"OFFICIAL PUBLICATION OF FARMER COUNTY"

10 PAGES

FIFTY-FOURTH YEAR

10 CENTS

Somebody said the other day they haven't had a report on how the family is coming along, as if to suggest that anybody who reports on four boys should always have some news to give out.

Truthfully, things at State Line Boys Ranch are going about like you'd expect: hectic and noisy. Mrs. Graham, the house mother, reported the other day our milk consumption has finally passed the 200-quarts-a-month rate, which I guess ought to have us voting for the next candidate who promises a cow, sow and hen for every family.

I notice that the poor milk man now brings the bottles in a stout wood and metal box that holds nine quarts and can be stacked yea high when needed. The next thing you know he'll be backing up to the door to unload.

Ronny is first chair trombonist in the grade school band and Hal completed a very successful season of pee-wee football if you listen to his version of how he is doing.

John is plenty big enough to be in the first grade, but as he's only five we put him in kindergarten this year. The poor little guy is all mixed up about some things. He finally learned to count to 10 — you know, 1-2-3-4-5-6-7-8-9 and 10.

Only the other night we were in Amarillo and all of us went for a ride on a big make-believe rocket where they simulated an actual orbital flight.

You can imagine John's consternation when the loud-speakers blared "10-9-8-7-6-5-4-3-2 FIRE!" I heard him playing in his room yesterday and he was trying to figure out how to count backwards so he could blast off his play rocket. Andy, 3 is the "baby" of the family in theory if not in fact. It's not everybody who has a baby they can't pick up.

Approve Installation Of Street Lights

At recent meetings of the Texico Town Council commissioner approved the installation of 15 additional street lights to be placed at designated places in the town, by Otis Huggins, SWBS company employee with the installation to begin immediately.

Also meeting with approval of council members was the paint-up-fix-up campaign, to be sponsored by the Twin Cities Council. The town commission agreed to cooperate in the campaign by stenciling the names of streets on each corner of curbs in Texico.

In other business A. E. Hapke was granted permission to remove 50 feet of curbing in front of his property on Garwood Street and construct a parking area at same; Bob Lebow was granted a permit to move in a residence to his property on State Street, and the town clerk was authorized to obtain prices on doing some repair work at the town hall.

The report of Police Magistrate Sam Lewis in the amount of \$250, for the previous month was approved and bills for the month were approved and ordered paid.

All-Stars and the first place winners in regular season play in the Pee Wee football league played a championship game on Saturday, with the league winners (who had not been defeated this season) defeating the All-Stars 6-0. Playing on the championship team were David Dannheim, Ty Phillips and Monty Jones (red jerseys). Members of the All-Star group were Ronald Steele, Todd Hammond, Dexter Garner and John Hammond.

Wolves Take Coyotes In Tuesday Game

The Texico Wolverines took a hard fought game from the Causey Coyotes 53-43 on Tuesday. Duncan Causey was high point man for the game hitting the bucket for 20 points. High for Texico was Tom Rickstrew with 17. Mike Spearman also got into the double figures hitting for 15.

In the first stanza Causey outscored the Texico aggregation 18-11; however they were unable to hold the lead as they were hard pressed by the Texico group for the next two quarters. Causey scoring in the second stanza was six points and in the third quarter they were only able to find the bucket for three points.

In the same two stanzas Texico racked up 28 points and were able to add an additional 14

in the last stanza to end the game with a 10 point margin. Coach Green said "Our boys made lots of mistakes but were able to hold on without the services of Lambert (tall post) long enough to defeat the opposition." He also commented that the boys played fast ball as did their opponents.

In the evenings opening game Texico "B" defeated Causey "B" by a nice margin 39-17. Leon Smith was high for the game with 11 points.

Honor guests at the Friday game (with Grady here) will be members of the Texico school board and their wives.

The Wolves will host the Ft. Sumner Foxes team on Saturday night. Game time is 7:30 p.m.

Project Yule Card Draws To A Close

All patrons of the Farwell school and other interested parties are reminded of the Friday (today) deadline for getting in their contributions to "Project Yule Card." Contributions should be in no later than 5 p.m. They may be taken to Janie Bowery, chairman of the PTA project at the Farwell city hall or any of the various workers in the drive. Workers are Mesdames Jack Williams, Bert Williams, Pete Rundell, Joel White, Glenn Phillips, Billy Watts and Johannie St. Clair.

As of Wednesday noon some \$555.89 had been turned in and deposited by Mrs. Bowery.

Each person is asked to contribute the money he would ordinarily spend on mailing Yule cards to local persons to the PTA, with the money derived from the project to go to buy library books for the three school libraries.

A giant Christmas card will appear in the Christmas issue of the Tribune bearing the names of all contributors to the project and wishing their friends a "Merry Christmas."

Charged With Felony Theft

Four airmen stationed at Cannon Air Force base were brought to Farwell Monday and charged with felony theft following a series of thefts of tools from pickups in Farmer county. The quartet had bonds of \$1,000 each set. They have been unable to make bond and are still in the county jail.

Charged with the offenses are Dawson James Lyon, Steven R. Nordberg, Edward Alexander Podlaszecki and John Clyde Anderson.

Band Mothers Hear Reports

Farwell band mothers heard a report on sale of fruit cakes Wednesday when the group met in regular session. Mrs. Woodrow Lovelace reports that band calendars are slated for arrival for distribution Dec. 20, according to word from the company.

Band mothers decided to pay lodging and registration fee for two students who will be entered in all-regional band concert this weekend. The group also voted to rent two trombones for two months to aid in try-outs and recruitment for the band.

A juvenile, who was arrested recently and charged with breaking and entering several residences in Farwell, was turned over to Curry County juvenile officers. The lad has been charged with several offenses in Texico also.

Julian Ray Gandy, Hereford was tried in county court Monday on a DWI charge. He was fined \$100 plus court cost.

Tommy Mayfield, director, announced that the Christmas concert to be presented by the band will be Dec. 18 at the school auditorium at 7:30 in the evening. The high school and sixth grade bands will perform.

Rotarians

Texico-Farwell Rotarians are reminded that Tuesday evening they will be observing "Ladies Night" with a dinner at Cathy's Restaurant. Wives of all Rotarians will be special guests. No Rotary meeting will be held on Wednesday.

Bulletin

Funeral arrangements are pending for Mrs. E. E. Booth, pioneer resident of Farwell who passed away at a Lubbock hospital Wednesday night at 9 p.m.

Mrs. Booth had broken her left hip and arm in a fall on Thanksgiving Day and later developed pneumonia.

Survivors are one son, Earl Booth, Clovis, two daughters, Mrs. Blanche Leinen, Sunny Meade, Calif., and Mrs. Purnia Dunlap, Richardson, Tex. Also nine grandchildren and several great-grandchildren.

Ralph Cox Services Today

Funeral services are scheduled today (Friday) 10 a.m. at the Lazbuddie First Baptist church for Ralph H. Cox 67, who passed away at the family home in the Lazbuddie community Tuesday afternoon at approximately 3:30 p.m.

The Rev. Calvin Beech, pastor of the Lazbuddie Baptist church will officiate assisted by Bill Curry of Quitaque. Burial will be in Bailey County Memorial Park Cemetery.

Mr. Cox, a farmer and rancher had been in ill health for sometime; however, his death comes as a shock to friends and relatives. He had lived in the Texico-Farwell area for a number of years before moving to the Lazbuddie ranch.

Survivors include his wife, Marie, two sons, R.H. (Sam) Cox Jr., Portales, Leroy Cox a student at WTSC, Canyon, one daughter, Mrs. Patav Shankle, Carlsbad, his mother, Mrs. James A. Cox, Farwell, five brothers, James, Logan, Clint, Clayton, Guy, Farwell; Ted, Amarillo; Victor, Muleshoe; one sister, Mrs. Mary Frost, Houston, two grandchildren and a host of friends and relatives.

Texico Students Participate In All State Tryouts

Four students from the Texico school were in Roswell recently to participate in the All-State band and chorus tryouts. They were accompanied to Roswell by music director Gerald Tiffin.

Participating in the band division were Terry Lovett, Joe Patterson and Ronnie Richardson. Lone participant in the choral division was Kay Bush.

Participants were required to play a solo, play the scales and do sight reading under direction of judges, who chose the selections. Terry Lovett played a bass solo "Behemoth"; Joe's selection was a trombone solo, "Concertino", and Ronnie played a trumpet solo, "The Lonely Bull."

Kay Bush sang as her solo "Were You There" and also sang soprano in a quartet group. "Our students will not know the outcome of these tryouts for several weeks," commented the music director, adding, they did their best and the competition was stiff.

Band Students In All Regional

Two Farwell band students will be in concert as members of the all-regional band Saturday night at the Caprock high school auditorium in Amarillo, says Tommy Mayfield, director. Ronnie Smith and Sharon Busbice received the honor when they placed in try-outs Nov. 30.

Concert time is 8 p.m., says Mayfield. Smith rated first chair bass clarinet at tryouts and Miss Busbice placed third chair baritone saxophone. Also this weekend, Smith will try out for all-state band. This will be the second year for Smith to rate high in advanced band. He advanced to area try-outs for all-state band last year.

Ministerial Fellowship Issues Statement

Members of the Texico-Farwell Ministerial Fellowship in a recent business meeting drew up the following statement for publication.

"We wish to express our thanks to the merchants who have made it possible for the churches to have published weekly in the State Line Tribune, the advertisement listing names of ministers and the respective meeting times of Sunday services in all of the community churches."

The ministerial Fellowship also issued an invitation to all ministers to meet with the Texico-Farwell Ministerial Fellowship, which meets regularly at 7 a. m., on the first Tuesday following the first Sunday of each month. Current meeting place for the group is the banquet room at Cathy's Cafe. The December meeting will be on Dec. 8.

The Ministerial Fellowship also issued an invitation to each family in the communities to attend Sunday School and worship services each week in the church of their choice.

Members attending the last meeting were Douglas Gossett, secretary; William C. Strickland, president; J. L. Bass, Johnny Wilson, Casey Perry, Paul Wilkinson, Herbert Peiman, and Leroy Looper.

Mrs. Della Ezell Rites Conducted Tuesday

Funeral services were conducted from the Bovina Methodist church Tuesday for Mrs. Della Ezell 86, longtime resident of Farmer County who passed away at an Amarillo rest home Sunday morning. Rev. Harold Morris, pastor of the Bovina Methodist church officiated assisted by grandsons; Rev. Robert Monk, Rev. Clyde Stanfield and Rev. Dick Horn. Interment was in the Bovina cemetery beside her husband R. B. Ezell, who preceded her in death in 1950.

Survivors include three sons, R. B. Ezell, Albuquerque, Martin Ezell, Portales, Gene Ezell, Bovina; two daughters, Mrs. Gene Parker, Roswell and Mrs. L. D. Parker, Amarillo, several grandchildren and one sister. Mrs. Ezell moved with her family to Bovina in the early 1920's moving to Farwell in 1935 when her husband was elected to serve as county treasurer. They made their home in Farwell until his death in 1950 since which time she had lived in Bovina, Clovis and Amarillo.

Thursday Services For Mrs. Ted Cox

Funeral services were conducted from Blackburn-Shaw Funeral home in Amarillo on Thursday for Mrs. Ted Cox, 56. Sister in law of Guy Cox and daughter in law of Mrs. James Cox, Farwell.

Mrs. Cox who had been in ill health for a number of years was pronounced dead on arrival at an Amarillo hospital Monday afternoon.

Survivors include her husband, Ted, two sons, Dale Cox, Metairie, La., Charles of the home, her mother, Mrs. J. T. Hale, three brother and three sisters.

Attend Funeral

Relatives from out of town here to attend funeral services for Fred Barker last week were Mr. and Mrs. Robert Widener and children, Holtville, Calif.; Mr. and Mrs. W.S. Barker, Cleburne, Mr. and Mrs. E.L. Sparks, Mr. and Mrs. George Murphy and Mr. and Mrs. Burl Henry, all from Pampa; Mr. and Mrs. O.B. Brown, Nemo, Miss Bernice Brown, Dallas, Mrs. Della Barker, Clarendon, Miss Zella Jackson, Amarillo. Also numerous nieces and nephews from over Texas and Oklahoma.

National Winner: New Mexico's State winner of the \$500 college scholarship in the national 4-H home economics competition, Veda Wilson, Curry County, is congratulated, by Robert E. Booker, left, president of Montgomery Ward, and Norman A. Mindrum, director of the National 4-H Service Committee. The occasion was a reception and dinner given by Montgomery Ward, sponsor of the home economics program, on Sunday, Nov. 29, in the Mid-America Club on the 39th floor of Chicago's tallest building. The event honored 50 national and state winners in the program who were attending the annual 4-H Congress as guests of Wards, for 42 years a national sponsor of the 4-H activities. Miss Wilson is the daughter of Mr. and Mrs. Loren Wilson and a junior in the Texico High School. Sponsor of the Texico 4-H club which Veda represented is Mrs. Perry Winkles.

Steers Take Close Game From Dimmitt Bobcats

The Farwell Steers defeated the Dimmitt Bobcats last Monday night with a score of 47-44.

Larry Gregory was high point man with 13 points, Jerry Childs was second with 12 points, Johnny Atkinson took third place honors with eight points, Warren Gossett was next with six points, Doyle Johnson and Johnny Schell had three points each.

Making the scores for the

opponents were Steve Hutton, 18; Robert Lindsey, eight; Bob Bradford, six; Kent Lindsey, six; Tommy Nichols, four; and Anthony Mays, two.

Commenting on individual players, Coach Vernon Scott said "Jerry Childs, a very good game."

The Steerettes also played the Dimmitt girls team.

Jo Ann Rhodes led scoring for the locals with 12 points, Becky Strain got seven for

second place. Diane Lovelace was third with six points. Other girls getting scores were Kandy Meeks, four; Melynda Riche, three; Nelda Winegart, two; and Ann Collins, one.

Linda McCullen from Dimmitt was high pointer for the game with 32 points, Donna Odom had eight points for second place, Shari Willis was in third place with six points. Donna Summers and Karen McCullen both had two points.

Lazbuddie Passes School Bond

Lazbuddie School District patrons approved by a 125-52 majority a \$235,000 bond issue Monday.

The vote will mean new facilities for the school — perhaps as early as next fall. According to Albert Fuller Supt. of the school, preliminary plans are now being drawn for new improvements which the bonds will make possible, and these should be ready within three weeks.

A goal of February 1 is being sought for submitting bids on construction, and the school hopes to let a contract soon and get underway on the work.

"Old red" the oldest building on the campus, will be torn down and replaced with a new modern structure. It is a former auditorium which has been converted. About 70 students are in it now. Lazbuddie School enrollment

is now approximately 390 students. Officials consider the 277 a good turnout in the election.

P. H. Worley, son in law of Mr. and Mrs. H. R. (Mutt) Crook is suffering with blood poisoning in both feet, according to word received by the Crooks family on Thanksgiving Day. His condition is listed as good.

Ten team members of the Farwell Steer football team donned the blue and white for the last time last week for the photographer. Pictured are Charles Dannheim (who will be ineligible because of age ruling), and seniors, Butch Ford, Gilbert Dale, Bobby Pruitt, Johnny Atkinson; (front) Jerry Childs, Danny Huffaker, Richard Haseloff, Jerry Fields, Warren Gossett and Larry Don- andson. A Steer father composed the following tribute to the team. His family submitted the poem to The Tribune, as a surprise to the author.

Ten beautiful nights we've had this fall
To watch our Steers play football
Just twenty boys with hearts so true
They gave all they had for the White and Blue.
Their coaches sure taught them to get up and get
For they never knew the meaning of quit.
They never were beaten as they came down the line,
Their score was just smaller when they ran out of time.
Now that it's time to close the door
On the wonderful season of '64
Oh, Mighty Steers, what have you won?
The love and respect of everyone.

C. J. Huffaker

Jaycees To Hang Yule Lights

Jaycees met for a work session Tuesday evening, in which they repaired Yule Lights which will be hung in the downtown area later this week. Several lights have been added to the strings of lights already in use.

Jaycees say "there may not be as many strings of lights as in previous years but they will be much prettier and will all be in good repair with no missing bulbs."

The Jaycees Christmas Tree sale is scheduled to get underway this week, with a display being arranged in east Farwell,

next door to the new home of Capital Market. Tree prices will range from \$3.50 to \$10 each.

Routine Meet

Farwell city commissioners held a routine meet on Friday. Only business transacted was that of approving and paying bills for the previous month.

One building permit has been issued in recent days, going to H. S. Curtis to move in a residence to be used for a rent house on Ave. F.

Texico PTA To Meet

The Texico PTA will meet in regular session Tuesday evening, Dec. 8, 8 p.m. in the high school library. Gerald Tiffin, music director will be in charge of the program and will direct members of the band and chorus in presenting Christmas selections.

A good attendance is urged by PTA officials. Loyd Smith is hospitalized at Cannon Air Force Base hospital undergoing a series of tests. His condition is reported as satisfactory.

Entered as second class matter at Farwell, Texas, under the act of March 3rd, 1879. Published every Thursday.

SUBSCRIPTION RATES -- Parmer and adjoining counties, \$3.00 per year; elsewhere, \$4.00 per year. Payable in advance.

Steers Enter Tournament Play

The Farwell Steers will go into tournament play tonight (Thursday) as they face the Big Springs team in the twelfth

Annual Plainview Invitational tournament. The tournament will continue through Saturday. Starters will be Jerry Childs, forward; Johnny Atkinson, forward; Larry Gregory, guard; Warren Gossett, guard; and Doyle Johnson, center.

The Steers Play The Muleshoe Team In Their First Game After The Tournament

ONLY 18 MORE SHOPPING DAYS TIL CHRISTMAS: The jolly old fellow above is already checking up on the good little boys and girls of all ages. He is reminding everyone to get busy on that gift list for loved ones.

Wish I'd SAID THAT

"It has been said that marriage is an institution which teaches a man regularity, frugality, temperance and other virtues he wouldn't need if he stayed single."—Frieda J. Monger, Duluth (Minn.) Publicity.

Virginia Gaskill, Pennsburg (Pa.) Town and Country.

"After watching the squabbles that often develop in the splitting up of estates, we can sympathize with the old fellow whose will contained just the following: 'Being of sound mind, I spent every darned cent I had.'"—Frieda J. Monger, Duluth (Minn.) Publicity.

"Most of us keep wishing for things we don't have—but what else is there to wish for?"—Joe Harrison, Dickens County (Tex.) Spur.

Good Concrete

Are you planning a do-it-yourself concrete project around your home this year? The best advice is: Think it over!

"But why?" you ask. "It's easy, isn't it? All I have to do is prepare the forms, figure how many yards of concrete I need, and call the ready-mix man and order it. He will pour it right into the forms from his truck."

"I'll have him add extra water to the mix so it will flow easily and level out in the form with as little effort as possible on my part. Then all I have to do is trowel it smooth and I'm in business. Right?"

Wrong! If your concrete is so soupy it can be poured, you're in trouble. That's the warning from The Master Builders Company, for 55 years a leading producer of admixtures for improving concrete.

Pouring watered-down concrete may save labor. It avoids much of the wheelbarrow work that would be required to place the concrete around the perimeter or throughout the length of your forms. But it is false economy.

Concrete that runs into a form and seeks its own level contains too much water. And that much water robs concrete of its strength and durability.

NEW PARSONAGES: Pastors of two local churches will soon be moving into new homes in Farwell. The new Methodist parsonage which will be occupied by the W. C. Strickland family is nearing completion, while the construction on the new Church of Christ parsonage to be occupied by Mr. and Mrs. Paul Wilkinson and family is well underway. The homes being built by Hromas and Vincent, are shown in the pictures above.

STRENGTH FOR THESE DAYS
from The Bible
I shall walk in liberty.—(Psalms 119:45).

It is through the presence and power of the Christ within us that we walk in liberty, because the Spirit of Christ knows no bondage or limitation and is ever strong, ever victorious.

"Forgive me for butting in but I feel I've some interest in this case."

Sure Remedy

Feel like you're out of touch with the distant family? Long Distance puts you right in the center of things again. It's so easy, so fast, so satisfying. Pick up your phone and go visiting tonight.

Girls Basketball Schedule

The Texico Jr. High girls basketball schedule has been released and is as follows:

Dec. 3	Ft. Sumner	Away
Dec. 8	Grady	Home
Dec. 17	House	Away
Jan. 5	Ft. Sumner	Home
Jan. 14	Melrose	Away
Feb. 20	House	Home
Mar. 2	Melrose	Home
Mar. 12-13	Jr. High Girls Tournament	

game as they each bucketed eight points. The other scores were pretty evenly divided between the other team members, with Robin Mahaney scoring four points and Greg Hargrove, Danny Prince, Skippy Magness, Kyle Sheets, and Dennis Ensor all making two points each.

Scoring for the opponents were Eubanks, four; Ford, two; Hinkson, two; Foster, two; and Sturnbeck, one.

The Jr. High girls also played the Lazbuddie Jr. High girls and were downed 16-13.

Junior High Tourney Set This Weekend

Eight schools will be participating in the junior high school basketball tourney scheduled for this weekend in the Farwell gymnasium. Teams participating are from Farwell, Springlake, Hart, Sudan, Bula, Bovina, Lazbuddie and Three Way.

Price of admission per session is 50¢ per adult and 25¢ for students. Trophies will be given in both the boys and girls divisions for first, second and consolation winners.

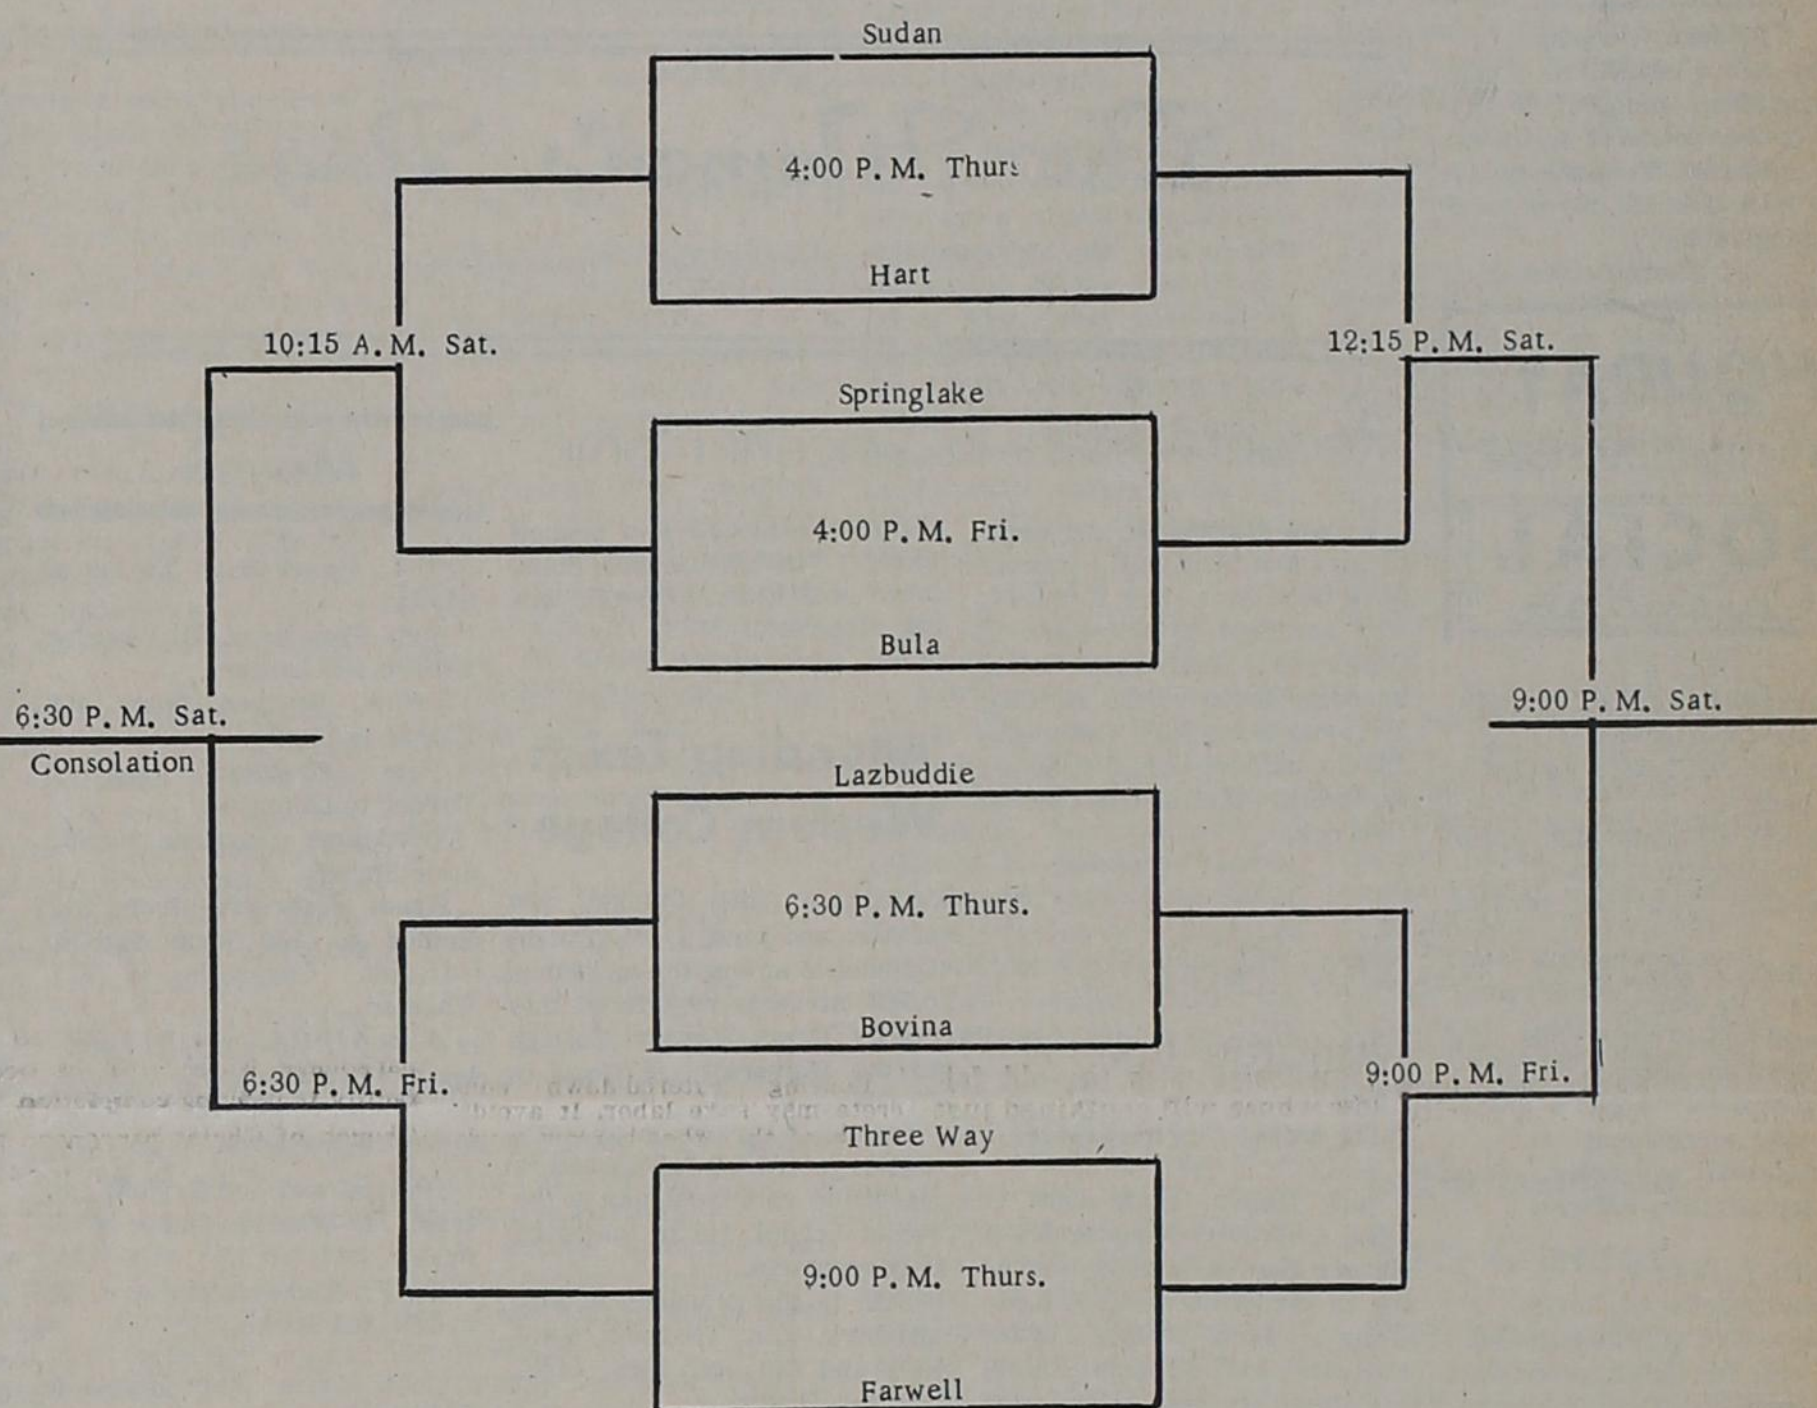

All teams should be at the gym 15 minutes previous to game time, according to tourney officials.

Brackets for the game schedules will be found in the Tribune.

Farwell Jr. High School Basketball Tournament.

FAMILY NOTEBOOK BY MARY TROY Homemaker Consultant Jones & Laughlin Steel Corp.

Are you ever puzzled by just how much is in a Number 303 can of vegetables or a Number 300 can of cranberry sauce?

Here's a handy table taken from information supplied by the U. S. Dept. of Agriculture to help you translate net weights on labels into approximate cups for cooking or eating:

Net Weight	Approx. Cups
8-oz. can	1
10 1/2-oz. can	1 1/4
12-oz. can	1 1/2
1-lb. (No. 300) can	1 3/4
16- to 17-oz. (No. 303) can	2
1-lb. 4-oz. or 20-oz., or 18 fl.-oz. (No. 2)	2 1/2
1-lb. 13-oz. or 29-oz. (No. 2 1/2)	3 1/2
3-lb. 3-oz. or 46 fl.-oz.	5 3/4

Approximately 25 billion cans of food reach shelves of grocery stores and supermarkets each year. The wholesomeness of these foods is safeguarded by the industry itself as well as federal and state laws.

Always read the labels on the canned foods you buy.

What is there about traveling salesmen?

Well, one thing about a traveling salesman is that he gives his car hard usage. Business calls require a lot of start and stop driving. And that's when corrosive engine wear can cause serious damage.

Actually, start and stop driving is the kind of driving most of us do most of the time. So, to protect your motor under these severe conditions, your Phillips 66 Dealer recommends Trop-Artic All-Season Motor Oil. Trop-Artic starts protecting at low temperatures, and keeps on protecting at high operating temperatures. It's a light oil, a medium oil and a heavy oil, all in one!

To keep your car running better longer, get Trop-Artic Motor Oil at any station where you see the Phillips 66 Shield.

CHRISTMAS BAZAAR -- Left to right, Mrs. Harry Tjardes, and Mrs. Dick Bell show some of the wares that will be sold at the Clovis Woman's Club Christmas Bazaar on Saturday. The Bazaar will begin at 9 a.m. and last until 4 p.m. at the Clovis Woman's Club house on 21st and Pile. Featured will be Christmas foods, puddings, fruit cakes, rolls, holiday breads, cakes, pies, candy, cookies and many other good things to eat.

A table with gifts for children's giving is also being featured. Prices at this table will be set within the range limit of small children. There will be a booth with dolls, doll clothes, aprons, and all the things you would like to give or get for Christmas. Coffee and pie will be sold from 10:30 to 1:30 for those wishing to shop through their noon hour. The club room will be decorated by Flowerland Florists.

4-H Club Adds Three New Members

Three new members were added to the Texico 4-H club roster last week at the regular meeting. Girls who will be beginning their first year work are Connie Lynn Autrey, Kathy Lockhart and Debra Tharp; second year girl is Betty Jean Autrey. Other girls in the club are Beverly Winkles and Janet Wilson, fifth year; Sandy Tipton-seventh year and Veda Wilson-ninth year.

Mrs. Perry Winkles is leader of the group. Veda Wilson is representing the Texico 4-H club and also the state of New Mexico at the national Congress of 4-H members in Chicago this week. She along with other New Mexico delegates left Clovis on Friday and is due to return Saturday. Attendants at the congress are outstanding clubbers from over the state. On Veda's return to Texico she will go immediately to Portales to participate in the "Make It With Wool Contest."

Shelly Family Celebrates Two Occasions

The Oklahoma Lane Community center was scene for a joint celebration on Thanksgiving Day, when members of the family of Mr. and Mrs. S. L. Shelley gathered to honor them on their Golden Wedding Anniversary and for a family reunion.

Mr. and Mrs. Shelley had been honored with an anniversary celebration earlier in the week in the home of the Black Family near Lariat.

Attending the social on Thanksgiving were the honorees, Mr. and Mrs. S. L. Shelley, Lariat; their daughter and family, Mr. and Mrs. S. Z. Davidson, Shelley and Marylyn, Ft. Worth; Mr. and Mrs. W. P. Shelley, Plainview; Mr. and Mrs. Doyn Merriman, Garry and Dale, Hale Center; Mr. and Mrs. Dale Merriman and children, Plainview; Mr. and Mrs. Bryan Smith, Sandra and Efton, Plainview; Mr. and Mrs. Leonard Huber, Cynthia, Pamela and Max, Littlefield.

Mr. and Mrs. S. L. Shelley who were married 50 years on November 15 are shown at a family reunion and anniversary celebration held on Thanksgiving Day.

Also Mr. and Mrs. Morris Gowdy, Sharon and Allen, Dimmitt, Henry Cunningham, Lakeview; Mr. and Mrs. William Hoggatt, Dale and Donna, Randolph Air Force Base; Mr. and

Mrs. J.W. Watley, Jana, Marty and Jill, Midland; Mr. and Mrs. Fae Beard and Don, Synder, Okla.; Mr. and Mrs. Olney Baldock, Floyd, New Mex. and Mrs. Clytie Dial.

Christian Family Holds Reunion

Some 72 members of the Christian family were in attendance at a reunion at Oklahoma Lane Community center on Sunday.

Mr. and Mrs. C. C. Christian were hosts for the affair. They prepared turkey with dressing and all the trimmings and other family members brought salads, bread, vegetables, and dessert to complete the meal.

The reunion is an annual affair and is usually held the weekend following Thanksgiving.

Spend Thanksgiving In Amarillo

Members of the Russell Johnson family gathered at the home of Mr. and Mrs. Cecil Dykes in Amarillo for a Thanksgiving dinner on Thursday. Also celebrating the holiday with the Johnsons was Mrs. Johnson's father T. J. (Uncle Tom) Randol of Farwell.

Members of the Russell Johnson family attending were -- Mr. and Mrs. Jerry Johnson and daughters, Canadian; Mr. and Mrs. Cecil Dykes and children, Amarillo; Don Johnson, Stillwater, Okla.

JUNIOR WOMAN'S CLUB ANNUAL CHRISTMAS HOME TOUR -- Again this year the Junior Woman's Club plan to have the home tour. The date set for the tour is December 12 from 10 a.m. to 2 p.m. with the tour starting at the Woman's Club Building which will be decorated by Clovis Floral. A Bazaar sponsored by the Curry County Society for Exceptional Children being held at the clubhouse. Tickets are on sale for \$1 and can be bought from any member of the Junior Woman's

Club or by calling 762-0604 or 763-4015. Only 300 tickets will be sold. Pictured above are two of the homes to visit. At the left is Mrs. Bobby Mitchell of 113 East Yucca, in her living room with some of the lovely creations which she so artfully makes. At the right is the lovely oriental garden of Mrs. Harold Gore of 2615 Gidding.

Suffer Defeat At Hands Of Sacred Heart

The Little Wolverines defeated their red and white opponents from Sacred Heart last Tuesday night by a score of 50-35. Manuel Martinez was high point man for the game with 19 points. Rodney Laceywell was a close second with 13 points. Len Hughes took third place with six points. Other boys scoring were Doug Autrey, five; Roddy Pearce, three; Rickey Stanley, two; and Junior Ortiz, two points.

Civil Service Announces Tests

The U. S. Civil Service Commission has announced a new examination for persons experienced in the fields of automatic data processing. The examination is needed to meet the ever-increasing demand for skilled personnel to program and operate the many large-scale computers found in Federal offices and laboratories in the Washington, D.C. area. The examination covers the positions of Digital Computer Programmer, Digital Computer Systems Analyst, and Digital Computer Systems Operator which pay between \$6,050 and \$10,250 depending on the length, quality, and type of experience shown by the applicant. No written test is required. Related college study or training in the digital computer field may be substituted for some of the required experience. Interested persons should consult Announcement No. 348 for a detailed explanation of the experience requirements. The announcement and appropriate application forms may be obtained from many post offices throughout the country or from the U. S. Civil Service Commission, Washington, D.C. Applications will be accepted until further notice by the U.S. Civil Service Commission, Washington, D.C. 20415.

Hospital Notes

Mrs. J. R. Thornton who had been listed in serious or critical condition in Parmer County Community hospital in Friona for the last several days is showing a marked improvement, according to family members.

Little Whirlwinds Face Ft. Sumner

The Texico little Whirlwinds start their season tonight (Thursday) when they will face the Ft. Sumner Jr. High girls on the Ft. Sumner court. Slated to start the game are Alma Stewart, forward; Zadene Burris, forward; and Brenda Simms in the other forward spot. The guards will be Linda Rundell, Janet Wilson, and Betty Hukill or Rose Laceywell in the other guard position. The girls next game will be against Grady Tuesday. The game will be played on the home court.

Delta Xi Members Invited To Attend Tea In Dimmitt

The Dimmitt Delta Kappa Gamma members will host members of the Delta Xi Chapter with a tea Saturday, Dec. 5, 2:30 p. m. in the fellowship hall at the First Methodist church in Dimmitt. Mrs. Esta Vandiver, Dimmitt, will bring the program, "Religious Emphasis on Christmas," and group singing will be led by Miss Lucille Park of Hereford.

Lutherans To Hold Special Services

Two meetings in Lubbock this coming week will be of special interest to Lutherans of this area: the 10th anniversary of the founding of Christ Lutheran Church in the southwest part of the city, and a Lutheran Layman's Workshop at Redeemer Lutheran, corner of 22 and Ave. W. reported the Rev. Herbert F. Pelman, pastor of St. John Lutheran Church, Lariat. Three services will be held at Christ Lutheran, 50th and Knoxville on Sunday: 8:30 and 9:45 a.m. and 3:30 p.m. The Rev. Paul Elbrecht, first pastor of the congregation, and now professor at Concordia Theological Seminary, Springfield, Illinois, will be the speaker. The Rev. Elbrecht arrived in Lubbock July 26, 1954, shortly after his graduation from the seminary, where he is an instructor. Four weeks later he was ordained into the ministry at Redeemer Lutheran Church by the Rev. Orville Buntrock. By the following Sunday he had found a place of worship at 4419 Thirty First Street. The first service was attended by 26 people on August 29, 1954. When the attendance and membership increased the Mission Board of the Texas District of the Lutheran Church - Missouri Synod purchased a nine acre tract of land at the corner of 50th and Knoxville. Groundbreaking services were held on September 25. Building of the first chapel continued uninterrupted so that dedication ceremonies could be held during March 1955. This modest but attractive brick structure still serves the congregation as its house of worship. However in the spring of 1962 an educational wing was added to take care of the growing Sunday School and the Christian Day School, which at present is composed of a

What's Cooking At Farwell School

MONDAY: super dogs, french fries, sweet pickle relish, fruit cobbler, butter, milk. TUESDAY: bean casserole, cole slaw, spinach, jello w/fruit, hot cornbread, butter, milk. NEWS FROM LAZBUDDIE

Mr. and Mrs. K.B. Echols spent Thanksgiving with their daughter, Mrs. Dan Smith and family in Eunice. Mr. and Mrs. Eulan Parham and Terry visited with the W.M. Parham family at Merkel over the holidays. Mr. and Mrs. Scotty Windham and children visited relatives in Tuscola over the holiday weekend.

New Ranch style brick with exterior sliding home in Mimo addition. The clever use of vertical siding and brick veneer make a pleasing combination. Three bedrooms and one and 3/4 baths are featured in this ranch design. An exposed brick wall is located between the living room and family room. The entry is very attractive with the built in planter serving as a divider between the living room and hall. The family room opens on to a patio through sliding glass doors. The kitchen is complete with built in oven range, dishwasher and disposal. The laundry room and lavatory near the kitchen will please the housewife. 116" cement drive way to a large double garage at back of house. Plenty of room in garage for storage. This home meets F.H.A. Specifications and Medallion home requirements. Only \$700.00 down and closing cost.

LEADING RUSHER -- Quarterback Benjy Dial of ENMU is chased by two Arizona State College players. Dial rushed for 52 yards against Arizona State to take over as the Greyhounds leading rusher. He also set records in passing and total offense.

LONG PASS -- Benjy Dial gets off a good pass for a first down in the ENMU-Arizona State game. Dial led Eastern to a 39-17 victory. In the game he passed for 336 yards and three touchdowns and rushed for 42 yards, scoring one touchdown himself. He set records for the most yards passing and most yards total offense in a single game.

Dial Sets Records For ENMU

Quarterback Benjy Dial, son of Mrs. Clytie Dial and a graduate of Farwell High School was a leader on the field for ENMU this year and he also ended the season as the team's statistical leader.

He finished the season as the Greyhound's leader in rushing, passing and total offense. He lived up to the pre-season billing as one of the Hounds' strongest runners by gaining 365 yards on 99 attempts for an average of 3.5 yards per carry.

His rushing total was no surprise, but his passing statistics were. In Eastern's nine games he completed 84 of 142 passes for a total of 1,300 yards and 14 touchdowns while having only five intercepted.

Last year he managed only 31 completions in 88 attempts for 529 yards and four touchdowns. In the same season he also had 11 interceptions. He amassed a total offense of 1,665 yards this year compared to 912 in 1963. His performance this year enabled him to revise the passing section of ENMU's record book.

The total offense yardage, passing yardage, TD tosses and number of completions are all season records. By completing 58.5 per cent of his passes he tied another record.

In the final game of the year he threw five TD passes to set

another record, which he had set earlier in the year with four TD passes in one game.

Dial also bettered the record for most yardage passing in a game by tossing for 336 against Arizona State, the record for most total offense in a game with 378 against Arizona State; and the record for best percentage game with 84 per cent completion against Central Oklahoma, and tied the record for most completions in a game with 17 of 24.

Dial is a junior at Eastern New Mexico University majoring in physical education.

Farwell Girls Take Close Win From Ft. Sumner

In an overtime game played in Ft. Sumner Tuesday night the Farwell varsity girls basketball team defeated the Ft. Sumner team 34-33.

Cook of Ft. Sumner was high point girl for the game finding the bucket for a total of 26 points. Joan Rhodes was high for Farwell with 16 points to her credit. Melinda Ritchie contributed three, Becky Strain, five; Ann Collins, two and Jackie Gast, eight. West was the only other Ft. Sumner girl scoring. She hit for seven.

At the end of the first quarter score stood at 9-7 in favor of Ft. Sumner; halftime score was 22-15 - Ft. Sumner leading. However in the third frame Farwell outscored Ft. Sumner to come within three points, with the score 27-24 Ft. Sumner. At end of regular playing time score was 31-31.

During the overtime each team hit the basket for a field goal and Jackie Gast made a free throw when she was fouled by West.

Joan Rhodes accounted for eight rebounds and the team as a whole turned in a creditable performance, says the coach.

The guards did a good job on the defensive side, holding the scoring to a minimum. Final score in the "B" game was Farwell 42 - Ft. Sumner 13. Kandy Meeks was high scorer for the game with 13 points.

It's always the unloaded gun that get 'em! The Texas Safety Association reports that many persons are killed each year by guns they or someone else thought were not loaded. Make sure all guns are unloaded before bringing them into the house. And, never point a gun at anyone. It could be loaded.

Honor Roll Released By Texico School

Thirty students in the Texico high school were listed on the honor roll during the last six weeks, according to information released recently.

Juniors and sophomores each listed seven students with seniors naming six to the roster.

Seniors named are: Linda Hadley, Gwinette Lovett, Mike Spearman, Cynthia Spence, Kathy White and Sarah Walker; Juniors -- Jeanette Coffee, David Duncan, Larry Fought, Peggy Hughes, Terry Lovett, Joe Patterson and Veda Wilson; sophomores -- Linda Armstrong, Jill Billington, Pam Fitz, Keith Crooks, Leslie Harrelson, Pam Roberts and Susan White.

Others listed included Allan Breitenbach, Rodney Laceywell, Brenda Sims, Janet Wilson, Cynthia Armstrong, Roxie Laceywell, Kathy Martin, Richard Breighthenbach, Glenda Kelly and LaWanda Yell.

207 Wells Drilled In Parmer County

A dry and windy spring, plus a dry summer has led to an increase in seven counties of the High Plains Underground Water District in irrigation well permits.

Eight counties have drilled more wells in 1964 than in 1963 as of October 31.

Records of the High Plains Underground Water District indicate that most counties will show an increase in the number of permits issued and total irrigation wells drilled for this year.

Above is a chart showing the counties and number of permits issued and wells dug. Period covered is from January 1, 1963 to October 31, 1963; and January 1, 1964 to October 31, 1964.

THE HIGH PLAINS FARM AND HOME

Census Of Agriculture Brings Statistics Up To Date For Parmer

The 1964 Census of Agriculture, now being conducted by the Bureau of the Census, U. S. Department of Commerce, in Parmer County, will bring up to date the farm and ranch statistics last collected in 1959.

Here are a few of the many facts recorded in the 1959 agriculture census for this County:

There were 863 farms and ranches in 1959, compared with 909 in 1954. The average size of farm and ranch was 559.1 acres in 1959, compared with 570.1 acres in 1954.

The value of products sold by the County's farmers and

ranchers in 1959 was \$28,714,107. The value of all crops sold was \$23,915,871. The value of all livestock and livestock products sold was \$4,798,236.

The 1964 national Census of Agriculture is the 18th in a series which began in 1840. Because of the rapid changes American agriculture has been undergoing in recent years, Census Bureau officials regard the current census as one of the most significant ever taken. They ask every farmer and rancher to cooperate in compiling an accurate record of these changes by filling out the census form he receives in

the mail and holding the completed questionnaire until a census taker calls for it.

On The Farm In Parmer County

COTTON RESEARCH

Use of "non-deteriorated seed" is essential in getting a cotton crop off to a good start.

This fact was brought out by Dr. L. S. Bird, Associate Professor, Dept. of Plant Sciences, Texas A&M University at the recent Texas Insect and Plant Disease Control Conference.

Using high quality seed is necessary to escape seedling disease. Seedling disease escape is selecting for inherent seed and seedling characteristics which will help avoid and resist soil-borne ailments.

Seedling disease escape research has involved evaluating material and selecting for low temperature germination, resistance to seed deterioration, rapid seedling emergence and a low amount of post-emergence damping-off.

The main point is the importance of seed deterioration and its relationship to low temperature germination and seedling growth. Using non-deteriorated seed is important in getting a good uniform stand of healthy cotton plants.

Another important point is that cottonseed deteriorate when exposed to high moisture levels. The deterioration rate is faster when moisture is combined with high temperatures.

Deterioration may occur in the field between boll maturity and harvest. It may occur in trailers as they stand in the gin yard and in seed storage if moisture is not reasonably controlled.

What are the results of cottonseed deterioration?

Bird said higher temperatures are required for seed germination, seed germination and seedling growth rates are reduced and seedlings are susceptible to more soil fungi than those from good seed.

This means that when non-deteriorated planting seed is used, planting can be done in colder soil early in the season, germination and seedling growth is faster, and seedlings are hit by fewer soil-borne fungi.

With our short growing season and necessity of an early planting date these research results are real important to our area.

PROCEEDINGS AVAILABLE

The above research is covered in the 1964 proceedings of the Annual Insect and Plant Disease Control Conference. This is a 104 page report of the latest research findings covering 32 different topics.

Copies of this proceeding may be obtained from the Office of Continuing Education, Texas A&M University, College Station, Texas at \$2.50 per copy. If you desire a copy write directly to the above address.

COTTON STRIPPER EFFICIENCY

The efficiency of your cotton stripping operation depends on field conditions at harvest, machine characteristics and adjustments, and skill of the operator.

The field conditions are very important. In damp weather, performance of a cotton stripper will be less efficient than under dry conditions. Extensive testing has shown best cotton stripper performance is obtained when relative humidity is below 60% at boll height.

By delaying harvest until humidity is below 60% you should have cleaner fields and better grades if other factors are equal. A dial-type hygrometer measures relative humidity and costs about \$20 dollars.

Harvesting after frost should be done while the main stalk still has enough sap to be limber. Brittle stalks and branches mean more bark in the cotton. On the other hand, leathery leaves and limber leaf stems mean extra moisture in the harvested cotton, which can cause sweating during storage prior to ginning.

Supplemental Phosphorus Can Up Calf Crop, Weaning Weight

With green grazing becoming limited, beef cattle producers need to give special consideration to supplying phosphorus for their herds. This mineral is deficient at times in all sections of Texas, with late summer, fall and winter being critical periods in all areas.

Cows fed phosphorus supplements where the deficiency occurs may average as much as 200 pounds heavier than those not receiving the supplements, says Uel D. Thompson, Extension animal husbandman, Texas A&M University. Calves may

weigh 50-70 pounds more at weaning age, calf crops can be increased as much as 30 percent and cows may conceive earlier after calving.

Practical methods of supplying phosphorus to range cattle include soluble phosphorus in drinking water and phosphorus supplements in mineral feeders.

Where the water supply of cattle can be controlled, adding phosphorus to the water may be the most satisfactory method points out the husbandman. Monosodium phosphate may be added to water troughs by hand, while there are automatic dispensers which add the desired amount of mineral solution to a given amount of water.

Where the mineral is added by hand, recommendations generally call for one-fourth ounce of monosodium phosphate per eight gallons of water or one-fourth ounce per head daily. A stock solution of two-and-one-half pounds of this phosphate per gallon of water or 100 pounds to 40 gallons of water is recommended when using an automatic dispenser. This machine automatically proportions the mineral to the water.

Sheltered mineral feeders offer protection from wind and rain and thereby lessen waste. The weathervane type is satisfactory if kept level and treated with a rust preventive explains Thompson. Having the feeding trough 12-18 inches above the ground will permit calves free access to the mineral. The feeding box should be divided so that only salt may be supplied in one compartment and additional minerals in the other.

A mixture of one part salt and two parts steamed bonemeal by weight is recommended for self-feeding where phosphorus is highly deficient. Half and half mixes are best under borderline conditions whereas bonemeal without salt is recommended for saline areas, as in sections of the Gulf Coast. Where salt is fed in mixtures to control protein supplement intake, bonemeal should be fed alone.

Sources of phosphorus can be divided into 2 broad groups - the ammonium phosphates and the calcium phosphates. The ammonium phosphates are available in several grades such as 11-37-0, 18-46-0, 11-48-0, 16-20-0 and so on. Their biggest advantages are their 100% water-solubility and the presence of both nitrogen and phosphorus in the same liquid or dry pellet. Nitrogen associated directly with phosphorus will usually increase phosphorus uptake by the plant. The calcium phosphates generally available are 0-20-0 and 0-46-0. The biggest advantage of these materials is their slightly cheaper cost - an advantage offset by the higher availability of phosphorus in the ammonium phosphates.

One point to consider on broadcast phosphorus is to incorporate the fertilizer into the soil as much as possible. If still possible, broadcast phosphorus should be applied, disked in and turned under when plowing. There is some concern that such a practice may place the phosphate too deep for roots to obtain it. This is not true unless there is some restriction of root growth due to poor physical condition, excess moisture in the soil or similar factors. In fact, phosphorus which is deep would generally tend to encourage deeper root growth which is usually desirable. Broadcasting of phosphorus on top of plowed ground and then bedding-up may place too much of the phosphate above seed level.

Liquid phosphorus sources are gaining in popularity as a means of easily banding a phosphate source. This banding operation, which is a dual application of ammonia and liquid, can be done when ground is still flat or can be put in the sides of the bed on 20 inch centers. Row spacing or double row maize may dictate narrower or wider chisel spacings.

Additional information on phosphorus and other minerals needed by beef cattle is available at the county Extension office, Thompson said.

AMMO NOTES

By Bill Bennett, Agronomist

Grain sorghum harvest is over. Cotton harvest is underway. Thoughts are turning to fertilizer use for the 1965 crop. As in the past, questions are arising as to whether phosphorus should be used and if so, what kind, how much and when and how to apply it.

This past crop season has shown some good responses to phosphate on all crops. Responses have generally been good on grain sorghum even in a year when yields have been slightly below normal. In general, grain sorghum yields with phosphate applied have been 6000 plus. Without phosphate, yields have been around 5500. These figures obviously will vary from farm to farm and

CRANBERRIES AND HOLIDAYS GO TOGETHER

Cranberries have played an important part in our country's history since the very earliest colonist arrived. And even before this, the Indians used them both as food and as a remedy for wounds inflicted by poisoned arrows.

New England seafarers quickly discovered that eating cranberries was a solution to scurvy prevention, just as the British tars used limes. Gloucester and New Bedford clipper ships carried them by the barrel.

These seamen, when they returned, were largely responsible for developing and carrying on the cranberry business commercially.

Cranberry sauce is considered essential in brightening the festive Thanksgiving dinner. You'll also find cranberry de-

licious in puddings, breads and sandwiches, or in salads. While USDA's Agricultural Marketing Service is reporting cranberries in such plentiful supply, why not try a variety of these uses?

CRANBERRY RELISH calls for 2 cups fresh cranberries and 1 seeded quartered orange. Chop coarsely in a good chopper and stir in 1 cup sugar. Chill in refrigerator until serving time. This makes a pint of relish to serve with your turkey, poultry, pork or fish. And it's a tasty spread for hot breads!

To make the OLD-FASHIONED CRANBERRY SAUCE, mix 1 cup sugar, 1 cup water and 2 cups of fresh cranberries. Let boil 5 minutes until the berries pop open. Chill to serve. Yields a pint of sauce. If you like tart cranberry sauce, use 1/2 teaspoon of grated lemon rind.

FAVORITE CRANBERRY SALAD
(Serves 15 to 20)
MIX 2 cups ground, raw cranberries (1 lb. package) with 2 cups granulated sugar.

Proper Upkeep Extends Life Of Equipment

Proper maintenance can extend the useful life of sprinkler irrigation equipment. And, with the irrigation season just about over, now is the time to do some of these maintenance jobs.

Check the engines and have needed repairs made now, says Wayne Keese, agricultural engineer for the Texas Agricultural Extension Service. Pumping units left in the field over winter should be covered with a waterproof tarpaulin or some other suitable structure. Special care should be taken to prevent moisture from entering the exhaust pipes of internal combustion engines.

Impellers and seal rings on centrifugal pumps require checking, the engineer points out. Sprinkler heads should be removed and checked for excessive wear and repairs made if needed. Remove all gaskets and store them flat in a dry, cool location out of sunlight. Store pipe on inclined racks

Let stand until sugar is dissolved. Dissolve 2-3 oz. packages lemon jello in 1 1/2 cups boiling water.

Let set until it starts to thicken. Mix together above ingredients and add:
1 cup drained, crushed pineapple

1 cup diced celery
1/2 cup chopped pecans
1 orange, ground

Store in refrigerator until set. Serve on lettuce leaf, if desired.

For a special breakfast treat, serve this CRANBERRY PRUNE SPREAD on toast. Put 4 cups fresh cranberries, 1 cup pitted prunes and 1 tart peeled and cored apple through food chopper. Remove seeds from 1 quartered lemon and put lemon through food chopper. Combine with 1 cup sugar, 1 1/2 cups corn syrup and 1/2 cup water in sauce pan. Cook slowly until thick, about 20 minutes. Stir frequently to prevent sticking.

Pack in hot sterilized jars and seal with paraffin. Or pour into freezer cartons, seal tightly, cool and freeze. Makes about four six-ounce portions.

QUESTION OF THE WEEK:
QUESTION: What causes a "non-skid" throw rug to lose its grip?
ANSWER: The diagnosis may be just right! The non-skid backing is designed to create a suction action which holds the rug securely to the floor. This suction is broken when dirt or floor wax clogs the ridges or the backing. To correct this, and restore the original grip, turn the rug over and scrub the under side -- using a stiff brush coated with thick hot soap or detergent suds. Then wipe the surface once or twice with a clean sponge or cloth wrung out of hot rinse water. Wipe off any surface water and let the rug get completely dry before flipping it over.

Naturally, two paychecks and higher incomes have had an effect on savings. The Home Loan Bank Board, a government agency that keeps an eye on the thrift of the nation, reports that total savings of individuals are now approximately \$400 billion, or nearly twice that of a decade ago.

"This works out to the equivalent of over \$7,000 per family as the government measures thrift," says Mrs. Meyer.

Our savers have green thumbs

When it comes to making dollars grow, our savers are real gardeners. Dollars saved with us thrive nicely on generous earnings. Put part of your pay regularly into "seed money" and watch it bloom into an impressive reserve. Why not start your bumper crop of "growth dollars" with us this week?

Branch Office 2nd & Abilene, Portales

Recently there appeared in the Scripps-Howard newspaper chain an article by Robert Dietsch in which the current one-price cotton law was roundly denounced as a flop, and the article was subsequently rebutted by a letter from American Textile Manufacturers Institute President William E. Reid to the Scripps-Howard Editor-in-Chief, Walker Stone.

In view of Mr. Reid's position as spokesman for the textile industry, we think his letter worth reproducing here: "A great many highly knowledgeable people -- farm leaders, market experts, textile manufacturers and others -- disagree with Robert Dietsch's opinion that the Government's new cotton pricing policy is a failure. Also many of us who have spent our lives in manufacturing and selling cotton products feel that an unintentional disservice has been done to the vast cotton industry of this country."

"In the first place, any conclusion now is bound to be premature. The new price policy has been fully effective only since August, and partially effective only since April 11. In all fairness, how could anyone expect to eliminate in this brief period the deep-seated ills of the whole cotton economy, generated during eight years of the admittedly inequitable two-price cotton system under which our mills were required to pay one-third more for American-grown cotton than foreign mills paid for the identical product?"

More Families Now Have Savings Accounts

At least two major changes affecting the financial status of many American families have taken place during the past decade: Double paychecks and more family savings.

This observation comes from Mrs. Wanda Meyer, Extension home management specialist at Texas A&M University.

Approximately 40 per cent of the families with wage earners in 1950 were receiving two or more paychecks, compared with more than 50 per cent of wage earner families now receiving two or more paychecks.

The working wife is primarily responsible, says Mrs. Meyer. One out of three married women are now employed.

Average family income during the past 10 years has risen from about \$3,300 to just under \$6,000. The average is for the nation as a whole. In many instances, two or more paychecks have served to boost family income into the \$10,000 or higher bracket.

"The new price policy achieves this through a system of "payments-in-kind" utilizing in the process the government's vast stock pile of surplus cotton. In making the price adjustment, the government did reimburse the mills for the difference between the price they paid for the cotton and its new price, on that portion of cotton which moved into production between April 11 and the beginning of the new cotton crop year, August 1. I repeat, these payments were reimbursement for monies already paid out by the mills."

"Unlike most other agricultural commodities, cotton has little useful value until it is processed into one of its thousands of outlets in the apparel, household or industrial markets. Thus cotton's strength is related directly to the strength of the textile industry through which the product moves to market. Our mills can and do process other fibers. We are increasingly less dependent on cotton, but we recognize the value and potential of the product, both as a marvelous fiber and as an enormous economic factor involving the welfare of millions of people. We have said repeatedly, and say again, that if the downward trend in cotton consumption is to be reversed and turned upward, the product must be priced competitively. It cannot thrive under a price structure maintained by government at non-competitive levels."

"The objective of the new cotton law was and is to rejuvenate the vast cotton economy of the nation. Although it is much too soon to make a final judgment, the facts to date do not justify Mr. Dietsch's blunt conclusions."

"Until the new cotton law revived hopes, the cotton economy of the nation was deeply discouraged. Consumption was trending downward steadily; cotton acreage, already severely restricted, was facing inevitable additional restrictions; government costs of the cotton program were skyrocketing, with no relief in sight; textile mills were turning away from cotton in favor of other fibers; cotton's markets were being under-

mined by a variety of competing products. Altogether, there was a growing loss of confidence in the future of cotton at every level from the farmer to the mill.

Pointers For Planting Container-Grow Roses

By A. F. DeWerth
Professor of Floriculture
Texas A&M University
Container-grown rose plants can be planted any time of the year, but many are set out during the winter and early spring months. To insure proper growth response, several things should be considered.

Cut the container down to the bottom on both sides of the nurseryman has not already done so. Then dig a hole about six inches larger than the diameter and equal to the depth of the container. Remove the plant from the slit container and place it in the hole so that the bud union is about even with the soil surface.

Hybrid tea roses should be planted 24 to 30 inches apart, and floribundas should be set 18 to 24 inches apart. Newly planted roses, whether bare-root or from containers, should be watered often enough to keep the soil moist.

In areas where plants are exposed to prevailing winds or in other windy locations, it may be desirable to stake them temporarily until new root systems develop to anchor the bushes securely in the soil.

Using a two-to-three-inch mulch over rose beds is highly recommended. Such a mulch will reduce the frequency of watering, keep the soil cooler to reduce both winter injury and summer drying and tend to keep down weed growth during the growing season. In applying mulches, keep the material about four inches from the bud union.

Good healthy roses, planted properly, will thrive with minimum care. The most important consideration is to keep them from drying out during the growing season.

One precautionary measure contrary to many old-time recommendations and the beliefs of many gardeners is this: Never put fertilizer on roses at the time of planting. This means no fertilizer of any type should be placed below or around the roots or on top of the soil surface. Any excess of fertilizer around a newly planted rose bush may do more to prevent or retard root growth than to promote it.

A good rule is to withhold fertilizer until new feeder roots are well-established and plants can assimilate nutrients without ruining themselves. Close observation will show when plants begin to grow well. If more than three or four roses are planted, do not become concerned if several do not break out and grow as rapidly as some of the others. Newly planted roses often begin growth at different rates.

After years of decline, cotton is on the move again. It is a source of grave concern that many Scripps-Howard newspapers have given their readers such a premature and one-sided view of the situation. We issue to Mr. Dietsch and to anyone else in your group a cordial invitation to visit with us in this industry through which cotton moves to market. Let us show you people first-hand some of the marvelous new plant installations that are in process since the cotton law was passed let them visit the production facilities and see for themselves what is happening on the cotton front; let them visit in the wholesale cotton goods markets and determine whether the new cotton law can be described as a "flop," or whether it is moving in the direction of achieving its objective.

"We hope your papers that carried Mr. Dietsch's story will carry this letter and that we shall have the pleasure of a visit from some of your group."

The General Accounting Office has charged that the Navy's failure to obtain rotor assemblies available from Army, and which later were excess to the Army's needs, cost the taxpayers an unnecessary \$757,000.

DRILLING STATISTICS FOR OCTOBER 1964

During the month of October 133 new wells were drilled within the High Plains Water District; 10 replacement wells were drilled; and 4 wells were drilled that were either dry or nonproductive for some other reason. The County Committees issued 156 new drilling permits.

County	Permits Issued	New Wells Drilled	Replacement Wells Drilled	Dry Holes Drilled
Armstrong	9	2	0	0
Bailey	10	4	2	0
Castro	11	24	1	0

TOTALS	156	133	10	4

Continued stability for U. S. farm income is forecast for the year ahead. Farmers' realized gross income is expected to be about the same as in 1964. Production expenses may show some further increase, but probably less than usual, reports Extension Economist John G. McHaney after his return from the National Outlook Conference in Washington, D.C. Moreover, he says, disposable personal income per capita of the farm population may rise slightly next year due to the relative stability in farm income; the continued general economic expansion and a further reduction in income tax rates. Both farm numbers and the farm population are expected to continue declining in 1965.

Seed Condition Essential To Good Cotton Crop

A Texas A&M University plant scientist says use of "non-deteriorated seed" is essential in getting a cotton crop off to a good start.

Dr. L.S. Bird, associate professor and a speaker at the Texas Insect and Plant Disease Control Conference here Nov. 10-11, said high quality seed is necessary to achieve "seedling disease escape."

Seedling disease escape, he explained, is selecting for inherent seed and seedling traits which help avoid and resist soil-borne ailments. Disease escape involves evaluating material and selecting for low temperature germination, seed deterioration, resistance, rapid seedling emergence and low post-emergence damping-off.

"The main point we want to bring out is the importance of seed deterioration and its relationship to low temperature germination and seedling growth," Bird said. "We want to emphasize its importance in getting a good uniform stand of healthy cotton plants."

Cottonseed deteriorate when exposed to high moisture levels, especially when combined with high temperatures, he said. The condition can occur in the field between boll maturity and harvest, in trailers as they stand in the gin yard, and in storage if moisture is not reasonably controlled.

What are results of cottonseed deterioration?

Bird said higher temperatures are required for seed germination, seed germination and seedling growth rates are reduced, and seedlings are susceptible to more soil fungi than those from good seed.

"Family Holidays Around the World" is the title of a new book just published by the American Home Economics Association. It is recommended for classroom projects on foreign countries, for international programs, or for individual reading. Mrs. Florence W. Low of Texas A&M University, Extension assistant director for home economics and immediate past president of AHEA, is chairman of the International Program Committee of the organization.

Unneeded Insecticides Invite Trouble

"Cotton growers invite trouble when they use insecticides that are not needed," J. C. Gaines, head of Texas A&M's Department of Entomology said this week.

Strong mixtures to control fleahoppers and overwintering boll weevils can reduce numbers of beneficial insects and thereby make it easier for bollworms and budworms to develop, the scientist said. But, he added, should fleahoppers and overwintered boll weevils develop to damaging numbers, as indicated by insect counts, insecticides must be used to protect the crop.

However, Gaines pointed out, in many instances these insects do not increase to damaging numbers during the 30-day period prior to the appearance of bollworms; thus, applications of insecticides are not necessary. In addition to the wiping out of beneficial insects, Gaines pointed out other hazards connected with the use of excessive applications of poisonous insecticides. Many soils can be contaminated and certain crops cannot be safely planted. Carrots in at least two areas of the state during the past year were found to be contaminated with endrin.

This contamination is the result of several factors including insecticidal drift. Drift, he said, may also be responsible for the destruction of populations of beneficial insects and a build up of destructive pests. Drift may also result in harmful residues on food and feed crops.

The entomologist said that research information indicates that the best recommendations are to apply insecticides only when needed to control injurious insects, except when systemic insecticides are applied as a seed or soil treatment for the control of thrips. The 1965 recommendations will be available soon in the form of the well known "Guide for Controlling Cotton Insects in Texas."

Educational programs over the past several years have given many cotton growers a good working knowledge of cotton insects. It is believed, he said, that most can by visual inspection, determine the proper time to apply insecticides. County agents and Extension specialists will continue their work in this field and survey information on the cotton insect situation will be released to the news media each week during the growing season, Gaines said.

Gaines concluded that insecticides are necessary for the economic production of cotton in many areas of the state, but that an integrated program making maximum use of natural and cultural controls is necessary to obtain the greatest benefits from an insect control program. The immediate results as well as the long range effects must be carefully considered in developing profitable and effective insect control recommendations, he said.

OUTDOORS IN TEXAS

By VERN SANFORD

Most hunted animal in Texas, except the deer, is the ringtail.

headlamp or flashlight. Despite the fact that thousands of ringtails are killed

For two months hunters will take this animal any way they can — with lights, dogs or traps. Afterwards, the fur will wind up on some woman's back in the form of a beautiful coat.

Only fur-bearing animal left in Texas that commands a worthwhile price on the market is the ringtail. In recent years the pelts have held steady at about \$1.25 each for the better ones.

Many Texans never have seen a ringtail. This sly diminutive creature spends most of its life in the dark. It beds down in a den during the day. And it will not venture into the open until well after dusk.

Then, unlike most nocturnal prowlers, it retires before daylight arrives. Only on very rare occasions will you see a ringtail during daylight hours.

Although the ringtail ranges over much of the dry Western half of the United States, the biggest population is found right here in Texas.

There are more ringtails in the Edwards Plateau of Central Texas than in any other comparable region.

This animal is mistakenly called the ring-tailed cat. But, it isn't a member of the cat family. It's a carnivore closely kin to the common raccoon.

Average ringtail is about 20 inches long, including tail and weighs between two and three pounds.

Its tail and round eyes which appear much too large for its meek-looking face are the ringtail's most notable characteristics. The tail has alternating black and white rings, hence the name ring-tail.

In all, there will be 14 to 16 rings which don't quite come together on the underside of the tail. Overall coloration is a tawny or grayish hue. Its tell-tale eyes glow brightly when caught in the beam of a

March of Dimes Medical Team at Work

THROUGHOUT THE U.S. today there are 50 March of Dimes Birth Defects Centers, affiliated with top medical schools. In each, the "team approach" is used. Thus, an infant (as above) born with most of an arm missing is of concern not only to the pediatrician but to an entire group of medical specialists which could also include an orthopedic surgeon, a prosthetic technician, neurologist and a social worker. Photo shows a part of the medical team at the March of Dimes Birth Defects Center, University of North Carolina Medical School, Chapel Hill.

each year, it is remarkable how little is known about this animal.

Perhaps it is curiosity more than anything else.

"There just isn't much available information on the ringtail," says Al Springs, coordinator for wildlife restoration with the Texas Parks and Wildlife Commission. "We've run a study on its food habits, but other than that I can't tell you too much about it. Frankly, I doubt whether a majority of Texans even know it exists."

Usually ringtails live along rocky ledges where they den in crevices. Females hatch their young in the spring and average between two and four offspring. Young ringtails are almost helpless at birth and don't open their eyes until 31 to 34 days later. At about four months they have the same overall look of adults. But, of course, they are smaller in size.

A dietary analysis made of more than 100 ringtails revealed that about one-fourth of its total intake is composed of tiny mammals like mice and rats, including carrion.

One reason the ringtail isn't better known is because very few exist in captivity. Unlike coons and other similar animals, the ringtail doesn't show up around farm houses as pets. Seldom are they caught when young. This because the young rarely venture out until they are grown.

Otherwise, it feeds upon fruits of native plants, birds, snakes, lizards and various insects like spiders, scorpions and centipedes. Believe it or not, one of its favorite foods is the common mistletoe which grows in mesquite trees.

It isn't unusual to have a ringtail answer a predator call. But considering this diet composition, it sort of makes a person wonder what motivation could possibly prompt the animal to be attracted by the

Also the very nature of the ringtail's living habits, in the narrow and confining rocky crevices, make the young difficult to capture alive.

Sedums As Ground Cover Plants

By A. F. DeWorth
Professor of Floriculture
Texas A&M University
"Ground cover" plants are receiving increased interest with the present trend toward gardens requiring little time-consuming maintenance. These plants are low-growing with a spreading habit and are used primarily to hide unsightly areas of bare soil. They require little or no maintenance. Various species and varieties of Sedum or Stonecrop are worthy herbaceous plants that are highly adaptable for this use in Texas gardens. Many sedums are succulent, evergreen, low-growing herbs with a

trailing habit of growth. They are drought resistant and grow well in poor soils, and most are adaptable to both sunny and shady situations. The best known and probably most widely grown in gardens today is Sedum acre, or Wall Pepper. It has tiny pale green leaves and yellow blooms that are crowded on rapidly creeping branches. The Mexican sedum, Sedum amecamecanum, is useful for decorative ground patterns and for contrast with some of the more widely used ground cover plants. It's a dwarf, thick-leaved, succulent plant with yellow-green foliage and yellow star-

shaped flowers in the spring and summer. This sedum grows approximately six inches high. Sedum spurium, commonly called Dragon's Blood, has bronzy-red stems and buds and bright carmine flowers that later turn to dark crimson. Foliage is green to reddish-brown and is almost completely covered with flowers from July through September. This plant provides excellent ground cover for areas that are difficult to maintain, such as under spreading oak trees. It has a neat appearance and will do well in sun or shade but will not tolerate traffic of any kind. An ideal sedum for hot, dry locations is Sedum spathulifolium. It is fairly slow-growing when compared with other

sedums but maintains itself as a low, neat mat and never becomes overgrown or weedy looking.

Small, spoon-shaped, fleshy leaves are produced in plump, silvery rosettes about four inches high. Tiny upright yellow flowers appear in late summer. This sedum has an excellent appearance for situations where plants are seen close up and is effective in ground patterns with other sedums or with low-growing succulents.

Another attractive, dwarf, spreading plant is Sedum stebboldi. It has round, blue-green leaves and rose-pink fluffy flower heads in September and October. Stems and leaves turn pinkish-red in the fall. This plant is excellent for hanging baskets or for containers in lath-houses or other partial-shade locations.

Winterizing Homes Increases Comfort, Economy

With cooler weather already here and more just around the corner, many homeowners are making plans to winterize their homes for increased winter comfort and economy.

A good place to start this job is with the doors and windows, advises W. S. Allen, Extension agricultural engineer, Texas A&M University. Many windows and doors fit loosely but can be tightened easily with weather stripping.

Storm sashes can be helpful in reducing heat loss from the house. In northern areas, addition of storm windows, doors and weather stripping can reduce the fuel bill considerably.

Proper insulation in the unheated attic will also cut fuel bills, says Allen. Place the insulation between the attic floor joists to help reduce heat loss from the rooms below. With this insulation, however, there

should be ventilation in the attic. Vents placed in the gable ends of the house, under the eaves or installed in the roof will be adequate. The engineer suggests about four square feet of clear openings for each 1,000 feet of attic floor.

Storm doors, storm windows and attic insulation not only cut heat loss and save fuel but also reduce drafts. This means a more uniform heating system throughout the house, points out Allen. Next summer the insulation in the attic will help keep the house cooler, too.

ARE YOU SHORT OF IRRIGATION WATER?

Then You Need A Self-Propelled Valley System.
Here Is What A Valley Self-Propelled Can Do For You.

1. A valley can stretch water from your well twice as far.
A. For example A 800 GPM Well will supply enough water to cover a quarter section circle with 2 inches of water in 6 1/2 days or 3 inches in 9 1/2 days.
2. Puts on from 3/4 inch to 4 inches of water, distributes it evenly and can be changed to any amount of water in 1 minute or less.
3. Irrigates all crops from high corn to low alfalfa, sugar beets to cattle pasture.
4. Saves land leveling expenses.
5. You can use dry land farming practices.

Whether Your Land Is Sandy Or Tight, Flat Or Rough,
Valley Self-Propelled Can Do The Job.

1285' SYSTEM OR 160 ACRES
