We are still waiting on the certified tax roll from the County Appraisal Board so that we can figure our tax rate for the next year. We are sure that we will have to have a small increase in the over all tax collections. I want you to know that there will be some taxes that will increase much more than others and some will even be decreased. This is due to the fact that if property has been on the rolls at way below market value and is now brought up to that, the increase will be greater than on property that was nearer to the market value. If property was on at 100% the amount of taxes paid will be less than they have been. We hope to be able to set our rate soon so that we can get the statements out on

FREE SPEECH AND THE A.C.L.U.

On May 20, 1982, U.S. District Judge John Singleton ruled that the children in Aldine schools, outside Houston, could no longer include a phrase praising God in their school song.

That made the American Civil Liberties Union (ACLU) very happy. They had been party to the suit, claiming that the song violated constitutional provisions of separation of church and state.

On July 3rd, the Supreme Court ruled that states can indeed ban the distribution of child pornography. That made ACLU very unhappy. One of their spokesmen was quoted in the press as complaining this violated the constitutional provisions of free speech.

If this all seems strange to you, perhaps it is because it is strange. The ACLU is constantly worried about the "free speech" rights of pornographers, but seemingly is on the other side of the fence

when the question turns on the free speech rights of school children. One cannot escape the conclusion that the ACLU would defend the "right" of school children to distribute smut, but they would deny them the right to sing the praises of God.

And if you ever wonder where the ACLU gets the money to pursue its goals, consider this: a lot of rich people in high places give them a lot of money. Our current Lieutenant Governor Hobby, for example, held a fund raiser for them in his Houston home that raised some \$60,000. He is very proud of his efforts in this regard, defending it repeatedly while out on the campaign trail seeking reelection. That is one of the many areas where he and I are in disagreement. I think there are far worthier organizations for Texans to champion. I would appreciate hearing your thoughts. Just write me at 1213 W. 34th, Austin, Texas 78705.

20 ways to help hold down your electric bill.

A checklist to help you save energy and money at home.

Energy Conservation Practices

Electricity is costing more this summer mainly because the fuel to make it is costing more. The following low- or no-cost home conservation practices can help you save energy and money.

- Do not use air conditioner unless absolutely necessary.
- Keep your thermostat set no lower than 80° in the summer. Use ceiling or oscillating fans to circulate the air.
- Check your air conditioner filters each month to see if they need cleaning or changing. And make sure that the outside unit is free of grass, leaves and trash.
- When leaving home, turn off air conditioning. If away for two days or more, turn off water heater.
- If you have a dishwasher, set water heater to 140°; otherwise, set temperature to 120° or lower.
- Use scrap insulation to plug air leaks in attic, around fireplace dampers and window air conditioners.
- Repair water leaks in pipes and faucets, and seal air duct leaks.
- Use drapes, blinds, shades, awnings or plants to block sunlight.
- Try to minimize traffic through outside doors.
- Economize in the kitchen. Plan meals so several dishes can be cooked in the oven at the same time.
- Save when you do laundry. Wash and dry only full loads of clothes.

Energy Conservation Measures

These home installations and modifications require an investment, but may return their cost to you in the form of savings on utility bills.

- Caulk and weatherstrip around doors and windows to reduce air leaks.
- Add insulation to ceilings, walls and floors.
- Insulate ducts, especially in the attic.
- Insulate hot water pipes in attic.
- Install insulation blankets on water heaters, especially in garage or basement.
- Investigate cost-effectiveness of storm doors and windows.
- Add solar-reflecting materials to doors and windows on east/west exposures.
- Install a clock thermostat to automatically set air conditioner and heating unit to desired temperature. Even when you're away from home, the clock thermostat can control your air conditioner for more economical operation.
- Investigate replacing your central air conditioner, especially if unit is more than five years old, with a new unit that has a Seasonal Energy Efficiency Rating (SEER) of at least 8.5.
