas Technological College nevertheless wishes to recognize that certain conditions exist which will not allow us to endorse wholeheartedly this recommendation which will be made to the legislature.

"WE HAVE strongly supported the name Texas State University in this issue, not with the intention of creating controversy and dissension, but with the desire to obtain a representative and appropriate name for our college.

"Despite the fact that the Board did select Texas Tech University

for the name of this institution, we will continue to consider the name Texas State University as the most suitable one for our school.

ANNOUNCEMENT

"However, since we of the Student Council do not set the policy of this institution, we can only recognize with regret the announcement by the Board and the probable end that such an announcement will have in the Texas State Legislature."

IN FLOOR debate, David Beckman, BA representative, said, "I find the name (TTU) personally objectionable. I don't think we should let it die because it means too much for our school."

"Let's don't quit half way on the road. Let's go down fighting to the very end," he added.

SAYS WAIT

Kent Hance, BA representative, called on the Council to make a statement opposing the Board decision but to wait until next year to decide what definite course the Council should take.

MIKE STINSON, Engineering representative, argued strongly for Council action and expressed strong opposition to the proposed Board name.

He said, "I don't want to belong to a Student Council which would give up."

Council Vice President James

Cole told the Council that they could not obligate next year's Council to follow policy established this year.

'LET'S DON'T CRY'

Council Pres. Royal Furgeson urged the representatives, "Let's don't cry. Let's make a strong statement expressing our views."

BILL HONEY, A&S representative, suggested that the Council delay any action until a later date when a committee had time to reflect on a resolution to express the Council's position.

Jack McClure, Engineering representative, commented, "There's nothing we can do to effectively change this decision of the Board."

CITES POLITICAL POWER

Cole cited the political power of the Board with the legislature as being a formidable problem for the Council.

Judy Price, A&S representative, expressed regrets that the Board ignored the faculty's position.

COUNCIL members adjourned with the consensus that they should restate their position and adopt a wait-and-see attitude.

The 14 member FAC, meeting in the C&O Bldg. at about the same time as the Council, kept its debate a secret. Ex-officio members Dr. R. C. Goodwin, Tech president, and Dr. William Pearce, academic vice president, met with the faculty representatives.

Every Little Bit Helps . . .

Staff photo—Klinger

FIRST CAMPUS DONATION — Paula Hanson, sophomore from Sanderson, passes the buck for the first campus donation to the Saddle Tramps for Tech's new entrance fountain. Accepting the donation for the Saddle Tramps are co-chairman for the project James Cole, from Slaton, and Paul Dinsmore, Fort Worth, drive co-chairmen.

Saddle Tramps Open Fountain Fund Drive

The \$56,000 fund drive for a new entrance marker for Texas Tech opened Monday with a light turnout by the student body.

However, James Cole, co-chairman of the drive, said that this was to be expected due to the fact that active publicity could not have been given until after the Board of Directors approved the action. They did this Saturday.

TRAMPS OPEN BOOTH

The Saddle Tramps now have a booth set up in Tech Union to give students an opportunity to donate whatever they can.

COLE STATED that the important factor in this campaign was to get every student to donate at least a dollar. The campaign to get every student to give at least this amount will be pushed heavily by the Saddle Tramps.

Cole expected the student donations to increase as the fund drive progresses and more publicity is given the project.

WEEK FOR RESULTS

Ken Snider, president of the Saddle Tramps, told the Toreador that it would be at least one week before any real results would show up.

FRIENDS of Tech will begin to receive some of the 20,000 pamphlets that the Saddle Tramps are mailing. Campus organizations have been given the option of selecting their own fund raising campaigns such as car washes or collection booths of their own.

Snider added that anyone wishing to contribute funds may do so by sending donations to: Texas Tech Foundation, Box 4650, Tech Station, Lubbock, Texas.

Any further information concerning the entrance marker may be obtained from any member of the Saddle Tramps or the Student Council.

Union Begins Series Of Science Lectures

Dr. P. V. Prior, Tech biology professor, will present "The Evolution of Biology," the first in a series of four science lectures, at 7 p.m. Wednesday in the Coronado Room of the Tech Union.

The "Science Series" lectures, three of which will be given by Tech faculty members, is sponsored by the Union Ideas and Issues Committee.

TO 'FILL NEED'

James Ward, chairman of the lecture program, said the series was initiated to fill a "need for emphasis in developments in the realms of science" in Union programs.

HE ADDED that the four lectures, to cover general science fields, will be made at the student level. The second lecture, "Chemical Evolution of the Planets," by Dr. J. A. Adamcik, chemistry professor, is scheduled at 7 p.m. March 10 in the Union Blue Room.

THOMAS TO LECTURE

Dr. H. C. Thomas, head of the physics department, will discuss "Sources of Energy" for the third

lecture, at 7 p.m. March 24 in the Blue Room.

A VISITING scientist, Dr. Henry Margenau, will present the final lecture, "Scientific Perspectives," at 4 p.m. April 20 in the Coronado Room.

Committeemen Report On Oklahoma U.N.

Four members of the Model United Nations Steering Committee reported Monday to the committee on their observation of the University of Oklahoma Model General Assembly.

Alan Henry, secretary-general of the Model U.N., made several recommendations based upon the observation trip. These recommendations will be discussed at Model U.N. bloc meetings Wednesday and Thursday.

They included lowering the number of required signatures for the introduction of resolutions and the possibility of discussion on a sec-

ond topic on the second day of the Model U.N. meeting.

The Steering Committee voted to make the presentation of position papers by the separate delegations optional. It also voted to make the presentation of a position paper of more than five-minute length by a bloc optional.

Most position papers will be limited to five minutes, with each bloc having the option of one 10-minute presentation.

The implications of this move will also be discussed in bloc meetings this week.

Petitions Go Out

Petitions go out today for Student Council and Freshman Council vacancy elections. Petitions are due Friday. In the Student Council there are four vacancies in the School of Arts and Sciences, two in Engineering, one in Home Economics and one in Business Administration. Freshman vacancies are one for off-campus, two at large, one each in Gaston, Wells, Bledsoe and Thompson halls.

Tech Frosh Will Sponsor 'Spirit Rally'

The Freshman Class will sponsor a "Spirit Rally" in the Tech Union Friday night.

Coach Gene Gibson will speak, after which the Nightbeats Combo will play.

The rally will be in the main Ballroom of the Tech Union at 7:30 p.m.

Tech Groups Enter Science Exposition

Tech will be well represented next week at the Southwestern Science Exposition in El Paso. Pictorial displays and exhibits will advertise the departments of geosciences, electrical engineering and biology.

Dr. F. A. Wade, head of the geosciences, has prepared a pictorial display concerning four phases of geosciences, geology, paleontology, geophysics and geochemistry. Also in his display will be a map exhibit of the Antarctic and a seismograph operation showing earthquake effects.

John Carter, a graduate student, and Ken Stevens, a senior, will go along with Dr. Wade as assistants.

A PLASTIC globe showing the path that radio waves follow will be the exhibit from electrical engineering. It is under the direction of Dr. H. A. Spuhler. The globe represents a model of the ionospheric research project.

Along with the globe will be displays of the campus computers in the engineering department and a description of the corps curriculum in the electrical engineering department.

Dr. P. V. Prior is in charge of the biology exhibit, a setup of projectors to show some of the various aspects of biological research being done on the Tech campus.

THE EXPOSITION is designed to acquaint students from Texas, Arizona, New Mexico, Oklahoma, Colorado, Utah, Kansas and the Republic of Mexico with the latest developments in the various scientific fields and to encourage them to take up careers in science or technology.

Dr. Edward Teller, nuclear physicist who pioneered development of the hydrogen bomb, will be one of the leading scientists addressing students, teachers and scientists.

ACCORDING TO Frank Gray, exposition executive vice president, participants in the exposition will attend the Aeronautics and Space Administration's first Space Science Symposium.

Some of the exhibits expected to draw considerable attention are a Mercury space capsule, a working Telstar satellite, an atomic engine, and the walk-through Polaris submarine exhibit.

Spanish Prof Aids In Text

Dr. Harley D. Oberhelman, professor and head of the department of foreign languages at Tech, is co-author of a textbook for teaching Spanish at the secondary school level.

Professor Agnes M. Brady of the University of Kansas is the other author of the book, entitled "Espanol Moderno."

According to Oberhelman, the textbook is the product of extensive research and experimentation in the audio-lingual approach to foreign language teaching. The lessons were used experimentally prior to publication in several summer language institutes at the University of Kansas.

"Espanol Moderno" is unique in that it is written exclusively in Spanish. The book emphasizes the primary aspects of language learning, hearing and speaking.

"Espanol Moderno" is designed to be used in the junior or senior high school as a beginning textbook or as the third book of the Merrill Spanish Series.

Professor Brady is the author of the first two books in the series, and Dr. Oberhelman participated in the testing of the materials in the elementary school Spanish program sponsored by the University of Kansas.

The authors are currently writing the fourth and last book in the series.

'Outside' Thieves Head For Indoors

Thieves seem to be getting bolder as the year rolls along. Usually dorm parking lots are a favorite spot for the dirty work, but now someone has moved inside the dorms.

John Taylor, Tech business manager, reported the theft of a beige-colored telephone from the lobby of Women's No. 6 some time over the weekend.

But if you think the college is having a rough time, take the case of Jane Batson, 236 Weeks. A week ago she reported the theft of a black leather purse valued at \$65. This loss occurred in the Ad Bldg.

Two days later the Irving senior was back at Traffic Security reporting the theft of a watch. The watch, a 14 kt. gold Lady Elgin, was valued at \$90.

Letter To Editor

Editor:
(This is an open letter to Tech's Board of Directors.)

Gentlemen, I have been going to school here for two years in order to gain a good education. However, there is one scrap of knowledge that seems to evade me no matter how hard I may try to find it. This happens to be a definition of the word "Tech." I cannot seem to find it in the most unabridged dictionaries.

I read in a newspaper this morning that you had unanimously agreed to submit "Texas Tech University" as the new name for our school. As you can imagine, this added greatly to consternation.

I have not, as yet, figured out the purpose of a school with this name. I presume that with the word "University" in the title, a person could come here and study

just about anything he would want. This makes sense.

We have many very excellent schools here where a person could study. It is still this word "Tech" which I cannot understand. As near as I can figure out from this new title, a person can come here and study anything he pleases just as long as he will "Tech" while he does it.

Of all the names submitted to you for consideration, your choice displayed the greatest amount of accumulated (unintelligence). It has no meaning whatsoever. I only hope that the legislature of our state will show some intelligence and reject your proposal.

Sincerely yours,
Jimmy Crozier

It's Up To The Solons

Tech students and faculty members lost a big battle Saturday. Despite opposition, Tech's Board of Directors decided to recommend to the next session of the Texas Legislature that this school's name be changed to "Texas Tech University."

We still do not agree with the Board's name choice. We believe there is a better name for this school and hope that if the Texas Legislature approves "Texas Tech U." next year that another name change will take place in a few years.

But the Board's decision has been made. There is little we can do now except wait. The name-change issue soon will be left in the hands of the legislators.

There is little reason to believe that the legislature will not stamp its approval on the name the Board suggests. Precedent has shown that solons usually go along with the ideas of a school's directors.

The name-change controversy lasted four years, with people jumping on various bandwagons for different names. But this year the issue picked up steam when it appeared a Board decision was near.

Students and faculty members presented a very intelligent platform of opposition to the name "Texas Tech U." but after reviewing all the information, the Board rejected student and faculty opinion.

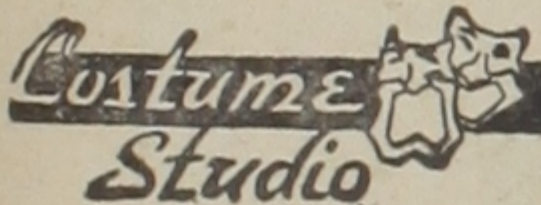

It's only logical that the Board believes its decision is in the best interest of Texas Tech.

We may disagree but we must recognize that the Board has made its choice. Let's don't lie down, roll over and play dead.

Now we should devote our efforts to building a better Texas Tech. Let's go forth with new dedication to make this the best school anywhere.

TCU STILL SEEKS WIN

Frogs Test Raiders

Coach Buster Brannon's Froggies from Texas Christian take on the Texas Tech Red Raiders in Lubbock Coliseum at 8 p.m. today, hoping to snap an eight game Southwest Conference losing streak.

The Red Raiders hope to stay in the SWC race after dropping a cliff-hanger in Austin Saturday, 78-76.

THE FROGGIES dropped an 85-75 decision to Southern Methodist in Fort Worth on the same day to remain in their cellar position. TCU pulled within six points of

HE Groups Raise Scholarship Funds

Scholarship funds for the foreign exchange program of the Tech Home Economics Department were earned by members of the Home Economics Club and Phi Upsilon Omicron in a recent joint fund raising project.

Each club contributes half of the total sum of \$300 which is awarded each fall to a deserving foreign exchange student in the home economics program.

Approximately 30 girls assisted a local catering service in serving for the annual Lady's Night banquet held by the Lubbock Lion's Club.

the Ponies in the second half after being down at halftime 51-34.

But the SMU team refused to let the Frogs get any closer and ended up the game by sinking 14 of 18 free throw attempts while the Frogs' big three—Archie Clayton, Gary Turner and Bobby McKinley—fouled out to end any hopes TCU had of thwarting the Ponies.

TECH WILL BE back up to full strength for the game, since sophomore Norman Reuther appears to have recovered enough from a side infection to start for the Raider five.

Texas probably didn't realize that anything was wrong with the 6-4 product of Fort Worth, because Reuther led all scoring for the night with 19 points in the Austin game.

Coach Gene Gibson's main worry seems to be the TCU defense which has recently changed from a zone to a half-court man-to-man press. This was the defense which allowed the Frogs to pull within six points of SMU.

GIBSON WILL go with his usual starting five of Dub Malaise, 5-11, 18.5 points per game; Harold Den-

ney, 6-8, 16.6; Reuther, 6-4, 14.8; Tom Patty, 6-5, 13.1; and Glen Hallum, 6-5, 10.3.

Probable starters for the Horned Frogs will be Archie Clayton, 6-10, 6 points in the SMU game; Gary Turner, 6-6, 22; Rollie Cornish, 6-0, 14; Bobby McKinley, 6-2, 10; and David Hull, 6-2, 8.

While the Raiders tangle with TCU here, the league-leading Texas A&M Aggies tangle with Baylor in Waco.

Football Crowds Break Old Mark

Texas Tech broke another home football attendance record last season.

Turnout for six home games totalled 194,000, an average of 32,300 per contest. The old mark was 175,000 for six games in 1961.

"This support by our fans is most gratifying and is a tribute to the Red Raiders and their coaches," Athletic Director Polk Robison commented. "With the foundation now laid for a progressively stronger program, we predict the new attendance mark will not stand long."

KTXT-FM, Aggies Unite For Special Broadcasts

KTXT-FM, Tech radio station, in cooperation with the School of Agriculture, is currently distributing a five-minute, daily radio program to commercial stations throughout the state.

The program, entitled "Agriculture Today," is an interview-type broadcast, consisting of graduates and undergraduates from the School of Agriculture who describe the various departments and activities of the school.

SOME OF the programs go into detail about research projects now in progress at Tech, while others concern new developments in the curriculum of Agriculture.

The stations announced by Charles Buzzard, director of KTXT, as carrying the program are KNIT, Abilene; KURV, Edinburg; KCRS, Midland; KTLW, Texas City; KNAL, Victoria; KIUN, Pecos; KRRV, Sherman; and KFDA, Amarillo.

AN ADDITIONAL 10 stations may carry the program during the spring semester.

All of the work on the program is being done by students in the Radio-Television area of the speech department. There has been no cost to the college for this program service.

PAINTING STOLEN

BRUSSELS, Belgium (AP) — One of the world's great art treasures—the painting "Negroes' Heads" by the Flemish artist Peter Paul Rubens—was stolen Monday from the Brussels Museum of Ancient Art. The museum conservator, Philippe Roberts-Jones, said he doubted that the burglars could sell the work.

Cementing will never be the same again— thanks to Dowell

During the past five years you've seen one new development after another in the field of oilwell cementing, thanks to Dowell research.

These new ideas are helping operators get better primary cement jobs, more effective squeezes when needed, lower well completion costs and longer well life.

In equipment, for example, Dowell developed the **Densitometer** — the first really accurate method of continuously measuring, controlling and recording slurry weights. Dowell introduced the first cementing unit on which **both triplex pumps** are free to pump and displace slurry during the entire job. On this same rugged unit there's another Dowell first — an **independent mixer** which provides high-speed, continuous mixing of cement, water and admixes into a smooth, uniform slurry. This

was also the first cementer to feature **pressurized pump** suctions, which provide high pump efficiency at full-rated speed and horsepower.

In materials, Dowell developed two superior additives— **FLAC*** and **TIC*** which induce turbulent slurry flow at practical pump rates. **FLAC** also is the first really effective fluid-loss-control additive for cement; it holds fluid loss rate below 100cc/30 minutes at 1000 psi. Dowell introduced **Cealment***, the first service using a latex-cement slurry.

Dowell — the company with the new ideas — provides operators with dependable equipment and materials plus experienced people with a genuine desire to give good service. Dowell services and products are offered in North and South America, Europe, Africa and the Middle East. Dowell, Tulsa 14, Oklahoma.
