TIGERS TEAR PAST PONIES

The pigskin packin' acts of brothers Lloyd and Leroy Littlefield sewed up another District 1-B grid erown for Groom in Wheeler Friday night as the Tigers bowled over Wheeler's Mustangs, 28-0, before a slim, frost-bitten crowd.

In dealing the Mustangs their first conference setback, Coach Kenneth Miller's crew claimed their third straight league triumph. Having beaten it's two closest rivals, Claude and Wheeler, the Tigers meet Texline Friday night before wading into district

For the winners it might as well have been Littlefield night as Leroy tallied twice, Lloyd scored one TD and cousin Kit made the final touchdown.

As far as yardage was concerned, the talented ground gaining brother combination netted 252 of Groom's 321 yards rushing while Kit picked up 40 more. Lloyd rolled up 132 wards in 17 carries and Leroy covered 120 yards in 16

Wheeler County Gives Nod To Richard Nixon

Wheeler County, the first county in the state of Texas to report it's complete unofficial election returns to the State Election Bureau in Dallas, picked Richard Nixon and Henry Cabot Lodge, Republican candidates for President and Vice President respectively, by a 1428 to 1011 margin.

With the exception of the presidential race Wheeler County went Democratic. In the Governor's race, Price Daniel received 1820 votes as compared to Republican Steger's 618

EASIER GOING FOR THE DRIVER AND THE LOAD, LONGER LIFE FOR THE TRUCK!

If you don't think scrapping the front axle has made a world of difference, you haven't driven a Chevy in a while. A few minutes behind the wheel and you can feel why drivers are happier and breakable loads are better protected. But the biggest advantage of all, you'll realize, is that the truck itself (sheet metal, tires, chassis components, everything) takes less abuse. With independent front suspension soaking up road shock and vibration, the truck lasts longer, goes extra thousands of miles before trade-in time. Add that to what everybody's always known about Chevy dependability and you find yourself looking at the soundest truck investment you could bet your business on.

up front and as much as 1,900 pounds of load space in between! That's more capacity than a conventional half-tonner. Yet these Corvair 95's are nearly two feet shorter from bumper to bumper. Highly maneuverable. Built to last and bound to save on a busy schedule!

"Imagine my delight when the church men's committee built us a Medallion Home!" says Mrs. Bruce Clark of Stratford, Texas.

"What will my new home be like?" We all ask that question, even when we plan the home ourselves. Well, the Church Men's Committee of the First Christian Church in Stratford came up with the perfect answer when they built a new home for their pastor and his family. They built a Live Better Electrically Medallion Home. And that's pretty easy to understand, because men, as well as women, enjoy the every-day comforts and conveniences that make a house a home and electricity provides most of them. Ask your builder - or Public Service manager - to help you plan a

NAHB Head Tells Goals Of Builders

By MARTIN L. BARTLING, JR.
President
National Association of
Home Builders

Homes better built than ever before in history . . . homes designed with the entire family's use, comfort, and recreation in mind . . . the right kind of homes for all families at prices they can afford.

This is the goal of the 44 000

This is the goal of the 44,000-member National Association of Home Builders. The association is justifiably proud of the fine new homes that have sprung up all over the coun-

try in the postwar years, chang-ing the face of America. To give the public a chance to inspect the latest homes each

year, the NAHB sponsors Nation- BARTLING al Home Week in cities throughout the country. The celebrations this year will be from Sept. 24 to Oct. 2, but some areas have chosen other dates for the unveiling of their new homes.

some areas have chosen other dates for the unveiling of their new homes.

The community-wide celebrations of National Home Week, with their array of open houses, are stellar events in the annual program of some 350 local home builder associations which are affiliated with the NAHB.

Many new products and materials will be seen in this year's new homes—the realization of housing research the NAHB has spearheaded for the past decade.

Through its Research Institute the NAHB is developing new building materials, new ways of using known materials, new building techniques and processes, all of which spell better homes at less cost.

To test the new materials and procedures before their general use, the NAHB has built four research houses—at Knoxville, Tenn.; South Bend, Ind.; Kensington, Md., a Washington suburb, and East Lansing, Mich.

This year the NAHB established a research laboratory in the Washington area to test new building systems. The lab is aimed not so much at producing a better single item that goes into a house but, rather, at producing a better total house.

To help its builder-members improve their own operations, the NAHB holds many regional clinics and conferences on the wide variety of problems before the housing industry, which is the nation's largest industry in dollar volume.
