Mountain Echoes

By Barbara Kingsbery

"Name dropping" can be harmless in most cases, but not so in the newspaper business. Last week's issue of the NEWS omitted a name from the list of donors to the County stock show sale fund, and we have to get out of the doghouse.

It seems Tom Kingsbery helped contact the many local people who donated to the fund, and it was his name left off the list. Friends are accusing Tom of "conning" them into donating, then he wouldn't have to make a contribution.

A fellow from a rural community near Cross Plains was in that city recently and stopped at the domino parlor to enjoy a few games with his friends. About sunset he decided to go home and walked outside to get in his pickup truck. It was nowhere to be seen.

After searching the downtown district with no success, the gentleman notified lawmen that his vehicle had been stolen.

In preparing a broadcast for the police radio network, he was asked his license number. He couldn't remember, so a telephone call was placed to his wife.

"Hold the phone," she told her husband, "and I'll look at the tags on your pickup; it's parked alongside the house."

The man had forgotten that he had gone to town in his car, rather than the pickup. During all his anxiety the car had been parked right there in front of the domino parlor!

Many people don't remember about their vehicle inspection date until too late—and they get a traffic ticket for past due inspection certificate.

Many of us are used to the former April inspection date, and the many reminders at that time of the year. However car inspection is now done once a year for each motorist, and the month due is labeled with a number (January is numeral 1, etc.) on the vehicle sticker. Motorists are urged to check the number of their sticker and have cars inspected before their month is up.

bk

Local people are exclaiming about the spring-like weather we have had recently, and complaining about the continued drought. Ray Owen, official rain recorder, has all but retired during the past three months, as only .40 inch of moisture has been measured since October 23. The last rainfall was a meager .15 inch, and the only moisture for the month of January.

The most encouraging word we've heard is that an unusually dry winter is USUALLY followed by a wet-spring!

bk

One local tomcat took an unexpected ride last week. "Fluff," a big black and white cat belonging to Mrs. C. D. Bruce, crawled out from under a load of hay in the Bruce pickup as it was being unloaded at their place on the Coleman Lake, 30 miles from Santa Anna. The terrified cat was put in a feed bucket under a bale of hay for the return trip home, and probably will never get in the back of a vehicle again.

In Our Opinion

By W. T. HAYS

THE STOCK FRAUD CASE is getting a lot of publicity and it should, because people in high office in Texas should not be allowed to hide their personal business transactions while they are on the state payroll.

The SEC investigation has disclosed that Gov. Preston Smith and Speaker Gus Mutscher both have profited considerably and in a short time due to stock manipulations by Frank W. Sharp.

The public doesn't know just how our officials are connected, but from appearances there is bound to be a scandal connected with the case.

What it actually amounted to is that everyone who owned National Bankers Life stock lost if they didn't get out in time, and it appears that Smith and Mutscher did get out.

The big loser is the Jesuit Fathers and they were not the only ones. The SEC has filed suit against the principals in the case as a result of the manipulations.

The big question for Texans is did the stock deal influence legislation last year. Even though Governor Smith did veto the bill in question, there is still the smell of something untold.

The bank in Sharpstown closed Monday because depositors made a run on it, and it is expected that it will stay closed. They carry some heavy paper for the Jesuits, and there are indications that there was some misuse of money also.

This type of thing has happened before, but as far as we know, there were no high state officials tied into it in any way. There is a good possibility that neither of the two will come out smelling like a rose after the smoke clears.

How that will affect their political careers is to be seen, but Tuesday morning prospective opponents for Mutscher in 1973 for speaker had already dropped up. Representative Rayford Price of Palestine has already thrown his hat in the ring, and says he will run regardless of the present speaker's plans.

The Insurance Commission has taken over the insurance companies involved and the State Banking Commission has assumed the closed Sharpstown bank.

So it won't be long until maybe the public will know "who done what and when." Then let the chips fall where they will.

THE MANSON CASE is finally ended and all parties were found guilty. The shame of it is that a case could take seven months to try and cost so much money, and much of the credit can be given to the tendency of courts to go overboard to make sure the civil rights of every individual are not infringed upon.

The jury is still to set the penalty for the four defendants which will be either the gas chamber or life imprisonment.

The moral of the whole story is that the dignity of a court in this country could be ignored as much as it was in the Manson trial, as well as some others that have been tried in recent times.

There was a day when a court trial was a dignified proceeding and attorneys for all conducted themselves with restraint, depending upon their knowledge of law and their wits to win their cases. But today it seems they try to win by disrupting the proceedings as often and as loud as possible, libeling law and order in the most profane terms, and then expect a jury to find for them.

Frankly, we are of the opinion that the jury found right, and whatever their punishment, they deserve every bit of it.

STATE Capital NEWS

By VERN SANFORD

Austin — Governor Preston Smith told Texas lawmakers they can balance a \$6.8 billion budget without new taxes — by deficit finance, bond issues and federal assumption of welfare costs.

While legislators liked to hear that they can escape a tax bill, many found the Governor's approach contingent on too many "ifs." Voter approval of bond issues, they noted, is highly uncertain and congressional assumption of welfare is doubtful.

Here, in brief, is what the Governor proposed:

- Financing of welfare programs for only 10 months in anticipation that Congress will take over full funding by then.
- A maximum \$450 million "public free school bond" issue, to be retired from school land income now going by constitutional decree into the untouchable permanent school fund.

A constitutional amendment would be required to create both the fund and pay-off plan.

- Temporary deficit financing of a \$70 million emergency aid-to-welfare appropriation which would require a four-fifths vote of the Legislature.

- A \$71 million revenue bond program (secured with tuition income) to build new colleges, medical and dental schools authorized in 1969.

He also proposed three more constitutional amendments:

- Removal of the \$80 million a year welfare ceiling.
- Raising or removing the water development bond interest lid.

- Creation of a \$100 million fund for state aid on waste treatment facilities.

Smith pledged an all-out effort to encourage a federal take-over of welfare financing. If lawmakers don't like his ideas, said the Governor they should "bring me a plan."

COMMITTEES NAMED — House Speaker Gus Mutscher named his committees late last week, signaling the start of actual bill introduction and processing in the lower house.

As expected, he picked veteran Rep. W. S. (Bill) Healy of Paducah for another session as chairman of the budget-writing appropriations committee which promptly launched hearings of spending requests.

To the hot-spot revenue and tax committee chairmanship, he again appointed Rep. Ben Atwell of Dallas.

But Mutscher estimated he ordered 74 per cent turnover in all chairmanships.

Rep. Rayford Price of Palestine was bumped from the hard-working state affairs panel chair, and Rep. James Slider of Naples got that job. Rep. Delwin Jones of Lubbock got Mutscher's assignment to chair the congressional and legislative districts committee which must reapportion boundaries on the basis of the new census. Jones estimates a loss of 10 or 12 rural House seats.

Rep. DeWitt Hale of Corpus

Christi kept the judiciary committee chair, and Rep. John Traeger of Seguin retained the constitutional amendment committee gavel. New rules committee chairman is Rep. James Nugent of Kerrville. Rep. Dick McKissack, who sponsored the liquor-by-drink constitutional amendment, will head Mutscher's liquor regulations committee. Rep. Frank Calhoun of Abilene is chairman of the criminal jurisprudence panel.

WELFARE MEASURES ADVANCE — First major measure to clear senate committee was a proposed constitutional amendment by Sen. Charles Wilson of Lufkin to remove the \$80 million state welfare ceiling.

Governor Smith said the current rate of expenditures would bring the state up against an \$80 million lid by June 1, and drastic cuts in aid to families with dependent children would be required. Welfare Commissioner Burton G. Hackney estimated AFDC average payments of \$113.60 a month would be slashed to \$90 May 1 if the ceiling is not raised.

Sponsors of the amendment hope to get it to a vote by early May along with other proposals in the Governor's constitutional change package.

AID FOR PRIVATE COLLEGES — Coordinating Board Texas College and University System endorsed state aid to hard-pressed private colleges.

Board backed tuition equalization grants to needy students and state contracts with private institutions for educational degree purposes. Bills to accomplish both purposes have been introduced. Estimated cost to the state is about \$28 million.

Board turned down a proposal that the state should assume full cost of community junior colleges.

ALLOWABLE DOWN — Railroad Commission set the February oil allowable to permit a maximum of 3,95,821 barrels a day production, reducing the flow from 83.1 per cent in January to 82.1 per cent.

Actually, production is not expected to exceed 3,411,000 barrels daily. Buyers nominated for 3,410,979.

Commission heard testimony on high inventories of Texas crude. Only one of 14 major oil company buyers — Mobil — changed purchase plans from January.

DEMOCRATS BACK ELECTION CHANGES — State Democratic Executive Committee endorsed a sweeping election law revision, including Tuesday primary dates and allowing 18-years-olds to participate in national party convention delegate selection.

Party leaders recommended complete revision of voter registration laws but came up with no specifics. They also proposed changes in convention procedures to conform with national party rules.

Legislation is pending in the senate to repeal the annual voter registration requirement and to move dates of primaries from May and June to August and September. Constitutional amendment to permit 18-year-olds to vote in all elections also is pending.

FOUNDATION PROBE LAUNCHED — Atty. Gen. Crawford C. Martin directed immediate investigation of seven members of the Moody Foundation board at their own request.

Trustees asked the Attorney General to determine if there is any basis for complaints made against them by a legislative interim study commission chairman. Orange County District Attorney Louis Dugas Jr. alleged conflicts of interests, acts of self dealing and incompetency on the part of some trustees, but the committee on charitable foundations which he headed did not back his charges.

AGENCY RECOMMENDED — Advisory Committee on Marine Resources has recommended a new state authority to deal with Texas interest and goals in the coastal zone.

A 20-member committee proposed an agency to coordinate research and planning activities in the state's coastal and marine environment.

Other recommendations include establishment of an environmental defense or clean-up fund, support for a set grant college and clarification of existing state agency role in the coastal zone.

SHORT SNORTS

Legislation urged by the Governor to require immunization of school children has been introduced.

Insurance Board will hold a hearing on February 18 here on revision in fire, windstorm and extended coverage rates and rules for writing fire and allied lines of insurance.

Senate passed a bill exempting from "late, late" movies leased to tv stations.

Governor named Michael P. Metcalf of Dumas 69th district attorney.

Once a slot machine, always a slot machine, said Attorney General Martin in an opinion, holding that such a device still is forbidden even if altered to put out souvenir type coins.

ACP has been changed to REAP. This program has been funded on the national level at a hundred and fifty million dollars, which makes about a 20 per cent decrease in funds.

Under the program, the Federal government will pay about fifty per cent of the practice that will achieve permanent benefits. The program will be run in each county by the ASC County Committee. Under the broad Federal and state guidelines, the committeemen will select the practices best suited for meeting the needs of their area, determine which farm land needs treatment; and within the county's funds fix the amount of the cost-share to be provided each farmer. The program provides for a high degree of local determination.

The 1971 program will reflect changes desired by the President, and, consistent with a House - Senate conference report, will make provisions for continuation of 1970 program practices and procedures at the option of the county committee.

The incentive price for shorn wool has been set at 72 cents a pound for the 1971 marketing year, according to Rankin McIver, chairman of the Agricultural Stabilization and Conservation County committee.

The support price for mohair will be 80.2 cents per pound, he said. Both figures are unchanged from the 1970 levels. The price of pulled wool will be supported at a level comparable to the incentive price for shorn wool through payments on unshorn lambs.

Mr. McIver said the Agricultural Act of 1970 extended authority for the wool and mohair price-support program through December 31, 1973. The new legislation amends the National Wool Act by requiring that support prices shall be at the announced levels for each of the three marketing years through the end of 1973.

The chairman reminded the producers that shorn wool payments will be based on each producer's returns from sales. The percentage will be that required to raise the national average price received by all producers from shorn wool up to the announced incentive price of 72 cents a pound. Mohair payments will be calculated in a manner similar to wool.

Mr. McIver said payments to producers on 1971 calendar year marketings will be made beginning in April 1972.

When you promised to share and share alike, did that mean your wife could use up all the hot water?

You could get up earlier. Then you'd be sure to beat her to it. Of course she wouldn't be too impressed with your chivalry. Another alternative is a larger gas water heater. Gas water heaters are easy to buy, easy to install, and recover hot water up to twice as fast as comparable electric models.

So stop competing with your better half. Get a larger capacity hot water heater. For fewer fights and lots more hot water.

In Our Opinion

By W. T. HAYS

THE STOCK FRAUD CASE is getting a lot of publicity and it should, because people in high office in Texas should not be allowed to hide their personal business transactions while they are on the state payroll.

The SEC investigation has disclosed that Gov. Preston Smith and Speaker Gus Mutscher both have profited considerably and in a short time due to stock manipulations by Frank W. Sharp.

The public doesn't know just how our officials are connected, but from appearances there is bound to be a scandal connected with the case.

What it actually amounted to is that everyone who owned National Bankers Life stock lost if they didn't get out in time, and it appears that Smith and Mutscher did get out.

The big loser is the Jesuit Fathers and they were not the only ones. The SEC has filed suit against the principals in the case as a result of the manipulations.

The big question for Texans is did the stock deal influence legislation last year. Even though Governor Smith did veto the bill in question, there is still the smell of something untold.

The bank in Sharpstown closed Monday because depositors made a run on it, and it is expected that it will stay closed. They carry some heavy paper for the Jesuits, and there are indications that there was some misuse of money also.

This type of thing has happened before, but as far as we know, there were no high state officials tied into it in any way. There is a good possibility that neither of the two will come out smelling like a rose after the smoke clears.

How that will effect their political careers is to be seen, but Tuesday morning prospective opponents for Mutscher in 1973 for speaker had already cropped up. Representative Rayford Price of Palestine has already thrown his hat in the ring, and says he will run regardless of the present speaker's plans.

The Insurance Commission has taken over the insurance companies involved and the State Banking Commission has assumed the closed Sharpstown bank.

So it won't be long until maybe the public will know "who done what and when." Then let the chips fall where they will.

THE MANSON CASE is finally ended and all parties were found guilty. The shame of it is that a case could take seven months to try and cost so much money, and much of the credit can be given to the tendency of courts to go overboard to make sure the civil rights of every individual are not infringed upon.

The jury is still to set the penalty for the four defendants which will be either the gas chamber or life imprisonment.

The moral of the whole story is that the dignity of a court in this country could be ignored as much as it was in the Manson trial, as well as some others that have been tried in recent times.

There was a day when a court trial was a dignified proceeding and attorneys for all conducted themselves with restraint, depending upon their knowledge of law and their wits to win their cases. But today it seems they try to win by disrupting the proceedings as often and as loud as possible, libeling law and order in the most profane terms, and then expect a jury to find for them.

Frankly, we are of the opinion that the jury found right, and whatever their punishment, they deserve every bit of it.

Austin — Governor Preston Smith told Texas lawmakers they can balance a \$6.8 billion budget without new taxes — by deficit finance, bond issues and federal assumption of welfare costs.

While legislators liked to hear that they can escape a tax bill, many found the Governor's approach contingent on too many "ifs." Voter approval of bond issues, they noted, is rightly uncertain and congressional assumption of welfare is doubtful.

Here, in brief, is what the Governor proposed:

- Financing of welfare programs for only 10 months in anticipation that Congress will take over full funding by then.
- A maximum \$450 million "public free school bond" issue, to be retired from school land income now going by constitutional decree into the untouchable permanent school fund.

A constitutional amendment would be required to create both the fund and pay-off plan.

- Temporary deficit financing of a \$70 million emergency aid-to-welfare appropriation which would require a four-fifths vote of the Legislature.

- A \$71 million revenue bond program (secured with tuition income) to build new colleges, medical and dental schools authorized in 1969.

He also proposed three more constitutional amendments:

- Removal of the \$80 million a year welfare ceiling.
- Raising or removing the water development bond interest lid.

- Creation of a \$100 million fund for state aid on waste treatment facilities.

Smith pledged an all-out effort to encourage a federal take-over of welfare financing. If lawmakers don't like his ideas, said the Governor they should "bring me a plan."

COMMITTEES NAMED — House Speaker Gus Mutscher named his committees late last week, signaling the start of actual bill introduction and processing in the lower house.

As expected, he picked veteran Rep. W. S. (Bill) Healy of Paducah for another session as chairman of the budget-writing appropriations committee which promptly launched hearings of spending requests.

To the hot-spot revenue and tax committee chairmanship, he again appointed Rep. Ben Atwell of Dallas.

But Mutscher estimated he ordered 74 per cent turnover in all chairmanships.

Rep. Rayford Price of Palestine was bumped from the hard-working state affairs panel chair, and Rep. James Sluder of Naples got that job.

Rep. Delwin Jones of Lubbock got Mutscher's assignment to chair the congressional and legislative districts committee which must reapportion boundaries on the basis of the new census. Jones estimates a loss of 10 or 12 rural House seats.

Rep. DeWitt Hale of Corpus Christi kept the judiciary committee chair, and Rep. John Traeger of Seguin retained the constitutional amendment committee gavel.

New rules committee chairman is Rep. James Nugent of Kerrville. Rep. Dick McKissack, who sponsored the liquor-by-drink constitutional amendment, will head Mutscher's liquor regulations committee.

Rep. Frank Calhoun of Abilene is chairman of the criminal jurisprudence panel.

WELFARE MEASURES ADVANCE — First major measure to clear senate committee was a proposed constitutional amendment by Sen. Charles Wilson of Lufkin to remove the \$80 million state welfare ceiling.

Governor Smith said the current rate of expenditures would bring the state up against an \$80 million lid by June 1, and drastic cuts in aid to families with dependent children would be required.

Welfare Commissioner Burton G. Hackney estimated AFDC average payments of \$113.60 a month would be slashed to \$90 May 1 if the ceiling is not raised.

Sponsors of the amendment hope to get it to a vote by early May along with other proposals in the Governor's constitutional change package.

AID FOR PRIVATE COLLEGES — Coordinating Board Texas College and University System endorsed state aid to hard-pressed private colleges.

Board backed tuition equalization grants to needy students and state contracts with private institutions for educational degree purposes. Bills to accomplish both purposes have been introduced. Estimated cost to the state is about \$28 million.

Legislation is pending in the senate to repeal the annual voter registration requirement and to move dates of primaries from May and June to August and September. Constitutional amendment to permit 18-year-olds to vote in all elections also is pending.

FOUNDATION PROBE LAUNCHED — Atty. Gen. Crawford C. Martin directed immediate investigation of seven members of the Moody Foundation board at their own request.

Trustees asked the Attorney General to determine if there is any basis for complaints made against them by a legislative interim study commission chairman. Orange County District Attorney Louis Dugas Jr. alleged conflicts of interests, acts of self dealing and incompetency on the part of some trustees, but the committee on charitable foundations which he headed did not back his charges.

AGENCY RECOMMENDED — Advisory Committee on Marine Resources has recommended a new state authority to deal with Texas interest and goals in the coastal zone.

A 20-member committee proposed an agency to coordinate research and planning activities in the state's coastal and marine environment.

Other recommendations include establishment of an environmental defense or clean-up fund, support for a set grant college and clarification of existing state agency role in the coastal zone.

SHORT SNORTS
 Legislation urged by the Governor to require immunization of school children has been introduced.

Insurance Board will hold a hearing on February 18 here on revision in fire, windstorm and extended coverage rates and rules for writing fire and allied lines of insurance.

Senate passed a bill exempting from sales tax income from "late, late" movies leased to tv stations.

Governor named Michael P. Metcalf of Dumas 69th district attorney.

Once a slot machine, always a slot machine, said Attorney General Martin in an opinion, holding that such a device still is forbidden even if altered to put out souvenir type coins.

ACP has been changed to REAP. This program has been funded on the national level at a hundred and fifty million dollars, which makes about a 20 per cent decrease in funds.

Under the program, the Federal government will pay about fifty per cent of the practice that will achieve permanent benefits. The program will be run in each county by the ASC County Committee. Under the broad Federal and state guidelines, the committeemen will select the practices best suited for meeting the needs of their area, determine which farm land needs treatment; and within the county's funds fix the amount of the cost-share to be provided each farmer. The program provides for a high degree of local determination.

The 1971 program will reflect changes desired by the President, and, consistent with a House - Senate conference report, will make provisions for continuation of 1970 program practices and procedures at the option of the county committee.

The incentive price for shorn wool has been set at 72 cents a pound for the 1971 marketing year, according to Rankin McIver, chairman of the Agricultural Stabilization and Conservation County committee.

The support price for mohair will be 80.2 cents per pound, he said. Both figures are unchanged from the 1970 levels. The price of pulled wool will be supported at a level comparable to the incentive price for shorn wool through payments on unshorn lambs.

Mr. McIver said the Agricultural Act of 1970 extended authority for the wool and mohair price-support program through December 31, 1973. The new legislation amends the National Wool Act by requiring that support prices shall be at the announced levels for each of the three marketing years through the end of 1973.

The chairman reminded the producers that shorn wool payments will be based on each producer's returns from sales. The percentage will be that required to raise the national average price received by all producers from shorn wool up to the announced incentive price of 72 cents a pound. Mohair payments will be calculated in a manner similar to wool.

Mr. McIver said payments to producers on 1971 calendar year marketings will be made beginning in April 1972.

County Agent News Column

A lot of people are interested in early weaning and feeding of lambs, due to drought we are now in. Some information concerning the early weaning is contained in our recently mailed Production Guideline for Sheep. Some advantages of early weaning are: ewes will maintain cheaper and better dry; grazing pressure on already depleted range is lessened; early weaning reduces parasite problems and in droughts can prevent stunting.

After 8-9 weeks, the ewe's milk flow has been drastically reduced. It is much more economical to feed the lamb, than the ewe and lamb. Baby lambs 8-9 weeks, 40 lbs. or less, can handle a "hotter" ration than older lambs.

Now is a good time to do the pruning chores you've postponed on trees and shrubs. This warm weather should be conducive to that kind of work.

The pecan is the state tree of Texas.

Mrs. Nona Ellis visited her mother one day last week and again Monday.

Thanks to all who remembered me, while in hospital, for the gifts, flowers, cards and prayers.

The first elevated railroad in the world was built in New York in 1866-67.

When you promised to share and share alike, did that mean your wife could use up all the hot water?

You could get up earlier. Then you'd be sure to beat her to it. Of course she wouldn't be too impressed with your chivalry. Another alternative is a larger gas water heater. Gas water heaters are easy to buy, easy to install, and recover hot water up to twice as fast as comparable electric models. So stop competing with your better half. Get a larger capacity hot water heater. For fewer fights and lots more hot water.

Jean Ellen Wheat, Dale Herring Wed In Coleman Ceremony

A candlelight wedding ceremony was held in the Coleman First Baptist Church on Saturday, Jan. 16, for Miss Jean Ellen Wheat of Coleman and Dale Wayne Herring of Trickham. They are the daughter and son of Mr. and Mrs. Sidney Wheat of Coleman and Mr. and Mrs. Casey Herring of Trickham.

Officiating at the 7:00 p. m. double ring ceremony was the Rev. Larry Van Zile, cousin of the bride. Traditional wedding selections were played by Mrs. Kenneth Herring of Odessa, and a solo, "Whither Thou Goes," was sung by Miss Susie Bunt.

Forming the background for the ceremony was an arched candelabrum set with pink tapers and accented on either side by potted palms. An altar arrangement of pink carnations completed the setting.

The bride, given in marriage by her father, wore a gown of organza over peau de soie in empire silhouette trimmed with rows of Venice lace, and a chapel veil of illusion edged with matching lace and attached to a ring headpiece.

She wore a diamond lavallier belonging to her grandmother and carried a colonial bouquet of Frenched white carnations, sweetheart roses and Gypsophile centered by a white Cattelya orchid.

Mrs. Gary Wheat, matron of honor, wore an empire

gown of rose-gay velvet with long full sleeves, and shoulder-length veil or matching illusion held in place by a Dior bow of velvet. She carried a rosegay of Frenched white carnations and Gypsophile.

At the reception, which was held in the church fellowship hall, the table was covered with pink satin, overlaid with net and lace, and centered with a silver candelabrum set with pink tapers and filled with a colonial bouquet of pink carnations, roses, white mums, and Gypsophile. Further accenting the table was a tiered cake iced in white, accented with pink, and topped with a miniature bride and groom figurine.

Well, What Do You Know?

fun, games and knowledge

by MARTHA GLAUBER SHAPP, Editor, The New Book of Knowledge

Do you know who John Henry was?

John Henry is the hero of the American work song of the same name. The ballad tells a story that is related to an important problem of American life. It is about a super-strong Negro named John Henry.

Using only a hammer, he races against the white man's steam drill to finish a railroad tunnel in West Virginia. John Henry wins, but his heart bursts with the effort. In the words of the song, "He died with the hammer in his hand."

The song may date from the last century, but the problem of man in an increasingly mechanized world still faces us all.

A country can't live on love alone.

There are a lot of things a man can do for his country. Including saying his piece, pro or con.

And talk is an important part of what makes a democracy like ours work.

But in the final analysis, talk is cheap. Personal involvement accomplishes a lot more.

Putting part of your savings to work for America is a step in that direction. To provide some of the economic strength it takes to make the whole system run.

That's one reason why Savings Bonds mean a lot.

They help to pay part of the cost of running a country where you're free to speak your mind.

And they help you at the same time. With interest and security.

So next time you have something to say about America, let your Bond purchases do part of the talking.

Accent On Health

What are your chances of being injured in an accident involving some consumer product this year?

If you are a male between the ages of 5 and 24, working or playing at home with some consumer product between 3:00 and 9:00 p. m. on a Saturday or Sunday, you probably should take greater care to avoid potential accidents. That could be one of the lessons learned from the 1970 Product Safety Report issued by the U. S. Department of Health, Education and Welfare. The report is designed to furnish information concerning the types and severity of injuries, with particular emphasis on identification of consumer products usually involved or associated with those injuries.

The products most frequently involved in injuries are, in descending order: bicycles, nails, kitchen knives, tables, beds, playground equipment, chairs, snow skis, non-prescription drugs, glass bottles, metal containers, ladders, power saws, prescription drugs, and drinking glasses. Also mentioned, but in less frequent numbers, are: clothes dryers, washers, stoves and ovens, power lawn mowers, and chain saws.

According to the statistics, almost one-half of the injured persons are under 15 years of age. And nearly 60 per cent of them are males. Almost 70 per cent of the accidents are reported to have occurred in or around the home.

J. M. Doughty, Jr., a Texas Health Department official, says those figures should not be viewed as reflecting all the consumer products accidents occurring across the country last year. They are, however, good indicators as to the type of products involved, who is involved, and when and where they occur.

Almost 50 per cent of the injuries reported occurred between noon and 6:00 p. m. and more than one-third ac-

curred between 6:00 p. m. and midnight. Each day of the week ranked almost equal in the number of accidents occurring on that particular day, although Saturday and Sundays showed a slight increase.

Governmental actions to protect the health and safety of the public will only be successful if the public itself becomes informed of these potential dangers from common consumer products. That is why the Texas Health Department emphasizes that safety is part of the good health habit.

Gov. Smith Named On Council To Beautify Texas

Governor Preston Smith has recently accepted a plaque naming him an honorary Life Member of the Beautify Texas Council, a statewide organization dedicated to working towards a more beautiful state.

Governor Smith lauded the Beautify Texas Council and took advantage of this opportunity to stress the urgent need for industry support of the Council.

The plaque honors Governor Smith "for outstanding leadership and dedicated service in preserving an attractive environment for Texas."

At presentation ceremonies in the governor's office in Austin January 14, Beautify Texas Council President William Colegrove complimented the governor for his concern and for his programs to improve the environment in Texas.

Colegrove spoke of the Governor's Community Achievement Awards initiated in 1970 by Governor Smith through his office of state-local relations. The awards went to three Texas communities that were judged in competition to have accomplished the most toward beautification and improvement of the quality of life for their citizens. The governor presented the awards last year to Atlanta, Graham and Lockhart, all small cities.

Because of the interest in this competition, the governor has enlarged its scope to include all cities, towns and communities in Texas. The Governor's Community Achievement Awards will be made annually, and Governor Smith expressed the hope that future governors will continue the competition.

The four regional Chambers of Commerce of Texas and the Texas Agricultural Extension Service have been working together to aid the Beautify Texas Council in developing beautification and anti-litter programs for Texas cities.

Record Number In Stock Show At Fort Worth

Preliminary totals indicate a record entry list for the 75th Diamond Jubilee Anniversary of the Southwestern Exposition and Fat Stock Show, Jan. 29 through Feb. 7.

Officials have processed 11,709 livestock entries, besting the 1970 record. These totals do not include an estimated 100 entries in the "show up" children's horse classes.

"The record turnout is heartening," said Stock Show President and Manager W. R. Watt in announcing the tabulation. "The increase indicates good acceptance of our show and reflects a healthy trend in the livestock industry."

The Stock Show opens a 10-day run Friday on Amon Carter Square.

A substantial gain of 481 head in the junior livestock show continued the trend of recent years. This year's figures indicate 3,117 head, up from 2,636 in 1970.

"This continuing upward trend of young exhibitors pleases us a great deal," Watt said. "It speaks well for the future of the livestock business to have so many youngsters preparing for positions of leadership."

Junior barrow show entries attracted 1,100 to lead the junior show.

Horse show entries total 1,606, up from 1,541 a year ago. Again, the Quarter Horse division leads the list with 697 entries.

Almost 800 entries are registered for the special commercial Hereford heifer show and sale, helping the total entries to pass the record. Polled Hereford classes registered the greatest number of open cattle entries with 299.

Sheep and lamb entries include 965 in the Junior Show and 771 in the Open Show. Several Santa Anna 4-H and FFA members will be among the entries at the Fort Worth Show next week.

Guidance Needed For Children Given A Rifle

Austin — Youngsters sporting new guns after Christmas-time need more instructions than just how to load and fire them.

Texas Parks and Wildlife Department officials remind Texans that even the very smallest single-shot .22 can be a deadly weapon, so parents who give firearms to the youngsters should be sure they are familiar with safe gun handling.

A formal firearms handling course would be appropriate; where this is not possible, some individual instruction from an experienced shooter might fill the bill.

Also, the younger fry should not be allowed to use guns except when accompanied by a responsible adult. Guns and ammunition should be locked up when not in use.

CLIFF HERNDON AT HOME

Cliff Herndon is recuperating from a broken leg and has been confined at home for over a week. Mr. Herndon broke his leg while quail hunting near Big Lake. The accident occurred when he stepped in a hole.

Although the bone is broken just below the knee, Mr. Herndon's leg was not put in a cast. He will be on crutches until the break heals.

The mishap occurred on Saturday, Jan. 16, and a nephew brought him back to Santa Anna the next day.

There are four national forests in Texas.

Parents vs. Grandparents

Jane and Eddie, a young married couple, showed almost no interest in their baby boy. Out of sheer necessity, Jane's parents took over the task of bringing him up.

But when he was three, Jane and Eddie decided they wanted him back. The grandparents refused to part with the boy, so the two couples squared off in the courtroom to fight for custody.

"Parents outrank grandparents," argued the younger pair. But it also appeared that Jane and Eddie drank too much, worked too little, and had no home of their own. The court ruled that the boy was better off where he was, with his grandparents.

It is not rare for parents and grandparents to disagree about the custody of a child. Generally speaking, the law puts its main emphasis on what is best for the child even at the expense of parental sensibilities.

Nevertheless, in most instances, parents are indeed favored over grandparents because they are the "natural" custodians of their own offspring. As one court put it: "The law seeks to work in harmony with nature, and to continue those ties which bind man to his own flesh."

Thus, in another case, parents regained custody of their daughter even though they had no savings, no life insurance, and only a modest income. Noting that their income at least was steady and their habits sober, the court said:

"Unless they are to be deprived for all time of the love of their child, and of the opportunity to give her their love, they should be given that chance now."

Are a child's own wishes taken into consideration? Yes, if he is mature enough

to have independent views. But usually this factor is not decisive by itself.

A 15-year-old boy, transferred to his parents' home after many years with his grandmother, was unhappy about the change. He said in a court hearing that, because of squabbling between his mother and father, he wanted to move back with his grandmother.

But the court held that the boy's discontent was not enough reason to grant his request. The court said he would probably soon get used to the shift from a sheltered existence with his grandmother to the normal abrasions of family life.

Harry's been talking about that house he's going to buy for six years now. Harry's still talking.

When it comes to saving for something special we all have good intentions, but many of us never seem to get started, let alone have the discipline to keep saving regularly.

That's what makes the Payroll Savings Plan such a terrific way to build a nest egg. All you do is sign up once. Then the amount you specify is automatically set aside from your check each payday and invested in U.S. Savings Bonds.

Now that Bonds pay 5% interest when held to maturity of 5 years, 10 months (4% the first year; thereafter 5.20% to maturity), your savings will grow faster than ever.

So, if you see a little bit of Harry in yourself, maybe it's time you joined the

Payroll Savings Plan. It's time to do more than just talk about your future.

Bonds are safe. If lost, stolen, or destroyed, we replace them. When needed, they can be cashed at your bank. Tax may be deferred until redemption. And always remember, Bonds are a proud way to save.

Crime Is Local

At the national level uncurbed crime is billed as a major problem of the country.

And as so often happens since the nation drifted into some form of welfarism, the inclination seems to be correction must come out of Washington.

However, as is said by newspaper advertisers "all business is local," so can it be said that all crime is local.

A criminal a thousand miles away does not endanger local lives or property, but a criminal on the loose in the local community is a community problem.

Therefore, law and order is largely a local responsibility, and there is no question that crime is growing.

The National Federation of Independent Business has been surveying the crime problem among its 2,500 local district chairmen who are all leaders of their communities, with the bulk of them located in the smaller towns of the nation.

The majority of them report that crime is on the upswing in their areas.

However, there are some of these chairmen who report that crime is no problem in these communities.

From these respondents there comes comments such as the following: From a small California town where crime is not considered a problem the chairman says, "our Sheriff's department is very efficient."

From a small Illinois city where crime is reported not to be a problem, the comment is, "We have an excellent police force and our police chief is the no-nonsense type."

These comments probably illustrate better than a volume could tell of the way to combat crime.

That is for local citizens who have the power of the ballot to insist that in their community that their judges, district attorneys and police officials be of the "non-nonsense" type. In addition, it would be well if people formed the habit of dropping a line of thanks to their police when they have performed good service in protecting the community. After all, the life they save may be their's sometime.

Send a letter to North Vietnam.

Right now hundreds of Americans are being held captive in North Vietnam.

A few prisoners have made it back. They talk about bamboo cages. Vicious beatings. Malnutrition. Humiliation.

But the North Vietnamese will tell us nothing. And it's this silence that makes our appeal more urgent.

For the families at home, there is no word on who's alive. Who's dead. Or even who's being held. There is nothing. Except the anguish of not knowing.

Maybe you can change this. By writing to the one man who can change it: The President of North Vietnam.

Ask him to release the names of prisoners, allow them to write to their families, and let the Red Cross inspect the prisons to

insure proper medical treatment and living conditions.

Remind him that he is bound by the 1949 Geneva Convention which his country signed. And by the Istanbul resolution.

North Vietnamese leaders do care about American public opinion. And if they think they can gain something by bowing to it, they will.

But one letter won't do it. Or a thousand. Maybe it will take millions. So we've got to write now. All of us. And often.

Write a letter tonight. And send it to: Office of the President, Democratic Republic of Vietnam, Hanoi, North Vietnam.

It'll cost you a quarter. But it might save a life.

Maybe they'll open it.
