THIRTY-FIFTH YEAR

FARWELL, PARMER COUNTY, TEXAS

THURSDAY, MARCH 14, 1946

NUMBER 18

BELIEVE IT OR NOT-IT RUNS . . . Edward C. Hammond, Newton, Mass., did not let auto shortages stand in his way. With a bit of Yankee ingenuity he concocted his own auto which Hammond calls the "Weep." It has all accessories, including a wicker basket for golf clubs and a series of horns, sirens, bells and light. The builder says that it can go 50 miles on a gallon of gasoline. Hammond is at the wheel of his creation.

Red Cross Drive Lags Over South Plains

The South Plains area, embracing 'Tiny' Is Looking For a total of 21 counties, is lagging in New Boarding House its annual Red Cross drive, it was reported here today by Mrs. Waunita Hutcheson, general field represen- | size, who is boarding with Warlick tative of the American Red Cross, who maintains her headquarters at California, is looking for a new Plainview.

Mrs. Hutcheson said that to date steaks are served every day. had attained their quotas, and added | cook and fixed himself up a mamthat the drive this year is going slow over the nation. "Everybody seems to figure the war's over and we don't need more funds," she ob-

the campaign in Parmer County, Mrs. Hutcheson said that she had no fears that Parmer would fail to meet its quota, adding that it had always carried its assignment in years past.

Realling that Parmer County was one of the first counties in the entire Order Is Placed For nation to reach its big war-time goal last year, she said that the report from here "created quite a sensation

In The Spring, Tra-la

made their appearnce in Farwell this week, when apricot trees in the yards of Johnnie Benger and Lee McElroy put forth their delicate sprays to soft weather.

It might be admitted, however, that the trees are probaly sticking their blossoms out, as a cold spell would not be surprisng at this season, and would quickly nip the hopeful flowers.

Four Are Injured When Cars Collide

Farwell Winner County Championship

coming unsung into the championship here last Saturday night, at the conclusion of three days of hot round-robin play between the five boys' teams in the county.

Apparently underrated, the Steers proved that they had tournament stuff when it came to the clinches, New Arrival-Maybe and bounced out the favorite team in the county-Bovina, who won the conference title to enter the district play-in a mad 23-21 scramble on Saturday afternoon before a capacity house. Actually, Farwell did its best playing in tournaments this year, taking second in two invita-

tion meets. In 1945, the locals undermined the Friona Chiefs, favorites, and then let down to lose to Bovina, winding up as Parzer co-champions with the Chiefs, each squad having one loss during the tournament.

The most bitterly contested game of the tournament, the Farwell-Bovina battle had indicated that Bovina was going to emerge victorious until the final round, when the Steers outscored the Mustangs to come from behind a 17-13 third period score and win the game.

Hawkins, who banged in 11 points for Bovina, but they did effectively muffle Brock and Looney, who often Nally, who died at the family home head the scoring list. Fred Henrys Expecting

Mr. and Mrs. Fred Henry, who have enjoyed married life alone for a number of years, are expecting a new arrival at their home in the near future.

But not in the sense you have undoubtedly assumed.

It's this way, instead: Last Saturday some unknown person drove up to the Henry home in south Farwell and deposited a large trunk on their front porch while the Henrys were away from home. The trunk bears the name of Lt. John S. Egan.

Now the Henrys are trying to locate the owner of the baggage. "I never heard of him before," Fred declares.

Greek Family Expresses Thanks For Gifts

LUBBOCK-"We shall never forget the precious gifts which you sent to a Greek family," writes one European woman expressing thanks to For County Commissioner, Pct. 3: the Home Economics club at Texas Tech College for the boxes which the organization mailed at Christmas time to refugee families.

As part of the national project the Tech chapter sent 50 boxes of food, clothing, books and toys overseas. Letters are arriving daily from the appreciative families who received For County Judge and the Yuletide packages.

"This country where we have been born, Europe, the birthplace of civilzation, the place which spread its light to every corner of the world is nothing else but a continuous river of human blood shed by some ambitious leaders to conquer the world," the letter from the Greek woman continues.

"But fortunately, far away from us lies America, the country which looks with sympathy at the position for County and District Clerk: of Europeans. The United States will not delay and will ring all over the world the hymn of freedom. And ther "was killed by the Germans a that is the best," she writes.

The family has moved from its home village to Athens where the children, one girl and five boys, live with their widowed mother. The fa-

Looking Ahead At Farm Land Prices

COLLEGE STATIIN-Appearancannouncements, subject to the act- es do not suggest that a decline in ion of the Democratic primary elect- the prices of Texas farm land is in the offing. Accordingly, says Tyrus R. Timm, economist in farm management for the Extension Service. families looking for a break before investing wartime savings in land may have to wait beyond 1946 to

Average farm land values on July 1, 1945, he explains, were above 1920 levels in one sixth of the states, and equal to or above 1919 levels in one half of them. The trend in Texas was revealed in a sampling of three representative counties by the Texas Agricultural Experiment Station. showing that farm land prices went steadily upward in the third quarter of 1945. But a significant factor was noted in an increase in cash buying, Timm says. Tenant buying which usually is low at this season, showed an increase over the previous year in two of the sample coun-

A more desirable trend was indicated in this quarter, however, in the fact that more buyers indicated intention to operate the tracts purchased and non-farmer sellers still were on the increase.

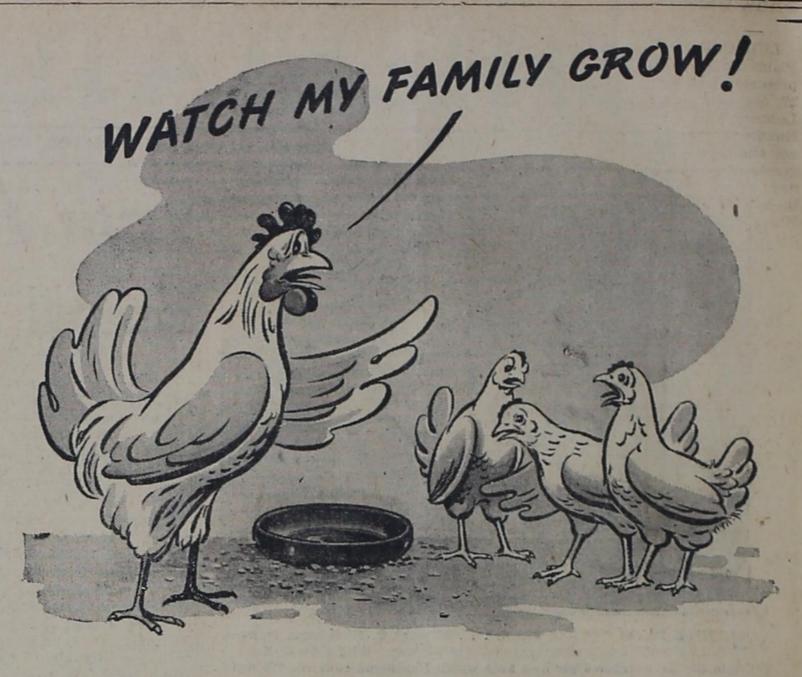

Timm explains that during the war farm and ranch leaders in and out of the government cautioned about the consequences of the existing land boom. One of the hopeful signs for control was efforts to enact a stiff capital gains tax to stop speculative buying. The principle embodied was to tax away practically all of the profits if a farm was resold within two years or some other specific period during the emergency.

Ceiling prices also are under consideration. But because of the many 'variables" in a piece of farm real estate, ceiling prices probably would affect only sales after "the next one". That is to say, the first sale would become the ceiling for the emergency period with allowance for improvements.

A third, or voluntary method, is through education. Throughout the war county agents and other farm will likely bring little result," Timm says. "The solution to the problem will come through a solution to the general inflationary

Plant growth writes the story of oil fertility, or lack of it.

Everyone wants his past forgoten and his present remembered.

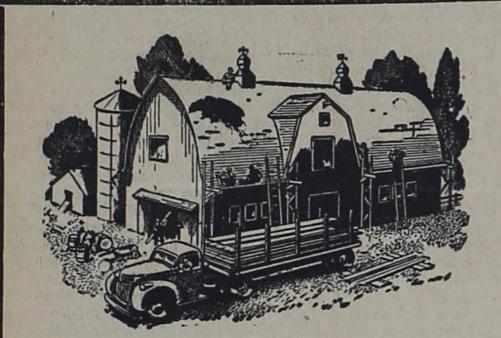

Poultry has become one of the most important sources of income for many farmers in the Panhandle-Plains and Pecos Valley area. Poultry of all kinds get along fine in our climate ... plenty of low-cost feed for them and an abundance of fresh, clean water, too.

Experts tell us that this is the ideal territory to raise all kinds of poultry because it has everything. Yes, everything-including plenty of low-cost, dependable, electric service for incubation, brooding, lighting and other services for poultry raising.

21 YEARS OF GOOD CITIZENSHIP AND PUBLIC SERVICE

Repair Needs

Shortage of materials makes it next to impossible to do any large-scale building, but we can help you with those little repair jobs that need attention now.

CEMENT

We have both Portland and Atlas White, suitable for all types of concrete and stucco work.

PAINTS & VARNISHES

There never was a time when our stock of Sherwin-Williams paints and varnishes was more complete. Pure linseed oil and replacement oil.

ROOFING

Roll roofing in 35 to 60 pound weights, standard widths. Just what you need to cover those sheds and chicken houses.

SCREEN WIRE

At present we have no screen doors but we have plenty of wire ranging in widths from 24 to 48 inches.

VALUE

Value is what you need in the things you buy. Value is what you pay for, regardless of the price you pay.

Value must be present in cheap things and in high-priced things.

True Value, in our opinion, is the result of Best Quality at Lowest Price. We express it as a mathematical equation:

V equals Q plus P

Quality alone is not enough! Price alone is not enough!

GET VALUE!

And Vorenberg's is where you will always find true value in all home furnishings.

S ye would that men should do to you, do ye also to them, like-

That is a scriptural injunction which everyone learns in childhood. Too often it is forgotten in the stress and strain of daily living.

Your neighbors, the farmers, have put the Golden Rule into action through their cooperatives. Human necessity led farmers to work together for the common good. This working together is not new. Farmers have practised cooperation for generations before there were co-ops.

The old barn raising bee is an example of farmer-cooperation. The farmer who needed a barn called on his neighbors. The whole community helped to build the barn. The men brought their hammers and their saws. The women brought along their kettles and their "vittles". Working together as a team, the farmers raised their neigh-

bor's barn. That spirit of cooperation among farmers has come down through the years.

Today, farmers continue to be America's cooperators. Three out of every four farmers in the great Northwest belong to one or more cooperatives.

The problem of the farmer is one of obtaining a stabilized income.

Farmers know that it is dangerous for Americans

to allow any large segment of the economy to suffer. They want everyone to prosper. They know that they can produce all the food and fiber the people need. The war proved that.

Through their cooperative effort farmers have achieved some measure of economic security. They buy equipment and supplies and sell their products—at cost. They furnish themselves with the services they require because they all are part and parcel of their cooperative. They have equality in all decisions.

Farmers' cooperatives are non-profit enterprises. All the earnings are returned to the farmers as savings-on the basis of their patronage.

Thus, in teaming up with others, the individual farmer has met the problem common to all farmers.

> For, true cooperation is founded on a regard for one's own neighbors.

One must do for others what he wishes them to do for him. Thus, true team work brings into action the Golden Rule.

Your neighbor, the farmer, wants you to know how he built his co-ops. He wants you to understand his attitude. He welcomes your friendship and goodwill.

Drop in at the nearest farmers' co-op. Get acquainted with the manager. He's your neighbor.

These cooperatives help build your community

You aren't getting machinery, Mr. Farmer, because...

PICKET LINES

have taken the place of

PRODUCTION LINES!

... so don't blame your Implement Dealer!

Vour implement dealer had planned I and expected to have his display floor filled with new implements and tractors weeks ago. And we had planned to make them-had told our dealers and our farmer customers they would have new equipment and plenty of service parts for the 1946 spring work. And we had hoped to sell these machines at no advance in price.

Real Production Had Started

When the war ended, our organization bent every effort to increase production, with the result that in the last months of 1945 machinery was being built in very substantial quantities. Here are a few figures:

PRODUCTION ITEM NOV. 1945 DEC. 1945 7,432 Combines..........2,345 2,526 Cultivators 3,482 3,308 Hay Loaders 209 *Plows6,185*

*Plows are made in our Canton and Chattanooga Works, which are not on strike. January production was 7,747 plows. Both your dealer and we were encouraged by

this production picture at the turn of the year. But the strike changed all that. As you know, the CIO United Farm Equipment & Metal Workers of America called a strike in ten of our plants, on January 21, 1946.

What Is The Strike About?

Wages are a basic issue. At the time of the strike, Harvester employes were among the highest paid workers in American industry. When the strike began, the average hourly earnings in the ten plants, not including overtime, were \$1.151/2. If present wage proposals are adopted, this figure will become

When the strike began, negotiations were broken off by the Union on the issue of compulsory union membership. The Company has no desire to weaken the Union. It recognizes certain reasonable needs of the Union. But the Company does oppose compulsory unionism. It feels strongly that an employe's membership should be a matter of his own choice.

Material Costs and Price Relief

Wages and materials are the great costs of operating our business-together they consume all but a few cents of every dollar the Company takes in. Wages are obviously going to be high-and nobody knows just how high material costs will go.

In the face of rising costs of materials, the Company does not see how it can pay the wage increases recommended by a Government fact finding board until it has definite and satisfactory assurance from the Government that reasonable price relief will be granted to the Company within a reasonable period of time. This matter is of such importance that it will not be discussed here, but will be covered by future advertisements devoted to both prices and profits.

Speaking for our dealers and ourselves, we can assure you that no customer is more eager than we are to resume production. We are doing and shall continue to do everything in our power to bring about a fair settlement as soon as possible.

according to announcement made Santa Fe passenger trains will be search in the technique of communequipped with radio, wire reproducer and public address systems to give ions. Santa Fe passengers the benefit of the latest developments in train radio, wire reproduction of music, and public address system. Forerunner of this innovation in railway passenger service will be Santa Fe dining car 1450, which will placed into nations through the Allied Military transcontinental service on March Government, Lieutenant Colonel 10, equipped with wire reproducing Hardy, District Recruiting Officer units which will provide programs of popular and semi-classical music during the luncheon and dinner hours. This will be the first railroad car equipped with wire recorders for the reproduction of music. Dining cars, both new and old will be so equipped, the installation being made as fast as equipment and labor are available.

A sufficient number of speakers will be installed in the ceiling of dining, clublounge and chair cars to provide an even distribution of lowlevel sound throughout the car that will not interfere with conversations but at the same time will be sufficiently loud to be heard and enjoyed by those who wish to listen.

All new Santa Fe sleeping, chair and clublounge cars, will be equipped with special radio equipment designed specifically for use on trains; wire reproducing units that will furnish popular and semi-classical music, and public address system for train announcements. Similar installations will be made in present Santa Fe sleeping, chair, and club-lounge cars as soon as materials and labor are available.

In the club-lounge and chair cars a push-button selector unit will be provided so that the club-lounge or chair car attendant may connect either the radio, the popular music channel, or the semi-classical music channel to the speakers.

When the public address system is used, the radio or musical program will be automatically interrupted and the public address system connected to the speakers.

In sleeping cars, each roomette, bedroom, compartment, and darwing room will be equipped with push-button selector, a loud speaker, and volume control, so that the occupants may have their choice of radio or wire-reproduced popular or semi-classical music. The push-butdations will be equipped with a pilot lamp which will light automatisystem is in use so that the occupant may hear train announcements if desired.

Farnsworth Television and Radio Corp., Fort Wayne, Indiana, designed the overall integrated system being used in dining car 1450. It consists of a radio-tuning unit, amplifiers and control unit; a wire reproducing unit and amplifier which will provide a program of popular music; a second wire reproducing unit and amplifier 'which will provide a program of semi-classical music; and a microphone and amplifier for use in station calling and train announcements.

The wire reproducers used in the

UNO ASSEMBLY Analyzes Serious World Problems

(Condensed from New York Times)

THE first Assembly of the United Nations Organization at London is now history and already a brighter pattern for the future settlement of international differences is apparent.

The main reaction to be gathered from delegates and observers at the meeting is one of hope. This hope has arisen despite the fact that no single issue of major importance was settled by the representatives of the victor nations. The hope arises more from a study of trends and procedures than from effects.

The London Assembly will be historic because it apparently dealt a decisive blow to the delicate and sometimes sinister intrigue among striped trousered diplomats that has so often embittered nations against each other in the past. For the first time in history, major discussions involving the common people of the world were thrashed out in public by men who were true representatives of the common people.

Press Is Present

And for the first time the world's press representatives were given ringside seats and were allowed to report to their readers exactly what went on in the council chambers.

The most surprising, and reassuring result arising from the Assembly is the indication that the Russians can "take it" in the rough-and-tumble of the forum as well as they could in the field.

People everywhere held their breath when bluff Labor Foreign Minister for Britain Ernest Bevin last month poundY. Vishinsky, Russian representative, a

Countries have gone to war for less. Instead, Bevin and Vishinsky went out to a party together a couple of hours later and jovially posed for newspaper photographers in mock atti-

tudes of physical belligerence. The Russian-English dispute cleared the air like magic. More differences were brought out into open debate and discussed freely. The whole Assembly took on the frank and democratic atmosphere of a New England town meeting.

This tendency towards frankness and away from sly conniving was perhaps best illustrated in the selection of Trygve Lie of Norway as secretary of the UNO. Lie, a hulking Scandinavian laborite, is a man of few pretensions. He was chosen solely because of his long record for honesty, bluntness and moral courage.

The UNO, suddenly finding itself a much more rugged organization than anyone had hoped, chose a rugged man as its secretary. The difference between Lie and the slick, traditional diplomat, Sir Eric Drummond, first Secretary General of the League of Nations, might well characterize the fundamental difference between UNO and the League.

How Fight Started

and Russia started when the Soviet rep-

lish troops out of Greece as soon as possible. Vishinsky claimed the presence of British troops in Greece was a threat to world peace.

Bevin then, indignantly and flatly, declared that Vishinsky was dead

Crawford in The Newark Evening News

wrong. The worst threat to peace in no threat to the continuance of the The rugged struggle between Britain the world today, he said, was the constant activity of Russian propaganda

truths off their chests in no uncertain fashion before the delegates quieted down. Russia had never been treated like

that before. She is sensitive to criticism, and foreign diplomats have always pussy-footed about any issue that could possibly give her pain.

But matters had gone beyond the point where pussyfooting was practical or desirable. The other two great powers, the United States and Britain, are strictly status quo nations. They do

not want more than they had before the war. All they want is to keep things as they were.

How Russians Feel

The Russians, on the other hand, do seek more than they had. They are making a thundering effort to make for their country the biggest place in the world that they can achieve. The world is of limited size so a certain amount of conflict, dissension and arbitration must be expected.

The underlying disagreement between Russia and England is traditional. It goes back to Czarist days.

Russia has always wanted bases on or near the Dardanelles. It needs them to achieve commercial independence. It would like some more of the Dodecanese Islands to form a protective screen in front of the Dardanelles. And the Russians want no British policeman in Greece to say them

On the other hand, the British do not want the Russians lying athwart their Mediterranean life-line. They want

Mediterranean as a British lake.

Four meetings of the UNO Security Council on this issue resulted in a dead-

lock. At the fifth meeting, Edward R. Stettinius, Jr., the American delegate, offered a compromise. Vishinsky withdrew his charges that the presence of British troops in Greece was "a threat to international peace." Bevin withdrew his threats to force a showdown vote on Britain's innocence or guilt in the Grecian matter. The final Council declaration stated that: "We should take note of the declarations made . . . and consider the matter closed."

Indonesian Dispute

The Russo-British dispute will not be settled for a year or two. But, it shows some promise of settlement when the representatives of both countries can lay their cards on the table and discuss their differences freely. It will not be settled satisfactorily by pussyfooting.

The Indonesian dispute between the same two great powers is not so easy of settlement. Dmitri Manuilski, of the Ukraine, declared that British intervention in Indonesia was "contrary to the purposes and principles of the UNO Charter."

Bevin, while denying the Ukrainian charges, stated that he was "anxious to see this matter cleared up."

The British do not want to remain in Indonesia. They are there because they were ordered there by the joint staffs of the Allied High Command. Their purpose was to disarm Jap troops in the area. They oppose demands by Russia that their troops be withdrawn. They do not want to disrupt the status

The Indonesian problem will be probed by a fact-finding commission appointed by the Security Council. It may even be settled by the recently instituted International Court of Justice.

This court is composed of fifteen international jurists, each from a different country. Once a nation submits a case to this court, either on legal or diplomatic matters, that nation is bound to abide by the decision of the court, no matter what is may be. Green H. Hackworth, a twenty-year man with the legal office of the State Department, is the American representative.

Frankness to Be Tested

The new-found international frankness will be sorely tried when the nations get together at a twenty-one power peace conference in Paris next May. At this conference much of the hopeful map-making that has been going on behind the scenes of the United Nations conference will be discussed and approved or rejected. Drafts of the treaties that will set the face of Europeit is hoped, down to the last permanent wrinkle-must be ready by April 15.

By MILITARY STAFF EDITOR

N the night of February 1, firecrackers went off long and loud in the streets of New York's Chinatown. In the famous Oriental district of San Francisco, a gaudy dragon wound its way through the narrow streets amid the hysterical cheers

themselves, which had led nowhere, the Communist and Duomintang (Chiang Kai-shek) factions had agreed to drag their differences into a Political Consultation Conference and there try to settle them. Among the thirty-eight delegates to that conference every shade of political thought in China was

> represented. Before they sat down to their first discussion they received an almost unexpected bless in g from Generalissimo Chiang Kai-shek. The Generalissimo gave them a brand new "Bill of Rights."

The bill, which really started the peace ball rolling among China's hitherto warring factions, promised universal civil liberties, the release of all political prisoners, freedom of speech, legal standing for all local communities to govern themselves.

Democratic Debate

Spurred on by such an auspicious beginning, the delegates began to debate the future course of China with restraint and dignity. They referred their most tangled problems to sub-committees for recommendation. Before the conference was a week old, democratic processes such as we know here were actually at work in China for the first time in its political history.

How much of this trend towards Western democracy was the result of the behind-the-scenes diplomacy of General-of-the-Armies George C. Marshall, Uncle Sam's trouble-shooter in China, is not known. Marshall isn't saying anything and neither is Chiang. But the announcement of the Chinese Bill of Rights came soon after the General's first closed sessions with Chiang and it is certainly true that Marshall was consulted on every important step during the three-week discussions of the delegates.

It was true that after eighteen years Influence of Madame Chiang

Another "behind-the-scenes" influence on China's turn towards Western democracy is the Generalissimo's pretty, American-educated wife. The forthright Madame Chiang has been an uncertain factor in Chungking circles. At times she has lived in semi-retirement.

It is known that Madame Chiang Kai-shek is a passionate democrat and her most important disagreements with her husband have occurred when the After years of wrangling among Kuointang government seemed to be

FROZEN Food Plants Increase in Southwest

By BOOTH MOONEY 1339 Liberty Bank Bldg., Dallas, Texas.

NE of the great advances toward better living in Southwestern homes has been development of the frozen food locker business. Many rural and small town families in Texas and Oklahoma now have available to them the numerous advantages offered by these locker plants.

In the nation, as a whole, there are at present some 7,000 locker storage plants. They serve approximately two

ready is a \$100,000,000 a year industry. A tremendous increase in production and use of frozen foods is under way at the present time. This growth is expected to be rapidly accelerated as food processors and freezers, freed from wartime requirements, are fully converted to peacetime production.

Double Value to Southwest

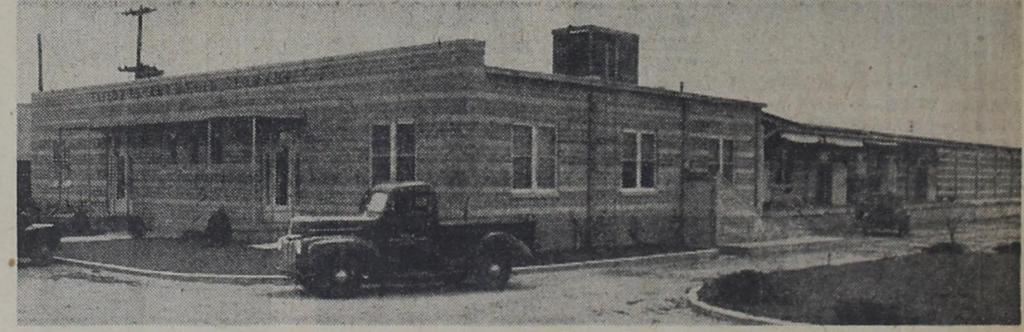

So far as the people of the Southwest are concerned, the industry is of twofold value. For one thing, the spread million families, at least 75 per cent of frozen food distribution outlets which are farm families. slaughter houses. This is simultaneously a service needed by the consumer and a profitable income to the plant. The farmer may deliver his live animal to the plant operator, the animal is slaughtered and processed, then the meat is quick frozen, and placed in the farmer's own locker.

All fruits, meats and other items placed in the locker box must be quickfrozen beforehand. The quick-freezing process calls for temperatures down to 20 degrees Fahrenheit below zero. Processed at these temperatures, the product retains all its original quality. Placed in a locker room held at zero, with the temperature never allowed to

Big expansion of this Electrification Administration. The cost of constructing a plant ranges from 10 The quick-frozen food business al- to 40 thousand dollars, and the aver-

may be consumed as its owner desires.

Various Sources of Income

The operator of a frozen food locker plant may take advantage of several sources of income, including the sellmeats and storage charges. Each of these departments is essential to the successful operation of a locker plant.

One of the most popular and profitable departments is that in which the curing of meat is done. Most plants are better equipped to do this job than the average meat producer and have adequate facilities for giving meat the proper attention during the curing period. The result is a more uniform, finished product.

-PAGE 2-

CURRENT COMMENT

Peacetime Patents

THE surest sign that peace has been declared is the trend of patents which are pouring into the United States Patent Office these days.

For instance, there's the peekaboo summer suit for men with lace insets to allow those cooling breezes to get in where they can do the most good. The drape gape, patented by one Joseph Zelano of New York, has lace going up the outside of the trouser legs, down the sleeves and across the back of the

In case a change in the weather makes the ensemble a little drafty, the wearer can shut up the holes with built-in flaps.

Other new patents include an automatic tire inflater, which pumps up the tires as you drive; an adjustable shoe to fit all members of the family and a device that will produce a London fog any place, any time.

There was also a centrifugal-force gun patented last month. It does away with powder. Best of all, there is a new patented device for raising a baby. It's a kind of fancy auto jack that fits onto a go-cart and it enables you to raise Junior to eye level in a jiffy so that Aunt Maria can chuck his chin without a twinge of her rheumatics.

* * * Nylons Will Be Available

The national average for nylon hose will be approximately seven pairs per woman in 1946, according to a statement by the National Association of Hosiery Manufacturers. Before the war, production was at about fourteen pairs per woman.

Total production in the nation will reach 40 million dozen pairs, but only seventy per cent of this total will be

"At no time during 1946 will women be able to buy all they want," the Association spokesman said. "Women will still have to use their ingenuity, but there is no reason why they should go barefooted. Nylons will be available but not in great quantities."

Balance That Budget

If this country wants to stave off inflation it had better balance the budget as soon as possible, Murray Shields, economist for the Bank of the Manhattan Company, told a group of Dallas businessmen last month. Mr. Shields added that, while deficits were inevitaable during the war, they have left a heritage of one billion dollars of "extra money" floating about the country.

"If this money were spent in addition to present incomes it would send prices up alarmingly," he said. "An unbalanced budget hamstrings any chance to control credit."

Mr. Shields said the budget might earth back to health.

be balanced if military expenditures were cut from 10 billion to three billion through emphasis on scientific experimentation rather than maintaining a large establishment; by cutting out all peacetime public works except those which aid production; eliminating "superfluous, unnecessary and costly" aids to agriculture; liquidating emergency credit agencies such as the RFC and by putting an emphasis on old age assistance rather than old age pensions.

"We should extend old-age assistance to all who actually need it," he said. "We cannot afford any 'cradle-to-thegrave' security plan now. There is not cost the national economy a total of enough money in the country to handle it."

Holding On to War Bonds

United States Treasury figures show that only 18.8 per cent of the war bonds purchased by individuals between May 1, 1941, and December 31, 1945, had been cashed in. The total sum of bonds bought by individuals in the period mentioned was more than 55 billion dollars.

Treasury officials think the low redemption rate indicates a general decision on the part of bond purchasers to hold onto their bonds until maturity, especially since the war has been over for six months. Redemptions in the immediate past have been running at a somewhat higher figure—probably due to the nation-wide strikes—but, at that, it is well below expectations six months ago.

The record is an excellent one and constitutes a good sign for the future. There could be no better investment than the bonds.

* * *

Urges Conservation Now

Not only the future prosperity of agriculture but the well-being of the abling injury in 1945. nations as a whole depends on intelligent conservation of farmlands, according to A. E. Jones, assistant chief of the National Soil Conservation Service.

'One fifth of the original tillable land in the United States has been forever ruined for further practical cultivation because of erosion," he said.

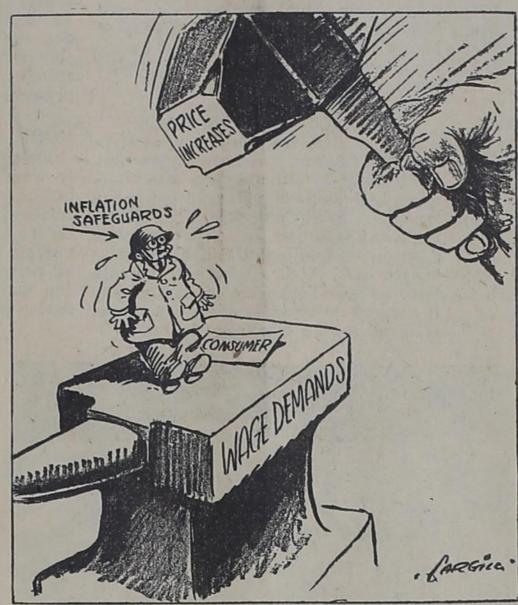

'Soil is not inexhaustible. It is just like any other asset. The heavy war crop has taken a tremendous toll of our land and we must plan intelligently from now on."

Jones claims that ninety per cent of the nation's farm land still needs soil conservation treatment and calls for a 15 to 20 year program to bring the good

Traffic Spree

The United States is at present engaged in the longest and most costly traffic spree in its history, the National Safety Council said last month. Since V-J Day, August 14, until the end of 1945, the traffic death toll shot up 36 per cent over the average of the previous seven and a half months. A total of 28,500 people were killed in traffic accidents during the year, an overall it will go into high gear by April 1. increase of 17 per cent over 1944.

Accidents of all kinds, motor and otherwise, took the lives of 96,000 people during the year, injured 10,300,000 and

Between the Hammer and the Anvil

\$5,200,000,000. One person in every 13 in the United States suffered a dis-

Fighting the Housing Shortage

President Truman took one of the leading national bulls by the horns last month and promised that "something would be done" about the housing shortage.

That "something" turned out to be a promise to build 2,700,000 new houses within the next two years. It included vast increases in the output of building materials, with government subsidies, and for tripling the labor force now working on residential construc-

The President also said that wage increases will be included as a "recruit-

ing inducement" for new construction workers.

The government will also stimulate the new prefabricated house industry.

The plan calls for 1,200,000 homes this year and 1,500,000 in 1947. Highest building peak in history was 1925 when 937,000 homes were built. Only 240,-000 were built in 1945.

If Congress endorses the new plan,

The National Association of Real Estate Boards endorsed the program heartily, but objected to the continuance of price ceilings as "unnecessary."

The Key to Prosperity

The future of American prosperity lies in the hands of the scientific researcher, Dr. A. Ray Olpin, president of the University of Utah, announced last month.

"If the consumer enters into partnership with the statistician, the analyst, the engineer, the scientist and the manufacturer we need have no fear concerning jobs for all," he said.

"Research is the key to an expanding economy," he added, "and American economy must expand if the present capitalistic system is to endure. Research, therefore, is the key to employment." * * *

Is Your Wife Handy Around the House?

Time was when the husband was supposed to take care of household jobs such as repairing leaky faucets and putting in electrical fuses. But a home economics teacher in a Pennsylvania high school thinks women ought for themselves — and her courses have an encouraging

enrollment of high school girls and women fresh from war factory jobs.

gets, care of the sewing machine, re- billion mark. That's extra. placement of fuses. Advance topics involve repairing such appliances as washing machines, vacuum cleaners and refrigerators. The teacher says her pupils will save many a dollar that otherwise would have to be paid to plumbers or repair mechanics. * * *

Save That Jalopy

Approximately ten million people in their war torn jalopies and wondering when they are going to be able to walk into an automobile dealer's and pick out the color, make and style of car

certain about the answer. The general consensus of opinion is that it will take approximately two years for the industry to get back to normal IF future strikes are averted.

When the industry got the "green light" last summer, a quota of 500,000 cars was set for the remainder of 1945. Scarcely 82,000 were built.

Here's the box score on manufactures as of January 1:

Chrysler Corp.—Chrysler, 378; De-Soto, 1,187; Dodge, 2,835; Plymouth,

2,575. Total, 6.875. Ford Motor—Ford, 35,549; Lincoln, 568; Mercury, 2.804. Total, 37,921.

General Motors—Buick, 2.481; Oldsmobile, 3,956; Pontiac, 4,050; Cadillac, 1,205; Chevrolet, 12,776. Total, 24,468. Independents—Hudson, 4,000; Nash,

6,204; Packard, 2,977. Few of this small output actually reached the purchaser. They went to the dealers and remained in the show

* * * Sugar May Be Coming In

The OPA thinks maybe the sugar ration will be increased this spring. It added a mighty "if," however. It all depends on whether the Caribbean sugar crop turns out favorably.

If the Caribbeans raise sufficient cane, then an extra dividend will be added on the May 1 stamp.

"Do not expect an end to sugar rationing, however," the OPA spokesman said. "It cannot possibly take place until late in 1947. The nation's holdover stocks of sugar have been depleted and rationing will not be lifted until those stocks are replenished."

* * * More Rural Doctors Needed

the national model of good health, as opposed to the comparatively sickly city boy. The U.S. Department of Agriculture says that now "it just ain't ploded early in May, and will be timed

air, exercise and farm produce, he loses the first of July, will be timed to exbecause of inadequate medical care. Doctors get paid better in cities, they are closer to modern facilities, and they stay away from the country in droves.

country, with greater space barriers, tific instruments.

the average normally is one to 1,700. During the war that ratio rose to one to every 4,000 people.

The Department of Agriculture claims rural communities should go out and get doctors; offer them, out of tax money, a new house, an office, and an assured income of from \$4,000 to \$5,000 a year. Doctors could be advertised for in medical journals.

"Something has to be done," the Department spokesman said. "American rural health is deteriorating fast and the farmers themselves are the ones who must stop it by doing something constructive."

The Most Expensive Game

War is the most expensive game in the world. Its expense carries on for years after the last shot has been fired. This became apparent last month when President Truman told Congress

that annual spending by the government "can hardly be reduced to less than \$25,000,000,000 a year." Treasury Department figures show,

from the inflationary effect of previous wars on peacetime costs, that a tremendous economic effort must be made by the government to keep expenditures down even to the enormous figure quoted by the President.

After the Civil War and World War I, annual expenditures jumped 500 per cent over the average. Here are the figures:

Average cost of government,

1851-61 62 millions Average cost after Civil War,

1866-75332 millions Average cost of government,

Average cost after World War I, 1918-19..... 3.7 billions

Before the recent war, our annual expenses ran around 6.7 billions. If history were to repeat itself our budget to learn about these gadgets should approach 35 billions during the next year. The only way to keep history from repeating itself is for the powers that be to be veritable watchdogs of the treasury. Remember also First-course classes include tips on that the budget does not include the repair of plumbing and electrical gad- national debt that has passed the 275

Expanding Feeder Air Lines

Jimmy Doolittle, the war hero turned oil company executive, recently urged the nation to develop adequate airport facilities everywhere so as to handle expanding feeder airlines and to accommodate the swarms of new private aircraft.

· Declaring that commercial aviation America today are gazing ruefully at is at the threshold of a "golden era," the wartime chief of the Eighth Air Force said that industry today has orders for 50,000 private aircraft, twice the number flying in 1941.

Doolittle claimed that the develop-The automobile industry is very un- ment of feeder-line facilities would put every small village and hamlet in the United States "on the main line" of the big airline companies.

"The aircraft industry is going to be one of the most important peacetime industries we have," he said. "It's up to the country to support it."

Surpluses Will Disappear

The Army last month promised that the bulk of its estimated seven billion dollars worth of surplus goods all over the world will be sold by the end of this

Goods are being sold in great quantities every day but, as equipment is being returned from overseas, the stock piles will reach their peak in the spring.

Surplus goods are divided into two categories the "cream" and the "dodos." The "cream" is such items as can be used by civilians, such as clothing or food. These pay high returns. The "dodos" are at the other end of the scale. The prize dodo so far is the Bailey Bridge, the mobile, prefabricated device for fording streams in enemy territory. It helped materially to win the European war, but nobody can think of what to do with it now.

* * * Atomic Bomb Tests

The Navy is going to spend several million dollars to find out what the atomic bomb which knocked Japan out of the war will do to modern war vessels of all kinds. Plans are being laid now for the experiments, to be conducted in the Marshall Islands next May. Director of the project is Vice-Adm. W. H. P. Blandy.

In all, 47 United States combat vessels will be bombed. They cost at least \$230,000,000, although they now are The American farm boy used to be obsolete. Other ships to be used as targets cost \$100,000,000; most of these

ships were captured from Japan. The first atomic bombs are to be exto go off above the surface of the water. What the country boy gains in fresh The second bombs, dropped about plode just at the surface. Next bombs will be set to explode beneath the sur-

Grass Root Reveries

(Copyright, 1946, by the Southwest Magazine Co.) LD Man Winter is softening up with some springlike days. However, this doesn't mean that winter is over. March is a gay deceiver, and last year a freeze in March killed much of a promising fruit crop in the Southwest. We talk about freezes

that kill fruit but never do anything

Obviously, this is one year we shall need a fruit crop to help out food shortages. We are advised to eat fruit daily by dieticians who claim it makes up for vitamin deficiency in some other foods. Therefore, eat all the fruit you can and can all the fruit you don't eat.

Among the food shortages there will be white bread, says President Truman, who has issued orders to millmen to produce gray instead of white flour so more wheat can be shipped overseas. Gray flour is plain graham flour and is palatable and nutritious. Our pioneer grandmothers cooked and ate graham bread and lived

about it.

to ripe old ages. The mill machinery in to tie up the business of this nation. In the test radar instruments sent out

Reduction in the nation's whisky and beer supplies were also ordered by the President to save grain used in the making of these two beverages. More good than harm should come from this edict. We can get along very well with less whisky and beer. There will be fewer drunken drivers and fewer tavern brawls and killings.

Here comes the brides-about 100,-000-wives of ex-servicemen who married while overseas. Many foreign na-

but most of them, about 60,000, hail from England and Australia. No mention of Russian brides leads to the conclusion that our soldier boys passed up the Russian girls, although there are many pretty women in the USSR. Better, perhaps, had our boys married several thousand Russian damsels. It would have allayed some of the suspicion that Russia harbors against the U. S. Mrs. Eleanor Roosevelt, delegate to the UNO peace conference in London, said recently that Russians were very hard to get along with and that we must be friendly and work hard to understand them since their philosophy of life is different from ours.

Union labor and industrial manage-

"Here comes the brides."

ment have settled some of the big strikes for wage increases, which is heartening news to a long-suffering public who were and labor unions represent a minority of the people, yet they

Hope it is Aircraft capable of flying 1,000 miles better than some we have here.

TEXAS BRIEF NEWS --- from Over the State

REPORT ON JAVELINAS

The javelina, American cousin of the European wild pig, really likes Texas. Of the 111,785 javelinas known to be living in the United States, 80,075 reside in Texas. Arizona has 31,210 and New Mexico 500.

TEXAS TWINS GROW UP

Mrs. Clara Luton, of Olney, Young county, and Mrs. Emma Watts, of Georgetown, Williamson county, twin sisters, got together for a birthday celebration recently. They were both 85 years of age and claim to be among the oldest twins in Texas. Both have lived in the Lone Star State all their lives.

TALL TALK CONVINCES YANKEE

Homer Poulin, of Claremont, N. H., heard so much bragging by Texans while in the Seabees that he could stand it no longer. He packed his bags and came South to Grand Prairie, Dallas county, where he has invested \$12,-000 in a real estate subdivision. "Those braggarts finally sold me, and I'm glad," he said.

HOUSING SHORTAGE ATTACKED

The men who built airstrips in the Pacific are now attacking the housing shortage in the Dallas area. They have formed their own company, the GI Construction Company, and plan to build 400 Brick homes in the White Rock and East and North Dallas areas. The company is manned by more than 100 veterans and is headed by a former Seabee.

CONSTRUCTION BOOMING IN TEXAS

Construction awards in Texas for last year, as opposed to 5,355 January rose to \$26,125,765, more than in 1944. Copper production doubling the figure for January, 1945. Of this amount \$5,716,742 will be devoted to residential building. Biggest contract, for \$11,000,000, involved construction of the proposed Community Center in Houston.

DRESSED BEEF GOES EAST

The first carload of dressed beef ever to cross a State line from the Midland section of West Texas, traveled East to meatless New York City last month. The meat was finished by the A and M Packing Company of Midland, which has contracted to supply a New York firm with at least one carload a week all year round. Packing company officials stressed that the eastbound meat was over and above local demands.

NEW INDUSTRY AT WELLINGTON

Collingsworth county got itself a brand new industry last month when the first carload of pumicite ever to be mined in the district was taken to the factory. Pumicite, pure volcanic glass, is used in scouring powders and abrasive soaps. Although it lies on the surface of a number of Wellington farms, sometimes in hills thirty feet high, it has never been dug commercially in that area previously. Wellington farmers are getting fifty cents a ton for it.

WILDLIFE PAYS DIVIDENDS

Texas wildlife was big business in 1945, R. E. Callender, game management specialist for the A. and M. College Extension Service, pointed out recently. More than a million and a quarter dollars was derived from Texas game during the year. Dealers paid trappers an estimated \$762,070 for furs last year. Boys' 4-H clubs also caught and sold \$47,073 worth of furs during the year.

VIVA SENOR WASHINGTON!

Gov. Coke R. Stevenson and the Governors of the Mexican States of Tamaulipas, Coahuila and Nuevo Leon met on the International Bridge on February 22 to continue the 49-year-old tradition of a joint Mexican-Texan celebration of Washington's birthday. The Good Neighbor tradition was begun by the Ancient Order of Redmen in 1897. At one time ceremonies included re-enactment of Washington's crossing of the Delaware, with the Rio Grande serving as a substitute stream.

CARPETBAGGING BIRDS REPORTED

The host of jaunty red-breasted robins that have descended on Houston recently have been officially disowned by Texas bird authorities. Instead of being the official harbingers of spring they are merely carpet-bagging, damyankee birds who fled south as soon as the first snows fell up North. The true Texas birds are reported sunning themselves in the Rio Grande Valley at this time.

DIGGING DEEP FOR OIL

well in the world but it is third as re-Mississippi is fourth with a mere seven. spokesman pointed out.

THE JONAH RING

Leo Kuhn, Austin bank cashier, lost his Masonic ring two years ago while on a fishing trip. G. C. Mitchell returned the ring last month. Mitchell caught a five-pound bass below Lake Austin dam and found the ring in the fish's stomach.

A TEXAS PROMISE KEPT

When Sgt. Curtis Guy Johnson, of Menard county, learned his British wife was going to have a child he made her promise that if anything ever happened to him on a combat mission she would bring the baby back home and rear him as a Texan. In December, 1944, Johnson's B-17 failed to return. Last month his widow, with little Joanna Curtis, arrived in Menard county to carry out her husband's wishes.

TEXAS TOWNS TAKE TO AIR

Four Central and East Texas towns inaugurated their first daily airline service into Dallas last month when Texas Airlines began operating out of Love Field. The four towns include Bryan, Brazos county; Palestine, Anderson county; Temple, Bell county, and Corsicana, Navarro county. The line includes a stop at Waco, which is also serviced by the Braniff Line.

TEXAS SILVER UP

Output of silver from Texas mines increased sharply in 1945, but copper production fell off, the Bureau of Mines announced. The State's silver mines yielded 21,330 fine ounces of recoverable metal was 80,000 pounds, as opposed to 230,000 pounds the preceding year.

A WALKING MAN

"General Jim" Knight, of LaGrange, Fayette county, recently completed his twentyfifth year as the town's night watchman. During the 8,875 nights that he has made his rounds, Jim estimates he has walked a total of 142,000 miles, almost six times around the world. He punches the time clock 90 times a night, making a total of 798,749 punches. (He forgot to make a punch one night fifteen years ago, so he's one shy of the 798,750 mark). Funny thing, Knight's favorite relaxation on his night off is-

COTTON CONGRESS JULY 7-8

Although the seventh annual Cotton Congress, to be held July 7 and 8, has not been assigned to any specific city as yet, there is a strong possibility it will be held in Dallas, Col. Burrus C. Jackson, chairman of the Congress committee, announced last month. The cotton industry's troubles will be discussed by experts at the meetings and a special clinic on extended uses of cotton will be conducted by the best available experts.

NEW ELECTRIC POWER LINE

Construction will begin this month on a new 132,000 volt electric power transmission line which will extend from Trinidad, Henderson county, to Sherman, Grayson county, by way of the Dallas-Fort Worth area. The new 135-mile line, operated by the Texas Power & Light Company, will bring additional power for further industrial development in the North and Central Texas area as well as serving as emergency capacity and reserve power for the rapidly expanding Dallas-Fort Worth industrial section.

TEXANS LIVE LONG

Residents of the Lone Star State not only live to ripe old ages but many of them stay married for a long while. In the same week last month Mr. and Mrs. F. M. Brooks, of Bangs, Brown county, and Mr. and Mrs. J. W. Fortune, of Indian Gap, Hamilton county, celebrated their sixty-fifth and sixtieth anniversaries, respectively, while Charles B. Beckner, of Clayton, Panola county, reached his hundredth birthday. Beckner, who enlisted in the Confederate Army when he was sixteen years old, had nine grandsons and great-grandsons serving in World War II. He has never worn glasses in his life.

VANISHING AMERICANS

The school teacher may well be the "vanishing American" of today if trends noticed recently in Texas obtain throughout the nation. Public Texas not only has the deepest oil schools in the Lone Star State are getting along with 25,000 fewer teachers gards the number of deep wells in the today than they were a year ago. The country. The deepest well is the Phil- State Teachers' Association claims the lips Petroleum Co. No. 3 Fannie decrease is due to the failure of teach-Schoeps, which goes three miles er veterans to return to the classroom straight down. There are 40 other upon release from the armed services. wells in the State that go more than Returning servicemen are choosing two miles deep. Louisiana has 94 two- business careers instead of resuming milers or better and California has 65. their former profession, an Association

TEXAS SOIL YIELDS A BILLION

Minerals and mineral products taken from the Texas earth during 1944 totaled \$1,388,060,404 in value, University of Texas geologists announced. Petroleum, natural gas and associated products alone were valued at \$1,203,114,-000. Figures are a year old because of the immense amount of detail necessary in compiling them, authorities

HORSEPLAY IN THE STATION

A large black horse disrupted business in a crowded Dallas bus station last month by calmly walking in the front door and sticking his head through the ticket window. He neighed loudly for attention but, travel conditions being what they are, the ticket agent called police instead.

THE BILL BOUNCED BACK

Back in 1943 Quanah Alsup, of Harlingen, Cameron county, was the first GI to salute Lt. Bill Jennings after Jennings had received his brand new lieuing Army tradition, Jennings presented Alsup with a dollar bill and inscribed it: "Good luck, Al." Alsup lost the bill later in New York City but last month it showed up again in some change he dealer permits. received from a Harlingen laundry.

GI BABIES READY FOR SEA VOYAGE—Refitted for bringing to America the British wives and babies of former servicemen, the giant Cunarder Queen Mary was even equipped with tiny lifebelts like these shown on some of the tots. With their mothers, the youngsters were tak-

ing part in boat drill on the big ship at Southhampton, England, just before it sailed for New York. More than 2,000 war brides were abroad, plus hundreds of babies.

HOUSES REALLY ARE SCARCE

S. O. Ryan, of Fort Worth, received dramatic proof of the housing shortage in that city last month when he offered four pairs of brand new nylons to anyone who would give him a "lead" that would help him find an unfurnished two-room apartment. After a week of advertising he gave up. There were no takers.

THE FLYING ROSES

The rose business in Tyler, Smith county, is blooming again, thanks to the ingenuity of some returned war veterans who have bought surplus government planes and propose to fly Texas buds to Eastern markets. The Tyler roses are world-famous, and have been shipped in carload lots each year to many markets. The flying GI's have opened new vistas and Tyler is once more looking at the world through rosecolored glasses.

CRIME CENTER SHIFTS SOUTHWARD

Although foreigners consider Chicago to be the murder capital of America, both Dallas and Houston had more murders than the Windy City in 1945, according to Col. Homer Garrison, director of the State Department of Public Safety. Garrison cited figures to prove that Texas cities need more law enforcement officers. Fort Worth had only one police employe for every 740 citizens last year. Houston had one for every 870 persons. Dallas had one for every 985. In contrast, New York and Chicago had one for every 500 citizens. Boston maintained a 1 to 350 ratio.

TEXAS FERTILIZER TO HOLLAND

For the first time in history Texas is exporting fertilizer to Holland, Port Houston business men have announced. When the sea water overran the Dutch farmland after the Germans blew up the dikes, the fertility of the soil was seriously impaired. Texas fertilizer is being sent to Holland in tremendous quantities to help repair the damage.

CENTENNIAL DATES ANNOUNCED

The Wharton County Fair, celebrating the hundredth anniversary of the founding of the city and county, of Wharton, will be held from September 25 to 29, it was announced recently. Joe Hall, corresponding secretary for the Fair, claims it will be the biggest shindig Wharton county has ever experienced.

BOOM IN REAL ESTATE DEALERS

Everybody and his brother apparently wants to engage in the real estate business in Texas this year, if recently tenant's bars at Camp Lee, Va. Follow- released State Department statistics indicate a trend. More than 16,000 individuals and firms have already received permits this year, and more are on the way. Total for 1945 was 13,000

REPORT ON PENSION COST

The State of Texas has paid from its own funds approximately 155 million dollars for old-age assistance during the 10 years that the aid system has been in effect, according to a study made by the Texas Research Institute. The first old-age pension check in Texas was written in July, 1936. At that time, the Research Institute reports, authorities estimated that no more than 63,-000 Texans would be eligible for old-age assistance, but the State now has 175,000 persons on the rolls. Texas has more than twice as many pensioners per 1,000 of aged population as country, the statistical study points out. The cost to the State of the program is now more than 23 millions a year.

FORMER SLAVE EXPIRES

Charlotte Hannon, who was born in slavery on a Matagorda county plantation when Texas of Mexico, died recently at Oxedly 119 years old. The old negro woman clearly remem-

bered the day that "the stars fell," the W. Nimitz, both Texans, were guests historic meteoric shower that hit the of honor. Gulf Coast from Texas to Florida in 1837. She is survived by nearly 60 liv- TEN-YEAR PLAN FOR PRESERVING ing descendants, including some greatgreat-grandchildren.

ODES TO THE ODOROUS

The National Safety Council this month began to issue specially written poems to motorists guilty of traffic violations. Typical example was dedicated to "Suicide Sam." It reads: "You speed crazy fiend, you would still end up dead —— if the tread on your tires was as thick as your head."

FRASER ASKS FOR CO-OPERATION

Donald Vincent Fraser, president of the Katy Railroad, asserted last month that capital, management and labor must walk hand in hand if the United States is ever going to prosper as it "What we need is a little should. more putting ourselves in the other fellow's shoes," he said. "We cannot continue to pursue narrow interests and endure mutual distrust. We must all work together."

DEATH TAKES NO HOLIDAY

Frank Kreml, the man who moved Gen. Mark Clark's Fifth Army across Africa and up the Italian boot, claimed last month that traffic deaths in the United States will total almost twice as many as were lost in the bloody Rapido river crossing in Italy. Kreml, now a national safety director, told Dallas newsmen that the U.S. can expect a monthly average of 5,400 traffic deaths for the next ten years. Only 3,000 men were lost on the Rapido.

"HONEST DEED IN NAUGHTY WORLD"

Eleven years ago, J. J. Byrd, of Tyler, Smith county, lost a billfold with \$45 in it while on a hunting trip. Last month the man who found it returned the billfold and the money with a note of explanation. The finder, a man named Hudson, of Electra, Wichita county, picked up the money in Mason county, thirteen months after Byrd had lost it. He misplaced Byrd's cards and couldn't return the money until last month when, in the midst of moving, he found Byrd's name and address. He immediately forwarded \$45 and an apology for taking so long. "He's the most honest man in Texas," Byrd said.

STATE CENTENNAL CELEBRATED

At Austin on February 19, 1946, Texas celebrated a centennial of Statehood with a mammoth parade, pageant and patriotic speeches. Gen. Jonathan M. Wainwright was honored guest of the day. Speakers included, besides Gen. Wainwright, Gov. Coke Stevenson, Gov. Herbert Maw of Utah, Gov. Millard Caldwell of Florida, and representatives of 11 other Governors. Texas legally became a State on December 29, 1845, when the President of the United States signed a resolution for annexation. Officially, however, it remained a republic until February 19, 1846, when the first State government came into existence and the flag of the Republic of Texas was lowered to give way to the Stars and Stripes.

WILDLIFE HOUSING SHORTAGE

Housing conditions in the woods may be as bad as they are in the Southwest cities, Houston authorities surmised last month when a mother fox and brood of nine babies were found living in the heart of the downtown area of the Bayou City. Mama and the babies were discovered entrenched in a deep hole between old cement pilings near the Milam Street Bridge. Evidently animal mothers as well as human mothers with large families are finding it tough the average for the whole to get living quarters anywhere these

PUTTING ON THE "FEED BRAG"

One hundred and fifty Texans in the nation's capital last month consumed more than 5 tons of edibles at the first annual Texas "Brag" dinner. The food, flown in by cargo plane from Texas, included everything from peas and pecans was a province of the Republic to rattlesnake steak. Most diners found the rattler steak "too bony," however, blood, Wharton county, reput- and preferred the thick beefsteaks offered as substitute. Attorney General Tom Clark and Fleet Admiral Chester

TEETH

The Texas State Health Department intends to use the citizens of Marshall, Harrison county, and Jacksonville, Cherokee county, as dental guinea pigs during the next ten years in an effort to see to what extent fluorine prevents dental decay if it is included in the community drinking water. Fluorine will be placed in the Marshall water and withheld from the Jacksonville water, and after ten years the dentists will count the cavities. Fluorine became a highly controversial subject when it was found that citizens of Hereford, Deaf Smith county, attributed their freedom from dental decay to the presence of this chemical in their drinking

COLLECTS 10,000 INDIAN ARROW-HEADS

Mr. and Mrs. J. Henry Ray, of Vernon, Wilbarger county, have followed their hobby of collecting prehistoric Texas lore so thoroughly that they now have a collection of more than 10,000 ancient arrowheads as well as countless other examples of primitive Indian handiwork. Although they disclaim any scientific credit for their work, scores of prominent American archeologists have traveled to Vernon to inspect the Rays' collection. Among the arrowheads is one of pure crystal, delicately fashioned as a diamond pendant, and several of pure obsidian, a beautiful black glass taken from inside the cones of extinct volcanoes.

Should Keep Their Pants On

During the war, the skipper of a new tanker sent in this report to the officials of a shipping company that built his ships: "This vessel has recently experienced a great amount of trouble with the smaller pumps failing to function properly. The pumps were found to be in perfect condition, and no reason could be found for their failure until a pair of ladies' panties was taken from the suction pipe. In order that all may co-operate 100 per cent in the war effort and the total destruction of the Axis powers, it is respectfully requested that the lady workers keep their pants on during working hours for the duration."

Somebody Crazy?

Switchboard girls are instructed never to become angry or irritated with the customer. After a trying time in an attempt to reach a party, the connection was wrong and the party calling the number yelled into the phone: "Am I crazy or are you?

"I'm sorry, sir," came the quiet voice. "We do not have that information."

Texas Bigness

Texas is a big place. I've often tried to put its bigness into words, but never as well as a tall, broad-shouldered Texan who turned to me and said: "Yes, you get up here on one of our Texas hills and you can see straight ahead for two days."

Wrong Dear

The telephone operators at Aberdeen, S. Dak., have a lot of calls for the John Deere Implement Company.

The other day one of the operators took a call for the implement company. When the called point answered, she asked: "Is this John Deere?"

To which the party at the other end of the line replied: "No, this is Arnold, dear."

Taking No Chances

Two inmates of a mental hospital were strolling around the grounds one night. One had a flashlight, which he pointed to the sky and said, "I dare you to climb that beam."

"I will not!" said the other. "You'd turn it out when I got halfway up."

Old Slowpoke

Remi C. De Laey, of Seattle, Washington, asked Superior Court to allow him to change his name to De Loy, the way it is properly pronounced.

"I'm a bus driver," he said when filing his petition. "And I'm doggoned tired of having people say, 'Here comes General Delay again!"

Wasn't Hollow

"There you are, my dear," the bride announced, "my first turkey." She proudly placed the steaming bird on the dinner table.

"It looks wonderful, darling!" her husband responded. "What did you stuff it with?'

"Stuff it?" exclaimed the bride. "Why dear, this one wasn't hollow!"

important job well done.

PEACE in CHINA

Only One Thing Wrong

Into the big city came a Swedish farmer to apply for naturalization papers. Asked by the judge if he was satisfied with the general conditions of the country, the farmer replied that he was. "And how about our form of government," continued the judge. "Does it suit you?"

"It bane all right," answered the farmer, "only aye would like to see more rain."

Made the Dollar Famous

R. H. Ingersoll, maker of the popular dollar watch, was at a social function whose hostess could not remember his name. Flustered, she blurted the introduction: "Oh, the man who made the dollar famous."

The next day Mr. Ingersoll coined the slogan, "The watch that made the dollar famous," and used the slogan ever afterward in his advertisements.

Loved Her Teacher

First-grade children were often tardy. The new teacher had been warned that it must be stopped. "A child who loves his teacher," she said, "will not be late for school."

Next morning at 9:05 dainty little Anne was heard crying through the corridor. When she reached the classroom door she said between sobs: "I'm late, but I love you very much."

The Name Was Familiar

While visiting the zoo, a not-too-intelligent individual saw a baby deer. Its keeper stood nearby.

"What kind of animal is that?" the gentleman inquired.

"You mean you don't know?" the keeper replied. "What does your wife call you every morning"

"Say," exclaimed the visitor, "you don't mean to tell me that's a skunk."

But It Must Have Been Good

A young bride was annoyed by her husband's presence in the kitchen while she was preparing dinner. And when he accidentally knocked her cook book to the floor, she flared up.

"Now look what you've done. You've lost the place and I haven't the least idea what I'm cooking."

Orphans Only

Two little girls were playing. pretended she wanted to rent the other's playhouse.

"Have you any parents?" the play-

house owner asked. "Yes, two," was the reply.

"I'm sorry," the small landlady said, "but I never rent to children with parents. They're so noisy and destructive."

Sooner or Later

Jimmie, age five, was asked by his playmate Jessie, to come in the house though he told his mother he didn't

"Well, what did you go in her house for if you didn't want to?"

"Well," said the wise Jimmie, "You have to begin minding a woman some time, don't you?"

UNO Assembly Analyze Problems

(Continued from Page 2)

than war. There has been no peace treaty proffered or signed since hostilities ceased, ten months ago. There will be no final treaties signed before autumn of this year at the very

The truth of the matter is, there are certain problems in Europe which are almost insoluble. No settlement of the Rhineland controversy will keep Germans and French happy forever; no boundary in northeastern Italy can separate Italians from Yugoslavs with any degree of success; the Russo-British dispute in the Mediterranean is an almost inevitable deadlock.

Everyone in the UNO Assembly at London has been handling the Italian colony question as if it were the hottest potato ever to come out of the oven.

Ethiopia, of course, will go back to Hailie Selassie, but he also wants Eritrea and Italian Somaliland. The Dodecanese Islands, discussed above, are particularly touchy. The Russians absolutely refuse to discuss the problem of giving back the islands to the Greeks, and refuse to let it be discussed. So long as strengthen her position.

In northern Italy, Trieste is a perennial festering point. Solving its difficulties would be like unscrambling an egg. It is a city Yugoslav territory.

future is of the utmost concern to the form a nation out of the shapeless Chinese world in general. For centuries China has been a shackled giant. The most populated and industrious nation in the world, it dividual power and bestowed his blessings is teeming with natural resources that upon democracy. have never been tapped.

world is much like that of the great Southwest in relation to the United of time before they will be released.

What the dynamo and dam will do for China and for the world is still a matter for conjecture. Given industries and mechanical development, China will possibly become a world leader instead of a sprawling, over-populated dependent nation. It will take decades of education, however. The illiterate farmer who pumps irrigation water from the earth with his hands must have sons and grandsons who will build and operate hydro-electric power plants.

Sky Is the Limit

During the desperate period of the Japanese war, the Chinese people literally moved thousands of factories and hundreds of universities on their backs to isolated provinces so they could set up and operate them out of range of the marauding Japanese. Obviously, to an energetic people like that the sky is the limit if they are given the proper help and encouragement.

Recent press dispatches have reported ward their homes with a sense of an minor clashes between warring factions in China but these clashes are sporadic and Now that peace has about come to eventually can be suppressed by the forces China, the future of the world and the of law and order.

Our Boys and Girls

TOT AND TORTOISE-Linda McAdams, 16-month-old daughter of the assistant caretaker at the world's largest tortoise colony at the North Miami, Fla., Zoo, rests against a big fellow weighing almost a quarter of a ton. He seems shocked at Linda's

BIG-HEARTED OLD ANDY JONES

(Adapted from a real-life story by Charles L. Allen, conductor of the column "Your Town and Mine").

Everybody called him "Old Andy Jones," No one seemed to know where he came from, how he got to Our Town, or what he did for a living. He may have been a soldier in his youth, for once a month he went to the postoffice and got a letter that had a check in it from the government. Of course, we little fellows didn't know about that. All we knew was that as long as we could remember old Andy Jones had been hanging around town, apparently doing nothing.

Our mothers occasionally mentioned old Andy, but they did not speak favorably of him. It was plain to see that they thought the town learn the truth. Old Andy was he was a bad influence on all the kids in dead. He had given his life to save his town. He never worked, so he must be lazy and no good.

What our mothers never could understand was that old Andy knew more about boys than most anybody else in Our Town. He knew what boys wanted to know.

Why, that old fellow could tell you the name of every bird that nested in the

"Old Andy knew more about boys than most anybody in Our Town."

marshes down along the river or in the brushy thickets or upon the open prairie. He could show you how to find water in the woods when you were miles away from a well. He knew how to dig roots you could eat from cat-tails and rushes. If you caught a rabbit, old Andy could make it into the finest stew you ever ate, and with a few vegetables pulled from mother's garden he could get together a meal fit for a king.

Old Andy knew just everything. least we boys thought so. He knew everything that boys think is important.

One of old Andy's tricks was making whistles. No doubt you know the kind, made from a six-inch piece of soft willow in the spring when the sap has made the wood pliable and the bark skins off just like you want it to. Well, Andy could make willow whistles so good that they would last a boy with normal enthusiam for almost a day-and that was really a good willow whistle.

Old Andy was an important man in the lives of all the boys in Our Town.

When I grew up and left the old Home Town I forgot about old Andy, although I still heard about him from time to time. He had completely dropped out of my memory until one day I got a letter from home that made me recall the hundreds of happy moments I had spent with him. This letter told how the old fellow had been walking through the woods close to town one day

SIR!

MYRTLE

YOUR BED TIME!

with half a dozen boys at his heels—as usual. Somehow or other, one of the boys slipped down the muddy bank of the creek and into the dirty current of water. This wasn't the first time that one of the boys who followed old Andy around had met with bad luck. Andy didn't hesitate. He plunged right in after the youngster.

He got the boy out all right. But the heart of an old man sometimes will not stand the strain of sudden exertion and excitement. When the boy was safely out of the creek, old Andy told the little fellows he would have to rest a moment. He lay down on the earth. And not until the boys became worried because their old friend was sleeping so soundly did the people of young friend.

Thinking back of the time when I was a boy, I could understand it perfectly. Old Andy had a big heart—big enough to have room to love all the kids in town. A heart as big as that is bound to wear out some day. That's what had finally happened to old Andy.

HOW ESKIMOS COUNT

Eskimos have a curious way of counting by means of their fingers and toes. The start is made by counting up to five on the fingers of the left hand. Over five and up to ten they use the second hand; thus six is the first finger of the right hand. Above ten the toes are employed. For instance, thirteen would be three toes on the left foot, and eighteen three toes on the right foot. When the Eskimo has counted all the fingers and toes up to twenty, he says this makes the whole man.

These simple folk do not often go far beyond twenty, but if they do they start counting the fingers again. Twenty-two would be the second finger of the left hand counted for the second time. They would call this "two on the second man." Forty would be the whole of the second man.

It is said that an Eskimo cannot count beyond one hundred. Perhaps this is just as well, considering the method he adopts.

TELEPHONING DOG

It is not at all unusual to come across a dog that brings in the paper, brings his master's slippers or pipe, and so on, but "Spider," a collie owned by Mrs. Briney Thompson, of Fort Pierre, South Dakota, does all these things and many more. For one thing, Spider, who is nine years of age, brings in the wood every evening and places it neatly in the wood-box.

Spider even can-and does-use the telephone. Mrs. Thompson had no idea her collie had learned how to use the phone until one day when she was out and had left Spider locked in; while she was gone the carpet caught fire from an open fireplace. The Thompson phone light flashed on in the switchboard at the telephone office and the operator could hear excited barks. She sent a man and he broke into the house and put out the fire. Spider had pulled the telephone receiver off the hook and barked for

ANTS HAVE MANY GUESTS

Ants are hosts to a great horde of odd guests. Every ant nest entertains such visitors as beetles, spiders, crickets, termites, and roaches. The ants bring food to their guests and even, in some cases, refuse to allow them to leave if they wish. If the horned beetles, for example, try to escape from the home the ants rush forth and drag them back. The ants like so well to play host that they are determined not to lose any of their guests. They want them to stay

Frozen Food Plants

(Continued from Page 2)

To date the principal products processed in the Southwest have been meats, including poultry, but considerable emphasis now is being given to processing fruits and vegetables. Some experimental work being done is expected to be of far-reaching importance.

Products Processed

In the Rio Grande Valley of from two producing wells, Title insurable. Ivar Axelson, 324 Menores, Coral Gables, Texas, for example, one concern | Florida. is successfully freezing fresh cocoanut and broccoli. The cocoanut is frozen in 10-ounce cessing frozen broccoli and is experimenting with cream of broccoli soup in frozen form.

Frozen shrimp from the Gulf FOR SALE-262-acre improved farm and Coast are being processed during certain seasons.

Certain varieties of Southwestern vegetables are being tested under field conditions—a co-operative arrangement between an experiment station and a seed company. The object is to determine if those varieties which have outstanding qualities as a frozen product can be grown successfully in certain Southwestern areas.

The processing of fruits and Large and small vegetables may be done either by the customer or by the plant operator. Most plants have the proper containers for the different types of food. All items placed in a locker box must be carefully sealed or wrapped in the waxed locker paper to keep taxes. Same owner 30 years. Good inout air, the entrance of which would cause dehydration.

Many people were eating frozen foods before the war. During the war years rationing and heavy military requirements limited the amounts of such food | Dept. 3542. available for civilian use. But REAR TRACTOR TIRES. Practically all now the civilian population is sizes. Let us make the change over from steel, as we have the rims, 1618 S. Laredo St., GURINSKI IMPLEMENT CO., San of improved developments and Antonio 7, Texas. Dept. 3464. techniques brought into existence by war necessities.

The continued expansion of the frozen food industry means of Shreveport 18, La. that Southwesterners will eat CLARK reconditioned power lift; ware better at home and find a more open market away from home for their food products. Texas and Oklahoma may well expect to occupy a prominent place in the growth of this industry.

If ye abide in me, and my words abide in you, ye shall ask what ye will, and it shall be done unto you. John 15:7.

DURN YOUR HIDE!

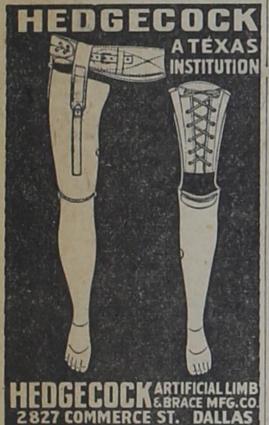

• Since 1935 we have been publishing a magazine for you-and you've never seen a copy of it! We've filled it with the kind of things you like in an outdoor magazine—the rustle of wings at dawn over the marshes, the splash of a big bass as he hits your lure in the lily pads, the mighty roar of an infuriated grizzly as he rushes a hasty hunter.

 WESTERN SPORTSMAN is the outdoor magazine of the New West. It is like a breath of fresh air from the cool mountain craigs of the Rockies. It is published monthly and is only \$1.50 for a subscription of twelve issues. Why don't you investigate the magazine we're publishing for you? Just shake a buck and a half at us and we'll do the rest: Write

HOUSEHOLD HELPS

By MARGARET MOORE

GIANT "STRAWBERRY"

By MRS. ANNE CABOT

Such a tremendously popular crocheted potholder that it is "repeated by request!" Crochet the 7½-inch beauty of red cotton thread and then "seed" it with green thread. The leaves are of green, also, and are crocheted separately and then sewn on. It makes the perfect gift for a kitchen show-

To obtain complete crocheting instruc-tions for the Giant Strawberry Potholder (Pattern No. 5333) send 15 cents in COIN plus 1 cent postage, YOUR NAME, ADDRESS and the PATTERN NUMBER to Anne Cabot, Southwest Magazine, 1150 Ave. Americas, New York 19, N. Y.

The Anne Cabot ALBUM contains dozens of sweaters, hug-me-tights, bed jackets, gloves and socks, bonnets—as well as embroidery, quilting and home decoration ideas. Send for your copy. Fifteen cents.

Please do not send order to Mrs. Margaret Moore, Fort Worth, Texas. Send order to Anne Cabot, Southwest Magazine, 1150 Ave. Americas, New York 19, N. Y.

SPRING FASHIONS TO BE FLOWERY

Southwestern women, who know how to appreciate the beauty of flowers, will be pleased to know that this is to be the floweriest spring the fashion world has seen in a long, long time. Milliners and clothes designers are sending along loads of stunning flower-trimmed things. Even the suits are demure and feminine this spring.

The new prints, too, are the gayest in history and some of these are real silk. There are beautiful weaves also of silk and rayon, and the celanese fabrics are exactly like silk while being largely synthetic pro-

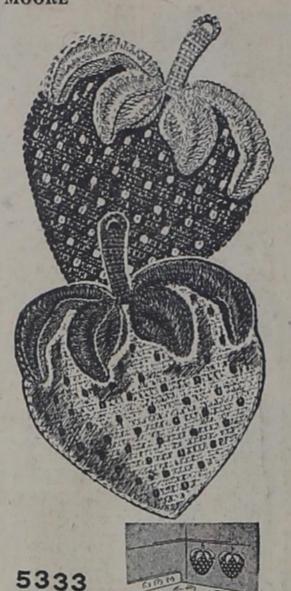

Colors are beautifully serene for sults this year-wonderful desert tones, all the shades of grey and beige-fawn, mist-blue, honey, pale cinnamon, pewter, platina, opaline, nickel, luggage, pecan, wheat, "spat" or haberdasher's gray, chamois, tan with the sun in it, or ivory dust and cream, and the calm, lovely driftwood hue. Grey has made a trio for tradition along with the solid standbys of black and navy for spring. Bright accents go into blouses and linings.

Many of the dressier frocks coming along for late winter show gorgeous flower corsages and these may be of velvet, silk, ribbon or lace. Often, too, they are made of glittering sequins embroidered on to the

Other things noted for spring are the lengthened skirt line. Countless women will rejoice that the hemlines on daytime skirts are at least an inch longer.

Waistlines are surely dropping and shoulder lines also, and this lengthening of the silhouet will make it so the new skirt length will not look gawky. The longer Norfolk jacket is scheduled for a big return and this new 1946 version, we are told, is very softly tailored and more feminine than formerly.

There are plenty of peplums also for

spring and of course we have been enjoy-ing them in all kinds of clever versions this winter, especially on the dressier frocks where they often show up made of lace or satin or net and are ingeniously placed. For spring these will be longer, fuller and pleated, gathered or flared. Some are full at the back in the bustle effect that seems to hold good season in and season out.

Lots of interesting-looking spring gloves are being brought out in advance also, and some of these have elaborate frilled or

A wide range of design, line, color and trim appears in the early spring millinery lineup. Not all is glitter and glamour, though, for there are some grand little suit hats. Interlaced gray felt strips are used for a hat with a tall, sloping crown and kettle-edge brim that is banded and tied with black patent leather and has two high, black quills over the open crown.

A tonic to the winter wardrobe of dark clothes is seen in beautiful little dinner hats, small sailors of gleaming satin in pale blue or pink, usually adorned with big, self roses and misted with veils to tone.

Even if you are not buying a spring hat, it is a pleasure to look at them and to find out well in advance just what one will wear when spring really comes. What is more, we are wagering that nine out of ten women seeing them will buy one, for they are so lovely in color and so perky and youthful.

LOOKING YOUNG

follows about looking young:

If you are going at the project of con-serving youthful appearance, my reader friend, you must keep in mind the fact that the complexion often reflects the condition of the body and the mind. You can't look glamorous if you're all played out or if you are harboring depressing thoughts.

We trust that our beauty clientele doesn't object to our harping on physical and mental health as the foundation of good looks. It is a fact you can't get away from, and you shouldn't try.

Observe the expert worrier. She tells the world she has troubles and she doesn't have to tell it in words. It is written on her face, which is tense and drawn. Her eyes are without luster. Her step is lag-

ging, lip ends drawn down. Why doesn't she stop to remember that in the past she has worried herself sick about things that never happen? Let her

Helen Follett, beauty expert, writes as might as well be hopeful. Life has its ups and and downs. Many times the downs that we anticipate are side-tracked by divine

One rule we should all try to keep for the sake of balance and good looks—go to bed with the mind at peace. Don't let unpleasant thoughts mill around inside your head, memories of disappointments or the irritations of the day. No life is free of ruined illusions. Don't let them get you

Remember that refreshing sleep is the greatest of all beautifiers. Devote a little time to making yourself attractive to the eye. Before you say your prayers at night attend to beauty duties. Cream your complexion. Brush your hair. Anoint your fingernal the cuticle that surrounds them by using the orangewood stick.

If you aren't too weary, give yourself ten minutes of bending and torso twisting exercises. All this will refresh you, ease up nervous tension, give you a chance to medi-

walk with the whiterobed Lady Hope. One tate on your blessings.

GIBLET COOKERY

ciated yet most valuable parts of chicken or turkey, say food scientists of the U.S. Department of Agriculture. Too many home cooks know only of their use in giblet gravy and do not realize their possibilities for delicious main dishes. Chicken or turkey livers especially offer rich value in iron and

In preparing giblets an important point to remember is that gizzards and hearts need long slow cooking by simmering to make them tender, but livers are tender to begin with, so need only brief cooking. In general, gizzards and hearts of older birds take about twice as long to cook as those of young birds. Giblets cook more quickly if they are cut in pieces first. An excellent dish to serve 5 or 6 people

is braised giblets and mushrooms. It calls for only 1 pound of giblets and half pound of fresh mushrooms or a small tin of canned

To prepare, separate gizzards and hearts

The giblets are some of the least appre- from livers. Cut all the meat in small pieces, sprinkle with salt, pepper and flour, and brown in fat. The cut-up gizzards and hearts should then be covered with water and simmered in a covered pan until tender-11/2 to 3 hours. The cut-up liver needs no further cooking. Remove the giblets from the pan. Cut

up fresh mushrooms and cook 5 to 10 minutes in the pan drippings left by the giblets. Remove the mushrooms and add to the cooked giblets. If canned mushrooms are used, they need no cooking. Add them to the giblets and save the liquid in the can for the gravy.

Add enough water, milk or mushroom juice to the pan to make 3 cups of liquid. Skim off fat from the top. Make the gravy by stirring into the liquid 4 to 6 tablespoons each of flour and fat, blended together. Cook and stir until the liquid thickens. Then add the cooked giblets and mushrooms. Heat thoroughly. Serve the mixture hot on toast or with hot fluffy boiled rice or biscuits.

New Uses for Grapefruit

Grapefruit, queen of the citrus fruits, can be served in many interesting ways. For an excellent dessert try topping grapefruit with a sauce made from thin prepared vanilla pudding, a good sugar saver. For a different first course, serve grapefruit

hot.
To bake or broil, halve fruit, loosen sections, spread surface with a bit of honey or corn syrup and slip halves beneath the broiler for ten minutes. For an easier method, bake the grapefruit whole. Slip the fruit into the oven along with the spuds and bake for about an hour. To serve, cut grapefruit in halves, loosen sections and spread with the least little bit of honey.

Serving boiled fish and afraid the family may find it a flat, dull dish? Well, perk it up by topping the boiled fish with fresh grapefruit sections for the last ten minutes of boiling. It gives a fine, tart flavor.

Swirl a pinwheel of fresh grapefruit sections on a bed of salad leaves for a salad that is satisfying to the eye and in nutrition for its natural vitamin C.

2 lengthwise slices white bread

2 lengthwise slices whole wheat bread 1/4 cup butter or fortified margarine, soft-

1 1/4 cups ground cooked chicken ½ cup real mayonnaise 2 teaspoons chopped parsley Dash of pepper

Dash of curry powder. Mix together chicken, mayonnaise, parsley, pepper, curry powder and salt. Spread each lengthwise slice of bread with butter or margarine. For chicken rolls, spread two slices of bread with two-thirds of chicken mixture (one whole wheat slice and

Cut each lengthwise slice into four sections. Roll each section up tightly as for jelly roll. Wrap each roll in waxed paper and chill in refrigerator, with roll resting on last turn of bread. To serve cut each roll in half. Garnish rolls by tucking a sprig of parsley or watercress into one end

Old-Fashioned Raised Doughnuts (About 3 dozen)

11/4 cups milk, scalded 1/4 cup fat 1 cake yeast ½ teaspoon salt (Continued top next column)

About 5 cups sifted flour 11/2 teaspoons cinnamon

1/4 teaspoon nutmeg 1/2 teaspoon mace 34 cup sugar

Add shortening and salt to scalded milk and cool to lukewarm. Add crumbled yeast and 2½ cups flour. Beat until smooth. Cover and let rise un-

til bubbly.

Mix spices with sugar and add to sponge with beaten eggs. Mix well. Add remaining flour to make a dough that can be kneaded. Knead until smooth. Cover and let rise until doubled in bulk.

Roll out 1/2 inch thick. Cut with doughnut cutter. Let rise on board until doubled in bulk. Fry in deep fat at 375 degrees for 3 minutes or until lightly browned on each side. Turn just once during cooking.

Fricassee of Smoked Beef Melt a large lump of butter in frying pan. Cook 1/4 pound chopped mushrooms in the butter for five minutes, then add 1/2 pound shredded dried beef. Cook for five minutes longer, then add 2 tablespoons flour. Blend in well and add 2 cups milk. Stir until thick and smooth and add 2 chopped hard-boiled eggs. Cook just a minute and then serve over slices of buttered

Honey Bran Waffles

2 eggs, separated 1½ cups milk 1 tablespoon honey

3/4 cup bran 1½ cups sifted flour 4 teaspoons baking powder

1 teaspoon salt
1/4 cup melted shortening.
Beat egg yolks well; add milk
and honey and mix thoroughly. Add bran and let soak until most of moisture is taken up. Sift flour with baking powder and salt; add to first mixture and stir only until flour disappears. Add shortening. Fold in stiffly beaten egg whites. Bake in hot waffle iron until no steam is

Yield: 7 waffles (61/2 inches in diameter).

KNOW YOUR MEATS Plain meat loaf is vastly improved by "red skin" potatoes. Make them like this: Place white potatoes around meat loaf and baste frequently with chili sauce

ham that refuse to slice, pop them into sandwich fixings like an elective science and fortyto one cup of it add a little vine- legitimate science for college gar, one tablespoon peanut but-ter, and some chopped celery. Spread between slices of buttered bread.

Spareribs which are available fresh or smoked offer a sweetly rich bit of eating. Especially with baked apples or sauerkraut.

Some day for a change, sim-mer cross-cut beef shanks with vegetables.

When serving a ham loaf for company beat up this fluffy sauce: one-half cup drained applesauce combined with half cup prepared horseradish. Fold into one-half cup cream, whipped.

For an ever-so-good salad mix cubes of cooked veal with orange sections, chopped celery and a handful of nuts. Serve on lettuce with your favorite dress-

It comes under the heading of "that haunting flavor," but try rubbing veal steaks with a cut clove of garlic before browning.

A tart salad for serving with roast pork or veal is made by mixing drained sauerkraut with diced sweet pickled beets and mayonnaise.

For in him we live, and move, and have our being. Acts 17:28.

DON'T BE A SLAVE TO CONSTIPATION

Do As Millions Do-Eat KELLOGG'S ALL-BRAN For Lasting Relief

Constipated? Using harsh laxa-tive drugs? Millions have solved the problem of constipation due to lack of bulk in the diet. They eat a daily dish of KELLOGG'S ALL-BRAN, and drink plenty of water for regular elimination! If you have this trouble and will follow this circular properties. low this simple precaution, you may never have to take a laxative

for the rest of your life!

ALL-BRAN'S not a purgative.

Provides gentle bulk to aid normal,
natural elimination. It's a great, naturally regulating food,

Even Richer in Nutrition Than Whole Wheat Because it's made from the vital outer layers of wheat, in which whole-wheat protective food elements are concentrated. One ounce of KELLOGG'S ALL-BRAN provides more than 1/3 your daily iron need—to help make good, red blood. Calcium and phosphorus—to help build bones and teeth. Whole-grain vitamins — to help guard against deficiencies. Protein —to help build body tissue essential for growth.

Get ALL-BRAN at your gro-cer's. Made by Kellogg's of Battle Creek and Omaha.
