In Saturday Action

Water, Dorm Complex Discussed By Board

By BRONSON HAVARD
Editor

Establishment of a Water Resources Center on campus and action on a proposed new dormitory complex to house 3,000 students were major items of business at the Board of Directors meeting Saturday.

The Center is designed to stimulate the development of a broad-based program of water resource education and research and to bring together many different schools and departments which are engaged in these programs.

Committee Governs

An administrative committee will govern the Center. Appointed to the committee are Dr. William M. Pearce, academic vice president; Dr. Fred Rigby, dean of the Graduate School; Dr. Gerald W. Thomas, dean of Agriculture; Dr. S. M. Kennedy, dean of Arts and Sciences; Dr. John Bradford, Engineering dean; and a representative from the West Texas Water Institute.

On the dormitory proposal, the board authorized the Campus Planning Committee (CPC) to employ architects to begin initial work on the structure.

Under present plans, the dormitory will be an 8-14 story high rise complex located south of the Physical Plant Bldg. and Central Food Facilities or west of Flint Ave. and north of 19th St.

Senators Study New A&M System

AUSTIN (AP) — The Senate Education Committee set Monday a hearing next Monday on Sen. Bill Moore's bill to make Arlington State College, Tarleton State College and Prairie View A&M College branches of A&M University. Moore, chairman of the Education Committee, told the committee in a joking manner that "As I understand it, this bill merely beefs up the A&M system."

The complex will cover 30 acres — just 10 less than the entire University of Texas campus.

The CPC recommended to the board, "It might be wise to go slow or at least be cautious until more is known of the outcome of the current legislative session."

Ground Breaking

Plans call for the ground breaking of the dormitory site to take place in December.

In other major board business, Director Wilmer Smith of New Home, reported on the campus traffic problem.

"The problem is traffic not parking," he emphasized.

Smith said a survey of parking revealed there were 8,306 parking spaces available on campus for 7,847 cars registered leaving a "surplus" of 459 spaces.

He said a check of autos parked along 19th St. off the campus Friday morning revealed that 1,027 cars, identified as belonging to students were parked in the area.

Of the off-campus cars along the street, 540 were identified as having been restricted from campus because of traffic violations.

"The 487 left parked on 19th St. we must assume would not or could not pay the fee for on-campus parking," Smith concluded.

Only Half Full

He said that while these cars were parked off-campus, one campus lot near the new women's dorms was only half full.

Smith showed a large scale map of the campus to the board with present parking lots marked. He then compared the campus map with one showing what would happen if the parking space is doubled.

"All available land would be paved," he said.

Smith indicated that he felt additional parking lots on campus would be undesirable.

A report on the program for women students was given by Florence L. Phillips, dean of women.

Dean Phillips in her report gave

a brief history of education for women and a history of the development of women's programs at Tech.

She said, "Tech should continue its efforts to secure and retain residence hall counselors who have advanced degrees, specialized training for their positions and previous experience in student personnel work."

'Meet Competition'

"It will be necessary for the college to pay a salary adequate to meet the rapidly increasing competition for persons prepared for first-level performance," she added.

"There is also a need for the services of a psychiatrist for as our enrollment has grown, there has been an increase in the number of students who have been emotionally disturbed.

"In the present situation, it has been necessary to cope with some of these students until their disturbances has resulted in behavior which has had serious consequences for them, for fellow students and for the college."

Dean Phillips also reported that as the enrollment increased so did the incidents of suicide attempts.

At the Saturday meeting, the board also approved a \$669,743.15 summer school budget of which \$564,398 is for teaching salaries. Dr. William Pearce, academic vice president, predicted 6,000 students at the first session.

AUSTIN (AP) — The House Appropriations Committee put a lid on creation of new law schools with a provision in the 1966-67 appropriations bill voted to the floor Monday.

The bill stipulates that no faculty salary appropriations for 1966-1967 can be spent for law faculty salaries in schools or colleges of law not in existence by Feb. 1, 1965.

Texas Tech has won approval of the Commission on Higher Education to establish a law school by 1967. Neither the House committee nor the Legislative Budget Board gave Tech money to finance preliminary expenses for the law school. The budget board's recommendations formed the foundation for the appropriations bill.

The House committee retained a \$150,000 appropriation to Tech to study creation of dentistry and medical schools, and added \$50,000 for a continuation of the state parks study and research in Texas history.

No Request

Tech had asked for \$187,300 during 1966-67 for hiring a dean and other faculty members needed to start the law school. The school had made no request for funds to study a medical or dentistry school, which are under study by the Commission on Higher Education.

Also in the legislature, Gov. John Connally's No. 1 legislative demand, creation of a new and powerful 18-man coordinating board for higher education, won tentative House approval Monday.

Final Action

Final House action on the measure, which was discussed 2½ hours and amended 18 times, will be asked today, said its sponsor, Rep. Dick Cory of Victoria. The

Senate has yet to vote on its version of the bill.

There was no debate on the bill as a whole and no objection was voiced to its tentative approval.

Rep. Cory explained the bill. He asserted that two rumors have circulated about the measure which are untrue.

'Not True'

"I have heard over and over again that this is an attempt by the governor to gain control by appointing members of the board. This is not true. By the end of March he will have appointed 11 of the 16 members of the present Texas Commission on Higher Education," Cory said.

Cory also said the bill does not include Connally's proposal to organize colleges and universities into several systems.

Quilliam Asks

"Suppose they reclassify Texas Tech as a school for technological study. Would the school be limited to degree routes only in the area in which the school is classified?" asked Lubbock Rep. Reed Quilliam. "That would be my understanding," Cory said.

Major amendments provided that board disapproval of programs could be nullified by a legislative appropriation of funds for the program, and that the board could not revise existing university systems.

Reorganization Plan Goes Before Council

The special Student Council committee on self-evaluation will submit a plan Wednesday for major reorganization of the Council.

The plan, in effect a preliminary draft for constitutional revision, calls for a student government set up in much the same way as the Federal Government, with a separate executive, legislative and judicial branch.

Council President Ronnie Botkin

said this proposed reorganization will provide a better system of checks and balances, as well as a separation of power within the student government.

More Powerful

Botkin said as a result of the change the president would become a more powerful officer, with a veto power over all legislation passed by the Senate.

Under the new system, the vice-president will preside over the legislative body, called the Senate by Botkin, which will be composed of all the elected representatives from the various schools.

The executive branch will include the president, the business manager and a presidential assistant to handle all correspondence for the Council.

Five Departments

In addition, it would consist of five special department heads appointed by the president. These include Director of Student Government Services, Director of Student Affairs, Director of Public Relations, Director of Academic Affairs and Director of Student Athletics.

"This change will make the Student Council a stronger organization," Botkin said, "because it will involve more people. Membership in the special departments of the executive branch will come from the student body."

Work Continuously

"The senate will meet every two weeks, with provisions for special called meetings, and the president and his department will work continuously."

A preliminary draft of the new constitution was sent to Tech President R. C. Goodwin Monday, and the Council has already discussed the proposal with the administration, Botkin said.

"TO OUR VALENTINE—MISS ANN RICE" — Thus read the Valentine plaque made and presented to West Hall Sweetheart Ann Rice by West Hall residents. Miss Rice, who will be featured in the 1965 La Ventana as "Miss Playmate," received the plaque from Bill Dunn, junior; Barry Hutcheson, junior; and Mike Carter, freshman. —Staff Photo

Student Council Issues Seat-Saving Warning

Any student who tries to save more than one seat at tonight's basketball game will be asked to leave.

According to a rule passed by the Student Council last year, no student may save more than one seat, Council President Ronnie Botkin said.

"We are beginning to have more and more seats saved at every game," Botkin said, "and if this situation is not corrected the Council will have to take action to prevent it."

Botkin emphasized that the game tonight will be a crowded one, and that students must observe the Council's rule of saving only one seat.

-Now Teaches At Tech- Ukrainian 'Good Neighbor' Masters Five Languages

By **DIANE WEDDIGE**
Staff Writer

Some students find it difficult to learn even one foreign language. Miss Natalia Schechaj, a teaching assistant and English student here, however, is adept in writing and speaking five: Russian, German, Spanish, Ukrainian and English.

Miss Schechaj teaches German and Russian, while working for a M.A. in English.

Her knowledge of foreign languages is the result of living in many countries.

Miss Schechaj is a native of Ukraine, a Soviet Union republic, where she lived until she was 15. During WW II, the Germans ad-

vanced into Ukraine, and the Russians burned or blew up all they could as they retreated, leaving little industrial and agricultural reserve.

During this time, her father, a plant breeder, her mother, a biochemist, and Natalia moved to Poland where they lived for two years.

After leaving Poland, the Schechajs lived in Germany for seven years. There, Natalia finished secondary school and studied chemistry at the University of Hamburg.

In 1950, Schechaj's work took him to Tucuman, Argentina. Natalia was offered a scholarship at the University of Washington in Seattle, but turned it down and moved to Argentina with her family.

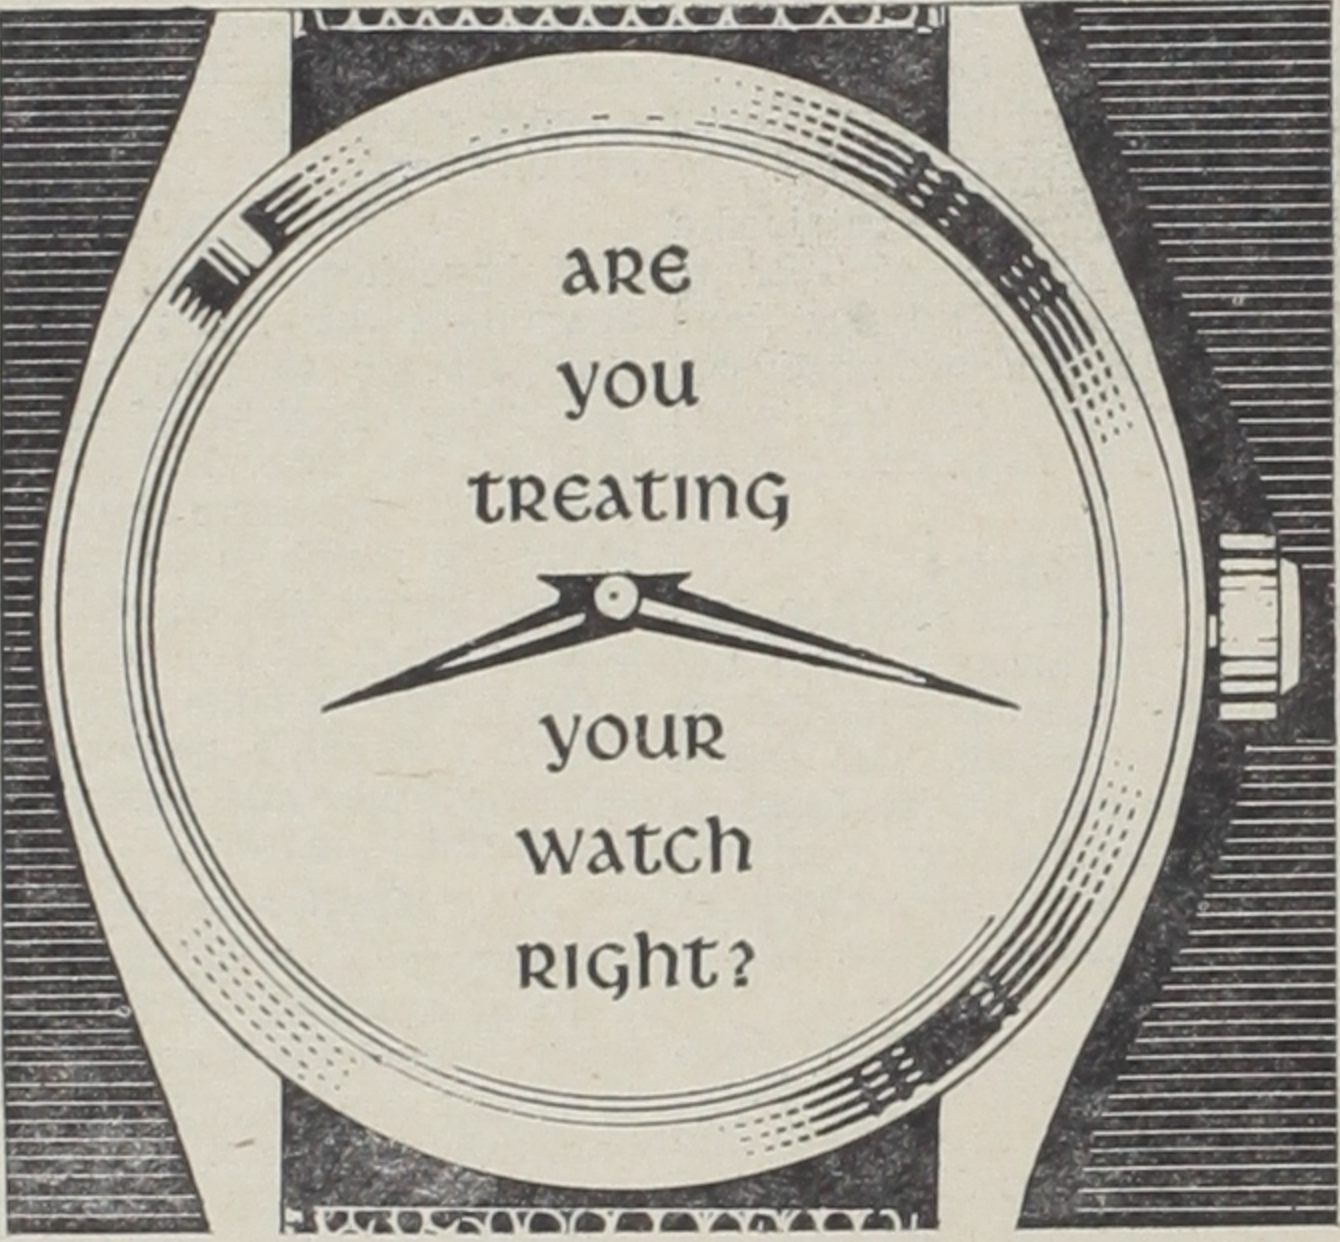

At the national university, Miguel Lillo Institute, in Tucuman, Miss Schechaj specialized in English and graduated six years later as a professor, the highest degree offered.

Before coming to Tech last August on a Good Neighbor scholarship, she taught English at Miguel Lillo Institute for two years.

When asked if she would continue studying to receive a Ph.D. in English, Miss Schechaj said, "No, I'm tired of studying, but I may teach English at the university again."

Counting two years at Hamburg University, six years at Miguel Lillo Institute and a year of study at Tech, Miss Schechaj has had nine years of higher education.

Miss Schechaj will return to Argentina in June where she plans to be assistant director of the Miguel Lillo Institute library.

Raiders Will Attempt To Brand Steers Tonight

Texas Tech's Red Raiders, returning to the friendly domain of Municipal Coliseum after a profitable two-game road trip, face the Texas Longhorns tonight at 8 p.m. in a crucial SWC battle.

By whipping Texas A&M (82-76) and SMU (82-72) last week, Tech maintained its one-game lead in the championship race. The Raiders hold a 7-1 league record, while Texas, their nearest opponent, has a 6-2 mark.

Decisive Game

Tonight's game might well decide the SWC winner. If Tech wins, it would be two games ahead with only five to play. But if Texas wins, it would throw the race into a tie.

However, Coach Gene Gibson said, "If we win tonight it will help us because it will give us a two game lead with five games remaining. But we won't feel like the race is over until we have a two game lead with one game left."

The Raiders beat Texas 66-62 in Austin earlier in the season, but Coach Gibson noted that the Longhorns had improved greatly since then. They will be entering tonight's game with a seven game

winning streak, having beaten Arkansas (81-65) and Rice (75-72) last week.

Larry Franks has been Texas' hottest gun of late. The 6-5 senior during the past seven games has been averaging 13 rebounds and 20 points per game.

Other starters for Coach Harold Bradley's squad will likely be John Fultz (6-8), Paul Oliver (6-3), Mike Gammon (6-2) and Jimmy Clark (5-10).

Although no Texas players rank among the conference's top scorers, the Longhorns as a team have scored 607 points in league play while holding opponents to 559. On a per game basis, Texas is averaging 75.9 points against their opponents' 69.9.

Coach Gibson will open with the same group he has used previously — Dub Malaise, Harold Denney, Norman Reuther, Glen Hallum and Billy Tapp.

Although Malaise no longer is

first in league scoring, he still leads the conference in scoring for the season. Tech's leading scorer has a season average of 23.1 per game and 392 total points.

Beasley Leads

By virtue of a 43 point splurge against Baylor, A&M's John Beasley now holds first in conference scoring. Beasley has 184 points and a 23.0 average. Malaise is second with 169 points and a 21.1 mean.

Reuther is third with 159 points and a 19.9 average.

Denney is Tech's second leading scorer. He is averaging 17.6 points per game for the season. Reuther is close behind with a 16.6 average.

Other Games

Other conference games tonight include TCU-SMU at Fort Worth, Texas A&M-Rice at College Station and Arkansas-Baylor at Fayetteville.

BIG WHEEL ON CAMPUS! ECONO-CAR® HANDS YOU THE WHEEL FOR FAR LESS THAN THE OTHER BIG RENT-A-CARS!

Here's the rent-a-car deal with BIG SAVINGS appeal for both students and teachers! It's the famous Econo-Car "lots-for-little" package! Texas Tech Pole Vaulter Could Be Out Full Year

Raider pole vaulter Larry Moon, who received a broken arm in the Dallas track meet last weekend, could be out for a full year according to Tech track coach Vernon Hilliard.

Moon, who placed second with a better than expected 14-4 jump, broke his arm by hitting the wooden frame of the foam rubber jumpion pit.

Hilliard said Moon would likely be lost for the season and planned to ask for a hardship ruling from the SWC since the outdoor season is still a month away.

'Jumping Well'

"Larry was really jumping well Saturday night," said Hilliard. "In fact, it looked for a while like he might win in spite of his broken arm."

Moon had cleared 14-4 on his first jump and the rest of the field, including the eventual winner Mark King of Texas, made the height on their last jumps.

In other action at the Dallas

meet, Ken Coleman, Tech sprinter, placed second in the 60-yard dash behind Baylor's Wayne Brandt.

Only Inches

Both were credited with 6.3 clockings as only inches separated them at the tape.
